ARMY AND NAVY JOURNAL.

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOLUME XXIV.—NUMBER 1. WHOLE NUMBER 1197. NEW YORK, SATURDAY, JULY 31, 1886. SIX DOLLARS PER YEAR. SINGLE COPIES, FIFTEEN CENTS.

Publication Office, 240 Broadway, N. Y.

THE order announcing the new Artillery School and light battery details is now in course of preparation, and will probably be out in time for our next issue.

THE HILTON Trophy Match will take place at Creedmoor September 18, the last day of the meeting. The trophy is at present held by the Division of the Atlantic, who won it in 1884, and again in 1885.

THE disability retired list of the Army has again reached the maximum allowed by law—four hundred. The last vacancy was filled by the retirement of Lieutenant DINWIDDIE, of the 2d Cavalry, on July 26.

THE Sundry Civil and General Deficiency Appropriation Bills have passed the Senate during the past week. All the amendments relating to the Army and Navy, which were printed in the JOURNALS of July 17 and 24, were adopted. The bills are now in conference.

THE first 8 in. steel gun ever built in America was tested at Annapolis on Tuesday, with the most satisfactory results. It was fired with 110 lbs. of American cocoa powder and a 250 pound shell, giving 1,966 ft. muzzle velocity and high pressure. The fuel charge will be 125 lbs., giving doubtless, something over 2,000 feet.

THE bill for the increase of the Navy was passed by the House on Saturday last, as reported by the Naval Committee, and upon going to the Senate received a favorable report from the Naval Committee of that body, with a single amendment prohibiting the purchase abroad of any material to be used in the construction of the vessels.

A NEW circular, giving instructions to Paymasters in regard to the payment of mileage under the new law, will be issued by the Paymaster-General of the Army as soon as the Second Comptroller has given a decision upon certain questions, to be referred to him by the Secretary of War, regarding the rates to be allowed on land grant and bonded railroads.

WHAT with Grand Army and Army of the Potomac men of all grades and of all arms of the Service, San Francisco presents this week a decidedly martial appearance, and will continue to do so for some days to come. Hospitality is the order of the day in 'Frisco and vicinity, and the veterans, judging from reports, are enjoying to the full their visit to the Pacific Coast.

THE present understanding is that Commodore BRAINE will succeed Rear Admiral RUSSELL in command of the Asiatic Station when the latter is retired under the 40 years' service act, a month or so hence. We stated some time ago, it will be remembered, that Rear Admiral RUSSELL would apply to be retired under the act referred to in order to give Commodore QUEEN his promotion to a Rear Admiral before his retirement, October 6.

THE San Antonio *Express*, in commenting upon the President's recent appointments of line officers to staff positions, says: "It is beginning to dawn upon the minds of officers on 'paper collar service' at Washington that the President has a far-away look in his eyes when looking for men to bestow meritorious promotions upon. And the soldiers who wear out shoes and saddle coons by service in the field are beginning to congratulate themselves and the country that we at last have a President who will, when promotions are in order, recognize the fact that there are American soldiers doing duty elsewhere than within the shadow of the capitol at Washington."

THE Senate has finally confirmed the nominations for the Medical Corps of the Army and the 3d Cavalry nominations, much to the relief and gratification of the officers concerned, and the officials of the Adjutant-General's Department who have to do with appointments, promotions, etc. Commissions to all of them will go out this week. The Senate has yet to confirm the cavalry promotions, in which the incapacity question is involved, the appointments of Captain SCHWAN and FITZ JOHN PORTER, and the other nominations which have gone in during the past two weeks. These will all doubtless be confirmed within the next few days, though there may be something of a fight over the cavalry cases.

AN attempt has been made this week to revive the sad memories of the Greely Arctic Expedition, and sundry statements reflecting upon Lieutenant GREELY and purporting to emanate from MAURICE CONNELL, a member of the expedition and recently discharged from the Signal Service, have been widely disseminated by the press. These statements have been promptly contradicted by Sergeant BRAINARD and others of the expedition, whose present and past standing gives their words full weight. No good to the dead or to the living can be compassed by the resurrection of these stories, and we fancy the popular taste will condemn the attempt to spread them again before the public, who have long ago heard the case and rendered their verdict upon it.

OUR issue of last week—whole number 1196—completed the twenty-third volume of this paper, and with this number we send out a very full index of the volume. We do not send a title page, but this will be furnished upon application to all who may desire to preserve their numbers by binding. An examination of this index will show how complete the ARMY AND NAVY JOURNAL is in all of its departments, and it is worthy of examination as a review of the ground covered by the fifty-two numbers issued during the year just closed. The JOURNAL this week enters upon the twenty-fourth year of its existence, with increasing assurance of prosperity. Our subscription list is larger than it ever was, and is steadily gaining; each year showing gain, and every month, with here and there an exception. The gain in our advertising is best shown by a comparison of the number of advertisements in the paper for any given week with the number in the issue for the corresponding week of previous years; the number of advertisements in our issues of this year being, for example, two or three times as great as for the same dates fifteen years ago.

ACCORDING to our European exchanges the work of transforming the armament of the German infantry is progressing with enormous strides. At Erfurth 900 artisans were employed during the latter part of June, making a total of 2,200 men engaged upon the conversion of the Mauser to a repeating arm. The present production, says *La France Militaire*, quoting the *Tagblatt* of Leipsic, is 1,200 stand daily, and our Paris contemporary adds, "if we are to believe certain indications that appear unimpeachable, the German Army at this very hour should have at its disposition about 600,000 rifles of the new model." The difficulty with the French War Department, as alleged by our contemporary, is not so much an indifference to the necessity of an infantry armament, as the great number of inventions that have been subjected to inspection and the alarming slowness of the Commission in testing them. "In our opinion," it says, "the question of small arm re-equipment is by no means matured, the superiority of any particular repeating system and of the reduced calibre having yet to be determined. Whether we are to have a magazine at once or a quick charger as a makeshift, it little matters; we have always asserted and we still maintain that the essential advantage of a rapid firing arm is the *morale* it inspires in the ranks; but this *morale* is so preponderant an aid that to ignore or be indifferent to it is to assume a terrible responsibility."

THE Second Comptroller of the Treasury has not as yet rendered an opinion on the question as to when the pay of this year's graduates of West Point as second lieutenants shall commence, for the reason that there has been some delay on the part of the War Department in getting the matter officially before him. It may be that the War Department has assurances as to the passage of the bill to straighten this matter out, which will make it unnecessary for the Comptroller to give another decision. It is evident that something should be done, and that quickly too, to define the status of the graduate between the time of receiving his diploma and the date of his confirmation as second lieutenant. The passage of the bill referred to would settle this once for all, and as it has only passed the Senate it does seem as if it might be pushed through the House before the session closes. In case it is not, and the Comptroller declines to modify his ruling in the RODMAN case, steps will probably be taken by the accounting officers to recover the amounts held to have been overpaid; at least that was the intention of the Comptroller some weeks ago when in a reply to the Secretary of War refusing to alter his opinion in the RODMAN case he said: "The accounting officers will not feel called upon to take any immediate affirmative action looking to the collection or recovery of sums overpaid in cases of the class mentioned, before Congress shall have an opportunity at the present session to act upon the Senate bill referred to, unless such action shall be initiated by the War Department."

LAFAYETTE Post 140, G. A. R. Dept. of New York, has published in handsome pamphlet form its proceedings of May 26 in reference to the death of Col. S. N. Benjamin, U. S. A., Senior Vice Commander. Comrade L. C. Brackett, of the post, an intimate friend of Colonel Benjamin, paid an eloquent tribute to his memory and services, and was followed by others. Commander Wilbur F. Brown, before acting upon the resolutions, said: "Among the last acts of his life was the forwarding of his donation to provide flowers for the tombs of the dead. The flowers which shall be strewn about the graves of this post will in part be provided by him whose grave we shall also decocrate. Thus may it be said. 'The dead shall honor the dead.'" The frontispiece is an excellent likeness of Colonel Benjamin.

PERSONAL ITEMS.

GENERAL A. G. BRACKETT, U. S. A., has left Texas on a few weeks' leave.

COLONEL GUY V. HENRY, U. S. A., has left Omaha on a fortnight's leave.

CAPTAIN GEO. M. WHEELER, Corps of Engineers, U. S. A., is at Bar Harbor, Me.

GENERAL R. B. AYRES, U. S. A., will return to St. Augustine, Fla., early in October.

CAPTAIN T. F. TOBEY, 14th Infantry, has left Vancouver Barracks on a month's leave.

COLONEL A. W. EVANS, U. S. A., and Mrs. Evans are at Congress Hall, Cape May, N. J.

LIEUTENANT G. B. DAVIS, 23d U. S. Infantry, a recent graduate, is visiting friends in Buffalo.

LIEUTENANT C. ST. J. CHUBB, 17th Infantry, has taken charge of the Subsistence Depot at Cheyenne.

CAPTAIN C. B. SEARS, Corps of Engineers, U. S. A., soon due at Willet's Point, is visiting at Seabright, N. J.

GENERAL RUFUS INGALLS, U. S. A., has been visiting in Washington lately, and goes from there to California.

LIEUTENANT A. S. CUMMINS, 4th U. S. Artillery, returned to Fort Warren, Mass., this week from a short leave.

LIEUTENANT M. F. WALZ, 12th U. S. Infantry, has rejoined at Plattsburg Barracks, N. Y., from a four months' leave.

CAPTAIN S. A. DAY, 5th U. S. Artillery, under his recent promotion takes command of Battery M at Fort Hamilton.

CAPTAIN J. R. BRINCKLE, 5th U. S. Artillery, left Fort Hamilton, N. Y. H., this week, to be absent until September.

LIEUTENANT B. H. RANDOLPH, 3d U. S. Artillery, rejoined at Washington Barracks early in the week from a short leave.

CAPTAIN H. W. LAWTON, 4th Cavalry, is winning great praise from all sides for his excellent service in the field in Arizona.

CAPTAIN GAINES LAWSON, 25th U. S. Infantry, will commence next week his inspection of the 2d Brigade of Illinois State troops.

CAPTAIN J. W. JACOBS, Assistant Quartermaster, U. S. A., has established his office at No. 2 Peters street, West End, Atlanta, Ga.

COLONEL GUY V. HENRY, U. S. A., is availing himself of a fortnight's leave before the commencement of the Platte rifle competitions.

LIEUTENANT J. E. MACKLIN, 11th Infantry, and family, have arrived at Ft. Sully, Dakota, and been hospitably welcomed by old friends there.

MAJOR EDMOND BUTLER, 2d U. S. Infantry, a new arrival at Fort Omaha, Neb., presided over a General Court Martial in session there this week.

MAJOR GENERAL O. O. HOWARD, U. S. A., who has been visiting his mother at Glencoe, Ill.. was expected to return to San Francisco this week.

CAPTAIN G. G. LOTT, 11th U. S. Infantry, is expected shortly at David's Island, N. Y. H., where he is ordered on recruiting service from Fort Sully, D. T.

LIEUTENANT C. W. HARROLD, 3d U. S. Artillery, on sick leave at Victoria, Fla., for several months past, has received six months' extension of his leave.

CAPTAIN JAMES ULIO, 2d U. S. Infantry, is to have charge of the rifle camp at Belleone, Neb., during the Department Platte rifle competitions next month.

LIEUTENANT R. K. EVANS, 12th U. S. Infantry, contributes to the Atlantic Monthly for August, a frank and interesting paper on the "Indian question in Arizona."

1ST LIEUTENANT A. B. BLOCKSOM, 6th Cavalry, concluded this week his inspection of the 2d Brigade of the Ohio National Guard, and next week will inspect the 3d Brigade.

HARRY CHILDRESS, of Greenville, Texas, lately received a handsome medal from the British War Department, in recognition of service in the Soudan campaign of 1884 and 1885.

SINCE taking charge of the Allegheny Arsenal Commandant G. W. McKee, U. S. A., has taken the main engine down, a costly piece of machinery, preparatory to shipping it, should the authorities so desire.

COLONEL R. I. DODGE, 11th U. S. Infantry, concluded, this week, his inspection of the Iowa troops at Oscaloosa, and on August 16 will commence his inspection of the troops to be encamped at Marshalltown, Iowa.

AN excellent crayon portrait of the late General E. O. C. Ord, U. S. A., the work of Stockton Stokes, presented to Pennsylvania Reserve Post, No. 191, G. A. R., by Colonel Sharp, of Carlisle, is on exhibition in Philadelphia.

PETER WOLF, of Brownville, Lebanon County, Pa., who recently hung himself in an old uninhabited house on Swatara Creek, was eighty years old, one of the "forty-niners," of California, and a veteran of the Mexican and Civil Wars.

ISABELLA ASHE entered suit at Washington, last week, against General Sheridan for $1,500, which she alleges were paid to him for her benefit by her brother John. The case is a suit to determine the ownership of certain funds in General Sheridan's hands, to which there is more than one claimant.

THE Governor of Michigan, in a recent order congratulating the State troops on the success of the encampment at Island Lake, "recognizes and appreciates the valuable service as United States Inspector rendered by that gallant and distinguished soldier and gentleman, Brevet Colonel A. C. M. Pennington, Major 4th U. S. Artillery."

CAPTAIN W. B. RISSE, Co. D, 5th Ill. N. G., is enjoying a vacation at Nauvoo, Ill.

CAPTAIN J. M. KELLEY, 10th U. S. Cavalry, has joined at Jefferson Barracks, Mo.

SURGEON-GENERAL ROBERT MURRAY, U. S. A., visited friends in New York this week.

MAJOR J. W. WHAM, Paymaster, U. S. A., left New York, this week, on a month's vacation.

CAPTAIN R. H. PRATT, 10th Cavalry, returned to Carlisle Barracks, Pa., this week, from a trip to Washington.

ASSISTANT SURGEON W. O. OWEN, U. S. A., rejoined at Fort Schuyler, N. Y. H., this week, from a visit to Lynchburg, Va.

MAJOR C. W. RAYMOND, Corps of Engineers, has temporarily moved his office from New Orleans to New York City.

MAJOR H. F. BREWERTON, U. S. A., returned to Fort Schuyler, N. Y. H., this week from a few weeks sojourn on Staten Island.

CAPTAIN H. S. HOWE, 17th Infantry, lately arrived at Carter Station, Wyo., has left there again on a fortnight's visit East.

SURGEON CALVIN DE WITT, U. S. A., lately at Newport Barracks, Ky., has arrived at Fort Sully, Dakota, and taken charge of medical matters there.

PAYMASTER A. E. BATES, U. S. A., lately entered upon duty at St. Paul, has located for the summer, with his family, at the Hotel Lafayette, on Lake Minnetontea, a few miles from the city.

DR. J. B. GIRARD, U. S. A., left New York on July 29, by steamer *Gellert*, Hamburg Line, for France, where he expects to remain for three months. He goes to visit his father, who is very ill. Dr. Girard will be at his post at Fort Schuyler by the end of October, when his leave expires.

SURGEON J. R. GIBSON, U. S. A., relinquishes duty at St. Augustine, Fla., next week and, after a three months' leave, will report at Fort Leavenworth for assignment to duty in the Department of the Missouri. He will likely be succeeded at St. Augustine by Surgeon Passmore Middleton, U. S. A.

LIEUTENANT-GENERAL SHERIDAN is reported as delighted with his new experience as a suburban farmer. Instead of sending his wife and children to a crowded seaside hotel or fashionable resort this year, he rented a thirty-acre farm near Washington, where he picks his own peas, digs his own potatoes and enjoys freedom from intrusion.

THE San Francisco *News Letter* says: "Angel Island is again coming to the fore, and last Saturday the officers stationed there gave one of the pleasant little hops for which that post has always been so noted....News has been received of the safe arrival in New York of the Misses McAllister, who have been parted with in California with sincere regret."

MISS FANNIE PADDOCK, daughter of Bishop Paddock of Brooklyn, N. Y., has, says the Kansas City *Times*, been at Fort Custer since July 1. Miss Paddock is a sister of Mrs. Lieut. Mills, a lady of uncommon beauty and excellence, whose departure with her husband next month to his new field of military labor will be sincerely regretted by all who value a genuine article.

MISS SALLIE T. BAILEY, daughter of the late Col. G. D. Bailey, U. S. A., who was killed at Fair Oaks, was married July 6, at Atwood, Kas., to the Hon. Howard Carpenter, of Oberlin. After the ceremony the married couple left for Houlton, Me., for a few weeks visit and will then take up their permanent residence at Oberlin. Mrs. Carpenter is a granddaughter of Col. Geo. Potter.

COLONEL FRED. GRANT, says the Cincinnati *Commercial*, is a chip out of the old block. He is working like a beaver to pay his debts and re-establish himself. He is employed by a house-finishing and wood-working concern, and also derives some income from his articles on the war. "I shall not be satisfied," he says, "till every dollar lost through my advice is restored to its rightful owner."

THE Omaha *Excelsior* of July 24 says: "Co. D, 6th Infantry, is in camp on North Fork of Montezuma Creek, and think it a God-forsaken country. They very much miss their captain, Murdock, who was drowned....Mrs. Van Liew, wife of Lieut. F. T. Van Liew, 2d Infantry, will join her husband at Fort Omaha, the last of this month....The assignment of brand new second lieutenants from West Point has been made, but the 2d Infantry has been skipped, so Omaha does not get a man of them; or, boy of them, would be better, perhaps."

LIEUTENANT JOHN F. MCBLAIN, of the 9th Cavalry, whose nomination for promotion to 1st lieutenant was rejected last spring by the Senate, and who is to be tried by Court-martial, is thus described: "He is a very blonde young man of less than thirty years, who was born and raised in one of the Philadelphia suburbs, and who enlisted in Capt. Norwood's troop of the 2d Cavalry in 1872, and served five years in Wyoming and Montana, most of the time as a sergeant. The Senate decided that he was unfit to be a 1st lieutenant because he had rejected his wife for social reasons, and a junior officer to him was promoted over his head. This action of the Senate has led to the Court-martial just ordered."

GENERAL W. T. SHERMAN recently visited San Jose, but while there declined to be the guest of the Mayor, saying: "I much prefer to stay at a public hotel, and have made it a general rule to do so, for this reason: I have found in travelling--especially in the large cities—that where I accepted private hospitalities I was taken to elegant residences and entertained magnificently, but there are a great many old soldiers who did their duty nobly and who are now, to a great extent, as a result of that meritorious duty, not blessed with much of this world's goods. Their clothes are not of the latest cut, but yet they desire to see and shake hands with me just as much as their more prosperous comrades, and I am sure I desire to see them. But the man whose boots are dusty or whose clothes are shabby has a reluctance to go to a stylish private residence, when he would readily call on me at a hotel. This is the reason that I must decline your kind hospitality."

COLONEL JOSEPH B. BROWN, Surgeon, U. S. A., whose military services we recounted last week, was duly retired for age July 26.

PAYMASTER W. F. TUCKER, U. S. A., who is ordered to duty in Washington, is detained in Chicago by the serious illness of his father.

LIEUTENANTS F. L. DODGE and O. L. Wieting, 23d Infantry, of Fort Wayne, Mich., were visitors at Newport Barracks, Ky., this week.

LIEUTENANT E. A. GARLINGTON, 7th Cavalry leaves Fort Buford, D. T., in a day or two for the East, to be absent seven or eight weeks.

MRS. BRUSH, wife of Lieut. Brush, R. Q. M., 17th Inf., on arriving at Omaha on the steamer *General Terry* came East for a visit with her family.

COL. WALTER MCFARLAND, Corps of Engineers, U. S. A., has returned from his visit to Hot Springs, Ark., and visited New Haven, Conn., this week.

GENERAL J. A. POTTER, U. S. A., retired, having spent a very pleasant season at Caconna, P. Q., Canada, has just left the latter place for his home, Painesville, O.

COLONEL FRANK WHEATON, 2d U. S. Infantry, and family have been the guests of General Dandy at Omaha until their quarters at the Fort are ready for occupancy.

THE Court of Inquiry at Fort Cœur d'Alene, Idaho, presided over by Gen. H. A. Morrow, U. S. A., has completed its business and adjourned. The promulgation of the findings of the court are looked forward to with interest.

MAJOR JAMES M. BELL, Captain 7th Cavalry, who is temporarily in charge of the Red Cloud Indian agency as acting agent, is disgusted with the duty and has tried to resign, but the Interior Department officials refuse to let him go.—*Critic.*

ON the way down the Missouri from Fort Lincoln, near the mouth of the Cottonwood, one of the men of the battalion of the 17th Infantry was lost overboard and, dropping near the wheel, was drowned. He was one of the best soldiers in the command.

COLONEL DE LANCEY FLOYD-JONES, U. S. Army, lately returned to the U. S. from a trip around the world, was in Chicago a few days ago, and is making good progress towards his home at South Oyster Bay, Long Island, where he hopes to spend the remainder of the summer.

LIEUTENANT H. J. REILLY, 5th Artillery, who has filled with great ability for some years past the position of quartermaster and commissary at Governor's Island and Fort Columbus, N. Y. H., relinquished the duties this week and will avail himself of much-needed rest, on a two months' leave.

LIEUTENANT WILLIAM GEORGE ELLIOT, son of Lieutenant-Colonel Elliot, of the Engineers, is visiting his father in Newport, R. I. Lieut. Elliot was recently graduated at West Point and has been assigned to the 9th U. S. Infantry. At the expiration of his leave of absence he will join his regiment in Arizona.

GENERAL BOULANGER'S bitter enmity toward his former patron and benefactor, the Duc d'Aumale, is explained. One of his first acts on becoming Minister of War was to search the records and find what had been said of himself. He found that the Duc had reported him to be "a good officer, active, very intelligent, but badly brought up." Hence.

THE Field-Marshal Archduke Albert of Austria is taking a leading part in raising funds for a monument to Radetzky. He alludes to Radetzky's 72 years of service, under five monarchs, says he was a father to his soldiers, and calls him "the great Austrian, the model of dynastic fidelity and patriotism." In another sentence the famous soldier is referred to as "Father Radetzky, the most popular of military heroes."

JANE AUGUSTA COUES was granted a divorce July 29 from Dr. Elliott Coues, the well-known theosophist and professor of the Smithsonian Institution. The charge brought against him was desertion. By the decree the defendant is allowed the custody of his son and the plaintiff the custody of their other two children. The decree entitles Mrs. Coues to $50 per month alimony and her counsel fee of $100 and the costs of the suit are also to be paid by Dr. Coues.

THE Winona *Times* of July 15 says: "Surg. W. G. Spencer, U. S. A., and Mrs. Spencer delightfully entertained the officers and ladies of the garrison Friday evening. The reception was given as a parting compliment to the 17th Infantry, and in honor of their guests from Nashville, Mrs. J. C. McCrory and two daughters, respectively the mother and sisters of Mrs. Spencer. They have come to remain during the summer, and are accomplished, cultured ladies, possessed of all those gracious charms for which Southern women are justly famous."

THE Vancouver *Independent* of July 22 says: Miss Annie Sparling, of Seattle, is visiting Major Burke's family....Asst. Surg. M. W. Wood, Fort Walla Walla, has returned from leave....Lieutenant G. T. T. Patterson, 14th Inf., and wife, departed Saturday for Bellaire, Ohio....Gen. John Gibbon, wife and daughter, and Lieuts. Wisser and McClernand arrived Monday from the East....Col. Frank Wheaton, Captain Abner Haines, Lieuts. S. E. Clark, John Kinzie, C. W. Rowell and W. R. Abercrombie, of the 2d Infantry, detained at Fort Cœur d'Alene, have gone East to join their commands.

THE Presidio *News* has the following Fort Davis, Texas, items: Most of the officers have been at Fort Hancock this week to attend a G. C. M....Major Gibson, Chief Paymaster, paid the troops Monday. ....Col. and Mrs. A. G. Brackett left this week to enjoy a three months' leave....Major C. H. Carlton is in command during the absence of Col. Brackett and until the return of Lieut.-Col. D. R. Clendenin, who will arrive early next month....Mrs. Gardner, wife of Major W. H. Gardner, Post Surgeon, has gone to Madison, Wis., to spend the summer. Major Gardner will soon join Mrs. Gardner....Captain C. Morton, 3d Cavalry, and his youngest child were thrown from a buggy at Fort Concho, by the horses running away, but fortunately neither of them was injured.

355.05
AN

GENERAL T. L. CRITTENDEN, U. S. A., and Mrs. Crittenden are at Long Branch.

GEN. WESLEY MERRITT, U. S. A., registered at the Grand Hotel, New York, on Wednesday.

LIEUTENANT W. N. P. BARROW, 4th U. S. Artillery, a graduate of this year, is visiting at Underhill, N. Y.

LIEUTENANT G. B. DAVIS, 23d U. S. Infantry, who was graduated in June last, is visiting relatives at Utica, N. Y.

THE retirement, July 26, of 1st Lieut. W. A. Dinwiddie, 2d Cavalry, promotes 2d Lieut. T. J. Lewis to a 1st lieutenancy.

SERGEANT D. L. BRAINARD, of the Greely Arctic Expedition, is visiting Wm. Bradford, the artist, at New Bedford, Mass.

CAPTAIN CHARLES HOBART, 3d Inf., and 1st Lieut. Charles A. Vernou, 19th Inf., are this week added to to our list of officers ordered on recruiting service.

THE death of 1st Lieut. W. H. Low, 20th Infantry, promotes 2d Lieut. H. A. Green to 1st lieutenancy. He will remain at Fort Assinniboine, but changes from Co. I to Co. H.

CAPTAIN JOHN L. VIVEN, 12th U. S. Infantry, is in command of the post at Plattsburg Barracks, N. Y., during the absence of Lieut. Col. R. S. La Motte, who is on a visit to California.

2D LIEUT. F. J. KERNAN, 21st Inf.; Capt. R. H. Pratt, 10th Cav., and 2d Lieut. J. J. Weinberg, 13th Inf., were registered at the office of the Adjutant General during the current week.

COLONEL THOS. F. BARR, Judge-Advocate, U. S. Army, is soon to leave Fort Snelling for Chicago for duty with Major-General Terry, a circumstance which will be much regretted in St. Paul.

SINCE Maj. Gen. Hancock's death there seems to be an idea prevalent in some sections of the North that a new hero of Gettysburg must be elevated to his place on the roll of honor.—*Savannah News.*

THE following is a copy of an autograph note received lately by a gentleman in New York:

SIR: I am too old to quarrel, too old to boast. The man of sense in his old age likes to be let alone. With respect, yours, etc., JEFFERSON DAVIS.

LIEUTENANT E. H. CROWDER, 8th Cavalry, on college duty at Columbia, has been ordered to join his troop at Fort Ringgold, Texas. The order, says the Kansas *Times*, was quite a surprise to him. He has only been on duty there a year and expected to remain two years, the length of time for which a detail of this kind is made.

GENERAL WRIGHT'S daughter, Mrs. Lizzie Wright Owen, asks a pension of $50 per month. Californians will naturally feel kindly to a measure of relief for the old veteran's daughter. The General commanded this department through the darkest days of the war, and did much toward maintaining California and Oregon's reputations as loyal States. He was drowned in the wreck of the steamer *Brother Jonathan* on July 30, 1865, while en route from San Francisco to Portland to take command of the Department of the Columbia. His son, Col. Thos. F. Wright, who commanded the 2d Cavalry, and was a 1st lieutenant in the 12th Inf., was killed in the Modoc war in 1870. The daughter who is applying for a pension is the widow of the late Capt. Philip A. Owen, of the 9th Infantry.—*San Francisco Post.*

THE bill to restore to the Service and retire Wm. P. Chambliss, late major 4th Cavalry, who resigned in 1867, has finally been agreed upon by the two Houses of Congress. They had a solemn difference on the question as to whether he should be called William P. or William B, and the bill went to a conference with the following result: "The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 68) for the relief of Wm. P. Chambliss, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendment numbered 1. Strike out the name of Wm. B. Chambliss wherever it appears in the bill and insert the name of Wm. P. Chambliss."

CAPT. R. W. MEADE, U. S. N., visited New York this week.

ENSIGN A. L. KEY, U. S. N., of the *Ranger*, is in Washington.

CHIEF ENGINEER G. W. MAGEE, U. S. N., will spend August and September abroad.

REAR ADMIRAL CLITZ, U. S. N., and family are at the Victoria Hotel, Asbury Park, N. J.

REAR-ADMIRAL M. SMITH, U. S. N., was a recent guest at the Continental Hotel, Philadelphia.

COMMODORE J. G. WALKER, U. S. N., goes to Switzerland in August on a brief visit to his family.

PAYMASTER F. H. HINMAN, U. S. N., registered at the Grand Hotel, New York, early in the week.

PAYMASTER J. R. CARMODY, U. S. N., registered at the Grand Hotel, New York, early in the week.

LIEUTENANT-COMMANDER C. M. THOMAS, U. S. N., is a patient in the Naval Hospital at Norfolk, Va.

SECRETARY WHITNEY was one of the pallbearers at the funeral of Mr. Hubert O. Thompson on Thursday.

REAR ADMIRAL S. P. CARTER, U. S. N., and Mrs. Carter, are recent visitors to Lakeside, near Cleveland, O.

REAR ADMIRAL A. LUDLOW CASE, U. S. N., sailed for France on Saturday last on the steamer *St. Laurent.*

LIEUTENANT-COMMANDER G. C. REITER, U. S. N., registered at the St. James Hotel, New York, on Thursday.

LIEUTENANT CHARLES O. ALLIBONE, U. S. N., arrived in Washington early in the week from Norfolk, Va.

CAPTAIN GEO. BROWN, U. S. N., returned to Norfolk, Va., early in the week, from a brief visit to Boston, Mass.

PAYMASTER S. R. COLHOUN, U. S. N., has returned to Newport, R. I., from Washington, having passed his examination for promotion.

PAY DIRECTOR J. S. CUNNINGHAM and Lieut. G. F. W. Holman, U. S. N., and Mrs. Holman were guests this week at the Ocean House, Newport, R. I.

PAYMASTER D. A. SMITH, U. S. N., who is to leave Norfolk, Va., this week, is, says the *Landmark*, very popular on the station and has many warm friends.

REAR ADMIRAL C. R. P. RODGERS, U. S. N., has left Washington, D. C., for the summer, and is at present residing at Sweet Springs, Monroe County, West Virginia.

IRVING M. SCOTT, the great steel manufacturer of the Pacific Coast, is at the Riggs House again from a visit to various war-ship building establishments in the East. He wants to build a steel man-of-war in San Francisco Bay.—*Washington Critic.*

SECRETARY WHITNEY has remitted the unexecuted portion of Court-martial sentence of 2d Lieut. Carroll Mercer, U. S. M. C., sentenced June, 1885, for two years' suspension on half pay and to retain number, for drunkenness on the Panama Expedition.

ASST. ENGR. W. M. MCFARLAND, Comdr. Nicoll Ludlow, Asst. Paymr. S. L. Heap, Ensign T. S. Rodgers, Naval Cadet W. L. Capps, Lieut. C. O. Allibone, Lieut. S. C. Lemly and Boatswain H. Dickinson, registered at the Navy Department during the week.

THE longevity pay case of Capt. M. F. Watson is to be appealed to the Supreme Court, the accounting officers of the Treasury having refused to allow any additional arrears, beyond what is now allowed under the Morton decision, under the recent opinion of the Court of Claims in his case.

THE following Engineer officers of the Navy were on Monday detailed to test the engines of the new cruiser *Atlanta* on hee trial trip: Chief Engineer J. R. McNary, P. A. Engineers James Entwistle, J. A. B. Smith and Harrie Webster, Asst. Engineers H. P. Norton, A. M. Hunt and G. H. T. Babbitt, and Cadet Engineers W. W. Bush, T. J. Hogan and I. B. Parsons.

THE subscription list to the monument fund of Asst. Engr. Harry S. Elseffer, U. S. N., who was accidentally killed at Wakefield, Neb., a few months ago, now amounts to $210, and each mail is bringing additions thereto. Asst. Engr. Bevington, U. S. N., has charge of the worthy object. The sum of $74 was this week received from the officers and men of the *Monocacy.*

THE Pittsburg *Despatch* says: "Lieutenant Scott, Chief of the Steam Engineering Department of the U. S. Navy, is in the city, to inspect some crankshafts being made by the Miller Forge Company. He says that Pittsburg manufacturers are in the lead, and believes that Pittsburg will secure the armor-plate contracts." This doubtless refers to Chief Engineer John A. Scot, U. S. Navy, on special duty at Pittsburg.

LIEUT. S. C. LEMLY, who was ordered to special duty on the Asiatic station, in connection with the court-martial of Paymr. Geo. R. Watkins, of the *Ossipee*, charged with fraud and embezzlement, returned to Washington Tuesday evening last, bringing with him the record of that court-martial case. The sentence of the court was, as sent by cable from Yokohama, three years imprisonment in a prison to be designated by the Secretary of the Navy, and subsequent dismissal from the Service. The Secretary has not yet acted upon it, and until it is approved and the prison selected, Paymr. Watkins will remain in prison at the Mare Island Navy-yard, where he now is.

RECENT DEATHS.

GENERAL JAMES H. VAN ALEN, a prominent and wealthy resident of New York City, was lost overboard from the Cunard steamer *Umbria* while en route from Liverpool to New York on her last voyage. He had not been well, and was under the doctor's care on board ship, and is supposed to have arisen during the night, in the absence of his attendant, and to have either thrown himself overboard or fallen into the ocean. During the war General Van Alen set a worthy example to other rich men. He raised and equipped a regiment with his own private means, and went to the front himself. He was appointed by the Governor of New York to the rank of Brigadier-General on April 15, 1862, and resigned July 14, 1863, owing to ill health. He was Military Governor of Yorktown, Va., in June, 1862, and on the 14th of that month issued an order directing that all negroes in his department, "contraband or otherwise," should be under the immediate charge and control of the provost marshal, be allowed full liberty and receive rations. General Van Alen has resided almost continually for some years past at Newport, R. I., where his death will be sincerely regretted.

MAJOR DANIEL SIMPSON, the veteran drummer of the Ancient and Honorable Artillery Company for 66 years, died at South Boston, July 28, at the age of 96. His first appearance as a drummer was at a muster in 1800. In 1812 he was with the New England Guards when they started for Marblehead to defend the coast, and he was the only drummer at the Broad street riots. His coat sleeve was decorated with 16 stripes, representing 80 years of service. He came of good Revolutionary stock, his paternal grandfather being a piper in Gen. Washington's guard, and his father distinguished himself by capturing a British soldier on the retreat from Concord, and also was at the battle of Bunker Hill.

1ST LIEUTENANT WILLIAM H. LOW, Jr., 20th U. S. Infantry, died at Fort Assinniboine July 24. He was a native of New York, appointed, from Illinois, to West Point in 1868, was graduated in 1872, and promoted 2nd lieutenant. On the 20th of April, 1877, he was promoted 1st lieutenant. His service has been mainly on the frontier, and he bore the reputation of being an excellent duty officer. In 1876 he commanded the Gatling gun battery on the Sioux expedition of that year, and in 1877 was Acting Assistant Engineer on the Yellowstone expedition. His loss will occasion deep sorrow to the regiment and his many friends.

SECOND ASSISTANT SECRETARY OF STATE WILLIAM HUNTER, the oldest official in continuous service in the United States, died July 22 in Washington of a complication of diseases incident to old age. He was born in Newport, R. I., Nov. 8, 1805, and was the son of a former Senator of the same name. In his fifteenth year he entered the Military Academy at West Point as a cadet, but after two years' study was compelled to resign on account of an affection of the eyes. Various circumstances induced him in 1829 to accept a clerkship in the Department of State at Washington, where he acted, at first, chiefly as a translator. In 1852 Daniel Webster made him chief clerk, and in 1853 he was offered the position of First Assistant Secretary of State, which he declined. In 1866 he accepted the position of Second Assistant Secretary of the Department, and had held it ever since.

THE infant son of Lieut. F. J. Kernan, 21st U. S. Inf., died at Monterey Springs, Pa, July 20. Much sympathy is felt for the bereaved parents. Mrs. Kernan is a daughter of Gen. O. D. Greene, U. S. A.

BENJAMIN GRIFFIN BARNEY, who served in the Mexican War, and with distinction as a General officer of Volunteers during the War of the Rebellion, died at San Francisco, July 23.

GUNNER CHARLES STEWART, U. S. Navy, of Washington, died at Newport, R. I., July 21, in his fifty-first year. He was appointed Gunner, Oct. 22, 1859.

PETER RADCLIFFE HAWLEY, who held a prominent position for several years in the U. S. Coast Survey service, died at San José, Cal., July 21.

LAURA RUNYON KELLOGG, an infant grandchild of Gen. J. B. McIntosh, U. S. A., died at New Brunswick, N. J., July 22.

LATE ARMY ORDERS.

2d Lieut. Samuel E. Allen, 5th Art., Inspector of Rifle Practice, will proceed to Creedmoor, N. Y., on official business (S. O. 97, Div. A., July 30.)

Sergt. John Houser, Batt. I, 5th Art., having completed the duty devolved upon him by orders from camp at Creedmoor, L. I., will return to the camp (S. O. 97, Div. A., July 30.)

The following changes in the Q. M. D. are ordered: Capt. J. L. Clem, A. Q. M., from Fort McHenry, Md., to Ogden, Utah; Capt. C. H. Ingalls, from Ogden to Hot Springs, Ark.; Capt. H. J. Haynesworth, from Hot Springs to Philadelphia, as assistant to Capt. J. V. Furey, A. Q. M., in Clothing Depot (S. O., H. Q. A., July 30.)

The following transfers in the 4th Artillery are ordered: 1st Lieut. T. C. Davenport, from Batt. E to Batt. I; 1st Lieut. H. R. Anderson, from Batt. M to Batt. E; 1st Lieut. M. M. Macomb, from Batt. I to Batt. M (S. O., H. Q. A., July 30.)

1st Lieut. A. G. Tassin, 12th Inf., on special duty at Fort Monroe, will join his company at Madison Barracks, N. Y. (S. O., H. Q. A., July 30.)

Lieut.-Col. W. P. Craighill, C. E., will proceed to Washington, D. C., on business connected with the proposed Bennington Battle Monument (S. O. H. Q. A., July 30.)

THE CHARGES OF CONSUL SILER.

THE report of Capt. E. E. Potter, commanding the South Atlantic station, upon the charges against Paymr. Hobbs, of the *Juniata*, and Paymr. Thompson, of the *Lancaster*, of collusion with a ship chandler at Cape Town, preferred by U. S. Consul Siler at that port was received by Secretary Whitney on Monday. An investigation was made by Capt. Potter by direction of Secretary Whitney, and he reports that the allegations were not sustained by the evidence, and that the supplies for the *Juniata* and *Lancaster* were regularly purchased after other business houses had been afforded an opportunity of competing. Mr. Joseph Grady, the ship chandler complained of, has good commercial standing. Capt. Potter's report is accompanied by affidavits of Mr. Grady and statements of reputable business houses in Cape Town, citizens and foreign officials residing there. In regard to the supplies for the *Lancaster*, which was commanded by Capt. Potter, that officer states that the ship was fairly and reasonably served and that better satisfaction could not have been given by any business house in Cape Town. The report of Capt. Potter and the statements of those persons interrogated by him reflect seriously upon the character of the person by whom the charges were made. No action has yet been taken by the Navy Department, but in all probability Capt. Potter's report will be considered as final.

La France Militaire, of July 12, says: "The Minister of War has issued an order to distribute, before August 1, repeating arms, model of 1884, among 16 regiments of infantry of the 5th, 6th, and 7th corps, and all the battalions of chasseurs." The same paper, of the 11th, reports the successful trial at Thorn, in Germany, of a revolving cannon of ten shots, especially designed to protract the forlorn hope in its assault of strongly defended positions. The projectile bursts upon leaving the cannon, sweeping ramparts and ditches up to 90 or 100 yards. The trials have been very satisfactory but one is prompted to ask what the sharpshooters of the enemy with their repeating small arms and the Hotchkiss quick-firing cannon will have to say about the matter.

THE NEW NAVAL VESSELS.

SECRETARY WHITNEY OUTLINES HIS PURCHASE POLICY.

NAVY DEPARTMENT,
WASHINGTON, D. C., July 27, 1886.

Hon. J. D. Cameron, Chairman of the Committee on Naval Affairs of the United States Senate:

SIR: I observe that some discussion has taken place with reference to certain clauses contained in the bill authorizing additional ships, etc., which is now before your committee. That there may be no misunderstanding in regard to my future action under those clauses, I take the liberty of making this statement to your committee.

One of the clauses contained in the sixth section of the bill provides: "That the Secretary of the Navy may purchase abroad only such shafting and other special materials as it may be impossible to obtain in the United States in time for use in the construction of the vessels herein provided for."

As originally adopted by the House Committee, this sixth section authorized the Department to buy or have constructed the materials of one of these vessels abroad. At my suggestion it was stricken out. At that time I addressed a letter to the committee upon the subject, from which I take the liberty of quoting, and from it your committee will be able to gather my purpose and intention with regard to those clauses:

In the matter of the engines and machinery of naval vessels, it must be conceded that we are behind some other countries. The type of engines for naval vessels being quite different in many respects from those of merchant vessels, the naval engine is necessarily a speciality rather by itself: the necessity for the economy of weight and space and the production of immense power being the objects aimed at, whereas in merchant ships economy of running is usually the point aimed at. Our backwardness in this line of industry has not arisen from any lack of ingenuity on the part of our people, but because we have been building very few naval engines.

I think our true policy is to borrow the ideas of our neighbors so far as they are thought to be in advance of ours, give them to our shipbuilders in the shape of plans; and having this object in view, I have been anxious to acquire detailed drawings of the latest machinery in use abroad and should feel at liberty to spend more money in the same way in getting hold of the latest things as far as possible for the purpose of utilizing them.

We have made quite important accumulations in this line during the last six months. I think I ought to say to the committee that I have placed myself in communication with some of the principal marine engine builders of the country within the last three months for the purpose of conferring with them upon this subject. I detailed two officers of the Navy, a chief engineer and a line officer, who, under my direction, visited the principal establishments in the East. They recognize that in the matter of engines for naval ships we are quite inexperienced as compared with some other countries. It is this fact, doubtless, the committee has in view in authorizing the purchase and importation of engines for one of the vessels authorized to be constructed under this act. If the committee will permit me to make the suggestion, I find myself quite satisfied, after consultation with people engaged in the industry in this country, that it would not be necessary for me to avail of that discretionary power in order to produce machines of the most advanced character Our marine engine builders in general express their inability at the present moment to design the latest and most approved type of engines for naval vessels, an inability arising from the fact that they have not been called upon to do anything of importance in that line. At the same time they state that if they were given the necessary time and are asked to offer designs in competition, they would acquaint themselves with the state of the art abroad and here, and would prepare to offer to the Government designs embodying the latest improvements in the art. And they are ready to construct at the present time anything that can be built anywhere else if the plans are furnished. As I find no great difficulty in the way of purchasing plans (in fact there is an entire readiness to sell to us on the part of engine builders abroad) I think the solution of the question will not be very difficult although it may require some time and a little delay.

The Department has a good deal of latitude under the law in the matter of getting designs. I am quite satisfied that we are entitled to avail of any talent wherever it is to be found in the way of buying plans and getting designs made. My observations apply only to the last three lines of the sixth section. There are some heavy forgings which it might be necessary to obtain abroad.

I should hope that it would not be found necessary to purchase anything abroad. Such purchases would certainly be limited to some few things for which our builders may not be entirely prepared at present, and which it might be wiser to purchase abroad rather than delay the construction. I know of nothing to which it would apply, except, perhaps, the shafting and a few heavy forgings." This clause in the bill is in fact only required as a protection to a contractor against being caught upon some small part impossible to procure in this country.

The other clause to which I desire to refer has relation to the armor contained in section 4 of the bill, which provides:

That the armor used in constructing said armored vessels and for completing said monitors shall be of the best obtainable quality and of domestic manufacture, provided contracts for furnishing the same in a reasonable time, at a reasonable price, and of the required quality, can be made with responsible parties; otherwise the Secretary of the Navy is hereby authorized to purchase the same, or any part thereof, and import it. Such armor shall be accepted only after passing such tests as shall be prescribed by the Secretary of the Navy and inserted in the contracts.

It is quite well known to be my opinion that this country should be independent of every other in the way of producing war ships and war material. It is aside from all questions of commercial policy. The small amount of armor purchased of recent years by the Department has been obtained abroad, but the present bill, if enacted into a law, will enable the Department to offer to the competition of domestic manufacturers a sufficiently large contract to induce the establishment of a plant in this country for the production of the necessary steel forgings for guns and of the necessary armor. This was the view taken of the matter by the House Committee.

In the working out of the bill in practice this result will necessarily be brought about. The bill will be seen to authorize the construction and armament of ships costing in the neighborhood of eleven millions—$10,778,046. The amount appropriated, viz.: $3,500,000, is based upon the supposed amount required for the work of the current year.

It will be seen, therefore that a large portion of the contemplated expenditure must await the future action of Congress in the way of appropriations. No portion of the armor or for the forgings of the armament can be secured within the current year.

In the exercise of my discretion as to the matters upon which the present appropriation shall be spent, I shall have no hesitation in obligating the present appropriation for the purchase of the armor and gun forgings, if the same can be had in this country, but in any other event I shall await the future action and future appropriations of Congress.

The bidding cannot take place before another Congress shall be in session. It is unbusinesslike not to utilize the present necessary purchases to encourage the establishment of the required plant in this country, and I am quite aware that this was the expectation of the majority of the House Naval Committee, by whom the bill was framed.

I am not aware that there was any criticism (while the bill was in committee in the House) of this proviso permitting the purchase of armor abroad. If there had been I am sure it would have been stricken out.

It doubtless arose from the fact that all were aware of my determination to effect the purchase in this country, and the minds of the members of the committee were so intent upon this as that no failure in this regard was ever contemplated.

Very respectfully,
W. C. WHITNEY, Secretary of the Navy.

THE BILL TO INCREASE THE NAVY.

Following is the text of the bill to increase the Navy as finally agreed upon by the House Naval Committee:

Substitute proposed by the Committee on Naval Affairs for the bill (H. R. 6664) to increase the naval establishment.

Be it enacted, etc., That the President is hereby authorized to have constructed, as hereinafter provided—

First—Two seagoing double-bottomed armored vessels of about 6,000 tons displacement, designed for a speed of at least 16 knots an hour, with engines having all necessary appliances for working under forced draught, and costing, including engines and machinery and excluding armament, not more than $2,500,000 each. Said vessels shall have each a complete torpedo outfit and be armed in the most effective manner.

Second—One protected double-bottomed cruiser of not less than 3,500 nor more than 5,000 tons displacement, designed to have the highest practicable speed and furnished with the best type of modern engines, furnished with necessary appliances for working under forced draught. Said vessel shall cost, including engines and machinery, and excluding armament, not exceeding $1,500,000.

Third—One first-class torpedo boat, costing in the aggregate not more than $100,000.

Sec. 2. That the vessels hereinbefore authorized to be constructed shall be built of steel of domestic manufacture, having a tensile strength of not less than 60,000 pounds per square inch, and an elongation in eight inches of not less than 25 per cent.

Sec. 3. That the President is hereby authorized to direct the completion, as hereafter provided, of the double-turreted monitors *Puritan*, *Amphitrite*, *Monadnock* and *Terror*, at a total cost, exclusive of armament, not to exceed $3,178,046.

Sec. 4. That the armor used in constructing said armored vessels and for completing said monitors shall be of the best obtainable quality and of domestic manufacture, provided contracts for furnishing the same in a reasonable time, at a reasonable price, and of the required quality can be made with responsible parties; otherwise the Secretary of the Navy is hereby authorized to purchase the same, or any portion thereof, and import it. Such armor shall be accepted only after passing such tests as shall be prescribed by the Secretary of the Navy and inserted in the contracts.

Sec. 5. That the Secretary of the Navy shall cause one or more of the new vessels hereinbefore provided for to be constructed and one or more of the said monitors to be completed in one or more of the Navy-yards of the United States; and if he shall be unable to contract with responsible parties to construct or complete, at reasonable prices, all or any of the vessels hereinbefore provided for, he shall cause the same to be constructed or completed in such of the Navy-yards of the United States as may be best adapted thereto.

Sec. 6. That the engines, boilers, and machinery of all the new vessels provided for by this act shall be of domestic manufacture and procured by contract, unless the Secretary of the Navy shall be unable to obtain the same at fair prices, in which case he may construct the same, or any portion thereof, in the Navy-yards of the United States: *Provided*, That the Secretary of the Navy may buy abroad and import such shafting and other material or machinery as he may be unable to procure in the United States: *Provided further*, That the Secretary of the Navy may purchase abroad only such shafting and other special materials as it may be impossible to obtain in the United States in time for use in the construction of the vessels herein provided for.

Sec. 7. That the Secretary of the Navy shall not contract for the construction or completion of any of said vessels, or of their engines, machinery, or boilers, until drawings and specifications of the same shall have been provided or adopted by him; and after said drawings and specifications shall have been provided, adopted, and approved as aforesaid, and work shall have been commenced on any contract made therefor, such plans and specifications shall not be changed in any respect when the cost of such change in the execution of the work exceeds $500, except upon the written order of the Secretary or Acting Secretary of the Navy; and if changes are thus made, the actual cost thereof and the damage caused thereby shall be ascertained, estimated, and determined by a board of naval officers to be provided for in the contract; and in any contract made pursuant to this act it shall be provided in the terms thereof that the contractor shall be bound by the determination of said board, or a majority thereof, as to the amount of increased or diminished compensation said contractor shall be entitled to receive, if any, in consequence of such change or changes. In every contract to be made under this act there shall be prescribed a period within which the work provided for in said contract, or specified portions thereof, shall be completed, and the completion of such work within the periods prescribed shall be insured by penal provisions. For the construction or completion of such vessels hereinbefore provided for as the Secretary of the Navy shall propose to have constructed or completed by contract, as well also for the engines, boilers, and machinery hereinbefore provided for, he shall invite proposals from every American ship-builder and other person who shall show to the satisfaction of the Secretary of the Navy that within three months from the date of the contract he will be possessed of the necessary plant for the performance of the work in the United States which he shall offer to undertake, and such contract shall be let to the lowest and best responsible bidder or bidders, after at least 60 days' advertisement, published in five leading papers of the United States, inviting proposals for the work proposed, which work shall be subject to all such rules, regulations, superintendence by naval officers during construction, and provisions as to bonds and security for the quality and due completion of the work as the Secretary of the Navy shall prescribe; and no vessel, boiler, engine, machinery, or portion thereof shall be accepted unless completed in strict conformity with the contract; and the authority given hereby shall take effect at once. The Secretary of the Navy shall have the power to reject any or all bids made under the provisions of this act.

Sec. 8. That the sum of $1,000,000 is hereby appropriated towards the armament of the vessels authorized by the act of March 3, 1885, of the vessels authorized by section one of this act, and of the unfinished monitors hereinbefore mentioned, and of the *Miantonomoh*; and the Secretary of the Navy is hereby authorized to direct the application of such portions of this sum as may be necessary to the manufacture or purchase of such tools and machinery or the erection of such structures as may be required for use in the manufacture of such armament, or any part thereof: *Provided*, That the Secretary of the Navy may contract with domestic manufacturers for the construction of such portion of the heavy guns herein provided for as may not be built by the Government.

Sec. 9. That the Secretary of the Navy is hereby authorized to contract with the Pneumatic Dynamite-Gun Company of New York for one dynamite-gun cruiser, as follows: Said cruiser to be not less than 230 feet long, 26 feet breadth of beam, seven and one-half feet draught, 3,200 horse-power, and guaranteed to attain a speed of 20 knots an hour, and to be equipped with three pneumatic dynamite guns of 10½ in. calibre, and guaranteed to throw shells containing 200 pounds of dynamite or other high explosives at least one mile, each gun to be capable of being discharged once in two minutes, at a price not to exceed $350,000; said contract to be made only on condition that there shall be a favorable report made by the existing Naval Board on the system; to be paid for as the work progresses, and upon the report of such board or boards of inspectors as the Secretary of the Navy may for that purpose appoint, reserving 30 per centum on all such payments until the whole work is completed and accepted by the Secretary of the Navy.

The Pneumatic Dynamite-Gun Company shall furnish bonds satisfactory to the Secretary of the Navy for the faithful performance of its contract, and for the refunding of the money paid hereunder in case of the non-performance of the same, and shall further agree with the Secretary of the Navy upon a limit of price which shall not be exceeded in any future contracts which the Government may desire to enter into for the purchase of the company's guns.

Sec. 10. That towards the construction and completion of the vessels hereinbefore mentioned, including the vessel and guns mentioned in section nine, the sum of $2,500,000 is hereby appropriated, of which not more than $75,000 may be expended in manufacturing, purchasing, and experimenting with torpedoes of domestic manufacture, and not exceeding $150,000 may be expended, under the direction of the Secretary of the Navy, in improving the plant of such of the navy-yards as he may select.

Amount appropriated by this bill, $3,500,000.

FORTY-NINTH CONGRESS.

The Senate passed the following bills July 26: S. R. 73. Authorizing John F. Chamberlain to erect a hotel upon the Government lands at Fort Monroe, Va.; S. 2477. Appropriating $250,000 for the erection of a military post or garrison near the city of Denver, Col.

Bills granting pensions to the following persons were passed by the Senate July 26: Lizzie Wright Owen, daughter of Brig.-Gen. George Wright, U. S. Vols., $50 per month; Elizabeth Ward, widow of Gen. Durbin Ward, $100 per month; Maria L. Strong, widow of Rear Admiral James H. Strong, $50 per month; Antonio Lynch, widow of Capt. Dominick Lynch, U. S. N., $40 per month; Emma J. Holloway, widow of Captain H. C. Holloway, U. S. A., $30 per month; Elizabeth S. DeKrafft, widow of Rear Admiral J. C. P. DeKrafft, $50 per month; Virginia Taylor Randall, widow of Lieut.-Col. Burton Randall, U. S. A., $30 per month.

The following resolution was offered in the House on Monday by Mr. Glover and referred to the Committee on Rules:

Resolved, That a committee of three be appointed to inquire as to the expenditures made by the late General W. S. Hancock in September and October, 1881, in entertaining, under direction of the Secretary of War, the French officers invited to assist at the centennial celebration of the surrender of the British Army at Yorktown to the combined forces of the United States and France, and whether the same had been paid to him in his lifetime or to his estate since his decease.

Mr. Herbert submitted in the House on Monday a resolution setting apart the first Wednesday after the convening of Congress in December next for the consideration of business reported from the Naval Committee.

BILLS INTRODUCED.

H. R. 9798. Amendment intended to be proposed by Mr. Evarts to the bill (H. R. 9798) making appropriations for fortifications and other works of defence, and for the armament thereof, for the fiscal year ending June 30, 1887, and for other purposes, viz: Add as a new section the following:

Sec. —. That for the conversion of thirty-eight 300 lb. Parrott guns, eighty-one 200 lb. Parrott guns, and one hundred and seventy-three 100 lb. Parrott guns, of those on hand in possession of the War Department, 291 in all, referred to in the list of guns on hand in the report of the Board on Fortifications and other Defences, page 20, as of "doubtful strength," and therefore being useless in their present condition; the said guns to be converted into muzzle-loading combined rifle and smooth-bores, rebored and rifled, with three grooves, and each supplied with 100 centred, mechanically-fitted, spiral, triangular, sub-calibre, chilled-iron projectiles with a bayonet form of cutting point, made according to best and latest improved Wiard, system for each gun, or $29,200 projectiles in all, adapted to the different calibres and interchangeable in like calibres, $1,019,000 is hereby appropriated out of any money in the Treasury not otherwise appropriated; and the Secretary of War is hereby authorized and directed to deliver the said guns as promptly as required to Norman Wiard, at whatever place the same may be at this time, to be removed by him and transported to the place of conversion without charge against the Government; and the Secretary of War is also to contract with said Wiard for the conversion of said guns, and for supplying 100 of said projectiles for each, at prices which shall not exceed the amount hereby appropriated for the purpose, and to receive and pay for the same, after proof, at the price of $5,000 for each 300 lb., $4,000 for each 200 lb., and $3,000 for each 100 lb., which prices shall include full payment for the guns of such calibres, supplied with 100 projectiles for each gun: *Provided*, That one or more guns of each calibre shall be converted, offered for proof, and tested in advance, under the observation of a board to consist of three officers of artillery to be selected by the President for the duty, which proof shall consist of firing 30 rounds rapidly, for the 300 lb. at the rate of 40 rounds per hour, for the 200 lb. at the rate of 60 rounds per hour, and for the 100 lb. at the rate of 120 rounds per hour, all in the presence of at least two officers of said board; and when one trial-gun of each calibre has been successful in withstanding the said extreme proof, it shall be accepted and paid for by the Secretary of War, and thereafter the remaining guns shall be accepted and paid for in lots of 10 guns, and 1,000 projectiles adapted to their calibres, at each delivery, at the prices hereinbefore provided for: *Provided further*, That the Secretary of War may at his option cause one gun of each lot of 10 of either of the calibres to be selected and fired three rounds with service charges, as a further precautionary test; and all the proof of trial of so selected guns shall be conducted and concluded at the cost of the contractor and under his direction; and he may, moreover, select the powder and test it to his satisfaction, in advance, in the same guns, without prejudice, but the finally selected powder shall be of such kind and weight of charges as will impart at least 1,500 feet of initial velocity per second to the standard weight of projectiles for each calibre; and no gun except in lots of those kinds and calibres which have been so tested shall be received and paid for, except at the option of the Secretary of War; and no gun shall be rejected, within the full number provided for, which is offered in conformity with the conditions of this act; and all guns, after acceptance at the works were converted, shall be paid for and taken into possession of the United States without further cost against the contractor and without unnecessary delay.

THE ARMY

NOMINATIONS TO THE SENATE.

July 28, 1886.

Medical Department—Lieut. Col. D. L. Magruder, Surgeon, to be Surgeon, with the rank of Colonel, July 26, 1886, vice Brown, retired from active service. Major Charles T. Alexander, Surgeon, to be Surgeon with the rank of Lieut. Col., July 26, 1886, vice Magruder. Capt. Henry M. Cronkhite, Asst. Surg., to be Surgeon with the rank of Major, July 26, 1886, vice Alexander, promoted. Freeman V. Walker, of Georgia, to be Asst. Surg. with the rank of 1st Lieut., July 27, 1886, vice Cronkhite, promoted.

2d Regiment of Cavalry—2d Lieutenant Thomas J. Lewis to be 1st Lieut., July 26, 1886, vice Dinwiddie, retired.

20th Regiment of Infantry—2d Lieutenant Henry A. Greene to be 1st Lieut., July 24, 1886, vice Low, deceased.

ARMY CONFIRMATIONS.

July 26, 1886.

Medical Department—Captains and Asst. Surgeons to be Surgeons with the rank of Major: Calvin De Witt, July 21, 1885; Benjamin F. Pope, September 16, 1885; James P. Kimball, January 24, 1886; John H. Bartholf, January 4, 1886.

To be Assistant Surgeons with the rank of 1st Lieutenant: Francis J. Ives, of New York, July 25, 1885; William P. Kendall, of Massachusetts, August 12, 1885; Edward R. Morris, of Indiana, September 17, 1885; William B. Banister, of Alabama, January 26, 1886; Charles F. Mason, of Virginia, May 5, 1886; Leonard Wood, of Massachusetts, January 5, 1886.

3d Regiment of Cavalry—1st Lieut. James F. Simpson to be Captain, November 26, 1884; 1st Lieut. Edgar Z. Steever to be Captain, January 18, 1886; 2d Lieut. George H. Morgan to be 1st Lieut., November 26, 1884; 2d Lieut. Joseph T. Dickman to be 1st Lieut., January 18, 1886.

5th Regiment of Infantry—1st Lieut. Charles E. Hargous to be Captain, May 12, 1886; 2d Lieut. Charles A. Churchill to be 1st Lieut., May 12, 1886.

G. O. 8, DEPT. OF THE PLATTE, July 20, 1886.

The Annual Department Rifle Competition will take place on the Bellevue Rifle Range, under the direction of Major Guy V. Henry, 9th Cav., Inspector of Rifle Practice, commencing Friday, August 20 next.

Post commanders will send the enlisted competitors from the posts under their command, in time to report to Capt. James Ulio, 2d Infantry, commanding officer of the Department Rifle Camp, on the range, Aug. 18.

CIR. 15, DEPT. OF THE PLATTE, July 19, 1886.

Publishes table exhibit with the figure and order of merit of the posts for part of the target season ending June 30.

To obtain a good percentage in skirmish firing during the approaching months, frequent runs are necessary, as are required by par. 341, "Instructions in Rifle and Carbine Firing," they will, if persistently kept up, bring results in actual firing not otherwise possible.

In computing the figure of merit, and to enable a closer and more exact comparison of companies and regiments, fractions, if any, will be carried out two places of decimals.

G. O. 16, DEPT. OF ARIZONA, July 16, 1886.

The following described public lands in the Territory of New Mexico, now vacant, are set apart as a military reservation and announced as reserved for future military purposes, subject to the approval of the President: Sections 13, 14, 15, 23, 24, 25, 26, 27, Township number 10 North, Range number 3 East, New Mexico principal meridian; the boundaries of the same as located by the public surveys.

G. O. 15, DEPT. OF THE COLUMBIA. July 19, 1886.

The undersigned resumes command of the Department of the Columbia.

JOHN GIBBON, Brigadier General.

G. O. 16, DEPT. OF THE COLUMBIA, July 20, 1886.

So much of G. O. 14, c. s., as authorizes commutation of rations at the rate of $1.50 per day to be paid to enlisted competitors during their stay at Vancouver Barracks, is revoked, money not having been appropriated therefor.

STAFF CORPS AND DEPARTMENTS.

Judge Advocate General's Department.

Capt. J. G. Ballance, A. J. A., will proceed to El Paso, on public business, relating to the title of the post of Fort Bliss (S. O. 92, July 22, D. Texas).

Lieut. Col. Thomas F. Barr, D. J. A. G., will be relieved from duty at H. Q., Dept. of Dakota, to take effect Sept. 1, 1886, and will then report in person to the Comdg. Gen., Div. of the Missouri, for assignment to duty at the headquarters of that division (S. O., July 28, H. Q. A.)

Adjutant and Inspector Generals.

Lieut. Col. Robert P. Hughes, Inspr. Gen., will proceed to and make an inspection of the post and prison at Alcatraz Island, Cal. (S. O. 60, July 19, D. Cal.)

Quartermasters and Subsistence Departments.

The journeys of Major A. S. Kimball, C. Q. M., July 8 to 19, to Albuquerque and Santa Fe, N. M., and return, were necessary for the public service (S. O. 67, July 19, D. Ariz.)

Leave for one month, from Aug. 1, is granted Col. Rufus Saxton, A. Q. M. G. (S. O., July 26, H. Q. A.)

Major G. B. Dandy, Chief Q. M., will proceed to Bellevue, Neb., on public business (S. O. 90, July 22, D. Platte).

Capt. Wm. S. Patten, A. Q. M., will proceed to Portland, Ore., on public business (S. O. 118, July 10, D. Columbia).

Capt. S. T. Cushing, Chief C. S., will proceed to Fort Clark on public business (S. O. 82, July 9, D. Texas).

During the absence of Capt. John Simpson, A. Q. M., on leave, the duties of assistant to the Chief Q. M., at the San Antonio Depot, will be performed by Capt. V. Richards, 16th Inf., A. A. Q. M. (S. O. 85, July 13, D. Texas.)

Capt. Charles A. Woodruff, Chief Commissary of Subsistence, is appointed to act temporarily as Judge Advocate of the Dept. (G. O. 17, July 21, D. C.)

Pay Department.

Leave for one month, to take effect on or about July 28, is granted Major Joseph W. Wham, Paymr., New York City (S. O. 93, July 26, Div. Atlantic).

G. O. 15, c. s., relieving Col. George L. Febiger, A. Paymr. Gen., from further duty in Div. Missouri, are rescinded (G. O. 16, July 22, Div. Mo.)

S. O. 103, c. s., is modified to direct Major James P. Canby, Paymr., upon completion of payment of troops at Fort Spokane, to return to Fort Cœur d'Alene before making payment at Fort Walla Walla (S. O. 120, July 13, D. Columbia).

The leave granted Major John S. Witcher, Paymr., is extended two months (S. O., July 26, H. Q. A.)

Major Alfred E. Bates, Paymr., will proceed to St. Paul, Minn., for duty (S. O. 67, July 17, D. Dakota).

Medical Department.

Capt. Samuel Q. Robinson, Asst. Surg., will proceed to Fort Brown, and report for duty as post surgeon, to relieve Major Edwin Bentley, surgeon, who will proceed to Fort Davis, and report to relieve Major W. H. Gardner, surgeon, as post surgeon, who will remain on duty at Fort Davis, to await result of his application for leave (S. O. 92, July 22, D. Texas).

Leave for seven days is granted Asst. Surg. Marshall W. Wood, Fort Walla Walla (S. O. 118, July 10, D. Columbia).

Capt. W. F. Carter, Asst. Surg., will be relieved from temporary duty at Fort Concho, and proceed to Fort Ringgold for duty, relieving Captain J. J. Kane, Asst. Surg., who will proceed to Fort Hancock for duty, relieving Asst. Surg. J. A. Wolf, who will proceed to Fort Brown, and report for duty (S. O. 85, July 13, D. Texas).

Leave for three months, with permission to go beyond sea, is granted Capt. Joseph B. Girard, Asst. Surg. (S. O., July 24, H. Q. A.)

The retirement from active service this date, by operation of law, of Colonel Joseph B. Brown, Surg., under the provisions of the act, approved June 30, 1882, is announced. Col. Brown will repair to his home (S. O., July 26, H. Q. A.)

A furlough of two months is granted Hospital Steward J. A. Lesley, Fort Lewis, Colo. (S. O. 67, July 19, D. Ariz.)

Engineers and Ordnance Department.

Leave of absence for one month, to take effect at such time as shall be approved by the Light house Board, is granted Capt. John C. Mallery (S. O., July 28, H. Q. A.)

Capt. James C. Post, C. E., will proceed to Locks Nos. 1 and 2, Kentucky River, on duty connected with works under his charge (S. O. 103, July 28, C. E.)

Capt. Daniel W. Lockwood, C. E., will proceed to the harbors at Grand Haven and Muskegon, Mich., on duty connected with works under his charge (S. O. 102, July 24, C. E.)

Major Jared A. Smith, C. E., will proceed to the battery at Jerry's Point, N. H., on public business (S. O., July 26, H. Q. A.)

Leave until Aug. 31 is granted 2d Lieut. Harry Taylor, C. E. (S. O., July 22, H. Q. A.)

The leave granted Capt. Ira McNutt, Ord. Dept., is extended one month (S. O., July 22, H. Q. A.)

Ord. Sergt. George Seymour, recently appointed from sergeant major, 4th Cav., will proceed to Fort Reno, I. T., for duty (S. O., July 23, H. Q. A.)

Capt. Rogers Birnie, Jr., Ord. Dept., will proceed to Sandy Hook, N. J., on official business (S. O., July 27, H. Q. A.)

Chaplains.

The leave for seven days granted Post Chaplain Wm. T. McAdam, Fort Omaha, and extended seven days, is further extended seven days (S. O. 88, July 20, D. Platte).

THE LINE.

Changes of Stations of Troops Ordered.

As reported to the Adjutant-General's Office during the week ending July 24, 1886:

Troops A and K, 2d Cav., to Fort McDowell, Ariz.
Troops A and M, 4th Cav., to Fort Lowell, Ariz.
Troops E, F, and H, 4th Cav., to Fort Huachuca, Ariz.
Troop I, 4th Cav., to Fort Bowie, Ariz.
Bat. A, 1st Art., to Presidio of San Francisco, Cal.
Co. C, 5th Inf., to Fort A. Lincoln, Dak.
Cos. B and F, 11th Inf., to Fort Yates, Dak.

The Stations of Companies not mentioned here will be found by reference to last number of the JOURNAL.

1st Cavalry, Colonel N. A. M. Dudley.

Hdqrs., B, D, G, K, and M, Ft. Custer, Mont.; A, C, and F, Ft. Maginnis, Mont.; I, Ft. Leavenworth, Kas.; E, Ft. Ellis, Mont.; H and L, Ft. Assiniboine, Mont.

2d Lieut. James B. Aleshire, Fort Custer, M. T., is detailed as Inspector of Indian supplies at the Crow Agency, M. T. (S. O. 67, July 17, D. Dak.)

A Fort Custer correspondent says: "Troop B are at last more than comfortable, not less than proud, and naturally envied in their beautiful quarters. Major Jackson, commander of the troop, don't live there himself, but has surprised the boarders with a $250 'mess kit,' plated silverware, and very rich pattern crockery."

2nd Cavalry, Colonel Nelson B. Sweitzer.

Hdqrs., B, E, F, G, and I, Ft. Walla Walla, Wash. T.; A and K, Ft. McDowell, Ariz.; C, Ft. Bidwell, Cal.; D, Boise Barracks, Idaho; H, Ft. Spokane, Wash. T.; L, Ft. Cœur d'Alene, Idaho; M, Ft. Klamath, Ore.

Col. Nelson B. Sweitzer will inspect C. and E. at Fort Walla Walla, for which 1st Lieut. Charles B. Schofield, Adjt., is accountable (S. O. 123, July 16, D. Columbia.)

1st Lieut. William A. Dinwiddie, having been found by an Army Retiring Board incapacitated for active service on account of disability incident to the service, is retired from active service this date, in conformity with sec. 1251, R. S. (S. O., July 26, H. Q. A.)

A furlough for two months is granted Sergt. Adam M. Baer, Troop G (S. O. 119, July 12, D. Columbia.)

The *Vindicator*, referring to the recent visit to Portland, Ore., of the band of the 2d Cavalry, says: "There is no doubt but the band is the best one in the North Pacific. Besides being thorough musicians the members are all thorough gentlemen. So well were they appreciated that a requisition was made by the citizens of Portland upon the commander of the Department that they be allowed an extended leave, that they might remain a few days longer. It was granted and when their time was up a second request was made for them. If they had complied with all the requests made they would have remained until next Christmas." The conductor, M. C. Meyrelles, directed the King of Portugal's band for several years.

3rd Cavalry, Colonel Albert G. Brackett.

Hdqrs., C, F, M, Ft. Davis, Tex.; A, Ft. Concho, Tex.; G, Camp at Eagle Pass, Tex.; B, Ft. Leavenworth, Kas.; E, Camp Rice, Tex.; L, Camp Pena Colorado, Tex.; D and H, Ft. Sill, Ind. T.; I and K, Ft. Elliott, Tex.

Leave for one month is granted Col. Albert G. Brackett, Fort Davis (S. O. 91, July 20, D. Tex.)

6th Cavalry, Colonel Eugene A. Carr.

Hdqrs., A, C, G, and L, Ft. Bayard, N. M.; K, Ft. Wingate, N. M.; B and F, Ft. Lewis, Colo.; D, E, and H, Ft. Stanton, N. M.; M, Ft. Leavenworth, Kas.; I, Ft. Cummings, N. M.

The following changes of stations are ordered: Troop A (Kendall's) from Fort Wingate to Fort Bayard; Troop I (Chaffee's) from Fort Wingate to Fort Cummings (S. O. 54, July 15, D. N. M.)

Leave for twenty-one days, to take effect July 21, is granted 2d Lieut. R. B. Paddock (S. O. 76, July 19, Dept. M.)

7th Cavalry, Colonel James W. Forsyth.

Hdqrs. A, C, E, H, K, and M, Ft. Meade, Dak.; B and D, Ft. Yates, Dak.; F and L, Ft. Buford, Dak.; G, Ft. Keogh, Mont.; I, Ft. Totten, Dak.

The following promotion is announced: Lieut.-Col. James W. Forsyth, 1st Cav., to Colonel 7th Cav., June 11, vice Sturgis, retired. Col. Forsyth will proceed to Fort Meade, D. T. (S. O. 67, July 17, D. Dak.)

Capt. Edward S. Godfrey, Fort Yates, D. T., is detailed as Inspector of Indian supplies at the Standing Rock Agency, D. T. (S. O. 67, July 17, D. Dak.)

2d Lieut. Sedgwick Rice is relieved from further duty at Fort Snelling, Minn. (S. O. 67, July 17, D. Dak.)

Leave for one month, with permission to apply for an extension of one month, is granted 1st Lieut. Ernest A. Garlington, Fort Buford, D. T., to take effect about Aug. 5 (S. O. 69, July 21, D. Dak.)

The leave for one month granted 1st Lieut. Ernest A. Garlington is extended one month (S. O. 111, July 26, Div. M.)

8th Cavalry, Colonel Elmer Otis.

Hdqrs., C, and H, San Antonio, Tex.; A, Ft. McIntosh, Tex.; I Ft. Ringgold, Tex.; D, Camp Del Rio, Tex.; E, F, G, K, and L Ft. Clark, Tex.; B and M, Ft. Brown, Tex.

Official notice having been received of his promotion from 1st Lieutenant Troop H to Captain of Troop C at Camp Maddox, near Alma, N. M., Capt. R. A. Williams will proceed to take command of his troop (S. O. 66, July 16, D. Ariz.)

Leave for one month, to take effect about Aug. 20, is granted Capt. H. S. Weeks, Fort Clark (S. O. 89, July 16, D. Tex.)

2d Lieut. Enoch H. Crowder is relieved from duty at the University of the State of Missouri, Columbia, Mo., and will join his regiment (S. O., July 23, H. Q. A.)

A furlough for four months is granted Sergt. Jas. Roskey, Troop L (S. O. 111, July 26, Div. M.)

9th Cavalry, Colonel Edward Hatch.

Hdqrs., B, D, E, H, and L, Ft. McKinney, Wyo.; C, F, and K, Ft. Robinson, Neb.; A, G, and I, Ft. Niobrara, Neb.; M, Ft. Washakie, Wyo.

Leave for fourteen days is granted Major Guy V. Henry, Inspector of Rifle Practice, Dept. of Platte (S. O. 87, July 19, D. Platte.)

10th Cavalry, Colonel Benjamin H. Grierson.

Hdqrs., D, E, K, and L, Ft. Grant, A. T.; B, Whipple Bks., A. T.; A and H, Ft. Apache, A. T.; I and M, Ft. Verde, A. T.; C, F, and G, Ft. Thomas, A. T.

Chaplain F. H. Weaver will proceed to Fort Grant and take station with the Headquarters of his regiment (S. O. 66, July 16, D. Ariz.)

2d Lieut. H. S. Whipple is appointed A. A. Q. M and A. C. S. at Fort Verde (S. O. 66, July 16, D. Ariz.)

1st Artillery, Colonel John C. Tidball.

Hdqrs., A, H, and K,* Presidio, San Francisco, Cal.; B and C, Ft. Winfield Scott, Cal.; D and I, Alcatraz Island, Cal.; E,* Vancouver Bks., W. T.; F and L, Ft. Canby, W. T.; G, Ft. Monroe, Va.; M, Ft. Mason, Cal.
* Light battery.

S. O. 56 is so far modified as to grant a leave of absence for ten days, from this date, to Capt. John W. Dillenback (S. O. 59, July 17, D. Cal.)

Capt. Joseph P. Sanger, A. D. C., is detailed Recorder for the Retiring Board convoked at Governor's Island, N. Y. (S. O. 93, July 26, Div. A.)

2nd Artillery, Colonel Romeyn B. Ayres.

Hdqrs., G, and L, St. Francis Bks., Fla.; A* and E, Little Rock Bks., Ark.; B and H, Atlanta, Ga.; C and D, Mount Vernon Bks., Ala.; F,* Ft. Leavenworth, Kas.; K, Ft. Monroe, Va.; I and M, Jackson Bks., La.
* Light battery.

1st Lieut. Alexander D. Schenck is appointed J.-A. of the G. C.-M. at Fort Monroe, Va., vice 2d Lieut. George F. Barney, relieved on account of sickness (S. O. 93, July 26, Div. A.)

3rd Artillery, Colonel Horatio G. Gibson.

Hdqrs., A, C,* E, H, K, and L, Washington Bks., D. C.; B, Newport Bks., Ky.; D, G, and I, Ft. McHenry, Md.; M, Ft. Monroe, Va.; F,* San Antonio, Tex.
* Light battery.

The extension of leave on account of sickness granted 1st Lieut. Christopher W. Harrold is further extended six months on account of sickness (S. O., July 22, H. Q. A.)

4th Artillery, Colonel Clermont L. Best.

Hdqrs., B,* D, E, G, and L, Ft. Adams, R. I.; A and C, Ft. Trumbull, Conn.; F,* Ft. Snelling, Minn.; H and K, Ft. Warren, Mass.; I, Ft. Monroe, Va.; M, Ft. Preble, Me.
* Light battery.

Leave for two months, to commence on or about Aug. 2, is granted Major Alexander C. M. Pennington, Fort Monroe, Va. (S. O. 92, July 24, Div. A.)

5th Artillery, Colonel John Hamilton.

Hdqrs., F,* I, L, and M, Ft. Hamilton, N. Y.; A, C, and H, Ft. Columbus, N. Y.; G, Ft. Monroe, Va.; B, Ft. Wadsworth, N. Y.; D,* Ft. Omaha, Neb.; E and K, Ft. Schuyler, N. Y.
* Light battery.

2d Lieut. Samuel E. Allen, Inspector of Rifle Practice, will proceed to Creedmoor, N. Y., on official business connected with the rifle camp (S. O. 93, July 26, Div. A.)

1st Lieut. William H. Coffin is detailed to attend the encampment of the National Guard of Vermont, to be held at Burlington about Aug. 24 to Aug. 28, for the purpose of inspecting the troops taking part therein (S. O., July 26, H. Q. A.)

Private Felix Shambo, Bat. E, is relieved from duty as messenger to the Army Medical Examining Board in New York City (S. O. 92, July 24, Div. A.)

In Orders 29, of July 19, Colonel John Hamilton, after recapitulating the services of the late Captain G. V. Weir (given in full in last week's JOURNAL), says: "It is necessary only to the young, to state that in all his career as a soldier he was distinguished for honor, courage in all kinds, skill in his profes-

sion, and merit in discharge of his duty as well in peace as in the field. As son, husband, father, and friend, he was a model Christian man. His powerful physique and his frugal purse were always at the service of truth and sympathy: it will take long to fill his place in the hearts of the regiment. The Regimental Commander takes this opportunity to express to the family and relatives his deep personal condolence in their loss. The officers of the regiment will wear the usual badges of mourning for thirty days."

1st Infantry, Colonel William R. Shafter.

Hdqrs., E, and F, Angel Island, Cal.; A and D, Benicia Bks., Cal.; C and G, Presidio of San Francisco, Cal.; I, San Diego Bks., Cal.; B, Ft. Gaston, Cal.; K, Ft. McDermit, Nev.; H, Ft. Halleck, Nev.

1st Lieut. J. S. Mason, Jr., is relieved as A. A. Q. M. and A. C. S. at Fort Verde, and will join his company at San Diego, Cal. (S. O. 66, July 16, D. Ariz.)

2d Lieut. Samson L. Faison will proceed to Fort McDermit, Nev., for temporary duty (S. O. 60, July 19, D. Cal.)

1st Lieut. J. S. Mason, Jr., is relieved as recruiting officer at Fort Verde (S. O. 68, July 21, D. Ariz.)

2nd Infantry, Colonel Frank Wheaton.

Hdqrs., A, B, C, D, E, F, and H, Ft. Omaha, Neb.; G and K, Ft. Niobrara, Neb.; I, Ft. Robinson, Neb.

The following officers, having been retained at Fort Cœur d'Alene as witnesses before the Court of Inquiry, and now discharged, will proceed to their stations in the Dept. of Platte: Col. Frank Wheaton, Capt. Abner Haines, Jr., and 1st Lieuts. Sidney E. Clark, R. Q. M., John Kinzie, Charles W. Rowell, Adjt., and William R. Abercrombie (S. O. 118, July 10, D. Columbia.)

Capt. James Ulio is assigned to charge of the Dept. Rifle Camp to be established on the Bellevue Rifle Range for the competitors, etc., at the coming annual Dept. Rifle Competition, and will report to Major Guy V. Henry, Inspector of Rifle Practice, Aug. 7, for instructions (S. O. 89, July 21, D. Platte.)

The 2d Infantry not being in the Dept. of Platte when the "practice season" was designated, for the current "target year," August and September are designated as forming part of the "practice season" for the companies at Forts Robinson and Niobrara, and from Sept. 7 to Nov. 7, inclusive, for the companies at Fort Omaha (S. O. 89, July 21, D. Platte.)

3rd Infantry, Colonel John R. Brooke.

Hdqrs., A, G, H, and K, Ft. Shaw, M. T.; B, D, F, and I, Ft. Missoula, M. T.; C and E, Ft. Ellis M. T.

The semi-annual roster of commissioned officers, 3d Inf., reaches us this week, and is a neat document. It shows that the regiment was organized May 30, 1796, and has been engaged in 25 battles. Its numerous skirmishes and other minor engagements are not included in this total. We return thanks to Adjt. Roe for the roster.

4th Infantry, Colonel William P. Carlin.

Hdqrs., C, D, E, and H, Ft. Cœur d'Alene, Idaho; A, B, F, I, and K, Ft. Spokane, Wash. T.; G, Boise Barracks, Idaho.

5th Infantry, Colonel John D. Wilkins.

Hdqrs., A, B, D, E, F, G, and H, Ft. Keogh, M. T.; I and K, Ft. Custer, M. T.; C, Ft. A. Lincoln, D. T.

The return journey, from Fort Bayard, N. M., to Fort Keogh, M. T., of 1st Lieut. Oscar F. Long, after discharge from attendance upon the G. C.-M., in obedience to subpœna, is confirmed (S. O. 69, July 21, D. Dak.)

6th Infantry, Colonel Alex. McD. McCook.

Hdqrs., H, and I, Ft. Leavenworth, Kas.; A, B, C, E, F, and G, Ft. Douglas, Utah; D, Camp on Montezuma Creek, San Juan County, Utah; K, Salt Lake City, Utah.

2d Lieut. C. E. Dentler, with detachment from Fort Douglas, will return to their station on completion of the transfer of the public property at Camp Medicine Butte to the new garrison (S. O. 89, July 21, D. Platte.)

Daniel Rose, who served for sixteen years in the 6th U. S. Infantry, died at 98 Tillary street, Brooklyn, July 27.

7th Infantry, Colonel Henry C. Merriam.

Hdqrs., A, C, D, F, H, and K, Ft. Laramie, Wyo.; B and E, Camp Pilot Butte, Wyo.; G and I, Ft. Washakie, Wyo.

The leave for one month granted 1st Lieut. Charles A. Booth is extended one month (S. O. 111, July 26, Div. M.)

8th Infantry, Colonel August V. Kautz.

Hdqrs. F, and H, Ft. Lowell, Ariz.; A, Ft. Bowie, Ariz.; C, Ft. Mojave, Ariz.; D and K, Ft. Huachuca, Ariz.; B, E, and I, Ft. Grant, Ariz.; G, Ft. McDowell, Ariz.

1st Lieut. Richard H. Wilson is relieved from duty at Fort Halleck, Nev., and will join his company at Fort Mojave, A. T. (S. O. 55, July 14, Div. P.)

The C. O. Angel Island, Cal., will send all enlisted men of the 8th Inf. at his post to their several companies in the Dept. of Arizona, in charge of 2d Lieut. Robert F. Ames, 8th Inf. On the completion of this duty Lieut. Ames will join his company in the Dept. of Arizona (S. O. 55, July 14, Div. P.)

2d Lieut. W. A. Mercer is selected as a competitor in the annual Department competition and will report at Fort Wingate, N. M. (S. O. 67, July 19, D. Ariz.)

1st Lieut. John J. Haden is relieved from duty at Fort McDermit, Nev., and will, upon expiration of the leave of absence granted him, join his company at Fort Grant, A. T. (S. O. 56, July 19, Div. P.)

9th Infantry, Colonel John S. Mason.

Hdqrs., F, and K, Whipple Bks., A. T.; B and D, Ft. Thomas, A. T.; C, E, H, and I, Ft. Wingate, N. M.; A and G, Ft. Apache, A. T.

1st Lieut. E. B. Robertson, Adjt., is relieved from duty on G. R. S. at Fort D. A. Russell, Wyo. (S. O. 89, July 21, D. Platte.)

1st Lieuts. Jas. Regan and J. McB. Stembel and 2d Lieut. F. L. Dodds, temporarily retained in the Dept. of Platte, will join their respective stations in the Dept. of Arizona, as soon as the duties for which they have been retained shall be completed (S. O. 109, July 23, Div. M.)

10th Infantry, Colonel Henry Douglass.

Hdqrs., B, C, F, and I, Ft. Union, N. M.; A and E, Ft. Lyon, Colo.; D and H, Ft. Bliss, Tex.; G and K, Uncompahgre, Colo.

A furlough for two months is granted Principal Musician Frederick Creutzburg (S. O. 66, July 16, D. Ariz.)

A furlough for four months is granted Sergt. Albert S. Collins, Co. E (S. O. 110, July 24, Div. M.)

11th Infantry, Colonel Richard I. Dodge.

Hdqrs., A, D, E, and K, Ft. Sully, D. T.; B and F, Ft. Yates, D. T.; C and H, Ft. Buford, D. T.; G, Ft. Leavenworth, Kas.; I, Ft. Bennett, D. T.

The following promotions are announced: 1st Lieut. George G. Lott, Co. C, to be Captain Co. D, June 1, vice Beach, resigned; 2d Lieut. Henry O. S. Heistand, Co. B, to be 1st Lieutenant Co. C, June 1, vice Lott, promoted. Lieut. Heistand will proceed to Fort Buford, D. T., and join the company to which he has been promoted (S. O. 67, July 17, D. Dak.)

A furlough for six months, with permission to go beyond sea, is granted Sergt. Patrick Boner, Co. G (S. O. 111, July 26, Div. M.)

12th Infantry, Colonel Orlando B. Willcox.

Hdqrs., A, B, D, F, G, and I, Madison Bks., N. Y.; C, Plattsburgh Bks., N. Y.; E and K, Ft. Niagara, N. Y.; H, Ft. Ontario, N. Y.

2d Lieut. Harry C. Hale will proceed from Fort Niagara to Fort Ontario and report for duty as member of a Garrison Court-martial (S. O. 96, July 29, Div. A.)

13th Infantry, Colonel Luther P. Bradley.

Hdqrs., Santa Fe, N. M.; A and B, Ft. Bayard, N. M.; C and E, Ft. Stanton, N. M.; D, F, G, H, and I, Ft. Wingate, N. M.; K, Ft. Selden, N. M.

Leave for one month is granted 1st Lieut. James Fornance, Adjt., to take effect July 27 (S. C. 67, July 19, D. Ariz.)

1st Lieut. J. H. H. Peshine will proceed to Fort Elliott, Tex., and report as a witness before a Board of Officers convened at that post. Upon completion of this duty Lieut. Peshine will return to his proper station (S. O. 68, July 21, D. Ariz.)

14th Infantry, Colonel Lewis C. Hunt.

Hdqrs., B, C, D, E, F, G, H, I, and K, Vancouver Bks., Wash. T.; A, Ft. Townsend, Wash. T.

Col. Lewis C. Hunt is relieved from duty at San Diego Barracks, Cal., and will proceed to his proper station, Vancouver Barracks, W. T. (S. O. 55, July 14, Div. P.)

Leave for one month is granted Capt. Thomas F. Tobey, Vancouver Barracks (S. O. 123, July 16, D. Columbia.)

A furlough for three months is granted 1st Sergt. John Draddy, Co. K, Seattle, W. T. (S. O. 119, July 12, D. Columbia.)

The Vancouver *Independent* says: "There are complaints by the 14th Infantry that the Portland people did not treat them right on the 5th of July, when they went over and made all there was of the celebration procession. They were kept three hours on the dock waiting for a boat, and had nothing to eat until they returned to their quarters, besides being made to individually pay their fares for Portland's benefit. It is not likely the 14th will ever accept another invitation to get up a procession in Portland."

16th Infantry, Colonel Matthew M. Blunt.

Hdqrs., A, B, C, F, and H, Ft. Concho, Tex.; D and E, Ft. McIntosh, Tex.; I, Ft. Davis, Tex.; G and K, San Antonio, Tex.

17th Infantry, Colonel Alexander Chambers.

Hdqrs., A, C, D, E, F, G, I, and K, Ft. D. A. Russell, Wyo.; B, Camp Medicine Butte, Wyo.; H, Ft. Bridger, Wyo.

1st Lieut. Jas. Brennan is relieved from duty as Inspector of Indian supplies at the Standing Rock Agency, D. T. (S. O. 67, July 17, D. Dak.)

Capt. T. G. Troxel is relieved as Inspector of Indian supplies at the Crow Agency, M. T. (S. O. 67, July 17, D. Dak.)

Leave for fourteen days is granted Capt. H. S. Howe, to take effect on his arrival at Carter Station, Wyo. (S. O. 86, July 17, D. Platte.)

1st Lieut. Charles St. J. Chubb will relieve 1st Lieut. George Palmer, 9th Inf., of the duties of Purchasing and Depot C. S. at Cheyenne, to enable Lieut. Palmer to join his regiment under orders for Arizona (S. O. 87, July 19, D. Platte.)

1st Lieut. William A. Mann, Adjt., is detailed for duty on G. R. S. at Fort D. A. Russell, Wyo. (S. O. 89, July 21, D. Platte.)

Some portions of the regiment while passing through Omaha recently seem to have had a "good time," and several of the men applied more than one coat of red paint where most needed. Regiments while changing station are always more or less frisky, but soon settle down in their new places.

Private James Baker, Co. E, fell from the steamer conveying the 17th Infantry from Bismarck en route to the Platte and was drowned.

18th Infantry, Colonel John E. Yard.

Hdqrs., A, B, and D, Ft. Hays, Kas.; E and F, Ft. Leavenworth, Kas.; C and I, Ft. Gibson, I. T.; G, H, and K, Ft. Riley, Ks.

19th Infantry, Colonel Charles H. Smith.

Hdqrs., A, B, C, E, F, H, and K, Ft. Clark, Tex.; D and I, Ft. Ringgold, Tex.; G, Ft. Brown, Tex.

So much of the sentence of G. C.-M. in the case of Capt. Jacob H. Smith, mitigated by G. C.-M. O. 23, as now remains unexecuted, is remitted (G. C.-M. O. 47, July 12, D. Tex.)

20th Infantry, Colonel Elwell S. Otis.

Hdqrs., A, B, C, E, F, H, I, and K, Ft. Assinniboine, M. T.; D and G, Ft. Maginnis, M. T.

The C. O. Fort Assinniboine, M. T., will grant a furlough for two months to Sergt. George Seeber, Co. E (S. O. 69, July 21, D. Dak.)

21st Infantry, Colonel Henry A. Morrow.

Hdqrs., A, C, E, F, and G, Ft. Sidney, Neb.; B, I, and K, Ft. Fred. Steele, Wyo.; D and H, Ft. Bridger, Wyo.

The leave granted Major John N. Andrews is extended two months (S. O., July 23, H. Q. A.)

22nd Infantry, Colonel Peter T. Swaine.

Hdqrs., A, B, D, G, H, and K, Ft. Lewis, Colo.; C, F, and I, Ft. Lyon, Colo.; E, Ft. Marcy, N. M.

The leave for one month granted Col. Peter T. Swaine is extended five days (S. O. 55, July 14, Div. P.)

1st Lieut. O. M. Smith, A. D. C., will proceed to Austin, Tex., on public business (S. O. 91, July 20, D. Tex.)

1st Lieut. J. J. Crittenden, 22d Inf., will conduct the thirty-four 8th Cavalry recruits now at Fort Marcy, N. M., to the following points, en route to their stations: Three, Troop K, to Engle, N. M., en route to Fairview; fourteen, Troop G, to Nutt Station, N. M., en route to Hillsboro, N. M., from which point he will send them, under charge of one of their number, to Lake Valley, N. M.; eight for Troop C and nine for Troop H, en route to Alma and Mule Springs, he will conduct to Fort Bayard, N. M., and turn them over to the C. O., who will send them to join their troops as soon as possible. On completion of this duty Lieut. Crittenden will return to Fort Marcy, N. M. (S. O. 55, July 21, D. N. M.)

23rd Infantry, Colonel Henry M. Black.

Hdqrs., F, G, H, and I, Ft. Wayne, Mich.; A and B, Ft. Brady, Mich.; C and D, Ft. Porter, N. Y.; E and K, Ft. Mackinac, Mich.

Leave for two months, to commence on or about Aug. 23, is granted Capt. Greenleaf A. Goodale, Fort Mackinac, Mich. (S. O. 95, July 28, Div. A.)

1st Lieuts. Frederick L. Dodge and Orlando L. Wieting, Fort Wayne, Mich., are detailed members of the G. C.-M. at Newport Barracks, Ky. (S. O. 95, July 28, Div. A.)

25th Infantry, Colonel George L. Andrews.

Hdqrs., B, C, F, and I, Ft. Snelling, Minn.; A, D, H, and K, Ft. Meade, Dak.; E and G, Ft. Sisseton, Dak.

Appointments, Promotions, Retirements, Transfers, Casualties, etc., of Commissioned Officers of the U. S. Army recorded in the Adjutant-General's Office during the week ending Saturday, July 24, 1886.

CASUALTIES.

Captain Gulian V. Weir, 5th Artillery, died July 18, 1886, at Fort Hamilton, New York Harbor.

1st Lieutenant William H. Low, Jr., 20th Infantry, died July 24, 1886, at Fort Assinniboine, Montana Territory.

Courts-martial.

The following courts have been ordered:

At Fort Hancock, Tex., July 19. Detail: Major C. H. Carlton, Capts. P. D. Vroom and J. C. Thompson, and 1st Lieut. J. F. Simpson, 3d Cav.; 1st Lieut. W. C. McFarland and 2d Lieut. W. C. Cowles, 16th Inf.; 2d Lieut. T. B. Dugan, 3d Cav., and 1st Lieut. Bainbridge Reynolds, 3d Cav., J.-A. (S. O. 83, July 12, D. Tex.)

At Fort Clark, Tex., July 19. Detail: Capts. W. J. Lyster and P. H. Remington, 19th Inf.; Capt. L. T. Morris, 8th Cav.; 1st Lieuts. J. G. Leefe, A. McC. Guard, and F. H. French, 19th Inf.; 2d Lieut. A. G. Hammond, 8th Cav., and 2d Lieut. E. B. Ives, 19th Inf., J.-A. (S. O. 85, July 15, D. Tex.)

At Fort Ringgold, Tex., July 26. Detail: Capt. Hugh A. Theaker, 16th Inf.; Capt. Jacob H. Smith and 1st Lieut. John A. Payne, 19th Inf.; 1st Lieut. Samuel R. Whitall, 16th Inf.; 1st Lieut. John Guest, 8th Cav.; 1st Lieut. Walter A. Thurston and 2d Lieut. Maury Nichols, 16th Inf., and 1st Lieut. Charles A. Vernou, 19th Inf., J.-A. (S. O. 87, July 15, D. Tex.)

At Cantonment on the Uncompahgre, Colo., July 26. Detail: Major G. K. Brady, 18th Inf.; Capt. J. A. P. Hampson, 10th Inf.; Capt. J. C. Worthington, Med. Dept.; Capt. D. H. Kelton, 1st Lieut. D. F. Stiles, 2d Lieuts. C. J. T. Clarke and V. E. Stottler, 10th Inf., and 1st Lieut. William Paulding, 10th Inf., J.-A. (S. O. 76, July 19, Dept. M.)

At Fort Omaha, Neb., July 26. Detail: Major Edmond Butler, Capts. Henry C. Cook, William Mills, Aaron S. Daggett, and Charles A. Dempsey, 1st Lieuts. Horace B. Sarson, Richard T. Earle, and William R. Abercrombie, 2d Lieuts. Henry H. Benham, Virgil J. Brumback, Frederick T. Van Liew, Thomas H. Wilson, and William M. Wright, 2d Inf., and 2d Lieut. Abner Pickering, 2d Inf., J.-A. (S. O. 88, July 20, D. Platte.)

At Willet's Point, N. Y. H., July 26. Detail: Capt. Edward Maguire and Capt. Eric Bergland, C. E.; Capt. Charles Richard, Asst. Surg.; 2d Lieuts. Hiram M. Chittenden, Cassius E. Gillette, David du B. Gaillard, William L. Sibert, Joseph E. Kuhn, and William E. Craighill, C. E., and 2d Lieut. Irving Hale, C. E., J.-A. (S. O., July 23, H. Q. A.)

At Fort Columbus, N. Y. H., July 27. Detail: Capts. Charles Morris and Joshua A. Fessenden, 5th Art.; Capt. Henry P. Birmingham, Asst. Surg.; 1st Lieuts. Selden A. Day and J. Estcourt Sawyer, 5th Art., and 2d Lieut. H. C. Carbaugh, 5th Art., J.-A. (S. O. 92, July 24, Div. A.)

At Fort Schuyler, N. Y. H., Aug. 2. Detail: Major Abram C. Wildrick, Capts. Henry F. Brewerton and David H. Kinzie, and 1st Lieut. John McClellan, 5th Art.; 1st Lieut. William O. Owen, Jr., Asst. Surg.; 2d Lieut. William F. Hancock, 5th Art., and 2d Lieut. Charles G. Treat, 5th Art., J.-A. (S. O. 95, July 28, Div. A.)

---o---

Army Boards.

A Board of Officers will convene at the post of San Antonio, July 19, to inspect the administration building, reported by the contractor as completed. Detail: Major S. S. Summer and 1st Lieuts. E. A. Godwin and J. B. Hickey, 8th Cav. (S. O. 90, July 19, D. Tex.)

A Board of Survey will convene at Cheyenne Depot, Wyo., on call, to report upon public stores delivered by carriers, as have sustained loss or damage while in transit, etc. Detail: Major James S. Casey, Capt. Clarence E. Bennett, and 1st Lieut. Jas. D. Nickerson, 17th Inf. (S. O. 87, July 19, D. Platte.)

A Board, to consist of 2d Lieuts. Joseph S. Powell, Frank Greene, and John P. Finley, Signal Corps, will assemble, Aug. 13, for the purpose of recommending action to be taken upon bids and samples (S. O. 67, July 21, Sig. Off.)

A Board of Survey, to consist of 2d Lieuts. Joseph S. Powell, Frank Greene, and John C. Walshe, Signal Corps, will assemble, July 26, to fix responsibility for deficiency in property received by Capt. Francis B. Jones, A. Q. M., from ex-Sergt. Edward O'C. MacInerney, Signal Corps (S. O. 67, July 21, Sig. Off.)

---o---

Artillery School.—In G. O. 24, of July 27, General Tidball prescribes the military exercises for August and directs Major R. T. Frank in the absence of Major A. C. M. Pennington, to superintend the exercises and see that the firing is made to conform strictly to the prescribed manual.

---o---

DEPARTMENT NEWS.

Dept. of Dakota.—Brig. Gen. T. H. Ruger.

A report comes that 4,500 Sioux Indians at Pine Ridge Agency are about to leave because they are to be disarmed and their rations reduced. Up to the present they have been receiving rations for 7,000 Indians, but the recent census disclosed the fact that there are only 4,500 at the Agency.

It is stated that Fort A. Lincoln will soon be abandoned as a garrisoned post.

A despatch from Fort Assinniboine says: A terrific storm here, July 26, blew the Quartermaster's store down. The loss is $50,000. The buildings all rocked as if in an earthquake."

Dept. of the Platte—Brig. Gen. George Crook.

A letter from Lander, Wyo., says: "Trouble is evidently brewing on the Shoshone Indian reservation. The military at Fort Washakie has been ordered to enforce the removal of all white men and their stock from Indian lands."

The Omaha *Bee* says: "The indications are that the present rifle range at Bellevue will be used for the next year or two, but in the event of the abandonment of Fort Omaha. Bellevue could hardly furnish the site for the re-location. There is one tract of land under consideration by the military authorities, located on the Chicago, St. Paul, Minneapolis, Omaha Railway about ten miles from Omaha and

two miles from Fort Calhoun. It is understood that Gen. Crook and Col. Henry are to visit this tract with a view to making a report as to its adaptability for a first class rifle range.

Dept. of the Missouri.—Brig. Gen. J. H. Potter.

Fort Leavenworth and Leavenworth City are much disappointed that the Society of the Army of the Potomac could not call on its way to San Francisco as originally intended. Gen. Potter and Gen. Smith, Governor of the Soldiers' Home, had arranged to receive them with full honors and hospitality.

Recent despatches indicate a renewal of agitation at Oklahoma, and report that Capt. G. F. Price, 5th U. S. Cavalry, has ordered the ejection of the intruders, and the troops under his command are carrying the order into effect as rapidly as possible.

Division of the Atlantic.—Maj.-Gen. Schofield.

Sault Ste. Marie, Mich., is elated that by recent law there is now a prospect of having a four company post soon built there.

This made the last week of target practice for the regulars at Creedmoor, the batteries in camp being I, 5th Artillery (Crabb's), from Fort Hamilton, A (Beck's) from Fort Columbus, and E (Kinzie's), from Fort Schuyler. The three weeks' tour for the New York Harbor troops has been productive of much benefit to them, and Major M. P. Miller, 5th Artillery, is to be congratulated on the excellent condition of the camp, in all essential respects, during the period of its maintenance.

Recruit John Williams jumped, July 28, from the second story of the recruiting rendezvous at 574 Hudson street, New York, and was killed. He had enlisted but a few days before, and had shown symptoms of derangement.

Dept. of Texas.—Brig. Gen. D. S. Stanley.

A news despatch from Chicago says: "Adjt.-Gen. Robert Williams, U. S. A., expresses the opinion that the talk about the interests of American citizens being imperilled in El Paso or its vicinity is perfect bosh. In reply to a question as to the disposition of troops he showed that Gen. Howard could in a very short time assemble a force at El Paso or its vicinity which would seriously inconvenience the forces which could be raised in Chihuahua and all that section of Mexico. Gen. Williams had no fears, however, about any conflict between the regular forces of Mexico and the United States. Ex-Secretary of War Robert T. Lincoln said that it was a small matter, and he did not think it would involve any international complication."

A despatch from Laredo says: "The commanding officer at Fort McIntosh received news July 27 that a party of Mexicans were encamped on the Texas side of the Rio Grande, about ten miles below. July 28 Capt. Wells, 8th Cavalry, accompanied by Lieut. Grimes and a detail of Rangers, went down on the scout, but arrived too late to capture the Mexicans. They found evidence of quite a large camp."

Dept. of the Columbia.—Brig. Gen. John Gibbon.

The Department Commander has directed that the use of water for irrigation at Dept. Hdqrs. and the post of Vancouver Barracks be restricted as regards time to the following hours: from six to eight o'clock A. M., and from six to eight P. M. A waste of water at any place or time is strictly forbidden.

MILITARY ACADEMY.

The following persons were this week designated for examination for admission to the U. S. Military Academy in June next: Arthur Lee Giblin, Troy, N. Y.; Paul F. Pyburn, Brooklyn, N. Y.; Harry Lane James, Richland Centre, Wis.; Wm. H. Holmes, Clarksburg, W. Va.; Carey Fletcher Spencer, Knoxville, Tenn.; James Thomas Salmons, Nashville, Tennessee.

(Correspondence of the Army and Navy Journal.)

WASHINGTON BARRACKS, D. C.

JULY 26, 1886.

INDIVIDUAL skirmish firing is now in season among the batteries, preliminary to the regular company drills, and is of great advantage to the men.

With the exception of a few who are finishing their qualifying scores for sharpshooters, the target season will shortly come to a close. The results are gratifying to the batteries, as their inspection records exhibit, containing a large increase in the number of marksmen and sharpshooters.

The hall heretofore used for gymnasium purposes has been fitted up for gallery practice under the superintendence of Major James B. Burbank, range officer.

Colonel E. C. Bainbridge, 3d Artillery, assumed command of the dress parade last week and was serenaded by the regimental band on the evening of July 21. Officers' hops, juvenile entertainments, crabbing, sailing, fishing, and bathing, are a portion of the mouth's doings.

The Gibson Social Club and the Soldiers' Temperance Union held special business meetings in the recreation hall for the purpose of electing officers for the ensuing year.

The sultry weather which we have experienced for some time, is very unpleasant, the thermometer registering at 95 and 96.

The evening open air concerts continue as usual to attract a large number of visitors, not to mention the attendance at retreat. ATHENRY.

RECRUITING DETAILS

(THUS FAR ANNOUNCED.)

1st Cavalry, Captain J. Q. Adams; Captain James Jackson; 2d Cav., Captain J. N. Wheelan; 3d Cav., 1st Lieut. G. K. Hunter; 5th Cav., 1st Lieut. H. W. Wheeler.

3d Infantry, Captain Chas. Hobart; 7th Infantry, 1st Lieutenant Fredk. M. H. Kendrick; 9th Inf., 1st Lieut. James Regan; 11th Inf., Capt. G. G. Lott; 15th Inf., 1st Lieut. G. H. Kinzie; 19th Inf., 1st Lieut. Chas. A. Vernou; 21st Inf., Captain Evan Miles; 23d Inf., 1st Lt. Charles H. Heyl; 25th Inf., Capt. C. F. Robe.

COLUMBUS BARRACKS, O.

JULY 26, 1886.

RECRUITING at the Depot is very dull, owing, probably, to the extreme warm weather which has prevailed in this latitude lately. Most of the enlistments are of old soldiers. Recruiting for the 9th Cavalry, has been opened, but there have been no enlistments thus far.

All the specially assigned men (with the exception of those for the 2d and 17th Regiments) have been sent to their respective stations.

1st Lieut. W. J. Campbell, 22d Inf., has returned from conducting a detachment of 25 recruits to Fort Lowell, A. T., for assignment to the 8th Inf.

Asst. Insp.-Gen. Henry J. Farnsworth, U. S. A., was at the Depot the past week on official business. Capt. A. H. Young, A. Q. M., U. S. A., has returned from leave of absence in the East.

COURT-MARTIAL CASES.

IN the recent case of a soldier of Troop I, 3d Cav., tried at Fort Elliott, Tex., for neglect of duty, the reviewing authority, Brig. Gen. J. H. Potter, says: "The record shows the remarkable fact that a mounted pass was given by the troop commander to a man whom he suspected of an intention to desert, and that the prisoner was given a similar pass and sent, unarmed, to keep him under surveillance. If it were regarded as necessary for the prisoner to go at all he should have been sent under orders and with sufficient means to bring back the man if it became evident that he was attempting to desert. The prisoner is not wholly blameless in the matter, but as it is evident that he could not have fully carried out his instructions with the means at his command, the sentence is remitted to a forfeiture of $10 per month for two months."

In a case at Fort Leavenworth, Gen. Potter says: "The proceedings are approved, except the action of the court in permitting a *nolle prosequi* to be entered to the second charge and its specification without the question having first been submitted to the reviewing authority for his decision and orders thereon.—See Winthrop's Digest Op. J. A. G., p. 345. Moreover, the prisoner having been arraigned and called upon to plead to the charge he was entitled to a verdict, and the proper course for the court was to acquit him of that charge and specification." (G. C. M., O. 29, Dept. Mo., July 2.)

THE SEVENTEENTH INFANTRY.

THE Winona *Times*, referring to the departure of the 17th U. S. Infantry from Fort Yates, Dak., for Wyoming, says: "The regiment has seen the Missouri River valley develop from an Indian battle ground to a thrifty, flourishing farming region, dotted with prosperous villages and hamlets. They have known the country from its infancy, they have watched its progress with pride, and have formed for the people and the community a kind of parental affection, and the people have cordially reciprocated these sentiments and come to look upon the 17th as their guardian angels and devoted friends. As a regiment the 17th has always maintained its individuality and personality, and now that we have been compelled to part with it, it comes as the loss of an old revered, respected friend. The departure of the 17th will mark an epoch in our history. The charming ladies, the gallant, genial officers, the men who proudly wore the figures 17 above crossed rifles on their caps, the band, indeed each and every item and incident which went to form the regiment will be sadly missed by all those who are left behind. And each and every one unite in wishing the regiment as a whole, and each individual member a hearty, cordial and sincere 'God speed!'"

THE OLD MOUSTACHE TO HIS PIPE.

My amber-hued spicy old meerschaum,
What spell hath bewitched you to-night?
Each cloudy wreath of your fragrance,
With a dream of my youth is alight—
They gather and gather around me,
Those old time comrades of mine,
When I was a second lieutenant
And messed with the Tenth of the Line.

What stories went round that mess table!
What rollicking songs were sung!
There's no such good fellowship now-a-days,
As there was when I was young.
What a man for his glass was Jack Harley,
They say 'twas of liquor he died.
Poor fellow! I hope he's not taking
"Something hot," on the other side!

Little Jim Gregg was our "parson,"
The butt of the whole brigade.
But he won his promotion in battle,
For he fought as hard as he prayed.
Brave soldier, bold wooer, Tom Clancy,
The women were all at his feet.
'Tis only the best of good metal
Stands firm in that sulphurous heat.

I met him not long since on Broadway,
Of good looks there was left scarce a trace.
Why must all the swell fellows grow gouty,
Bald-headed and red in the face?
He married a flirt and a fortune,
They have led a prodigal life,
And now in old age, they are childless;
A wrangling old husband and wife.

Then there was soft-hearted Ned Tinkham,
Who had not a cent but his pay;
He married the sweetest of women,
And lives in the cosiest way.
They've three little rosy-cheeked youngsters,
The last one is named after me.
Just think what he said last evening,
Curled up, little rogue, on my knee—

"Dood night, Uncle Dickey," he murmured:
—More sleepily still, "Dood night, Dod."
You see he'd no time for long speeches,
He was off on short notice for Nod.
It was such a soft little whisper;
He seemed to think God was so near!
Between you and me, old comrade,
It made me feel deucedly queer. C. F. C.

Military Order of the Loyal Legion.

Application has been made to the Commandery-in-Chief to charter a Commandery of the State of Iowa, to be located at Des Moines. Applications for membership or for transfer as charter members should be addressed to Major Hoyt Sherman, Des Moines, Iowa.

IN the August instalment of Mr. Howells's new novel, "The Minister's Charge," now appearing in the *Century*, occurs the following passage: "'Sewell' [the minister,] "mused awhile. Then he said with a smile, 'It's very much simpler to fit people for the other world than for this, don't you think?' 'Yes, it is,' [replied the editor]. 'It was a cold day for the clergy when it was imagined that they ought to do both.'"

OUR NEW NAVAL VESSELS.

WE give here a description of the new naval vessels decided upon by the Board having the matter in charge:

Four Thousand Ton Steel Cruiser.—Dimensions: Length on load-line, 310 feet; beam, extreme, 49 ft. 1¾ ins.; draft, mean, 18 ft. 9 ins.; load displacement, about 4,000 tons.

I. H. P., 6,000 natural draft; 8,500 forced combustion. Twin screws. Speed, estimated, 18 knots. Rig, bark. Plain sail area, 12,000 square feet. Coal capacity, 850 tons. Complement of men, 300.

Main Battery: 12 6 in. breech-loading rifles.

Secondary Battery: 4 47 m. m. revolvers; 4 57 m. m. H. P. single shot; 2 37 m. m. revolvers; 1 short Gatling.

This vessel will be built of steel throughout, having a double bottom 3 ft. 3 ins. in depth running the entire length of the machinery space, or 129 ft. Throughout the length of the double bottom the ship is constructed on the bracket system; before and abaft the double bottom the framing is of Z-bars, 6″x3½″x3″x 14 lbs.; the frames are spaced 3 ft. from centres throughout. The outer plating varies from 17½ lbs. to 15 lbs. per square foot. The machinery, magazines, shell rooms, torpedo rooms, and steering gear are placed below an armored deck, which is 3 ins. thick on its sloping sides and 2 ins. on the horizontal part amidships. The outer edge of this deck is 4 ft. 3 ins. below the load-line, sloping up to 15 ins. above the load-line at the midship part of the vessel. All openings in this deck to machinery spaces, magazines, shell rooms, etc., are protected by cofferdams. About 4 ft. at its lowest part above this protective deck runs a berth deck the entire length of the vessel; between these two decks, for the length of the machinery space, coal is stored, forming a belt of coal 15 ft. 6 ins. in width above the machinery, while below the protective deck a belt of coal 9 ft. in thickness also runs the length of the machinery. The vessel is a poop and forecastle deck ship, with open gundeck. The battery will be mounted in sponsons on central pivot carriages supporting segmental shields 2 ins. in thickness—2 under the forecastle, 2 under the poop, 4 under the main bridges, and the balance amidships. Four guns will be able to concentrate within 400 ft. of bow or stern; either broadside of 6 guns will concentrate within 100 ft. of the ship's side.

The vessel will be provided with six above-water torpedo launching tubes, as in the 1700-ton vessel; also electric search lights and apparatus for lighting the ship, also a complete system of forced ventilation.

The protective deck will be carried down to strengthen the ram-shaped bow, which will be thoroughly stiffened and strengthened by bulkheads and breast-hooks for ramming purposes.

The hull will be sub-divided by fore-and-aft and athwartship bulkheads into over 150 water-tight compartments.

—

3,730-ton Twin Screw Steel Cruiser.—Principal dimensions: Length between perpendiculars, 300 ft.; moulded breadth, 46 ft.; draft, forward, 17 ft. 6 in.; draft, aft, 19 ft. 6 in.; displacement, 3,730 tons.

The hull is constructed of steel throughout, with double bottom under engines and boilers, and a steel protective deck, two to three in. thick, complete from the ram to the stern-post, its edges 4 ft. below, and its crown 1 foot above the load-water-line. Ten complete transverse and several partial bulkheads divide the hold into many water-tight compartments. The space between the protective deck and the main deck is very minutely sub-divided into water-tight compartments occupied as coal-bunkers, storerooms, chain-lockers, and torpedo-rooms. The conning tower is protected by 2 in. of steel armor, and two ammunition hoists, 3 in. thick, lead direct from the shell-rooms to the loading-towers at the breech of the 10-in. guns. The free board is 15 ft. and the axis of the broadside guns are 18.2 ft. above the load-water-line.

The armament consists of two 10-in. 28-ton B. L. R. on central pivots, the hydraulic revolving and loading gear, and the recoil cylinders being protected by 2-in. steel screens and six 6-in. 4-ton B. L. R. on central pivot carriages, and spar-deck sponsons in broadside. The secondary battery includes two 6-pounder R. F., eight 1-in. Nordenfeldt, and four Gardner machine guns.

The torpedo battery consists of four launching tubes mounted above water in broadside.

The hydraulic power which actuates the gun mechanism is the same as that which operates the steering gear, and the 10-in. guns can be fired at point blank in a fore and aft direction without damage to the deck below.

The engines are of a horizontal (or slightly inclined) compound type, situated in two separate compartments, one abaft the other, actuating three-bladed twin screws. I. H. P., under forced draft. 7,650; maximum trial speed, 18.9 knots, the mean of two runs over a 10-mile course at load draft.

There are six single-ended locomotive three-furnace boilers in two separate compartments with athwartship fire-rooms.

This ship has two military masts, no sail power except storm sails; her normal coal capacity is 450 tons, but 800 tons can be carried, which increases her draft 1 ft. 6 in.; her endurance at 10 knots is about 8,660 miles, and at 8 knots about 11,000 miles, and her complement is 325 officers and men.

—

Seventeen Hundred Ton Gunboat.—Dimensions: length on load-line, 230 ft.; beam, extreme, 36 ft.; mean draft, 14 ft.; load displacement, about 1,700 tons. Twin screws. I. H. P., 2,200, natural; 3,200 forced combustion. Speed, 16 knots. Rig, three-masted schooner. Plain sail, area, 4,409 sq. ft. Coal capacity, 400 tons. Complement of men, 150. Main battery, 6 6-in. guns (breech-loading rifles; secondary battery, 2 57mm. high-power, single shot, 2 47mm. high-power, single shot; 2 37 mm. revolvers; 1 short Gatling. This vessel will be unsheathed, built of steel; the frames are Z bars, 6″x3½″x3″x14 lbs. The outer plating is of 14 lbs. per sq. ft. The engines, boilers, magazines, shell-room and stearing gear are placed beneath a water-tight steel deck, running the entire length of the vessel ⅜in. in thickness, its outer edge being 3 ft. below the load water-line and rising to the load line at centre line amidships. The stem will be slightly ram-shaped and stiffened for ramming. The hull is

divided into numerous water-tight compartments, as in the 870-ton. All openings in the water-tight deck to machinery and magazines are protected by coffer dams; the machinery is further protected by a belt of coal 9 ft. in thickness running entire length of the machinery space.

The main battery will be mounted in sponsons on central pivot carriages supporting segmental shields; two on the forecastle, two on the poop, and two amidships. The forward and after guns will be able to concentrate on an object 300 ft. from the pivots, while the amidship guns will have a train of 70 degrees abaft and forward of the beam. Three guns may be concentrated on either broadside within 100 ft. of the ship's side. This vessel will be provided with six above-water launching torpedo tubes, capable of being trained several degrees forward or abaft the beam; she will also have a fixed torpedo tube in the bow and stern; she will also be provided with electric light apparatus and search lights.

Eight Hundred and Seventy Ton Gunboat. Dimensions: Length between perpendiculars, 175 ft.; beam (extreme), 31 ft.; draft (mean), 11 ft.. 10 ins.; displacement, about 870 tons.

I. H. P., 900 natural draft; with forced combustion, 1,350; Speed (estimated), 12 knots; Rig, barkentine; plain sail area, 4,480 sq. ft.; coal capacity, 160 tons; complement of men, 100; number of screws, 1.

Main battery, 4 6-in. guns.

Secondary battery 2 47 mm. high power single shot; 2 37 mm. revolvers; 1 short Gatling.

This vessel will be constructed on the composite system, viz.; frames, beams, stringers, and keelsons of steel, with the outer planking and decks of wood; the planking will be in two thicknesses of 2½ and 3 inches, and coppered.

The engines and boilers are placed beneath a water-tight steel deck 3-8 in. in thickness, its outer edge being 27 in. below the water line, rising to 8 in. above at the centre line amidships. The vessel is divided into numerous water-tight compartments by steel athwartship and fore and aft bulkheads, thus localizing the damage due to the hull being penetrated by shot or ramming. The main battery will be mounted in sponsons on central pivot carriages, two having a range of from 2 degs. across the bow to 70 degs. abaft the beam, and two having a range of from 2 degs. across the stern to 70 degs. forward the beam. Two guns can be concentrated on an object 400 ft. ahead of the bow, or abaft the stern, and within 100 ft. on either broadside.

The machinery of the 4,000 ton twin-screw cruiser consists of two direct acting compound screw engines, each with its auxiliaries of 4250 I. H. P. made forced draught. Each engine will have a high and a low pressure cylinder of 46½ and 83½ in. diameter respectively, and a stroke of piston of 36 in. The number of revolutions to be about 125, when developing 4250 indicated H. P. The engines will be placed in separate water-tight compartments, and will be duplicates. The propellers are to be of adjustable pitch, with a diameter of 15 ft., and will be made of manganese bronze. There will be six steel boilers of the horizontal tubular type, with an aggregate grate area of 690 sq. ft., and a heating surface of 20,640 sq. ft. Four of these boilers will be double ended and two single ended. They will be located forward of the engines in separate water-tight compartments. There will be four vertical duplex pumps, two in each boiler compartment, and one in each fireroom.

The machinery of the twin-screw gunboat of 1,700 tons displacement consists of two horizontal direct-acting compound screw engines, each engine, with its auxiliaries of 1,650 I. H. P., under forced draft.

The engines are to have each a high and low-pressure cylinder of 29 and 52 ins. diameter, respectively, the piston stroke of 30 ins., and the number of revolutions to be about 150 per minute.

The engines, like those of the 4,000 cruiser, will be placed in separate water-tight compartments, and will be duplicates. The propellers are to be three-bladed, of about 11½ ft. in diameter, and will be made of Manganese bronze.

The boilers will be four in number, of horizontal, cylindrical, tubular type, containing an aggregate grate area of 240 square feet, arranged fore and aft in two water-tight compartments, with a fireroom athwartship, abaft the after boilers and forward of the forward boilers. All the steering engines, windlasses, and capstans and other auxiliary machinery is to be of latest improved pattern.

The machinery of the 870-ton gunboat is designed to have, with its auxiliaries, 1,300 I. H. P. under forced draft.

The engine is to have a high and a low-pressure cylinder of 25 and 46 ins. diameter, respectively, and a stroke of 33 ins, and the number of revolutions to be about 136 per minute. The propeller will have three adjustable blades, with a diameter of 9 ft. 9 ins., and to be capable of adjustment as to pitch.

The boilers are to be two cylindrical boilers, 18 ft. 8 ins. long and 8 ft. 8 ins. diameter, and contain an aggregate of 93 square feet, and a heating surface of about 2,733 square feet. They are to be placed side by side forward of the engine, with an athwartship fireroom 8 ft. 6 ins. wide.

ZALINSKI'S GUN DOES WELL.

A NUMBER of experimental shots were made by Lieutenant Zalinski at Fort Lafayette July 23 with the pneumatic dynamite gun. Three projectiles weighing 140 pounds each were fired under a pressure of 1,000 pounds, the centre of gravity of each being at a different distance from the point of the projectile. The projectiles remained in the air from nine and six-tenths to nine and eight-tenths seconds, and landed about two thousand yards away, toward Upper Quarantine Island. A 160 pound shell, nine feet in length, of a pattern designed by Colonel Hamilton, was then brought out. Only one of this pattern had previously been fired. Its wooden "tail" was circled by metal flanges, to give it buoyancy and steadiness. It was placed in the gun, which had been elevated to thirty four degrees. The word was given, the gunner opened the air-valve, and, with a long, drawn-out screech, the projectile flew upward. It could easily be followed by the eye as it travelled in a great arc. Nineteen and a half seconds after it had been fired a column of water rising from the bay showed that it had struck the water two and a half miles away from the mouth of the gun.

THE NAVY.

NAVAL VESSELS IN COMMISSION.

WHEN AND WHERE LAST HEARD FROM.

N. Atlantic Station—Rear Admiral S. B. Luce.

GALENA, 3d rate, 8 guns, Comdr. Colby M. Chester. At Portland, Me.

SWATARA, 3d rate, 8 guns, Comdr. E. T. Woodward. At Portland, Me.

TENNESSEE, 1st rate, 22 guns (f. s. n. a. s), Capt. Robert Boyd. At Portland, Me.

YANTIC, 3d rate, 4 guns, Comdr. Francis M. Green. At Portland, Me.

S. Atlantic Station—Captain E. E. Potter (in command temporarily).

Acting Rear Admiral J. H. Russell will shortly command this station.

Mails should be addressed to care of U. S. Consul, Rio de Janeiro, Brazil, unless otherwise noted, or care of B. F. Stevens, 4 Trafalgar Square, London.

ALLIANCE, 3d rate, 6 guns, Comdr. Charles McGregor. Arrived at Newport, R. I., July 11. She will shortly be ordered to join the South Atlantic Station.

LANCASTER, 2d rate, 10 guns, Capt. Edward E. Potter. (Will be relieved by Capt. S. L. Breese.) Flagship of the South Atlantic Station. Sailed from Cape Town, South Africa, June 29, 1886, for St. Helena.

TALLAPOOSA, 4th rate, 13 guns, Comdr. William Whitehead. Arrived at Pernambuco, July 26.

European Station—R.-Adml. Sam. R. Franklin.

Mails should be addressed to care B. F. Stevens, 4 Trafalgar Square, London, England, unless otherwise noted.

PENSACOLA, 2d rate, 16 guns(f. s. e. s.), Captain George Dewey. Arrived in Phalerum Bay, Greece, July 13.

KEARSARGE, 3d rate, 7 guns, Comdr. Charles D. Sigsbee. Arrived in Phalerum Bay, Greece, July 13. Will remain there until about Aug. 1, and will then proceed to the Syrian Coast.

QUINNEBAUG, 3d rate, 8 guns, Comd. Geo. W. Coffin. At Antwerp July 7, 1886.

Pacific Station—Rear-Adm. E. Y. McCauley.

Mails, unless otherwise noted, should be addressed to care U. S. Consul, Panama, U. S. C.

ADAMS, 3d rate, 6 guns, Comdr. Louis Kempff. Left Callao, Peru, June 20, for Coquimbo.

HARTFORD, 2d rate, 16 guns (f. s. p. s.), Capt. J. H. Gillis. Arrived at Callao, June 26, for provisions—from Payta June 22. Was at Callao June 30.

JUNIATA, 3d rate, 8 guns, Comdr. G. T. Davis. At New York. Will make a voyage around the world to visit unfrequented ports. Is expected to sail shortly for the Pacific Station. She is expected to sail not later than next Monday, and possibly Saturday of this week.

IROQUOIS, 3d rate, 7 guns, Comdr. Yates Stirling. At Callao June 30, having arrived June 25.

MONONGAHELA, 2d rate, 9 guns, Lieut. Comdr. George B. Livingston in command. Used as a storeship at Coquimbo, Chili.

MOHICAN, 3d rate, 8 guns, Commander Benjamin F. Day. Was still at Apia, Samoan Islands, June 23, but was to leave there next day for the Tonga Islands to return in a month.

PINTA, 4th rate, screw, 2 guns, Lieut. Comdr. Henry E. Nichols. Address care of Navy Pay Agent, San Francisco, Cal. At Juneau, Alaska, June 8. Was to go to Sitka about the middle of July for supplies.

SHENANDOAH, 2d rate, 9 guns, Captain Byron Wilson. At Callao, Peru, June 30, having arrived June 9. Has been ordered to proceed to San Francisco for repairs, touching en route at South and Central American ports.

Asiatic Station—Rear-Admiral J. L. Davis.

Vessel with (†), address, Mail. to care U. S. Consul, Yokohama, Japan.

ALERT,† 3d rate, 4 guns, Comdr. Chas. J. Barclay. At Yokohama, Japan, July 1. She will return to the U. S., reaching San Francisco about the middle of September.

BROOKLYN, 2d rate, 14 guns, Capt. E. O. Matthews. At New York Navy-yard, being overhauled. Ordered to proceed to the Asiatic Station to relieve the *Trenton*. It is expected that she will sail in July.

ESSEX, 3d rate, 6 guns, Comdr. T. F. Jewell. At Navy-yard, New York. Expects to sail for the Asiatic Station the latter part of July or 1st of August.

MARION,† 3d rate, 8 guns, Commander Merrill Miller. At Shanghai July 1—undergoing repairs.

MONOCACY,† 3d rate, 6 guns, Comdr. Henry Glass. Was at Canton July 1.

OMAHA,† 2d rate, f. s. a. s., 12 guns, Captain Thos. O. Selfridge, commanding. Reported by cable to the JOURNAL, at Shanghai, China, July 17.

OSSIPEE,† 3d rate, 8 guns, Comdr. John F. McGlensey. At anchor off Yokohama, Japan, July 1, under orders to proceed to Chemulpo, Corea.

PALOS,† 4th rate, 6 howitzers, Lieut.-Commander T. Nelson. Was in all probability at Chemulpo, Corea, July 1, having sailed for that port from Nagasaki, June 3.

TRENTON, 3d rate, 10 guns, Capt. Robert L. Phythian. On her way home. Is expected to arrive at Hampton Roads in September next. Arrived at Gibraltar, July 30.

A report to the Secretary from Capt. R. L. Phythian, commanding the *Trenton*, at Singapore, June 7, states that unless otherwise instructed, he should be governed in stopping, by reports received at Port Said from Gibraltar. If the health of that port should be good, he would go there, if not he would stop at Malta and, if necessary, to coal again at Madeira. From Gibraltar (or Madeira) he would proceed to Hampton Roads. The health of the officers and crew was good.

Apprentice Training Squadron.

Address of *Portsmouth* and *Saratoga*, care of B. F. Stevens, 4 Trafalgar Square, London, England, until Aug. 25, and after that date Newport, R. I.

MINNESOTA, 1st rate. 24 guns, Comdr. T. F. Kane. Gunnery ship. Foot of W. 27th Street, North River. Entrance from W. 26th Street. P. O. address, Station E, New York.

NEW HAMPSHIRE, 1st rate, 16 guns, sails, flagship of training squadron, Captain Arthur R. Yates. Coaster's Island Harbor, Newport, R. I.

PORTSMOUTH, 3d rate, sails, 12 guns, Comdr. Chas. V. Gridley. Sailed from Newport, R. I., July 8, for a cruise in European waters.

SARATOGA, 3d rate, 12 guns, Comdr. C. H. Davis. Sailed from Newport, R. I., July 8, for a cruise in European waters.

On Special Service.

CONSTELLATION, 3d rate, 10 guns, Practice Ship of Naval Academy, Commander C. L. Huntington. On her practice cruise. Arrived at Portsmouth, N. H., July 14.

DESPATCH, 4th rate, Lieut. Wm. H. Emory, Jr. At New York.

DOLPHIN, despatch boat, ———— At Norfolk, Va.

JAMESTOWN, 3d rate, sails, 12 guns. Comdr. Horace Elmer. On practice cruise. Arrived at Portsmouth, N. H., July 17.

MICHIGAN, 4th rate, 8 guns, Comdr. John J. Read. Arrived at Milwaukee July 23, and expected to leave July 25 for Toledo, reaching there Aug. 1.

RANGER, 3d rate, 4 guns, Comdr. Chas. E. Clark. At San Francisco July 5.

ST. MARY'S, sails, 8 guns, Comdr. Edwin M. Shepard. N. Y. Schoolship. On her annual cruise.

A private letter from one of the officers of the vessel reports that she was at Funchal, Madeira, on July 3, and everybody was in good health. The ship had made a pleasant cruise and the boys were well over the customary attacks of seasickness and homesickness which afflicted them in the beginning of the voyage.

The ship sailed from New London on May 26. She was driven north, to the banks of Newfoundland, when she had very light winds, with fog, making in four days what she should have made in one. The boys suffered a good deal from seasickness and had a hard time of it. One morning the ship was struck by a sudden squall, which frightened many of the boys, who expressed a desire to go home at once and give up the sea for ever. On June 19 the *St. Mary's* reached Lisbon and those who could "box the compass" and knew the running gear of the ship were allowed to go ashore every other day from ten A. M. till seven P. M. At Lisbon they witnessed a genuine and spirited bull fight, which was to them a rare treat, and which they will talk over for many a year to come. The ship left Lisbon on June 28 and arrived at Funchal July 1, where the boys got leave to go ashore and see the sights. The vessel was to sail for home on July 6 and it was hoped that she would arrive in New London about August 1.

The boys seemed to be an excellent lot, behaving themselves well afloat and on shore, and only two have been found under the influence of liquor.

When Long Island Sound is reached the ship will cruise in smooth water, and boat exercise will take place until the lads are familiar with the handling of boats under sail and with oars.

The *St. Mary's* may be expected at her wharf, foot of East 31st Street, in October.

ATLANTA, 2d rate, 8 rifled cannon and 12 machine guns, Captain Francis M. Bunce. At New York Navy-yard. She has been ordered to be ready by the middle of next week, to go on a trial trip. Sufficient stores to last a week will be put on board. Her crew, or rather as many men as are needed at present to man her, have been taken aboard. Her list of officers was published in the last week's issue of the JOURNAL.

VANDALIA, 2d rate, 8 guns, Captain Henry L. Howison. Was placed in dry dock at the New York Navy-yard July 22.

Receiving Ships, Iron-Clads, Etc.

FRANKLIN, 1st rate, 20 guns, Capt. Henry Wilson. Receiving ship. At Norfolk, Va.

INDEPENDENCE, 3d rate, sails. 6 guns. Commander Frederick Rodgers. Receiving ship. At Mare Island, Cal.

RESCUE, 4th rate, Mate Samuel F. Lomax. Used as a fire tug. Washington, D. C.

FORTUNE, 4th rate. Lieutenant O. W. Lasher. At Norfolk, Va.

ST. LOUIS, 3d rate, sails. Lieut. Comdr. Chas. A. Schetky, commanding officer pro tem. Receiving ship. League Island, Pa.

WABASH, 1st rate, 26 guns. Captain Joseph N. N. Miller. Receiving ship. Boston, Mass.

VERMONT, 2d rate, 7 guns. Captain Augustus P. Cooke. Receiving ship. At New York.

DALE, 8 guns. Commander Silas Casey. Receiving Ship. At Washington, D. C.

PHILOX, Naval Academy Tug. Mate B. G. Perry in command. At Annapolis, Md.

MAYFLOWER. Mate Kuhl, commanding. At Norfolk.

The iron-clads *Ajax. Catskill. Lehigh, Mahopac, Manhattan* and *Wyandotte*, are laid up at City Point, Va., in command of Comdr. D. W. Mullan.

VARIOUS NAVAL ITEMS.

THE Haytian man of war *Dessalines*, six guns, 140 officers and men, arrived at Cramp's shipyard, Philadelphia, Sunday afternoon, July 25, fifteen days from Port-au-Prince, Hayti, most of the passage being made under sail. The *Dessalines* comes North for repairs. Commandant, Mason S. Cooper; 2d Commandant, Joseph Chevey; Lieutenants, Coulant Toussaint, Joseph Lacoux; Ensigns, Cineus Valcey, Pierre Paul; 1st Engineer, G. G. Wilson; 2d, John Wilson; 3d, William Henry; Paymaster, Pierre Fanntain; Doctor, Destin Chevey; Chief Gunner,

Jacob Thompson; Gunner, Paul Mattison; Boatswain, Alexander Cesar; Sailmaker, Joseph St. Victor; carpenter, Camille Almand.

TWO NAVAL officers inform us that they paid to Mr. Robert E. Carbrey subscriptions which have never reached this office. In view of this we call attention to the statement which appears at the head of this paper: "No responsibility is assumed for subscriptions paid to agents, and it is best to remit direct to the office."

NAVY GAZETTE.

Ordered.

JULY 24.—Lieutenant Commander George C. Reiter, ordered to duty at the torpedo station July 31.

Assistant Surgeon F. J. B. Cordeiro, to the receiving ship Minnesota; Chief Engineer Charles E. De Valin, to the Washington Navy-yard August 10.

JULY 26.—Passed Assistant Engineer Harrie Webster, and Cadet Engineers A. R. Bush, T. J. Hogan, and I. B. Parsons, to temporary duty in connection with the trial of the machinery of the Atlanta.

JULY 27.—Lieutenant Commander George R. Durand, to duty on the monitors in the James River August 7.

JULY 29.—Commodore William Gibson, navigation officer at the Washington, D. C., Navy-yard September 1.

Lieutenant A. C. Dillingham, to the Tennesssee July 29.

Lieutenant C. F. Pond, from the Coast Survey steamer Hasler and ordered to navigation department, Mare Island, Cal., Navy-yard.

Ensign H. C. Poundstone, from the Naval Academy and ordered to the Essex.

Ensign M. K. Eyre, and Passed Asst. Engineer J. S. Ogden, from the Ranger and ordered to the Naval Academy September 1.

Paymaster H. T. Wright, to Washington Navy-yard as the relief of Paymaster Hoy.

Detached.

JULY 24.—Lieutenant W. D. Rose, from the Mare Island Navy-yard and ordered to the receiving ship Independence.

JULY 26.—Lieutenant E. D. Taussig, from command of the coast survey steamer McArthur and placed on waiting orders.

Lieutenant B. T. Walling from duty on the coast survey and placed on waiting orders.

Passed Assistant Engineer John C. Kafer, from the Bureau Steam Engineering July 31 and granted two months' leave.

Assistant Engineer E. O. C. Acker, from the Bureau Steam Engineering August 1 and ordered to duty at the Vanderbilt University, Tenn.

Assistant Engineer G. H. T. Babbitt, from the Naval Academy and ordered to temporary duty in connection with the trial of the Atlanta.

Assistant Engineer A. M. Hunt, from duty at the Michigan Military Academy and ordered to temporary duty in connection with the trial of the machinery of the Atlanta.

JULY 27.—Commander C. F. Goodrich, from duty as Special Inspector of Ordnance August 28 and ordered in charge of the torpedo station at Newport, R. I, September 7. Sailmaker James W. Wingate, from duty at the torpedo station and placed on waiting orders.

JULY 28.—Commander James H. Sands, from duty at the Navy-yard, Washington, September 1, and granted leave of absence for one year with permission to leave the United States.

Lieutenant S. C. Lemly has reported his arrival at Washington, having been detatched from the Omaha and from special duty on the Asiatic station, and has been ordered to special duty in the office of the Judge Advocate General.

JULY 29.—Pay Inspector James Hoy, from the Washington Navy-yard, September 1 and placed on waiting orders.

Lieutenant C. C. Rogers, from the Essex to the Swatara.

Lieutenant J. M. Roper, from the Bureau of Navigation, August 31 and ordered to the Naval Academy September 1.

Nominations.

JULY 28.—Assistant Paymastar Eustace B. Rogers, to be Past Assistant Paymaster May 2, vice Passed Assistant Paymaster Rand, promoted, and Geore M. Allen, resigned.

The President has nominated Paymaster Charles F. Guild to be Payinspector, and Passed Assistant Paymaster S. R. Colhoun to be Paymaster.

CASUALTIES.

Deaths in the Navy of the United States, reported to the Surgeon-General, during the week ending July 27, 1886:

John Tracey, beneficiary, died at Naval Hospital, Philadelphia. Pa., July 23 with cirrhosts of liver.

Charles Stuart, gunner, died at Torpedo Station, Newport, R. I., July 21, with meningitis.

MARINE CORPS.

JULY 23.—Second Lieutenant C. Marrast Perkins, granted leave of absence for one month for the benefit of his health, upon the expiration of which he will join U. S. F. S. Tennessee.

JULY 26.—First Lieutenant Maucil C. Goodrell, to be captain July 16, vice Washburn, retired.

Second Lieutenant T. Glover Fillette, to be first lieutenant July 16, vice Goodrell, Marine Corps, promoted.

JULY 27.—Major Charles Heywood, granted sick leave of absence for two months from August 1.

JULY 28.—2d Lieutenant Carroll Mercer restored to duty and ordered to report in person to the Commandant. U S. M. C., for orders.

JULY 29.—Major Augustus S. Nicholson, granted leave of absence for one month from August 4.

CHANGES ON THE PACIFIC STATION.

Rear Admiral McCawley reports the following changes during June on the Pacific Station, under date of Callao, June 30: Lieutenant Alexander McCrackin, detached from the Adams and ordered to the Shenandoah June 3; Lieutenant Henry McCrea, detached from the Shenandoah and ordered to the flagship Hartford June 3.

Passed Assistant Surgeon J. R. Waggener, detached from the Hartford, arrived June 4 and took passage on Shenandoah to Callao, reporting on the Iroquois June 26.

Captain James H. Gillis, reported for command of the flagship Hartford at Payta June 18.

Passed Assistant Engineer William B. Boggs, while on passage to join the Adams, died of yellow fever at Guayaquil June 21, contracted at Panama.

FROM THE PACIFIC STATION.

REAR-ADMIRAL MCCAULEY reports the following movements of vessels of the Pacific Squadron under date of Callao, June 30:

The flagship *Hartford* was at Payta, June 1 to 22; at sea, June 22 to 26; at Callao, June 26 to 30.

The *Shenandoah* was at Payta, June 1 to 5; at sea, June 5 to 9; at Callao, June 9 to 30.

The *Adams* was at Callao, June 1 to 7; at sea, June 7 to 11; at Callao, June 11 to 20; left Callao, June 20, for Coquimbo, since when no news received.

The *Mohican* left Callao, March 6, for the Islands, since when no news received.

The *Iroquois* left Coquimbo, May 18, for Caldera; Caldera, May 19 to June 1; at sea, June 1 to 5; at Iquique, June 5 to 11; at sea, June 11 and 12; at Arica, June 12 to 17; at sea, June 17 and 18; Mallendo, June 18 to 21; at sea, June 21 to 25; at Callao, June 25 to 30.

The storeship *Monongahela* was at Coquimbo during the month.

(Correspondence of the Army and Navy Journal.)

NAVAL ACADEMY.

ANNAPOLIS, MD., July 27, 1886.

LIEUTENANT J. T. HAINES, 5th U. S. Cavalry, has been spending a few days with friends in Annapolis.

Lieut. Hutchins is acting as Superintendent in the absence of Capt. Ramsay.

Prof. H. D. Todd and family have gone to New Jersey for the summer.

The officers' base ball club, which has been practicing daily on the grounds for the last six months, made its *debut* on the Academy grounds on Monday afternoon in the presence of about 1,600 spectators. The opposing team consisted of the second class nine, which has been boning up for this contest for about a year. The array of players presented by the officers is as follows: Pitcher, Lieut. Haines; Catcher, Ensign Haeseler; 1st Base, Ensign Hill; 2d Base, Ensign Quinby; 3d Base, Asst. Engr. Schell; Short stop, Ensign Blish; Left field, Ensign Gill; Right field, Major Goodrell; Centre field, Dr. Steele. The cadets mustered as follows: Pitcher, Hubbard; Catcher, Robinson; 1st Base; Melson; 2d Base, Monroe; 3d Base, Rowan; Short stop, Morris; Left field, West; Right field, Anderson; Centre field, Williams. Excitement ran high as the officers came to the bat in the first innings, with Lieut. Haines facing the ball. He smote it for two bases, and the officers were consequently just two bases ahead of their opponents. The game went steadily onward, and so did the runs, especially those of the cadets. At the early part of the fourth inning the O.'s were jubilant. To be sure it rained pretty hard, but the Captain of the O.'s wouldn't think of stopping.

Ridiculous! quoth he, when Dr. Steele meekly asked permission to go below and get dry.

During the fourth inning, however, the O.'s stood a good chance of winning the game, for there were three men on bases, and none out.

The eyes of the spectators were now fixed on the Marine Barracks, where it was expected the next batter, Ensign Blish, would send the ball. A hushed murmur of excitement was wafted over the spellbound assemblage as, with set teeth and flashing eye, he advanced manfully to the plate. Mr. B. is instructor in mortar practice, and in the front rank of the crowd stood his class, breathlessly waiting for their teacher to knock the ball several miles into the sky. He waited patiently for his ball; the darkey who "totes" water stood still in his tracks; the band wound up with a flourish on "See the Conquering Hero Comes;" the fielders stood in the most remote parts of the grounds; the umpire yelled "two strikes," and the ball continued to pass silently to and fro from pitcher to catcher. The critical moment had come. Mr. B. brought his bat around with Herculean energy only to hear it crash against dry air, while the ball rested peacefully in the hands of the catcher. Mr. B.'s chances for glory were gone. The critical moment had passed. The band regained sufficient breath to play "When Johnny Comes Marching Home;" the next two strikers, Major and Doctor, both went out, the rain came down with increased vigor, and the long, wet struggle was over.

The official score is appended:

	1	2	3	4	Total.
Officers	2	3	3	0	8
Cadets	4	5	2	4	15

Errors: Officers, 17,320; Cadets, 968. Earned runs, Officers, 7; Cadets. 14. Time of game, four hours and ten minutes. Umpire, Mr. Shaffer; Referee, Lieut. Gheen.

In justice to the O.'s, however, it must be said that they are *not* discouraged.

(Correspondence of the Army and Navy Journal.)

PENSACOLA NOTES.

THERE was much gratification at the Navy-yard upon learning of the safe arrival of Ensign Chas. S. McClain in Washington. He was carried upon a litter to the steam launch about half-past three in the morning and was met at the Palafox Street wharf in Pensacola by the naval ambulance and conveyed to the railroad station. During a part of the time a heavy rain prevailed, and Surgeon Ross, U. S. N., had to exercise the utmost care of his departing patient, who was accompanied to Washington by Mr. Purdon, the apothecary at the Naval Hospital.

Captain Richard L. Hoxie, Corps of Engineers, who is stationed at Montgomery, Ala., has returned to that city after a visit of a month to his little cottage at Fort McRae, at the entrance to Pensacola Bay, where channel work is being done under his supervision. Mrs. Hoxie and baby, and her mother and sister were with him. During their stay, Lieut.-Comdr. Gibson, commandant of the Navy-yard, took Captain Cochrane, of the Marine Corps, Capt. Grugan, 2d Art., and Captain Hoxie out to the "Snapper banks" in search of the delicious gulf fish known as the red snapper. Their luck was not of the best, although Captain Grugan made the magnificent haul of two snappers at one time, weighing about ten pounds each. His line had but two hooks and was not down three minutes. Some of the party got sea-sick.

The Marine Social Club at a recent election made Sergeant Peter Toner President; Corporal John Douglas, Vice President; Private H. J. McNally, Secretary, and Private Frank L. Thornton, Treas. The club has a suite of comfortable rooms, a fine billiard table, and provision made for books, newspapers, dominoes, checkers, etc. There is considerable dramatic talent in the club which may be heard from in the future, and it will also promote a ball or two, perhaps, when the cool weather returns. The chief enjoyments of the marines now are boating, bathing and fishing. Some days they catch so many fish and crabs from the navy-yard wharves that Capt. Cochrane has had to build them an extra kitchen, which is dubbed the "fish kitchen."

The young ladies of Pensacola, who did so much to make pleasant the visit of the officers of the North Atlantic squadron last April, have been much interested in the announcement of the result of the examinations of the last class of the six-years' cadets. Some of the dear ones must suffer disappointment, for all could not pass, and it is not always the "perfectly lovely" cadet who gets through, or thinks it worth while to write and communicate his average. In Annapolis and Norfolk they know more about cadet ways than they do in Pensacola.

REVENUE MARINE.

Confirmations July 26 for appointment in the Revenue Marine service:

Daniel J. Ainsworth, of Virginia, to be a 3d lieutenant.
J. Charles Harris, of New York, to be a 3d lieutenant.

For promotion in the Revenue Marine service:
3d Lieut. George H. Doty, to be a 2d lieutenant.
3d Lieut. Howard Emery, to be a 2d lieutenant.
3d Lieut. Francis M. Dunwoody, to be a 2d lieutenant.
3d Lieut. John E. Lutz, to be a 2d lieutenant.

Names and Stations of Revenue Cutters.

Alert, 2d Lieut. E. C. Chaytor, Elizabeth City, N. C.
Bear, Capt. M. A. Healy, on cruise to Arctic.
Bibb, Capt. D. C. Constable, comdg, Oswego, N. Y.
Boutwell, Capt. W. S. Simmons, comdg, Savannah, Ga.
Chase, Capt. L. G. Shepard, comdg, on practice cruise.
Colfax, Capt. J. C. Mitchell, comdg. Wilmington, N. C.
Corwin, Capt. C. A. Abbey, on cruise Seal Islands.
Crawford, repairing at Baltimore.
Coxe, 1st Lieut. W. C. Coulson, comdg, Philadelphia, Pa.
Chandler, 1st Lieut. H. D. Smith, comdg, New York.

CHOICE OLD WHISKIES,
MILD, MELLOW AND DELICIOUS.

The peculiar medicinal qualities of Whiskey distilled from the finest growth of Rye in the renowned Valley of the Monongahela, have attracted the attention of the Medical Faculty in the United States to such a degree as to place it in a very high position among the Materia Medica.

We beg to invite the attention of connoisseurs to our celebrated fine OLD WHISKIES, which we offer at the following prices, in cases containing One Dozen Bottles each:

Old Reserve Whiskey, - - - - $18.00
Unrivalled Upper-Ten Whiskey, 15.00
Brunswick Club Whiskey, - - - 12.00

If you cannot obtain these Whiskies from your Grocer, we will, on receipt of Bank Draft, Registered Letter or Post Office Money Order, deliver them to your address, by Express, charges prepaid, to all points east of the Mississippi river; and by freight to any part of the U. S. (prepaid.)

For EXCELLENCE, PURITY AND EVENNESS OF QUALITY, the above are UNSURPASSED BY ANY WHISKIES IN THE MARKET. They are entirely FREE FROM ADULTERATION, and possess A NATURAL FLAVOR AND FINE TONIC PROPERTIES.

These Whiskies are sold under guarantee to give PERFECT SATISFACTION; otherwise to be returned at our expense.

OUR AUXILIARY NAVY.

THE Scriptures give commendation to the man who having but one talent made the best possible use of it, rather than to him who having ten talents hid them away in a napkin; by a parity of reasoning our Navy Department is to be commended for the disposition it shows to make the best use of the very inadequate means placed at its disposal by Congress. It is incomprehensible that any of our national legislators should object so bitterly as some of them do to encouraging our mercantile marine, and should dole out the public money in so niggardly a spirit to promote the work of building up our decaying Navy. Foreign governments, England, France, Italy, and Russia, understand full well the value of the mercantile marine as providing an auxiliary Navy, which takes care of itself in peace and is able to render the most important service in war. Instead of discouraging the establishment of American lines of steamers by a senseless howl against subsidies, and the malignant abuse of such men as JOHN ROACH, this patriotic prevision encourages the building of steamers which may serve as cruisers or transports.

While Congress objects to giving aid to our already attenuated shipping, it is satisfactory to know that the Navy Department is alive to the importance of the subject, and desirous, in the time of peace, to prepare itself for the inevitable demands which war or other disturbance may make upon it.

A few years ago the collection of information of importance to the Navy, if not wholly neglected, was prosecuted in so desultory a manner as to be of little use. Now, the work is systematized and the information obtained so arranged and classified as to be instantly available. The advance that has been made in this department of naval administration is shown in the assignment of the Board, of which that most capable and accomplished officer, Commodore BRAINE, is the head, to the work of gathering information concerning the vessels of our mercantile marine, which may be made available for war purposes. If we could hope to see Congress rise to some appreciation of the dignity of its calling, and forget for a season the oleomargarine necessities of popular legislation, we might hope for the passage of a bill granting a bonus to ship owners for all steamers fulfilling the conditions which naval authorities deem essential in a first-class auxiliary cruiser. Meanwhile, we are glad to know that the Board is meeting with every encouragement from ship owners, masters, builders, and others interested in commercial affairs.

The higher class of steamers of the merchant services of all commercial nations will necessarily take part in future naval wars. This is a fact foreseen and acknowledged by the great naval powers of Europe, whose finest and swiftest steamers are built in conformity with the Government's ideas of suitable watertight subdivision, and coal protection, which will enable them to withstand a moderate fire without serious loss of flotability or motive power. Such vessels are inspected by the naval authorities, who make a study of their characteristics and classify them according to the services for which they may be specially adapted, and determine the armament which they shall carry and the necessary modification in construction to fit them for the proposed service.

A movement in this direction was made on our part some three years ago, and much valuable information was received in regard to our mercantile fleet; but while good so far as it went it was not carried to its conclusion. The recent order of the Secretary of the Navy directing the continuance and elaboration of this important work will, we trust, result in much benefit to our facilities for rapid mobilization and our ability to undertake the movement of troops or to make a speedy show of force upon the ocean routes of commerce, whether for the defence of our shipping or the destruction of that of an enemy, for which we have hitherto been unprepared. Our auxiliary naval vessels may be used as scouts or look outs of a squadron of war vessels, as despatch vessels, as additional cruisers to prey upon the enemy's commerce, to break up his trade routes or to cover our own, as torpedo boats and torpedo-supply vessels (of the *Hecla* class), or to engage similar vessels belonging to the enemy.

WHAT CONGRESS HAS DONE.

AS THIS will be the last week of the present session of Congress it seems a proper time to consider what has been done, and what has been left undone, and to show what may possibly be done next session, for the two Services. The closing days give promise of being the most eventful of the session, for within the past few days some very important action has been taken upon the subjects of rehabilitating our Navy and restoring our seacoast defences. The House has passed Mr. HERBERT'S bill for the increase of the Navy, and the Senate Naval Committee, having taken favorable action upon it, its final passage may be considered certain. The Fortification Appropriation bill has been increased to a very handsome sum by the Senate and it now only rests with the conference committee, to determine whether there shall be an improvement in this branch of the Service. We give below a complete list of the public measures relating to the Army and Navy that have become laws. It will be seen that they are not numerous and that there are very few of any great importance. The bills for the relief of the surplus graduates of the Military Academy and defining the status of general service clerks are the only two measures affecting the personnel of the Army of any particular moment. The Navy has not a single measure of a general character touching the personnel to its credit; most of the bills of this class are left on the calendars.

The MANDERSON bill for giving the infantry arm a twelve company organization remains on the Senate calendar, where it was placed months ago. There is a hope—and only a hope—for it next ses-

sion. The LOGAN bill to increase the efficiency of the Army, having passed the Senate, stands a little better chance, but unless it is reported from the House Military Committee very early next session it will share the fate of many other less deserving measures. The bill for the relief of officers of the Army (graduates), affected by the RODMAN decision, only requires the action of the House to become a law, but the probabilities are that it will not be reached before next session. The Navy bills of importance have not been numerous during the present session; those for giving to the sailor a retired list like the soldier's, with provisions for savings and for a free home aboard ship between enlistments, deserve mention. The regular appropriation bill made little trouble, the conference committee easily effecting a compromise on the disputed points. The House consented to the Senate amendment making the appropriation asked for by Secretary WHITNEY for the four ROACH cruisers and their armament, while the Senate accepted the House provisions for the new observatory building, and for a Naval training ship to be stationed at Philadelphia, to which it had at first objected. Both branches of Congress passed the bill allowing sea duty pay to Lieutenants HARBER and SCHULTZE, while in search of Lieutenant CHIPP and his party.

Following is a list of Public Acts passed :

No. 4. Appropriating $500.000 for purchase of the old Produce Exchange Building and site in New York City for Army purposes.
No. 11. Increasing pensions of widows and dependent relatives of deceased soldiers and sailors to $12 per month.
No. 12. The Urgency Deficiency bill.
No. 22. To appoint Lieut. Wm. P. Randall a lieutenant commander on the retired list of the Navy.
No. 25. Authorizing the delivery to rightful owners of contents of certain boxes captured during the war.
Nos. 31, 40, 54, 72, 98, 115. Granting right of way for railroad purposes through Arsenal and Naval Asylum grounds at Philadelphia, U. S. Powder Depot, near Dover, N. J., Bridesburg Arsenal grounds, Fort Selden, Fort Russell, Fort Laramie and Fort Leavenworth Reservations.
No. 42. To deliver to Oscar Eastmond a commission as colonel, and to James W. Atwill as lieutenant colonel, 1st Regt., N. C. Volunteers.
No. 43. To furnish certificates of discharge to certain members of Missouri Home Guards.
No. 52. To regulate the promotion of graduates of the U. S. Military Academy.
No. 55. To remove charge of desertion from rolls and records in A. G. O. against certain soldiers.
No. 56. To remove the statue of Maj. Gen. John A. Rawlins.
No. 73. To provide for the study of nature of alcoholic drinks and narcotics in public schools, including Military and Naval Academies.
No. 79. Making appropriations to supply deficiencies for various purposes, including pensions and pay of Army.
No. 93. Making appropriations for support of Military Academy.
No. 96. Making appropriations for support of the Army.
No. 105. Appropriating $150,000 for additional barracks at the several homes for volunteer soldiers.
No. 108. For relief of Fitz John Porter.
No. 114. Making appropriation for payment of invalid pensions.
No. 122. To provide for sale of Fort Brady, Mich.
No. 124. To reimburse National Home for disabled soldiers for losses incurred through failure of Exchange National Bank of Norfolk, Va.
No. 133. To transfer U. S. Barracks at Baton Rouge, La., for educational purposes.
No. —. Providing for enlistment and defining duties of general service clerks and messengers for the Army.

THE RUMORS FROM THE RIO GRANDE.

WE cannot be suspected of any lack of respect for American soldiers, but it certainly should be very gratifying to our professional pride to learn how much higher place the editor holds in public esteem than the soldier. CRAWFORD was murdered on Mexican soil, while on official duty under the orders of his Government which he could not disobey if he would; scarcely a voice is lifted in protest, and no attempt is made to hold any one responsible for the outrage; a Texas editor is jugged for expressing in too open a manner his contempt for Mexican courts and Mexican officials by "sassing" his fellow scribe, when he was forbidden to do so, and the whole Texas frontier is in a blaze. Much as we sympathize with our professional brother we must confess that our bowels are not moved with the compassion that we might otherwise feel if we did not realize that Editor CUTTING is serving a good purpose in calling public attention to the result which naturally follows the disregard of national dignity and honor that was shown in the CRAWFORD case, and which seems, indeed, to characterize the present administration of our State Department. Secretary ENDICOTT is reported as saying, for example: "Don't you think it rather ridiculous to make war on Mexico for the sake of one man when we have tamely submitted for so long to the indignities of Canada upon hundreds of our citizens?" For the first time in a quarter of a century we have a purely civilian administration at Washington, and for the first time within that period civilian ideas are all controlling there. This fact is significant in considering the possibilities of war with Mexico, for it is a civilian administration of all others that is most likely to involve us in war. The soldier understands the value of the initiative and never suffers himself to drift into a situation that involves war until he means war. With him it is a word and a blow. The man who never means fight is the man of all others most likely to find himself in a position where there is no honorable escape from a contest, and, in matters where national privileges and national passions are involved, this is the man most likely to create a warlike situation which he cannot control. We do not give undue importance to the flurry on the Rio Grande border, but it is a symptom, and a symptom of a condition of things which tends directly to war.

The Mexicans have the same exaggerated idea of their own capacity that prevailed at the South in ante-bellum days, and the United States are in much the same state of ignorance of and indifference to the actual condition of affairs as was the North in 1860. The battles on Mexican soil which we refer to with pride, as illustrating the prowess of American soldiers, are in Mexico dwelt upon with equal pride as giving proof of their superiority to us. The expansion of territory which resulted from that war, and the vast increase of national wealth that followed, were gained at the expense of Mexico; a fact which we may forget but the Mexican never. General GRANT, in his Memoirs, says: "The Mexicans celebrate the anniversaries of Chapultepec and Molino del Roy as of very great victories. . . . Their authorities of the present day grow enthusiastic over their theme when telling of these victories, and speak with pride of the large sum of money they forced us to pay in the end." He also tells us that the army over which TAYLOR achieved his victories was hardly an organization, consisting of conscripts, poorly clothed, worse fed, seldom paid and led by officers in the lower grade but little superior to the men. "With all this," he says, "I have seen as hard stands made by some of these men as I have ever seen made by soldiers." "Now, Mexico has a standing army larger than that of the United States. They have a military school modelled after West Point. Their officers are educated, and, no doubt, generally learn. The Mexican War of 1846-8 would be an impossibility in this generation." The editors of a Mexican history of the war with this country, published in 1848, say "Emancipated from the parent country, yet wanting in that experience not to be acquired while the reins of destiny were in foreign hands, and involved for many years in the whirlwind of never-ending revolutions, the country offered an easy conquest to any who might desire to employ against her a respectable force."

The Mexican, therefore, when he reviews the history of the contest with the United States finds in it no cause for discouragement, in the event of a renewal of hostilities, while it does afford him most abundant occasion for hatred of those who took advantage of his weakness to aggrandize themselves. The Mexican who seeks commercial advantage may favor intercourse with this country, but among the Mexicans on our frontier there is, we believe, an active feeling of antagonism toward the United States and the Americans generally. The surest means of preventing this from developing into acts of aggression is to have it thoroughly understood that a strict reckoning will be exacted for outrages upon American citizenship. On the contrary, we seem to be exerting ourselves to make it appear that we hold this to be of little account. Our public officials may so reason, but the people will not, and if they permit the slightest approach to aggression they may at any time find themselves in a situation from which there is no escape short of war, without a sacrifice of honor which public sentiment will not tolerate. It is an editor this time; it was only a soldier before.

THE Senate has reached the sensible conclusion that Congress can have no further excuse for refusing to provide the means for building up our dilapidated sea coast defences, and has accordingly passed the Fortification bill increased to the substantial, though not unreasonable sum of $6,830,000. It is to be hoped that the Senate may not find it necessary to yield in conference. The following are the changes in detail made by the Senate committee in the House bill: An item of $50,000 is included for continuing the sea wall around Governor's Island; Sec. 2 of the bill appropriating $500,000 for procuring steel forgings, for guns, carriages, projectiles, etc., and for testing of improvement of the same, is stricken out and the following inserted :

For the purchase, manufacture, and erection of the necessary tools and machinery for the finishing and assembling of heavy ordnance at the Frankford Arsenal, Philadelphia, Pennsylvania; for gun-carriages, projectiles, fuses, powder, implements, and materials for the trial and proof of such ordnance, and to complete the two 10-inch breech-loading steel guns now under fabrication, their trial and proof, and all necessary expenses incident thereto, including compensation of draughtsman on gun construction, $400,000, to be available until expended.

An additional proviso, which was adopted upon motion of Mr. PLUMB, appropriating $200,000 "to enable the Secretary of the Navy to provide and erect additional tools and machinery for the finishing and assembling of heavy ordnance at the Washington navy-yard." Among the amendments offered and defeated in the Senate were those introduced by Mr. DOLPH, appropriating $2,000,000 to carry out the recommendations of the Committee on Coast Defences, and by Mr. SEWELL, appropriating $100,000 for making and testing two HASKELL multi-charge guns. The bill as passed by the House appropriated only $620,000. The following new and important sections are added :

Sec. 4. To enable the Secretary of War to contract with the South Boston Iron Works for the construction of ten 12-inch, muzzle-loading, rifled, cast-iron mortars, each of 31,000 pounds weight, at a sum not exceeding $6,000 each, or six with steel bands, not to exceed $10,000 each, in the discretion of the Secretary of War, $60,000, or so much thereof as may be necessary: *Provided*, That no part of this sum shall be paid for any such guns until after one of the same shall have been completed in accordance with the contract, and shall have endured a firing test of 200 rounds with standard charges adapted to such a weapon; and after such test each of said guns thereafter manufactured, and tested by ten rounds in the same manner, shall be paid for at the price aforesaid, on the completion and satisfactory trial-test of each; all of said guns to be completed within one year from the termination of the firing-test of the first gun.

Sec. 5. That the Secretary of War and the Secretary of the Navy be, and hereby are, authorized jointly to make contracts with responsible steel manufacturers, after suitable advertisements, to continue not less than 30 days, in newspapers most likely to reach the manufacturers addressed, for the supply of rough bored, rough-turned and tempered steel in forms suitable for heavy ordnance adapted to modern warfare, for Army and Navy purposes, in quantity not to exceed 10,000 gross tons, in quality and dimensions conforming to specifications, subject to inspection and tests at each stage of manufacture and including all the parts of each calibre specified: *Provided*, That no money shall be expended except for steel accepted and delivered; and each bidder shall contract to deliver yearly a specified quantity of each calibre, the time of delivery of the smaller calibres to commence at the expiration of not more than 18 months, and the largest calibres at the expiration of not more than three years from the date of the execution of the contract; and all the forgings shall be of American product and manufactured in the United States; and one-half of the material purchased under this provision shall be for the use of the War Department, and one-half for the use of the Navy Department, in the armament of ships heretofore or hereafter authorized by Congress; and for the purposes of the foregoing provision the sum of $6,000,000 is hereby appropriated, to be available during six years from the date of the execution of the contract.

SENATOR HAWLEY made a speech on Wednesday, in the course of which he read a letter to him from Mr. SAMUEL J. TILDEN, dated June 9, 1886, in which he says: "The apathy of Congress on this subject would be incredible if it did not confront us. It contrasts with the rivalry which is so conspicuous to insist on our taking a high tone towards foreign notions on every occasion of difference between them and us. It contrasts also with the favor which is shown to schemes of prodigality and schemes to waste the public resources on things known to be absolutely useless. Among the people the desire for liberal appropriations towards the means for public defence is well nigh unanimous. I am well informed as to the popular feeling from the circumstance that more than 700 newspapers from all parts of the country, and representing all political parties, containing expressions upon the subject have been sent to me."

CONGRESSMAN BOUTELLE'S able speech on the Naval bill to increase the Naval Establishment, appeared in the Record of July 28, and we extract the following as having particular reference to the bureaus of the Navy Department :

Yet there has been good work done, and our naval corps is capable of designing as good ships as can be built in any country. There is too much of a tendency to belittle and detract from the ability of our own constructors and engineers. I believe that the bureaus of our Navy Department are capable to-day of furnishing as fine models and as excellent designs for the hulls, engines and armament of modern warships as can be produced anywhere under the sun. The flippant slurs at the Engineer Bureau which is indulged in by those who want us to buy our ships and our machinery abroad find no warrant in the history of the Service. It is a well-known fact that the *Wampanoag*, built in 1868, made an average speed of 16¾ knots for 38 hours at sea; an average of 17 knots for 24 hours, and a maximum speed of 17¾ knots—the fastest time that had ever been made by any ship of war.

The *Inconstant*, built on a similar model and intended to beat the American ship, succeeded in making only 15 knots an hour.

Of another of our vessels, the *Vandalia*, whose machinery was designed by the Bureau of Steam Engineering under its

present accomplished Engineer-in-Chief, and concerning which criticisms have been made, the following commendation was expressed by Sir Thos. Brassey in the British Navy, vol. 1, page 545:

"The record of the *Vandalia* affords a good illustration of the efficiency of the type of machinery employed for her. The ship was first commissioned in 1875, and returned home, after a full three years' cruise, late in 1878 in good order, having steamed during her absence the very unusual distance of 26,230 knots. During the entire interval she was never detained a single day in port, on account of repairs to the engines or boilers, or for work required in the Engineer's Department. A record equal to this can rarely be found on the logs of any other American ship of war. There can be no more convincing proof needed that the engines and boilers were properly designed and well built, and had excellent management and care during the cruise."

That is an English indorsement, and on this side of the water we have that of Secretary Whitney's Advisory Board, who have accepted the designs of the bureau for the machinery of the new steel cruisers.

COLONEL WALTER MCFARLAND, Corps of Engineers, U. S. A., writes to the *Times* of July 27 an interesting letter on the subject of the improvement of the harbor of New York, which has recently been the theme of much discussion in Congress. A bill introduced proposes to transfer the control of all harbor improvements from this Board of Engineers to a board composed of five persons, only one of whom is to be taken from the Engineer Corps. The remaining members are to be a naval officer, a Coast Survey officer, and two civilians—one nominated by the New York Chamber of Commerce and the other selected by the Governor of New Jersey. Colonel MCFARLAND, referring to this bill and to the Board of Engineers, says:

Now let us see who are these engineers and what are their qualifications for the work on which they are engaged.

General Newton, whose name is familiar to all New-Yorkers, and whose work at Hell Gate has given him a world-wide reputation.

General Duane, a New-Yorker, with more than 40 years' of service in every variety of engineering work, and of remarkably sound judgment.

General Abbot, of more than thirty years' experience in engineering, a member of the National Academy of Sciences, and an authority on hydraulics.

General Comstock, of more than thirty years' experience in engineering, a member of the Mississippi River Commission, and for a long time its President; a member also of the National Academy of Sciences, and one of the best informed river and harbor engineers in the world,

These engineers have had more experience in the management of river and harbor works than any one else in this country, and it would be a most extraordinary thing if their professional opinions were to be thrown aside, as one of our representatives has urged, until the opinion of a mixed body, containing only one engineer, should be obtained, for that is what the proposed Harbor Commission is to be. As well throw aside the opinion of a body of skilled physicians in case of dangerous illness, and take in its place the opinion of one physician, one naval officer, one coast survey officer, and two others selected by taking their names out of a hat.

The questions involved are questions of engineering, and need to be determined by the engineers. Should the time ever come when the country feels it necessary to withdraw its confidence from the Corps of Engineers, it need not be driven to transfer their works to men who are not trained to manage them, for the country has plenty of good engineers in it, and New York City alone can furnish all that are needed for its harbor works.

Chairman A. F. HIGGINS, of the Committee on Harbor and Shipping, Chamber of Commerce, also writes a long letter to the *Times* on the subject, which he winds up by saying:

What superhuman qualities attach to the United States Engineers that their judgment and decision should at once be accepted in matters so vital as these, involving the expenditure of millions of dollars and the hazard of irretrievable ruin to great harbors? Far is it from my desire to detract from the ability of this distinguished corps, but in matters concerning harbors and channels I see no reason why they should or do in anywise excel the ripe judgment and experience of Navy officers or the Professors of the Coast Survey, who have made it a life-long study. Surely prudence and wisdom demand a combination of them all, and, as well, business experience and mercantile wisdom. And this is what the bill now before Congress seeks to attain.

THE debate in the House this week on the bill to increase the Navy, revealed a most extraordinary condition of things. The Democratic President recommended an appropriation for new vessels, the Democratic Secretary of the Navy urged it and the Naval Committee, under the control of the Democratic majority of the House, brought in a bill appropriating six millions, the committee being practically unanimous in its support. Suddenly, under the directlon of what is known as "the steering committee," the Democratic majority changes front and decides that but three millions and a half is to be allowed. So the chairman of the Naval Committee finds himself in the position of being obliged to offer a substitute for his own bill, and to submit to the jeers of his political opponents at his sudden change of front. The case was thus stated by Mr. BOUTELLE:

That bill has rested upon the calendar until to-day. Yet with that expression on file as the deliberate judgment of the committee of this House selected to formulate recommendations in regard to the Navy, we find the chairman of the Naval Committee (again acting upon a majority vote of the committee) practically saying to the House to-day that we ought not to pass the bill that the committee reported; practically saying to the people to-day that the Democratic party through its chosen exponents has reconsidered its purpose of making a substantial contribution to the increase of the Navy establishment; practically saying that the Government of the United States, with its coffers alleged by the Democrats to be so overflowing with money that resolutions are introduced here and forced through, in despite of the counsels of the financial officers of the Government, to rid the Treasury of what is claimed to be its teeming surplus in spite of that alleged redundancy of cash, the majority of the Naval Committee of the House of Representatives come in here to-day with a declaration in effect that the Government ought not at this time to appropriate so much as $6,425,000 to supply the deficiency in what the Chief Magistrate of the country declares to have become "a shabby ornament to the Government."

We are asked to say to the people of this country that the Government does not need the ships that the Naval Committee in March said we ought to have. We are asked to-day to proclaim to the people that there is no need for the defence which only a few months ago we were urging as essential to the maintenance of the dignity and safety of our Government. We are asked to take up here and pass at the very heel of the session, as a lame and impotent conclusion of all the grand fanfaronade of what the Democracy were going to do for the Navy, a substitute for the original measure, so hacked and slashed and emasculated that its parent would not recognize the offspring in its present guise.

Now, why, Mr. Chairman—why this change of front? I desire, so far as I am personally concerned and on behalf of my colleagues of the Republican minority, to divest myself and them of every vestige of responsibility for this change in the attitude of the committee upon this great question. Why is it that we are considering here to-day a substitute bill appropriating $3,500,000 in place of the bill appropriating $6,425,000?

GENERAL MILES'S conduct of Indian affairs in Arizona, as to which there is so much discussion, would seem from this distance to have the advantage of being based upon the theory that we are to trust to our Army rather than to Indian scouts. General MILES'S success will, therefore, save us from the humiliating confession that we must let Mr. Apache have his own way with us, and surrender, if at all, upon his own terms. Public sentiment would certainly not tolerate such a method of dealing with any other class of red-handed murderers, and it will be a wholesome stimulus to Army pride if it is found possible to escape it in this case. General MILES believes in that possibility, and for the credit of the Army, we must heartily wish him success.

WE have received Naval Professional Papers, No, 20, The Naval Brigade and Operations Ashore, a hand-book for field service, prepared from official and standard authorities by H. K. Gilman, 1st Lieutenant, U. S. M. C. It is a neat pocket manual, published by the Bureau of Navigation, Navy Department. It is a compilation from various official and standard authorities such as Wolseley's Soldiers' Hand-book, Wingate's, Laidley's, and Blunt's Manuals, and the works of Captain Bedford, R. N.; Colonel Craighill, U. S. Army; Captain Collum, U. S. Medical Corps; Lieutenant Farrow, U. S. Army, and Lieutenant Regan, U. S. Army. Naval brigades have done excellent service on more than one occasion in our history and a text-book of information for their organization and instruction is a valuable addition to our service literature. The appendix gives a great variety of miscellaneous information, which it is convenient for officers to always have at hand. A pocket for carrying memoranda is included in the binding. The twelve chapters of the work are devoted to organization and equipment, landings, marches, guards and sentinels, ceremonies, camps, small arms practice, law, field fortification, passage of rivers, signalling, cooking, and sanitary suggestions.

THE order which follows does not appear with the other orders to the Army issued by competent authority, but as it has been received by the officer commanding one of our Southern posts, who sends it to us, we presume it is to be considered official:

[Postmarked, Douglas, Ga.] July th 11, 1886.

to the military post commander St Augustine Fla

Sir i want you send six companeys of Soldiers to west Tocoy and hang that mrs cruse She wanted cruse to Kill to get my place

i want you to Send the Soldiers to William Silcox and hang him and his wife they are both Orrange Conspirators

She is the Daughter of Shemus a guack he was chief of the pirates on my place in the old countre her and Silcox got married to kill me and get my place he is a conspiraton Acting for the Scotch She is the same for the chnees i Sent you orders one time to hang Aftons wife i heard you did but She raised her Again with the magic it me Silcox wanted to Shoot instead of martain his wife told him that i was Martain he Shot Martain instead of me

these are the head of the Conspiratons Silcox for the Scotch his wife for the Chinees

Aftons wife for the irish and dutch Sir want you to kill all them frinch on that railroad between Augustine and Jackson they are working Around them Shingle mills on that road

be Shure and Obey these Orders in these depends your safety and mine Yours truly

PETER FITZGERALD, Emperor of Great Britton Comander in Chief of the Army in Navy

JOHN ERICSSON, who celebrated his eighty-third birthday on Saturday of this week, contributes to *Nature* of July 15 a most entertaining and valuable article on the subject of "The Lunar Surface and its Temperature." Captain Ericsson holds that what are usually supposed to be the craters of extinct lunar volcanoes are in reality huge annular lunar glaciers. He combats the theory that the moon is a waterless globe, estimating that it has a quantity of water corresponding with a mean depth of 7,250 feet of the terrestrial ocean. "The correctness of Sir John Herschel's demonstration in proving the tendency of the water on the lunar surface to flow to the hemisphere furthest from the earth must," he says, "be disproved before we reject the assumption that the quantity of water on the surface of the moon bears the same proportion to its mass as the quantity of water on the earth to the terrestrial mass."

OUR Washington correspondent reports as follows: "There are no new developments in the case of editor Cutting, the American who is imprisoned in Mexico. The refusal of the Mexican authorities to release him, upon the demand of the Secretary of State, creates no uneasiness at either the State Department or the War Department. The officials at Washington are inclined to believe the refusal to be due to inability of the Central Government of Mexico to enforce its wishes in the more remote and disorderly sections of the country, where uprisings and revolutions are of frequent occurrence. In this connection the massing of Mexican troops at El Paso is regarded as a shrewd military movement on the part of the authorities to quell any incipient revolution rather than a menace to the United States, notwithstanding the threatening attitude of the people there. As near as can be learned the Secretary of War has not been called upon to afford protection to the border by ordering additional troops to Fort Bliss, and it seems to be the official opinion that the difficulties arising from editor Cutting's imprisonment will be amicably settled in a short time."

A NUMBER of gentleman residing in a pleasant neighborhood, within one hour's ride from New York by rail, are proposing to establish an organization for social purposes, with a club-house and grounds, having accommodation for out-of-door as well as indoor pastimes. They have applied to us to learn whether it is possible to obtain the services of a retired non-commissioned officer who would take charge of the house and grounds. He will be furnished with quarters, and his compensation will depend in a measure upon the success of the enterprise, to which he is expected to contribute. It is desired that he should, under the instruction of a board of management, attend to laying out the grounds, keeping the accounts, collecting the annual dues, etc. If any of our readers can suggest such a person, they will please write to "Pocantico,', care of this office.

THE Second Comptroller has decided in the case of Lieut.-Col. Kellogg that an aide-de-camp is entitled to the increase of pay pertaining to that officer from the time he receives and accepts the appointment. The question arose over the construction to be given the term "*while serving on his staff*," which is contained in the law allowing aides to the Lieutenant-General the rank and pay of Lieutenant-Colonel of Cavalry.

MR. J. M. BARRETT, General W. T. Sherman's private secretary, now has an office in the Army Building, New York, and is prepared to answer any questions from pension claimants or Army societies which may be directed to General Sherman.

(From the Washington Post, July 28.)

FOR GEN. HANCOCK'S WIDOW.

REPRESENTATIVE GLOVER, of Missouri, whose family has long been intimately connected with Gen. Hancock's, has learned that the War Department has never done the proper thing by the General in regard to the expenses incurred by him in entertaining the French officers who, as the guests of this Government, participated in the centennial celebration in 1881 of the surrender of the English to the combined French and American forces at Yorktown. Under direct instruction from the Secretary of War, Mr. Glover says, Gen. Hancock entertained these guests.

He paid out his own money, and has never been reimbursed by the War Department. He was paid a trifle, just enough to acknowledge the legitimacy of the claim, but the bulk of what the General expended—about $2,500—has never been repaid. These facts have recently been pressed upon Representative Glover by some St. Louis friends, who are also well acquainted with the Hancock family. Gen. Hancock left no wealth behind him, and Mr. Glover wants this money paid to the widow. Instead of introducing in Congress a bill of relief, which is a shape he did not wish to make the case assume, he drafted a resolution asking for the appointment of a special committee of three to inquire into the matter and report back to the House upon the claim. The resolution is now under consideration by the Committee on Rules and a committee will probably be appointed by the Speaker before Congress adjourns.

Representative Glover's father, who was a distinguished lawyer, and General Hancock were close personal friends for many years. It was asserted, and is still believed by many, that the celebrated letter which Hancock, during the reconstruction period, addressed to Pease, the carpet-bag Governor of Texas, advocating the supremacy of the civil law over the military, the letter which is said to have nominated Hancock for the Presidency, was written, not by Hancock, but by Glover, Sr. But the assertion was false and the belief is wrong. "I know," said Representative Glover to a *Post* reporter yesterday, "that my father did not write that letter; he told me so himself, and in the same way I know that the letter was written by General Hancock himself." When Representative Glover's father died General Hancock was one of the pall-bearers.

THEIR LEVEL BEST.

To the Editor of the Army and Navy Journal:

THE partisan and ardent support given to each by the followers and admirers of Generals Crook and Miles has, to the "looker-on in Venice," very much the same interest that the old man experienced in witnessing the fight between his wife and the bear—he did not care which whipped.

This unseemly controversy, carried on in the Army by personal supporters, outside by the press, seems to have been reduced to the task of showing which one did *nothing* with the greatest effort; who produced the *least* effect from the most attempts; who brought about the *fewest* results from the largest number of chances. One side is apologizing for and explaining past failures. The other is deprecating criticism on the futile efforts of the present.

Both sides are compelled to admit that up to the present, the result achieved by either leader is—nothing, and that the settling of the Apache and the Apache question is still in blissful uncertainty, and the end of the campaign no one knoweth. The pursuit of Geronimo has been likened, by one side, to the game of hare and hounds. A peep at the present engineer map of Arizona and New Mexico, checkered with its "Districts of Observation," gives the *other* side the impression that the pursuit had changed into a game of chess, with the present possibilities of its ending in a—stale mate.

It is unfortunate that Geronimo has not fallen into this adaptation and spaced off *his* field of action into chess board shaped "Districts," but still more disgusting, that he will not stay on the board, but moves himself, queen and pawns, knights, and all beyond its edges into—Mexico! Who can play chess with such an adversary as that?

One clique condemns the use of Apache scouts in pursuing their brethren; shows that they were continually betraying the movements of our troops to the hostiles, and were supplying their inimical kindred with friendly ammunition, and their final and grand betrayal in allowing Geronimo to escape, well supplied with munitions of war of their giving, and thus caused prolongation of the war and—the controversy.

The other side does not deny this, but simply gives a Roland for this Oliver, by suggesting that the substitution of the Navajo for the Apache as a scout, is but making a distinction without a difference; that the Navajo did not cover himself with glory as thickly as with war paint in the campaign against Victoria; nor, for the short experience obtained from his use last winter, is there a safe deduction to be drawn that he will be truer than his predecessor, and that last autumn a line of troops was established across a part of New Mexico, whose duty lay chiefly in preventing the hostile Apaches from reaching the *Navajo* Reservation for protection and concealment.

The coterie of the departed chief declare there were not troops enough, though the leader asserted that he had sufficient.

The coterie de l'autre are positive that there are not troops enough, but the chief will not ask for more because the defunct leader said *he* had enough.

While there is remorse among them that were, because nothing was done, there is regret and despondency with them that *are*, because of a like result. The grand summing up seems to be that one side was born to failures, the other side achieved failures, and the people have failures thrust upon them.

"Remorse and regret are half brothers;" ought not that tie of sentiment, that relationship of feeling, make both sides akin, and stop this semi-fraternal quarrel?

We outsiders know and believe that each has done and is doing all that mortal white man can do; that the officers and men are struggling and straining every nerve to bring about different results; that these men have marched unheard-of distances, have undergone the severest hardships and privations, and, finally, that they have fought, but—nihil fit!

REVERDY.

THE LEE MAGAZINE GUNS.

To the Editor of the Army and Navy Journal:

PERMIT me to add a few words to the article and correspondence on magazine arms which your correspondent, F. A., has narrowed down in his letter of July 24 to the single issue of the merits of the Lee system as it at present exists, compared with such other guns as contain a larger number of cartridges.

He says the Lee system may be made to carry six, eight, or ten cartridges as well as five, but maintains that it is preferable as it stands. And the fact that it is not made to carry more shows conclusively enough that the manufacturers of the arm are of his opinion.

Now it is notorious that both in this country and in the various states of Europe where the Lee guns have been tried, this small number of cartridges and the way in which they are carried, have, more than any other point about it, contributed to its want of success.

No doubt the Lee gun contributed to the successes of the Chinese in Tonquin, and no doubt also they were used against some French troops armed with the Kropatscheck. As a matter of course the French military organ, quoted by your correspondent, makes the most of this circumstance.

But to make such a statement of any value whatever, in a controversy on the respective merits of rival systems of magazine arms, the numbers brought into the field on both sides should have been stated, or approximated. The fact most probable is that the mere carrying by the Chinese of modern long range breechloading arms, instead of matchlock or muzzle loaders, would have been sufficient to decide the fate of the small, ill-supplied, and outnumbered French detachments opposed to them; and that as magazine arms the Lee guns never had a chance of developing their real powers at all.

This system will always demand a more perfect drill and exercise than almost any other, the rapid exchange of the boxes, even on the drill ground, being an art in itself, and to this it is wholly improbable that the Chinese attained under fire.

What your correspondent says about a 15 shotgun as opposed to a 10 shot to the disadvantage of the latter is beside the mark, as until the weight of and size of our cartridges is greatly reduced, of which there seems no immediate probability, such a weapon would be both too heavy when charged, and too cumbersome when empty for convenient use in the field.

Ten cartridges has been settled on by the consensus of European military opinion as the smallest number that should be carried to make a magazine arm fully efficient, and this limit has been fixed for all the world by the action of the two greatest military powers of modern times, France and Germany; both of whom before doing so had every opportunity of studying the Lee system, and estimating the value of such arguments as your correspondent uses. The Lee system would have been easier of construction, than the more powerful weapons they have adopted, and their action has definitively, I should imagine, closed the door against it, in its present form, everywhere except, perhaps, in Cochin, China, or among those other semi-barbarous nations who can afford to neglect the considerations to which others must give heed under penalty of that annihilation to which your correspondent alludes.

BIBLES FOR THE ARMY.

To the Editor of the Army and Navy Journal:

BIBLES and Testaments for the Army have been generously furnished by the American Bible Society for years past, and a small stock of these books has been kept at this office for distribution as needed. Application for these books may be made to the undersigned, or to Dr. Alexander McLean, cor. sec. Bible House, New York, as may be preferred. Orders that cannot be filled here will be transmitted to the society in New York.

G. D. CROCKER,
Post Chaplain, U. S. A.

ST. LOUIS, Mo., July 23, 1886.

IF IT WASN'T FOR THE BLIND.

To the Editor of the Army and Navy Journal:

I HAVE read with interest Zadock's letter in number of June 26, as to "why soldiers desert." Permit me to say a few words: Zadock complains that "in many instances the functions of government are Asian mysteries to the enlisted man." That is just where the trouble is. The enlisted man, as a rule, is not properly instructed in regard to his relations with the Government. He neither fully understands his duties nor his rights. If he would take the trouble to inform himself there would not be so much unreasonable grumbling and he would not be left to get his knowledge of military law by experience in the guardhouse. The acquisition of sufficient knowledge for a man to know when he is well treated should be compulsory. When a man feels aggrieved at reasonable restraint there is a defect in his education.

To say that the enforcing of discipline is the cause of desertion is simply to admit that it is impossible to maintain the Army, for without it an army cannot exist.

When a soldier in any manner whatever, becomes "obvious" of his duty, it is high time that he be brought to a realizing sense of the same in some way or other. No sensible man can expect to commit a breach of discipline and go unpunished. Whatever means is employed must be to the purpose. Punishment cannot, in any form, be agreeable. The fact that my comrade in Texas "kicks" against the method of "blinds," is *prima facie* evidence that that mode of punishment is effective.

There are many reasons why the imposing of fines is a just and proper method of enforcing military discipline;

1. The soldier is sworn to obey all lawful orders, and to serve honestly and faithfully. If he fails in his duty he breaks his contract with the Government. Therefore, his pay is not justly due. 2. Since the abolition of corporal punishment, such as flogging, etc., the means and methods of enforcing obedience are limited. I do not think, nor do I believe my comrade would contend, that he would rather go back to the old way, and submit to a prescribed number of lashes on the bare back, or be tied up for a number of hours, or any other of such methods as were formerly considered indispensible to the Service. 3. If a soldier spends his money in getting drunk and neglecting his duty, to deprive him of his pay is to strike a blow directly at the cause which renders him "oblivious." 4. In bringing men to trial extra expense is incurred on the part of the Government. If the man is found guilty it is right that he should cover such expense with an indemnity. A bad soldier should not cost the Government more than a good one. 5. If fining were abolished longer terms of confinement would be necessary. Meanwhile the duties devolving upon the remainder of the command would be made all the harder on account of the number of prisoners.

Very often, when duty is hard, we hear the expression, "The guardhouse would be a picnic if it wasn't for the *blind*."

Such complaints as the one here replied to simply prove the necessity of improving the tone of the Service. Better inducements to enlistment, coupled with a vigorous policy of pruning, would have a wonderfully salubrious effect.

JUNIUS.

FORT LYON, COL.

TO MR. T. H. S. HAMERSLY.

FORT SULLY, DAK. TY., July 22, 1886.

EDITOR ARMY AND NAVY JOURNAL: For the information of officers stationed at remote posts, I request the publication of the following letter. Mr. Hamersly has taken no notice of it, nor of the one previously written, nor has he either sent the magazines or refunded the money.

1st Lieut. Brown, R. Q. M., 11th Inf., subscribed and paid, as I did, for the two magazines. He has received the "United Service" regularly, but not a single copy of the "Century."

RICHARD I. DODGE, Col. 11th Inf.

FORT SULLY, DAK. TY., June 5, 1886.

T. H. S. Hamersly, 835 Broadway, N. Y.:

SIR: In Jan. 7, 1886, I sent you a check for $6, in continuation for 1886 of my subscription to the "United Service" and "Century" magazines, which you had furnished during the year 1885, Since then I have received the "United Service" for January, February and March only, and not a single "Century."

I have already written to you once in regard to this neglect, or worse, without receiving any reply whatever. If you conduct your business in this manner you cannot expect to receive the support of officers, who, being on the frontier, are forced to rely on the promises of publishers for their reading matter.

Either send both magazines regularly (with the back numbers from January of the "Century"), or refund the money, except for the three copies of the "United Service," and we will call it quits. Yours, etc.,

RICHARD I. DODGE, Col. 11th Inf.

THE POWDER DEPOT.

THE Newark *Sunday Call* has an interesting article on the U. S. Powder Depot at Dover, N. J., and gives a minute account of its present and prospective capabilities. "The present commanding officer," says the *Call*, "is Major Joseph P. Farley, of the Ordnance Corps, U. S. A. Up to the present time $380,000 has been appropriated for the purchase and improvement of the land and the erection of buildings, and $340,000 has been expended, and it is estimated that the total cost of the depot will reach $760,000. When the post is completed an ordnance detachment with officers will be stationed there, and military discipline will be enforced as at all other military posts. It is expected that with the completion of the railroad leading directly to the magazines doors powder will soon be stored at this post."

CRUISE OF THE DESPATCH.

THE U. S. S. *Despatch*, Lt. W. H. Emory commanding, has returned to the Brooklyn Navy-yard, having completed her cruise of the Long Island and New Jersey coasts in search of sunken wrecks. She left the Navy-yard on July 17, carrying a supply of 100-pounder torpedoes. The first vessel discovered was a three-master, with spars attached, about 40 miles southeast of Sandy Hook in 15 fathoms of water. The torpedo was taken on board one of the ship's cutters, conveyed to the wreck, lowered with a chain to the foot of the masts and fired by a dynamo carried in the whale boat after the cutter had retreated. No effort was made to blow up the hull, as it was sufficient to remove the masts at that depth of water. The torpedoes worked splendidly. The second vessel was found about 20 miles southeast, one-quarter east, of Barnegat light, and was also a three-master. Six torpedoes were exploded at the bottom of the masts, in 15 fathoms of water, and the impediments were completely removed. The third vessel was probably a square rigger. She had been reported often and the variety of the reports conveyed the idea that there were several vessels of the kind at different points of observation, whereas there was but one reported by a number of observers from different standpoints, and evidently out in their reckoning. At all events, she exhibited a single mast, with a gaff attached. This vessel was found 34 miles east of Absecom, lying in 20 fathoms of water. Two well applied torpedoes cleaved her decks and left a free way to any vessel cruising in that locality. The hulk was evidently that of a large vessel. The explosion brought up very little wreckage. Only a ladder and a boat cradle came to the surface.

The *Despatch* then ran inside of Sandy Hook for information and ascertained that another wreck had been reported. Capt. Emory put to sea again and searched the places indicated, but after several fruitless searches over the ground designated by the reports of shipmasters he was persuaded that the vessel reported was one of the craft already destroyed. He then returned to the yard and reported the results of the cruise.

The search for such small objects as a vessel's topmasts in the trackless sea is no small undertaking. The success of the *Despatch* during the six days outing will be gratifying to the underwriters, to shipowners, and to seamen coasting along shore.

ANSWERS TO CORRESPONDENTS.

Postal.—Write a courteous letter to the Secretary of War, Washington, D. C., on the subject, explaining in full your wishes and intentions.

Inquisitive.—When will vacancies occur at West Point in 1st and 2d Districts of Rhode Island? ANS.—In June, 1889 and 1887, respectively.

G. F.—Gen. U. S. Grant, while 1st Lieutenant, 4th Inf., was stationed at Benicia, Cal., in 1852. While Captain, 4th Inf., was stationed at Humboldt, Cal., in 1854.

A Subscriber.—Par. 2727, Army Regs., 1881, as amended by G. O., 107, A. G. O., of 1884, prescribes that the rank of Sergeant-Major will be indicated by "three bars and an arc of three bars."

T. K. asks if the U. S. S. *Jamestown* was on the China Station in 1861? ANS.—The *Jamestown* was not on the Asiatic Station in 1861, but laid up in ordinary at Philadelphia. She sailed for the China Station in 1862.

Co. H, 5th Inf., asks: Can retained pay be withheld if discharged without character (not by sentence of General Court) even if the soldier has served his full term? Ans.—Yes; repeated trials and punishments for misconduct *during* term of enlistment warrant forfeiture of retained pay.

Subscriber.—See General Orders 21, A. G. O., series of 1883, in regard to the transportation by Q. M. D of professional books, etc. If the books you refer to are necessary in the performance of your duties all you have to do is to certify accordingly, and they will be shipped as public baggage.

Graduate asks where he should apply in order to ship as an apothecary in the U. S. Navy and the chance for obtaining a berth just LOW. ANS.—Apothecaries are appointed by the surgeon of a ship. Watch the Naval orders and when you see a surgeon ordered to sea make application to him for appointment. For requirements see par. 11, page 95, Navy Regulations.

P. Q. M. asks why the clothing allowance of a principal musician of infantry should exceed that of a P. Q. M. Sergeant, the cost of their clothing being about the same (they wearing the same uniform, except as to facings, chevrons, stripes, etc.)? ANS.—The reason assigned by the Q. M. General's Office is that the cloth furnished the P. Q. M. S. is of better quality than that furnished the principal musician, and consequently cost more. There is no difference in the quality of the gold chevrons, but the design of the P. Q. M. Sgt. is more difficult to make than the musician's, and hence the Department is compelled to pay more for the work.

J. H. T. asks: 1. What year did the through trains on any railroad commence taking water without the train stopping for the purpose? ANS.—In 1860 Ramsbottom's troughs for picking up water without stopping were laid down on London and Northwestern Railway (England.) They were first used on the New York Central in 1870.

2. What year did the railroad companies commence using the air brakes? ANS.—Westinghouse's first patent for non-automatic air brake was taken out in 1869. The first train was also fitted in that year on the Pennsylvania Railroad. The Westinghouse automatic brake was first patented in 1872, and trains were fitted with it very shortly afterwards. The improved form of triple valve, having a piston instead of diaphragm, was first used at the Newark brake trials in 1875.

THE 2d Comptroller allowed the following Mexican War claims this week: Henry Stanton, dec'd., late Col. and Asst. Q. M. Gen., U. S. Army, $143.88; Justin Dimick, dec'd., late Bvt. Col. 1st U. S. Art., (Mexican War), $37.50; James Stuart, late Bvt. Capt. U. S. Mtd. Rifles, (Mexican War), $62.50; Richard E. Hyde, late Pvt. Co. E, 3d Mo. Mtd. Vols., $24; Wm. M. Grier, late Capt. 1st U. S. Dragoons (M. W.) and Col., U. S. A. (retired list), $150.

THE Russian authorities are about to expend considerable sums of money on the improvement of the Black Sea ports.

THE STATE TROOPS.

THE NEW YORK CAMP OF 1886.

UPON the evacuation of the camp on Saturday, July 17, by the 69th Regiment, the 65th Regiment, of Buffalo, Col. T. S. Waud, and a battalion consisting of four separate companies under command of Major J. Fred. Ackerman, took possession.

So far there had been little difference in the quality of men and company officers, except that the 69th exhibited superior physique, and that some of the separate companies were ahead in intelligence and drill. It was the disposition of officers and men, their tractability, on which the success of the week's work depended; and not the knowledge which they carried with them to the encampment. A certain degree of progress in various directions as the result of previous duty here exhibited on arrival, cannot be denied to any organization, but still the amount of ignorance exposed when removed from the dark ruts of armory routine to the broad open field, is simply incredible. To this rule there has, so far, been no exception, the 65th included. That colonels are astonished when they receive the daily "bill of errors" committed by their company commanders on company and skirmish drill, is no surprise. A colonel sees his command from six to a dozen times during the drill season, meandering through a battalion drill, where the same mistakes are committed year in and year out, and where the lesson as soon as taught goes out the other ear only to have the same mistakes committed the next time. As to company drills the regimental commander exercises but limited supervision and the captains usually have *carte blanche*. With few exceptions their sole aim is to bring up their commands to a certain degree of automatic precision in executing a wheel or a march in company front in order to gain a puff from a local paper on the occasion of some review or some junketing turn out. The requirement of practical soldiering are lost sight of, the study of text-book treating on subjects useful to know on actual duty is neglected, and then when they are called out for service they are helpless, the butt of the ridicule of their subordinates, and of the censure of their superiors. There is a certain class, and fortunately the majority, who acknowledge their defects and show a disposition to learn, and these reap the full benefits of the encampments. Another class, fortunately the minority, try to cover up their pitiable ignorance by an assumption of arrogance, declare that they command their own companies, are competent to instruct them, and do not need, nor will they allow, the interference of an infernal State instructor.

This class generally neither learns nor forgets anything. The expense of the camp is thrown away in their cases, and the only thing they are fit for is to be got rid of as soon as possible. Under the present system at the camp the State authorities can hardly fail to gain a thorough knowledge of the disposition and capacity of every officer, and this knowledge will prove of great service when the time for another separation of the chaff from the wheat arrives. Fortunately for the camp, nearly every regimental or battalion commander so far has acted in accord with the State authorities, and with theoretical instruction by the State officers, practical drills on the field and theoretical lessons by the colonels and constant attention to duty, even if it is perfunctory, the most conceited could, and did, not fail to learn at least something. These are the advantages and disadvantages of the camp, which repeat themselves more or less every week, the only exception from the rule, generally speaking, being the separate companies, which, although deficient on many points, yet exhibit a more thorough appreciation of the advantages put at their disposal by the State than the city troops, and therefore the work of the several provisional battalions takes the lion's share of interest manifested in the camp this year. For this same reason and because it was the first opportunity as an independent commander of Major Ackerman, the provisional battalion drew much attention away from the 65th.

The battalion was composed of three fine, large companies, and one skeleton organization which hardly turned out 16 files in single rank, and which should, therefore, have been substituted by some other company with more vitality and energy. The 32d Company especially exhibited a degree of precision in its movements which gave evidence of careful instruction and which overshadowed the performance of every company on the field whenever the regiment and the battalion paraded together. Capt. Eddy, who certainly deserves credit for the evident pains he has taken in the training of his command, could improve its appearance if he would abolish the unnecessary and untactical stamp which accompanies the execution of the commands march and halt—practices which have long been banished from the military vocabulary and which are not tolerated in any organization with any claims to real soldierly qualities. The company otherwise showed itself superior in obedience and promptness during the entire camp.

The trouble at first with the provisional battalion was to get them into shape for working together. Each company had methods of its own on drill as well as in the management of its internal affairs, and this difference extended even to the drummers, who all beat their calls according to their own individual fancies. The drum major had his hands as full as the battalion commander, but the pupils in both cases were willing, and this fact soon secured a harmonious system of work all around, which was surprising if the brief period in which the whole thing was accomplished, is taken into consideration. The amount of work required to bring four companies organized and brought up in isolated regions on principles as original as they are erroneous, into shape as a practical, serviceable battalion can only be appreciated by those who have themselves undertaken the task or those who have witnessed the process. Companies of this kind generally bring nothing into camp with them beyond a fair manual or some knowledge of the school of the company and a good will to learn. As to ceremonies, guard duty, battalion movements, etc., their ideas are generally confused, but their good will usually carries them through and they generally leave with a superior record. With respect to guard and sentry duty they came better prepared this year than before on account of the visits of the State Instructor during the spring, which greatly facilitated their progress. The main difficulty for a provisional commander is to form a correct estimate of the capabilities and peculiarities of his organizations. This once obtained his road is smooth and his task easy in comparison with that of the colonel who takes his own organization into camp. The latter, like the prophet of old, is least appreciated by his own organization, and usually, on account of various considerations, scarcely dares to apply regulations and disciplinary measures with full force. The provisional commander has no such considerations. He is a stranger to his subordinates, is free in his relations to his command, and therefore has no drawback in fully carrying out the programme. The correctness of these facts has repeatedly been proven by experience, and to them the success which has attended the camps of the provisional regiments is in a great measure due. Major Ackerman, whose whole heart was in his task, by energetic and judicious measures, and assisted by a competent staff, had the satisfaction of seeing his efforts thoroughly appreciated by his subordinates.

Notwithstanding considerable waste of time on account of rainy and unfavorable weather, the battalion before the end of the week worked as a unit, the men were reduced to an almost perfect system in rendering military courtesies, and considerable advance in skirmish work was made; the latter fact being prominent at a battalion skirmish drill with blank ammunition on the morning of the last day in camp. Of course, the two large companies made a better showing than the two small ones, whose proficiency and progress were in accordance with their size; but the results obtained as a whole were highly satisfactory, and the value of separate companies if properly instructed was as clearly proven as on the occasion of the first experiments of this kind two years ago.

To again repeat in detail the numerous deficiencies shown by officers, non-commissioned officers and privates on guard mounting, in sentry duty, parades, battalion drills, skirmish and company drill, military courtesies, etc., especially during the first few days after arrival in camp, is a needless task. Organizations repeat the same mistakes from week to week, and render the work of instructors, camp commanders, and observers equally irksome and monotonous. While the separate companies were redolent with inexperience and defects, the condition of the 65th was still worse, and, besides, its faults were only partially eradicated with great trouble. The enlisted personnel was not up in quality and intelligence to that of the separate companies, and in several cases the company commanders did not exhibit the proper disposition necessary to achieve a reasonable degree of progress. This was particularly so in the beginning of the week. They did not understand skirmish, company, nor battalion drill, and while the separate companies were also defective in this respect, there were reasonable grounds in their case for the existing condition of affairs. We are aware that the 65th have had difficulties for years back, but now they have a large, well-equipped armory, equally suitable for the practice of skirmishing and guard duty and battalion drill, and for this reason their want of knowledge was all the more surprising. There is no drill as simple and plain as skirmish drill; the whole comprises hardly more than a dozen or so different movements and commands, and the tactics are so explicit that a mistake seems impossible; and yet we constantly hear false commands followed by movements equally false—and all this is due to the want of a proper exercise of common sense as well as ignorance of tactics. So much has been said and written on this subject, and the camp has been written up in various directions for four consecutive seasons so thoroughly, that any officer by simply studying the accounts of the doings of other organizations would naturally get posted, and therefore it is only the indifferent and lazy who render themselves subject to criticism on this account. We do not refer to the 65th alone, but every regiment comes more or less under the same category.

To the 65th, considering their state of preliminary instruction when they came into camp, probably belongs the credit of fair progress, but they did not leave the camp in that improved state as did the companies comprising the Provisional Battalion.

Before closing, however, we consider it our duty, in justice to the regiment, to state that the reports in the daily papers as to the bad behavior of the men in Peekskill, etc., were unfounded. Doubtless there may have been now and then some instances of ruffianism, as can hardly be avoided wherever several hundred men who consider themselves free from all social restraints congregate. It is unfair and unjust, however, to summarily condemn a whole regiment for this reason. The fact is that, as a rule, the correspondents sent to camp by the daily papers have no knowledge of military matters whatever, but they are on the lookout for the slightest incident with the least tinge of the sensational. Incidents of no importance whatever are worked into what they call "readable matter," and thus false impressions about the camp are scattered broadcast through the country. This has been the case for years, to the great annoyance of the State authorities, not on account of the stories themselves, but because they hide the real solid work of the camp, give an impression that the entire thing is a junketing trip, and render the securing of the necessary appropriation a difficult matter.

The 65th as an organization were as well behaved as other troops who have been here; a statement which is not only based on our own observation, and on that of the State officers, the caterers, the employees of the Ordnance Department, and others around the camp, but also on the statements of impartial Peekskill citizens, who were specially interviewed for the purpose by New York detectives sent by Adjutant General Porter to ascertain the truth.

A CREDITABLE MARCH.

THE march of Company B, 22d Regiment, Capt. William V. King, from New York to the State Camp at Peekskill, is not simply a proof of the enterprise and enthusiasm of that company. As the "military test of physical endurance" of a whole company composed of the ordinary materials from which regiments like the 22d are made up, and not as the result of a contest of a few practised individuals specially picked out for the purpose, the success of the undertaking is of importance to the entire National Guard. It has been the tendency of many of what are regarded as the best organizations to ignore the utility of excursions of this kind in favor of certain periodical turnouts of which there was recently an example at Newport, while commanders who endeavored to introduce sound soldierly exercises have had the satisfaction of being pointed out as impractical enthusiasts and cranks. This tendency towards the feather-bed and hurrah style of soldiering, although on the decrease, is still sufficiently strong to prove a serious obstacle in the road of reform and progress, and a constant source of annoyance to those who have undertaken to put the National Guard on a proper basis. When, therefore, an organization voluntary undertakes to break down the barrier, and thoroughly accomplishes the task, its pluck deserves recognition in every direction.

Co. B, 49 strong, started on its march at about 6.30 P. M., Friday, July 23, equipped in the 22d Regt. fatigue dress, with white leggings added for the occasion, carrying knapsacks with blankets rolled, haversacks, canteens, muskets, belts, etc., accompanied by a small wagon which contained cooking utensils, etc., and the overcoats of the men. The command was preceded by a small advance guard under Lieut. W. J. Maidhof, for the purpose of picking out the proper road for the main command and for practice of the men in that sort of duty. The advance was accompanied by a bugler who, on reaching cross or diverging roads indicated by a signal the proper direction to be taken by the main body. No tents were taken along and the men in order to rest had to take to the bare ground, preparing their own meals, and collecting the necessary firewood for the purpose whenever necessary. The first halt was made at Glenwood, where a short but well appreciated supper was partaken of and then the march was taken up until Irvington was reached, where the command went into bivouac for the night in an open horse shed in rear of the village church. Though unused to this style of dormitory the unusual exertion and the bracing mountain air soon reduced the whole command, except the guard, to a sound slumber, which was only interrupted when the bugle bright and early sounded the reveille. After breakfast the column resumed its march, resting during the heat of the day on the banks of a cool creek with excellent bathing facilities, of which the command availed itself to a man with the most satisfactory results. Peekskill was reached about 9.30 P. M., Saturday, and as this hour was too far advanced to warrant an immediate entry into the camp, a second bivouac, this time in a cattle field, whose owner consented to drive the cattle into an opposite corner of the lot, was determined upon. The nights in this region are usually raw, but the swinging, elastic step of the company, as to a man they ascended the heavy grade of the camp road on Sunday morning, at once dispersed all doubts as to any ill-effect of the tramp. In fact, there was not a man who was not fit to enter on duty then and there. They were warmly welcomed at the camp especially by the Adjt.-General, and for the rest of the day made themselves comfortable in the best possible manner.

The road up to Sing Sing was fair, but beyond that point it became rocky, narrow, and irregular. The distance from New York to Peekskill by railroad is given as 42 miles, but the start was made from beyond High Bridge. Considering bends and up and down grades of the road travelled, however, it may safely be assumed that no less than 39 or 40 miles were passed over. The whole was accomplished in about 27 hours, and considering that the men were entirely unseasoned, too much credit cannot be given them for their achievement.

Adjt.-Gen. Josiah Porter was much impressed with the success of the trip, which entirely dispelled every doubt he had about the practicability of marching instead of transporting troops by the steamer to the camp ground. Thus the march is of more significance to the entire guard than may appear at first glance, for it may become the basis of a new system of transportation. That the State will try the experiment on a regimental scale next season, seems beyond doubt.

(Correspondence of the Army and Navy Journal.)

PENNSYLVANIA ENCAMPMENTS.

THE seventh annual encampment of the National Guard of Pennsylvania, with the 1st and 3d Brigades, was held July 10 to 17, followed by the 2d Brigade, from July 17 to 24. Heretofore, the habit has been to encamp alternate years by division (the entire body), and in intermediate years by brigade. The change was made this year, the authorities say, for the sake of economy in transportation, but probably a desire to try regimental camps had also somewhat to do with the change.

The Governor and General Hartranft, accompanied by a part of their staffs, visited the camps of the 3d Brigade, and the Adjutant-General, as usual, made an inspection of each command. From all reports, the percentage of attendance was better in the country regiments than in those from the city; whether in every organization there was much accomplished in the way of improvement is questionable. There is, however, no question but that regimental camps, if rightly conducted, offer better opportunities for instruction than either brigade or division camps; but it is not every regimental commander that will take advantage of the opportunity. The consequence is that days that would in a brigade camp have been wasted in reviews, etc., were in the regimental camps also wasted to more or less extent by a sort of picnicing with friends and visitors. Every camp, especially in the 3d Brigade, was run down with excursionists, who interfered more or less with the duties of the men. From all accounts, the 8th and 13th Regiments, of the 3d Brigade, used their time to advantage and gave evidence of more improvement than either of the others.

In the 1st Brigade, the 1st Regiment was prettily encamped on level ground near Devon Inn. The mornings were devoted to company and skirmish drill and the afternoon to the school of the battalion. Of the ceremonies of guard mount and parade, we saw no improvement over former years. The dress parade was not the equal of one in the armory some time since, and the guard mount was only fair; the fault partly of the adjutant. In guard duty there appears to be more or less improvement and also in military courtesy. The camp was well policed, as clean in fact as it was possible to have it.

The orders were that no liquor was to be allowed in camp. Owing to this, and the fact of being so near Devon Inn, a fashionable summer resort, the men were kept at all times on their good behavior, and no complaints could be made on the score of discipline.

The 2d Regiment was encamped at Valley Forge. The routine work was similar to that of the 1st Regiment. With the exception of one day the regiment was kept hard at drill, and of course there was in that respect more or less improvement. Of the ceremonies, they were neither better nor worse than in past years. Of the more essential work, guard

duty, judgment could only be formed by appearances during the day. As in the 1st Regiment there was good, bad and indifferent work, though taken all in all it is probably improving. No restrictions were made in regard to bringing liquor into camp, but as the company officers were held strictly accountable for the behavior of their men discipline, so far as learned, was excellent.

The 3d Regiment garrisoned Fort Mifflin on the Delaware, surrounded by water. Col. Bonnaffon had and kept his men well in hand, and from all accounts gave them plenty of drill.

The 6th Regiment is composed of companies located in towns within a radius of 10 to 30 miles of Philadelphia. The only opportunity they have for battalion drill is during the annual encampments; heretofore they have even had but little chance there, owing to brigade drills, dress parades and reviews occupying nearly all the time. It is not surprising that the officers appreciated and made as good use as possible of the opportunities of the regimental camp. But little time was misspent, and it is safe to say the regiment made greater progress this year than in all the others put together. Each day there was a school for the officers and one for the non-commissioned officers. Company, battalion and skirmish drills filled up the morning, and battalion drill the afternoon. Of course there were many errors, some of them not corrected, it is true; nevertheless the regiment could not help but improve. The camp was well laid out, cleanly, and the discipline good.

The Battalion State Fencibles encamped near the Delaware, some distance north of the city. Unfortunately Maj. Ryan was taken seriously ill and had to be removed to his home in the city early in the week.

Battery A also, Gray Invincibles (independent colored company), encamped at Valley Forge, and under orders of Col. Deckart, of the 2d Regiment.

As stated, the several organizations of the 1st Brigade broke camp early Saturday morning, and were transported to Fairmount Park for inspection, a procedure that caused an immense amount of grumbling, inasmuch as the inspections of all the other organizations either had been or were to be made in their respective camps. Of course it placed the 1st Brigade at a disadvantage. It was impossible to make as creditable an appearance, to say nothing of the trouble and work of breaking camp so early and coming into the city with scarcely anything to eat since the night before. A detail had to be left to take care of the State canvas, which, of course to that extent, reduced the number of men in each regiment.

Reviews are pretty, but they teach little and show less of the actual efficiency of troops, yet they have been the feature of all encampments in past years. To describe the one in the park would only be to repeat the description of some one or more of those in the past. It will suffice to say that it was a good opportunity for a little show on the part of the several staffs, and ended a rather hard day's work creditably for the men.

CAMP OF THE SECOND BRIGADE.

The 2d Brigade went into camp July 16, a day ahead of its orders. The 10th Regiment, Col. Hawkins, was encamped near Washington, Pa.; the 15th, Col. Kreps, near Sharon, and the 16th, Col. Wiley, near Warren.

Going west with the intention of visiting several of the regimental camps, we reached the 5th regiment in time to see Sunday's work and to find that the Colonel evidently intended making the camp one of instruction and improvement for all. Before the camp was brought to a close he not only succeeded in this, but demonstrated that under efficient management soldierly qualities can be developed and the best of discipline maintained. The temptation to remain in the camp of the 5th, under the circumstances, could not be resisted.

The camp was located at Roaring Spring, on the Hollidaysburg branch of the P. R. R., about 17 miles from Altoona. Tents were pitched in a grove of trees, entirely clear of underbrush. Water, cold and clear, was forced up to the camp through pipes from one of the springs in the vicinity.

Beginning on Tuesday, and thereafter, there was a school for non-commissioned officers immediately after morning drill, and each day there was more or less practice at the rifle range.

The guard mount on Sunday was full of errors; but was fairly executed, taking into consideration that there had been no chance for practice since the encampment of a year ago, and then only once or twice; the guard mounting being at that time by brigade, part of the work was repeated and some of the errors rectified.

From this time on, however, there was a continuous improvement, due in a great measure to the instruction given by Lieut. Pague, 15th U. S. Inf., detailed as military instructor at the Pennsylvania State Agricultural College, but for the time a guest of Col. Hastings. No opportunity for pointing out errors and correcting mistakes was permitted to pass. We have yet to see a perfect guard mount in the National Guard of Pennsylvania, and perfection was not by any means attained in the 5th, yet towards the last, there was but little occasion for criticism. The inspection, Sunday morning, was practically a drill for the inspection the day following. Errors were again pointed out and corrected.

Religious services conducted by the chaplain followed. To the dress parade of the afternoon was added a review in line and passage in review as a practice for muster and inspection by the Adjutant General on Monday. The dress parade, like the guard mount, was very crude. Monday morning, as can be imagined, the guard mount showed an improvement, the result of the previous days' instruction. The Governor and party having arrived, an inspection of the regiment was made at 11 A. M., with one very remarkable result, that every man was found present; partially due to one or two details having been sent out to bring in the laggards. The general appearance was excellent. At inspection of quarters the command showed to better advantage than any regiment heretofore seen; every detail as far as noticed was carried out to perfection.

An early dress parade for the benefit of the Governor still showed a good many errors, and a very bad balk by the color company, under command of its 1st lieutenant, in forming line.

Tuesday every one settled down to work, and thereafter the routine of duty was faithfully observed.

Coming to the drills, it did not require a very sharp lookout to detect the errors, for there were many and close together, but here again Lieut. Pague went to work with a zeal that was deserving of all praise. With the natural aptitude of the officers and men and their ready perception, instruction was a comparatively easy matter, and excellent work was witnessed daily. During the first battalion drill on Tuesday but few movements, and these of the simplest, were attempted, but they were repeated until fairly understood, the only exception as noticed being a general alignment. As this is a simultaneous movement, the guides should not have inverted pieces nor companies supported arms. As the movement was not repeated the error was not corrected. Wednesday several new movements were executed and repeated until pretty thoroughly understood. To this was added a battalion skirmish drill, a very creditable piece of business, especially in view of the fact that it was the first work of the kind ever attempted by the regiment, and after a little practice it was really surprising with what rapidity the men accommodated themselves to the unfamiliar work. The progress in drill became daily more marked, nervousness wore off, and at the end of the week the regiment had every reason to look back with satisfaction upon the work.

Where there was so much to do and so much to learn, it is not surprising that some matters were neglected. Unfortunately, it was in the direction of guard duty. We have often repeated, but it will bear repetition, and should be repeated until there is a change for the better, that in the larger camps heretofore more importance has been attached to matters of show than to practical work. As a consequence the men of the 5th felt like perfecting themselves for gaining the encomiums of the higher authorities and the public, even if the non-practical duties were neglected. The work at the guardhouse was very faulty, posting and relieving sentinels poor, and challenging very remiss; however, we can say we heard the word post but once or twice in three or four days. Of course there were exceptions, and some of the sentries not only walked their beats in a soldierly manner and kept a sharp lookout, but saluted with correctness. Individual salutes when off duty were not rendered as generally as they should have been; but military courtesy, like guard duty, has been more or less neglected. The camp was at all times well policed, the sinks covered, and the cook tents in order.

SOME GENERAL CONCLUSIONS.

In summing up, in spite of the faults pointed out in this article, a record was made for solid military work scarcely excelled we believe, by any other regiment in the division. The improvement was more rapid than we ever saw before in a Pennsylvania State Camp, and we are confident that in this respect it surpassed any other command in the State this year. From the colonel down all worked with enthusiasm. Strictly obedient to orders, always ready to correct defects, not only open to suggestions in the direction of improvement, but solicitous that their errors should be pointed out, success was bound to follow. This year is the fourth for Governor Pattison for the last time he reviewed and received the salutes of the Guard. Naturally the question arises "Has the Guard improved under his administration?" In general it has not. A few organizations are exceptions, but exceptions only because of the work of regimental and company officers. The division is but a large company and every company commander knows that a company cannot stand still. New schemes must be worked, new measures introduced, else the interest of the men will lag and the company go down; let it have gained ever so good a reputation in the past it cannot live on it forever. Yet the Guard of Pennsylvania has been living on the reputation gained by the last improvement made during three or four years after the riots of 1877. There was plenty of opportunity for further improvements, but the changes looking toward these improvements have been few, in fact, we can think of none. The administration has been satisfied to go the rounds of the annual camps, to come away, and to follow strictly a let alone policy. The Commissary and Quartermaster's Departments, no doubt, work more smoothly than they did and in marksmanship there has been some advance. Military courtesy is, perhaps, slightly better, but still very lax. Discipline in camp appears also to be on the wane in some organizations, while in others it is getting worse; the improvement must, therefore, be attributed to regimental management rather than to the policy of the administration. In passing this judgment we are not taking into consideration the work of the 5th Regiment at Roaring Spring; there the management and the instruction was exceptional and also the result. Under the same conditions there would be an improvement in every command, notwithstanding the do nothing policy of the higher authorities.

If the regimental camps, and especially that of the 5th, demonstrated one thing more than another, it was, that they far surpass the larger camps in their opportunities for instruction of the individual soldier. We have repeated year after year that he is deficient, The School of the Soldier of so great importance, because in future so much will depend on the individual, has been overlooked, guard duty neglected and time wasted in the glitter of parade. Put the commands into regimental camps for, say a couple of years, hold the commanding officers accountable for the thorough instruction of their commands, and they would be ready to go into a brigade camp the third year fairly instructed, and if thought best the next or fourth year into a division camp. Then if the week was wasted in giving the higher authorities a chance it would not matter so much. One other fact was demonstrated by the work of the 5th, that is, the value of which we have spoken before, of a State instructor or instructors, with a vigorous and uniform system of theoretical instruction, each regiment taking its turn in camp. A reorganization of the Guard into regiments of three battalions would be of benefit not only in reducing the number of camps but in many other respects what little instruction is given to the individual is not uniform. Through a mistaken idea of economy, the Army ration feeding system with some slight changes still prevails. A few additional fresh or rather canned vegetables are furnished and the State allowed each command 20 cents per ration. Last year the average cost was 16.24 cents. From all reports it had no more practicable existence than in other years: each company mess relied for their food more or less on their own resources. We found one exception, but the man complained of not having enough to eat.

Rifle practice secured a share of attention. The interest is increasing in Penusylvania, but not so rapidly as to endanger the right of the 13th Regiment to be called the shooting regiment. As to rifle practice during encampments we do not favor it. It can be practiced much better at other times, when it will not interfere as it does in camp, with other duties, or, if it must be practiced in camp, it should be preceded by systematic instruction, which is not the case in the National Guard of Pennsylvania. TOWNLEY.

(Correspondence of the Army and Navy Journal.)

ILLINOIS CAMP.

The tour of duty of the First Brigade, I. N. G., at "Camp Lincoln," Springfield, has been completed, and the last regiment, the 1st Infantry, left for home on Saturday morning, July 24. Camp Lincoln is situated about a mile and a half north-west of the capital at Springfield, and at present contains 160 acres. This tract, which is a mile long, north and south, by a quarter of a mile wide, east and west, was selected by a commission appointed by Governor Oglesby, and purchased by the State, to provide a permanent camp and rifle range for the Illinois National Guard. The parade ground consists of the southern portion, and extends north about 1,000 feet. It has been cleared of all trees, and is fairly level, except a small depression on the eastern edge. North of this is the camp ground proper, which extends from the color line to the rifle range. It is about the same depth as the parade ground, and is well wooded with large trees, whose shade was most refreshing during the hot days of the past week. Several ravines or gullies run through the camp, from south to north, and it ends in a bluff from 60 to 70 feet high. In the "Bottom," north of the camp, is the rifle range, and back of the targets rises another bluff of about 60 feet. Between these two bluffs, which are almost exactly 1,000 yards apart, is a flat tract of land, which is to day one of the finest rifle ranges in this country, and, when it is completed, will probably be excelled by none at the present time. A creek wends its lazy, serpentine course across the range from west to east, back of the 600 yards firing point.

It is probable that ere another Spring has run its course this creek will have had its crookedness corrected, and by throwing a number of bridges over it, and clearing up the land between it and the south bluff, a range up to 1,000 yards, fit for skirmish drill or any other practice will be made. The targets are at the north end, just at the foot of the bluff, and consist of 16 "Laidley" revolving frames for second or third-class targets, and one for a first-class target. The pit for the markers is 600 feet long, cut in the foot of the bluff, sheathed inside with 2 inch oak plank, and has a 4 inch tile drain its entire length. The National Guard of this State are under the deepest obligation to Col. J. A. Shaffer, the indefatigable I. R. P. of the State, who has virtually lived on the range for the past two months, and without whose exertions this range could not have been completed in time for the First Brigade.

The regiments left for the camp on Saturday morning, July 17, and by dusk the 1st, 2d, 3d and 4th Infantry, 1st Cavalry and Battery D were under canvas. The tents had been pitched by the State authorities, and details from the different commands before the troops arrived, so there was no delay in getting down to work. The 3rd Infantry were on the right, then the 1st, 4th and 2nd, with the cavalry on the extreme left, Battery D was parked in the rear of the 3rd Infantry. Sunday was spent in getting settled and preparing for the week's work, while the older members of the Brigade visited friends in other commands, and discoursed bloody tales of past campaigns. On Monday drills and practice in the rifle range commenced,

Reveille sounded at 5 A.M., breakfast at 6, company, battalion and brigade drill were supposed to take up most of the time until 11.30. Dinner came at 12, and between then and supper call (5 P.M.) the men were relieved from all except guard duty and rifle practice. Regimental dress parade at 5.45, and brigade at 6.30 completed the day's work. As a matter of fact the different commandants relieved their men all they could during the middle of the day, as the heat was very oppressive. The men learned much that was valuable to them, but much more could have been accomplished in a practical way had there been only one or two regiments in the camp at the same time. Brigade is too cumbersome, and too much time is absolutely lost and wasted, which would be utilized for instruction in a regimental camp, through delays of various kinds. If we could have a regimental camp, say for three years, and, if absolutely necessary, a brigade camp every four years, it might be all right, but do give us a regimental camp by all means.

In rifle practice the troops learned a great deal. The men were sent to the range by companies, and practised at 100 and 200 yards on third-class targets. All who qualified by making 15 out of 25 at these ranges, went to 500 yards later in the week.

The 1st Infantry went to the range on Monday, A.M., and out of 210 practising, qualified 61 men at 100 and 200, and 88 at 100 yards, who failed at 200. The 2nd Infantry went down Monday afternoon, but it was all new work to them, and although Lieut. Smith, Acting Regimental I. R. P., and Capt. Lockwood, Acting Brigade, I. R. P., did their utmost to hurry matters, two companies did not get a chance to practice until later in the week. The 3rd Infantry went down Tuesday morning, the 4th in the afternoon, while the cavalry tried their carbines on Wednesday morning. The balance of Wednesday was spent by the 2nd, 3rd and 4th Infantry in completing their scores at the short ranges and in 500 yards practice. Thursday morning was utilized by the 1st Infantry and the cavalry at 500 yards, and in getting such men as they could ready for practice at the short ranges. In the afternoon Gen. Fitzsimmons and staff went to the range to shoot for their qualifications, and witness a firing drill with the new Gatling gun of the 1st Infantry. It is unnecessary to say that they were pleased with the working of this gun at 100, 200 and 500 yards. Friday was spent by the 1st Infantry and cavalry in practising all men who had not qualified or practised up to the limit. There is one change which should be made in the rifle practice in this camp, and that is in the scoring. During this tour of duty each squad scores for themselves. I do not know of anything out of the way, but the opportunities for "funny work" are too great. The scorers should be hired, the same as the markers, and should do nothing but score, otherwise the records will not be of any value, as there are some unscrupulous men in each brigade who would not hesitate to use the opportunity for their own advantage. I regret I cannot give you a record of the practice, as the scores are not in yet.

As a whole the brigade learned a great deal in rifle practice. Very few men had ever practised at 500 yards, and but a comparatively small number at the shorter ranges even. There was hardly a man in the brigade who did not fire from 20 to 40 rounds in "Camp Lincoln," and this, of itself, was a very valuable schooling.

Guard duty was only fairly performed, although there was a marked improvement during the latter part of the week. The majority of the officers appeared anxious to teach the men all they could in this branch of duty.

The food supplied by the Commissary Department was ample in quantity and variety. It was issued uncooked to the regimental commissaries, each company receiving their proportion and cooking for themselves. With proper care there was no reason why every man should not have lived well.

The principal objection to the camp is the size of the parade ground, and if brigade encampments are to be continued it is of the utmost importance that more ground should be acquired on the east or west. The present ground is ample for a regiment.

Monday there was regimental and brigade dress parade, which passed off smoothly. Tuesday was "Governor's Day" with its review and dress parade. Governor Oglesby came into camp a little after 3 P.M., attended by his staff. He was attired in the same major-general's uniform which he wore when wounded at Corinth in 1863. He was escorted to brigade headquarters, where he remained until about 5 P.M. Tuesday was the hottest day of the week, and it looked as if the men would drop in large numbers during the review. Just before 5 o'clock, when assembly sounded, dark clouds began to rise, while a cool refreshing breeze came from the south-west. The brigade was formed in line on the south-west and part of the north side of the parade ground for inspection and review. Governor Oglesby and Brig.-General Fitzsimmons, accompanied by their respective staffs, inspected the brigade, and then the order was "Prepare for review." The passage in review was good and salutes fairly rendered. After passing the Governor and his staff, the different commands returned to their place for brigade dress parade. Thursday, at 7 P.M., the 1st Infantry gave a dress parade in full dress uniform, which was very fine. Governor Oglesby and family were present. Friday afternoon the cavalry had a dress parade at 5 P.M., and the 1st Infantry at 6.30 P.M. This completed the ceremonies of the camp.

On Friday afternoon, at 3.30, was the "mock parade" of the members of the 1st Infantry, and it was a very successful and enjoyable affair. As soon as this was over, the Gatling section of the 1st took their gun to the top of the bluff and fired across the rifle range, a distance of 1,000 yards. General Oglesby and Adjutant General Vance were present, and expressed themselves as particularly well pleased with the results.

On account of a limited appropriation, the State authorities were only able to allow six days' pay, and this was the duration of the camp. They, however, notified the brigade and regimental commandants that, if any of them desired to stay two days longer and complete their work, they would be furnished subsistence for the extra time. This was the plan pursued last year, and the entire brigade remained until Saturday. This year the 2d and 4th Infantry and the battery left for home on Thursday morning, Brig. General Fitz-Simons and staff on Thursday evening, the 3d Infantry on Friday, while the 1st Infantry and the cavalry went home Saturday.

Were an outsider to judge of this camp from the reports published in the Chicago papers, he would form the opinion that even Fort Yuma, with its well-known reputation, were a preferable summer resort. As a matter of fact, it is the writer's humble opinion, and that of many of the officers of the 1st Brigade, that Camp Lincoln possesses natural advantages unsurpassed by any piece of land in the State. The camp and parade are sixty or seventy feet above the level of the rifle range, and the sewerage from the camp is conducted over half a mile from the range. The range is unexcelled, and the shooting is away from the camp. The present season has been one of drouth, and not a drop of rain had fallen within three weeks preceding the encampment, and none during the week the brigade was there. Under these circumstances the ground was baked as hard as a brick. The days were hot, and the thermometer ranged in the nineties every day, but the nights were cool and refreshing. With ordinary weather, a fair amount of moisture in the ground and atmosphere, and the men would not have noticed the warm weather. The health of the troops was remarkable, the surgeons asserting that there was less sickness than they ever knew before. The few cases of prostration from the effects of the heat were, in nearly every case, traced directly to some indiscretion in eating or drinking, and all yielded immediately to proper remedies.

Taken all in all, it is safe to assert that by next year Camp Lincoln, with the improvements which will be made before that time, will be a camp par excellence for the purposes for which it is needed by the Illinois National Guard. By this I mean a camp and rifle range combined. Had we, as has New York State, a number of rifle ranges, so that the troops could get their practice with the rifle, without going to camp for it, then I should say, dispense with rifle practice at camp altogether, have a regimental camp, and devote *all* the time to the many things which the men absolutely need to learn, and can learn thoroughly only in a camp of this character. But we have not attained this yet, and therefore must take camp and rifle practice at the same time.

H. T. L.

(From the Galverton, Texas, News, July 20.)

NO INDEPENDENT STATE MILITARY.

WHEREVER the founders of our Federal Union intended to draw the line of State sovereignty, it is certain that they did not draw the line so as to include an independent State Military among the State reservations. It is well to bear this fact in mind when considering the needless flurry which has been excited by the incidental and convenient selection of a Federal Army officer to have immediate command, for regulative and disciplinary purposes, of the inter-State drill at Galveston. For whatever reason, or from whatever motive, the idea is being disseminated that the managers of the inter-State drill, by securing the services of such a commander, in the absence of any provision in that regard by the Governor of Texas or his Adjutant General, have grievously insulted the military authority of the State. Complaint or umbrage of this nature is essentially groundless. From a constitutional point of view, there is no military authority, distinctly and independently as such, of this or any other State of the Union, to be insulted. To organize, arm, and discipline the militia of all the States is expressly made one of the constitutional functions of the Federal authority. No State is permitted, without the consent of Congress, to keep troops or ships of war in time of peace, or to engage in war unless actually invaded, or in such imminent danger as will not admit of delay. The militia of the several States are liable to be called forth into the active service of the United States at the discretion of Congress or by order of the President under statutory authorization of Congress. The fact is that the whole idea of military force as a last resort to maintain the peace and integrity of the Union, the peace and integrity of every State, and a republican form of government for every State, involves the logical necessity of lodging supreme authority with regard to the organization and employment of such a force in a common government for all the States. As there cannot be constitutionally any distinct and independent State military system, jealousy towards the regular military service of the United States on the part of a military or quasi-military State officialism in connection with an inter-State drill may well be derided as a ridiculous display of puerility. But it should not be forgotten that of all puerilities the puerilities of senility are the most ridiculous.

CAMPS OF INSTRUCTION AND DESTRUCTION.

To the Editor of the Army and Navy Journal:

I AM impelled to express my hearty concurrence in your remarks on "Camps of Instruction and Destruction" in last week's JOURNAL, and in the terse communication of "Long Range," in the same line in to-day's issue.

To well acquire even the rudiments of a soldier's education in the National Guard, *all* the time and effort which a man can give during twice the term of an enlistment is not more than enough.

Considered, therefore, simply as wasters of time, military picnics are a serious detriment to military excellence. The preliminary and supplementary labor required on the part of officers and men occupies valuable time which should be devoted to military improvement. But the time and labor given to these military picnics are worse than wasted, inasmuch as the effect is positively disastrous. One of these excursions does more injury to discipline than can be recovered from in a drill season and more.

To mould several hundred young citizens into a well-disciplined regiment requires years of patient study and labor and the united efforts of many men.

Surely there can be no question that a state of discipline ought to be acquired, and that when acquired it should be held fast. Every means available to strengthen discipline should be adopted, and all that tends to enfeeble it avoided.

The uniformed veteran club of the 7th Regiment with its little "me too" of the 22d, have many sins to answer for in the way of bad examples to the inexperienced young soldiers in the ranks of the National Guard. The false glory of their free-lunch consuming trips, elaborately advertised by the efforts of reporters carried along for that purpose, is a constant interference with the proper instruction and disciplining of the National Guard. If the law is not now sufficient to suppress these absurd and pernicious clubs, it can and ought to be made so.

At least, the organizations of the National Guard can be controlled and their action guided, when necessary, so as to prevent their demoralization by camps of destruction or by pleasure excursions of any kind.

It is a hopeful indication that your JOURNAL has boldly and unequivocally taken so advanced a stand.

That you will continue your strictures whenever any National Guard organization, no matter how celebrated or influential, shall transgress, is the earnest wish of all who are striving toward military excellence in the National Guard.

"POINT BLANK."

NEW YORK, July 24, 1886.

NATIONAL GUARD ITEMS.

Major-General E. L. Molineux, of the 2d N. G. Division, has received a leave of absence for three months.

A correspondent asks us to note particularly that the veterans of the 7th Regiment paraded as immediate escort to "President Cleveland and other guests" at the Albany centennial. As there was no particular military duty required, there was no harm done and we publish the matter in accordance with the wish of our correspondent.

The question as to who shall be Colonel of the 13th N. G. Regiment in place of Col. Barnes is still unsettled. The selection of ex-Colonel Austen is out of the question. To settle the matter satisfactorily there is only one way, and that is to elect Lieut.-Colonel Edward Fackner, who is in every way competent, popular, a thorough soldier, and in consequence of his enthusiasm likely to retain the office a long time to come. These frequent changes only hurt an organization. From official and personal knowledge we are sure Colonel Fackner would fill the position with credit.

The long-standing question of the adjutancy of the 22d N.G. has at last been settled, and we congratulate Colonel John T. Camp on his selection. Adjutant Harding's mantle will fall on 1st Lieut. N. B. Thurston, an officer of peculiar merit and marked ability and energy. Lieut. Thurston has for a long time enjoyed the particular confidence of Adjutant-General Josiah Porter, when Colonel of the 22d, as well as in his present position. Lieut. Thurston is well known to the National Guard as well as to the Army, as the capable special instructor of guard duty in several successive camps, and he shares with Colonel Phisterer and the ARMY AND NAVY JOURNAL the credit of bringing up the Guard to its present status in guard duty. Lieut. Thurston's official record is: Private, Aug. 6, 1877; Corporal, April 3, 1878; 1st Sergeant, Feb. 20, 1879; 2d Lieutenant, Feb. 11, 1880; 1st Lieutenant, April 6, 1880.

The 1st Regiment, 1st Separate Co., and the Light Battery, N. G. Vt., will hold their annual muster and parade at Burlington, on August 24, 25, 26, 27 and 28. The encampment will be known as Camp Stannard, in memory of the late Major-General George J. Stannard.

The 14th N. G. Regiment will be inspected at the armory October 18 next.

A full account of the Massachusetts encampment, which was crowded out of our this week's issue, will appear in the JOURNAL of August 7.

(Mattoon, Ill., Correspondence Cincinnati Enquirer.)

A STORY ABOUT LINCOLN.

GEORGE B. BLACH, who lives in the southern part of this county, near the old Lincoln homestead, was a great admirer of the first martyred President. He has made it a hobby to pick up all stories concerning Abraham Lincoln, and tells the following, which he has received from Rev. Dr. Harsha, of Omaha:

"General Winfield Scott, when a young man, was stationed at Fort Snelling—at that day perhaps the remotest military outpost in the country. When the Black Hawk war was begun some Illinois militia companies proffered their services. Two lieutenants were sent by Scott to Dixon, Ill., to muster the new soldiers. One of the lieutenants was a very fascinating young man, of easy manners and affable disposition; the other was equally pleasant but extremely modest. On the morning when the muster was to take place, a tall, gawky, slab-sided, homely young man, dressed in a suit of blue jeans, presented himself to the lieutenants as the captain of the recruits, and was duly sworn in.

"The homely young man was Abraham Lincoln. The bashful lieutenant was he who afterward fired the first gun from Fort Sumter, Major Anderson. The other lieutenant, who administered the oath, was in after years the President of the Confederate States, Jefferson Davis."

Dr. Harsha was in Carter Brothers' book store in New York City, where he chanced to repeat this story to a friend. An elderly gentleman who was sitting near by listening arose and remarked that he was happy to be able to confirm the facts, as he was the chaplain at Fort Snelling at the time, and was fully able to corroborate each statement. A bystander then gave the additional testimony that he had often heard Mr. Lincoln say that the first time he had ever taken the oath of allegiance to the United States it was administered by Jefferson Davis.

The statement that Mr. Lincoln was mustered into the Military Service by Jefferson Davis is, we believe, authentic, and the War Department records have recently been searched for confirmation of the statement, with what result we have not heard.

THE MESS.

The adjutant who caused a smile by his order "1st sergeants to the cent and fronter" is followed by the sergeant who, at dress parade, gravely reported "Co. I all present, but what account are they for."

—

The following is a placard in the possession of a British naval officer just returned from Egypt. He procured it at a café chantant in Alexandria. It was printed in several languages, and this is the English part: "Every of the consummations of the coldess, 1 piastre besides. Every of the claim to be addressed directly of the direction. During of the repetitions the price of consummations to be the same that in every the other's coffee." With the aid of the parallel passages in other languages the meaning is found as follows: "All iced drinks one piastre extra. All complaints should be made at the office. Notwithstanding the performance the prices will be the same as those of other cafés."

NATURE'S CURE FOR CONSTIPATION,
TARRANT'S SELTZER APERIENT
Sick-Headache,
AND
DYSPEPSIA.
This well known substitute for the old-fashioned drastic cathartics was manufactured in 1844 for the use of the Physicians of the Metropolis. It rapidly supplanted the violent purgatives then in vogue, and is now prescribed by Physicians and recommended by Druggists everywhere. In small doses it is an efficient antidote for Nausea, Sick Headache & Sea Sickness. In larger doses it tones the stomach and gently operates upon the bowels, neutralizing the ill effects of indiscretions in eating or drinking. Its neat portable form, its inexpensiveness and its prompt action render *Tarrant's Seltzer Aperient* as indispensable an addition to the Household Medicine Chest, as it is to the Traveler's Outfit. *Sold by Druggists everywhere.*

And with a winsome smile to France,
He bows with great eclat.
For Boolinger is deep of mind,
And sly as any cat,
And one of these fine afternoons
He'll boom a coop de tat.—*Critic.*

—

"Movements of California Pioneers," says one of the dailies. Yes, they are moving; moving to the graveyard, moving from the ranks to lay their old bones in the sandhills before the crematories get a good start. It is not hard to move a pioneer, even when he is seated at the bar-room store and is deep in a description of how gold was struck on Murder-er's Bar in the spring of '50. It is not necessary to swing a club over him to move him, or to explode a bomb under his chair. "Col. Swiggletop, what is yours?" will bring him to his feet as quick as a bent pin under a schoolmarm's bustle. That's the sort of movement the pioneers like, bless their stout old hearts.—*San Francisco News-Letter.*

UNSEAWORTHY TORPEDO BOATS.

La Revue des deux Mondes has taken up the torpedo question, a naval contributor dealing with the following propositions: The writer attempts to prove: 1. That the present automatic torpedo boats can only be useful for coast defence, the high seas being practically closed to them, although they can weather an ordinary storm as long as their engines work well, and permit them to steer. 2. That the terror said to be inspired through apprehension of a torpedo attack can only extend to vessels lying at

Horsford's Acid Phosphate
PRODUCES SWEET & NATURAL SLEEP.
Dr. C. R. DAKE, Belleville, Ill., says: "I have found it, and it alone, to produce sweet and natural sleep in cases of wakefulness caused by overwork of the brain, which often occurs with active professional and business men."

A SAFE INVESTMENT
For both large and small sums of money is offered in the DEBENTURE BONDS of the NEBRASKA LOAN AND TRUST CO. and the CENTRAL LOAN AND LAND CO. These bonds are secured by mortgages on productive real estate after the manner of securing National Bank notes, bear 6 per cent. interest and run 10 years. Experience proves that they are one of the safest investments ever devised, and they are commended to the attention of officers of the Army and Navy.
For sale by JOHN ROCKWELL, 20 Nassau St., New York.

"A CAPITAL STORY FOR VACATION READING."
CUT:
A STORY OF WEST POINT.
By G. J. CERVUS, author of 'A Model Wife," "White Feathers," etc., etc. 12mo. Extra cloth. $1. Paper cover. 50 cents.

"So many bad stories have been written about West Point that we despaired of ever reading a good one. But the good one is here. The dialogue of the volume is easy, animated, interesting, and natural; the description correct, picturesque, and vivid."—*Washington National Republican.*

"Written with strength and picturesqueness of style. Has an excellent plot, in which the interest is very skilfully sustained, and is exceptionally vigorous in its character drawing. The narrative is attractive in its simplicity and frankness, the more dramatic scenes are treated with genuine power."—*Boston Sat. Eve. Gazette.*

NEW ENGLAND MUTUAL Life Insurance Company, OF BOSTON, Mass.
Assets, - - - - - - $17,846,546.65
Liabilities, - - - 15,238,761.16
Total Surplus, - $2,607,785.49
This Company insures the lives of Officers of the Army and Navy without extra premium, except when actually engaged in warfare, which premium if not paid at the assumption of the extra risk *will not invalidate the policy*, but will be a lien upon it, and also gives liberty of residence and travel, on service, in all countries, at all seasons of the year, without extra charge.
Special attention is called to the LIFE RATE ENDOWMENT policy, which combines insurance at low cost with an investment at a fair rate of interest, and at the same rate of premium formerly charged for life policies. Every policy participates in the *annual* distribution of surplus, and has endorsed upon it the cash surrender and paid up insurance values provided by Massachusetts laws.
Pamphlets explanatory of the New Feature may be had on application at Compy's Office,

ARMY AND NAVY HEADQUARTERS.
Four Iron Fire Escapes.
RATES—$3.00 and $4.00 Per Day.

anchor; that a torpedo attack at sea on a vessel well armed, well commanded, of high speed, and easily handled, ought to cause no more apprehension than the attack of an ordinary ironclad. 3. That the union of a number of torpedo boats for the purpose of combined action is fraught with danger, as during a dark night or in thick weather they run the chance of inflicting more damage upon one another than on the enemy. 4. That in navigating the high seas, men-of-war and merchantmen will have nothing to fear from the torpedo boats of the present. 5. That under a number of circumstances torpedo boats will be found useless, and large vessels, well armed and well manned, indispensable. The writer quite admits the importance of torpedo boats, but thinks that their value has been exaggerated, and that they have been unduly written up by enthusiastic journalists, who have gone so far as to assert that only old salts have any objections to find to them.

POLITICS IN THE FRENCH ARMY.

THE Paris correspondent of the New York *Herald* who seems to have "Boularger on the brain," cables: "It appears that the luxurious military club was planned by Boulanger not merely as a device for promoting comfort and pleasant social relations among the officers quartered in Paris, but it was a part of a great scheme for the making of the whole French Army a huge political machine. All the military clubs throughout France will be henceforth under the direct control of the Minister of War. All the officers of the army in active service will *be obliged* to become members of the military clubs of the garrison towns in which they are quartered, and their club dues will be deducted every month from their pay. The statutes of the clubs are in every case to be submitted for approval to the commanders of army corps of the different districts, who, in turn, must report to the Ministry of War. It is plain to see that the organization of the clubs, being centralized in the hands of the head of the army, becomes at once a powerful political machine, capable of being turned in any direction at the will of the Minister of War. The whole French Army, in fact, will shortly be transformed into a political club such as the Girondins and Jacobins desired but were unable to establish."

FOREIGN ITEMS.

UNDER England's new administration, the Right Hon. W. H. Smith is Secretary of State for War, and Lord George Hamilton, First Lord of the Admiralty.

IT is claimed for the new Spanish torpedo cruiser *Destructor*, launched at Glasgow, July 29, that she is able to overtake and destroy the fastest torpedo boat heretofore afloat.

QUEEN VICTORIA has presented the 3d Battalion of the Royal Welsh Fusiliers with a fine white goat from the famous herd in Windsor Great Park. This regiment is always preceded in its marches by a goat.

A DESPATCH of July 27, from Managua, Nicaragua, reports an attack by four officers and sundry other revolutionists upon the artillery barracks. The attempt failed, and the officers and the greater part of the revolutionists were arrested.

TURKEY is making large additions to her armament. Herr Krupp has received a large order from the Government, and a Turkish officer has gone to his works at Essen to oversee the manufacture of the guns. It is proposed to purchase 400,000 American rifles.

A CONVENTION between England and China has been signed at Pekin, by the terms of which China agrees to the occupation of Burmah by the English and promises to encourage trade between China and Burmah. A commission is being formed to delimit the Burmese frontier.

ARRANGEMENTS are being made at Berlin for a fitting celebration by the German Army of the Emperor's ninetieth birthday, upon which occasion it is proposed to unite the officers and corps of the whole army, and also to found a philanthropic military institution at Berlin.

Nishni Novgorod started from Sebastopol to join one of her consorts in the evolutions in the Odessa Roads. She encountered what at the worst we should term a stiff half gale, with a slightly choppy sea, a few hours' weathering of which sufficed to bother and damage her to such an extent that she was towed back to port. Even for harbor and coast defence the unwieldy form and virtually unmanageable movements of this class of gunboat, or floating battery, in any but the smoothest waters, puts the Popoffka out of all serious calculation as an effective fighting arm of the Russian Navy.

R. W. TANSILL & CO., Chicago, are now making especially for the Officers of the Army and Navy a new and very fine Havana hand-made cigar, known as "TANSILL'S REINA." They are put up in beautiful packages of 25 cigars, each cigar banded. They come in three sizes, 4¼, 4½, and 4¾, inches, while their moderate cost, viz. $65, $70, and $75 per thousand brings them within the reach of the entire Service.

BENSON'S CAPCINE PLASTERS are well known in the Army and Navy as the most convenient and effective external remedy. For sprains, coughs, rheumatism, sciatica, and all ailments arising from exposure they excel every other application, giving relief and cure in a few hours. Avoid worthless imitations under similar names. Seabury and Johnson, Chemists, New York.

MARRIED.

McCOMBER'S PATENT BOOTS AND SHOES.

Everybody can now enjoy my Patent Boots and Shoes. I am now manufacturing my Patent Boots and Shoes on a large scale with ne and improved machinery, and selling at greatly reduced prices so as to place them within reach of all. I will send to all applicants price-lists, full instructions for self-measurement for men, women, and children, and return the shoes as quickly as they can be made. They will fit beautifully, will never warp, distort, or injure the tenderest foot, and will restore bad and distorted feet to symmetry and comfort. I make no shoddy goods, and my highest class boots and shoes are unsurpassed either in material or workmanship, by any goods in any country, and my lowest class goods are superior in every respect to all others at the same price. To preserve leather of all kinds for ladies' or gentlemen's boots and shoes, and to make them soft and beautiful, use my *Seal Polish Blacking*. Those who desire perfect boots and shoes should send for my free illustrated pamphlets, which will give price-list and all information that is required. JOEL McCOMBER, Inventor and Manufacturer of McCOMBER'S PATENT BOOTS AND SHOES, AND McCOMBER'S PATENT LASTS, 52 East 10th Street, five doors west of Stewart's Store, New York. Reduced Prices to Club Members on Tennis Rackets and Balls.

We feel confident, from the many flattering testimonials which we are receiving, that our 1886 American Tennis Ball is proving itself more uniform in character, with a quick action, when struck by the Racket, as well as the most durable in the market. However, we believe a trial of these Balls by your Club will convince you of their superiority. We offer them to Clubs throughout the country for 40c. each, two for 75c., three for $1.00, six for $2.00, $4.00 per dozen. By

1886 MODEL.

mail, 30 cents a dozen additional.

Our "Franklin, Jr.," same quality as we sold last year for $5.50, we are selling to clubs to-day for $4.00, and our "Staten Island," which we sold last year for $5.00, we have reduced to $3.00 (a discount of nearly 40 per cent.). We also have good Rackets for young folks at $1.50, $2.00, and $2.50 each. Our celebrated "Expert," "Far and Near," or "Franklin" Rackets, 1886 Models, $5.50 each, 6 for $30.00. Address

ARMY AND NAVY JOURNAL.

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOLUME XXIV.—NUMBER 2. WHOLE NUMBER 1198. | NEW YORK, SATURDAY, AUGUST 7, 1886. | SIX DOLLARS PER YEAR. SINGLE COPIES, FIFTEEN CENTS.

Publication Office, 240 Broadway, N. Y.

THE midsummer "Register of the Commissioned and Warrant Officers of the Navy of the United States and of the Officers of the Marine Corps" was distributed early in the week, and forms a valuable appendix to the Register issued in January last.

THE Sultan of Turkey has recently paid £105,000 out of his own private purse for the five new torpedo boats he has purchased in Germany. This parallels the jokes that were once current about General GRANT paying our national debt out of his own pocket.

THE new Artillery School and Light Battery details were announced from A. G. O. early in the week, and are given in full with the Army orders of this week. They entail many changes of stations upon the officers concerned, and a general breaking up of pleasant associations, one of the necessities of Army life sometimes the hardest to bear.

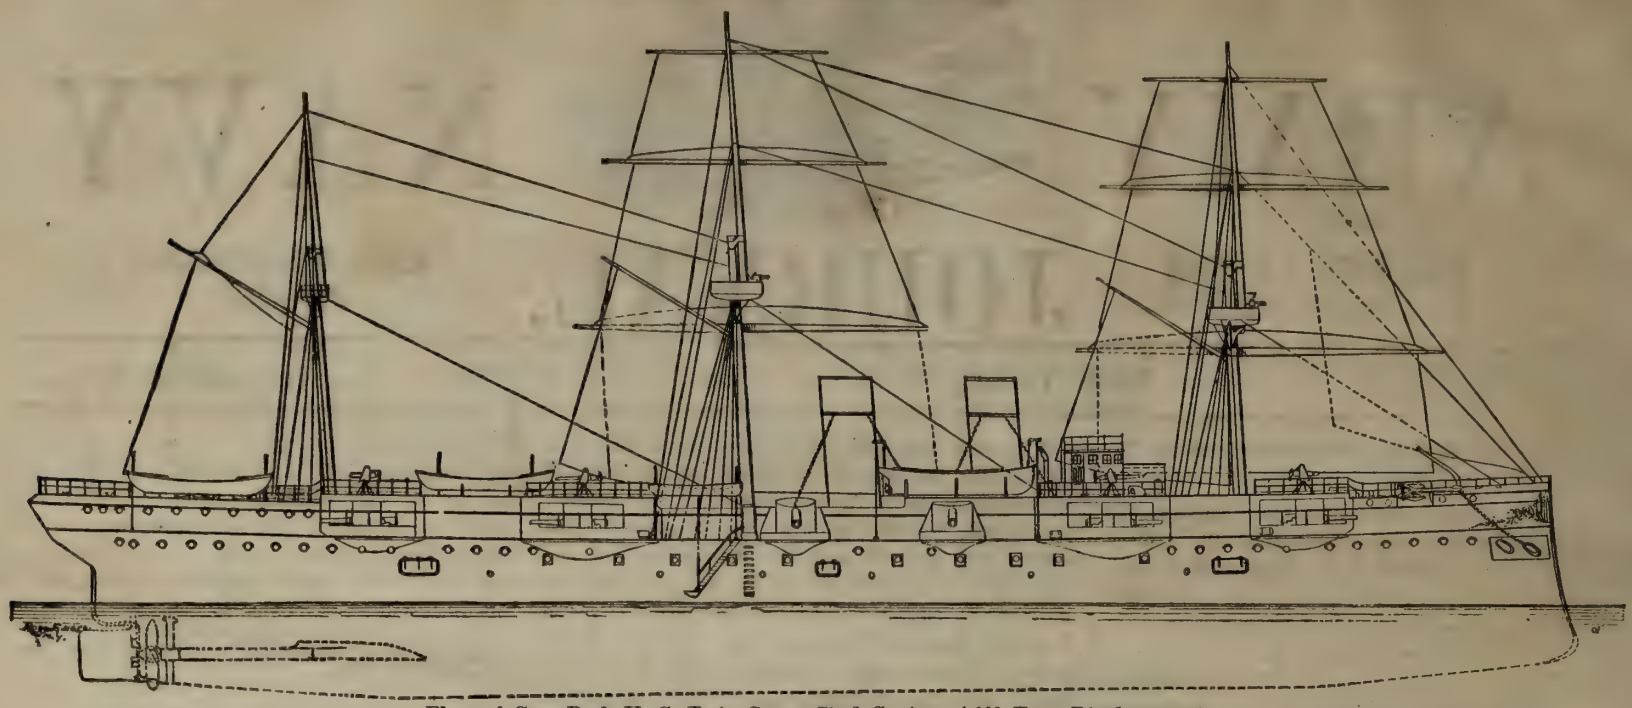
THROUGH the failure of Congress to pass the bill making an appropriation for fitting out an expedition to observe the total eclipse of the sun, which will occur on the 29th of this month on the west coast of Africa, our Government astronomers will have to trust to their scientific friends on the outside for particulars of this event. A bill appropriating $10,000 for fitting out an expedition under the direction of the Secretary of the Navy was passed by the Senate several months ago, and has been pending in the House Naval Committee ever since. It is, of course, too late to carry out the object of the bill, so that no further action upon it need be looked for.

OWING to threatened troubles among the Ute Indians—SHAVANO, the well-known chief, having already been killed—and to avoid any danger of a massacre of the settlers in that vicinity, it has been determined to establish a cantonment on their reservation in Utah, at the forks of the Uintah and Duchesne Rivers, about 35 miles distant from old Fort Thornburg and about one fourth the distance from Ouray to Uintah. The sum of $25,000 has been authorized to hut the troops, the garrison consisting of two companies of cavalry and four of infantry. The cavalry companies left Fort McKinney this week, and will go west from Rock Creek over the Union Pacific.

THE Army, Division and Department Commanders have now issued their several orders for the rifle competitions of 1886, and the competitors will soon be on the move to their respective rifle camps. The competitions promise to be entirely successful, and there is no lack of sharpshooters and marksmen to choose from. In the Division of the Atlantic, the interest is enhanced by the fact that this is the first year the division has had a rifle range of its own, the competitions having heretofore taken place at Creedmoor. Fort Niagara, N. Y., however, furnishes ample facilities, and good results are expected. The provision of law which deprives enlisted competitors of commutation of rations while *at* the places of contest is not, we imagine, calculated to stimulate zeal, but the arrangements for comfort which we note commanders are making, will doubtless tend to produce a more forgiving disposition towards Congress for its action in this respect.

IT is to be regretted that in the game of give and take, played by the conferees of the House and Senate on the Naval Appropriation bill, just passed, the Naval Asylum should have suffered. No matter how soon it may be determined that the present site is an unfit one for the asylum, still the need of the brick building recommended by the Bureau of Yards and Docks and provided for by the House of Representatives is great. The removal of the servants from the attics and of the kitchen from the basement of the main building should be immediate, and the establishment of a proper laundry plant would then easily follow. It is hoped that this legislation will be effected the next session of Congress.

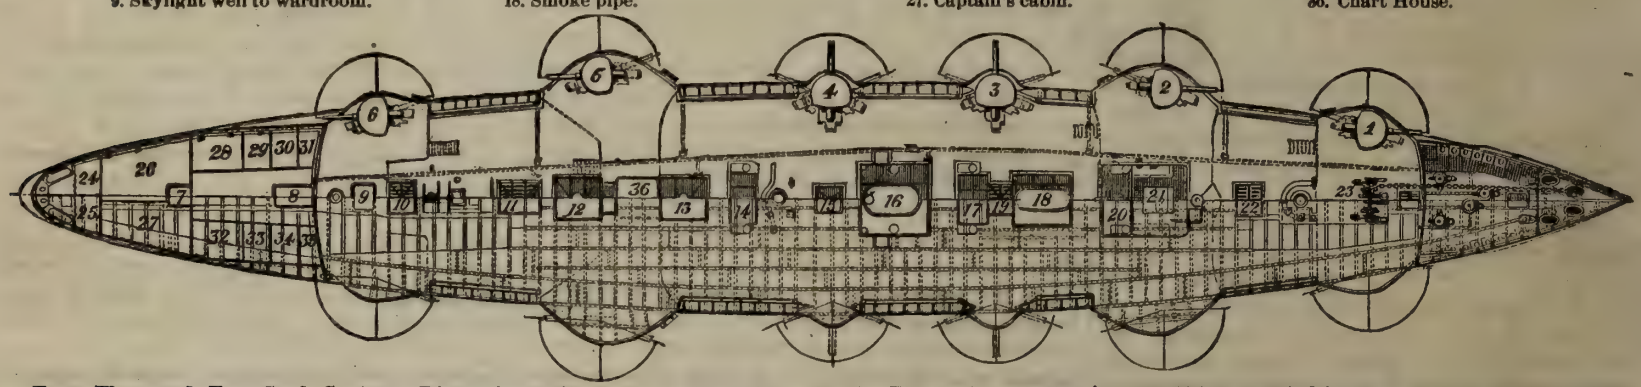
ON Sunday, June 18, before a garrison Court-martial at West Point, three enlisted men were tried, found guilty of the offences charged, and duly sentenced. When the proceedings came to the Superintendent, General MERRITT, they were disapproved, with the following comment: "The proceedings, findings, and sentences in the foregoing cases are disapproved. The trial by Court-martial of an enlisted man on Sunday, there being no certified or apparent necessity for such trial, is irregular, if not illegal. It is a rule among the armies of Christian nations that no military duties, not necessary to the well being of a command, shall be performed on the Sabbath day. It is not proposed by the commanding officer of this post that at the National Military School, in this least busy season of the year, shall the first step be taken to violate a principle which is as sacred as it is venerable."



SAN FRANCISCO has had ample opportunity this week to display its appreciation of the veterans of the war and has nobly responded to the calls upon its hospitality. On Monday, August 2, the Society of the Army of the Potomac held its business meeting which was favored by a public reception and other exercises. On the evening of August 4 the grand banquet was held, an occasion which will long be remembered on the Pacific Coast. On the evening of August 3, the grand parade in honor of Commander in-Chief BURDETTE of the Grand Army of the Republic took place, and the veterans mustered in thousands. Mayor BARTLETT, in a speech, welcomed the visitors to San Francisco. Commander BURDETTE replied. General W. T. SHERMAN, in the course of remarks, referred to the enthusiastic reception given the Grand Army of the Republic and its kindred organizations by San Francisco, and spoke of the feeling of loyalty and gratefulness which prompted it. The decorations of the city were magnificent.

THE *Admiralty Gazette* continues its assaults on what it calls the "Great Gun Ring," whose sacrifice of the interests of the nation "to satisfy their own cupidity, greed and avarice," it characterizes as high treason. It mixes up Mr. GLADSTONE with its argument, describing him as "another great man gone wrong, in an endeavor to further his own individual office-seeking, money-grubbing proclivities." Coming to statements of fact it reports "that on July 2 it was discovered that two of the 38-ton guns of the *Ajax* were disabled, and rendered unfit for further service, through their A tubes having cracked, and by July 9 the whole four were found to be disabled. To fire another round would render them liable to burst, as did the *Thunderer* gun. England," it tells us, "has not a single gun on which to rely in case of need. Those on board the *Colossus*, guns of the latest pattern, dare not be used, and have been ordered not to be fired. We dare not, at this moment, engage in a war with a foreign naval Power; and Russia, aware of the fact, tears up the Treaty of Berlin, as she did that of Paris in 1870." These assertions concerning the guns of the *Ajax* are denied by other service papers.

CAPTAIN A. W. WEAVER, U. S. N., is now at the head of the list of his rank, and by regular operation of the retired list will receive his promotion to Commodore on the retirement of the present Commandant of the Washington Yard, Commodore Queen, October 6, when the list of Commodores will be reduced to the limit fixed by law, viz.: ten. Rear-Admiral S. R. Franklin, U. S. N., will be the next of his rank to retire under operation of law, August 24, 1887, and that event will promote the present Commandant of the New York Navy Yard, Ralph Chandler, to the grade of Rear-Admiral. On the promotion of Lieutenant Commander G. W. Pigman, U. S. N., the officers transferred from the Volunteer Service at the close of the war of the Rebellion come next in order for promotion to Commander. These officers are Thomas Nelson, Felix McCurley, John McGowan, jr., James G. Green, George E. Wingate, Joshua Bishop, Charles A. Schetky, John K. Winn, Charles H. Rockwell, James M. Forsyth. Promotions in the Medical Corps of the Navy promise to be rather the exception than the rule, the next retirement for age being Medical Director Jacob S. Dungan, on January 29, 1887. The next one to retire will be Medical Director S. F. Coues, September 17, 1887. The next vacancy will occur June 18, 1888, by the retirement of Medical Director Shippen. After the retirement of Pay Director A. H. Gilman on August 9, 1886, there will be no further vacancy created in the Naval Pay Corps by operation of law until July 4, 1889, on which date Pay Director Wallach retires.



WE give on the pages following this ten cuts, showing in detail the plans adopted by the Navy Department for the four additional vessels authorized by Congress, including an illustration of the *Naniwa-Kan*, which is to serve as a model for one of them, the 3,730 ton screw steel cruiser. Of the vessels built by JOHN ROACH the *Dolphin* and *Atlanta* are in commission and the latter vessel this week undertook a trial trip of which some account appears elsewhere. The armament of the *Atlanta* is nearly complete, and in two months she will be ready for sea so far as the Ordnance Bureau is concerned. The 6-inch guns for the *Boston* are finished, except sighting, and her 6-inch carriages are finished. The 8-inch guns and carriages for this vessel are three fourths finished; all cast iron projectiles partly finished, the powder is being made; her ordnance equipment is well under way, and her secondary battery guns and ammunition are mostly delivered. Work has commenced on her mounts, her electrical outfit is delivered, and the ordnance outfit can be completed in five months. The 6-inch guns for the *Chicago* are half finished; the 6-inch carriages nearly completed; the 8 inch guns one eighth finished, and the 8 inch carriages not yet commenced. The cast iron projectiles are partly finished; ordnance equipment just commenced, and secondary battery, guns, and ammunition all delivered. Work upon her mounts has not yet commenced; the electrical outfit is delivered, and the powder not yet ordered. Ten months will be required to finish the armament of the *Chicago*.

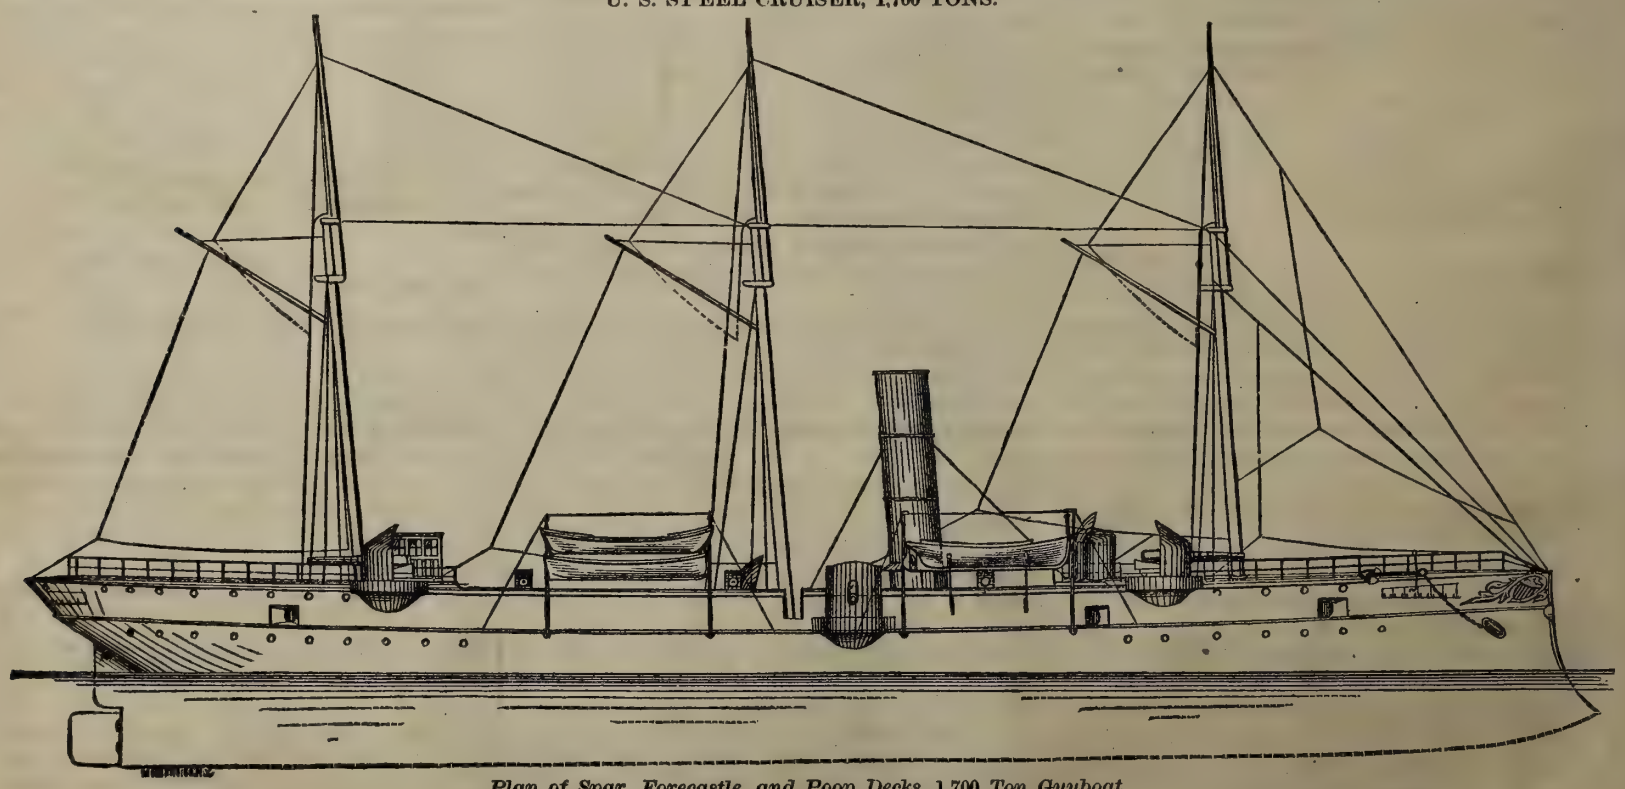
Four Thousand Ton Steel Cruiser.—Dimensions: Length on load-line, 310 feet; beam, extreme, 49 ft. 1¾ ins.; draft, mean, 18 ft. 9 ins.; load displacement, about 4,000 tons.

I. H. P., 6,000 natural draft; 8,500 forced combustion. Twin screws. Speed, estimated, 18 knots. Rig, bark. Plain sail area, 12,000 square feet. Coal capacity, 850 tons. Complement of men, 300.

Main Battery: 12 6-in. breech-loading rifles.

Secondary Battery: 4 47 m. m. revolvers; 4 57 m. m. H. P. single shot; 2 37 m. m. revolvers; 1 short Gatling.



This vessel will be built of steel throughout, having a double bottom 3 ft. 3 ins. in depth running the entire length of the machinery space, or 129 ft. Throughout the length of the double bottom the ship is constructed on the bracket system; before and abaft the double bottom the framing is of Z-bars, 6″x3½″x3″x 14 lbs.; the frames are spaced 3 ft. from centres throughout. The outer plating varies from 17½ lbs. to 15 lbs. per square foot. The machinery, magazines, shell rooms, torpedo rooms, and steering gear are placed below an armored deck, which is 3 ins. thick on its sloping sides and 2 ins. on the horizontal part amidships. The outer edge of this deck is 4 ft. 3 ins. below the load-line, sloping up to 15 ins. above the load-line at the midship part of the vessel. All openings in this deck to machinery spaces, magazines, shell rooms, etc., are protected by cofferdams. About 4 ft. at its lowest part above this protective deck runs a berth deck the entire length of the vessel; between these two decks, for the length of the machinery space, coal is stored, forming a belt of coal 15 ft. 6 ins. in width above the machinery, while below the protective deck a belt of coal 9 ft. in thickness also runs the length of the machinery. The vessel is a poop and forecastle deck ship, with open gundeck. The battery will be mounted in sponsons on central pivot carriages supporting segmental shields 2 ins. in thickness—2 under the forecastle, 2 under the poop, 4 under the main bridges, and the balance amidships. Four guns will be able to concentrate within 400 ft. of bow or stern; either broadside of 6 guns will concentrate within 100 ft. of the ship's side.

The vessel will be provided with six above-water torpedo launching tubes, as in the 1700-ton vessel; also electric search lights and apparatus for lighting the ship, also a complete system of forced ventilation.

The protective deck will be carried down to strengthen the ram-shaped bow, which will be thoroughly stiffened and strengthened by bulkheads and breast-hooks for ramming purposes.

The hull will be sub-divided by fore-and-aft and athwartship bulkheads into over 150 water-tight compartments.

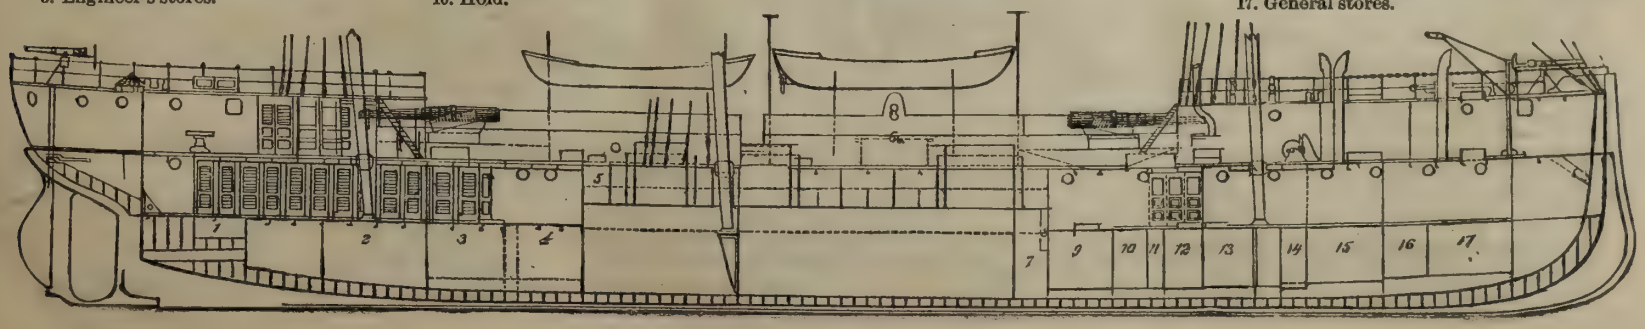
Seventeen Hundred Ton Gunboat.—Dimensions: length on load-line, 230 ft.; beam, extreme, 36 ft.; mean draft, 14 ft.; load displacement, about 1,700 tons. Twin screws. I. H. P., 2,200, natural; 3,200 forced combustion. Speed, 16 knots. Rig, three-masted schooner. Plain sail, area, 4,409 sq. ft. Coal capacity, 400 tons. Complement of men, 150. Main battery, 6 6-in. guns (breech-loading rifles; secondary battery, 2 57mm. high-power, single shot, 2 47mm. high-power, single shot; 2 37 mm. revolvers; 1 short Gatling. This vessel will be unsheathed, built of steel; the frames are Z bars, 6"x3½"x3"x14 lbs. The outer plating is of 14 lbs. per sq. ft. The engines, boilers, magazines, shell-room and stearing gear are placed beneath a water-tight steel deck, running the entire length of the vessel ⅜in. in thickness, its outer edge being 3 ft. below the load water-line and rising to the load line at centre line amidships. The stem will be slightly ram-shaped and stiffened for ramming. The hull is divided into numerous water-tight compartments, as in the 870-ton. All openings in the water-tight deck to machinery and magazines are protected by coffer dams; the machinery is further protected by a belt of coal 9 ft. in thickness running entire length of the machinery space.



The main battery will be mounted in sponsons on central pivot carriages supporting segmental shields; two on the forecastle, two on the poop, and two amidships. The forward and after guns will be able to concentrate on an object 300 ft. from the pivots, while the amidship guns will have a train of 70 degrees abaft and forward of the beam. Three guns may be concentrated on either broadside within 100 ft. of the ship's side. This vessel will be provided with six above-water launching torpedo tubes, capable of being trained several degrees forward or abaft the beam; she will also have a fixed torpedo tube in the bow and stern; she will also be provided with electric light apparatus and search lights.

Eight Hundred and Seventy Ton Gunboat. Dimensions: Length between perpendiculars, 175 ft.; beam (extreme), 31 ft.; draft (mean), 11 ft.. 10 ins.; displacement, about 870 tons.

I. H. P., 900 natural draft; with forced combustion, 1,350; Speed (estimated), 12 knots; Rig, barkentine; plain sail area, 4,480 sq. ft.; coal capacity, 160 tons; complement of men, 100; number of screws, 1.

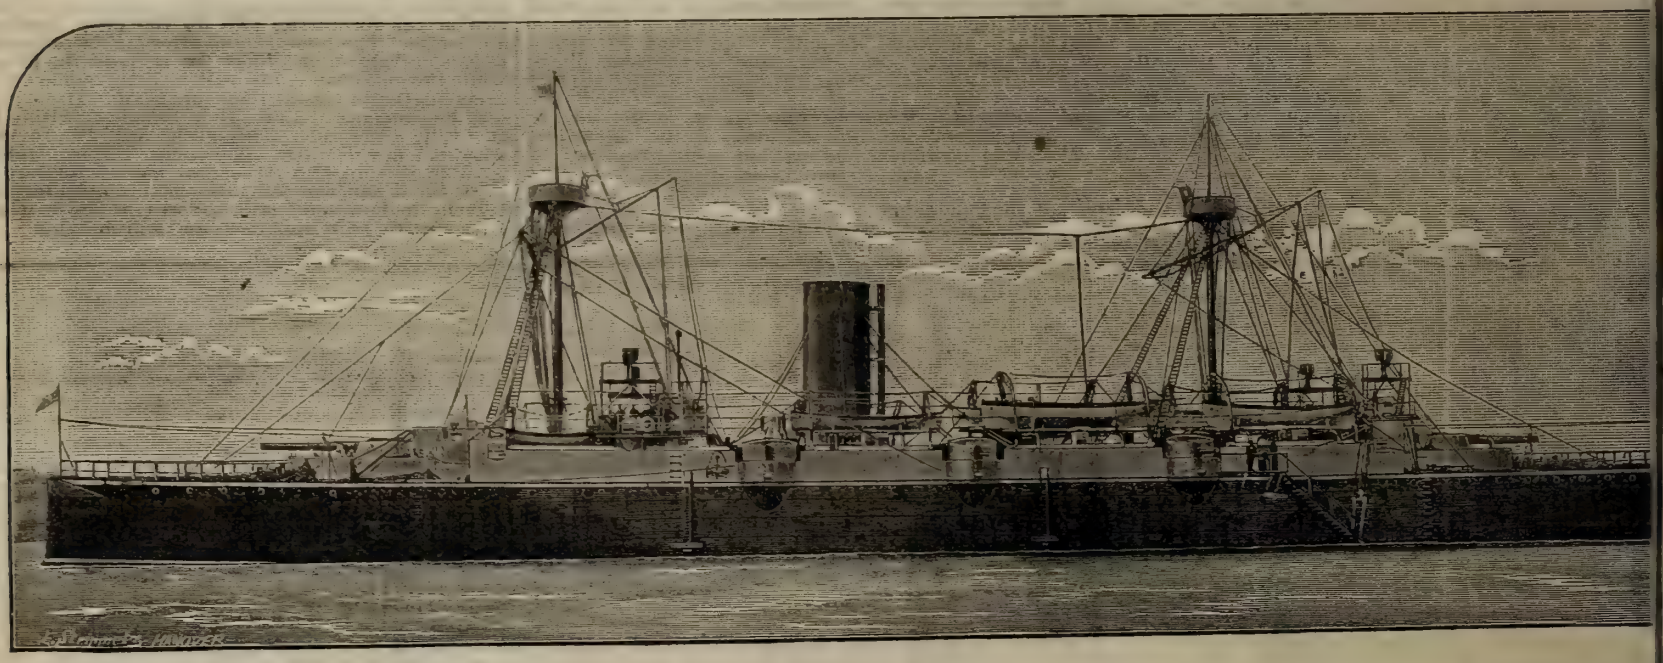
Main battery, 4 6-in. guns.

Secondary battery 2 47 mm. high power single shot; 2 37 mm. revolvers; 1 short Gatling.

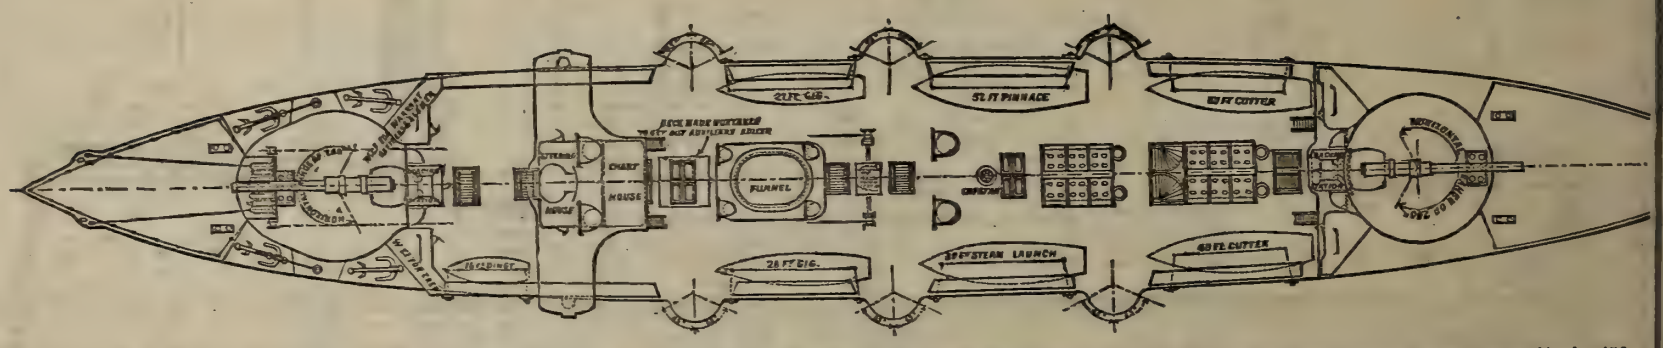
This vessel will be constructed on the composite system, viz.; frames, beams, stringers, and keelsons of steel, with the outer planking and decks of wood; the planking will be in two thicknesses of 2½ and 3 inches, and coppered.

The engines and boilers are placed beneath a water-tight steel deck 3-8 in. in thickness, its outer edge being 27 in. below the water line, rising to 8 in. above at the centre line amidships. The vessel is divided into numerous water-tight compartments by steel athwartship and fore and aft bulkheads, thus localizing the damage due to the hull being penetrated by shot or ramming. The main battery will be mounted in sponsons on central pivot carriages, two having a range of from 2 degs. across the bow to 70 degs. abaft the beam, and two having a range of from 2 degs. across the stern to 70 degs. forward the beam. Two guns can be concentrated on an object 400 ft. ahead of the bow, or abaft the stern, sure cylinder of 29 and 52 ins. diameter, respectively, the piston stroke of 30 ins., and the number of revolutions to be about 150 per minute.

The engines, like those of the 4,000 cruiser, will be placed in separate water-tight compartments, and will be duplicates. The propellers are to be three-bladed, of about 11½ ft. in diameter, and will be made of Manganese bronze.



The boilers will be four in number, of horizontal, cylindrical, tubular type, containing an aggregate grate area of 240 square feet, arranged fore and aft in two water-tight compartments, with a fireroom athwartship, abaft the after boilers and forward of the forward boilers. All the steering engines, windlasses, and capstans and other auxiliary machinery is to be of latest improved pattern.



The machinery of the 870-ton gunboat is designed to have, with its auxiliaries, 1,300 I. H. P. under forced draft.

The engine is to have a high and a low-pressure cylinder of 25 and 46 ins. diameter, respectively, and a stroke of 33 ins, and the number of revolutions to be about 136 per minute. The propeller will have three adjustable blades, with a diameter of 9 ft. 9 ins., and to be capable of adjustment as to piteh.

The boilers are to be two cylindrical boilers, 18 ft. 8 ins. long and 8 ft. 8 ins. diameter, and contain an aggregate of 93 square feet, and a heating surface of about 2,733 square feet. They are to be placed side by side forward of the engine, with an athwartship fireroom 8 ft. 6 ins. wide.

THE JAPANESE IRONCLAD NANIWA, CONSTRUCTED FROM THE DESIGNS OF MR. W. H. WHITE.

3,730-ton Twin Screw Steel Cruiser.—We reproduce here the cut of the Japanese ironclad which represents this vessel. Principal dimensions: Length between perpendiculars, 300 ft.; moulded breadth, 46 ft.; draft, forward, 17 ft. 6 in.; draft, aft, 19 ft. 6 in.; displacement, 3,730 tons.

The hull is constructed of steel throughout, with double bottom under engines and boilers, and a steel protective deck, two to three in. thick, complete from the ram to the stern-post, its edges 4 ft. below, and its crown 1 foot above the load-water-line. Ten complete transverse and several partial bulkheads divide the hold into many water-tight compartments. The space between the protective deck and the main deck is very minutely sub-divided into water-tight compartments occupied as coal-bunkers, storerooms, chain-lockers, and torpedo-rooms. The conning tower is protected by 2 in. of steel armor, and two ammunition hoists, 3 in. thick, lead direct from the shell-rooms to the loading-towers at the breech of the 10-in. guns. The free board is 15 ft. and the axis of the broadside guns are 18.2 ft. above the load-water-line.

The armament consists of two 10-in. 28-ton B. L. R. on central pivots, the hydraulic revolving and loading gear, and the recoil cylinders being protected by 2-in. steel screens and six 6-in. 4-ton B. L. R. on central pivot carriages, and spar-deck sponsons in broadside. The secondary battery includes two 6-pounder R. F., eight 1-in. Nordenfeldt, and four Gardner machine guns.

The torpedo battery consists of four launching tubes mounted above water in broadside.

The hydraulic power which actuates the gun mechanism is the same as that which operates the steering gear, and the 10-in. guns can be fired at point blank in a fore and aft direction without damage to the deck below.

The engines are of a horizontal (or slightly inclined) compound type, situated in two separate compartments, one abaft the other, actuating three-bladed twin-screws. I. H. P., under forced draft. 7,650; maximum trial speed, 18.9 knots, the mean of two runs over a 10-mile course at load draft.

There are six single-ended locomotive three-furnace boilers in two separate compartments with athwartship fire-rooms.

This ship has two military masts, no sail power except storm sails; her normal coal capacity is 450 tons, but 800 tons can be carried, which increases her draft 1 ft. 6 in.; her endurance at 10 knots is about 8,600 miles, and at 8 knots about 11,000 miles, and her complement is 325 officers and men.

THE *Yosemite*, John Roach's iron steam yacht, has been purchased by the Canadian Government as a cruiser for the use of the Fisheries Department. The price paid is $50,000. In 1880 the *Yosemite* was built at Roach's Chester yards, costing $140,000. Her purchaser made partial payments and ran her for a year or two, during which he fitted her out luxuriously. On one of his trips up the Hudson he ran into the steamboat *Charlotte Vanderbilt*. The *Yosemite* sliced the *Vanderbilt* in half, passing between her divided parts. This mishap sickened her owner and the yacht was returned to Mr. Roach. She has since then been an elephant on his hands. The yacht is a screw steamer of 482 tons; dimensions 186x24x12. She is propelled by a three-cylinder compound engine capable of driving her 17 knots an hour. She has a hurricane deck, and her internal fittings are of the most elaborate description.

PERSONAL ITEMS.

LIEUTENANT R. H. WILSON, 8th Inf., has recently joined at Fort Mojave, A. T., for duty.

ADJUTANT JAMES FORNANCE, 13th U. S. Inf., has left Santa Fe, N. M., on a month's leave.

GENERAL RUFUS SAXTON, U. S. A., has left Louisville, Ky., for the East, on a month's leave.

LIEUTENANT J. L. FAISON, 1st Inf., has arrived at Fort McDermit, Nev., for temporary duty.

CAPTAIN J. F. MOUNT, 3d U. S. Art., left Washington Barracks, early in the week on a short vacation.

ASSISTANT SURGEON EDWARD EVERTS, U. S. A., has returned to Arizona from a brief visit to San Francisco.

SURGEON J. R. GIBSON, U. S. A., who recently left St. Augustine, Fla., is at Eagle's Mere, Sullivan County, Pa.

COLONEL A. G. BRACKETT, 3d U. S. Cav., is at present enjoying a short leave at 603 E. 10th street, Des Moines, Iowa.

CAPTAIN R. A. WILLIAMS, 8th Cavalry, has taken command on promotion of Troop C, at Camp Maddox, near Alma, N. M.

LIEUTENANT E. T. BROWN, 5th U. S. Art., left Fort Wadsworth, N. Y. H., on Saturday last to be absent for three weeks.

MAJOR F. W. HESS, U. S. A., returned to Washington Barracks early in the week, from a short visit to his family at Deer Park, Md.

CAPTAIN D. A. IRWIN, U.S. Army, and Mrs. Irwin, of Zellwood, Fla., were in Philadelphia this week, and will remain East for some time.

LIEUTENANT W. C. RAFFERTY, 1st U. S. Art., on vacation from the College of Dahlonega, Ga., has been visiting friends in New York City.

CAPTAIN GEORGE MITCHELL, 2d U. S. Art., on leave from St. Augustine, is stopping with his family at the Mountain Top Hotel, near Afton, Va.

CAPTAIN J. ROCKWELL, Ordnance Corps, U. S. A., was a recent guest at the Merchants' Hotel, St. Paul, en route to his new station at Rock Island.

CAPTAIN G. B. RODNEY, 4th U. S. Artillery, was to leave Newport, R. I., the latter part of this week for Essex, Mass., to inspect Massachusetts militia.

GENERAL J. C. TIDBALL, U. S. A., was in Washington early in the week to confer with Lieutenant-Gen. Sheridan as to the new Artillery School details.

LIEUTENANT A. C. BLUNT, 5th U. S. Artillery, on leave from Fort Monroe, Va., is visiting at Hurleyville, Sullivan Co., N. Y., and thence goes to Staten Island.

COLONEL RICHARD LODOR, U. S. A., returned to Fort McHenry, Md.. this week, from La Fayette, Indiana, having completed his inspection of State troops.

COLONEL L. C. HUNT, 14th U. S. Infantry, who is much improved in health, has left California to resume command of his regiment at Vancouver Barracks.

LIEUTENANT M. M. MACOMB, 4th U. S. Artillery, will leave Fort Monroe, very soon, to take command of Battery M, 4th U. S. Artillery, at Fort Preble, Me.

LIEUTENANTS F. L. DODGE and O. L. Wieting, 23d U. S. Infantry, rejoined at Fort Wayne, Mich., early in the week, from a pleasant trip to Newport Barracks, Ky.

CAPTAIN C. A. WOODRUFF, U. S. A., General Gibbon's Chief Commissary of Subsistence, has taken temporary charge of the Judge Advocate's office, Dept. of the Columbia.

LIEUTENANT H. S. WHIPPLE, 10th U. S. Cavalry, son of General W. D. Whipple, U. S. A., has taken charge of Quartermaster and Commissary matters at Forte Verde, Arizona.

CAPTAIN H. J. HAYNSWORTH, of the Quartermaster's Department, U. S. A., a relative of ex-President Arthur, will shortly locate in Philadelphia for duty at the Clothing Depot there.

MRS. MACKLIN, wife of Lieut. Macklin, 11th Inf., and family, are visiting in Attica, Ind., but expect to return to Leavenworth the latter part of August, when the boys will resume their course in the high school.

LIEUTENANT A. G. TASSIN, 12th U. S. Infantry, who has been on special duty at Fort Monroe, Va., since September, 1882, in charge of rifle practice, relinquishes duty there and will join his company at Madison Barracks, Sackett's Harbor.

CAPTAIN C. H. INGALLS, U. S. A., a nephew of General Rufus Ingalls, U. S. A., who has been stationed at Ogden, Utah, since 1883, goes from there to Hot Springs, Ark., to take charge of Quartermaster matters at the Army and Navy Hospital.

A MAN calling himself Capt. Lindley, U. S. A., has been arrested at Champaign, Ill., on suspicion. It is claimed that he has been known as Capt. A. C. White, Prof. Olerick, Prof. H. S. White, and Prof. Lesquereaux, and that he has duped and defrauded scientists and others.

A DELHI, N. Y., despatch says: "A lady claiming to be Mrs. Lovantia L. Judson, widow of E. Z. C. Judson ('Ned Buntline'), is to contest his will, which left his property to the wife with whom he lived during the past sixteen years. She says she married Judson thirty-five years ago, and that he deserted her to enter the Army and afterwards refused to live with her."

COLONEL GAINES LAWSON, U. S. A., says the Chicago *Inter-Ocean*, "made the biggest string at all ranges. He wears a sharpshooter's badge, won three successive years at Fort Snelling. He is a man of powerful physique, and when he puts a rifle to his shoulder it is just as firmly fixed as if you braced it against a wall. The colonel will spend the interval until the encampment, Aug. 2, of the 2d Brigade, with his family at Deer Park, Md."

MAJOR W. C. MANNING, U. S. A., left Fort Mackinac, Mich., early this week on a short leave.

LIEUTENANT A. S. ROWAN, 15th Infantry, left Fort Pembina, D. T., this week on a month's leave.

LIEUTENANT J. E. SAWYER, 5th U. S. Artillery, left Governor's Island on Wednesday on a week's leave.

COLONEL CHAS. PAGE, surgeon U. S. A., has rejoined at Fort Leavenworth, Kas., from an extended leave.

LIEUTENANT FRED. MARSH, 1st U. S. Artillery, on leave from Fort Monroe, Va., is visiting friends in New York City.

MRS. COLONEL L. L. LANGDON and children are spending the summer at Asheville, among the mountains of North Carolina.

GENERAL R. H. JACKSON, U. S. A., returned to Governor's Island this week from his six weeks' tour at the State Camp at Peekskill, N. Y.

CAPTAIN JAMES JACKSON, 1st Cavalry, selected for a tour of recruiting service, will leave Fort Custer with his family for the East early in September.

CAPTAIN JAS. H. LORD, U. S. A., has taken charge of Quartermaster and Commissary matters at Governor's Island, and has taken up his residence there.

LIEUTENANT C. R. EDWARDS, 23d U. S. Infantry, was expected to complete business this week at Cleveland, O., and start to join his company at Fort Porter.

LIEUTENANT S. F. MASSEY, 5th U. S. Artillery, rejoined at the Artillery School, Fort Monroe, early in the week, from a visit to New York and Richfield Springs.

CAPTAIN C. C. HOOD, 24th U. S. Infantry, on recruiting service at Philadelphia, has changed the rendezvous from 2,001 Market street to No. 2 North 20th street.

LIEUTENANT W. W. KIMBALL, U. S. A., and several other well-known Americans are spending a portion of the summer at Scheveninger, near the Hague, on the European continent.

CAPTAIN D. B. WILSON, 25th Infantry, having relinquished the regimental adjutancy on promotion he will be succeeded in that position by Lieutenant George Andrews, of the 25th.

CAPTAIN J. L. CLEM, U. S. A., after a pleasant tour of duty at Fort McHenry, Md., which commenced in July, 1882, will take charge of the Q. M. D. at Ogden, Utah, early in September.

CAPTAIN GAINES LAWSON, 25th Infantry, has been selected by General Ruger to command the rifle camp at Fort Snelling during the rifle competitions of the Department of Dakota, soon to take place.

LIEUTENANT E. R. GILMAN, 5th U. S. Infantry, came to New York from Falls Church, Va., early in the week, and left David's Island on Tuesday for St. Paul with a batch of recruits for the 20th U. S. Infantry.

SURGEON PASSMORE MIDDLETON, U. S. A., arrived in New York from Fort Leavenworth early in the week, and went on to Philadelphia to visit friends there for a few weeks. His headquarters in Philadelphia are at the Lafayette House.

AN infant son of Geronimo died at Fort Marion, Fla., on the morning of July 31. The child was one of the prisoners of Chihuahua's band confined in the fort with his mother. The body was buried by approval of Colonel Langdon, commanding, on the "North Beach," beside the Indian "Jim," who died early in June.

THE *Pall Mall Gazette* hears that "an eminent firm of publishers in London are negotiating with Gens. Longstreet and Beauregard for the production of a military history of the American Civil War from the Southern point of view, and on lines not unlike those on which the late Gen. Grant constructed his now completed work."

GEN. AND MRS. VOGDES and Lieut. and Mrs. Chas. Vogdes left last week for Chicago and a month's visit in the West. Mrs. Vogdes will spend August and September at the Peninsular Hotel, Sea Bright, with Mr. and Mrs. Lieut. Sheldon Beard, of New York. After their trip West, Gen. and Mrs. Vogdes will join their daughter at Sea Bright.

A DESPATCH of July 27, from Galveston, Tex., says: With the near approach of the interstate drill and encampment Galveston is taking on new life. Col. M. M. Blunt, 16th U. S. Infantry, who was first solicited to act as commandant of the encampment, having declined, owing to private reasons, Gen. Thomas E. Rose, captain in that regiment, has been selected as commandant, with Lieut. George I. Putnam as adjutant.

"THE sudden death of Lieut. I. T. Webster, 1st U. S. Artillery, U. S. A.," says the Pasadena *Times*, "was a painful surprise to his friends and a terrible shock to his sister, Mrs. Jerome Baker. The latter was preparing to join her brother at the Presidio, having lost her husband here but a few weeks prior to this second bereavement. The deceased had invested in property here, and was a gentleman very highly regarded by those who had met him.

THE Omaha *Excelsior* of July 31 says:

Capt. Kingman, U. S. Engineers, has just returned from a trip to Fort Robinson and says the country up in Northern Nebraska is looking splendidly. At Fort Robinson everything is quiet. Lieut.-Col. Fletcher and Capt. Miller, 2d Infantry, have arrived and taken their houses.... Dr. and Mrs. Summers and Miss Summers returned Wednesday from an early summer visit East.... Miss Grace Chambers is visiting her uncle, Col. Chambers, 17th U. S. Infantry, Fort D. A. Russell, Cheyenne.

THE *Mineral Argus*, of July 22, has the following Fort Maginnis items:

Capt. and Mrs. Maize have gone to inspect the National Park.... Col. Mason, Department Inspector, is not expected before the middle of August.... A lieutenant of the Signal Corps is expected in a few days to inspect the Signal Department of this post.... Paymaster Whipple arrived Monday and paid the troops ... Miss Mamie Manly left on Tuesday for Lawrence, Kas., where she will resume her studies at the young ladies' seminary.... A rumor has been gently wafted through the garrison that one infantry company is to be ordered to Fort Poplar River, leaving Fort Maginnis a four company post.

GENERAL ANSON G. MCCOOK and bride are travelling in Europe.

CAPTAIN CATLEY, 2d Infantry, and Mrs. Catley, have reached Fort Omaha from the East.

CHAPLAIN M. C. BLAINE, U. S. A., has left Fort Spokane, Washington Ty., on a month's leave.

LIEUTENANT J. B. EATON, 3d U. S. Artillery, is spending the month of August at Asheville, N. C.

CAPTAIN S. P. JOCELYN, 21st U. S. Infantry, was a visitor at Fort Leavenworth, Kas., a few days ago.

LIEUTENANT A. D. ANDREWS, 5th U. S. Artillery, a graduate of this year, is visiting at Massena, N. Y.

MAJOR A. B. CAREY, paymaster U. S. A., lately arrived in San Francisco, has left again on a six weeks leave.

COLONEL N. A. M. DUDLEY, 1st Cavalry, was to leave Fort Custer, M. T., this week on a twenty days' leave.

COLONEL GEORGE MITCHELL, captain 2d Artillery, is passing the summer at the Mountain Top Hotel, near Afton, Va.

LIEUTENANT G. B. DAVIS, 5th Cavalry, U. S. A., returned to West Point, N. Y., this week from Vineyard Haven, Mass.

CAPTAIN CHAS. F. ROE, 11th U. S. Infantry, leaves Newark, N. J., this week for Elmira, Chemung County, New York.

CAPTAIN L. H. RUCKER, 9th Cav., was in Cheyenne this week, a witness on the trial of Lieut. J. F. McBlain, of that regiment.

MAJOR J. W. WHAM, paymaster U. S. A., and Capt. W. H. Vinal, 16th U. S. Infantry, were visitors to Washington this week.

GENERAL BENÉT, Chief of Ordnance, accompanied by Mrs. Benét, will sail for Europe on Saturday, to be gone probably until October.

COLONEL WM. E. MERRILL, Corps of Engineers, U. S. A., who has been quite ill with diptheria at his home in Newport, Ky., is improving.

LIEUTENANT E. D. DAVIS, 3d U. S. Artillery, left Washington Barracks this week on a visit to relatives at Fort Spring, Greenbrier County, W. Va.

COLONEL FLAGLER, Ordnance Department, U. S. Army, accompanied by some Iowa friends, has gone to the fishing grounds at Pocasset, Mass., for a few weeks' sport.

MRS. W. B. ELTONHEAD, of Philadelphia, accompanied by her daughter, arrived at Fort Bridger, Wyo., this week, on a visit to her son, Lieut. F. E. Eltonhead, 21st Inf.

LIEUTENANT WEBSTER, 2d Infantry, expects to leave Fort Omaha next week with his wife, having been detailed for duty at the University of the South, Sewanee, Tenn.

THE order detailing Capt. Henry J. Nowlan, 7th Cavalry, to witness the manœuvres of the French 10th and 18th Corps in September has been revoked at Capt. Nowlan's request.

A FINE obelisk has been erected at Lippehne in commemoration of the act of lieutenant—now Prince-Chancellor—Bismarck in saving at the risk of his own the life of a drowning fellow soldier.

MAJOR WM. F. TUCKER, Paymaster, U. S. Army, has reported for duty as Post Paymaster at Washington in place of Maj. Bates recently relieved. He is quartered for the present with his father-in-law, Gen. Logan.

COLONEL ALEX. CHAMBERS, 17th Infantry, who has assumed command of Fort D. A. Russell, is no stranger to Wyoming and its people, says the Cheyenne *Leader*. "He came here first in 1865 as chief of staff of Gen. Wheaton, and subsequently was stationed at Fort Fetterman. While residing there Col. and Mrs. Chambers adopted the orphan children of the late Major Burke, three little girls, whom they educated and reared to womanhood. Col. Chambers's recollections of his former life in Wyoming are only pleasant ones, and it is hoped that his future intercourse with our people will be as agreeable as the past has been, and that between his command, the officers and men of the 17th Infantry and the citizens of Cheyenne, there may be fostered a mutual desire to promote the interest and pleasure of each other."

THE San Francisco *News Letter* says: "Light Battery K, of the 1st, Major Haskin commanding, returned from its march Thursday, quite willing to take up another one in the same direction at the shortest possible notice. The other military gents are also at home again from their several camps, and all are busy preparing for the grand parade of next month, when the streets of 'Frisco will see such a one as they never saw before. General Sherman has been making the most of his spare time here before the crowd of his old comrades join him, and has been visiting in all directions. He formed one of the party at Monterey last Saturday, and was, as usual, treated to a warm welcome and the inevitable march whose sound must be one most familiar to his ears. He and Miss Sherman go to Portland in August en route home.

WE regret to learn that Mrs. Daingerfield Parker, wife of Major Parker, of the 9th Infantry, U. S. A., suffered a severe accident while walking near the Pueblo water works reservoirs, Fort Wingate, N. M. Her dress was accidentally caught in the wire fence which surrounds the reservoirs, and in attempting to free her dress her foot slipped and she fell forward, breaking one of the bones of her ankle, causing a rather serious fracture. Surgeon M. M. Rebert set the bones and the lady was taken to the Numa Hotel. With reference to the accident Major Parker writes us as follows: "Post surgeon at Wingate says bones not broken, but ligaments of (right) leg or ankle *are*, perhaps quite as serious a matter. Meanwhile, though suffering much pain and discomfort, she is made as comfortable as the attentions of the kind people here and those of equally kind friends of the 9th, who accompanied us, can make her. Her case excited universal sympathy with all, rank and file as well as commissioned officers. A sergeant of the 9th was one of the first to run to her assistance."

GENERAL E. A. CARR, U. S. A., and Mrs. Carr, are in Washington.

CAPTAIN P. H. ELLIS, 13th Infantry, has returned to St. Louis from sick leave, and is at the Southern Hotel.

LIEUTENANT JAMES BRENNAN, 17th Infantry, has taken charge of recruiting matters at Camp Medicine Butte, Wyo.

PAYMASTER W. F. TUCKER, U. S. A., arrived in Washington, August 4, and entered upon the duties of Post Paymaster, August 5.

GENERAL and Mrs. Duncan, with their daughter, Miss Lillie, left Washington this week for the mountains, to be absent August and September.

CAPTAIN S. R. STAFFORD, 15th U. S. Infantry, is reported to have been robbed of a valuable diamond pin recently, while bathing at Manhattan Beach.

GENERAL THOMAS WILSON, Chief Commissary at Fort Leavenworth, spent Sunday last in Omaha looking after his two grandchildren of whom he is justly proud.

THE engagement is announced of Lt. W. R. Abercrombie, 2d Infantry, and Miss Kimball, daughter of Col. A. S. Kimball, Quartermaster, U. S. A. The wedding is to occur in September.

CAPTAIN HOWE, 17th Infantry, accompanied by Mrs. Howe, is visiting his daughter, Mrs. Ingalls, at Ogden, Utah. Captain and Mrs. Ingalls expect to leave Ogden next week for their new station at the Hot Springs.

SURGEON J. R. GIBSON, U. S. A., left St. Francis Barracks, St. Augustine, Monday morning, Aug. 2, at the expiration of which he goes to the Department of Missouri. His family went with him. They go first to Philadelphia, thence to spend the summer at Lakeside, Eagle Mere, Sullivan Co., Pa.

MISS ADELE GARESCHE, the youngest daughter of the late General Julius P. Garesche, of the U. S. A., took the white veil in the Monastery of the Visitation, St. Louis, August 2. Her elder sister, Octavie, entered the Carmelite Convent of the same city on the 1st of last October, and on the 15th of last June received the white veil.

THE injunction suit of Webster and Co., the publishers of the Personal Memoirs of General Grant, against John Wanamaker, to prevent the latter from disposing of copies of the book, came up in the U. S. Circuit Court at Philadelphia on Tuesday. After much discussion by opposing counsel the Court took the papers and reserved its decision.

THE following officers were registered at the office of the Adjutant-General this week: Col. J. C. Tidball, 1st Art.; Capt. D. A. Irwin, retired; 2d Lieut. Robt. C. Williams, 15th Inf.; Ad. 2d Lieut. Thos. B. Mott, 1st Art.; Col. E. A. Carr, 6th Cav.; Major G. L. Gillespie, Engrs.; Lt.-Col. W. P. Craighill, Engrs.; Major J. W. Wham, Pay Dept.; Capt. J. C. Clifford, Ord. Dept.

A WASHINGTON correspondent reports that Secretary Endicott has a singular experience for a Cabinet officer. He visited the House to secure action on a resolution for the acceptance of the Grant gifts. He walked all around the chamber without being recognized by a single member, and was just about leaving when Mr. Randall recognized and engaged him in conversation.

THE young Duc de Rochefoucauld, who is an officer in the French Army, and has only his pay to support him, is still much attached to a young American lady, who is also in straitened circumstances. He is anxious to marry her, but his mother is opposed to the match. He himself was formerly resigned to what seemed inevitable, and was prepared to marry a fortune. He has remained loyal, nevertheless, and there is a possibility that the young American will become a duchess.

THE New York Board of Aldermen, accompanied by Gen. W. D. Whipple, U. S. A., went to Rockaway on Wednesday to present to Mrs. Hancock an album containing engrossed resolutions on the death of her husband, Maj. Gen. W. S. Hancock, U. S. A. A description of the album has already appeared in the JOURNAL. The party on arrival at the Seaside Hotel were received by Mr. Oliver Russell, brother of Mrs. Hancock who was not well enough to undergo the fatigue of the ceremony. Gen. Whipple was requested by Mrs. Hancock to receive the testimonial. There were present Mrs. Whitney, Mrs. Bouvier and Miss Bertha Bouvier, Mrs. Hancock's cousins, and the General's grandchildren, Ada Hancock, Myra Hancock and Gwynn Hancock. Addresses were made by President Nooney and Gen. Whipple, who said that Mrs. Hancock had requested him, as a staff officer under Gen. Hancock, to convey to the committee her regret that she was not able to be present. In her behalf he thanked the Aldermen for the expression of their appreciation of the character of her husband, and after the ceremony Mr. Russell entertained the visitors at dinner.

COMMANDER C. F. GOODRICH, U. S. N., was in Newport, R. I., this week.

COMMODORE D. B. HARMONY and Mrs. Harmony are spending the month of August at Saratoga.

COLONEL JAMES FORNEY of the Marine Corps, left Norfolk, Va., early in the week on a month's leave.

LIEUTENANT COMMANDER C. H. STOCKTON, U.S.N., has taken his family to Wilmington, Del., where they will spend the summer.

PAYMASTER J. P. LOOMIS, U. S. N., registered at the Union Square Hotel, New York, on Wednesday, and Paymr. I. G. Boggs, U. S. N., at the Albemarle Hotel.

CIVIL ENGINEER F. C. PRINDLE, Commodore P. C. Johnson, Paymaster John R. Carmody, Commander S. H. Baker, Commander F. J. Higginson, and Pay Inspector George Cochran registered at the Navy Department during the week.

LIEUTENANT DOWNS L. WILSON, U. S. Navy, and wife, are at the Rockbridge Baths in Virginia. His health was impaired by too persistent application to duty. Mr. and Mrs. Wilson are accompanied by Miss Grace Moffitt, of Georgetown.

REAR-ADMIRAL ROE and wife are at the Bellevue on the New Jersey coast.

COMMODORE W. K. MAYO, U. S. N., and Mrs. Mayo are at the Kensington Hotel, Saratoga.

MEDICAL DIRECTOR T. J. TAYLOR, U. S. N., will leave Norfolk next week on a month's leave.

MAJOR A. S. NICHOLSON, of the Marine Corps, has gone to Poland Springs on a month's vacation.

CHIEF ENGINEER H. H. STEWART, U. S. N., was a guest this week at the Washington Hotel, Philadelphia.

PAYMASTER G. E. HENDEE, U. S. N., has joined the receiving ship *Franklin* at the Norfolk Navy-yard.

LIEUTENANT-COMMANDER THOS. PERRY, U. S. N., was at the Riggs House, Washington, D. C., this week.

COMMANDER BONAPARTE WYSE, French Navy, was a guest at the Hotel Brunswick, New York, early in the week.

REAR ADMIRAL E. T. NICHOLS, U. S. N., was in New York this week with quarters at the Albemarle Hotel.

COMMANDER F. J. HIGGINSON, U. S. N., arrived in Washington this week from China, and is at the Riggs House.

MRS. H. W. FITCH, wife of Chief Engineer Fitch, U. S. N., left Philadelphia, Pa., this week for a visit to Ocean Beach, N. J.

LIEUTENANT COMMANDER E. W. WATSON, U. S. N., and family, are enjoying themselves for a month in the mountains of Virginia.

MRS. WHITNEY, wife of the Secretary of the Navy, has been visiting Mrs. Hancock, widow of Maj.-Gen. Hancock, at Far Rockaway, L. I.

REAR ADMIRAL C. H. BALDWIN, U. S. N., finding the dry air of Saratoga to agree with him, will remain there for some time to come.

CHIEF ENGINEER H. L. SNYDER, U. S. N., was to leave Washington this week for Pottsville, Pa., to enjoy a month's vacation with his family.

COMMANDER J. H. SANDS, U. S. N., who relinquishes duty at the Washington Navy-yard early in September, will then go abroad for a year.

COMMODORE D. L. BRAINE, U. S. N., who has lately been detailed to command the South Atlantic Station, is at the Bellevue, near Seabright, N. J., with his family.

COMMANDER S. H. BAKER, U. S. N., arrived in Washington early in the week from Concordville, Pa., and reported for duty at the Navy Department on Monday.

WE are glad to note that Lieut.-Comdr. E. B. Thomas, U. S. N., who has been a patient in the Naval Hospital at Norfolk, Va., for two months' past, has left the hospital.

CHIEF ENGINEER D. P. MCCARTNEY, U. S. N., goes to Saratoga on leave of absence from the Washington Navy-yard. He left August 4, and will be joined shortly after that date by Lieut. William M. Irwin, U. S. N.

PAY DIRECTOR T. H. LOOKER says that the statement in a Sunday paper that he and family are to leave Aug. 15 for a month at Atlantic City, is incorrect. He wishes it were true, but it unfortunately isn't.—*Critic.*

P. A. ENGINEER J. C. KAFER, U. S. N., having been detached from the Bureau of Steam Engineering, and granted two months' leave of absence, has joined his wife in the Adirondack region, where they will remain until his health is restored.

LIEUTENANT F. A. WILNER, U. S. N., was July 11, 1886, still on duty on board the U. S. S. *Alert*, the leave of absence granted him not having been accepted, owing to the Korean Government not being ready to commence the work for which he was engaged.

CHIEF ENGINEER CHARLES E. DE VALIN, U. S. N., has been ordered to relieve Chief Engineer Baker at the Washington Navy Yard, on August 10. Mr. De Valin has invested in some real estate in the district, and intends to cast his lot among the Washingtonians.

CHIEF ENGINEER CHARLES H. BAKER, U. S. N., will be detached from the Washington Navy Yard on the 10th, and has been ordered to assume the duties of Fleet Engineer of the South Atlantic Station. His family will remain in Washington during his absence, having rented a house in Hillyer Place.

COMMANDER JAMES H. SANDS, U. S. N., and family, will soon leave the United States for an extended sojourn abroad, probably Switzerland will be their objective point. Commander Sands has received a year's leave of absence, and has been detached from duty in the Navigation Store at the Navy Yard, Washington, on August 31.

PASSED ASSISTANT ENGINEER JOHN D. FORD, U. S. Navy, of the Baltimore Manual Training School, is the author of an interesting report which appears in the annual catalogue for 1886. He gives an account of the mechanical facilities of the school, which seem to be extensive, and of the work accomplished during the past year.

ASSISTANT ENGINEER EDWARD O'C. ACKER, U. S. N., recently detached from duty in the draughting room of the Bureau of Steam Engineering, has been ordered to duty in the Vanderbilt University, Tenn., graduated from the Naval Academy, June 10, 1879, and received his present commission, June 10, 1881. Mr. Acker has made special study of chemistry, particularly in its application to metallurgy.

P. A. ENGINEER WM. B. BOGGS, U. S. N., whose recent death at Guayaquil, Ecuador, so shocked his many friends in the Navy, was, it appears, convalescent from the fever that attacked him while en route from Panama, and on the day of his death he took a short walk from the hotel where he was stopping. Through some misadventure or over-exertion he experienced a relapse and died a few hours after the return to his hotel.

RECENT DEATHS.

MAJOR JOSEPH H. WHITTLESEY, U. S. Army, retired, died at Seattle, Wash. Ty., Aug 2. He was a native of New York, entered the Military Academy in 1840, was graduated in 1844, second of his class, and promoted brevet 2d Lieutenant 2d Dragoons, and in 1845 was promoted 2d Lieutenant 1st Dragoons. He served on frontier duty in Louisiana, Kansas, and Texas during 1845-6 and in the Mexican War from 1846 to 1848, receiving the brevet of 1st Lieutenant for gallant and meritorious conduct in the battle of Buena Vista. In 1847 he was promoted 1st Lieutenant, Captain in 1854, and Major, 5th Cavalry, November 12, 1861. During the war he served in the command of a regiment in the defence of Washington, the Virginia Peninsula campaign, and was engaged in the siege of Yorktown and the battle of Williamsburg. He was captured at Winchester, Va., May 25, 1862, and exchanged September 30 of the same year. Afterward he was engaged in recruiting and garrison service, and was retired from active service November 30, 1863, for disability resulting from long and faithful service and from disease and exposure in the line of duty. During 1867 and 1868 he served on a tour of inspection of the educational establishments of the United States, with a view to introducing military instruction into colleges. From 1868 to February, 1870, he served as Professor of Military Science at Cornell University. He was a brave and meritorious officer, and his death will be universally regretted.

A DESPATCH from Fort Assiniboine, Montana, referring to the death there July 24, of Lieutenant W. W. Low, 20th U. S. Infantry, reported in last week's JOURNAL, says: "It was very sudden. He was last seen alive about 1 A. M., July 24, and was apparently in usual health. At about 8 A. M. he was found sitting in a chair in his room in the officers' quarters, dead. It is not definitely known to what cause his death is attributed, and opinion is divided between heart disease and an over dose of a poisonous drug taken as a medicine. His father in Chicago was advised by telegraph of the sad fate of his son."

MRS. A. L. HENRY, widow of Major W. S. Henry, 3d U. S. Infantry, died at Bay Shore, July 29, and the funeral services took place at West Point, July 31. Her husband, who died in 1851, was a gallant soldier of the Mexican War. Mrs. Henry was a woman of fine presence, and much admired in early days for her beauty and mental accomplishments. She married Lieut. Henry, of the 3d Infantry, in 1838, and accompanied the regiment in Florida, Texas and New Mexico. An Army lady's residence in those days was a tent, or perchance a log house. In Texas, by an overflow of the river, the command lost everything, and only escaped with their lives. Mrs. Henry, being an invalid, was carried out in a chair by soldiers. The history of the deceased would be that of the social life of the old Army, and would fill pages of narratives. Mrs. Henry was a granddaughter of D. D. Tompkins, Governor of New York and Vice President of the United States, and of Swinton Thompson, Justice of the U. S. Supreme Court and Secretary of the Navy. She was buried at West Point, where lie her husband, her son-in-law and two daughters, one being the widow of General French, an Army officer.

AT a meeting of the members of Battery G, 2d Artillery, the following preamble and resolutions were passed:

Whereas, It has pleased the Almighty in His divine providence to remove from our midst our comrade and fellow soldier, N. W. Jackson,

Resolved, That by his sad and untimely death the battery has lost a true and brave soldier, a kind-hearted, generous, and upright man; his relatives a loving son and brother.

Resolved, That we the members of his late battery will ever cherish his memory as one who by his many acts of kindness and honorable character endeared himself to us.

Resolved, That the members of Battery G, 2d Artillery, extend to the W. C. T. U. and I. O. of G. T., of which the deceased was a member, our heartfelt thanks and appreciation for their participation in the funeral ceremonies.

Be it further resolved, That a copy of these resolutions be sent to his family and to the ARMY AND NAVY JOURNAL.

MICHAEL YOUNG, 1st Sergt. Bat. G, 2d Art., President.
WM. M. GIRICH, Pvt. Bat. G, 2d Art., Secretary.

THEODORE R. SITGREAVES, who died at Easton, Pa., July 31, aged 80, was a brother of Col. Lorenzo Sitgreaves, U. S. Army, retired. He was a very charitable man, a liberal contributor to Trinity Episcopal Church, which his father founded, and recently donated to the Children's Aid Society, of Easton, a valuable site of land for a permanent home."

WE regret to learn of the death, at Fort Snelling, Minn., July 26, of the infant son of Lieutenant Williston Fish, 4th U. S. Artillery, aged ten months. The funeral took place on Tuesday, and was generally attended by the officers and ladies of the garrison. The services were conducted by Chaplain Geo. G. Mullins, 25th Infantry.

A MEMORIAL service for the late Gen. James H. Van Alen was held at Trinity Church, Newport, R. I., Aug. 6. There was a large attendance of relatives and friends.

MR. PETER R. HAWLEY, a brother of Major William Hawley, U. S. Army, retired, died at San Jose, Cal., July 21.

THE Navy Department was informed on Thursday that Lieut. E. P. McClellan shot and killed himself at his father's residence in Darien, Ct., on that morning. He was a native of Maine; entered the Naval Academy Sept. 24, 1863, and was graduated in 1867; promoted ensign in 1868, master in 1870, and lieutenant March 21, 1871. His last service was on board the *Galena*. He was in his 40th year.

THE ARMY.

NOMINATIONS TO THE SENATE.

August 2, 1886.

3d Regiment of Infantry—Major Horace Jewett, of the 16th Infantry, to be Lieut. Col., Aug. 1, 1886, vice Gibson, promoted to the 5th Infantry.

5th Regiment of Infantry—Lieut. Col. George Gibson, of the 3d Infantry, to be Colonel, Aug. 1, 1886, vice Wilkins, retired from active service.

10th Regiment of Infantry—1st Lieut. Walter T. Duggan to be Captain, Aug. 1, 1886, vice Parke, promoted to the 16th Infantry. 2d Lieut. Charles J. T. Clark to be 1st Lieut., Aug. 1, 1886, vice Duggan, promoted.

16th Regiment of Infantry—Captain John B. Parke, of the 10th Infantry, to be Major, Aug. 1, 1886, vice Jewett, promoted to the 3d Infantry.

G. O. 53, H. Q. A., Aug. 5, 1886.

Publishes the act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes.

Approved July 31, 1886.

WAR DEPARTMENT, A. G. O., July 29, 1886.

Publishes the proclamation of the President of the U. S., dated July 26, 1886, directing that the military reservation of Fort Ellis, Montana Territory, be placed under the control of the Secretary of the Interior for disposition, as provided for in the act of July 5, 1884, it having become useless for military purposes.

G. O. 9, DIV. OF THE ATLANTIC, July 31, 1886.

The annual competitions for places on the teams of the Department of the East and Division of the Atlantic for this year will take place at Fort Niagara, N. Y., during the month of September.

Post commanders will order the competitors to report to the commanding officer at Fort Niagara, N. Y., on Aug. 28.

Post commanders will report immediately the names of enlisted men selected; also the names of such officers and non-commissioned staff officers of their posts as they can recommend for the purpose under the provisions of par. 592, *b* and *c*.

The commanding officer at Fort Niagara, N. Y., will provide for the competitors and the officers and enlisted men on duty in connection with the competitions.

The "distinguished marksmen," not excluded by par. 605, Blunt's "Rifle and Carbine Firing," who may report in writing to these headquarters that they so desire, will be selected to shoot at the same time and place with competitors. The two competitors or "distinguished marksmen" who make the highest aggregate scores for the four days of the Division competition will be selected as members of the Army team, The third highest score will determine the alternate.

By command of Major General Schofield:
WILLIAM D. WHIPPLE, Asst. Adjt.-Gen.

CIR. 6, DEPT. OF DAKOTA, July 21, 1886.

Publishes extracts, taken from the reports of Target Practice of Troops serving in the Dept. of Dakota, for June, 1886.

[The record shows that no less than 208 sharpshooters qualified during the month. The 3d Infantry leads the way with 140 sharpshooters.]

STAFF CORPS AND DEPARTMENTS.

Judge Advocate General's Department.

Capt. J. G. Ballance, A. J. A., will proceed to Fort Randall, Dakota, and Poplar River, Montana, on public business (S. O. 97, July 31, D. Texas).

Quartermasters and Subsistence Departments.

Capt. John L. Clem, A. Q. M., Fort McHenry, Md., is relieved from duty in the Div. of the Atlantic (S. O. 98, July 31, Div. Atlantic).

Com. Sergt. James Lehane will report to the C. O., Fort Clark, Tex., to relieve Com. Sergt. Dennis W. Carroll, who will proceed to Fort Apache, Ariz., to relieve Com. Sergt. Joseph Van Castel, who will proceed to Fort Gaston, Cal., to relieve Com. Sergeant Wm. Kenkle, who will proceed to West Point, N. Y., to relieve Com. Sergt. Wm. T. Sheehan. Com. Sergeant Sheehan will proceed to Fort Sill, I. T., to relieve Com. Sergt. John Buchanan, who will proceed to Fort Riley, Kas., to relieve Com. Sergt. Edward Whiting, who will proceed to Fort Yates, D. T., to relieve Com. Sergt. Chas. A. Fagan, who will proceed to Fort Niagara, N. Y., to relieve Com. Sergt. Chas. Raab. Com. Sergt. Raab will proceed to Fort Shaw, M. T., to relieve Com. Sergt. Garrett Farley, who will proceed to San Carlos, Ariz., to relieve Com. Sergt. Arthur J. Judd, who will proceed to Fort Verde, Ariz. Ty., for duty. Com. Sergeant George M. Berkel will proceed to Fort Bowie, Ariz., to relieve Com. Sergt. Peter Heck, who will proceed Angel Island, Cal., for duty (S. O., Aug. 3, H. Q. A.)

Leave of Capt. Fred F. Whitehead, C. of S., extended six months for disability (S. O., Aug. 5, H. Q. A.)

Pay Department.

Leave for one month is granted Major DeWitt C. Poole, Paymr., Vancouver Barracks (S. O. 126, July 20, D. Columbia).

Lieut. Col. Rodney Smith, Chief Paymr., will proceed to Fort Klamath and pay Troop M, 2d Cav. (S. O. 126, July 20, D. Columbia.)

Major James P. Canby, Paymr., Fort Cœur d'Alene, will proceed to the vicinity of Eloika Lake, W. T., and pay Troop L, 2d Cav. (S. O. 128, July 23, D. Columbia).

Col. Daniel McClure, A. P. M. G., U. S. Army, will proceed to West Point, N. Y., on public business relating to the pay department (S. O. 99, Aug. 2, Div. Atlantic).

Leave for twenty-five days, to take effect July 28, is granted Major C. I. Wilson, Paymr., Omaha, Neb. (S. O. 91, July 26, D. Platte.)

Leave for one month, with permission to apply for an extension of twenty days, is granted Major Asa B. Carey, Paymr. (S. O. 63, July 26, D. California.)

Medical Department.

The following changes in the stations and duties of officers of the Med. Dept. are ordered: Major Edwin Bentley, Surg., will be relieved from duty in the Dept. of Texas, and will proceed to Little Rock, Ark., and on his arrival there report by letter to the comdg. gen. Dept. of the East for assignment to duty. Capt. Daniel M. Appel, Asst. Surg., will be relieved from duty in the Dept. of the East, and will report in person to the Comdg. Gen., Dept. of Texas, for assignment to duty (S. O., Aug. 4, H. Q. A.)

Leave for one month, with permission to apply for an extension of one month, is granted Major M. K. Taylor, Surgeon (S. O. 77, July 24, Dept. Mo.)

Asst. Surg. Edward Evarts will accompany Co. F, 1st Int., to San Francisco, Cal., as medical officer (F O. 71, July 8, D. Ariz.)

In accordance with par. 12, S. O. 168, A. G. O., Maj. Passmore Middleton, Surg., is relieved from duty in this Dept. (S. O. 78, July 26, Dept. Mo.)

Leave until Sept. 10 is granted Major Passmore Middleton, Surg. (S. O. 100, Aug. 3, Div. Atlantic.)

A furlough for three months is granted Hospital Steward E. P. Harrison, Fort Winfield Scott, Cal. (S. O. 57, July 22, Div. Pacific.)

The following changes in the stations of hospital stewards will be made: Hospital Steward Albert C. Beals, from duty at Rock Island Arsenal, and report by letter to the comdg. gen. Dept. of the East for assignment to duty. Hospital Steward Rudolph Werner, from duty in the Dept. of Texas, and will proceed to Jackson Barracks, La. Hospital Steward Wm. Bethon, from duty in the Dept. of Texas, and will report to the comdg. gen. Dept. of Dakota for assignment to duty. Hospital Steward Charles H. Fearn, from duty in the Dept. of Arizona, and will report to the comdg. gen. Dept. of Texas for assignment to duty. Hospital Steward Wm. Bock, from duty in the Dept. of the Columbia, and will report to the comdg. genl. Dept. of California for assignment to duty. The following hospital stewards will be relieved from duty in the Department of the East, and will report to the comdg. gen. of the department opposite their names for assignment to duty: George Pries, Dept. of the Missouri. George Dieffenbach, Dept. of the Missouri. Charles Gomes, Dept. of Arizona. The following named hospital stewards will be relieved from duty in the Dept. of Dakota, and will report to the comdg. gen. of the dept. opposite their names for assignment to duty: Herman Wilkendorf, Dept. of the Platte. Charles Parker, Dept. of the Missouri. The following hospital stewards will be relieved from duty in the Dept. of the Missouri, and will report to the comdg. gen. as set opposite their names for assignment to duty: Wm. Torrens to the comdg. officer Rock Island Arsenal. Thomas J. Burke, Dept. of California. Wm. F. Lambertson, Dept. of the East. Wm. Edwards, Dept. of the East (S. O., Aug. 3, H. Q. A.)

The C. O., Fort Buford, D. T., will grant a furlough for two months to 2d Class Hospital Steward Henry Warner, private, Co. E, 13th Inf., with permission to go to New York City, N. Y., to take effect about Sept. 20 (S. O. 72, July 30, D. D.)

Hospital Stewart Chas. F. Materne will proceed to Fort Abraham Lincoln, D. T., and there await further orders (S. O. 72, July 30, D. D.)

Engineers and Ordnance Department.

Lieut. Col. Wm. P. Craighill, C. E., will proceed to Annapolis, Md., on duty connected with works under his charge (S. O. 106, Aug. 4, C. E.)

Lieut. Col. John W. Barlow, C. E., will proceed to Smith's Shoals, Ky., and Nashville, Tenn., on duty connected with works under his charge (S. O. 106, Aug. 4, C. E.)

Major George L. Gillespie, C. E., will proceed to Rockport and Newburyport Harbor, Mass., on duty connected with works under his charge (S. O. 105, Aug. 2, C. E.)

Capt. James C. Post, C. E., will proceed to Beattyville, Ky., on duty connected with works under his charge (S. O. 105, Aug. 2, C. E.)

Capt. Carl F. Palfrey, C. E., will proceed to Buffalo and Charlotte, N. Y., on duty connected with works under his charge (S. O. 105, Aug. 2, C. E.)

Major Charles J. Allen, C. E., will proceed to Pine River, Minn., on duty connected with works under his charge (S. O. 104, July 30, C. E.)

Capt. Wm. T. Rossell, C. E., will proceed to Wilson's Point, La., on duty connected with works under his charge (S. O. 104, July 30, C. E.)

Ord. Sergt. Alexander Jamieson having been retired, the C. O., Fort Canby, will detail a non-commissioned officer to relieve him of his duties at Fort Stevens (S. O. 127, July 21, D. Columbia.)

1st Lieut. Wm. Metcalf, O. D., will proceed to Wilmington, Del., on public business connected with the manufacture of powder for the Ord. Dept. (S. O., July 31, H. Q. A.)

Capt. Joseph C. Clifford, O. D., will repair to Washington on public business (S. O., Aug. 2, H. Q. A.)

Capt. Joseph C. Clifford, Ord. Dept., will proceed to Waterbury, Conn., on public business connected with the supply of material for small arm cartridges for the O. D. (S. O., Aug. 3, H. Q. A.)

The following changes of stations of officers of the O. D. are ordered to take effect Aug. 28: Major Clifton Comly, from the Military Academy, to the command of the Indianapolis Arsenal. Capt. John A. Kress, from the command of the Indianapolis Arsenal, to the command of the St. Louis Powder Depot, Jefferson Barracks. Major John B. McGinness, from the command of the St. Louis Powder Depot, to duty at the Rock Island Arsenal. Capt. John G. Butler, from the Rock Island Arsenal, to the National Armory, Springfield, Mass. Capt. F. Heath, Nat'l Armory, Sprinfiield, Mass., to the Watervliet Arsenal, West Troy. 1st Lieut. Lawrence L. Bruff, from the Military Academy, to duty at West Point Foundry, Cold Spring (S. O., Aug. 3, H. Q. A.)

The C. O., Fort Randall, D. T., will direct Ord. Sergt. E. C. Lickiss to report in person, Aug. 21, to the C. O. of the Dept. Rifle Camp at Fort Snelling, Minn., as a competitor for a place on the Dept. Rifle Team (S. O. 72, July 30, D. Dak.)

Chaplains.

Leave for one month, to take effect July 26, is granted Post Chaplain Malnor C. Blaine, Fort Spokane (S. O. 124, July 17, D. Columbia).

The leave for seven days granted Post Chaplain Wm. T. McAdam, Fort Omaha, Neb., extended fourteen days, is further extended nine days (S. O. 92, July 27, D. Platte).

Leave for twenty days is granted Post Chaplain George D. Crocker (S. O., Aug. 3, H. Q. A.)

Signal Corps.

2d Lieut. James Mitchell, S. C., now on duty at Fort Myer, Va., will report in person to the Chief Signal Officer for duty in Washington, D. C. (S. O., Aug. 4, H. Q. A.)

A despatch from Cottage City, says: Sergt. Gustave Liebmann, of the Signal Service, who is reported to have disappeared, has left the signal office in a mixed state. It has been known that Liebmann was living a wild life here and was intoxicated most of the time, but, for the sake of his family, it has been kept quiet. He disappeared about the same time with a man calling himself Lieutenant J. Freemont, of New York, who left the Sea View House with a large hotel bill unpaid.

THE LINE.

Changes of Stations of Troops Ordered.

As reported to the Adjutant-General's Office during the week ending July 31, 1886:

Troop A, 6th Cav., to Fort Bayard, N. M.
Troop I, 6th Cav., to Fort Wingate, N. M.
Co. K, 9th Inf., to Fort Verde, Ariz.

The Stations of Companies not mentioned here will be found by reference to last number of the JOURNAL.

1st Cavalry, Colonel N. A. M. Dudley.

Hdqrs., **B, D, G, K,** and **M,** Ft. Custer, Mont.; **A, C,** and **F,** Ft. Maginnis, Mont.; **I,** Ft. Leavenworth, Kas.; **E,** Ft. Ellis, Mont. **H** and **L,** Ft. Assiniboine, Mont.

Leave for twenty days is granted Col. Nathan A. M. Dudley, Fort Custer, M. T. (S. O. 71, July 26, D. Dak.)

2d Lieut. Daniel L. Tate will report, Aug. 19, for duty in connection with the Dept. Rifle Competition (S. O. 71, July 26, D. Dak.)

2nd Cavalry, Colonel Nelson B. Sweitzer.

Hdqrs., **B, E, F, G,** and **I,** Ft. Walla Walla, Wash. T.; **A** and **K,** Ft. McDowell, Ariz.; **C,** Ft. Bidwell, Cal.; **D,** Boise Barracks, Idaho; **H,** Ft. Spokane, Wash. T.; **L,** Ft. Cœur d'Alene, Idaho; **M,** Ft. Klamath, Ore.

Leave for twenty days is granted Col. Nelson B. Sweitzer, Fort Walla Walla (S. O. 128, July 23, D. Columbia.)

3rd Cavalry, Colonel Albert G. Brackett.

Hdqrs., **C, F, M,** Ft. Davis, Tex.; **A,** Ft. Concho, Tex.; **G,** Camp at Eagle Pass, Tex.; **B,** Ft. Leavenworth, Kas.; **E,** Camp Rice, Tex.; **L,** Camp Pena Colorado, Tex.; **D** and **H,** Ft. Sill, Ind. T.; **I** and **K,** Ft. Elliott, Tex.

Capt. Gerald Russell is detailed member of the G. C.-M. at Fort Elliott, Tex. (S. O. 79, July 28, Dept. M.)

The leave granted Col. Albert G. Brackett is extended two months (S. O., July 31, H. Q. A.)

4th Cavalry, Colonel William B. Royall.

Hdqrs., **B, D, E, F, H,** and **K,** Ft. Huachuca, Ariz.; **A** and **M,** Ft. Lowell, Ariz.; **C, G,** and **I,** Ft. Bowie, Ariz.; **L,** Ft. Leavenworth, Kas.

Capt. T. J. Wint is detailed to take charge of the Dept. of Missouri Rifle Competition for the current year. He will report at these Headquarters on Aug. 10 (S. O. 80, July 30, Dept. M.)

1st Lieut. D. N. McDonald, now at Fort Bowie, A. T., will proceed to Fort Lowell, A. T., on public business connected with the transfer of his troop (M,) to that post. Upon completion of this duty Lieut. McDonald will return to Fort Bowie (F. O. 73, July 12, D. Ariz.)

5th Cavalry, Colonel Wesley Merritt.

Hdqrs., **D, E, H,** and **L,** Ft. Riley, Kas.; **A, F, I,** and **M,** Ft. Supply, Ind. T.; **B, C, G,** and **K,** Ft. Reno, Ind. T.

Leave for one month, to take effect Aug. 19, is granted 2d Lieut. G. W. Read (S. O. 78, July 26, Dept. M.)

A furlough for six months is granted Sergt. Chas. Kennedy, Troop B (S. O. 112, July 28, Div. M.)

6th Cavalry, Colonel Eugene A. Carr.

Hdqrs., **A, C, G,** and **L,** Ft. Bayard, N. M.; **I** and **K,** Ft. Wingate, N. M.; **B** and **F,** Ft. Lewis, Colo.; **D, E,** and **H,** Ft. Stanton, N. M.; **M,** Ft. Leavenworth, Kas.

Leave for one month is granted Capt. Gilbert E. Overton, recruiting officer (S. O., Aug. 3, H. Q. A.)

7th Cavalry, Colonel James W. Forsyth.

Hdqrs. **A, C, E, H, K,** and **M,** Ft. Meade, Dak.; **B** and **D,** Ft. Yates, Dak.; **F** and **L,** Ft. Buford, Dak.; **G,** Ft. Keogh, Mont.; **I,** Ft. Totten, Dak.

So much of S. O. 163, July 16, as relates to Capt. Henry J. Nowlan, is revoked (S. O., Aug. 3, H. Q. A.)

2d Lieut. George H. Cameron will report, Aug. 19, for duty in connection with the Dept. Rifle Competition (S. O. 71, July 26, D. Dak.)

The C. O. Fort Meade, D. T., will grant a furlough for three months to Sergt. Michael P. Cronin, Troop H (S. O. 71, July 26, D. Dak.)

8th Cavalry, Colonel Elmer Otis.

20th Infantry, Colonel Elwell S. Otis.

Hdqrs., A, B, C, E, F, H, I, and K, Ft. Assiniboine, M. T.; D and G, Ft. Maginnis, M. T.

2d Lieut. John F. Morrison will report, Aug. 19, for duty in connection with the Dept. Rifle Competition (S. O. 71, July 26, D. Dak.)

HEADQUARTERS TWENTIETH INFANTRY,
FORT ASSINNIBOINE, M. T., July 26, 1886.

Orders No. 32.

The Commanding Officer is called upon to announce the death of 1st Lieut. William H. Low, of the regiment, which occurred at this post on the morning of the 24th instant.

After a partial classical course at Williams College, he entered the Military Academy from which he was graduated in 1872, and joined the regiment in October of that year. During almost fourteen years of nearly continuous service therein he had by his soldierly bearing and qualities, by his keen intellect, continuously manifesting itself in kindly pleasantries or sparkling wit, by his generous impulses, courteous demeanor and thorough good nature, endeared himself to his comrades in an unusual degree. Faithful, just and kind to those under his command, obedient to, and supporting those placed in authority over him with cheerful alacrity, he was respected and esteemed by all associated with him in military duty.

Lieut. Low was a student of military science, and also of general history and English literature. He possessed an active nervous temperament and sought opportunities in which to display more fully his mental capacities. He was selected to organize and command a light battery of artillery in the Sioux campaign of 1876, which he did with great credit. He volunteered for and entered upon Arctic service, which, unfortunately for him, was brought to a close on the Greenland coast on account of the unseaworthiness of the *Gulnare*. Had a broader field of duty been open to him he would probably have achieved distinction.

The regimental colors will be appropriately draped for thirty days, and the officers of the regiment will wear the usual badge of mourning for the same period.

By order of Colonel E. S. Otis:

JOHN B. RODMAN, 1st Lieut. and Adjt. 20th Inf.

23rd Infantry, Colonel Henry M. Black.

Hdqrs., F, G, H, and I, Ft. Wayne, Mich.; A and B, Ft. Brady, Mich.; C and D, Ft. Porter, N. Y.; E and K, Ft. Mackinac, Mich.

Lieut.-Col. Henry M. Lazelle, A. I. G., will proceed to Fort Cœur d'Alene on public business (S. O. 126, July 20, D. Columbia.)

The leave granted 2d Lieut. George B. Davis is extended one month (S. O., July 31, H. Q. A.)

24th Infantry, Colonel Zenas R. Bliss.

Hdqrs., D, and H, Ft. Supply, Ind. T.; A and K, Ft. Reno, Ind. T.; B and F, Ft. Elliott, Tex.; C, E, G, and I, Ft. Sill, Ind. T.

1st Lieut. A. M. Palmer, now at Fort Leavenworth on leave, is placed on duty at Dept. Hdqrs. in connection with the Dept. Rifle Competition (S. O. 79, July 28, Dept. M.)

Leave for two months, to take effect Aug. 20, is granted 1st Lieut. John J. Brereton, Fort Supply, I. T. (S. O. 115, Aug. 2, Div. M.)

A furlough for four months is granted Sergt. Henry Bell, Co. K (S. O. 113, July 30, Div. M.)

25th Infantry, Colonel George L. Andrews.

Hdqrs., B, C, F, and I, Ft. Snelling, Minn.; A, D, H, and K, Ft. Meade, Dak.; E and G, Ft. Sisseton, Dak.

Capt. Gaines Lawson will establish and command the Dept. Rifle Camp at Fort Snelling (S. O. 71, July 26, D. Dak.)

2d Lieut. Harvey D. Reed will report, Aug. 19, for duty in connection with the Dept. Rifle Competition (S. O. 71, July 26, D. Dak.)

Appointments, Promotions, Retirements, Transfers, Casualties, etc., of Commissioned Officers of the U. S. Army recorded in the Adjutant-General's Office during the week ending Saturday, July 31, 1886.

Retirements of Enlisted Men.

Ord. Sergt. Jacob Schwartz, July 26, 1886 (S. O., July 26, H. Q. A.)

DEPARTMENT NEWS.

Dept. of the Missouri.—Brig. Gen. J. H. Potter.

The El Paso *Times* says: Captain J. G. Ballance, Judge Advocate, is at Fort Bliss to perfect the titles to the Fort. Captain Ballance says that $5,000 for water works are now ready to be paid upon rectification of title, and that this small sum is but a fraction of the amount to be used in making Fort Bliss an important and large post.

The El Paso *Times* referring to the Mexican imbroglio says: "In striking contrast also to the interest taken in this international question by the citizens of El Paso is the supremely calm indifference of majestic old Uncle Sam, who is drowsing at Fort Bliss, within a few hundred yards of the hostile hills of Mexico. To look at Fort Bliss, nobody would imagine that within one mile of it a hostile city was bristling with armed men, breathing fiery vengeance against the hated Americans."

In submitting to Congress the bill for the construction of a military post near Denver, Colorado, Secretary of War Endicott said: "Denver should be one of the points at which one of the permanent military posts of the country should be located, and with that view I do not think there would be any objection to making an appropriation now for the purpose. If such an appropriation is made, and a military post near Denver established, the following smaller posts could be disposed of; as no longer needed for military purposes, viz: Forts Lyon, Col.; Union, N. M.; Fred Steele, Wyo.; and the Cantonment on the Uncompahgre, Col." Lieutenant-General Sheridan said: "Denver is inexpensive compared with other posts, and the troops at Forts Lyon and Union could be advantageously quartered there at a much less expense to the Government. These posts have outlived the wants of the country surrounding them and there is no necessity for keeping them up except to furnish shelter for the troops. If a post be established at Denver it would be attended with much less expense to the Government than the maintenance of the troops at Forts Lyon and Union."

Dept. of Arizona.—Brig.-Gen. N. A. Miles.

The *Alta* says: "General Miles has positively forbidden anyone giving the press information of his movements or intentions, giving as a reason that, although the Indian cannot enjoy his hot rolls, coffee and morning paper as his white brothers do, yet he is as fully informed of what is going on through the medium of the press as though he was a college graduate and had the paper left at his lodge every morning. But a matter that is known to every one—Indians and white men—is that General Miles is massing troops in the country over which he is called

upon to operate, and by the time that the winter sets in he will be ready to make a movement which he hopes will be a final one."

A despatch of July 30, from Tombstone, says: "At noon, Sunday, Mr. Rector, when approaching Doyle's ranch, was fired on by a band of Apaches. Rector returned the fire, cut loose his team and made for camp with all possible speed and was followed by one Indian a short distance. On receipt of the news a party of eight citizens and some soldiers from Captain Guthrie's command started after the Indians, and on reaching Doyle's ranch found the house and Rector's wagon and contents burned and the well filled with brush and trash. The Indians were seen returning south to Old Mexico. They probably saw the troops and turned back. Four detachments are scouting in that neighborhood, so the chances of Indians getting north over that trail are very slim. General Miles' prompt action and wise disposition of the troops in this instance shows the difficulties the Indians are experiencing and accounts for the fact that all their recent deviltry has been confined within a limited scope of country, and gives color to the belief that they are worn out and anxious to come in upon some terms."

A despatch of Aug. 3 from Tombstone says: "A late report from Sonora through Army sources is that Geronimo, with about 20 bucks has moved over into the State of Chihuahua, and the remainder of the renegades are making their way back to the reservation. One of Gen. Miles's lieutenants went down to Peria Reservation yesterday to enlist a company of Papago scouts to operate against the hostiles. A Papago chief says his tribe will send out a company, provided Gen. Miles will let them be independent of the Army, and make their campaign in accordance with their own system of warfare and under their own leaders.

Dept. of Dakota.—Brig. Gen. T. H. Ruger.

It has been decided, says the *Pioneer Press*, to send Lieuts. Partello and Sage, of the 5th, and Sergeants Otten and King, of the 20th Infantry, to Fort Leavenworth to represent the department as distinguished marksmen in the contest for places on the Army team, which will take place at that station in October next.

Dept. of the Columbia.—Brig. Gen. John Gibbon.

A roster of troops was received this week, and like its predecessors is a compendium of useful information concerning Gen. Gibbon's command.

Division of the Atlantic.—Maj.-Gen. Schofield.

Maj. Gen. Schofield has ordered that until further orders, the following amounts will be allowed, monthly, to garrisoned posts for payment of extra-duty pay, from the appropriation for "Incidental Expenses," to Q. M. Dept.: One company posts, $40 per month; two company posts, $50; three company posts, $66; four company posts, $80; five company posts, $85; six company posts, $90.

ARTILLERY SCHOOL DETAIL.

THE following transfers of lieutenants of artillery to and from the instruction batteries stationed at the Artillery School, Fort Monroe, are ordered to take effect Sept. 1, 1886:

1st Artillery.—1st Lieut. Henry W. Hubbell, from Bat. B to Bat. G, vice 1st Lieut. Albert Todd, from Bat. G to Bat. B; 1st Lieut. Thomas C. Patterson, from Bat. A to Bat. G, vice 1st Lieut. Joseph S. Oyster, from Bat. G to Bat. A; 2d Lieut. Charles J. Bailey, from Bat. A to Bat. G, vice 2d Lieut. Charles H. Hunter, from Bat. G to Bat. A; 2d Lieut. Samuel Rodman, Jr., from Bat. M to Bat. G.

2d Artillery.—1st Lieut. Erasmus M. Weaver, Jr., from Bat. L to Bat. K, vice 1st Lieut. George S. Grimes, from Bat. K to Bat. L; 1st Lieut. Edward E. Gayle, from Bat. I to Bat. K, vice 1st Lieut. Alexander D. Schenck, from Bat. K to Bat. I; 2d Lieut. Willoughby Walke, from Bat. I to Bat. K, vice 2d Lieut. George F. Barney, from Bat. K to Bat. I; 2d Lieut. Harry L. Hawthorne, from Bat. D to Bat. K, vice 2d Lieut. William P. Stone, from Bat. K to Bat. D.

3d Artillery.—1st Lieut. Charles W. Hobbs, from Bat. B to Bat. M, vice 1st Lieut. Henry B. Osgood, from Bat. M to Bat. B; 1st Lieut. Henry H. Ludlow, from Bat. G to Bat. M, vice 1st Lieut. John R. Williams, from Bat. M to Bat. G; 2d Lieut. Beverly W. Dunn, from Bat. H to Bat. M, vice 2d Lieut. Charles A. Bennett, from Bat. M to Bat. H; 2d Lieut. Ira A. Haynes, from Bat. K to Bat. M, vice 2d Lieut. Edward A. Millar, from Bat. M to Bat. K.

4th Artillery.—2d Lieut. Stephen M. Foote, from Bat. C to Bat. I, vice 2d Lieut. Adelbert Cronkhite, from Bat. I to Bat. C; 2d Lieut. John C. W. Brooks, from Bat. G to Bat. I, vice 2d Lt. Ormond M. Lissak, from Bat. I to Bat. G.

5th Artillery.—1st Lieut. John McClellan, from Bat. K to Bat. G, vice 1st Lieut. Thomas R. Adams, from Bat. G to Bat. K; 1st Lieut. Oliver E. Wood, from Bat. C to Bat. G, vice 1st Lieut. David D. Johnson, from Bat. G to Bat. C; 2d Lieut. Charles G. Treat, from Bat. E to Bat. G; 2d Lieut. William F. Hancock, from Bat. K to Bat. G, vice 2d Lieut. Albert C. Blunt, from Bat. G to Bat. K.

The officers, except 1st Lieut. Henry W. Hubbell, 1st Art., will report for duty at Fort Monroe Sept. 1, and those transferred, except such as may hereafter be transferred to light batteries, will join their new batteries within 30 days over and above the time necessary to reach them in the ordinary course. Lieut. Hubbell will report for duty at Fort Monroe as soon as practicable after Sept. 13. The officers relieved from duty at the Artillery School who may be transferred to light batteries will, for the convenience of the Government, delay reporting at their new stations until Oct 1, the date upon which they will be required to join the light batteries to which they may be transferred. The following officers are relieved from duty at the Artillery School, to take effect Sept. 1, and will join their proper stations within 30 days: 1st Lieut. Frederick Marsh, 1st Art., and 2d Lieut. Henry De H. Waite, 5th Cav. 1st Lieut. Solon F. Massey, 5th Art., is relieved from duty at the Artillery School, to take effect Sept. 1, and will delay reporting at his proper station until Oct. 1, to await a transfer to a light battery to take effect on that date. (S. O., H. Q. A., Aug. 2.)

In S. O. 23, Gen. Tidball directs that during the temporary absence of Maj. A. C. M. Pennington, 4th Artillery, Capt. Wm. A. Kobbe, 3d Artillery, will take charge of the Photograph Studio.

In G. O. 24, Gen. Tidball prescribes the military exercises for August to be superintended by Maj. R. T. Frank, 1st Artillery.

In G. O. 25, the hours in August for sounding daily Trumpet Signals are announced.

LIGHT BATTERY DETAILS.

The following transfers of lieutenants of Artillery for the course of instruction indicated in par. 475 of the Regulations, as amended by G. O. 86, August 4, 1884, are announced, to take effect Oct. 1:

1st Artillery.—1st Lieut. Arthur Murray, from Bat. B to Light Bat. K; 1st Lieut. Henry M. Andrews, from Bat. D to Light Bat. K, vice 1st Lieut. Frederic C. Nichols, from Light Bat. K to Bat. D; 1st Lieut. Albert Todd, from Bat. B to Light Bat. E, vice 1st Lieut. John V. White, from Light Bat. E to Bat. B; 2d Lieut. Charles H. Hunter, from Bat. A to Light Bat. E, vice 2d Lieut. James E. Runcie, from Light Bat. E to Bat. A; 2d Lieut. Samuel D. Sturgis, Jr., from Bat. D to Light Bat. K, vice 2d Lieut. Millard F. Harmon, from Light Bat. K to Bat. D.

Second Artillery.—1st Lieut. Geo. S. Grimes, from Bat. L to Light Bat. A, vice 1st Lieut. Ephraim T. C. Richmond, from Light Bat. A to L; 2d Lieut. Geo. F. Barney, from Bat. I to Light Bat. F, vice 2d Lt. Edward H. Catlin, from Light Bat. F to Bat. I.

Third Artillery.—1st Lieut. Henry R. Lemly, from Bat. K to Light Bat. C, vice 1st Lieut. Edward Davis, from Light Bat. C to Bat. K; 1st Lieut. Geo. P. Scriven, from Bat. H to Light Bat. F, vice 1st Lieut. John E. Myers, from Light Bat. F to Bat. H; 2d Lt. Chas. A. Bennett, from Bat. H to Light Bat. C, vice 2d Lieut. Wilbur Loveridge, from Light Bat. C to Bat. H; 2d Lieut. Edward A. Millar, from Bat. K to Light Bat. F, vice 2d Lieut. David J. Rumbough, from Light Bat. F to Bat. K.

Fifth Artillery.—1st Lieut. Henry J. Reilly, from Bat. C to Light Bat. D, vice 1st Lieut. Wm. R. Hamilton, from Light Bat. D to Bat. C; 1st Lieut. Solon F. Massey, from Bat. H to Light Bat. F, vice 1st Lt. Edmund L. Zalinski, from Light Bat. F to Bat. H; 2d Lieut. Albert C. Blunt, from Bat. K to Light Bat. F; 2d Lieut. Harvey C. Carbaugh, from Bat. C to Light Bat. D, vice 2d Lieut. Warren P. Newcomb, from Light Bat. D to Bat. C. The officers of the new detail, except 1st Lieut. Henry R. Lemly, 3d Art., will report for duty with the light batteries to which they are transferred Oct. 1, 1886, when those relieved will proceed to join their respective batteries. Lt. Lemly will join the light battery at the expiration of his present leave.

1st Lieut. Arthur Murray, 1st Art., after being relieved from duty at the Military Academy, will delay reporting at his station until the time specified in this order. (S. O., H. Q. A., Aug. 3.)

U. S. INFANTRY AND CAVALRY SCHOOL.

GENERAL McCOOK has issued a post order calling attention of officers to paragraph 813, infantry tactics, and saying: "A listless and half avoided performance of the duty required by this paragraph is reprehensibly common and calls for correction. At all roll calls officers superintending must be present at the formation of their troop or company. At undress parade the guard and prisoners will be brought to a parade rest, and so remain until gun-fire. Instructions heretofore issued from this office which in any way conflict with Army Regulations 869 are hereby cancelled and set aside. Officers of the day will release prisoners at guardmounting against whose name no "charges" appear. The word "charges" entered against the name of a prisoner by his troop or company commander will, however, be sufficient to hold him in the guardhouse during the pleasure of such officer, provided reasonable diligence is shown in submitting written charges, or the prisoner is not kept confined without trial beyond eight days. Prisoners so held may be released by the officer of the day upon request of his company or troop commander at any time. The object of this order is to enable officers in immediate command of men to use the guardhouse as a means of enforcing discipline by a few days needed restraint in cases not serious enough to call for the formal action of a Court-martial."

RIFLE PRACTICE.

THE programme for the Department of Dakota rifle competitions of 1886 is out, and is as follows: The competitors will report at Fort Snelling Aug. 21, and will begin preliminary practice on the 23d. The practice will continue three days. On the 4th day there will be bull's eye shooting. The competition proper will commence on the fifth day and will continue four days, the fifth and seventh being given up to firing at known distances. On the sixth and eighth days skirmish firing will take place. The regimental team match and the skirmishers match between teams of the several regiments will be the features of the ninth day, and on the tenth and last day the short range match, open to any member of the Regular Army, will be shot. Among the prizes offered the contestants is a gold badge given by Victor Robertson of Fort Snelling to the rifleman making the highest aggregate score in the three days' preliminary practice. There is also the department gold medal, to be given the competitor who makes the best score during the entire four days' competition, and a silver medal to be bestowed upon the man making the best score in the two days competitive skirmish firing. Besides these there will be money prizes for bulls' eye shooting and for the twelve leading scores made in the long range match. The competition will be under the personal supervision of Lieut. Robert F. Bates, the department inspector of rifle practice. The number of contestants will be about one hundred, who will be placed in camp under the command of Capt. Gaines Lawson, 25th Inf. The range officer will be Lieut. Philip Reade, 3d Inf., who had charge of the marking during the last competition. Besides these officers the following have been ordered to report to Lieut. Bates for duty: Lieuts. David D. Mitchell, 15th Inf.; Joseph M. T. Partello, 5th Inf.; Daniel L. Tate, 1st Cav.; Harvey D. Reed, 25th Inf.; George H. Cameron, 7th Cav.; John F. Morrison, 20th Inf., and William H. Sage, 5th Inf.

The following-named officers are detailed for duty in connection with the approaching Department of the Missouri rifle contest, and will report on Aug. 10 to 1st Lieut. Chas. Dodge, Jr., 24th Inf., A. D. C., inspector of rifle practice at these headquarters: For Range Officers—2d Lieut. H. J. McGrath, 4th Cav.; 2d Lieut. C. B. Hardin, 18th Inf., and 2d Lieut. Carl Reichmann, 24th Inf. For Adjutant, Commissary and Quartermaster—2d Lieut. W. T. Wood, 18th Inf. For Statistical and Financial Officer—1st Lieut. W. A. Shunk, 8th Cav. The following-named officers, competitors for places on the department rifle team, will repair to Fort Leavenworth from their respective stations and report on Aug. 19 to 1st Lieut. Chas. Dodge, Jr., 24th Inf., A. D. C., inspector of rifle practice at these headquarters: 1st Lieut. F. W. Foster, 5th Cav.; 1st Lieut. W. H. W. James, 24th Inf.; 2d Lieuts. W. L. Simpson, 3d Cav.; A. C. Macomb, 5th Cav.; D. C. Shanks, 18th Inf., and John Little, 24th Inf. (S. O. 80, July 30, D. Mo.)

(Correspondence of the Army and Navy Journal.)

WEST POINT, N. Y.

AUGUST 4, 1886.

THE many friends of Col. Thomas B. Arden, who lives at Garrison's, will be pained to learn of the death of his wife, which occurred at the Colonel's residence about ten days ago.

Lieuts. Murray and Wyatt have made their P. P. C. calls and left the post en route to their new stations. Professor Curtis is packing his valuables and expects to leave about the middle of August. Lieut. and Mrs. Harrison will soon start for Berkely, Cal., where Lieut. H. will serve a tour of college duty. Lieut. and Mrs. Rodgers have returned from a short visit to the sea shore. Prof. Mercur, with his family, left on Monday for a few weeks' sojourn at Sag Harbor, Long Island.

The summer hops of the cadets have been well attended, especially those on Monday and Thursday evenings. The ladies at Cranston's do not come up on Saturday, because they have a hop there on that evening.

The September candidates are to report Aug. 27 instead of the 28th, as heretofore. The last hop of the season is to be given the same evening.

Captain Dividson, of the Royal Engineers, spent a day here last week. Other visitors were Lieut. Dougherty, 11th Infantry; Major and Mrs. Hains, of the Engineers; General and Mrs. Perry.

General Jackson, accompanied by General Porter, Adjutant-General of New York, General Varian, and several other officers, rode up on horseback from the State Camp at Peekskill on Tuesday.

Prof. H. D. Todd, of the Naval Academy, is a guest at the Highland House at Garrison's. He has his son with him, who is one of the candidates for September.

Mrs. Lieut. Brant, with her son, is a guest at the West Point Hotel.

Captain Williams, our new disbursing officer, has taken Captain Sharp's office, the latter having found "desk room" in Major Spurgin's office.

By direction of the Secretary of War "the 'Elements of Analytical Mechanics,' prepared by Professor Peter S. Michie, U. S. Military Academy, will be substituted for 'Parts I. and IV. of Bartlett's Mechanics,' as a text-book in the U. S. Military Academy," at the beginning of the next academic year.

The following candidates for admission to the Military Academy have been nominated: James J. Hornbrook, Evansville, Ind.; LeRoy Gregory, Hartford, Ky.; Wm. John Henderson, Junction City, Kas.; James Lafitte, New Orleans, La.; Wm. P. Johnson, Louisa, Ky.

THE UNCOMPAHGRE, COL.

THE Kansas *Times* has the following notes: Col. Brady has had the chimneys on all the houses painted red.... Lieut. V. E. Stottler returned home Thursday from an extended Eastern trip and has succeeded Lieut. Stiles as post quartermaster.... The Uncompahgre Social Club will give its first hop of the season in the post library.... A base ball club has been organized here to be called the Brady Base Ball Club.... Privates Weimer and Garrand, of Co. G, 10th Infantry, having gotten the highest percentage as sharpshooters, will leave for Fort Leavenworth the 1st of August to compete for the Department medal.

(Correspondence of the Army and Navy Journal.)

FORT CUSTER, M. T.

JULY 29, 1886.

I HAVE just returned from a few weeks' leave and a visit to Minnesota, which at any time would be enjoyable, but especially so after a stay of two years at this isolated frontier post.

Minneapolis is my home, and it is with pride I look upon the wonderful improvements even in two years. It is now pronounced by many one of the finest cities in the Union. It was my privilege and great pleasure to spend a week at the Chatauqua Assembly at Maplewood Park, on the banks of the beautiful "Clear Lake," near Woseco, Minn. Talented men were there from different parts of the country. Among them Major-General O. O. Howard, who delivered a very interesting lecture before the Assembly. He was also the orator of the day at the celebration of the Fourth of July, on which occasion it was the privilege of the writer to act as Chaplain of the day. The General's oration was very interesting to all and especially to old soldiers. Many comrades were seen in the audience, with their badges in sight. The celebration was observed on Saturday. The General also delivered a Christian address on Sabbath to a large audience, in which he related his own personal religious experience which was listened to with intense interest. All were delighted with the General's visit and earnestly wished that he might come again. It was also my privilege to attend the National Conference of Charities, held in St. Paul, and to listen to an address by distinguished parties, among them ex-President R. B. Hayes. I returned to my post of duty refreshed and better prepared to endure the isolation of another year to which we are subject on this far off frontier.

The heat at this post this summer has been almost intolerable, running as high as 105 in the shade, and some days much higher, with hot nights, something unusual for this country. It is much cooler now, for which we are all very thankful.

J. H. MACOMBER, Post Chaplain, U. S. A.

THE May H. Stacey Post, G. A. R., of Oswego, petitioned Congress to give Mrs. M. H. Stacey a $50 pension, but it was so late in the session that nothing could be done until the next session. Mrs. Col. Stacey is the guest of Baroness Layerfelt at the "West End," Long Branch.

RIFLE MATCH AT FORT MONROE.

To the Editor of the Army and Navy Journal:

I SEND you the score of a rifle match shot between Batteries M, of the 3d, and I, of the 4th Artillery, at Fort Monroe, Va., on July 10 and 18, pursuant to a challenge from Battery M.

(Correspondence of the Army and Navy Journal.)

FORT D. A. RUSSELL, WYO.

JULY 27, 1886.

AFTER seven days' tiresome journey, the staff, band and Co. D, of the 17th Infantry, arrived here July 20. Cos. H and B continued their journey, the first to Fort Bridger and the second to Camp Medicine Butte, Wyo. The three companies named were stationed together for a considerable time at headquarters, and you can imagine how painful the parting was. Cos. F, C and K arrived two days before us, and Cos. E, G, A and I on the night of the 21st. There is not much to report as to the incidents of our journey. We boarded the steamboat *General Terry* at Fort Yates on the 13th instant at 9 o'clock A. M. The strand was thickly covered by ladies and gentlemen, and by a multitude of bucks, squaws and youngster Indians. Soon the band struck in; three loud cheers from afloat and ashore, and the boat commenced its journey on the yellow floods of the Missouri. Next day we had a short stoppage at Fort Bennett, where the crew took in some ice. On the 16th, 8 o'clock P. M., the boat stopped at Fort Randall. We were very pleasantly surprised at the sight of such a beautiful place. Many officers and ladies came aboard to greet us, and almost all the garrison came to the banks to receive us with loud cheers, which were cordially returned. Just took us five days and a few hours from Fort Yates to Omaha, where we boarded the train—after off and up loading our 40-ton baggage. At Fort Sidney the band of the 21st Infantry greeted us, etc.

We arrived at last at our destination without accident. The troops that followed us lost a man by falling overboard and drowning—a member of Co. E.

We have here six splendid brick and two frame company quarters, each supplied with bath-room, wash-house, shops, library room, etc., and with all modern necessities. The change is a very pleasant one.

The Post Chaplain, Rev. J. Brady, preached here last Sunday a very acceptable sermon, and Mrs. O'Brien, the wife of Captain L. M. O'Brien, 17th Inf., played the organ and led the chorus with her rich melodious voice.

The regimental band draws very many citizens from Cheyenne, appearing in choice rigs, on horseback or on *pedes apostolorum*.

The troops are in nearly as good order as at the old home already.

We had yesterday the first drill here, commanded by Lieutenant-Colonel Anderson, of the 9th Infantry. P.

(Correspondence of the Army and Navy Journal.)

SAN ANTONIO, TEXAS.

JULY 29, 1886.

EVERYTHING dull here except official business, and we are still pegging away closing up for the last fiscal year and getting things into working order for the present year. The several changes made by law required many rearrangements, but things are about adjusted. It is hot as Hades here. Monday night at 11 the thermometer on the Hill (the coolest place in the city) showed 99 deg. The *very* oldest inhabitant says he never experienced the like in the *past* and hopes not to in the *future*. Gen. Stanley and staff, Light Battery F, 3d Artillery, and Cos. G and K, 16th Infantry, leave here Aug. 2 for Galveston to participate in the inter-State drill. The 8th Cavalry Band goes with them, and a grand time is expected.

The remains of the late Col. M. L. Courtney, captain 25th Infantry, who died here recently, were interred at Galesburg, Ill. Mrs. Courtney and her children are, I believe, to reside at Dexter, Iowa. Col. Courtney was a graduate of the Columbian College Law School at Washington, D. C., and a member of the bar of the District of Columbia. ANON.

(Correspondence of the Army and Navy Journal.)

WEST OF 69°, CHEROKEE NATION.

OUR affairs here are in better shape than they have been since Kansas was settled on our border. Capt. Geo. F. Price, 5th U. S. Cav., charged with protecting the strip, has 60 officers and men who are in constant service since April—clearing our land of intruders and unlicensed stock, timber and hay-thieves—has done more for the country here than all the officers we ever had and is fully entitled to the kindest regards of every Cherokee, who may well be proud of his defence of our rights as a dependent nation.

COURT-MARTIAL CASES.

In the case of a private of Co. H, 13th Infantry, recently tried at Fort Leavenworth for desertion, the reviewing authority, Gen. J. H. Potter, says: "On account of the unjust and cruel treatment of this man by the then 1st sergeant of his company, as shown by the evidence, and the recommendation for clemency on the part of eight members of the court and its judge advocate, the department commander remits the sentence."

(For the Army and Navy Journal.)

QUERY.

WHY has "The Naval History of the Civil War," by Admiral D. D. Porter, U. S. Navy—Sherman Publishing Co., New York—(for which subscriptions were solicited, to be ready for delivery in May, 1886) been delayed? W. A. C.

We believe the delay is due to enlargement of the work, which is now announced to be ready by August 15.

THE NAVY.

NAVAL VESSELS IN COMMISSION.

WHEN AND WHERE LAST HEARD FROM.

N. Atlantic Station—Rear Admiral S. B. Luce.

GALENA, 3d rate, 8 guns, Comdr. Colby M. Chester. At Portland, Me.

SWATARA, 3d rate, 8 guns, Comdr. E. T. Woodward. At Portland, Me.

TENNESSEE, 1st rate, 22 guns (f. s. n. a. s), Capt. Robert Boyd. At Portland, Me.

No official information has yet been received at the Navy Department regarding the reported accident to the *Tennessee* at Portland last week. A private letter was received by one of the officials on Thursday from one of her officers which stated that the report had been greatly exaggerated. During torpedo exercises a torpedo boat came near the *Tennessee*, and a small exercise torpedo was exploded, which blew up the netting which had been extended around the *Tennessee*. Nobody was hurt and the vessel would not have been damaged had the torpedo exploded directly under her.

YANTIC, 3d rate, 4 guns, Comdr. Francis M. Green. At Portland, Me.

S. Atlantic Station—Captain E. E. Potter (in command temporarily).

Acting Rear Admiral D. L. Braine will shortly command this station.

Mails should be addressed to care of U. S. Consul, Rio de Janeiro, Brazil, unless otherwise noted, or care of B. F. Stevens, 4 Trafalgar Square, London.

ALLIANCE, 3d rate, 6 guns, Comdr. Charles McGregor. Arrived at Newport, R. I., July 11. She will shortly be ordered to join the South Atlantic Station.

LANCASTER, 2d rate, 10 guns, Capt. Edward E. Potter. (Will be relieved by Capt. S. L. Breese.) Flagship of the South Atlantic Station. Sailed from Cape Town, South Africa, June 29, 1886, for St. Helena.

TALLAPOOSA, 4th rate, 13 guns, Comdr. William Whitehead. Arrived at Bahia, July 31.

European Station—R.-Adml. Sam. R. Franklin.

Mails should be addressed to care B. F. Stevens, 4 Trafalgar Square, London, England, unless otherwise noted.

PENSACOLA, 2d rate, 16 guns(f. s. e. s.), Captain George Dewey. Arrived in Phalerum Bay, Greece, July 13. Would remain at Piraeus until July 20, and then proceed to Leghorn, touching at Zante and Messina en route.

KEARSARGE, 3d rate, 7 guns, Comdr. Charles D. Sigsbee. Arrived in Phalerum Bay, Greece, July 13. Will remain there until about Aug. 1, and will then proceed to the Syrian Coast, theuce to Salonica and Constantinople. Will go to Smyrna early in October and thence to Genoa.

A telegram was sent to Rear Admiral Franklin, commanding the European Station, on Thursday, from the Navy Department, directing him to send the *Kearsarge* home as soon as practicable. Many of her officers and men have served their required time, and as the boilers of the vessel are pretty well used up, it was deemed advisable to bring her home with the sick and disabled, as well as those whose time has expired. It is probable that she will be kept in commission, and assigned to duty on the North Atlantic Station.

QUINNEBAUG, 3d rate, 8 guns, Comd. Geo. W. Coffin. Arrived at Southampton, England, Aug. 3, 1886. Will leave the English channel by the middle of August or September for Genoa, touching on the Spanish coast and at Marseilles. Will be sent to the East for the winter, if no other vessel joins the squadron.

Pacific Station—Rear-Adm. E. Y. McCauley.

Mails, unless otherwise noted, should be addressed to care U. S. Consul, Panama, U. S. C.

ADAMS, 3d rate, 6 guns, Comdr. Louis Kempff. Left Callao, Peru, June 20, for Coquimbo.

HARTFORD, 2d rate, 16 guns (f. s. p. s.), Capt. J. H. Gillis. Was at Callao June 30.

JUNIATA, 3d rate, 8 guns, Comdr. G. T. Davis. At New York. Will make a voyage around the world to visit unfrequented ports. Is expected to sail in a day or so for the Pacific Station, having dropped down the bay for her powder.

IROQUOIS, 3d rate, 7 guns, Comdr. Yates Stirling. At Callao June 30. Commander J. C. Watson has been ordered to command, and leaves New York per steamer of about Sept. 1.

MONONGAHELA, 2d rate, 9 guns, Lieut. Comdr George B. Livingston in command. Used as a storeship at Coquimbo, Chili.

MOHICAN, 3d rate, 8 guns, Commander Benjamin F. Day. Was still at Apia, Samoan Islands, June 23, but was to leave there next day for the Tonga Islands to return in a month.

PINTA, 4th rate, screw, 2 guns, Lieut. Comdr. Henry E. Nichols. Address care of Navy Pay Agent, San Francisco, Cal. At Juneau, Alaska, June 8. Was to go to Sitka about the middle of July for supplies.

SHENANDOAH, 2d rate, 9 guns, Captain Byron Wilson. At Callao, Peru, June 30. Has been ordered to proceed to San Francisco for repairs, touching en route at South and Central American ports.

Asiatic Station—Rear-Admiral J. L. Davis.

Vessel with (†), address, Mail. to care U. S. Consul, Yokohama, Japan.

ALERT,† 3d rate, 4 guns, Comdr. Chas. J. Barclay. At Yokohama, Japan, July 11. She will return to the U. S., and expects to reach San Francisco some time in September.

A correspondent of the JOURNAL, writing from Yokohama, Japan, July 11, 1886, states that the *Alert* was to sail from Yokohama for Hokodati on or about July 15, and will sail for San Francisco about August 5. The move from Yokohama is made necessary by the sudden appearance and rapid spread of the cholera. So far it has been confined to narrow limits and entirely among the natives, but it may overstep bounds on any day.

BROOKLYN, 2d rate, 14 guns, Capt. E. O. Matthews. At New York Navy-yard, being overhauled. Ordered to proceed to the Asiatic Station to relieve the *Trenton*.

ESSEX, 3d rate, 6 guns, Comdr. T. F. Jewell. At Navy-yard, New York. Expects to sail soon for the Asiatic Station.

MARION,† 3d rate, 8 guns, Commander Merrill Miller. At Shanghai July 1—undergoing repairs.

MONOCACY,† 3d rate, 6 guns, Comdr. Henry Glass. Was at Canton July 1.

OMAHA,† 2d rate, f. s. a. s., 12 guns, Captain Thos. O. Selfridge, commanding. Reported by cable to the JOURNAL, at Shanghai, China, July 17.

OSSIPEE,† 3d rate, 8 guns, Comdr. John F. McGlensey. At anchor off Yokohama, Japan, July 1, under orders to proceed to Chemulpo, Corea.

PALOS,† 4th rate, 6 howitzers, Lieut.-Commander T. Nelson. Was in all probability at Chemulpo, Corea, July 1, having sailed for that port from Nagasaki, June 3.

TRENTON, 3d rate, 10 guns, Capt. Robert L. Phythian. On her way home. Is expected to arrive at Hampton Roads in September next. Arrived at Gibraltar, July 30. Reported by cable to have left Gibraltar, Aug. 4, for the U. S.

Apprentice Training Squadron.

Address of *Portsmouth* and *Saratoga*, care of B. F. Stevens, 4 Trafalgar Square, London, England, until Aug. 25, and after that date Newport, R. I.

MINNESOTA, 1st rate. 24 guns, Comdr. T. F. Kane. Gunnery ship. Foot of W. 27th Street, North River. Entrance from W. 26th Street. P. O. address, Station E, New York.

NEW HAMPSHIRE, 1st rate, 16 guns, sails, flagship of training squadron, Captain Arthur R. Yates. Coaster's Island Harbor, Newport, R. I.

PORTSMOUTH, 3d rate, sails, 12 guns, Comdr. Chas. V. Gridley. Sailed from Newport, R. I., July 8, for a cruise in European waters.

SARATOGA, 3d rate, 12 guns, Comdr. C. H. Davis. Sailed from Newport, R. I., July 8, for a cruise in European waters.

On Special Service.

CONSTELLATION, 3d rate, 10 guns, Practice Ship of Naval Academy, Commander C. L. Huntington. On her practice cruise. Arrived at Portsmouth, N. H., July 14, and sailed July 31 for Chesapeake Bay.

DESPATCH, 4th rate, Lieut. Wm. H. Emory, Jr. At New York.

DOLPHIN, despatch boat, ——. At Norfolk, Va. Undergoing repairs.

JAMESTOWN, 3d rate, sails, 12 guns. Comdr. Horace Elmer. On practice cruise. Arrived at Portsmouth, N. H., July 17, and sailed July 31 for Chesapeake Bay.

MICHIGAN, 4th rate, 8 guns, Comdr. John J. Read. Arrived at Milwaukee July 23, and expected to leave July 25 for Toledo, reaching there Aug. 1.

RANGER, 3d rate, 4 guns, Comdr. Chas. E. Clark. At San Francisco July 5.

ST. MARY'S, sails, 8 guns, Comdr. Edwin M. Shepard. N. Y. School ship. On her annual cruise. Was at Funchal, Medeira, July 3. Expected at her wharf, foot of East 31st Street, in October.

ATLANTA, 2d rate, 8 rifled cannon and 12 machine guns, Captain Francis M. Bunce. At New York Navy-yard.

The *Atlanta* started on her trial trip Thursday morning. The Secretary of the Navy will be accompanied by members of the Senate and House, Appropriations and Naval Affairs Committees, and of the committee on expenditures in the Navy Department on a short trip on the *Atlanta* on Saturday. She will make a run of six or eight hours on the Sound. Arrived at the New York Navy-yard, 8.45 A. M., Aug. 6, from a trial trip.

VANDALIA, 2d rate, 8 guns, Captain Henry L. Howison. Came out of dry dock at the New York Navy-yard July 31. Has been ordered to the Pacific Station, and is expected to sail this week.

VARIOUS NAVAL ITEMS.

THE transit revenue of the Suez Canal for the first six months of this year was $5,959,755, as compared with $6,617,945 in the same period of 1885.

THE Haytien sloop-of-war *Dessalins*, commanded by Capt. Mason S. Cooper, is at Cramp's shipyard, Philadelphia, for repairs. Capt. Cooper is the son of Rear Admiral Cooper, U. S. N.

THE Mexican cruiser, *La Liberta*, which has been lying at New Orleans for some time past, with the expectation of remaining until September, has been suddenly ordered to sea.—*Critic.*

THERE is another thing upon which we should congratulate ourselves, and that is upon the admirable personnel of our naval establishment. In this respect there has been no retrogression.—*Critic.*

THE Brazilian frigate, the *Almirante Barroso*, has been in Newport harbor this week and its officers have been the recipients of much hospitality from the Army and Navy and citizens in that vicinity.

THE *United Service Gazette* informs us that Lieut. Graydon, late of the U. S. Navy, and Mr. de Styak are coming over to Europe in view to exhibiting and introducing a new description of dynamite, so made as to permit of its being shot out of a large-sized gun.

THE Chinese Government is reducing the number of white seamen in the Navy. Twenty-four Germans who have long been in the Chinese naval service are returning home, but German surgeons and engineers remain. There is now one German officer in the Chinese Navy, and he has lately been appointed to the flagship of Admiral Ting.

IT certainly does seem rather a farce, when an "inspection" takes place on board harbor ships which carry neither guns nor torpedoes of any kind, to see a gunnery and torpedo lieutenant marching round and trying to look important, as though he had something to do or to inspect. No doubt, he is an ornamental addition to the "staff" of the Admiral at such times; but, for any other reason, he might be more usefully employed elsewhere.—*Army and Navy Gazette.*

COMMODORE D. L. BRAINE, U. S. N., has orders to sail on Sept. 10, 1886, and upon arrival at Rio de Janeiro assume command of the South Atlantic Station.

SEVERAL ships of the German Navy, according to the *Deutsche Heeres-Zeitung*, have for some time past prosecuted a series of experiments in the use of wire netting for protection against torpedo attack. The nets are placed at a distance of 4½ mètres from the ship, and extend very little above the surface of the water. They are constructed of steel wire, the meshes being 6 inches in width. The great difficulties formerly experienced in the use of these nets are now to some extent overcome; and the time required for putting them out has by long practice been very considerably reduced.

THE Norfolk *Landmark* says: "Not an appeal but some sort of demand ought to be made in Washington in behalf of this yard. Though the appropriation is now available there is no work, and the outlook for the workmen is slight and uncertain. It is hoped that the flagship *Trenton* will soon arrive from China, and that one or more new ships to be built by the last act of Congress, will retain at Norfolk the best artisans in the country, so that the hum of industry will still continue to be heard in the most important navy-yard on the Atlantic coast, and the largest Government dock-yard in the United States."

SIX divers are now constantly at work on the *Oregon*, steam pumps being used to supply them with air. Each man remains under water from a half hour to an hour at a time. By the end of that period the pressure becomes difficult to bear. The air is forced through five-ply rubber hose which it would be almost impossible to cut or break. The greater part of the cargo has now been removed. It consists largely of cotton goods. The divers, armed with hooks like the longshoremen, take hold of the bales, and transfer them to the steam pulleys by which they are hoisted on board the wrecking vessel. The average daily work accomplished is 20 bales. It is probable that the whole cargo will be removed within a few weeks. Most of the mail has also been recovered. They are still receiving mail matter from the ill-fated vessel, in excellent condition considering its long immersion in the sea. In order to get at the mail room, it was necessary to blow a hole in the side of the vessel with dynamite. Much of the mail, however, was utterly ruined before its recovery. The *Oregon* itself is rapidly going to pieces. Not only has she broken in two between the mainmast and the foremast, but her bow has already fallen over in the sand. The mainmast and mizzenmast are still visible above the water.

NAVY GAZETTE.

Ordered.

JULY 31.—Naval Cadet Charles P. Plunkett, ordered to duty in connection with the trial of the machinery of the Atlanta.

P. A. Paymaster M. C. McDonald, to duty as assistant to Pay Director W. W. Williams at the Navy pay office, San Francisco.

AUG. 2.—Commander F. J. Higginson has reported his return home, having been detached from the command of the Monocacy, April 5, and has been placed on waiting orders.

Detached.

AUG. 6.—Commander John C. Watson, from New York Navy-yard August 20, and ordered to command the Iroquois, Pacific Station, per steamer, about September 1.

Commander Yates Stirling, from command of the Iroquois on reporting of relief, and ordered home and report arrival.

Passed Assistant Surgeon Chas. W. Rush, from the Franklin and ordered to the Pinta, at Sitka, Alaska.

Passed Assistant Surgeon Wm. G. G. Willson, from the Pinta when relieved, and ordered home to await orders.

Nominations.

AUG. 4.—The following Naval Cadets to be Ensigns in the Navy, from July 1, 1886: Chas. H. Hewes, of Pa.; Washington L. Capps, of Va.; Chester M. Knepper, of Pa.; Clarence S. Williams, of Ohio; Wilford B. Hoggatt, of Ind.; Albert M. Beecher, of Iowa; Nathaniel S. Moseley, of Cal.; Frank K. Hill, of Ohio; Roger Wells, Jr., of Conn.; John D. McDonald, of Nevada; Walter O. Hulme, of N. J.; Douglass F. Terrell, of Miss.; Frederick J. Loomis, of Conn.; Henry E. Parmenter, of R. I.; Hilary P. Jones, of Va.; William R. Shoemaker, of N. Mex.; Isaac K. Seymour, of Maine; Chas. M. Fahs, of Ala.; Chas. P. Plunkett, of D. C.; Humes H. Whittlesey, of Ind.

Retired.

Boatswain Isaac T. Choate has been placed on the retired list from August 4.

Pay Director A. H. Gilman retired from Aug. 9.

CASUALTIES.

Deaths in the Navy of the United States, reported to the Surgeon-General, during the week ending August 4, 1886:

J. W. James, landsman, died at hospital, Yokohoma, Japan, July 9.

Henry Benninger, apprentice 2d class, died at hospital, Newport, R. I., August 1.

John Wilson, beneficiary, died at hospital, Philadelphia, Pa., August 2.

Wm. B. Boggs, P. A. Engineer, died at Guayaquil, Ecuador, S. A., June 21.

Egedio Moccia, 1st class musician, died on the U. S. S. Kearsarge, June 27.

Clandio Martnez, 2d class musician, died on the U. S. S. Kearsarge, June 27.

George Gardner, beneficiary, died at hospital Philadelphia, Pa., June 28.

Hans Karlsew, seaman, died on the U. S. S. Constellation, July 25.

MARINE CORPS.

JULY 30.—2d Lieutenant Carroll Mercer, ordered to proceed to Portsmouth, N. H., and report August 5, for duty at Marine Barracks.

FROM THE EUROPEAN STATION.

Rear-Admiral Franklin, commanding the European Station, reports to the Secretary of the Navy from Piræus, Greece, July 13th, that he sailed in the *Kearsarge* on June 10th from Prinkipo, an island in the Sea of Marmora, a few miles from Constantinople, where U. S. Minister Cox is residing for the summer. He was assured by the Minister that his stay in the waters of Constantinople had been very satisfactory, not only to the Legation but to the various religious and educational establishments there and in the vicinity, which are almost entirely American in their character. He visited the American (Robert) College and the American Female Seminary at their respective commencements, and also the Bible House at Stamboul, and was gratified to find that they felt that their positions were very much strengthened by the presence of an American man-of-war, and were encouraged by the sight of the flag in their midst. His relations with Minister Cox were of the most agreeable and cordial nature, and they were always in accord in everything that was done while in those waters in his efforts to uphold the American name, which is highly esteemed throughout the whole East. On July 7th the Sultan entertained them at dinner, at which the Minister of Marine was his representative. In the adjoining room were also entertained fifty of the *Kearsarge's* crew, and he further extended his civilities by sending on board to those who were not at the dinner an entertainment of the same character. Mr. Cox was present at the dinner at the Palace and made very happy and appropriate remarks. On the following day the Sultan sent his son, the Prince Imperial, on a visit to the *Kearsarge*. Appropriate honors were extended to him, and he made a speech to the officers and crew expressive of the Sultan's gratification at the presence of the ship at the Sublime Porte, and of his desire to make their stay as agreeable as possible, to which the Admiral made a suitable reply. On July 9th the Sultan received the Minister and the Admiral in a private audience at which he was most cordial in his manner, and expressed himself in terms of the greatest friendship towards the President and people of the United States. Admiral Franklin transferred his flag to the *Pensacola* at Syra and sailed with her and the *Kearsarge* at 4 A. M., July 13th, for Piræus. He proposed to remain there until July 20th when he would sail in the *Pensacola* for Leghorn, touching probably at Zante and Messina en route. He would despatch the *Kearsarge* to Suda Bay, thence to the coast of Syria to visit the missionary stations, thence to Salonica, from which point she would return to Constantinople, reaching there early in September. He would order her to proceed, early in October, to Smyrna, and, after remaining there a week, to continue on to Genoa for provisions, to which point he would request the Department, in due time, to send supplies. From there, should no other vessel join the squadron in the meantime, he would order the *Quinnebaug* to the East for the winter, leaving the English Channel by the middle of August or first of September, touching en route on the Spanish coast and at Marseilles, and joining the Admiral in October at Genoa. The health of the squadron was good.

(Correspondence of the Army and Navy Journal.)

NAVAL ACADEMY.

ANNAPOLIS, MD., Aug. 5, 1886.

NAVAL CADET T. P. KANE has been granted leave of absence until Sept. 30.

Surgeon T. C. Walton and family have gone North for the summer.

Ensign J. H. Blish has been called to his home in Pennsylvania by the death of his father.

Capt. T. F. Kane has been visiting the Naval Academy for the past few days.

Work on the B. and A. short line bridge across the Severn river has been discontinued, owing to the discovery of a bed of quicksand.

The target practice in the Bay this year has been exceptionally good. The target has been repeatedly demolished at 1,500 yards by the two Parrott guns aboard the *Standish*; while the average firing of the class with howitzers, Gatling and Hotchkiss guns, and at mortar practice, has been far ahead of the other class records. Drill aboard the *Standish* lasts from 3 to 6 P. M., under the supervision of Ensign F. J. Haeseler. The best records up to the present time are those of Cadets Hayward, Murphy, Melson, and Norton.

Quite a number of candidates for admission at the September examinations are attending preparatory schools in Annapolis.

STATIONS OF COAST SURVEY VESSELS.

W. H. Brownson, Lt. Comdr. U. S. N., Hydrographic Insp'r.
Lt. J. F. Moser, U. S. N., Coast and Geodetic Survey Office.
Lt. Geo. H. Peters, U. S. N., Coast and Geodetic Survey Office.

Steamer *A. D. Bache*, Lieut. J. M. Hawley, U. S. N., commanding. Address Cutler, Maine.

Steamer *G. S. Blake*, Lt. J. E. Pillsbury, U. S. N., comdg. Address Charlestown, Mass.

Schooner *Eagre*, Lieut. Chas. P. Perkins, U. S. N., comdg. Address College Point, Queens Co., N. Y.

Schooner *Earnest*, Lieut. C. T. Forse, U. S. N. Address Tulalip, Snowhomish, Wash. Ter.

Steamer *Gedney*, Lieut. F. H. Crosby, U. S. N., comdg Address Port Jefferson, L. I. N. Y.

Steamer *Hassler*, Lieut. E. D. Taussig, U. S. N., comdg. Address Box 2402, San Francisco, Cal.

Steamer *M'Arthur*, Lieut. J. M. Helm, U. S. N., comdg. Address, Navy Pay Office, San Francisco, Cal.

Steamer *Patterson*, Lieut. Comdr. A. S. Snow, U. S. N., comdg. Address Navy Pay Office, San Francisco, Cal.

Steamer *Endeavor*, Lieut. G. C. Hanus, U. S. N., comdg. Address Bath Beach, King's Co., N. Y.

Schooner *Scoresby*, Lieut. Francis Winslow, U. S. N., commanding. Address Beaufort, Cateret Co., N. C.

Steamer *Arago*, Lt. F. S. Carter, U. S. N., comdg. Address Cold Spring Harbor, New York.

Schooner *Palinurus*, Lieut. D. D. V. Stuart, comdg. Address Greenwch, Conn.

FISH COMMISSION.

The Albatross, Lieut. Commander G. L. Tanner, comdg At Wood's Holl.

The Fish Hawk, Ensign Louis W. Piepmeyer, comdg. St. Jerome Creek, Md. P. O. address, Ridge P. O., St. Mary's County, Md.

The Lookout, Mate Jas. A. Smith, comdg. New York.

The *Grampus*, J. W. Collins commanding, at Wood's Holl.

E. ROY SEAGER, eldest son of the late Professor E. Seager, U. S. Navy, died, August 1, at "Midlothian," near Marshall, Va.

NAVAL veterans celebrated August 5 the anniversary of the victory of the squadron at Mobile Bay under Admiral Farragut.

(Correspondence of the Army and Navy Journal.)

MERRY CONTEST AMONG THE JOLLY TARS.

SINCE the arrival of the vessels of the North Atlantic Squadron in Portland Harbor the sailors of the different ships of war have enjoyed an excellent time, and the skating rink being one of the principal places of amusement many of them have added roller-skating to their accomplishments.

When it was found that the vessels of the North Atlantic Squadron would soon leave for a cruise, the manager of the Forest City rink, Mr. B. L. Bailey, procured a handsome gold medal with the intention of presenting it to the fastest skater among the sailors. Each vessel, the *Tennessee*, the *Swatara*, and the *Galena*, selected two men to contest for the prize and notice was given that the "great three mile race for a gold medal and the championship of the North Atlantic Squadron between U. S. Blue Jackets" was to come off.

By 7 o'clock the rink was crowded, and still the people flocked in, trying to get a glimpse at the contest. The largest crowds of sailors from the ships of war that ever came to the island were there, and everybody discussed the race.

The following sailors entered in the race: Henry P. Bennett, printer, and John St. Voss, seaman apprentice, from the flagship *Tennessee*; Theodore Sauer, seaman apprentice, and John F. McGurn, seaman apprentice, from the U. S. steamer *Galena*; and Peter Peterson, armorer, and Edward L. Aiken, seaman apprentice, from the U. S. steamer *Swatara*.

The following judges were selected: Mr. John J. Heary from the *Tennessee*, Mr. David Hennessey from the *Galena*, and Mr. Samuel Shields from the *Swatara*. Mr. H. J. Hammett from Portland was chosen referee.

The two sailors from the *Tennessee* were dressed in navy blue shirts and trousers, with blue caps, while those from the *Swatara* and *Galena* wore blue caps, white frocks with blue collars trimmed with snow white tape, and blue pantaloons.

The sailors were drawn in one line, and after everything was in readiness Mr. Bailey gave the word "Go," and the skaters started ahead while the band struck up a lively air. The crowd commenced to cheer and applaud, while each one tried to beat the other's records. The first two laps were made in 20 seconds, with Bennett ½ of a lap ahead, McGurn closely following. When the first mile had been travelled in four minutes and nine seconds, both Bennett and McGurn were side by side, and the skaters were encouraged to renewed efforts by the enthusiastic crowd, when all at once in turning a corner Bennett slipped and his opponent passed him. Before the former could get on his feet again, the latter was about ¼ of a lap ahead of the other. The other four sailors although good skaters could not keep up with their two friends but still made excellent time. McGurn continued to keep the lead and cheered by his friends never slackened his speed.

"Go it Reddy! go it Reddy! get up to him," "go it shorty," were the substance of the cheers.

When McGurn finished the 45th and last lap with Bennett only ¾ of a lap behind, the hall rung and rung again from the applause. The three mile race was made in 16 minutes and 6 seconds. A large crowd gathered around the victor and his close follower and among the cheers of over 2,000 spectators the handsome gold medal was presented to the champion and pinned to his breast.

The medal which was presented to the champion is certainly an extremely handsome one, bearing the legend: "Championship of the North Atlantic Squadron."

Mr. John F. McGurn, the champion, can boast that his opponent, Mr. Bennett, holds three medals, won in similar contests.

The entire landing force of the North Atlantic Squadron, composed of the officers, seamen, and marines of the different vessels now in this harbor, the flagship *Tennessee*, *Galena* and *Swatara*, embarked yesterday afternoon in their respective boats in order to land near the beach at Fort Preble, where a sham fight was to take place. At one o'clock in the afternoon a general signal hoisted on board the flagship, gave the order for the brigade to embark, "armed and equipped." After everybody had embarked the fleet of boats, directed by signals, hoisted on board of a dinghey which carried the commander of the landing forces together with his staff officers, formed in single line close order, with the guide boat on the right wing.

The boats proceeded on a westerly course heading from the outer bay toward the city until abreast of the hills situated on Cape Elizabeth, when all changed their course and in line abreast pulled in toward the beach. The artillery opened fire, and the boats on either wing and in the centre of the line carrying the skirmishers pulled ahead at full speed and under a protecting fire forced a landing, advanced in quick step and drove away the enemy's skirmish lines. As soon as the skirmishers had safely reached the shore and driven back the enemy, the rest of the boats neared the beach, and in less than no time the entire landing force had safely reached the shore. Where the shallowness of the water prevented the heavy launches and cutters from coming in close to the landing, officers and sailors jumped overboard and waded ashore, dragging the heavy cannons after them.

The skirmish lines proceeded up the bluff, and took their positions in order to keep off the enemy. The main body now commenced building entrenchments along the beach. While the work was being done the skirmishers who first landed were suddenly driven back and had to be reenforced by more marines and blue jackets. This supplementary force proved sufficient to keep back the enemy, and the entrenchments wese soon completed, and the field artillery together with the infantry found sufficient shelter behind those newly built walls.

All at once the sound of the bugle, the sign of warning, informed the advancers of the approaching enemy, who had come out in full power to drive away the landing forces. A heavy skirmish fire took place, but the enemy was too strong for the skirmishers, who were compelled to retreat. The enemy was gaining more ground every minute, but had to fight hard for every inch of soil, which the skirmishers, although retreating, defended with great skill and energy.

As soon as the skirmishers were all in camp the order for the battalions to advance was given. New companies of skirmishers, closely followed by the advance guard, surprised the enemy. All the battalions of infantry left their entrenchments and the artillery with the howitzers on either end, and the Gatlings in the centre, now formed the regular line of battle.

The entire naval brigade in quick step started up the bluff and it was a lovely sight to see the body of sailors advance in regular line of battle with the colors floating to the breeze in the centre of the lines. The artillery field pieces were dragged up the hill and brought about ready for action. The battle was apparently won, the enemy driven away, and the battalions headed by the excellent band from the *Tennessee*, marched to the parade ground at Fort Preble, where dress parade was held.

REVENUE MARINE.

The Sundry Civil as finally passed by Congress makes provision for the Revenue Marine Service as follows: For pay, rations, fuel, repairs and outfits, ship chandlery and engineers' stores, travelling expenses, instruction of cadets, commutation of quarters and contingent expenses, $875,000. For steam revenue vessel for use on the Mississippi River between New Orleans and the Passes, $10,000. For store house, etc., at Wood's Holl, $12,000.

The following officers have been commissioned:

3d Lieuts. Geo. H. Dory, F. M. Dunwoody, Howard Emery and John E. Lutz, to be 2d lieutenants, U. S. R. M.

Cadets J. Chas. Harris and D. J. Ainsworth, to be 3d lieutenants.

MEDICAL DIRECTOR ALBERT L. GIHON is still with his family summering in western Massachusetts. He will not resume his duties at the Naval Hospital, Washington, before September.

BARRACKS AND QUARTERS.

THE yearly appropriation for "Barracks and Quarters" is at no time sufficient to meet the wants of the Army, and it is to be feared there is a growing disposition on the part of Congress to still further cut it down and thus permit much valuable Government property to go to waste and decay. In civil life a tenant has the privilege of moving if the landlord refuses or neglects to keep the premises in proper repair and respectable appearance. In the Army the tenant *must* stay where he is placed, even if the roof is in danger of falling on his head, paint scarcely a memory, and general dinginess and discomfort, and absence of all conveniences, the distinguishing characteristics of the surroundings. A recent visit to the forts in New York Harbor has invited reflection on this subject, and, remembering our visit of a few years ago to some of the principal posts in the West and Northwest, we were astonished to find how much better off the Cavalry man and Infantry man on the frontier and at remote stations is with respect to quarters and conveniences of living, than his Artillery brother located near the centres of civilization. In the harbor forts little, if any, provision for lavatories for the men is made, the quarters which they have to occupy are in bad repair and sadly in need of paint, and commanding officers, however zealous and anxious to make their posts models of cleanliness and comfort, find their hands tied because funds cannot be furnished in anything like a fair proportion to the absolute needs. In many of the officers' quarters a like condition of things exists. Cheaply constructed in the first place, so as to keep within the meagre sum allotted, they possess few of the conveniences which even unpretentious modern houses in our cities can always boast of. Proper sanitary arrangements are wanting, and accommodations for servants, which officers with families *must* keep in their service, are wofully lacking. In fact it is very difficult for officers to keep servants at all, solely on account of this absence of conveniences. That we have not overdrawn the picture may easily be decided by a visit to our seacoast forts, and we venture these few remarks in the hope that a spirit of *true* economy may be engendered in the hearts of our legislators, and valuable Government property and material not be entirely wasted in the interests of parsimony and shortsightedness.

ATTENTION is called by the *United Service Gazette* to the fact that at the Wimbledon annual meeting, $50,000 is allotted for excellence in firing at fixed targets and only about $2,500 for skill in quick firing and shooting at moving targets and at unknown distances. To show how thoroughly unpractical is the marksmanship chiefly developed by the National Rifle Association it describes an old Wimbledon hand at work at an 800 or 900 yards' target. Before lying down to fire he produces a vernier and his note book, which contains the most accurate records of his previous shooting experiences; the light, the wind, and the temperature on the days when he has practiced, the exact spot on the bar of the backsight, and the degree of elevation on the vernier which he used on each occasion, a picture of the target showing the result of each shot—all these details are recorded in the rifleman's diary. Aided by numerous flags which show him the direction of the wind, and after frequent reference to his note-book, he makes his calculations, carefully adjusts his backsight with his vernier, gets into position, takes an interminable time over his shot—and makes a bull's-eye. A cloud comes over the sun, so the vernier and note book are again produced, with the same result. The light changes again, so the vernier and notes once more come into requisition—and so on *de capo*. The man makes admirable shooting of its class; and to keep on hitting a three-foot object at half-a-mile's distance is unquestionably no mean feat, even with these adventitious aids to marksmanship; but, our contemporary asks, if the man is good enough to make such high scoring, why should he not throw away his note book and vernier and trust solely to his judgment and previous training?

THERE are still six retirements for age to occur in 1886—Capt. C. J. Von Hermann, 4th Infantry, Sept. 17; Brig.-Gen. J. H. Potter, Oct. 12; Col. J. N. G. Whistler, 15th Infantry, Oct. 19; Assistant P. M. General G. L. Febiger, and Col. L. P. Bradley, 13th Infantry, Dec. 8, and Chaplain G. D. Crocker, Dec. 25.

TWO DISTINGUISHED and meritorious officers of the Army have been retired for age this week, Colonel JOHN D. WILKINS, 5th U. S. Infantry, on August 1, and Brigadier General ROBERT MURRAY, Surgeon General of the Army, on August 6. Colonel WILKINS is a veteran soldier. Entering the Military Academy in 1842 he was graduated in 1846, and promoted to the 3d U. S. Infantry. He served with great credit during the Mexican War, receiving the brevet of 1st Lieutenant for gallantry at the battles of Contreras and Churubusco. In 1861, when the War broke out, he was Captain of the 3d U. S. Infantry, and commanded his regiment at the battle of Malvern Hill, receiving the brevet of Major for his gallant and meritorious services at that battle. He was also in command of his regiment at Manasses, Antietam, march to Falmouth, Fredericksburg, and Chancellorsville, and received the brevet of Lieutenant-Colonel for his gallantry at the two last named battles. In 1864 he was promoted Major of the 15th Infantry, transferred to the 33d Infantry in 1866, and to the 8th Infantry in 1869; was promoted Lieutenant-Colonel of the latter regiment in 1873, and Colonel of the 5th Infantry, June 22, 1882. He retires after an active service of over 40 years amid universal good wishes for his future. His retirement causes the following Infantry promotions: Lieutenant Colonel GEORGE GIBSON, 3d, to Colonel 5th; Major HORACE JEWETT, 16th, to Lieutenant Colonel 3d; Captain JOHN B. PARKE, 10th, to Major 16th; 1st Lieutenant WALTER T. DUGGAN, 10th, to Captain; and 2d Lieutenant C. J. T. CLARKE to 1st Lieutenant, same regiment. Surgeon General MURRAY, who was retired Aug. 6, dates his military record from June 29, 1846, when he was appointed an Assistant Surgeon, with rank of 1st Lieutenant. In 1851 he was appointed Captain; in 1860, Major and Surgeon; in 1866, Lieutenant Colonel and Assistant Medical Purveyor; in 1882, Assistant Surgeon General, with the rank

of Colonel, and November 23, 1883, Surgeon General, with the rank of Brigadier General. During the War he served with efficiency and skill in several responsible positions, and has earned an enviable record in the Medical Corps of the Army. Who will succeed him at the head of that Corps is, as yet, a matter of conjecture.

OUR English contemporary, the *Army and Navy Gazette*, has had the good sense to understand and expose the grievous political blunder committed by England in its interference with the affairs of Egypt at the prompting of the cent per cent. holders of Egyptian securities. The occupation of Egypt, it says, has entailed on England a great outlay of money and a heavy blood-tax, has also deprived her of the friendship of the only States on which we could depend for effective alliance against Russia, and has afforded excuses and pretexts for the most insidious intrigues and the most unfriendly machinations against her. "Look at Egypt?" That is the *mot d'ordre* when England makes any appeal to the powers for co-operation in her just remonstrances against infidelity in respect of treaties, and against cynical disregard of solemn international obligations. Meantime, the death-rate among officers and men tells its own sad tale, and indicates the necessity of frequent change and of careful selection, for now that the excitement of active service is over the troops feel the effect of the summer of Egypt, and only the fittest survive the climate. But for the sanatarium at Cyprus the mortality would be far higher than it is.

THE Senate has confirmed all the Army and Navy nominations sent to it this session excepting Lieutenant MCBLAIN, of the Army, and one case in the Navy left over—that of Commodore TRUXTUN. There were some delays in cases pending before committees, but as none were left over or rejected no harm was done. Of the nominations confirmed during the closing days of the session the only ones that provoked any discussion were the FITZ-JOHN PORTER and the Cavalry cases, in which the incapacity question was involved. The PORTER nomination was confirmed by about the same vote that carried the bill through. No vote was taken on the Cavalry cases, but it is understood that several members of the Committee on Military Affairs made speeches protesting against the injustice done Major MERRILL by the promotion of the officers in question. Major MERRILL will now have to look to Congress to pass a special bill to give him the rank to which he is entitled.

WE learn that the question of transferring General MILES's headquarters from Prescott, Arizona, to Albuquerque, N. M., has never been considered by the War Department. It is presumed that the report of the transfer grew out of the fact that General MILES established a reservation at Albuquerque. He was directed to revoke the order, however, as it was held that he was infringing upon the prerogatives of the Executive, and had no power to establish a reservation.

THE death of SAMUEL J. TILDEN, which occurred at his country seat near Yonkers, N., on Wednesday morning, deprives the country of one of its ablest and most patriotic and distinguished citizens. The details of Mr. TILDEN's life, and the circumstances of his death, have been given so fully in the daily papers that we need not repeat them here. His last public utterance took the form of a letter addressed to Senator HAWLEY urging an appropriation for fortifications. The spirit in which this wise and patriotic suggestion was received by Mr. TILDEN's political associates is shown in the fact that the Fortification bill was the only one of the appropriation bills that failed to become a law, the House having refused to yield to the amendments of the Senate, which were in the line of Mr. TILDEN's recommendations. In the light of this fact how empty appear the honors paid to the memory of Mr. TILDEN by those who reject his counsel, while they praise his wisdom and patriotism. It is within our knowledge that Mr. TILDEN gave much study to the subject of fortification, he having sent to this office for back volumes of the JOURNAL containing desired information. They day will come when the soundness of his judgment in this matter will be abundantly proven.

THE bill to increase the Navy, as it finally became a law, is the same as that published on page 4 of the JOURNAL of last week, with the exception of two sections, which are altered so as to exclude purchases from abroad, now reading as follows:

Sec. 4. That the armor used in constructing said armored vessels and for completing said monitors shall be of the best obtainable quality and of domestic manufacture, provided contracts for furnishing the same in a reasonable time, at a reasonable price, and of the required quality can be made with responsible parties.

Sec. 6. That the engines, boilers, and machinery of all the new vessels provided for by this act shall be of domestic manufacture and procured by contract, unless the Secretary of the Navy shall be unable to obtain the same at fair prices, in which case he may construct the same, or any portion thereof, in the navy-yards of the United States: *Provided*, That the Secretary of the Navy may purchase abroad only such shafting and other special materials as it may be impossible to obtain in the United States in time for use in the construction of the vessels herein provided for.

THE Secretary of War, believing that this year's graduates of the Military Academy are clearly entitled to their pay as second lieutenants from the date of their appointment as such, has directed that they be placed upon the pay rolls as second lieutenants from July 1, without asking an opinion from the Second Comptroller on the subject. However correct the Comptroller's ruling as to the pay of a graduate as second lieutenant at the time it was made, the Secretary has no hesitancy in saying that the usual law for the relief of surplus graduates defines the commissioning of a graduate as a promotion and hence he is entitled under the law to the pay of his new rank from the date of promotion. Whether the Comptroller agrees with him will probably not be known until the pay rolls of the graduates for the month reach him. If not, the graduates will be called upon to refund certain overpayments. Congress having failed to pass the bill for the relief of those affected by the Rodman decision, it is presumed now that the Comptroller will decide that stoppages be made against all those held to have been overpaid. As the process by which these recoveries are made is very slow, it is not unlikely that the bill referred to can be passed next year before the time comes for refunding. When it once becomes known that the accounting officers are in earnest about collecting this back pay the officers concerned will have an incentive to work for the passage of the bill, and action once concentrated there can be little doubt of its going through.

THE London *Times* having recently given publicity to charges of corruption against officials of the Ordnance Department of the British War Office, General F. A. Campbell, Major General E. Reilly, and Brigadier General H. J. Alderson addressed a letter to the Surveyor General of the Ordnance stating that, as the officers successively in responsible charge of that Department during the last eleven years, they absolutely deny the truth of the charges mentioned. They, therefore, court the fullest inquiry by any tribunal. The Surveyor General, in reply, stated that he had submitted the matter to the Secretary of State, who is unable to see how, in the absence of *prima facie* evidence, which he has invited from those making the charges, he could institute any inquiry which could be of service in satisfactorily disposing of such imputations. Meanwhile, the Secretary of State informs the officers concerned that nothing has come within his cognizance to weaken his belief in the perfect integrity of the officers of the Department, and that his Royal Highness the Field Marshal Commanding-in-Chief, whom he has consulted, concurs in these views.

A SINGULAR accident recently occurred at the English Royal Gun Carriage Factory. After the metal for a 68-ton gun had been for a time in the mould a workman descended into the pit to block up the mould-casing preparatory to its being removed. The steel had barely set on the outside, and as soon as the cylinder was raised from the floor the liquid was all poured out, overwhelming the unfortunate workman before his companions could move to his help. Mr. Edmonds, the manager, was immediately called, but no trace of the man could be observed in the well, and the metal was visibly cooling on the surface, threatening to encase the remains of its victim in a solid block of steel. Inspector Cavell, of the Royal Arsenal police, urged that at least a portion of the body should be recovered, if only for the sake of an inquest, and Mr. Edmonds and his men went zealously to work with iron rods and hooks and ladles, and, notwithstanding the painful heat, succeeded in extracting a shapeless mass, which Dr. Wilson, who was in attendance, pronounced to be the interior of the trunk. The head and limbs could not be found, but after the steel block had cooled and solidified some fragments were seen projecting from the surface.

IN a lecture on the use of the revolver, before the Royal United Service Institution, Major Kitchener said: "The Americans depend very much on the revolver in war. They maintain that it is the cavalry weapon, *par excellence*. General Lee, writing on the subject, says: 'The sword has lost much of its effectiveness by the improved revolver, with which the cavalryman would make a dashing charge with more confidence.' The revolvers used are Colt's, and Smith's, and Wesson's. The Russians have also adopted an American revolver, and all infantry officers, sergeant majors, drummers, buglers, non-commissioned officers of transport, and clerks are armed with it. The Russians have recently been supplied with 100,000 revolvers on a single contract, and this is not more than half the number that they possess. Revolvers were in use in the French, German, Spanish and Austrian Armies."

COLONEL HOPE in a letter to the *Admiralty Gazette* says: "Some years ago the Gun Ring conducted an elaborate series of experiments to ascertain the best point at which to ignite this powder, and determined that the best point was 0.4 (they are very fond of decimals) of the length of the cartridge from the rear, and that the worst point was through the axis of the breech. The truth is," he says, "there is no 'best point' at which to ignite the powder. The only practical or truly scientific method of ignition is to take proper precaution that, however slowly it may be desired that the powder shall afterwards burn, all the different hexagons shall, at all events, start fair, and be ignited at mathematically the same moment. This can only be practically effected by my system of radial ignition through a vast number of vents, delivering outwards from the barrel of a little gun extending along the whole axis of the cartridge."

ANOTHER batch of claims of naval officers for mileage under the Graham decision went to the Senate last week, and they have been provided for, with all the rest that have heretofore been reported to Congress and published in the JOURNAL, in the General Deficiency Bill. The bulk of these claims have now all been settled; a few isolated cases may have to be sent to Congress next year. The last batch consists of: William Welch, $223.67; C. H. Baldwin, $418.40; estate of Thomas A. Dornan, deceased, $342.61; executrix William S. Bishop, deceased, $585.32; Isaiah E. Crowell, $272.07; J. N. Miller, $99.95; estate of George K. Adams, deceased, $671.91; Fredrick Elliott, $696.92; estate of Charles A. Babcock, deceased, $663.75; Phineas J. Horwitz, $83.65; Grenville Lewis, $154.71; executrix of John Madigan, deceased, $264.10; estate of Josiah D. Penner, deceased, $263.25; estate of C. H. B. Caldwell, deceased, $378.71; estate of John S. Nicholson, deceased, $805.06; estate of William Johnson, deceased, $709.09; R. E. Carmody, $240.39.

THE *Horse Guards Gazette*, speaking of the Wimbledon meeting, says: "This great gathering of pot hunters and pleasure-seekers is no more composed of volunteers on whom the country can rely in time of need than was the Socialistic rabble that recently sacked the West End thoroughfares of London. The camp is merely a means of enabling certain individuals to make money on which to live at ease for the rest of the year, while it serves as a picnic and huge revel to hundreds of other men who are glad of the excuse it affords them to get away from the restraint society imposes upon them when living in the bosom of their families."

ALTHOUGH the names of Lieutenants Steever and Dickinson were officially published as confirmed, July 26, they were not actually confirmed until August 2. Acting upon the official publication of the proceedings of the Senate, their commissions were made out and signed by the President, but before they went out it was discovered that the official certification had not come from the Senate, and they were consequently held over until the official papers came in a few days later.

A CORRESPONDENT writes: "Lieut. Frank P. Fremont, 3d Infantry, stationed at Fort Missoula, M. T., has completed his qualification as a sharpshooter, this year, firing only 150 shots. This beats the magnificent record of Capt. Wm. Krause, 3d Infantry, who is reputed to have made his qualification in 170 shots. Both these experts have been beaten by a private of Co. B, 3d Infantry, stationed at Fort Missoula, M. T., who has made his sharpshooter's qualifying scores in 145 shots. Next!"

GENERAL GRANT'S old regiment, the 21st Illinois, will hold its reunion at Mattoon, Ill., Sept. 25. The Grant Monument Association of New York City have written that they wish to secure a picture of the surviving members of the old regiment, with their flags.

General and Mrs. Ayres are recruiting at Rev. Dr. Pease's in Asheville, North Carolina. The General's many friends will be glad to learn that he has recovered from the malarial influences of San Augustine and looks younger than ever.

The death of Major Whittlesy again makes a vacancy on the disability retired list, so that another retirement will soon follow.

Brigadier-General Philip St. G. Cooke, retired, has filed charges at the War Department against Colonel Fitz John Porter, growing out of a report made by the latter in regard to the conduct of the former at Gaines's Mills, at the beginning of the seven days' fight in June, 1862, when Colonel Porter commanded the 5th Army Corps, and General Cook commanded a brigade of cavalry. It is alleged that Colonel Porter reported that General Cook mismanaged his troops on that occasion, and did more harm than good to his cause. Since then General Cook has asserted that the report was false and malicious, and it is understood that he now asks that the facts be investigated. No action has yet been taken in the matter by the Secretary of War. Col. Porter has not yet been commissioned, and is not regarded as an Army officer.

The enforced resignation of General Von Edelsheim-Gyulai, the best cavalry officer in the Austro-Hungarian army, and the appointment as Commander-in-Chief at Buda-Pesth of General Pejacsevics, a Croat, has caused much indignation in Hungary, so much so that it is said the Austrian Premier will resign his office if the former General is not restored to his position.

The *Vandalia* took on board her powder on Thursday, and it is expected that she will sail for the Pacific Station by Monday of next week. The *Juniata* should go to sea before Monday next. It was announced some time ago that the *Juniata* would make a voyage around the world, visiting unfrequented ports, and it is understood that the *Vandalia* is to make a similar cruise instead of going direct to her Station, as was at first intended. While nothing has yet been announced officially, it is believed at the Navy Department that the Secretary of the Navy is thinking of inaugurating two-year cruises, after the system adopted by the German Navy, instead of sending a vessel to one particular Station for three years. In this way the sea duty of most of the officers will be about equally agreeable, and there will not be so much choice in securing pleasant duty. It is probable, however, that the flagships will remain within their respective stations.

Mr. John Roach, the eminent shipbuilder has so far recovered from an illness of three or four weeks that he will leave the city for a month's change of air at Mt. McGregor on Monday. His many personal friends, and all who are interested in American enterprise and industry, will be glad to know that his malady has been by no means so serious as has been rumored—he having been confined to his bed but three days—and that the mental and physical vigor of "old John Roach" are still equal to almost any demand upon them.

LATE ARMY ORDERS.

Capt. Daniel M. Appel, assistant surgeon, Jackson Barracks, La., is relieved from duty in the Div. of the Atlantic (S. O. 103, Div. Atl., Aug. 6.)

B board of officers to consist of Capts. Lewis Smith and Jas. B. Burbank and 1st Lieut. Chas. B. Satterlee, 3d Art., will assemble at Washington Barracks, D. C., Aug. 10, to report upon the qualifications of Thos. Shea, late private Troop F, 6th Cav., an applicant for appointment as superintendent of a national cemetery (S. O. 103, Div. Atl., Aug. 6.)

A furlough for three months is granted Hospital Steward Max Arendt, Fort Monroe, Va. (S. O. 103, Div. Atl., Aug. 6.)

Orders of Aug. 6.—Surg.-Gen. Robert Murray, retired and ordered to his home. Chief Med. Purveyor J. H. Baxter will act as surgeon general until a new appointment is made. The Board of Ordnance Officers appointed June 23 and reconvened July 6 will reconvene at Frankford Arsenal Aug. 6. Upon adjournment Capt. Chas. Shaler will return to his station, New York City. 1st Lieut. Wm. J. Campbell, 22d Inf., is relieved as a member of General Court-martial at Columbus Barracks, O., and Capt. John S. McNaught, 20th Inf., detailed instead.

NEWPORT NOTES.

August 5, 1886.

Gen. Fitzhugh Lee, of Virginia, is in town, the guest of Mr. C. C. Baldwin, of New York The officers of the Brazilian man-of-war were handsomely entertained at Fort Adams by Colonel C. L. Best, U. S. A., and officers. The visitors were very much interested in the drill of the light battery. Commodore Saldanha, accompanied by the executive officer of the frigate and the young prince, paid his respects to Gov. Wetmore this morning. As the Governor was called to New York, the visit was returned this afternoon by Col. F. G. Harris, of the Governor's personal staff. The frigate sails Sunday. The attendance at the Casino to night was light. The Brazilian prince was among the guests.

FORTY-NINTH CONGRESS.

Congress adjourned *sine die* at 4 o'clock on Aug. 5. The closing days were uneventful to the Army and Navy. The only measure, except the several general appropriation bills—the Sundry Civil, General Deficiency, and River and Harbor bills—of interest passed this week was the resolution accepting the Grant relics, which, through the personal efforts of Secretary Endicott, was pushed through at the last moment. The fortification bill failed to become a law, leaving the Ordnance Department of the Army and all the work connected with that Department in a very sad plight. The conferees held two sessions and were unable to reach an agreement upon any one of the differences, Mr. Randall and his Democratic associates of the House stubbornly resisting all the increases made by the Senate, and the Senate conferees taking an equally firm stand against all efforts of compromise made by the House. The failure of Congress to pass a fortification bill practically closes the work of the Bureau for the next few months. The Springfield Armory, where work on small arms, for which $400,000 was appropriated, is the only branch of the Department where work will not have to be stopped. The experimental work at Sandy Hook will cease. The new bureau 8-inch steel gun was to have been tested there this month, but it is doubtful now if it can be fired.

The session began on Monday, Dec. 7, 1885, and covered a period of 241 days, exclusive of Sundays. Of this time the Senate was in session 164 days and the House 185 days. There were introduced in the House 10,014 bills and 214 joint resolutions, and in the Senate 2,891 bills and 83 joint resolutions, a total of 13,202. The greater number were measures of a private local importance only. 1,101 measures were passed by both Houses; 241 Senate and 860 House bills. Of these 1,035 were received by the President, and of that number 814 were approved; 157 became laws without the President's signature; 115 were vetoed, and 9 failed for want of signature at time of adjournment. Of the new laws 746 were House measures and 241 Senate measures. Of the measures vetoed by the President 36 were Senate bills and 77 House bills. 28 of the Senate bills vetoed were private pension bills. Three were for the erection of public buildings. Of the House bills vetoed 74 were private pension bills and three were for the erection of public buildings. The number of measures vetoed during the session was four more than have been vetoed from the foundation of the Government to the beginning of the session just closed. Only one bill (that granting a pension to Joseph Romiser) was passed by the two Houses over the veto.

The following items of interest to the Army and Navy are contained in the Sundry Civil bill as it finally became a law:

Under the Navy Department—Repairs to dry dock, New York, $100,000; completion of iron crane at Mare Island, $22,000; completing stone dry dock at Mare Island, $191,595; general repairs and preservation of Navy-yard and stations, $125,000.

Armories and Arsenals—Improvements at Rock Island Arsenal and Rock Island Bridge, Ill., $106,250; Springfield Arsenal, Mass., including a new milling shop, $45,000; Benecia Arsenal, Cal., $4,700; Frankford Arsenal, Pa., $20,200; New York Arsenal, $500; Piccatiny powder depot, N. J., $35,000; Sandy Hook proving grounds, N. J., $3,000; testing machine at Watertown Arsenal, $10,000; contingencies at all arsenals, $50,000; completion of the State, War, and Navy Department Building, $5,000; Hot Springs Army and Navy Hospital, $41,620; for the construction of buildings at and the enlargement of such military posts as in the judgment of the Secretary of War may be necessary, $225,000, $15 000 of which sum may be used for the purchase of additional land near Atlanta, Ga., for the ten-company post being erected there; construction of a new wharf at Fort Monroe, $100,000.

Signal Service—$717,811.38, including commutation of rations and fuel; and no money herein appropriated shall be used for pay and allowances of 2d lieutenants appointed or to be appointed from the sergeants of the Signal Corps, under the provisions of the act approved June 20, 1878, in excess of 16, or for the pay and allowances of exceeding 470 enlisted men of the Signal Corps. And in reducing the force the enlisted men at Fort Myer, Virginia, denoted the "permanent party," shall be first mustered out; *Provided*, That this restriction shall not apply to the pay or commutation or expense of return from their stations to their homes of any enlisted men in excess of the 470 men, accruing prior to the passage of this act.

Miscellaneous objects—Publication of maps of surveys and reconnaisances in military divisions and departments, $2,500; national cemeteries, $40,000; for artifical limbs, $200,000; expenses of military courts, $10,000; publication Official Record of War of Rebellion, $36,000; Fort Leavenworth Military Prison, $89,917.76; books, etc., for Artillery School, $5,000; National Volunteer Soldiers' Home, $1,631,000; claims of colored soldiers and sailors, $1,503; travelling expenses of officers and men of the Navy on duty with Coast Survey and for any special surveys that may be required by Light House Board, $4,000; new boilers for *Albatross*, $20,000.

The Navy Appropriation bill for the current fiscal year provides for the payment of a number of employees under the appropriation "Civil Establishment," that were formerly paid from the regular appropriations of the different bureaus.

The following are the amounts allowed under this head, out of which the salaries to the persons mentioned are to be paid:

Bureau Navigation—For master of tugs, storekeepers, clerks, writers, and all clerical work, $9,000.

Bureau Ordnance.—For writers, clerks, foreman, draughtsmen, assistant draughtsman and a chemist, $23,204.

Equipment and Recruiting.—For clerks, writers and superintendent of ropewalk, $16,800.

Yards and Docks.—Writers, clerks, messengers, telegraph operators, draughtsmen, foreman laborers and foreman masons, quarterman, brick and stone masons, and pilots, including the work of bell ringing and lamp lighting, $62,000.

Provisions and Clothing.—Firemen, writers, receivers, assistant receivers, messengers, leading men and pressmen in inspection office, superintendent of coffee and spice mill, box maker, coffee roaster, engine tender, teamster, telephone operating, cutting, machine operator, and two laborers, $35,000.

Construction and Repairs.—Clerks, draughtsmen and writers, $43,000.

Steam Engineering.—Clerks, draughtsmen, assistant draughtsmen, messengers, writers, receivers and weighers, $27,667.25.

A prohibitory clause is added to each of these provisions against the use of any other fund for the payment of this class of employees. This legislation will necessitate a reduction in number and pay of many of the Navy Yard employees. The several bureaus have submitted to the Secretary of the Navy, lists which have been approved by him, of ratings and pay to conform to the new law. Requisitions for funds under the appropriation, "Civil Establishment" will now be passed by the Department.

The following Senate bills are pending in the House Committee on Naval Affairs:

S. 1591. Authorizing retired list for enlisted men of the Navy.

S. 1527. To provide a temporary home for discharged seamen.

S. 1417. To provide a system of deposit for savings of seamen.

S. 1298. To fit out an expedition to observe the total eclipse of the sun on Aug. 29, 1886.

S. 1568. To authorize Commander John W. Philip, U. S. N., to accept silver pitcher from the Government of U. S. of Colombia.

S. R. 48. Authorizing Rear Admiral J. W. A. Nicholson to accept medal conferred upon him by the King of Sweden.

S. 2708. For relief of Maria L. Strong.

S. 1630. To increase pension of widow of Capt. Dominick Lynch, U. S. N.

S. 882. To regulate pay of graduates of the Naval Academy.

S. 2661. For relief of Commander Quackenbush.

S. 747. For relief of Capt. Andrew W. Johnson.

The bill for the relief of Alfred Hedberg, late Captain 15th Infantry, has been reported from the Senate Military Committee with an amendment authorizing his appointment as a 2d lieutenant instead of captain.

The General Deficiency bill, as it finally became a law, contains the following items of interest to the Army and Navy:

To pay the widow of Dr. Octave Pavy, of Arctic fame, $2,829.11, for balance of pay due him; to pay the widow of Surg. J. J. Woodward, U. S. A., $2,500, for services rendered by her husband in the last illness of President Garfield; for completion of the Army and Navy hospital, $8,950; deficiencies under head of transportation of the Army, $95,000; for clothing for the Army, $68,000; for fuel allowance to enlisted men of the Signal Service, $2,946; for extra duty pay to 13 men of the Signal Corps, $1,879.75; for payment of Graham mileage claims, $144,463.15.

Provision is also made for the payment of all claims for arrears under the Morton act; for horses and other property lost in the military service; for bounty and other claims certified by the accounting officers to Congress for payment. There are also a number of small amounts appropriated to cover deficiencies in the various bureaus of the War and Navy Departments.

CAPTAIN HOWGATE'S BOND.

Some time ago the United States Government brought a suit against Lethem H. Rogers in the United States District Court, before Judge Brown, to recover from the defendant $12,000 as surety on an official bond dated March, 1878, and given by Henry W. Howgate as property and disbursing officer of the Signal Service of the United States Army for the faithful discharge of his duties. It was admitted that Howgate became a defaulter to an amount largely in excess of the penalty of his bond, and the only defence was that the office was not created or authorized by statute.

Judge Brown Aug. 4 gave a decision in favor of the plaintiff for $12,000 and interest. In his decision, Judge Brown says: "It has been repeatedly adjudged by the Supreme Court that bonds may be required by the Government from officers appointed to places of trust, though there is no express statutory authority to take such bonds, and that they will be as valid as common law obligations. It is sufficient to make the bond a valid obligation, that it is voluntarily given, and that the office and the duties assigned to the officer and covered by the bond are duly authorized by law. Such is the present case."

RIVERS AND HARBORS.

"I tell you," said the mathematical officer of the Engineer Corps, "Congress has not grappled with the problem of rivers and harbors properly. The United States has not spent as much money on her harbors since 1785 as she collects in the way of customs in one year at the ports of New York, Philadelphia, Baltimore, and New Orleans, and private enterprise on the river Clyde has spent more money to clear the channel to Glasgow than we have ever spent on all our rivers and harbors combined. Wait till the present bill gets in working order, though, and we may have another kind of a story to tell."—*Philadelphia Press.*

THE MEXICAN ARMY.

According to the "Statesman's Year Book," the Mexican Army consists of 3,700 officers and 45,323 men on a peace footing and 160,963 men on the war footing. Her navy is small, consisting of three gun boats and two screw cruisers. She would easily be able to put 300,000 men in the field. The population in 1882 was 10,460,703. The treasury estimates for the year ending June 30, 1886, place the revenues at $29,760,000 and the expenditures $38,903,353. The public debt of Mexico in 1885, over $50,000,000 of which is held by England, was about $155,000,000, which includes $25,000,000 of floating debt now funded in six per cent. bonds.

COURTESIES FROM THE NAVY.

Lieut. Frederick Schwatka, in a letter of July 1 from Sitka, says: "At Chilkoot we found the U. S. steamer *Pinta*, the man-of-war stationed in this part of Alaska for the purpose of maintaining order and peace among the Indians of the country. We presented our letters from the Secretary of the Navy, Mr. Whitney, requesting the commander of the *Pinta*, Capt. Nichols, to convey us from any point in Southeastern Alaska to Yakutat or Icy Bay, or some point available for the ascent of Mount St. Elias and the exploration of the St. Elias Alps, if no duty interfered. Capt. Nichols received us very kindly and told us he would take immediate steps to carry out the wishes of the Secretary of the Navy, as there seemed to be no immediate use for the *Pinta* in the inland waters, and the trip to Yakutat Bay, which he recommended, would take but a day and a half from Sitka, where he would call for us in a few days, and where we would disembark from the Ancon. There were circumstances in this kindness shown by the Secretary of the Navy that I must say made me feel unusually grateful. In all my previous explorations I had had first to overcome or slight the most determined opposition from those in high authority in my own department, where I ought to have had the most cordial help, and here from wholly another department of the Government, and when I had the least claim to expect it, it was generously placed at the disposal of the little party in their modest attempts to know some little concerning an unknown part of our country."

THE REASON WHY.

To the Editor of the Army and Navy Journal:

MY attention has just been directed to a letter signed "Deriter" (retired) in your issue of the 17th July, asking: "How it comes to pass that the Army Mutual Aid Association with something like a membership of 200 more than the Navy Mutual Aid pays a benefit of $1,000 less."

The simplicity of this question can be equalled only by that of the "few interested parties," in whose behalf said question is propounded. To save words, the tables of assessment rates (including expenses) which hold in the two associations are subjoined:

NAVY MUTUAL AID.

Class.				Assessment.
A,	from 21 to 25	years	of age	$3 10
B,	" 25 to 30	"		3 50
C,	" 30 to 35	"		4 10
D,	" 35 to 40	"		4 80
E,	" 40 to 45	"		5 70
F,	" 45 to 50	"		6 90
G,	" 50 to 55	"		8 50
H,	" 55 to 60	"		11 00
I,	" 60 to 62	"		13 20

ARMY MUTUAL AID.

Class.	Assessment.
1. Under 30 years	$2 00
2. Thirty to 35 years	2 50
3. Thirty-five to 40 years	3 00
4. Forty to 45 years	3 50
5. Forty-five to 50 years	4 00
6. Fifty to 55 years	4 50
7. Fifty-five to 60 years	5 00
8. Sixty to 65 years	5 50
9. All over 65 years	6 00

"The Reason Why" is now very plain, I trust. But let us go into the matter just a little further. At date of last annual report the Navy Mutual Aid Association showed a membership of 758 paying a benefit of $3,573.70, giving an average individual assessment of $4.71. The Army Mutual Aid Association last reported a membership of 927 and benefit of $2,500. Multiplying the difference of membership (169) by $4.71 and adding the product to $3,573.70 gives $4,369.69, which is the probable benefit that the Navy Mutual Aid would pay with a membership equal to ours: or, what is more to my present purpose, it is the probable benefit that we would pay were we working under their scheme instead of our own. This estimated increase of benefit is, in fact, too large, because the Navy Mutual Aid Association now admits nobody over 45 years of age, whereas, at last report, it carried 75 members formerly admitted between ages 45 and 62, whose higher rates of assessment (ranging from $6.90, Class F, to $13.20, Class I) helped to make up the average $4.71 which I have used. For the 169 new members, however, the rates would run only from $3.10, Class A, to $5.70, Class E. But whatever is proved with the larger benefit would make in our favor still more should a smaller sum be employed. Taking "Deriter" as belonging to our 6th class (for I think I recognize his style) and assessing him for a mortality of 1⅛ per cent., the rate for those admitted at his age, in the N. M. A. A., we have 13x$8.50=$110.50 as the cost of his insurance of $4,369.69; that is to say, $25.29 per $1,000 insurance.

In the Army Mutual Aid Association his $2,500 insurance would cost him for the same normal mortality 13x$4.50=$58.50, which is at the rate of $23.40 per $1,000 of insurance, or nearly $2 per $1,000 cheaper.

Might not "Deriter" find something more profitable (not to say becoming) than turning up such mare's nests as this? Had his been a genuine desire for information only, a simple request preferred in the usual way for a copy of the N. M. A. A's. table of rates would have enlightened him at once. Intelligent discussion of our affairs should be, and is, invited and welcomed at all times; but it is respectfully submitted, that in common fairness to the Association, all members ought to refrain from ignorant and cranky criticism. It is this, perhaps, more than anything else, that is apt to engender discontent," etc., (see "Deriter"), and so probable does this seem to me that, for one, I would gladly see all such makers of paltry points take their departure from our Association, provided always that there could be any assurance that even when out of the fold they would have the pride to get instruction or the grace to keep quiet. But, seriously, should not any earnest and intelligent man be above hurling such homœopathic missles as "Deriter's?"

WM. P. DUVALL.

THE WAMPANOAG AND VANDALIA.

To the Editor of the Army and Navy Journal:

To your quotation from Congressman Boutelle's speech, given in page eleven of the last number of the JOURNAL, there should have been added this comment: The *Wampanoag* never went to sea again after the famous trial trip in which it was alleged she made 17¾ knots, and ill-natured people said she was so thoroughly used up she could not go without a multitude of repairs. She was like the Quaker's horse. She cost, first and last, nearly two millions of dollars, and was sold about a year ago for forty thousand dollars! Her alleged English rival, the *Inconstant*, is still in existence, practically as good as ever, and has cost in all these years only about £10,000 in repairs. Such "staying" powers as these—even if the speed be only 15 knots, as alleged—are better than such brilliant spurts as that of the *Wampanoag*. In point of fact, however, the *Inconstant* made 16⅛ knots.

It is rather funny, too, to read, as a quotation from Sir Thomas Brassey, the identical language used by Chief Engineer J. W. King in reference to the *Vandalia*. This language in Sir Thomas Brassey's book is quoted verbatim from King's book, and by Mr. Boutelle made to do duty as the opinion of a disinterested observer!

Mr. King, it must be remembered, was Engineer-in-Chief when the *Vandalia's* machinery was designed. She was undoubtedly a very fair ship and performed very well, but she has recently been greatly "improved" by the Bureau of Steam Engineering, and, as a consequence, her speed has fallen from 12 knots per hour to less than 10. Don't you think it is high time to have more performance and less brag and gab? OBSERVER.

AUGUST 2, 1886.

A STATEMENT FROM MAJOR McKEE.

To the Editor of the Sun:

SIR: I notice in *The Sun* of July 31 an extract from the *St. Paul Globe* entitled "A Cheap Spree," which states that Mr. R. B. Hayes was the cause of getting "Major Paine of the Ordnance Department" into trouble on account of alleged conviviality with the said Paine in Washington. There is no officer named Paine in the Ordnance Department, nor has there ever been that I am aware of. I believe this statement refers to myself, and as it does Mr. Hayes a gross wrong I ask that you publish the following statement:

While I was stationed at Rock Island Arsenal, Illinois, a party of gentlemen, including Gen. Singleton, Comdr. Reed of the Navy, the Hon. Heister Clymer, and Gen. D. M. Frost, stopped there on a steamer to see me. We were all talking together in a social way when Frost said:

"McKee, they say in St. Louis you were ordered away from Washington on account of your being too convivial with Hayes, and being caught by the family taking him home one night when he was full. How is that?"

Now, as I had never spoken a word to Mr. Hayes in my life, and had heard frequently of his being a strict total abstinence man, I concluded, of course, Gen. Frost was joking, and that the answer should be similar to what I would reply if he had asked me whether I had not been ordered away for firing rockets at Mr. Peter Cooper and Mr. Corcoran, or dancing the can-can on top of the Washington Monument.

The absurdity and utter improbability of the thing seemed to me so patent that I replied at once something to this effect:

"You don't tell me that is out, do you? They saw us going in late, and that settled the business."

The action of the entire party of gentlemen was such as to leave no doubt on my mind that this idle badinage was thoroughly understood. It seems Gen. Frost, however, took it in grave earnest. Hence, no doubt, this ridiculous story about "Major Paine," which emanated originally from some malicious brain, which I, conceiving it to be simply a silly joke of the moment, answered in the same spirit.

GEO. W. McKEE.

ALLEGHENY ARSENAL, PITTSBURGH, Pa., Aug. 2.

BILLS PASSED BY CONGRESS.

OF the seven hundred private measures that have become laws during the first session of the 49th Congress, the following relate to the Army and Navy:

To close the accounts of Capt. James G. Martin, late Capt. and Asst. Q. M., U. S. A.; giving the widow of U. S. Grant free postage; for relief of Hollister E. Goodwin, Asst. Q. M., U. S. A., and his sureties; authorizing the printing of 4,000 addition l copies of report on European dock yards.

Bills giving pensions for the following persons have become laws:

Daughter of Brig.-Gen. Joseph R. Smith, $20 per month; children of Surgeon Alfred M. Owen, $15 per month; children of Lieut. H. M. Harrington, $15 per month; Actg. Asst. Paymaster Bailey Hascall, Chaplain John M. Green, Actg. Ensign John Owens, Lieut. Alonzo V. Richards, Signal Corps, Ensign J. W. A. Bennett, subject to general pension laws; the daughter of Gen. John McNeil, from $20 to $30.

Also pensions for the widows of the following officers:

Gen. U. S. Grant, $5,000 a year; Col. Geo. A. H. Blake, subject to the general pension laws; Gen. Winfield S. Hancock, $2,000 a year; Gen. H. W. Benham, $50 per month; Rear-Admiral and A. Harwood, $50 a month; Commodore Thos. S. Fillebrown, increased from $30 to $50 a month; Gen. Jas. S. Jackson, $50 a month; Ord. Sergt. Lewis Leffman, $25 per month; Lieut.-Col. Joseph A. Haskins, $50 per month; Commander T. A. M. Craven, from $30 to $50 per month; Major Gen. Ward B. Burnett, $50 per month; Rear-Admiral Alexander Murray, increased from $30 to $50 per month; Brig.-Gen. Marcellus M. Crocker, from $30 to $50 per month; Major-Gen. David B. Birney, from $30 to $50 per month; Commodore Alexander A. Semmes, $50 per month; Major F. J. Farquhar, $40 per month; Commodore Homer Crane Blake, U. S. N., $50 per month; Major-Gen. Godfrey Weitzel, Engineers, U. S. A., $50 per month; Inspector-Gen. Jas. A. Hardie, $50 per month.

THE HARBOR OF NEW YORK.

IN an excellent letter to the New York *Times* in reference to the control of the improvement of New York harbor, Colonel Walter McFarland, C. E., U. S. A., says:

Strange as it may appear there is not now a single law of the United States under which any of the navigable waters of the United States may be protected against injury. Now, this being the case, what does the commission proposed in 1856 offer that is not now afforded by the Board of Engineers?

In 1856 the duties of the Corps of Engineers were restricted almost exclusively to the construction of fortifications. Few appropriations were made for river and harbor works and little work was done upon them, and the Corps of Engineers not then being experts in such work, there was reasonable ground for the formation of such a commission as was then proposed. A commission of engineers would, however, even then, have been better than the one proposed had it been possible to have secured one that could have been kept out of politics and would have possessed the honesty, fidelity and singleness of purpose that always have characterized the Army, the Navy, and the Coast Survey.

But the condition now is wholly changed. Since the close of the war the Corps of Engineers has had almost nothing to do in the construction of fortifications, while the appropriations for river and harbor works have been very large, and they have had more than twenty years of constant study and experience in their management. We have engineers now who are thoroughly conversant with this kind of work, and who, besides possessing the other necessary qualifications before referred to, have been in charge of these works for many years. Why, then, change this established system which has worked well for something else that must be an experiment? The power that would appoint the commission now appoints the Board of Engineers. The duties that are now performed by the one with experience would then be performed by the other without experience; and even a very young schoolboy knows that *experientia docet*.

The State of New York has lived a good many years under the Constitution of 1846. Why throw away that Constitution and go back to that which was previously in force—or still worse, to one that was only proposed, but never adopted? And yet it is such a thing as this which Mr. Higgins proposes. What is it, then, which makes it so very manifest to this gentleman that men without experience are to be preferred to men with it? Is it on such a basis that he manages his own business? If I may be pardoned for using his own flippant expression, what superhuman qualities attach to him or to the gentlemen by whom he wishes to displace the U. S. Engineers that he is so ready to throw experience to the winds and to try his own crude experiment in its place?

No one has a deeper respect for the United States Navy and the United States Coast Survey than I have. Their work has been admirable in every way and an honor to the country, and wherever courage, daring and skill have been needed from them they have never failed. I have served with them, have been under the command of naval officers, have been under fire with them, with them when the *Richmond* was rammed by the *Manassas* at the head of the Passes in 1862, and on many other occasions, and my relations with them have been always of the pleasant character, and I sincerely trust that none of them will believe that the ground I am compelled to take in this matter is in any way a personal one. The question is not a personal one, but a professional one, which may, I hope, be argued with entire good feeling. No services stand higher than the Naval and the Coast Survey—each in its own profession. But that profession is not engineering, and in engineering the Corps of Engineers cannot regard them as competitors, nor do I believe that they themselves as a rule, look upon themselves in any such light.

A GOOD SOLDIER.

A FORT SHAW correspondent of the *Missoulian* records "a few facts in the life of a man who died at Fort Shaw, June 25, 1886, and whose soldierly form has long been familiar to Co. H, 3d U. S. Infantry." James Fegan was born in Athlone, Ireland, in 1827. He early attained a military set up and habits of thought and action by service in the constabulary. Coming to this country shortly after his maturity, he enlisted as a private in Co. I, 2d U. S. Infantry, Oct. 29, 1851. He soon proved himself to be faithful, was promoted corporal, then sergeant. He served for over thirty years as a non-commissioned officer. He was never reduced to the ranks for misconduct; was never tried by a Court-martial. His lack of education alone prevented his further promotion. He was never known to be other than respectful, without subserviency, and never sought familiarity either above or below his own station. His services in Utah and in connection with Indian campaigns gained him creditable mention at the hands of his superiors. In personal appearance Sergt. Fegan resembled Gen. Harney—as the latter was thirty years ago—being over six feet high, combining activity with strength, a model soldier of the type Frederick the Great would have pressed into his guard.

During the war he was engaged with his company at the siege of Yorktown, Gaines's Mills, Malvern Hill, Hanover Court House, Fair Oaks, Harrison's Landing, Bull Run, Centreville, South Mountain, Antietam (where he was wounded), Petersburg, Reams Station, James Station, Birney Station, Stoneman's Creek, first and second Deep Bottom, Southside Railroad, Danville Railroad, Boynton Plank Road, Appomattox Station, Manchester, Richmond, Dinwiddie Court House, surrender of Lee's army.

His record since the war bore endorsements of his bravery. Nineteen years ago at Plum Creek, Kas., he was a member of a detachment guarding a Government mule train, freighted with powder. Ranchmen inveigled the entire detachment, Fagan excepted, into drunkenness or desertion, and then attempted to capture the wagons. Single handed, Fegan defended the train successfully to its destination, and turned over his animals, wagons, and freight to Major Henry Douglas, 3d Infantry, without the loss of a penny to the public. For this deed Congress conferred upon him a medal. This medal and his silver corps badge were buried with him.

When the subject of creating a retired list for enlisted men was first broached President Arthur made the distinguished record of Sergt. Fegan the subject of a special message to Congress. The law passed, and Sergt. Fegan's record was its exponent. The old soldier had not lived an upright life in vain, and when the garrison of Fort Shaw heard the final volleys fired over his grave, dauntless the thought occurred to many, James Fegan deserves to be numbered among those heroes who lived without reproach or fear.

(Special Correspondence of the Baltimore Sun.)

CRUISING IN THE CYCLADES.

U. S. FLAGSHIP PENSACOLA,
HERMOPOLIS, ISLAND OF SYRA, July 6.

WE have been here since June 28. It was 4 o'clock in the afternoon of June 27 when the *Pensacola* got under way and stood out of Smyrna harbor for this port.

Before dark we were running through the Gulf of Smyrna. The heavens were cloudless, and at night were lighted with stars that were reflected lambently on a gently rolling sea. The wind was light and cooling and from a direction that enabled sail to be made. Monday morning the wind had shifted to an unfavorable quarter, and was blowing a moderate gale, with a steadily increasing tendency, and all sail was furled but the foretopsail and jib, which was in the act of being done when a sudden and strong puff of wind carried away the jibboom and flying jibboom. We were then in between the Islands of Tinos and Mykoni and within an hour's run of this port. The ship was hove to and the wreck secured and the topgallant yards and masts set down. In this unstately condition the *Pensacola* entered Hermopolis, presenting the appearance of having been in a terrible struggle with the angry elements. Work was immediately commenced toward repairing damages, and by July 2 everything was shipshape again.

The Fourth of July, by reason of falling on Sunday, was not celebrated on board the *Pensacola*, the day being observed in strict accord with its sacred character, the ceremony of paying tribute to Independence Day being reserved for the 5th. A Greek gunboat joined with us in honoring our natal day, displaying the American flag at the mainmast and cheerful bunting from yard arms. The weather was fine, and the day was given over entirely to the crew as a holiday, and full scope allowed their ebullient patriotism to seek an outlet in fun and frolic. The first on the programme was a boat race at 10 o'clock A. M., in the second and third cutters—the firemen and mechanics forming the crew of the second cutter, while the third cutter was rowed by deck people. The race was pulled over a two-mile course, and was witnessed by the cheering crew of the *Pensacola*. It was closely contested, and won by the firemen, scarcely half a boat's length ahead. Afterwards a purse was subscribed by the ship's company and presented to the victorious crew. At 12 o'clock all hands were piped to a dinner which the epicurean tastes of mess caterers had provided on a bountiful scale of change from the daily bill of fare, and the tables were loaded with a typical Fourth-of-

July dinner. The palatable feast was eaten amidst a bower of flags that decorated the gun deck.

A Greek band had been engaged to furnish music throughout the day, and during the progress of dinner played patriotic Yankee airs, which, in conjunction with a rival band in a boat alongside, made a collision of sounds not at all productive of harmonious melody, and rendered "The Star-Spangled Banner," "Hail Columbia," "Yankee Doodle," and kindred tunes, which their enterprise had obtained for the occasion, well nigh unrecognizable.

The majority of the sports were reserved for the afternoon, and directly dinner was completed, the committee of arrangements set the hurly-burly that characterized the festivities in motion. Money had been subscribed, and modest purses were offered as prizes to excite interest in the contests.

In the evening the "Pensacola Blackbirds," a minstrel troupe, completed the commemoration of the 110th anniversary of our independence by entertaining the officers and crew from 8 to 10.30 with an interesting entertainment, at which the United States Consul was present and several citizens.

The most prominent incident of the day was the ardent interest avowed by the people of Hermopolis. They were eager to express their sympathy in the occasion by a public demonstration, and communicated this desire to Capt. Dewey through the Consul, but the Captain deemed it expedient to decline the honor. They were determined, however, to extend us some sort of an ovation, and at night the sedate city was ablaze with fireworks, and gleaming rockets were discharged at frequent intervals in every portion of the city, while the summits of the numerous eminences were adorned with bonfires. An English steamer also burned signal rockets. All this reminded us to recognize the compliments, and night signals and rockets went hissing and spluttering from the *Pensacola's* stern with the celerity of a meteor's flash, illuminating the darkness with scintillating balls of fire as they exploded in the air. Early in the evening the Governor of Syra, the Russian, Belgian and United States Consuls paid official visits of courtesy to Captain Dewey, accompanied by the ladies of their families. The Governor was received with a guard of honor and saluted with 17 guns. The Russian and Belgian Consuls each received salutes of seven guns.

Information has reached the *Pensacola* from Constantinople that Egidio Moccia and Claudio Martinez, two of the bandsmen with Admiral Franklin, on the *Kearsarge*, were drowned on June 27. The former was a native of Naples, and came out on the *Pensacola* from the United States. The latter was a Spaniard from Gibraltar, who was shipped one year ago. No particulars of how the unfortunate affair occurred accompanied the official order to drop their names from the pay-roll of the ship.

ECHOES FROM THE RIO GRANDE.

The Democratic Congressional Convention, which assembled at San Antonio, July 31, unanimously adopted the following resolution:

Whereas, From recent occurrences in the Republic of Mexico it appears that American citizens residing and being there have suffered violence from the hands of officials and citizens of Mexico, and,

Whereas, We believe it to be the duty of the American Government to uphold the flag and protect the rights of our citizens, in whatever lands or however humble they may be, from all acts of violence and outrage that may be perpetrated on them, and to resent every insult to our flag by foreign Powers, or to any of our citizens, whether native or adopted; therefore, be it

Resolved, That we call upon the President of the United States to take prompt action for the release of Cutting, now imprisoned in Mexico, and to demand from the Mexican Government the punishment of the murderers of the naturalized citizen Arresures and full satisfaction and indemnity to be paid his family.

Governor Ireland has written to Hon. T. F. Bayard, United States Secretary of State, as follows:

I have the honor to indorse the copy of a telegram just received from Hon. E. D. Linn, American Consul at Piedras Negras. This man, Francisco Arresures, has been most foully murdered by the Mexican authorities, and it is but a repetition of the insults and outrages committed upon American citizens by the people and the authorities on the right bank of the Rio Grande. While no possible excuse can be given for the part taken by the Texas officers in the illegal arrest and delivery to the Mexican authorities, still nothing in palliation of the foul murder has or can be offered by the Mexican authorities. The persons, whoever they are, who were engaged in the illegal arrest will be prosecuted, and I demand in the name of the State and its people that this wrong by Mexico be atoned for and punished. If this State and her people must depend upon themselves for protection, the necessary redress can and will be obtained. I am, very respectfully, your obedient servant,

John Ireland, Governor of Texas.

The despatch referred to is as follows:

Eagle Pass, July 30, 1886.

Your telegram just received. Francisco Arresures (Rasures) was arrested by Deputy Sheriff Diaz at Eagle Pass by order of Sheriff Oglesby on the night of the 26th inst. He was handcuffed and in fifteen minutes was delivered to Mexican officers across the Rio Grande River. Sheriff Oglesby claimed that he acted on a warrant of County Judge Hoffstetter, who says that Sheriff Oglesby persuaded him to sign the order for Arresures's arrest and delivery. There were no papers for his arrest from Mexico except a letter from Mondragon, Captain of the State Rangers in Coahuila, who made a general charge of horse stealing against Arresures. A protest against being delivered to the Mexican officers was strongly made by Arresures, who insisted that he would be killed by Mondragon, his personal enemy. He appealed to me for protection on the morning of July 27, and I at once demanded his return to Texas on the ground of his being kidnapped, and also had Oglesby to demand the prisoner's return on the same ground. Both demands were refused by Mondragon. At one o'clock at night Arresures was taken from jail and brutally murdered by three of Mondragon's troops.

In 1873 Arresures made declaration of citizenship in Maverick County. He lived with his family in Eagle Pass at the time of his arrest, and he was an omnibus driver. The best citizens in Eagle Pass and Piedras Negras testify as to his good character. Sheriff Oglesby says he had a private understanding with Mondragon by which an escaped murderer from Texas, for whom a large reward had been offered, was to be delivered to Oglesby in exchange for Arresures. Public indignation is very great on both sides of the river over this affair. E. D. Linn, United States Consul.

The Mexican papers published at El Paso del Norte, the *Observador Frontera* says: "Do you Americans believe that because you belong to a populous nation you will cause our weaker nation to vacillate? You think so? Do you think that by noise and hurrahs you can scare our authorities? Never believe it, never let it enter your mind. You can never impose upon the sons of a warlike and valiant nation."

General Francisco Narenjo, of the Mexican Army, and a leader in the recent revolutionary troubles in Northern Mexico, was, says a press despatch, in Chicago a few days ago, and has gone from there to Niagara Falls, en route to New York City. General Geronimo Trevino, late Secretary of War of Mexico, likewise a leading participant in the recent border troubles, is expected to arrive at Chicago any day. From a large military experience as General in command of the Mexican forces in Northern Mexico, (and along the Rio Grande,) and from the great number of sympathizers he has among his own countrymen, he is supposed to be more feared by the party in power in Mexico than almost any other prominent Mexican that can be named.

The position taken by our Government is shown by the extracts from the correspondence of the State Department which follow:

Department of State, Washington, July 10, 1886.

You are instructed to demand of the Mexican Government the instant release of A. K. Cutting, a citizen of the United States, now unlawfully imprisoned at Paso del Norte. Bayard.

(Mr. Jackson and Mr. Brigham to Mr. Bayard [telegrams], July 21 and 22).

Instant release of Cutting refused.

Mexico massing troops at this point. 150 men this morning and 2,000 said to be on their way. Cutting still in prison. Great excitement.

(Secretary Bayard to the President, Aug. 2.)

The present case may constitute a precedent fraught with the most serious results.

The safety of our citizens and all others lawfully within our jurisdiction would be greatly impaired, if not wholly destroyed, by admitting the power of a foreign state to define offences and apply penalties to acts committed within the jurisdiction of the United States.

Aside from the claim of extraterritorial power, thus put forth for the laws of Mexico and extending their jurisdiction over alleged offences admittedly charged to have been committed within the borders of the United States, are to be considered the arbitrary and oppressive proceedings which, as measured by the Constitutional standard of the United States, destroy the substance of judicial trial and procedure, to which Mr. Cutting has been subjected.

On the trial of Cutting by the Mexican court the laws of Texas were quoted as applicable to his case, it being conceded that the offence was committed in Texas. He was found guilty, refusing to make any defence on the ground that he could not recognize the court.

TRIAL OF THE ATLANTA.

The preliminary trial of the new steel cruiser, *Atlanta*, in Long Island Sound, on Thursday, was very satisfactory in all respects. She was not driven at all to test her speed, her engines making hardly an average, when under full headway, of 58 turns, and her engineers and firemen being green hands. When fairly started she made twelve and eight-tenths knots an hour, which was deemed eminently satisfactory for a first trip by the naval experts on board. Her course extended fifty-seven miles, as far as the shoals off Stratford, Conn. On her return, she was met at City Island by the *Nina*, which took off the Committee of the Advisory Board, who at once prepared and forwarded to Secretary Whitney a favorable report of the trip. She lay off Whitestone during the night, reaching the Navy Yard early next morning. Good judges say, had her engines been driven to seventy turns, her speed would have exceeded considerably her fourteen and a half knots limit.

Besides her officers the *Atlanta* carried with her on her trial trip Capt. Wm. P. McCann, Comdr. A. S. Crowingshield and Chief Engineer Alex. Henderson, composing the committee of the Naval Advisory Board, Engineer-in-Chief Loring and others.

"We were all delighted with the cruiser," said Mr. Loring. "She steers like a pilot boat: more readily than any war ship I ever saw. Capt. McCann, the the president of the Advisory Board, and in fact every man of the party was charmed with her. We consider the speed obtained—twelve and eight-tenth knots—as excellent, considering the fact that all the engineers are firemen except two, who were green hands fresh from the receiving ship. I don't doubt but that under more favorable conditions she will obtain a speed of fourteen knots an hour.

"Will a second trial trip be necessary?"

"No," replied Mr. Loring. "She has had her full complement."

"I consider her the best boat we have, because she is constructed in accordance with the most approved modern type. The members of the board think as I do."

J. J. Roach, the son of his father, in speaking of the *Atlanta* two weeks ago said: "We are willing to stake our reputation on that cruiser. I have personally watched every plate laid and supervised the driving of nearly every bolt. She is as perfect of her class as any cruiser can be."

THE YACHT GALATEA.

The English cutter yacht *Galatea*, Lieut. W. Henn, who will shortly compete for the "America's Cup," arrived at Marblehead, Mass., on the evening of Aug. 1, 1886, thirty-two days from Plymouth. She sailed under a jury rig, and part of the time carried a try sail, a jib and jib topsail. She encountered extremely light winds and smooth seas during the entire passage. Lieut. Henn was accompanied by his wife. The *Galatea* is now being made ready for her racing spars and sails which came over by steamer. The displacement of the *Galatea* is 158 tons. She has a steel plate keel fitted with lead, her only ballast. From the sides of this the garboard plates start and are riveted on. In this hollow keel, as it were, are 82 tons of lead, filling it solid to near the top, there being but five tons of movable ballast on top for trimming. All ballast is thus in the keel. She is built entirely of steel. Her deck is of white pine, with all fittings of teak, while steel is largely used for bitts, channels, coamings of hatches, etc. Her full dimensions are:

	Feet.
Length on deck, over all	100.50
Length on deck, stem to sternpost	90.50
Length on deck, waterline	86.80
Beam, extreme	14.99
Depth of hold	13.30
Draft, extreme	13.50

Her record as a racer is not very satisfactory, but she has proved to be an able craft, and since her brief racing career has received various alterations which her owner and designer believe have greatly improved her speed. The interior arrangements of the *Galatea* are perfect, and her cabins and main saloon, beside being extremely roomy and lofty, are models of elegance.

CORRECTIONS AND COMMENTS FROM GENERAL NEWTON.

To the Editor of the New York Times:

A communication of Mr. A. Foster Higgins to the *Times*, published in the issue of the 28th ult., has been called to my attention, and I beg leave to refer to a most remarkable statement contained therein in the following words: "Second—I respectfully repeat the assertion that at this moment there exists no well defined, well digested, and scientific plan for the creation of a proper 30-foot channel into this harbor. These gentlemen would have you believe that there is such a plan. What is it? Lieut.-Col. McFarland says it is a plan requiring six years and $6,000,000, while the distinguished Chief of Engineers assures Senator Miller that it will require three years and $3,000,000." The gentleman is called upon to substantiate his statement concerning the cost of the improvement as estimated by Gen. Newton at $3,000,000 and confided to Senator Miller. The Senator himself (see *Congressional Record* of July 4, 1886, page 6,863) states to the Senate as follows: "The estimated cost of the work is between five and six millions." Certainly, if Gen. Newton had assured the Senator that the cost would be only $3,000,000, he would have been too glad to have so stated it in his speech as another strong inducement to undertake the work.

In reality but one estimate of the cost has been made, viz.: that of the Board of Engineers, which will be found at page 14, Executive Document No. 78, Forty-eighth Congress, Second Session, in these words: "The total cost of the improvement, giving 30 feet from New York to the ocean, would be about $5,000,000 or $6,000,000." Col. McFarland, Gen. Newton, Senator Miller and the Senate Committee on Commerce have equally followed the estimate of the board. Gen. Newton did then think, and is of the opinion at this time, that if a sufficiency of money were granted continuously the whole work might be done in three years, and Col. McFarland thinks that it could be finished in six years with an appropriation averaging $1,000,000 annually. Will some one be kind enough to point out the contradiction existing between these two statements? Mr. Higgins, however, is much concerned because according to him "there exists no well-defined, well-digested, and scientific plan for the creation of a proper 30-foot channel into this harbor," I desire to ask two questions: Would Mr. Higgins be able to recognize a well-defined, well-digested, scientific plan if one were presented to him? And are the sound business men of New York, in opposition to their own business interests, reconciled to the idea of relegating practical and scientific matters of such importance to men who have had, so far as known to the public, neither education nor experience? John Newton.

Washington, Tuesday, Aug. 3, 1886.

GENERAL MAURY'S MILITARY RECORD.

The nomination of Dabney H. Maury to be Minister to the United States of Colombia met with considerable opposition among Senators, based upon the following extract from the records of the War Department:

G. O. 37, Adjutant-General's Office,
War Department, June 25, 1861.

It having been ascertained to the satisfaction of this Department that Captain Dabney H. Maury, Assistant Adjutant-General; Lieutenant Carter L. Stevenson, 5th Infantry, and Lieutenant Edward Dillon, 6th Infantry, entertain and have expressed treasonable designs against the Government of the United States, their names will be stricken from the rolls of the Army. L. Thomas, Adjutant-General.

A Newport, R. I., correspondent writing of "Teams to Dream About" as seen by him on the road says: "Admiral Luce, U. S. N., dignified, erect, gray whiskered, finds time to run away from his command at Portland and enjoy an afternoon with Mrs. Luce at their favorite Newport. A single horse victoria satisfies the gallant Admiral's desires. The coachman does not look like a sailor man impressed for land service. Comdr. Fred Pierson, late of the U. S. Navy, and Mrs. Pierson sat in a low victoria, with a pair of browns and a very fat coachman in green livery on high. A small sized gentleman who now came along appeared very lonely. His isolation arose from the fact that his was the only really distinctive team of all the numerous wheeled gear drawn by horses on the avenue. Therefore the gentleman seemed lost. It was Colonel C. L. Best, U. S. A., the commander of the 4th Artillery, who drives a typical American road wagon of the spider web order. With a pair of unmistakable sorrel trotters alongside the pole Col. Best smoked a cigar with a good will that recalled General Grant as he used to appear in a similar turnout. The Colonel had scarcely passed when along came Mrs. Best, formerly Miss Tooker, of New York, until two years ago, when she met the impressionable warrior and surrendered. Mrs. Best has one of the most showy equipages in Newport. A stylish victoria, with blue liveries, high acting bays and ultra London harnesses comprise the points of interest unless it be that the footman is a Japanese boy, who displays a bright cherry waistcoat.

General J. B. Fry, U. S. A., keen and alert, evincing in his physiognomy the clever characteristics which distinguished his goosequill contest with General Tecumseh Sherman, rode after a black pair in a low victoria and pronounced green liveries.

Colonel W. E. Prince, U. S. A., drives blacks, Gen. G. W. Cullum, U. S. A., dark bays.

The Presidio County *News* of Aug. 3 has the following Fort Davis items:

Major Carlton has returned from Fort Hancock and is post commander during the absence of Cols. Brackett and Clendenin.... Major W. H. Gardner, surgeon, granted four months' leave, expects to leave for the East Aug. 12 ... Lieut. Jas. Allen, the newly appointed adjutant 3d Cavalry, arrived Saturday from Fort Sill, I. T.... An order directs A. A. Surg. Paul Clendenin to proceed to San Antonio for assignment to duty in Texas. Dr. Clendenin is a son of Col. D. R. Clendenin, 3d Cavalry, soon to return to this post from leave, and it is hoped Dr. Clendenin may be assigned to duty at Fort Davis.

ORGANIZATION OF RIFLE CORPS.

To the Editor of the Army and Navy Journal:

IN every city, town and village of these United States are to be found some who, either from a previous taste, or from having read accounts of matches and competitions elsewhere, have formed an undeveloped desire and ambition to handle a rifle before a target with other competitors. A few of these may have used a shotgun, and by returning proudly home with a full bag of game have proved their skill with that weapon. Others may be the happy possessors of rifles that they have rarely, if ever, fired; and others, again, may wish to have a rifle and wish, also, to shoot with it, but are deterred. Still others may feel possessed of a species of white elephant in that, although possessed of a rifle, there is no suitable place whereat to test it.

There are plenty of professional books, Wingate, Laidley, Blunt, etc., replete with the technical knowledge essential for the soldiers to know. There is, however, a want generally recognized. There has long been felt to be needed a book to set forth in simple language concise, common sense, plain facts, definite instructions, hints for the organization of a rifle club; the establishment of an open-air range; the duties of the different officers; the method of successfully conducting matches, of managing the affairs of the organization, and, above all, to teach *how to use the rifle to attain the best results.*

The author of such a book should be a man of known superiority in the handling and shooting of his rifle; one who has frequently and publicly often attested his skill and pre-eminence with the arm; one who has demonstrated in the field and in the mountains, in summer's heat and in winter's cold his ability to bring down big game as well as to hit a black patch in the centre of an area of painted canvas. He should be an athlete, too, of the Dr. Winship school, that is a man combining the maximum of muscular strength and physical endurance with the lithe alertness of the practical gymnast.

Happily, we understand that such a book is in process, and the author, Captain William Krause, 3d Infantry, is reported to be—as his remarkable shooting of this year has clearly entitled him to be—the selected representative marksman of his regiment at the pending competitions at Forts Snelling and Leavenworth.

The 3d Infantry is at the head of the Army as regards its figure of merit in shooting. Capt. Krause has emerged from the modest seclusion in which he has been pleased hitherto to remain whilst other claimants were competing. With 170 cartridges and the Service rifle, on the Fort Missoula range, he has not only completed the sharpshooter qualification but has made the highest general average ever reported. Captain Krause thus stands at the head of his regiment, and is certainly good for every honor that he will gratify his friends and would-be rivals by competing for.

The publication by him of the methods by which his results have been attained will evoke a widespread desire on the part of many interested parties.

MARKSMAN.

THE CHANGE IN THE MARTINI-HENRY.

WE published on page 1069 of the JOURNAL of July 24 a table carefully prepared by Col. Arbuthnot, R. A., superintendent of the Royal Enfield Armory, showing the calibres, trajectories at distances from 500 to 2,000 yards, inclusive, powder charges and projectiles, etc., of the Service arms of Europe and the United States, including the newest types adopted, the Swedish Jarman and the Enfield-Martini. In a paper of considerable length, read by Col. Arbuthnot at the meeting of the Royal United Service Institution, a full account of the new—or rather the altered—rifle for the British Army, is given. Having already published a condensed description of the new arm, it is hardly necessary to refer to the changes in the Martini-Henry in detail, other than those that affect the ballistic powers and general effectiveness of the arm—the structural changes being the substitution of a sword bayonet considerably shorter than the old triangular appliance and set under the barrel, and a narrowing of the butt so as to adapt it better to the shoulder, and setting of the butt plate at a more acute angle in order to meet the objection to too straight stocking. By express orders of the Secretary of State for War the original Martini action is retained, with the immaterial addition of a safety-bolt actuating the tumbler and a round tumbler axis instead of a square one.

Col. Arbuthnot's paper is essentially an apologetic one, evidently anticipating and preparing for the almost uniformly adverse criticism of official policy in the debate which, as usual in the Institution, followed its reading. The necessity for a change, he observes, lies in the fact that the initial velocity of the Martini-Henry is less than that of the service arms of the continental powers, thus rendering it a relatively inefficient rifle at ranges below 500 yards, or what is termed the immediate dangerous zone. At long ranges, 1,500 to 2,000 yards, it, with the American Springfield, through its heavy projectile, attains and keeps up a greater velocity than the Werndl, Mauser, Vetterli, and Gras; "seeing, however, that infantry habitually fire at short ranges, any advantage in flatness of trajectory over 1,000 yards is no real compensation for inferiority at short ranges. This is the main reason for adopting a new arm on the score of shooting. A second reason exists in the need of a magazine arm for rapid firing at critical moments, especially on board ship, where the carriage of ammunition does not prevent a difficulty."

The reduction of the calibres of the English rifle to .40 in. has been determined upon after careful trial of calibres, ranging from .45 in. to .35 in., the weight of the projectile in each trial being fixed to maintain the value of D^2-W', the formula indicating the retardation of the air to be overcome. With the .40 calibre the most uniform results were secured, though exceptionally good shooting was obtained with the lower calibres.

In adopting the new calibre and bullet (the cartridge having a solid-drawn, bottle-necked shell), the necessity of a new barrel and modified rifling was found imperative. The new barrel, in fact, was the principal matter to be decided—it must necessarily be smaller in the bore, to enable a lighter bullet to be of sufficient length and "sectional density" to shoot well.

The barrel was settled on after patient calculation and experiment. The twist of rifling which gave the best results was one turn in 15 inches. The rifling has seven grooves of ratchet form. "This is a remarkably quick rifling," says Col. Arbuthnot, "and for some time we experienced great difficulty in overcoming the fouling. We tried wads of every description, till at length we hit upon the wad which has since been adopted. It is a compound wad ¼in. thick, consisting of ⅛in. of hard cardboard next the powder and ⅛in. of beeswax next the bullet. On the explosion of the powder taking place, the beeswax is flattened between the cardboard and bullet and then forced into the grooves; and the cardboard being 'set up,' also takes the rifling and cleans out the fouling."

With the Martini-Henry the recoil of the arm was a very serious matter, owing, in the opinion of many, to the peculiar Henry rifling with an increasing twist muzzle-ward. With the new twist of one in 15 inches the recoil can hardly be lessened, especially as the charge of 85 grains of quick-burning powder is retained. The quick firing is to be facilitated by means of a quick loader. Col. Arbuthnot candidly remarks that this quick loader "is not intended to take the place of a magazine." The device adopted (which resembles in appearance, according to a correspondent's report, an exaggerated pepper-box) is hung to one side of the receiver-frame, and holds six cartridges. By a zigzag spring the cartridges are forced up successively by an inclined plane, the head of each passing through the lid ready for the soldier's fingers. Practice has demonstrated that with the quick loader six rounds can be fired in 25 seconds as against 40 seconds loading from the pouch.

The results obtained with the new barrel and projectile are undeniably excellent, handsomely beating the Jarman, of a nearly equal calibre, both in flatness of trajectory at short range, and sustained velocity at 2,000 yards and upwards.

The debate upon the merits of the Enfield-Martini, following Col. Arbuthnot's address was generally adverse to the policy of the government. The principal objections were the evil of retaining the Martini breech action and the danger that it may defer the introduction of a magazine arm. The bolt action was vigorously championed by one or two of the speakers as having been adopted by continental powers and proven in its several types admirable in service. In answer to the general objection to the retention of the Martini as an obstacle to further progress, Col. Arbuthnot replied that the question of barrel and calibre having been settled, the barrels can be used with any action suited to a magazine arm. With regard to magazine arms, he concluded, an admirable one has already been approved by the Committee, and is being made experimentally both for the Army and Navy, to be soon issued for trial.

THE LEE MAGAZINE GUN.

To the Editor of the Army and Navy Journal:

I HOPE you will not think that a veritable magazine fire has been opened on you, but even if you are under that impression you will I am sure recognize the Lee from the regularity and continuity with which the fire is maintained. Were I the ten-shot man I should long since have had to retire behind a stone-wall or some other friendly shelter in order to enjoy a little quiet leisure while refilling my magazine.

The correspondent, whose letter appears on page 13 of your issue of last week seems to advocate some kind of magazine arm, but what kind I am unable to determine from his remarks. The U. S. Small Arms Magazine Board was, I venture to say, as well fitted a body of men for the work as was ever brought together, and anyone who wishes to do so can refer to their report, which shows that better results were obtained in one minute's firing from a large number of the guns tested, as single shooters, though they were really magazine rifles. This does not apply to the Lee, which can always maintain its superiority as a magazine arm.

Now one minute is almost too small a space of time in which to expect a very decisive result from any fire, yet even before that short period has elapsed the utility of the ten-shot gun as a magazine arm is exhausted, and it is thereafter only fit to be used as a single shooter, unless, as I have said before, there is some friendly shelter near at hand where the soldier can retire. Of course the enemy will understand why the fire has slackened and will obligingly wait the return of the warriors, not in the meantime making any strenuous efforts to disturb them.

At Lang Son I am informed by one who was present, there were between 5,000 and 6,000 French (principally Algerians and Turcos) armed with the Kropatschek, opposed to the Chinese, 3,000 of whom were armed with the Lee, the balance with matchlocks, spears, and bows and arrows.

The "consensus of European military opinion" may say ten is the number and the limit may have been "fixed for all the world" by the two greatest military powers of modern times, France and Germany; but while the consensus is still in embryo and the two modern nations are fixing things, a semi-barbarous people step in and whip one of the high fixing parties, by the use of the Lee, so that its claim of 80,000,000 sterling indemnity is gladly dropped and peace accepted upon almost any terms.

F. A.

ILION, NEW YORK, August 4.

(From the Grand Army Review.)

THIS seems to be a case of "whole cloth:"

Gen. W. B. Hazen, Chief of the Signal Service Bureau, has issued a pamphlet called "General Hazen's Reply to the Second Comptroller," in which he speaks so disrespectfully of the late Gen. Hancock that fresh trouble is on hand for him. Charges will be brought against him for libelling Hancock in the manner stated before the Military Order of the Loyal Legion of the United States, with a view to his expulsion from that order.—San Antonio (Texas) *Express*, June 16.

We wrote to Gen. Hazen about this. He sent a copy of the book with a brief memorandum, "Page 76, if anywhere. W. B. H." We looked through the book with care, paying special attention to page 76. There is absolutely no foundation for the statement quoted, and we take pleasure in saying so, for we had shared a somewhat general impression that strong individuality sometimes betrayed Gen. Hazen into indefensible positions.

THE STATE TROOPS.

DISBANDMENT OF NEW YORK GENERALS.

GENERAL ORDERS, No. 21, of Aug. 5, from State Headquarters, announce as follows:

The existing division and brigade organizations are disbanded, and their commanding officers and the division and brigade staff officers rendered supernumerary. Chiefs of staff will without delay forward to the Adjutant General all the books and records of their division and brigade headquarters; and they, and all the other officers of the staffs mentioned, will turn in to the chief of ordnance all public property in their possession. The signal corps of the 2d Division and 8th Brigade are disbanded and the officers thereof rendered supernumerary; the enlisted men will be mustered out by the Inspector General or an officer of his department, Aug. 17 and 25 next. All public property in the possession of these signal corps will without delay be turned in to the chief of ordnance.

The National Guard is reorganized in four brigades as follows: The 1st Brigade, with headquarters at New York City, will consist of the 1st and 2d Batteries, the 7th, 8th, 9th, 11th, 12th, 22d, 69th and 71st Regiments of Infantry. The 2d Brigade, with headquarters at Brooklyn, will consist of the 3d Battery, the 13th, 14th, 23d, 32d and 47th Regiments, and the 17th Separate Company of Infantry. The 3d Brigade, with headquarters at Albany, will consist of the 4th and 6th Batteries, the 10th Battalion, and the 3d, 4th, 5th, 6th, 7th, 9th, 10th, 11th, 12th, 14th, 15th, 16th, 18th, 19th, 20th, 21st, 22d, 23d, 24th, 27th, 28th, 31st, 32d, 33d, 35th, 36th, 37th and 39th Separate Companies of Infantry. The 4th Brigade, with headquarters at Buffalo, will consist of the 5th Battery, the 65th and 74th Regiments, and the 1st, 2d, 8th, 13th, 25th, 26th, 29th, 30th, 34th, 38th, 40th, 41st and 42d Separate Companies of Infantry.

Elections for commanding officers of these four brigades are ordered to be held Aug. 25, 1886, at 2 P. M. For the 1st Brigade at the State Arsenal, New York City, at which Col. Emmons Clark, 7th Regt., is ordered to preside. For the 2d Brigade at the Armory of the 47th Regiment, at which Col. Louis Finkelmeier, 32d Regt., is ordered to preside. For the 3d Brigade at the Adjutant General's Office, at which Maj. Gen. Josiah Porter is ordered to preside. For the 4th Brigade at the Armory of the 65th Regiment, at which Col. Thos. S. Waud, 65th Regt., is ordered to preside. Presiding officers will cause the electors to be properly notified at least 10 days before the time appointed for the election.

Col. Fred. Phisterer, A. A. G., is relieved from duty with the 5th Brigade. Until commanding officers of brigades have been commissioned, batteries, regiments and separate companies will report direct to the Adjutant General.

That a thunderstorm was brewing at Albany has been known for months, especially at division and brigade headquarters of the New York National Guard. The force of the bolt and its sweeping results were, however, not anticipated. It surpasses the expectations of the most ardent supporters of a rational regimé for the State troops. The National Guard from times immemorial has been top heavy, a fact which has been put before the public so often, through the columns of the ARMY AND NAVY JOURNAL, that it does not need any special mention now. The best general officers, such as Molineux, Rogers, Oliver, and others, have openly acknowledged the fact and declared their willingness to "step down and out" for the benefit of the Guard. The fuss and feather elements, however, were opposed to reform and forever on the lookout for an increase of gold and bullion and feathers, and their influence was strong enough to delay reform with overy preceding administration. Adjutant-General Porter's decisive, radical action has now, however, set the matter at rest, and he will meet with the support of every true friend of the National Guard The whole Guard feels relieved.

The National Guard will now be commanded by four Brigadier-Generals, stationed at New York, Brooklyn, Albany and Buffalo, respectively, an arrangement in proportion with the number of troops to be commanded, meeting every requirement and satisfactory in every respect.

The only trouble is to find officers capable of filling the positions according to the requirements of the present day. Only few of this calibre are known at present, and therefore there may be some difficulty in making the proper selections. For this purpose we call attention to the following gentlemen: Captain Daniel Appleton, 7th Regiment; Colonel James H. Jones, 12th Regiment; Ex-Brigadier-General C. T. Christensen and Brigadier-General Robert Shaw Oliver. Any one of these gentlemen would make a successful Brigade Commander.

THE NEW YORK CAMP OF 1886.

THE troops encamped at Peekskill during the week ending July 31 were entirely composed of separate companies and divided into three battalions under command of Lieut. Col. John B. Frothingham, Asst. Adjt. Gen. 3d Brigade; Lieut. Col. Selden C. Clobridge, 14th Regt., and Lieut. Col. W. J. Harding, of the 22d Regt., respectively. Each commander governed his own battalion, issued his orders, etc., without regard to his neighbors, but under the general instructions of the post commander, so that whatever results were achieved depended upon their own efforts. The companies, as usual, differed as to size, standard and kind of instruction and capacity of commanders and subaltern officers, but the assignments had been made so that each battalion had about an equal share of the good and inferior material. All three started from about the same point. The companies had all been in camp before, and several of them as portions of provisional regiments, but under this year's organization the battalions were composed so that hardly any of the companies had served together before. This added some difficulty to the task of the battalion commanders, but otherwise they were untrammelled in the adoption of their measures, and there was nothing to prevent a thorough exercise of discipline and an exact compliance with orders.

The average separate company is a remarkable compound. The men generally are of excellent physique and character, quiet and less assuming and aggressive than the city regiments, and, as a rule,

well drilled in the manuals and marchings, but with hardly an exception they add extra touches not prescribed in Tactics. Left to themselves the entire year, with exception of the brief annual visit of the Inspector-General, these fancy movements gradually multiply, and thus we see at the camp, with 12 companies, 12 different manuals and just as many different steps and general methods of drilling. This irregularity is a source of annoyance on every occasion where men of different companies are required work together and particularly on guard and parades. The eradication of the evil consumes much valuable time. When it is considered how much time and work are wasted in the first place in drilling the men in "fancy" movements up to the point considered necessary, to the detriment of practical work, and in the second place in bringing them back to a rational point, it would pay the State authorities to take the matter up and issue orders compelling a strict adherence to present tactics and text books, and prescribing a certain practical course, deviation from which to be considered a military offence. The establishment of the annual encampments has brought about considerable change in the direction of increased regularity and uniformity among the isolated commands, but the evil is still quite pronounced, and a serious obstacle to rapid progress such as is necessary to make a week's encampment a success. We heard a captain give orders to his command according to Casey's tactics and afterwards declare that that was "sufficient for instruction." That was one extreme. In another company, which had the manual down almost to the regularity of automatons, we noticed on the last day of the encampment a private appear before his captain with his musket slung carelessly on his shoulder, and salute by touching his cap with the disengaged hand. In fact it seems that in some companies the notion prevails that the sergeant's salute is only intended for sergeants. The rest of the men render improvised salutes of all kinds. We could mention a multitude of absurdities of this sort, but the above show sufficiently how time is spent unnecessarily and how men, anxious and willing to do the right thing, are allowed to drift into erroneous habits for the simple sake of show, and how their rational military education is neglected.

Under these circumstances, the Battalion Commander, with the least tendency to fuss and feathers and the clearest view to practical business, was bound to come out first, and he did. It is, however, due to all to say that, on general principles, they managed their commands with remarkable tact and ability. Lieutenant-Colonel Frothingham, although at present in the Adjutant-General's Department, was, when second in command of the 23d Regiment, one of its most progressive officers, and although he could hardly be expected to be entirely free from all the old "milish" notions of his old command, he handled his battalion well and showed himself a competent officer. Had he confined himself strictly to tactics and acknowledged the fact that dress parade is ended, so far as the officers are concerned, when the Commander has acknowledged their salutes and given his orders, he would have established a better reputation for practicality. To form the officers like a square of recruits in his rear until the companies are marked off, is undignified, untactical and ridiculous. In fact, if tactics were interpreted literally, companies would not be justified in marching off, because they can only do so *when the officers have dispersed*, and a formation elbow to elbow, Black Crook fashion, is certainly not a *dispersion*. Colonel Clobridge, a practical soldier, whose empty sleeve and the several bullets he carries around with him in various portions of his body at once prove him a soldier of merit and practical experience, fell into the same error—in fact he went one better by compelling the officers at the close of dress parade, at the approach of the color company, to uncover and hold their helmets over the right shoulder. Respect to the colors should be cultivated under all circumstances, but regulations and tactics prescribe how this is to be done, and there is no reason nor authority why anything laid down should be exceeded. The more practical company officers, although they did as they were told, nevertheless resented monkey business of this sort in their minds. They knew that it was wrong, that the time consumed in teaching them the performance was wasted, and their interest in their work and respect for their commanders decreased accordingly.

In the battalion commanded by Colonel Harding there was nothing of this sort allowed; when approached on the subject, he repelled those who were advocating such practices, with a decided "No, sir, nothing but downright work in this battalion, and no monkeying," and the result was the best piece of work accomplished this season. "It is *the* battalion of the camp," said General Richard H. Jackson, and in this opinion the JOURNAL heartily concurs.

The troops have now been brought down to such a state of discipline that quietness at night, decorous behavior during the day, and absolute cleanness of the camp have become matters of course, and it seems superfluous to make any more particular mention of these features, and yet how important are they, and how much is their observance violated in other camps! It gives further satisfaction to notice that the eternal shout for the corporal of the guard which used to make night hideous, has ceased, that the men at the sound of taps go to bed and extinguish their lights, and thus save the company officers an everlasting rush about from one end of the camp to the other, and that the police party understand and perform their duty without continual supervision. The camp was in a state of police which it was impossible to improve upon. Take in connection with this the simply admirable mess arrangements of Messrs. Windholz and Yale, and the officers were entirely free to give their whole energy to the instruction of their men in general duty, drill, skirmishing and work of a purely military nature. That, under such circumstances, the camp prospered is not surprising.

There were daily battalion drills, company drills early in the morning, theoretical instruction of officers by the battalion commanders and of non-commissioned officers and guard details by Col. Phisterer and Lieut. Thurston. The weather was oppressive during the entire week, but the heat was not permitted to interfere with the regular course of work. The only drill missed was in the battalion of Col. Clobridge, on account of indisposition of its commander. This immediately threw the battalion behind, which shows how important is a rigid adherence to the schedule. The guard duty, especially towards the end of the tour, ranks among the best ever performed in camp. The men proved themselves unusually apt to learn, and the majority walked their posts and attended to their duty like well-instructed regular soldiers. We cannot, however, pay the same compliment to the officers on skirmish drill. A large portion evidently had never paid any attention to the matter until they came here, and they naturally found themselves in the usual predicament in similar cases, which we have been compelled to point out week after week. In battalion drill the improvement was rapid and quite satisfactory, although very few of the captains understood much about it in the beginning, when, in fact, many did not even know how to come on the line for dress parade. In spite of close supervision and continual instruction the alignments on parade were as crooked as ever, and particularly did the officers distinguish themselves by their lack of proper dressing. That the instruction of their men even in the manual had only been partially attended to was proven whenever the usual routine of commands on parade was departed from. An order like trail arms, or arms port, generally broke up the whole line. Companies which went through their drill with the precision of clockwork, right in front, invariably went to pieces when ordered to execute the same movements left in front, all of which proves beyond doubt that their armory drill is one-sided. Their experience this week, however, could hardly fail to open their eyes to their defects, and the camp will doubtless cause them to introduce better methods of instruction.

We have heard from Inspectors and others who occasionally observe the separate companies at home, that all movements are invariably executed right in front. This week's experience fully confirmed such statements. The study and practice of skirmish drill should be made compulsory, and every officer should at least be familiar with the commands laid down and able to repeat them correctly at any time. An officer who, for deploying and assembling of skirmishers, gives the commands open and close files should be kept at his task until he knows how to do his work properly, and if he won't or cannot learn, he has no business to be in command of a company. Those who insist on following obsolete tactics and will not adopt modern methods, no matter how meritorious their services during the war, can be retired with advantage to the Service. All these defects and numerous others can be prevented by an occasional perusal of the tactics, and there is no excuse for bringing them into camp. Every company commander should come prepared to take full charge of his men in all that pertains to the school of the company, skirmishing, and the school of the soldier. If the battalion commander has to look after such matters, other branches must suffer, and this has been the fact in only too many instances. The high point of excellence obtained in guard and sentry duty is the result of the work of the State instructors.

In spite of all defects, however, the three battalions made marvellous progress in everything that pertains to the profession of a soldier and when the companies left camp it was the unanimous verdict of those who had watched their doings, that their work was the best and their progress the greatest achieved this year.

The battalion commanded by Lieut.-Colonel W. J. Harding, of the 22d, on account of the soldierly qualities of its commander, his strict attention to practical business, and avoidance of all superfluous, unmilitary practices, made the best record. His methods may well be regarded as models for future battalion commanders.

COURTESIES ACKNOWLEDGED.

LIEUTENANT HILLS, of the 5th U. S. Artillery, has rendered acknowledgment of courtesies shown him in the letter which follows:

FORT HAMILTON, N. Y. H., July 26, 1886.

Col. Chas. L. Fincke, comd'g 23d Regt., N. G., S. N. Y.:

COLONEL: It was my purpose immediately on my return from Newport to express to you and, through you, to the 23d Regiment, N. G., S. N. Y., my grateful appreciation of the courtesies extended to me by one and all during the week's sojourn in your midst. An unusual pressure of business, succeeded by the lamentable death of my most cherished and intimate brother officer, prevented me from doing that which I had intended. I trust I may be excused from even the appearance of non-appreciation of your unbounded hospitality, your untiring and ever successful endeavors to make me "at home" while with you. I can say most truthfully that a more enjoyable trip I never made; and my hearty thanks are due and are given unreservedly to all the gentlemen with whom I came in contact.

I feel I cannot, in justice to myself, close this letter without expressing my admiration of the manner in which the military duties pertaining to troops, either *in transitu* or in camp, were performed; of the high soldierly bearing of officers and men; of the apparent ever-present recollection that the reputation of the regiment was, for the time, in their hands, and of that fine state of discipline that required only an *expression* of the commandant's wishes—*not an order*—to have those wishes carried out.

I congratulate you personally upon the honor of commanding so fine a body of men, and the city and the State upon the possession of a regiment so thoroughly embued with the true military spirit and so thoroughly equipped by discipline and instruction for any emergency that may call it forth.

I am, Colonel, very respectfully, your obedient servant,
E. R. HILLS, 1st Lieut. and Adjt., 5th Art.

SECOND PROVISIONAL REGT. AT ALBANY.

THE 11th, of Mount Vernon, Capt. I. N. Pressey; the 5th, of Newburgh, Capt. James T. Chase; the 4th, of Yonkers, Capt. Raffaelle Cobb; the 15th, Capt. Berthold Myers, and the 19th, of Poughkeepsie, 1st Lieut. Louis P. Haubennestel, commanding; the 14th, of Kingston, Captain Benjamin J. Hornbeck; the 16th, of Catskill, Capt. A. M. Murphy, and the 23d Separate Co., of Hudson, Capt. William B. Elling, were constituted the 2d Provisional Regiment for the Albany Bi-Centennial, and the command assigned to Capt. William Haubennestel, Brevet Major, 19th Separate Co. The steamer *Kaaterskill* was assigned as the headquarters and means of transportation for the command. Major Haubennestel announced the following staff: 1st Lt. John P. Wilson, Asst. Surgeon 19th Separate Co., Adjutant; 1st Lieut. John I. Pruyn, 4th Separate Co., Quartermaster; and 1st Lieutenant Stuart B. Carlisle, Assistant Surgeon 11th Separate Co., Surgeon. On July 21 the steamer proceeded to Yonkers and received the 11th and 4th Companies; Newburgh, Poughkeepsie, Kingston, Catskill and Hudson were reached during the night, when the following effective strength was reported to the Adjutant: 11th Co.—4 officers, 52 men; 4th Co.—3 officers, 58 men; 5th Co.—2 officers, 39 men; 15th Co.—2 officers, 43 men; 19th Co.—4 officers, 87 men; 14th Co.—4 officers, 54 men; 16th Co.—3 officers, 42 men; 23d Co.—2 officers, 50 men. Total—24 officers, 425 men. Albany was reached at an early hour of July 22, when, after a hearty breakfast, the regiment, headed by the 21st Regiment Band, 21 pieces, of Poughkeepsie, disembarked and line was formed on Quay Street when they were marched to Pearl Street and assigned to their position in line in the 1st Division, under command of Brig.-Gen. Robert Shaw Oliver. The regiment was greeted with hearty applause. The snap and vim of its commander was infectious. The line was formed almost to perfection, officers and men seeming to vie with each other to do their full duty. The review in line and in column by companies was a fine ceremony. The passage in column by company was well executed, the marching excellent, alignments and distances well preserved and salutes of officers as near perfection as can be attained by a command that had never paraded together before. The 19th Co. had the right, and its 40 files front with their free swinging step attracted much attention and applause. The 15th Co., with its one-armed little captain, the color company, was finely received. The 11th, 4th, 5th, 14th, 16th and 23d companies were ably officered and presented a fine body of men, a credit to the National Guard. The line of march was rather long and tedious, but accomplished in good shape. They returned to the steamboat for dinner about 2 P. M., and did full justice to it. Quartermaster Pruyn and Surgeon Carlisle are deserving of praise for their efficient and zealous services, while Major Haubennestel, as commander, was the right man in the right place. In years of actual experience in actual service I have never seen a body of men brought together on such short notice, and almost comparative strangers to one another, who acted so promptly and *en rapport* as this provisional regiment. At 6 P. M. the command embarked for their respective homes amid the cheers of a large multitude who had assembled to see them off. E. J. C.

(Correspondence of the Army and Navy Journal.)

OHIO NATIONAL GUARD.

COLUMBUS, O., JULY 29, 1886.

THE 2d Brigade of the Ohio National Guard went into camp, two miles from Springfield, on the 21st and struck tents on the 28th. It was composed of two batteries of the 1st Artillery, Lieutenant Colonel Sintz commanding; the 7th Regiment Infantry, eight companies, (including Toledo Cadets, attached), Major Rott commanding; the 9th Battalion (colored), three companies, Major Harper commanding; the 14th Regiment, eleven companies (including the Governor's Guards, attached), Major Coit commanding.

Colonel Freeman of the 14th was to have been the Commandant, but owing to a bad accident was unable to be present until the last half of the encampment, and then only as a visitor. His place was ably filled by Colonel White of the 7th Regiment. General Axline was present, as he is always, and did much by his example to inspire the men with resolution to faithfully execute the hard work before them. Under his administration the National Guard of Ohio will yet attain the highest degree of excellence to be reached by a volunteer organization. He is not a figure-head, but a practical soldier.

The camp was designated by Colonel White as Camp Axline. The routine duties and daily drill were about the same as at the last brigade encampment. The soldiers earned their dollar a day. By the end of camp the improvement in company and battalion drill was very great. There was, however, but little or no skirmish drill, an important feature which should not be neglected. Deficiencies at the last two encampments in guard duty, drill and discipline generally, result principally from lack of instruction by company officers, who are often wanting in that knowledge of their duties and requirements which they could easily obtain by more effort. A system of examination has, however, been inaugurated which will be productive of much good.

On the 25th exhibition drills were given by three companies—the Toledo Cadets, Co. C of the 1st Regiment, and the Pugh Videttes of the 14th.

In the company drill, including all movements in double time and by platoons, for celerity, precision and soldierly bearing the Toledo Cadets can not be surpassed. Their step is correct to the second. Though consisting of but four sets of fours, the Pugh Videttes made a fine appearance, and their wheelings in line and movements from columns of fours were excellent. To Co. C, of the 1st Regiment, however, is due the meed of praise, considering proficiency and practical value combined. Movements in company drill were executed by commands from the bugle with a quickness and precision hardly excelled by the cadets, and the company was deployed into line of skirmishers and well manœuvred by the same means. The company was also drilled in the bayonet exercise. On the 27th a review was held in honor of Governor Foraker. Tents were struck together on the morning of the 28th and each battalion marched away.

MINNESOTA ENCAMPMENT.

THE 1st Regiment Minnesota National Guard encamped at White Bear Lake from the 8th to the 13th of July. With them was the Emmet Light Artillery, of St. Paul, under Captain O'Brien. The camp was laid out in regulation style, and well pitched, and its location was a good one. The parade ground, however, needs grading, although it is not sufficiently uneven to hurt the manœuvres. The conduct of the men from the time of their entry certainly showed improvement over former years in a soldierly point. Their rendition of courtesies was better than ever before, there was less noise and considerable improvement in their general military appearance, with less exhibition of undershirts while outside of the tents. That all important point, guard duty, was, however, still much neglected, and until they acquire more thorough knowledge on that subject their camp will never be a complete success. The strongest point doubtless was dress parade, which is all very well, but with a fine appearance on show occasions should go hand in hand a proper knowledge of the more practical features of the military profession, and the latter was only too much lacking in many respects. The colonel held daily sessions for theoretical instruction of officers with quite satisfactory results. The battalion drills held were fair in some respects, but the companies are scattered through various towns, and did not work together well as a regiment stationed in one place, but still there were many shortcomings which should not occur under any circumstances. The open field and the rather uneven ground also operated in the direction of irregularity of movement and want of precision. On the 12th the Governor visited the camp, and reviewed the regiment, but, as is frequently the case, the review was spoiled by faulty marching and excessive distances, which resulted in a very defective formation of line after the passage. The Governor, however, appeared to be favorably impressed with the whole, and communicated his appreciation of the regiment and its work at the conclusion of a battalion drill on the last day. His remarks were in the main correct, and the credit for a good week's work under the circumstances cannot be denied them. The colonel should prevent a repetition of the performance on the last night of the camp, when disorder was the order of the day. We know it has been a custom to allow this sort of thing on the last night of the camp, but its effects are demoralizing, and the practice is generally eliminated in States which maintain the most efficient militia. A correspondent says: "There was not the usual interest taken in the target practice for the reason that the rules provide that when a man qualifies as a marksman or a sharpshooter, the first qualifying score must stand. Any succeeding score, no matter how high, cannot be considered. For instance, if a man makes 25 to-day, which just qualifies him as a marksman, and 40 to-morrow, the first score goes on the records. The 2d Regiment paid no attention whatever to this rule. They took the highest scores made by each man during the week." In Co. D, not one of last year's sharpshooters attended the range, although they were all in camp (some six or eight). Colonel Bend, in his report, recommends that the State pay the expense of

subsistence and enlisted men $1 per day. Officers same as Regular Army. We now get $300 per company allowance annually, and $1.50 per day for active service. The $300 is swallowed up for rent and the pay per man just about pays camp expenses. But we live too high altogether. Sunday nearly all the messes indulged in the luxury of ice cream and everything else in proportion.

(Correspondence of the Army and Navy Journal.)

SECOND ENCAMPMENT MASS. BRIGADE.

ON Tuesday, July 20, the Second Brigade, Massachusetts Volunteer Militia, Brig. Gen. Benj. F. Peach, Jr., commanding, commenced their tour of camp duty at the State camp ground, South Framingham, Mass.

The Brigade is composed of the 9th Infantry, eight companies, commanded by Colonel Wm. M. Strahan. But on this tour of duty, under command of Lieut. Col. Lawrence J. Logan, Col. Strahan being absent with leave in Europe, 5th Infantry, eight companies, Col. Wm. A. Bancroft; 8th Infantry, twelve companies, Col. Francis A. Osgood; 1st Battalion Light Artillery, two companies, Major George S. Merrill; 1st Battalion Cavalry, two companies, Major Horace G. Kemp; a Signal and an Ambulance Corps.

The general disposition of the camp was substantially the same as last year, the only changes being the streets between the organizations being 5 feet narrower than before, the space thus gained being added to the Artillery Park, to allow sufficient room for the Gatlings, two of which have recently been issued. The total length of the line of tents was 1858 feet.

The tents with the exception of the mess tents and the marquees used at headquarters, are owned by the State but are pitched and struck by a firm of tent makers in Boston. This method, it is claimed, is more economical than that formerly employed where the camp was pitched by details from all the organizations the day preceding the opening of the camp.

The cook houses and sinks, both officers' and men's, are permanent wooden structures.

The buildings at brigade headquarters, neatly painted wooden structures, forming three sides of a square, add greatly to the appearance of the camp.

The camp opened at twelve noon Tuesday. All the organizations, except the 8th Regiment, which was delayed on the railroad, arriving and reporting on time.

The first impression we received of the sentries on duty was not very favorable, and we regret to say the unfavorable impression was not dispelled by subsequent occurrences.

Having removed the dust which had accumulated on our clothing during our ride from Boston, we repaired to the general's quarters to pay our respects. As we approached the Brigade headquarters, we were halted by a sentry, who said: "Halt! who comes here?" To which we replied: "Friend, without the countersign." This reply seemed to confuse him, and he stood for some time, not knowing what to do. We suggested that he call the corporal of the guard, which he did in the following manner: "Corporal of guard, Post No. 8." The sentinel on his left called to him: "You are not on Post No. 8, you are Post No. 7." To which he replied that "it made no difference, the corporal would have to come anyway." And bringing his piece to an order, he inquired the time, which we told him. By this time the corporal had arrived, and we made known our errand and was allowed to pass.

Tattoo roll-call, which took place at 10.30 P. M., was witnessed in the 5th Regiment, and it was noticeable that there was a great lack of uniformity in the way the men dressed, and no regard for the position of the soldier. Men unsteady.

On grand rounds there was among the sentinels a lamentable lack of knowledge of their duties in every case the error was made of prefacing the challenge with the word, "Halt."

Major Bogan questioned the men in regard to what they were required to do in case of certain emergencies. As, for instance, one man was asked what he would do in case the stable at headquarters should catch fire, and he replied he "did not know, but would probably stand and look at it." One other was positive that he would not give up his piece to any one but the corporal of the guard, provided a request was made for it. And a third was equally certain that the officer of the day was the only one to whom he should surrender his piece.

The Brigade guard for Wednesday was furnished by the 9th Infantry. Taps sounded at eleven o'clock, and lights were extinguished promptly, and in a very short time absolute quiet reigned, the deportment of the men being all the most fastidious could require.

Thursday the men of the 5th were noticed during reveille roll call and the same lack of steadiness was apparent as at tattoo roll call the night before. Several men were seen wearing long trousers, while the remainder appeared in the short trousers and leggings, except one man in the sixth company, who wore the short trousers without the leggings.

Immediately after roll call the men in all the infantry organizations are marched by companies on the parade ground and go through the setting-up exercises, salutes and facings for about twenty minutes, an idea originated by Col. Bancroft, of the 5th Infantry, about four years ago, and looked upon with disfavor by the other organizations at the time, but since adopted by all with very satisfactory results.

For regimental guard mounting of the 8th Infantry, which took place at 8 o'clock, no 1st sergeant was seen inspecting his detail, and this was apparent when the details were marched out on the parade ground. Three men, one of whom was a corporal, had on russet colored canvas shoes, none of the boots appeared to have been blackened that morning, and while some of the men wore white standing collars, there were others who appeared with handkerchiefs of various colors around their necks. The sergeant-major should remember that he is not entitled to use the hand salute prescribed for officers when he returns the salute of the 1st sergeants, and in saluting the officer of the day he should execute only the first motion of present arms, as prescribed for officers, and then only at the command arms.

The ceremony was fairly executed, but the drummer detailed for guard should not have left the field music before the officer of the day had been saluted.

For brigade guard mounting, at 9 o'clock the entire detail being furnished by the 8th Infantry, it would have been much better if the commander of the guard, when he was instructed by the adjutant to take charge of the details, had marched them nearer the place designated for the guard mount. It took the guard three-and-a-half minutes actual time to march to their position on the line established by the brigade staff officer in charge.

The ceremony was fair, but the front rank were unsteady. The brigade staff officer in charge passed in rear of the front rank to verify the details, and pointed with his finger at each man's back as he counted, an unusual proceeding.

At 10 o'clock all the organizations came out for drill. The colonel of the 5th called the buglers to the front and had them sound the calls, and required the men to name them as they were sounded, which is a very excellent way to familiarize the men with the calls, and the skirmish drill which followed showed that the men did know and remember.

The manual in the 8th was executed by the numbers, the men being in line and the field and company officers superintending the drill pointing out and correcting defects. This method of instruction is to be highly commended, and if it is followed Col. Osgood will soon see the good results. Col. Bancroft adopts the same method, except that he requires the men to count aloud as they execute the different motions.

The artillery organizations drilled at a walk, which was also a great improvement, because in former years it was unsafe for a person to stand near the battalion, not knowing what minute they would start off at full gallop, drivers plying the whip and shouting like a tribe of Comanches.

From 3 to 4.30 P. M. was devoted to drill, and with good results. During this drill the cavalry made two mad rushes across the parade, which may have been intended to represent a cavalry charge, but it had more the appearance of a lot of boys running horses. No attention whatever was paid to alignments, and the man with the best horse got there first. It partook too much of the nature of a "wild West" show and too little of that of a well-drilled and disciplined cavalry battalion to be pleasing. During the second charge one of the corporals was unhorsed, but fortunately, beyond a slight injury to his ankle, escaped uninjured.

Brigade dress parade followed at 5.30 o'clock. The several organizations formed promptly at the signal, the 5th being the first to form closely, followed by the 9th and 8th. Line was established promptly and without confusion, but the distances between the 5th and 8th Regiments and the 8th Regiment and the artillery was too great. The manual was very good in all the organizations, that of the 9th having possibly a little more snap than either of the others, but the men have not yet learned to place the piece on or remove it from the shoulder without moving the head.

The staff in each of the infantry organizations was altogether too far to the right. The adjutant's position is six yards from the right of the 2d Division, the remainder of the staff abreast of the 1st Division, the right of the staff six yards to the right of the division, in every instance the left of the staff was from one to two yards to the right of the adjutant. One other point which needs to be corrected is the custom the field officers of the battalions on the flanks have when they leave the General to return to their organizations of riding at full speed and shouting at the top of their voice orders to their commands. While promptness and activity is to be encouraged, the exigency is certainly not such as to require the officers to adopt a gait other than a trot, unless they have been otherwise ordered. Battalion dress parades and muster for pay closed the exercises of the day.

When the 1st sergeants reported, the sergeants of the 2d, 3d, and 4th companies faced out to the command "to your posts." The adjutant saw this and corrected it.

The manual of the sword has received considerable attention by the officers of the 5th, and it is apparent on all occasions, but we would suggest that when the parade is dismissed they learn to return their swords at the same time as the adjutant and all face simultaneously, if possible, towards the centre. The staff officers excel the company officers in this respect.

At tattoo roll call Thursday night and reveille roll call Friday morning of the 8th the lack of uniformity in regard to wearing overcoats and trousers, noticed in the 5th, was again apparent, but to a much greater extent. The 8th company is the only one which can be called even good; the 3d company was on both occasions disorderly, and in the 4th company at tattoo roll call one man, who, from his position in the file closers, was evidently an officer, but whether commissioned or non-commissioned we could not determine, was smoking. In the 10th company one man appeared wearing his helmet.

Regimental guard mounting in the 9th Regiment Friday was only fairly done. The formation was in single rank, sixteen files front, but would have looked better had it been in double rank and the division into platoons omitted. Several of the 1st sergeants in reporting to the sergeant major used the word sir, which is incorrect, and the sergeant major neglected to use it when he reported to the adjutant. The sergeant major of this regiment, like the one of the 8th, should learn to use the right-hand salute prescribed for enlisted men. The personal appearance of several of the men would have been improved had their faces received a little attention from a barber previous to the ceremony. The band, which ought to be, but which certainly is not, a very soldierly body of men, would have been improved in appearance had they given the subject of dress a little more attention. One man had the lower part of his trousers rolled up and displayed a pair of bright scarlet stockings.

Brigade guard mounting followed. The detail from the 5th Regiment looked well and was ready some minutes before the call, and when the call sounded they marched on to the line in good shape, the lieutenant commanding the detail from the 9th and the sergeant the one from the 8th, marched their details on to the line with pieces at a carry. Barring the unsteadiness of one man in the centre of the front rank, who raised his hand several times to adjust his chin strap, the men were very steady, and the ceremony was as well done as anyone could wish. The salutes at the guardhouse by the new and the old guards were correctly given, but the officers of the day delayed, it seemed, an unreasonable time before they put in an appearance. During this delay the error was committed of dividing the guard into reliefs and sentinel No. 1 was posted wearing his knapsack.

The Governor arrived in camp at 12 o'clock noon and received a salute of 17 guns, the interval between the rounds being, however, much more than the prescribed 10 seconds.

At 3 P. M. brigade review was held, all the organizations forming promptly and marching promptly and in good order to the line; an excellent present was given. After the Governor, with General Peach, had passed the 9th Regiment it was brought to place rest, but the commanders of the 5th and 8th kept their men at parade rest.

The signal corps, which followed the band, looked well. The lieutenant commanding made a good salute, but just why the corps should march past with kits at a shoulder instead of at a carry we do not understand. Perhaps it was all right according to their tactics. We learned from watching their drill that "shoulder kits" was similar to left shoulder arms, and that "carry kits" was the infantryman's left reverse arms. Lieut.-Colonel Logan, of the 9th, was a little previous in bringing his men to carry, and the salute by himself and staff, while fairly well executed, was given at 15 yards from the reviewing officer. The companies made a very fair passage, but the effect would have been much better had the rear ranks closed to the proper distance. The fifth company made the best appearance, the set-up of the men, the position of the pieces' butts being well to the rear; the step and alignments and the salutes of the officers being such as to merit generous applause.

The 5th Infantry followed the 9th, and just at the proper place the commanding officer gave the command "carry arms." The salutes of the colonel and staff were perfect, the distance was well judged and the swords fell as one. A better salute could not be given. The eight companies marched past in good shape, rear ranks well closed and officers saluting properly. The passage of the 5th was by far the best in all respects.

The 8th Infantry followed the 5th too closely, which brought it to grief before the ceremony was finished. The colonel and staff made a good salute, but perhaps a trifle too soon, and the 12 companies looked and marched well, but the closeness with which they followed the 5th caused the distances between the three or four rear companies to be reduced too much, and the two left companies were obliged to mark time.

The artillery battalion followed, and Major Follett made a good salute, but his staff were a little irregular in theirs. The men, horses, and guns looked well, and had the alignment of the pieces been a little better the passage could have been called very good.

The cavalry battalion followed next and the Major was evidently over anxious to salute, as he executed it at least 15 yards from the reviewing officer. The men looked well, but the fronts were spoiled by several unruly horses.

The review was very satisfactory.

Shortly after the review an interesting sham battle took place. The signal corps stationed on the field and on the side of a hill at some distance from the camp were for some time in communication, when suddenly the videttes posted on the hill were noticed endeavoring to dislodge an unseen enemy. The effort was, however, fruitless, and the videttes very slowly but surely driven down the hill and into the camp ground firing as they retreated. On the field the 5th and 9th Regiments were deployed as skirmishers supported by the field pieces, with the 8th Regiment and Gatlings in reserve. During the progress of the fight the Gatlings were brought into action, and the spectators were astonished at the rapidity of the fire. The infantry regiments fired several volleys with fair results, not one of which can be called first rate.

Brigade dress parade at 5.30 was the best effort of the week in that line and showed that the officers and men had improved very much during the week.

At grand rounds Friday night we found the sentries but little better posted than they were Wednesday night. One sentinel on the fort could not be seen when we looked for him, but was soon discovered stretched out on the top of the parapet, his shoulders against the muzzle and his head resting on the 10-inch barbette gun, sound asleep. The officer of the day climbed the embankment and lifted his rifle from his hands without awakening him, sent to the guardhouse for a file of men, and placed him in confinement. We understand the man received only a slight reprimand from his regimental commander. It would seem as if the State of Massachusetts could afford to dispense with the services of a man who had been on his post less than an hour when he was found asleep.

Tattoo roll call Friday night and reveille roll call Saturday morning was observed in the 9th Infantry, and the same criticism is to be made as has been made of the others; although in the 9th it should also be stated that they were on both occasions very tardy. It was at least five minutes after the music ceased that one 1st sergeant in the right wing commenced to call the roll.

After taps Friday night it was some time before the men became quiet as is usual the last night in camp. Such practices should be stopped.

Camp was broken at 12 noon Saturday and the several organizations departed for home.

During the week the Cavalry and Infantry competed for prizes at rifle shooting at the range on the grounds. The prizes were two gold medals, one to the officer making the highest score in five consecutive shots at 200 yards and the other to the enlisted man making the highest score under the same conditions.

The prizes were won by Quartermaster Barnes, 5th Inf., with a score of 21, and by Sergeant Darmody, Co. G, same regiment, with a score of 20 points.

Target practice has received considerable attention and encouragement in this brigade, the General commanding being an enthusiast on the subject, and the men share his enthusiasm. The General fully believes that as the Massachusetts camps are camps of instruction, this important branch should not be neglected and for the past four years prizes have been awarded the successful competitors. Many of the men are unable to visit the range at any other time except during the encampment and as they are ready and willing to devote the time which is their own to familiarize themselves with the use of the rifle the General encourages them. On Tuesday he made a score of 44 out of a possible 50.

The attendance varied between 1826 on the first and second days, 1843 on the third, 1864 on the fourth, and closed with 1840 men on the fifth day. The weather was favorable, the average temperature being 82°. The health of the men was excellent, only six cases being admitted to hospital.

It is to be regretted that the sentinels did not make a better showing, as guard duty has received considerable attention throughout the State. The present Adjutant-General has introduced the system of armory inspections, and during the year every company in the State is inspected by himself or assistants, and at that time the men are questioned individually and collectively in the duties of sentinels. The unsatisfactory showing made at camp is attributable, in a great measure, to the idea which all commanders entertain that they should recruit their commands to the maximum immediately before camp, in order to carry, if possible, a full company. It is no exaggeration to say one-third of the number come into camp with little or no preliminary instruction, and these new men are put on guard. This is detrimental to the men as well as to the service, because after a week in camp these men will not go, as they should, into squads under non-commissioned officers and receive instruction; the fact that they have been to camp seems to them sufficient reason why they should drill with the company and not with the recruits, and there is growing up each year, as the result, a number of men who have not received proper individual armory instruction. Enlistments should be limited to the fall or early spring, and the false idea that it is better to bring sixty-two men to camp, one-third of whom know nothing, than it is to bring fifty men, all capable of doing any duty which may be required of them, be dispelled.

The cleanliness of the camp was very commendable, especially on days when the camp was not overrun by visitors, but Thursday, and especially Friday, newspapers, peanut shells and partly-smoked cigars were thrown around promiscuously by those who had no other object there than to be entertained. It would be a good thing for the troops if these outsiders were refused admittance, because their presence prevents the men from doing their duty in a soldierly manner. The old idea that they are a necessary evil has had its day. At any rate they should be required to leave the grounds promptly at tattoo. Whatever noise was heard in this encampment after taps can, in nearly every instance, be traced directly to the presence of civilians in the quarters of the men. In one tent out of eight occupants we found five to be civilians, and these made all the noise. We witnessed numerous other cases, where the proportion was not so large, but where the visitors were the sole cause of the disturbance.

A brigade staff officer was detailed to inspect the companies during tattoo and reveille roll-call, but it would be better if each regimental commander should require his whole field and staff officers to be present at these times, one at each company, or at least to each two companies, whose duty it should be to see that the men are dressed alike throughout the organization, and that they remain in the ranks until dismissed, and answer to the names in a proper manner.

The system adopted in the 5th, of having all the companies march at the same time to their meals, the commands being given by the regimental officer of the day, standing in the centre street of the organization, is a very good one, and has much to recommend its adoption throughout the brigade.

The system of requiring the cooks and others employed about the kitchens to place all the garbage in iron receptacles which are closely covered and which are collected by farmers and taken outside the limits of the camp every day, is a most excellent one, as was also the system of having men specially employed to visit the sinks several times each day, and throw in a sufficient quantity of earth to prevent unpleasant and unwholesome odors from arising. The entire encampment has been a great success and Gen. Peach is to be congratulated at being the head of such an excellent organization.

Major George B. Rodney, 4th U. S. Artillery, was present throughout the week and expressed himself as highly delighted with what he witnessed. R. W. SUTTON.

CREEDMOOR MATCHES.

THE Seventh Qualification and Champion Marksman's Class Matches were shot at Creedmoor on Saturday, July 31. Owing to the stormy weather in the forenoon the attendance was small. The conditions were favorable for shooting and some good scores were made. The gold Marksman's Badge changed hands again, for the seventh time, Lieut.-Colonel Fred. C. McLewee, Inspector General's staff, being the winner in this match.

The winners were as follows:

	Regiment.	Score. 200	500	Tot.
F. C. McLewee	Staff.	21	25	46
E. F. Young	7	22	22	44
A. McDougall	7	23	21	44
S. C. Pirie	23	21	22	43
J. H. Jones	12	21	22	43
W. F. Olliffe	13	18	24	42
E. DeForest	23	20	22	42
W. H. Greenland	23	20	22	42

The following are scores made by winners in previous matches:

	Regiment.	Score. 200	500	Tot.
G. W. Lota	13	23	23	46
J. S. Shepherd	23	22	23	45
R. M. Kalloch	7	19	24	43
W. A. Stokes	23	21	22	43
G. L. Hoffman	7	20	21	41
G. S. Scott, Jr.	23	21	20	41
T. Mahoney	12	21	20	41
I. E. Winslow	23	21	20	41

The next matches will be shot on Aug. 14 and 28.

IT is reported that the Russian fleet is threatening Port Lazareff, alleging by way of excuse the occupation of Port Hamilton effected by England some time ago.

THE MESS.

Irishman (relating his exploits)—I walked up bouldly to wan o' the inemy and cut off his legs wid me sword.

Listener—Why didn't you cut off his head?

Irishman—That was already off.

—

Officer examining recruits—"Why do we salute superior officers?" Recruit—"In order to keep out of the guardhouse."

—

'Tis the last week of Congress
Left useless alone,
All its months of companions
Are finished and gone.
Not one of its kindred,
No son of a gun,
Can reflect back its blushes,
For the nothing that's done.

We'll not leave thee, thou lone one,
To pine on the stem,
Since the others are sleeping,
Go sleep thou with them.
Thus kindly we scatter
Thy deeds o'er the bed
Where thy mates of the session
Lie scentless and dead— Scatter!

—*Critic.*

—

A young naval officer introduced his mother-in-law to his aunt on board his vessel. He said the name of the vessel suggested the introduction, "because," said he, "I want Mi-anto-no-mah."

NEW PUBLICATIONS.

The August number of the Journal of the Franklin Institute for its initial article publishes the conclusion of a very exhaustive paper on the "Applications of Electricity to the Development of Marksmanship," read before the Institute March 15 by Capt. O. E. Michaelis, the first part of which was a conspicuous feature of its July issue. Captain Michaelis some years since printed an instructive little book on the Boulenyé chronograph. His present essay is an exhaustive *résume* of the different devices which have been invented to test the strength of powder and determine its ballistic effects through the application of electricity.

Robert Louis Stevenson's latest novel, "Kidnapped," is a work of romantic interest, well sustained throughout, and written with the realistic minuteness of Defoe. The story treats of the adventures in the Highlands of Scotland and by sea of a young Scotchman, and is laid during that period when the Highlander was not yet quite decided to accept Hanoverian rule. Mr. Stevenson, by many a clever touch, shows the manner of the times, and well sustains in this his latest work his high and growing reputation.

We are indebted to the Hon. Anson G. McCook, Secretary of the U. S. Senate, for a bound copy of Vol. 16, Part 2, Series 1 of the Official Records of the War of the Rebellion, compiled by Col. R. N. Scott, U. S. Army.

PERHAPS the enthusiasm of the Arizona man who killed an Indian may be excused, as the occurrence is such a rare one. Still the fact that after killing the Apache he cut off his head, scalped him and fastened the head to the headlight of a locomotive indicates that the killer was about as brutal as the killed. If an Apache had committed such an act on a slaughtered victim we should have denounced it as a "horrible mutilation," but as it was committed on the other side we regard it as a rather humorous conceit.—*San Francisco Report.*

ANSWERS TO CORRESPONDENTS.

J. L. P.—You stand No. 3 on hospital steward list.

E.—The decision you refer to was published in JOURNAL of June 19, 1886, p. 957.

C. C.—If you will designate the particular district or districts in which you are interested the information you desire will be promptly given. The President has made all of his appointments for 1887.

Inquisitive asks: Are there now any vacancies for candidates to West Point from the 1st or 2d Congressional Districts of Rhode Island? ANS.—Vacancies will occur in June, 1889 and 1887, respectively.

G. C.—The nearest cavalry troops to Washington, D. C., are at Fort Leavenworth, Kas., four companies. A little further on, at Fort Riley, Kas., are stationed the headquarters and three troops of the 5th U. S. Cavalry.

Saw.—Par. 235 requires that when the right is in front the command is right by twos or files, and when the left is in front the command must be left by twos, etc. This is explicit and any deviation would be a violation of G. O. 73, A. G. O, 1867.

Q. M. S. asks: Was such a command as "Front Face" ever in any of the tactics adopted by the U. S. Army? ANS.—Yes. You will find it in the Infantry Tactics prepared by Maj.-Gen. Winfield Scott, U. S. A., in 1834, and formally prescribed for the Army April 10, 1835.

P. asks: Did the words "innocuous desuetude," occur in a message of President Cleveland's or was it in Miss Cleveland's book? ANS.—The words occurred in the President's message of March 1 to the Senate on the subject of the relations of the President to Congress.

R. M. asks: 1. Is there a gun in the United States weighing one hundred tons? ANS.—No.

2. Was there ever such a gun made in the United States? ANS.—Never. The largest, the 20-inch Rodman, weighs 58 tons.

Columbus, Miss.—We know of no other book on the laying out of camps besides regulations and tactics. The principles there laid down should govern for camps of any size if the extent and conformation of the grounds admit. If not follow tactics as nearly as you can under the circumstances.

Soldier.—In the Department (East) skirmishers match at Creedmoor in September, 1885, the first team of the 4th U. S. Artillery made an aggregate score in the two days of 862 and the second team the same. In the "General Sheridan's Skirmishers' Match," shot September 19, 1885, the 4th Artillery team came in ahead with a score of 769. The 4th Artillery also won this match in 1884.

Spokane asks: 1. Is not the pay of an enlisted man as follows: first enlistment, first and second years, $13 a month; third year, $14 a month, $1 retained; fourth year, $15 a month, $2 retained; and fifth year, $16 a month, $3 retained? ANS.—Yes.

2. In making out final statements at the expiration of his first enlistment, he is allowed for transportation, one day's pay and commutation of rations for one day for every 20 miles. Shouldn't his pay for one day be reckoned at the rate of $16 a month (if he is a private) the rate he was being paid on his fifth year? ANS.—Yes. The soldier receives travel pay at the highest rate he was receiving at date of discharge, including retained pay.

E. O. L. asks: 1. Is it proper for a battalion to be formed partly of single and partly of double rank companies? It is very common here. ANS.—It is improper.

2. There are no chevrons nor any particular uniform prescribed for a chief musician. Chief and principal musicians have no positions laid down in the band. They march where they can do most good.

3. Is not the proper position for a sergeant's revolver in a holster, back of the cartridge box, butt to right? What is usual? ANS.—With the revolver is furnished a special belt, and when this is worn the cartridge box is attached to it and carried on the back, with the bayonet scabbard on the left, and the revolver at the right hip.

Young Recruit asks: 1. Is the left foot, in executing the command, by the right flank march, planted 30 inches in advance of the right, or by the side of it? ANS.—In advance. See par. 41.

2. The command being: By the left flank, march. What foot should strike the ground, and with which foot should the first step in the new direction be taken? ANS.—The command is executed on the same principle as by the right flank, but by inverse means.

3. What are the relative positions assumed by Nos. 1, 2, 3 and 4 in a company marching in a column of fours, right in front, at the command: By the right flank, march, and what positions do the captain and the right and left guides take? ANS.—All remain in their places. They simply execute by the right or left flank as prescribed and march in the new direction.

4. What is the benefit of turning over wheeling, and when should it be preferred? ANS.—Turning saves time, and as the pivot man faces on his own ground, no ground is gained towards the marching flank as in the wheel on a movable pivot. It is employed where a rapid change of front, without loss of ground to either flank, is necessary. The school of the battalion will teach you when to employ it.

5. Recommend the best course of study for officers of the militia, who are almost totally ignorant of military matters, as the recent Indian troubles in this Territory have given commissions to a good many persons who, unfortunately, are in just that predicament, and who are very desirous of educating themselves up to their duties. ANS.—Familiarize yourself with tactics, regulations, and text books treating on guard and picket duty, military correspondence, orders, etc.

Puritan.—The Society of the Cincinnati was founded in 1783 by the commissioned officers of the American Army while in cantonment on the Hudson river, near Newburg. General Washington became President-General, and on his death was succeeded by Major-General Alexander Hamilton. Major-General Henry Knox, then Commandant at West Point and afterwards Secretary of War, became Secretary-General. A State Society was established in each of the original thirteen States and also one in France, which was under the immediate patronage of Louis XVI., and of which Vice Admiral and Lieutenant-General Count D'Estaing became President. Under the Institution, original membership was confined to the commissioned officers of the American Army, and in the French State Society to those who held the rank of colonel, or were general officers and had actually served in the United States Army during the Revolution, and to Admirals and commanding officers of French ships of war which had co-operated with us on the American coast. Hereditary membership is confined to the eldest male posterity of original members and in default of that passes to the collateral branch judged most worthy, or preferably to a male descendant of a daughter of an original member. Of the 14 State societies originally existing there are now but seven, viz.: Massachusetts, Rhode Island, New York, New Jersey, Pennsylvania, Maryland, and South Carolina. The vicissitudes of the French Revolution dispersed the Society in France, and its President was guillotined, as well as his ill-fated Sovereign.

Major-General Israel Putnam was not an original member, probably because he had been stricken with paralysis and never could leave his home to attend a meeting of the Connecticut State Society. His son, Major Daniel Putnam, was, however, a member, and his proper descendant may apply in one of the existing State Societies. The proper descendant of any Continental officer who died or was killed during the Revolution, or who failed to avail himself of original membership, is available for hereditary membership and may apply. The Connecticut Society dissolved in 1804, so you would have to make application in some one of the existing State Societies.

The advantages of membership consist in belonging to a national society, eminently patriotic in its character, and descended from those who in the days that tried men's souls, were chiefly instrumental in giving us the blessings of national independence. You will have to study its principles

ROYAL

BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of ow test, short weight, alum or phosphate powders. *Sold only in cans.* ROYAL BAKING POWDER CO., 106 Wall st., New York.

KINNEY TOBACCO CO (Successors to Kinney Bros.) NEW YORK

in order to ascertain its objects which are partially benevolent. The general society meets tri-annually and consists of the general officers and five delegates from each State society. The following are the general officers: President general, Hon. Hamilton Fish, LL. D., of New York; vice-president general, Dr. Wm. Armstrong Irvine of Pennsylvania; secretary general, Judge Advocate Asa Bird Gardiner, LL. D., U. S. A., of Rhode Island; assistant secretary general, Hon. Richard Irvine Manning of Maryland; treasurer general, Hon. John Schuyler, C. E., of New York; assistant treasurer general, Dr. Herman Burgin of New Jersey.

Should you decide to apply for membership you would be required to prove conclusively your descent, and if your ancestor was not an original member, to contribute, if admitted, about $500 to the permanent fund. Each original member was required in 1783 to deposit a month's pay. In the Massachusetts's State society their fund is now so large, that $700 is required to be paid on admission. Of course the proper descendant of an original member who deposited his month's pay is not required to pay anything. Several Army officers are hereditary members, and a number of civilians who have become eminent in public affairs. The present U. S. envoys extraordinary to France and Germany, Ex-Gov. McLane and Ex-Senator Pendleton, are hereditary members, respectively, in the Maryland and New York State societies. The present Governor, Wetmore, of Rhode Island is an hereditary member in Massachusetts, while the Marquis Du Quesne, of Cuba, and Count D'Ollone, of France, whose grandfathers were original members in France, are hereditary members in Rhode Island. In 1810 the Pennsylvania State society began to collect funds for a Washington monument, and they are now about to erect one in Fairmount Park, Philadelphia, at a cost of $265,000. For further particulars as to the Cincinnati, you should consult the encyclopædias. The New York *Tribune* for July 5, 1886, had a very interesting account of it.

FOREIGN ITEMS.

THE English difficulties in Burmah increase.

A POLICE force is to be organized to maintain order in Burmah.

TWO MORE torpedo-boats, built by the German firm of Schichau in Elbing, on their trial trips, in spite of extremely unfavorable weather, attained a speed of 21.19 knots per hour.

THE column which was sent by the French from Saigon to suppress the disturbances in the province of Bin Thuan has landed in Phanry Bay. Naval Lieutenant Feyzac and several sailors were accidentally drowned at Phanry.

TRIAL is being made in England of a tent invented by Captain A. Saville Tomkins, which needs "no poles, no ridge pole, no guide ropes, no guide-rope blocks, and no guide-rope pegs." It is constructed on an ordinary service wagon, the tilt of which is ingeniously utilized for fastening up the canvas forming the tent.

ENGLAND has had within the last ten years eight Secretaries of State for War, including the one just appointed, the fifth in fourteen months. The French have had seventeen War Ministers since 1870, to the acknowledged detriment of the service. We have had six in the same time, while Germany has had three within half a century.

THE British War Office have formed a Corps of Volunteer Submarine Miners for the defence of the principal commercial ports.

THE Sultan has sent a very kind message to the widow of the late Admiral Hobart-Hampden, informing her that orders had been given that a suitable pension should be provided for her.

IN the Russo-Turkish war of 1877-78 the Russian Army of the Danube, strength 592,085, lost 6,465 killed and 44,459 from disease. In the Crimea the Russians lost 105,678 by disease out of a strength of 400,000.

FROM Madrid the news comes that a well-known Spanish officer, General Velarde, has suddenly disappeared. He was well known for his Republican proclivities, and two years ago was implicated in a conspiracy. It is said that the Spanish Government has had under consideration for some time past the desirability of banishing him to the Canary Islands.

A MACHINE-GUN on a novel principle has lately been constructed in Germany, and was tried the other day on the ramparts of Thorn, a town on the Vistula. The *Thorn-Zeitung* states that the results of the experiments were altogether satisfactory. The name of the inventor is not given, but, according to details published, the gun fires ten rounds consecutively, and carries a projectile which, exploding at the mouth of the barrel, has a range of 100 mètres.

NEW ENGLAND MUTUAL Life Insurance Company, OF BOSTON, Mass.

Assets, - - - - - - $17,846,546.65
Liabilities, - - - 15,238,761.16
Total Surplus, - $2,607,785.49

This Company insures the lives of Officers of the Army and Navy without extra premium, except when actually engaged in warfare, which premium if not paid at the assumption of the extra risk *will not invalidate the policy*, but will be a lien upon it, and also gives liberty of residence and travel, on service, in all countries, at all seasons of the year, without extra charge.

Special attention is called to the LIFE RATE ENDOWMENT policy, which combines insurance at low cost with an investment at a fair rate of interest, and at the same rate of premium formerly charged for life policies. Every policy participates in the *annual* distribution of surplus, and has endorsed upon it the cash surrender and paid up insurance values provided by Massachusetts laws.

Pamphlets explanatory of the New Feature may be had on application at Compy's Office, *POST OFFICE SQUARE.*

Gray.

Horsford's Acid Phosphate

IN GENERAL DEBILITY.

Dr. E. W. HILL, Glens Falls, N.Y., says: "I have used it in cases of nervous and general debility, and always with success. I consider it an excellent remedy for atonic dyspepsia, or any low state of the system."

A SAFE INVESTMENT

For both large and small sums of money is offered in the DEBENTURE BONDS of the NEBRASKA LOAN AND TRUST CO. and the CENTRAL LOAN AND LAND CO. These bonds are secured by mortgages on productive real estate after the manner of securing National Bank notes, bear 6 per cent. interest and run 10 years. Experience proves that they are one of the safest investments ever devised, and they are commended to the attention of officers of the Army and Navy.

Genuine Crab Orchard Salts in sealed packages at 10 and 25 cts. No genuine salts sold in bulk.

CRAB ORCHARD WATER CO., Prop'rs. SIMON N. JONES, Manager, Louisville, Ky.

Sir William Thomson has just brought under the notice of the Royal Society of Edinburgh, a new form of spring balance which he has devised for measuring terrestrial gravity.

Extensive siege operations are to take place at the Italian fortress of Verona during the month of August, the idea of grand manœuvres having been abandoned.

The launch is reported at Ferrol of the *Isabella Secunda*, a cruiser entirely built in Spain. The engines of the *Isabella Secunda* are now in course of construction at Saville; they are to be delivered by December, 1886.

It seems that the "eloquent" and "patriotic" passage in the royal journal about the achievements of the British Navy, which has been admiringly quoted in most of the papers, is not really the work either of the young Princes or their Mr. Barlow, their editor, but it is extracted boldly and bodily from Charles Kingsley's "At Last."

The French balloon Torpilleur, which is fitted with a patented steering and propelling apparatus, ascended from Cherbourg with the aeronaut L'Hoste and the astronomer Mangot at 11 P. M., July 29, and descended in London at 6 A. M., July 30. The aerial navigators will return to Cherbourg, and will attempt a voyage from that place to Norway.

Quick firing is to be facilitated by means of a quick loader. On this Col. Arbuthnot says: "This, as its name denotes, is simply a contrivance designed with the object of assisting the soldier to load quickly, especially in the dark, or in wet or cold weather. It is not intended to take the place of a magazine, but is so contrived as to present a cartridge in the readiest position for a man to load. It hangs on the side of the body of the action, and holds six cartridges. The cartridges are acted upon by a zig-zag spring, which forces each one in succession up an inclined plane, the head of the cartridge being forced through an aperture in the lid ready for the soldier to take hold of when he wants to load. When these quick loaders were issued for trial, it was found that in loading from the quicker loader six rounds could be fired in about 25 seconds, whereas in loading from the pouch it took over 40 seconds to fire the same number of rounds."

Berlin continues to grow at a great rate and has now a population of 1,350,000 inhabitants, human life accumulating in the city more rapidly than at Vienna, St. Petersburg, or Paris.

According to the *Novosti*, of St. Petersburg, it is the intention of the Russian Government to establish Russian colonies on the Coast of New Guinea and some of the adjacent islands in the Pacific.

A battery of breech-loading guns, with a complete equipment for twenty-four men, is being got ready at Spandau to be sent out to Africa as a present from the Emperor William to the Sultan of Zanzibar.

The contract for the Manchester Ship Canal has been let for $18,750,000, the work to be completed in four years. It is expected that in the working plant for carrying out this undertaking upwards of 6,000 railway wagons and about 300 locomotives will be required, and that employment will be given to about 20,000 workmen.

In the forthcoming operations at Milford Haven the chief objects are to determine the best means of protecting mines, including defence by gunboats, against a sustained attempt to force them by a squadron; the value of torpedo boats to a defence, the best method of manœuvring them, and the most suitable organization for the whole defensive operations. The defensive force on the occasion will consist of six torpedo boats and six guard boats, partly manned by naval artillery volunteers, one field and two garrison batteries of royal artillery, two companies of royal and two of militia submarine miners, and one battalion of infantry.

The French Minister of War has, according to *L'Avenir Militaire*, received conclusive proof that the General Staff of the German Army has organized carrier pigeon depots throughout France, from which daily messages are being transmitted to and from Germany, to train the birds in time of peace for the duties they will have to perform in time of war. Quite recently a French farmer shot a pigeon in the neighborhood of Nevers. The wings, besides carrying a quill enclosing a cipher message, were stamped with the Imperial German coat of arms. The bird has been sent to the French Minister of War, who admits that it is an official pigeon.

Messrs. Yarrow and Co., of Poplar, have just completed for the Japanese Government a torpedo-boat of an entirely new type. It is 166 feet long by 19 feet beam, and is propelled by twin screws of 1,400-horse power. The special feature of the new vessel lies in the fact that all the vulnerable part of the vessel, comprising the engine and boiler compartments, and the magazines and torpedo gear, is encased by 1-inch steel armor, which is to serve as a protection against machine-gun fire.

R. W. Tansill & Co., Chicago, are now making especially for the Officers of the Army and Navy a new and very fine Havana hand-made cigar, known as "Tansill's Reina." They are put up in beautiful packages of 25 cigars, each cigar banded. They come in three sizes, 4¼, 4½, and 4¾, inches, while their moderate cost, viz. $65, $70, and $75 per thousand brings them within the reach of the entire Service.

BENSON'S CAPCINE PLASTERS are well known in the Army and Navy as the most convenient and effective external remedy. For sprains, coughs, rheumatism, sciatica, and all ailments arising from exposure they excel every other application, giving relief and cure in a few hours. Avoid worthless imitations under similar names. Seabury and Johnson, Chemists, New York.

Reduced Prices to Club Members on Tennis Rackets and Balls.

We feel confident, from the many flattering testimonials which we are receiving, that our 1886 American Tennis Ball is proving itself more uniform in character, with a quick action, when struck by the Racket, as well as the most durable in the market. However, we believe a trial of these Balls by your Club will convince you of their superiority. We offer them to Clubs throughout the country for 40c. each, two for 75c., three for $1.00, six for $2.00, $4.00 per dozen. By

1886 MODEL.

mail, 30 cents a dozen additional.

Our "Franklin, Jr.," same quality as we sold last year for $5.50, we are selling to clubs to-day for $4.00, and our "Staten Island," which we sold last year for $5.00, we have reduced to $3.00 (a discount of nearly 40 per cent.). We also have good Rackets for young folks at $1.50, $2.00, and $2.50 each. Our celebrated "Expert," "Far and Near," or "Franklin" Rackets, 1886 Models, $5.50 each, 6 for $30.00. Address

The Government reserves the right to reject any or all proposals.

H. J. REILLY,
1st Lieut. 5th Art., A. A. Q. M.

Detachable Magazine, charged.

Remington-Lee Musket with Magazine attached.

The Remington-Lee Detachable Magazine Rifle.

Recommended by the U. S. Magazine Arms Board,

First in Order of Merit for Trial in the Field,

AS A SERVICE ARM FOR THE U. S. ARMY.

A single Breech Loader, that can be instantaneously changed into a perfectly safe Magazine Arm, giving an unequalled rapidity of fire.
Smaller number of component parts than any other Arm ever made. Every part simple and strong.
Magazine may be attached or detached in one second, and the Breech System dismounted or assembled in ten seconds.

The Rifle weighs 8¼ lbs. without bayonet, and can be used as a Sporting Arm.

The possibility of a premature discharge through the bullet of one cartridge coming in contact with the primer of another, from the shock of continuous firing, the simple performance of ordering arms, or the effects of a long march—incidents of danger inseparable from Repeating Arms that carry their cartridges in Tubular Magazines under the barrel or in the butt-stock—is absolutely prevented; the position of the cartridges in the Lee detachable magazine not only assuring safety against explosion by impingement but against the deformation of the projectile by "upsetting."

RELATIVE RECORDS of the three arms recommended in order of merit by the late U. S. Magazine Arms Board:

	Remington-Lee Magazine Rifle.	*Chaffee-Reece.*	*Hotchkiss.*
Two minutes' firing as repeater with accuracy	68 shots, 41 hits.	38 shots, 25 hits.	31 shots, 14 hits.
Two minutes' firing as single loader	46 shots, 31 hits.	41 shots, 15 hits.	45 shots, 21 hits.

THE LEE MAGAZINE RIFLE is the only Military Repeating Arm which has demonstrated its superiority in RAPIDITY with ACCURACY as a REPEATER over its execution as a SINGLE LOADER.

Descriptive pamphlets in English, Spanish, and French sent on application.

Present capacity of production 400 stand per day.

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOLUME XXIV.—NUMBER 3. WHOLE NUMBER 1199. | NEW YORK, SATURDAY, AUGUST 14, 1886. | SIX DOLLARS PER YEAR. SINGLE COPIES, FIFTEEN CENTS.

Publication Office, 240 Broadway, N. Y.

THE announcement of the abandonment of Fort Steele, Wyoming, will be a surprise, although it has been known for several years at Army Headquarters in Chicago that it would be done as soon as adequate quarters could be provided at other posts for the companies quartered there. The necessity for the new post Du Chesne hurried the abandonment of Steele, which has been of no use since the Ute campaign of 1879 80.

SAN FRANCISCO having lately been agitating itself as to who was the youngest soldier in the war, the *Report* sensibly says: "Our esteemed contemporaries are welcome to the remainder of the discussion if they feel like carrying it on. There are, we know, 'youngest soldiers' in almost every city in the United States, and probably there are a few colonized in London and Paris. San Francisco has five, with several precincts to hear from."

THE Navy Department has commenced to send requisitions to the Treasury for the payment of the GRAHAM mileage claims for which appropriation was made in the late General Deficiency bill. These claims number 960 and it is estimated that about 50 requisitions can be issued daily. It will thus require about two weeks for the Navy Department to finish the work, and probably two weeks longer for the Treasury to pass upon and issue warrants for their payment.

SECRETARY WHITNEY'S scheme for a reorganization of the bureaus of the Navy Department having met with such ill success in Congress, it is presumed that he will shortly take some steps toward the appointment of a new Paymaster General and Chief Constructor. Our information is that he is now considering the subject, in connection with a plan for a reorganization on his own responsibility. He has the right, without changing the titles of the bureaus, to distribute the work of the Department as he may deem proper, and it is reported that he has determined to exercise this right by making a complete change in the business operations of several of the bureaus. After these changes are made there, it is said, he will announce the two new chiefs of bureaus.

THE revolver match at the Wimbledon meeting was won by 35 out of a possible 36 at a 3-in. bull's-eye, distant 20 yards, by Commander PERCY SCOTT, R. N., with a Lancaster. Two others made the same score, one using an Enfield, the other a Lancaster. To hit the bull's-eye at 20 yards with the Enfield, it was necessary, we are told, to align the sight at a spot two inches to the right of, and fourteen inches below, the bull's eye. Therefore, when using this weapon at a man 20 yards off, if the sight was aligned for the centre of his chest the bullet would pass over his head. The Lancaster had to be aimed some ten inches below the bull's eye. There were 1,000 entries and all the different revolvers, including the Enfield, Lancaster, Colt, Webley, Kynoch, and others, were tried.

WE have had something to say about Mr. HURST'S theory of a forty-knot ship. As Mr. HURST proposes to make this necessarily an "unprotected" ship, *i. e.*, a vessel with a thin skin of steel analagous to the fast ocean steamers, he recognizes the impossibility of carrying heavy, built-up, guns, but suggests rocket guns, in which "only a small amount of the powder is burnt in the gun, producing only a moderate amount of strain." JAMES C. PAULSON, writing to *The Engineer*, wisely comments upon this proposition as follows: "Another matter dealt with in Mr. HURST'S paper was the production of sound castings in steel and wrought iron by employing a new method in the manufacture of guns. The RODMAN system could be introduced, which has heretofore been applicable only to cast iron guns, and consists in cooling the gun from the inside while the outside is kept hot."

CONGRESS at its last session appropriated nearly one million dollars for the payment of bounty, back pay, longevity, for loss of horses and personal property, and other claims of officers and soldiers confirmed by the Second Auditor and Second Comptroller of the Treasury. This amount covers all the cases certified to Congress up to and including July 24, 1886. No provision was made for the payment of "current" claims of this class, so that all cases adjudicated during the remainder of this year will also have to be certified to Congress for appropriation. The Auditor submitted an estimate of $750,000 to pay the claims that will be settled during the fiscal year ending June 30, 1887, not a single cent of which was allowed. Major DEWEY, paymaster U. S. Army, who has charge of the final settlement of the cases for which provision was made by the last Congress, expects in a few days to commence sending out checks. His clerical force being rather limited, three or four months will probably elapse before the last case is reached.

REFERRING to the order of the Minister of War to issue repeating rifles to 17 battalions of Chasseurs and six regiments of infantry, *L'Avenir Militaire* says: "While all the European world has known through the German press that on the other side of the Vosges a great manufacture of magazine arms was going on, silence has been religiously observed by French journals as to the transformation being gradually effected in our own armories, so that, thanks to the discretion of our contemporaries, the information that within one month more than 60,000 repeaters are to be in the hands of French soldiers will be a genuine revelation to a great majority of our countrymen." On July 26, according to our German exchanges, a celebration was to be had at Spandau, one of the three Imperial armories, in honor of the completion of the one-hundred-thousandth repeating rifle at that armory. This does not look as if, according to *La France Militaire*, the Germans had 600,000 stand of the new equipment for issue two weeks previously.

WE have received a copy of an address delivered by General O. B. WILLCOX, U. S. A., at Sackett's Harbor on the 5th of July last before the Jefferson Co. Historical Society. The General's subject was Sackett's Harbor and the War of 1812. His account of the preparation made on our side for that, admirably describes the preparation we are making for our next war, which is nearer at hand than the unthinking people imagine. "We generally drift into war,' General WILLCOX truthfully says, "and prepare for it afterwards. This neglect extended over Congress, the Government, and the States. Our shameful chronic Indian impolicy (in 1812) threw the Indians over to the British side, and the neglect of our French Canadian friends and natural allies was such that we derived no assistance from Lower Canada. In fact, England had every advantage, a powerful navy, a definite policy, regular troops, and hordes of savage allies; while we plunged into the conflict with undue precipitation, flickering diplomacy, no combination, will or unity; with a powerful section, New England, and a powerful party, the Federalists, openly opposed to the war; with scarcely the skeleton of an army or the phantom of a navy, and a militia system which made the militia virtually independent of the War Department, and of the generals in the field. In the face of the enemy, these new levies felt their want of training, and halted at the frontiers of their own States. Their fighting was mostly done 'on the ramparts of the Constitution.'" General WILLCOX also shows how the interference of the Secretary of War with the plans of General WILKINSON prevented the capture of Upper Canada. The lesson of the War of 1812 is, he concludes, "more important to us than the gain or the loss of any single province. The lesson is this: 'In peace make timely preparation for war,' and then let your best generals fight it out on their own lines, 'if it takes all summer.'" But we have lost the province and have not learned the lesson.

THE *Admiralty Gazette* continues its attacks up on the English "gun ring." In reply to the statement that its charges are not sufficiently specific to justify investigation, it says: "The charge brought forward by Captain ARMIT is clear and precise. It is to the effect that Government officials and officers of the Ordnance Department and Woolwich Gun Factory, as well as members of the Ordnance Select Committee, have been interested financially in the success of the ordnance firm of Sir W. G. ARMSTRONG and Co., contractors to the Government. This charge admits of no fencing such as that of the Surveyor General of the Ordnance and of the Secretary of State for War. It is explicit and concise, and should be inquired into by a Royal Commission, as no other tribunal could be so constituted as to have the necessary powers to deal with the question in its entirety; and the very fact that the Secretary of State for War is doing all in his power to prevent any inquiry at all being made, will do more to convince the public of the necessity for the inquiry we advocate than any further arguments we could adduce." We know nothing of the facts, but we have derived the impression from American inventors and others dealing with the English Ordnance authorities that something besides merit was required to secure entrance to the inner circle of the influences controlling their actions. The *Gazette* refers to the report of our American Gun Foundry Board for proof of the fact that a practical partnership has been formed between the English Ordnance Department and the firm of ARMSTRONG and Co. It refers to a contractor who declined the large Government tender as saying: "'The fees one has to pay to get the goods passed and accepted swallow up all the profits. If I supply inferior articles, as some do, I risk my reputation. Hence I decline to tender.' So says one of our many friends. Another says: 'I had to receive a large sum from the Government in contract work. I called and called until I was sick of calling. I never could get my draft. At last, acting on the suggestion of a friend, I enclosed a note for £100 in an envelope, and called again. I apologised for giving so much trouble, but hoped the explanation in my note would prove sufficient. It did. I got my money that day.'"

PERSONAL ITEMS.

COLONEL C. I. WILSON, Paymaster, U. S. A., of Omaha, is visiting in San Francisco.

COLONEL W. B. LANE, U. S. A., retired, and family are at the Las Vegas, Hot Springs, N. M.

LIEUTENANT O. B. WARWICK, 18th Infantry, has rejoined at Fort Riley, Kas., from a short leave.

CHAPLAIN G. D. CROCKER, U. S. A., left St. Louis this week to be absent until the latter part of August.

CAPTAIN A. H. RUSSELL, Ordnance Corps, U. S. A., has left Vancouver Barracks, W. T., on a months' leave.

MAJOR SIMON SNYDER, 5th U. S. Infantry, leaves Fort Keogh, Montana, next week to be absent for a month.

LIEUTENANT A. P. BLOCKSOM, 6th Cavalry, commenced this week his inspection of the 4th Illinois Brigade.

MAJOR EDWARD BENTLEY, Surgeon, is expected at Little Rock, Ark., in a few days for duty at the barracks there.

LIEUTENANT R. K. MCALPINE, British Navy, was in New York this week with quarters at the Hoffman House.

LIEUTENANT F. U. ROBINSON, 2d U. S. Cavalry, is on a brief visit to San Francisco from his camp near Pantano, Arizona.

LIEUTENANT B. F. HANDFORTH, 11th Infantry, visiting at 2,816 Olive street, St. Louis, has had his sick leave extended.

COLONEL S. E. BLUNT, A. D. C. to Lieutenant-General Sheridan, has returned to Washington from a short visit to Oswego.

COLONEL A. C. M. PENNINGTON, U. S. A., and family, of Fort Monroe, are enjoying a vacation at Salt Sulphur Springs, Va.

GENERAL R. H. JACKSON, U. S. A., has resumed command of Fort Columbus, N. Y. H., after a six weeks' absence at Peekskill.

CAPTAIN G. E. OVERTON, 6th U. S. Cavalry, recruiting officer at Baltimore, has left that city to spend a few weeks with his family.

GENERAL T. M. VINCENT, U. S. A., will rejoin at Fort Snelling, Minn., this week, from an official trip to Forts Missoula and Ellis, Montana.

COLONEL THOMAS F. BARR, of the J.-A. G. Department, U. S. A., was expected in Chicago this week to report to Maj.-Gen. Terry for duty.

CAPTAIN T. J. WINT, 4th Cavalry, arrived at Fort Leavenworth this week to prepare to take charge of the Dept. of the Missouri rifle competitions.

CAPTAIN F. F. WHITEHEAD, U. S. A., who is spending a portion of the summer at Old Point Comfort, has had his sick leave extended six months.

ASSISTANT SURGEON J. C. MERRILL, U. S. A., a recent arrival in the Dept. of the Columbia, has taken charge of medical matters at Fort Klamath, Ore.

CAPTAIN J. S. MCNAUGHT, 20th U. S. Infantry, has relinquished charge of the recruiting rendezvous at Cincinnati and gone to Columbus Barracks for duty.

CAPTAIN J. L. TIERNON, 3d U. S. Artillery, rejoined at Newport Barracks this week from a visit to Crab Orchard to inspect the Kentucky State Guard there encamped.

LIEUTENANT S. E. ALLEN, U. S. A., inspector of rifle practice, returned to Governor's Island early in the week from a visit to Fort Niagara to inspect the new rifle range.

LIEUTENANT ALBERT TODD, 1st U. S. Artillery, is Acting Adjutant of the Artillery School, Fort Monroe, during the absence of Lieut. C. P. Miller, 4th Artillery, on leave.

LIEUTENANT H. R. LEMLY, 3d U. S. Artillery, on his return from South America, where he is now on leave, will join Warner's light battery at Washington Barracks, D. C.

COLONEL GEORGE GIBSON, 5th Infantry, under orders from General Ruger, goes forthwith to Fort Keogh, Montana, to take command of that post and of his new regiment.

LIEUTENANT JAMES MITCHELL, Signal Corps, U. S. Army, has left Fort Myer, Va., for Washington, to enter upon a tour of duty as adjutant of the corps in the office of the Chief Signal Officer.

CAPTAIN GEO. MITCHELL, 2d U. S. Artillery, will prolong his leave from St. Augustine until the latter part of October. He is at present with his family at the Mountain Top Hotel, near Afton, Va.

MRS. PAVY, widow of Dr. Pavy, of the Greely Arctic Expedition, has gone to the south of France to prepare, in conjunction with a noted French scientist, the memoirs of her late husband.

LIEUTENANT LOTUS NILES, 2d U. S. Artillery, has taken charge of quartermaster and subsistence matters at Jackson Barracks, La., in succession to Lieutenant W. Walke, same regiment, who is due at the Artillery School, Fort Monroe, early in September.

THE *Yellowstone Journal* says: "At the request of the teams to co-operate in the base ball tournament at Glendive, Lieut. J. C. F. Tillson, 5th Infantry, of Fort Keogh, will act as umpire. For equity, fairness and thorough understanding of the national game Lieut. Tillson is justly famed as an umpire of merit, and no more capable man could be found."

GENERAL J. A. EKIN, U. S. A., in the *Christian Instructor* of Aug. 5 pays a noble tribute to the worth and services of his former chief, Gen. M. C. Meigs, U. S. A. His record, says he, "is without spot or blemish; not even the breath of suspicion has tainted it. He can, indeed, in this retrospect of a useful and well-spent life, fully realize the consoling truth, that 'he has rendered the State some service,' and that his name and fame will long survive him, not only in the splendid monuments of his creative genius, but also in the cherished memory of a noble character."

LIEUTENANT A. C. BLUNT, 5th U. S. Artillery, is visiting relatives at Staten Island, N. Y.

COLONEL H. C. CORBIN, U. S. A., left Chicago this week to be absent until the end of August.

LIEUTENANT-GENERAL SHERIDAN is said to have a very fine collection of old and antique coins.

LIEUTENANT W. H. JOHNSTON, Jr., 16th U. S. Infantry, has rejoined at Fort Leavenworth from a visit to St. Paul.

COLONEL J. P. MARTIN, U. S. A., and Mrs. Martin returned to Fort Leavenworth this week from their trip to Colorado.

LIEUTENANT B. K. ROBERTS, 5th U. S. Artillery rejoined at Fort Hamilton, N. Y. H., early in the week from a short leave.

CAPTAIN G. R. RODNEY, 4th U. S. Artillery, spent an interesting time this week at Essex, Mass., inspecting Massachusetts troops.

MAJOR GEORGE G. HUNTT, 1st Cavalry, upon the abandonment of Fort Ellis, recently ordered, will go to Fort Assiniboine for duty.

COLONEL R. I. DODGE, 11th U. S. Infantry, will be at Marshalltown, Iowa, next week inspecting the State troops in camp at that point.

CAPTAIN CHARLES SHALER, Ordnance Department, U. S. A., was in Philadelphia this week, engaged on Board duty at Frankford Arsenal.

MAJOR-GENERAL J. M. SCHOFIELD, U. S. A., attended the funeral of the Hon. Samuel J. Tilden, at Greystone, on Saturday last, Aug. 7.

MAJOR-GENRAL JOHN POPE, U. S. A., and Mrs. Pope, who are summering at Burlington, Vt., will return to Cincinnati early in October.

ASSISTANT SURGEON-GENERAL GLOVER PERIN, U S. A., has returned to Fort Snelling, Minn., and resumed duty at Department Headquarters.

COLONEL H. G. LITCHFIELD, U. S. A., now at St. Augustine, expects to come North in September to spend a few months in New York and vicinity.

LIEUTENANT H. J. REILLY, 5th Artillery, for some years past on duty at Fort Columbus, N. Y. H., will join Rawles's Light Battery at Fort Douglas, Utah, in October.

LIEUTENANTS S. A. WOLF, J. A. Leyden and C. McQuiston, U. S. A., arrived at Vancouver Barracks this week for duty on the rifle range during the annual competitions.

LIEUTENANT W. J. CAMPBELL, 22d U. S. Infantry, has taken charge of the recruiting rendezvous at Cincinnati, recently vacated by Capt. J. S. McNaught, 20th U. S. Infantry.

MRS. L. K. BLAIR, eldest daughter of General R. W. Kirkham, formerly of the U. S. Army, was married in London, England, July 20, to the Hon. Walter Yarde Buller, brother of Lord Churston.

DR. C. F. MASON, of St. Augustine, has taken charge of medical matters at St. Francis Barracks, in addition to his duties with the Indian prisoners at Fort Marion, until the arrival of a successor to Surgeon J. R. Gibson.

LIEUTENANT J. J. BRERETON, 24th Inf., has been appointed regimental adjutant by the new regimental commander, in place of Lieut. Chas. Dodge, Jr., who relinquished the position to serve on the staff of General J. H. Potter as A. D. C.

LIEUTENANT E. L. ZALINSKI, 5th U. S. Artillery, under recent orders, will shortly transfer from Fort Hamilton to Fort Columbus, N. Y. H. We are glad the exigencies of the Service do not remove this officer from New York Harbor at the present juncture.

THE seniors in the infantry arm are now Col. O. B. Willcox, 12th (he is also the senior colonel on the active list); Lieut.-Col. Thos. M. Anderson, 9th; Major G. M. Brayton, 15th, and Capt. H. A. Theaker, 16th. Capt. Theaker has now held that grade over 22 years.

ASSISTANT SURGEON C. M. GANDY, U. S. A., leaves Fort Brady, Mich., next week on a two months' leave, and will probably be assigned to a station in the West before his leave expires. He has been succeeded at Fort Brady by Assistant Surgeon G. W. Adair.

LIEUTENANT J. J. SHAW, 6th Infantry, has taken temporary charge of the Q. M. Depot at Ogden, Utah, until the arrival from Fort McHenry, Md., of Captain J. L. Clem, A. Q. M., who is expected next week. Captain C. H. Ingalls, A. Q. M., was due at Hot Springs, Ark., from Ogden this week.

IN the suit brought by Samuel L. Clemens (Mark Twain) in behalf of C. L. Webster and Co., of Hartford, Conn., Judge Butler, in the U. S. District Court at Philadelphia, August 9, rendered a decision refusing to grant an injunction to restrain the sale of copies of "U. S. Grant's Personal Memoirs" by John Wanamaker and Co., of that city.

LIEUTENANT A. L. HOWARD, who won fame with his Gatling gun in the Riel rebellion, has received a medal from the Canadian Government. It is of silver, and inscribed on the front: "Northwest, 1885, Canada;" on the reverse, "Victoria Regina et Imperatrix," and on the rim, "Lieut. Arthur L. Howard, 2d machine gun platoon, C. N. G."

EX-MINISTER KASSON has an interesting paper on Bismarck as "Man and Minister" in the August number of the "North American Review." Beginning with the statement that "no living man awakens in such broad scope, both national and international interest," Mr. Kasson expresses admiration of the Chancellor well nigh unbounded.

COUNT SAIGO, Minister of Marine and Commander-in-Chief of the Royal Navy of Japan, accompanied by a large suite, including Capt. Shibayana, Lieut. Funaki and Paymaster Katioka, is soon to visit Washington and Annapolis to look into naval matters. From there he goes to Europe and will inspect the navies of all the European Governments. The chief objects of his investigations in this country are dynamite guns and torpedo boats. The party arrived in Buffalo this week from the Pacific coast.

MR. ARCHIBALD FORBES is expected to return to the United States next winter to give a series of lectures.

GENERAL ADAM BADEAU'S last article on "Grant in peace," treats of the relations between Grant and Stanton.

AMONG recent visitors in Chicago are Col. A. G. Perin, U. S. A., and Lieut. A. S. Rowan, 15th U. S. Infantry.

LIEUTENANT A. R. EGBERT, 2d U. S. Infantry, has taken charge of recruiting matters at Fort Robinson, Neb.

MAJOR J. R. ROCHE, Paymaster, U. S. A., left Sioux City, Iowa, this week on leave until the end of August.

LIEUTENANT CONSTANTINE CHASE, 3d U. S. Art., left Washington Barracks, a few weeks ago, on a two months' leave.

COLONEL R. G. RUTHERFORD, U. S. Army, and family, are spending the summer at the Doubling Gap Springs, in the mountains of Pennsylvania.

GENERAL AND EX-GOVERNOR FAIRCHILD, of Wisconsin, was elected Commander-in-Chief of the G. A. R. at the recent encampment at San Francisco.

LIEUTENANTS R. R. STEEDMAN, S. W. Dunning, and W. K. Wright, 16th U. S. Infantry, acted as judges at the competitive drill at Galveston, Texas, just closed.

COLONEL W. E. MERRILL, Corps of Engineers, U. S. A., whose convalescence we reported last week, will seek further benefit to his health on a two months' leave.

CAPTAIN CASS DURHAM, 18th U. S. Infantry, who has been an invalid at St. Paul, Minn., for nearly fourteen months past, is, we are glad to learn, getting a little better.

COLONEL H. B. BURNHAM, U. S. A., and family, have bid farewell to their many friends in Omaha, and will, after a week's vacation, go to San Francisco, their new home.

THERE is a report that an effort will be made to nominate General Fitz-John Porter, U. S. A., for Governor of New Jersey, at the next Democratic gubernatorial convention.

CAPTAIN C. A. WOODRUFF, 2d U. S. Artillery, of Fort Leavenworth, will take his light battery to Grand Island, Neb., the latter part of August, to attend the reunion encampment there.

LIEUTENANT R. D. POTTS, 3d U. S. Artillery, has taken charge of quartermaster matters at Fort McHenry, Md., in succession to Captain J. L. Clem, A. Q. M., transferred to Ogden, Utah.

LIEUTENANT FRANCIS MICHLER, 5th Cavalry, will relinquish duty at the Cavalry recruiting rendezvous, West street, New York City, early this week and go abroad on a four months' trip.

LIEUTENANT H. C. CARBAUGH, 5th U. S. Artillery, and Mrs. Carbaugh, will leave New York in September for Fort Douglas, Utah, the Lieutenant having been ordered to a tour with Rawles's light battery.

MRS. CALHOUN, widow of Captain Calhoun, 7th Cavalry, who was killed in the Custer massacre, and sister of General Custer, is giving an interesting series of readings at the various summer resorts in Michigan and Wisconsin.

MRS. GRANT and Colonel Grant have been invited to attend a veterans' reunion at Cairo, Ills., in the latter part of September, and are expected to be present at the unveiling of a statue of General Grant at Ironton, Mo., Sept. 25.

FUNDS are being raised in Texas for a monument to the memory of General Thomas J. Rusk, who was Secretary of War, Commander-in-Chief, and Chief Justice, successively, of the Texas Republic, and afterward United States Senator.

LIEUTENANT J. J. WEINBERG, 13th U. S. Infantry, met with an accident at Fort Leavenworth, August 2, from which he is still suffering, having fallen with a lamp in his hand and burned himself severely. He was taken to the post hospital. His condition is deemed critical.

MAJOR-GENERAL O. O. HOWARD, General Chauncey McKeever, his Adjutant-General, and other Army officers in San Francisco, have been warmly thanked for their aid towards making the reunion of the Society of the Army of the Potomac and the National Encampment of the G. A. R., just closed, a success.

LIEUTENANT L. R. HARE, 7th Cavalry, says the *Pioneer-Press*, has been tendered the position of regimental adjutant by Col. Forsyth. Lieut. Hare is at present the inspector of rifle practice of the Division of the Missouri, and it is believed by his friends he will accept the appointment. Lieut. Philip Reade, of the 3d Infantry, is mentioned as likely to succeed Lieut. Hare.

A CORRESPONDENT writing Aug. 5, from the Clifton House, Niagara Falls, says: "Fifty years ago today this hotel was opened. I have been looking over the old register which was opened with the hotel and closed, full of names at the end of the season of 1844. The first name entered is that of the proprietor, Thomas Cummings; the second is that of Lieut. Col. Wright, of Kingston, and the third and fourth are the names of Americans Dr. Moseley and Lieut. L. Penington, both of the U. S. Navy. On Aug. 6, I find the names of Henry Rice, Jr., and of James Russell Lowell."

THE Omaha *Excelsior* of Aug. 7 says:

We see that Senator Manderson and Gen. Crook are "booked" for the Grand Army encampment at Norfolk, the 17th to the 21st. The 9th Cavalry from Fort Niobrara and some companies of the 2d Infantry will go into camp there, and on one day indulge in a sham battle with the band of Sioux Indians present. Gen. Brisbin, accompanied by Lieut. Stevens, his adjutant, has been in Norfolk arranging with the local committee.. ...Gen. Crook was serenaded Thursday evening by the 2d Infantry Band, and one of the most charming programmes rendered. The serenade was an impromptu affair planned by Lieut. Rowell....Mrs. Col. Henry and son, accompanied by Mr. and Mrs. Dorrance, leave on Monday in a special car for Manitou, where they will spend the remainder of the summer. Col. Henry will camp at the Bellevue rifle range.

COLONEL E. W. STONE, 21st Infantry, and Mrs. Stone left Sidney this week for the East.

LIEUTENANT WEBSTER, 2d Infantry, and Mrs. Webster left Omaha Aug. 7 for Sewanee, Tenn.

GENERAL L. P. BRADLEY, U. S. A., has returned to Santa Fé from a visit to Fort Wingate, N. M.

LIEUTENANT C. W. ROWELL, 2d U. S. Infantry, and family, have left Omaha on a month's vacation.

COLONEL L. C. HUNT, 14th U. S. Infantry, has again relinquished duty and gone on a four months' leave.

LIEUTENANT F. H. FRENCH, 19th Infantry, was in New York this week, with quarters at the Grand Central Hotel.

LIEUTENANT T. H. ECKERSON, 19th Infantry, and Mrs. Eckerson have returned to Fort Clark, Tex., from their Eastern visit.

LIEUTENANT W. R. HAMILTON, 5th U. S. Artillery, now in Utah, will join at Fort Columbus, N. Y. H., for duty early in October.

LIEUTENANT W. P. EDGERTON, 2d U. S. Artillery, of West Point, and Mrs. Edgerton, are at the Stockton Cottage, Newport, R. I.

LIEUTENANT J. M. CALIFF, 3d U. S. Artillery, of the Iowa University, visited friends in St. Mark's avenue, Brooklyn, this week.

CAPTAIN T. J. WINT, 4th U. S. Cavalry, and Mrs. Wint, have returned to Fort Leavenworth, Kansas, from a trip to Eureka Springs, Col.

LIEUTENANT PHILIP READE, 3d U. S. Infantry, goes to Chicago for duty at General Terry's headquarters as Inspector of Rifle Practice.

MAJOR THEO. SCHWAN, the new Assistant Adjutant General, will, in accordance with usual custom, take his first tour of duty in the A. G. O.

HON. JOHN R. THOMAS, of the House Committee on Naval Affairs, returned to his post on the closing day of Congress looking very much improved in health.

CAPTAIN C. S. ROBERTS, 17th Infantry, late A. D. C. to General Crook, was in Omaha last Saturday, a guest of the General's, en route to his station at Fort D. A. Russell.

PAYMASTER J. E. BLAINE, U. S. A., who is summering at Ebensburg, Pa., will go to St. Paul early in October to report to Gen. Ruger for assignment to a post in the Department of Dakota.

LIEUTENANT A. L. MILLS, 1st U. S. Cavalry, with Mrs. Mills and child, is visiting his mother in New York City, and will soon leave for South Carolina for duty at the Charleston Military Academy.

PAYMASTER G. W. BAIRD, U. S. A., after a long tour of duty at St. Paul, will soon come East and take station at Boston, succeding Paymaster Chas. McClure, who goes to Newport Barracks, Ky., for the present.

MRS. KING, widow of Capt. J. S. King, 12th U. S. Infantry, is visiting at Sackett's Harbor, N. Y., and was tendered a complimentary concert by the band of the regiment on the evening of July 30. The concert was given in the open air in front of the Earl House, where Mrs. King is stopping.

AT a meeting of Reynolds Post, G. A. R., held at Cheyenne, Wyo., Aug. 6, the following six officers of the Regular Army were mustered into the post: Capts. Charles F. Humphrey, A. Q. M.; Sidney W. Benham, 7th Inf.; Richard Combe, 7th Inf.; Lieut. Cols. Thomas M. Anderson, 9th Inf.; H. L. Chipman, 7th Inf., and Capt. L. N. Bucker, 9th Inf. Gen. Morrow, commandant at Fort Sidney; Chaplain Brady, U. S. A., and others made speeches. W. P. Carroll delivered an original poem. There was a hard-tack supper and a big time generally.

THE Sturgis *Record*, July 30, says: "Col. Forsyth arrived at Fort Meade Sunday evening, having been met at Rapid by a detail with ambulances and baggage train. Probably no post in the United States can in time of peace equal the record of Fort Meade for last week. It boasted four commanding officers in as many days. Thursday Col. Tilford was in command. Friday morning he went on a fishing excursion, leaving Maj. Whitside in command. On Saturday morning Maj. Whitside, with a bevy of ladies, went on a picnic. This left Capt. Van. Valzah as senior officer, and Sunday Col. Forsyth's arrival placed that officer in command."

LIEUTENANT GENERAL SHERIDAN, says a despatch of Aug. 9 from Somerset, O., will arrive here tomorrow, and the little village is preparing for his visit. He was born here and every year pays a flying visit to his old mother, who at 87 years of age is in remarkably good health. The General was persuaded this year to make his visit while the reunion of the 31st Ohio Regiment was in progress, and take part in the exercises. He will be accompanied by his brother, Col. Michael Sheridan, and will remain two days. The town is profusely decorated with banners, each bearing an inscription complimentary to Gen. Sheridan. The road leading to his mother's home is overhung with banners and bunting.

THE Vancouver *Independent*, of Aug. 5, says:

Capt. Thos. F. Tobey, 14th Inf., and wife have gone to San Francisco on a visit.....Lieut. A. H. Merrill, 1st Art., comes to Vancouver Barracks from Fort Alcatraz, Cal.....Col. N. B. Sweitzer, 2d Cav., Fort Walla Walla, on Thursday sailed for San Francisco to attend the G. A. R. national encampment....Miss May Jordan, daughter of Col. Jordan, 1st Cav., who has been visiting the family of Maj. Burke, has gone down to the coast.....Miss Fannie Paddock, on her return from visiting her sister, the wife of Lieut. A. L. Mills, 1st Cav., at Fort Custer, stopped over in Vancouver a day or two....Mr. John Howard returned to San Francisco on Friday's steamer. He was accompanied by Mrs. James T. Gray and her children, who will visit at Gen. O. O. Howard's during the summer.....The *Manzanita*, Col. Uriel Sebree, has sailed for a month's cruise in Alaskan waters. Capt. A. H. Russell, ordnance officer, goes with Capt. Sebree.....It is reported that Gen. Sweitzer, in view of the scarcity of water and lack of proper drainage, has recommended that Fort Walla Walla be abandoned and the troops concentrated at Fort Cœur d'Alene.. Mr. John Gibbon gave a very successful german at the garrison on Monday night, which was attended by a number of guests from Portland as well as the barracks....C. E. S. Wood, late lieutenant 21st Inf., was at the barracks Monday, from Portland, to attend the party given by Mr. Gibbon. Gen. Morrow's son, Robert H. Morrow, was also upon the same pleasant mission.

CAPTAIN C. H. INGALLS, U. S. A., leaves Ogden, Utah, about Aug. 15, for Hot Springs, Ark.

SECRETARY OF WAR ENDICOTT registered at the Fifth Avenue Hotel, New York, on Thursday.

CAPTAIN F. E. DE COURCY, 13th U. S. Infantry, is stopping at the Ocean House, Long Branch, N. J.

LIEUTENANT H. WYGANT, 24th U. S. Inf., has now entered upon his duties at the Bingham School, Orange County, N. C.

LIEUTENANT H. DE H. WAITE, 5th Cavalry, under orders of Aug. 11, will continue his tour of instruction at the Artillery School, Fort Monroe.

PROFESSOR P. S. MICHIE, U. S. A., of West Point, was one of the diners with Henry Irving at the Brevoort House, New York, on Wednesday evening.

DR. R. B. BENHAM, stationed at Fort Omaha during the last two months, has been ordered to Fort Bridger, whence he will be ordered for duty as medical officer at Fort Du Chesne.

COLONEL W. B. ROYALL, 4th Cavalry, was in Omaha last week, going to the East from Arizona on sick leave. He expressed himself very confidently that Gen. Miles would bring the hostile Apaches to terms within a short time.

GENERAL GEO. CROOK, U. S. A., left Omaha this week for Fort Bridger, whence he will go to the new post Fort Du Chesne, which he will locate in person about the junction of the Uintah and Du Chesne rivers, distant from Fort Bridger about 100 miles. For the present all supplies for Fort Du Chesne will go West over the Union Pacific to Carter Station and thence south through Fort Bridger.

So far as known President Cleveland has not reached a conclusion about the Surgeon Generalship, and it is not expected now that he will, or at least the appointment is not looked for, until he returns from his vacation. The latest addition to the list of those termed "formidable candidates" is Colonel A. K. Smith. His support is supposed to come from friends of the President's in New York City and Buffalo.

2D LIEUTENANT JOHN T. BARNETT, 5th Cavalry, who was this week placed on the disability retired list, has been an invalid since the day he graduated from the Military Academy, eight years ago. With the exception of a few months on light work, he has not performed any duty since his appointment, and not a single day was he with his company. He was found incapacitated in 1883, and previous to that was on sick leave most of the time.

MAJOR SCHWAN, the new Assistant Adjutant-General, has been ordered to report for duty in the office of the Adjutant-General. It will be some days, however, before he goes to Washington, as the recent death of his father-in-law compels him to give attention to private affairs before assuming his new duties. He will probably be detailed as an assistant to Col. Kelton, and in that position will have something to do with the new Intelligence Bureau. There are likely to be some changes in the detail of Assistant Adjutant-Generals before very long.

WILLIAM THOMA, 3d U. S. Artillery, Sergeant at the U. S. Recruiting office on Penn avenue, Pittsburg, shot himself through the head in the garret of the building about 6 o'clock Wednesday evening. The commandant, Lieut. Adams, startled by the discharge of a pistol, reached his side as he was quivering in death. Thoma was charged with assault upon the 3-year-old child of a friend. On his breast lay a small piece of paper on which was pencilled the following:

FRIEND FRED.: On my knees I tell you I am as innocent of the charge as a baby. Yax and one of the recruits are witnesses. W. T.

Thoma was of German birth and 47 years of age. He had been all his life a soldier, having entered the U. S. Service 17 years ago, and previously been in the English Army.

REAR ADMIRAL E. T. NICHOLS, U. S. N., is at the Albemarle Hotel, New York City.

PAY DIRECTOR GILBERT E. THORNTON is at the Ocean House, Newport. He has lost none of his social popularity.

CARPENTER HENRY P. LESLIE, U. S. N., retired, residing at Elkton, Md., celebrated his golden wedding Monday night by giving a party at his home.

1ST LIEUTENANT W. F. SPIER, U. S. M. C., is in charge o... guard on the new steel cruiser *Atlanta*, which ...ntly made a successful "first cruise."

LIEUTENANT-COMMANDER R. M. BERRY, U. S. N., who has reported for duty as executive officer of the *Atlanta*, was in command of the *Jeannette* search steamer *Rodgers*, whose fate is still fresh in the minds of our readers.

REAR-ADMIRAL C. H. BALDWIN, U. S. Navy, (retired), who has been spending the heated term beside the sea at Newport, has been quite ill, and has not yet recovered. Much sympathy is expressed for him. His illness is a great loss to the society of this popular resort, for he is a general favorite, and entertains generously.

A RECENT letter from the U. S. S. *Iroquois* conveys the information that all are well on board and that the recent cruise of the ship to the south has been a pleasant one. The *Iroquois* is now at Callao, Peru. She has a band which but recently formed the musical part of the Army of Iglesias, the late provisional President of Peru.

PASSED ASSISTANT ENGINEER R. G. DENIG, U. S. Navy, wife, and child, are stopping at the Mansion House, Hicks street, Brocklyn. Mr. Denig is attached to the U. S. steamer *Brooklyn* under orders for the China Station. She will sail about the 15th of the present month. Mrs. Denig intends joining her husband on the station.

ALEX. THOMPSON, Naval Cadet, attached to the *Iroquois*, is in difficulty and has been before a Court of Inquiry. He is a nephew of the late Hubert O. Thompson, of New York, and Edmund F. Thompson, of the 12th Inf., who died in December, 1880. The two brothers were nephews of Anna Cora Mowatt Ritchie, whose fame as an actress and authoress will be recalled by many.

COMMANDER GEO. C. REITER, U. S. Navy, is at the Casino, Newport.

ACTING PAYMASTER ALEXANDER was, on June 14, ordered to proceed home from the Asiatic Station.

CAPTAIN J. H. HIGBEE, U. S. Marine Corps, of Norfolk, Va., lately reported sick, has returned to duty.

SAILMAKER C. E. MINTER, U. S. N., is spending a few weeks' leave with his family at Harper's Ferry, Virginia.

CAPTAIN F. V. MCNAIR U. S. N., and Mrs. McNair have returned to Mare Island, Cal., from a visit to Lake Tahoe.

NAVAL CONSTRUCTOR G. R. BOUSH, U. S. N., returned to Norfolk, Va., this week, from a visit to Washington.

PAYMASTER D. A. SMITH, U. S. N., and family, are spending a few weeks at the Greenbrier, White Sulphur Springs.

CARPENTER ISAAC COOPER, for the past five years on duty at the Naval Asylum, is now serving on board the *Atlanta*.

CAPTAIN R. F. BRADFORD and Chief Engr. Philip Inch, U. S. N., registered at the Everett House, N. Y., on Wednesday.

PAYMASTER S. L. HEAP, U. S. N., of the monitor fleet on the James River, has gone on a month's leave for the benefit of his health.

CHIEF ENGINEER W. H. SHOCK, U. S. N., and family, were in Paris, France, this week, with quarters at the Hotel Continental.

PAY DIRECTOR A. H. GILMAN, U. S. Navy, after an honorable service of over twenty-five years, was retired from active service Aug. 9.

P. A. ENGINEER H. WEBSTER has been detached from temporary duty on the *Atlanta*, and is now waiting orders at his home in Georgetown, D. C.

REAR ADMIRAL C. H. WELLS, U. S. N., recently visited the Brazilian frigate *Almirante Barroso*, Commodore S. di Gama, and was honored with a salute of 13 guns.

CHIEF ENGINEERS MELVILLE, McEwan, and Hine, U. S. N., completed their work of inspection of the *Alliance* at Newport, R. I., early in the week and left for their stations.

ASSISTANT ENGINEER GEO. H. T. BABBITT, U. S. N., has forwarded his resignation to the Hon. Secretary of the Navy. He is at present attached to the steel cruiser *Atlanta*, Capt. F. M. Bunce.

COMMODORE W. S. COOPER, of the Haytian Navy, is at the Hotel Brighton, Atlantic City. The Commodore comes of good naval stock, being the son of Rear Admiral Geo. H. Cooper, U. S. N.

SURGEON W. S. DIXON has gone on leave with his family. Dr. Dixon is on duty at the Marine Barracks, Brooklyn, and a portion of the duties will be assumed by P. A. Surgeon Arthur during Dr. Dixon's absence.

LIEUTENANT-COLONEL CHARLES HEYWOOD, U. S. M. C., has been seriously ill at the Brooklyn Barracks, from a complication of diseases, induced by his arduous duties on the Isthmus of Panama, during the exciting times of 1885.

PASSED ASSISTANT ENGINEER JAMES ENTWISTLE is on duty at the Morgan Iron Works, New York. During the past week he has been on duty connected with the trial of the *Atlanta*. Mr. Entwistle resides at No. 16 Hotel street, Patterson, N. J.

COMMANDER JOHN R. BARTLETT, U. S. N., has returned from a very pleasant experience on the yacht *Sachem*, from whose deck he witnessed the recent regatta resulting in the capture of the Goelet Cup by the *Mayflower*. Bartlett speaks in glowing terms of the *Sachem*, and predicts for her a brilliant future.

THE unfortunate and criminal conduct of Pay Clerk J. G. Meyers, of the *Iroquois*, is a sad piece of news for his many friends in Washington, where, until his present downfall, he was very popular and well known. The amount of his embezzlement is variously stated at from two thousand to five thousand dollars.

THE *Alta California* says: "The many friends of Pay Director Caspar Schenck would like to see him made Chief of Bureau of Provisions and Clothing. In the pay corps of the Navy there is not a better qualified officer than he for that responsible place. Pay Director Schenck is a thorough gentleman, a splendid business man, a good lawyer, and would make a most excellent Paymaster-General.

PASSED ASST. ENGR. WEBSTER has just completed a list of "Retirements, Engineer Corps, U. S. Navy," from which it appears that the oldest officer in that corps is Chief Engr. W. S. Stamm, who was born Dec. 1, 1825, consequently will retire in 1887. The most youthful aspirant for naval fame among the Engineers is Asst. Engr. W. C. Herbert, who does not retire until March 16, 1926, having been born in 1864. The list appears elsewhere.

THE following paragraph appeared in the "Personal" columns of the New York *Herald* of Sunday, Aug. 8:

SUIT FOR A LARGE AMOUNT.—A summons was served by Under Sheriff George H. Holman, of Ocean County, N. J., on Friday of last week, upon Passed Assistant Paymaster Louis A. Yorke, U. S. N., now residing at Bayhead, in a suit brought by Robert Smith, of Philadelphia. The amount in suit is $30,000.

Smith is a Philadelphia ale brewer and the father-in-law of the paymaster. This advertisement is the result of domestic differences, which have led to proceedings for divorce, the other party in the case being a Southern lady, according to the story as told in the *Herald*, which quotes Mr. Yorke as saying:

My wife went to Bayhead early in June and induced the man in charge of the Southern lady's cottage to allow her to go through it. She searched in every place where letters would be likely to be hidden for a missive from me to the Southern lady, but was unsuccessful. As she was leaving she remarked to the man that her father had paid $30,000 to keep me out of prison and would now pay $30,000 to get me out of the Navy.

RECENT DEATHS.

BREVET MAJOR GENERAL ROBERT ALLEN, Colonel, U. S. Army, retired, died August 6, at Geneva, Switzerland, where he had been residing for sometime past. General Allen entered the Military Academy from Indiana, in 1832, was graduated in 1836, and assigned to the 2d U. S. Artillery. In 1846 he was appointed Assistant Quartermaster, with the rank of captain, and rendered efficient and valuable service during the Mexican War, receiving the brevet of Major for his gallantry at the battle of Cerro Gordo. At the close of the Mexican War he was assigned as Chief Quartermaster of the Division of the Pacific, and acted for a short period as Treasurer of the Military Governor of California. He remained on the Pacific coast, except in 1852 and 1853, when on leave, until 1861, and on May 17 of that year was promoted Quartermaster, with the rank of major, and was assigned in October as Chief Quartermaster of the Department of the Missouri, and in that capacity furnished the transportation and supplies for the various armies in the Mississippi Valley. On the 19th of February, 1862, he was appointed Colonel and A. A. D. C. In May, 1863, he was made a Brigadier General of Volunteers, and in November of that year was assigned as Chief Quartermaster of the Mississippi Valley, and fitted out General Sherman's expedition to join General Grant at Chattanooga, enabling him to participate in the victory of Missionary Ridge. He rendered other valuable service, and received the Regular Army brevets of Lieutenant Colonel, Colonel, and Brigadier General and Major General, as well as the brevet of Major General of Volunteers. After the war he filled several responsible and arduous positions, and on the 28th of July, 1886, attained the rank of Colonel and Assistant Quartermaster General. On the 31st of March, 1878, he was retired, at his own request, after forty consecutive years of service. He has resided for some years past, we believe, in Europe. Many will mourn the death of the veteran soldier, "Bob" Allen, as he was known to his familiars, and the older officers of the Army, his comrades of many years ago, will deeply grieve the loss of their old-time friend.

—

AS NO entirely correct account of the accident by which Capt. Murdock, of the 6th Infantry, lost his life has yet been published, we give the following extract from a letter to Mrs. Murdock, written by Lieut. Wm. P. Burnham, 6th Infantry, who was an eyewitness to the occurrence:

I was at the landing on this side and saw the captain from the time he got on the boat until he sank for the last time, about 150 yards below the cable. The captain was at the bow of the boat holding the main rope, evidently by main strength endeavoring to keep the boat from swamping. Suddenly the rope the captain was holding broke at a point between the captain's hands and the boat itself. This let the boat loose, and the shock evidently pulled him forward into the water, he still holding to the rope, and with desperate efforts did he try to pull himself by means of this rope to the cable. During this time the boat was floating down stream, almost under water. The current was so swift the captain soon found he could not reach the cable, so he let go the rope, in the hope evidently of catching the boat. He certainly did swim, for he kept up in the raging torrent about 150 yards, and then sank for the last time, before Private Manning could get to him. He seemed perfectly cool and collected, and made a desperate struggle for life. The accident cast a gloom over the entire command, and we scarcely felt like proceeding on our journey. Pvt. Manning has doubtless given you a more accurate and particular account, for he was nearer than any one else.

Capt. Murdock was insured for $5,000 in the Mutual Benefit Life Association, and a draft for that amount has already been sent to Mrs. Murdock, who was the beneficiary. Without waiting for the usual proofs of death, which were not readily attainable, under the circumstances, the company accepted the certificate of the Adjutant General of the Army to the fact of Capt. Murdock's death, and telegraphed Mrs. Murdock that the money would be forwarded at once upon the arrival of her receipt, and it was sent accordingly.

—

COLONEL W. P. WILSON, of Trenton, N. J., formerly a Captain in the 21st U. S. Infantry, died of heart disease, at Warm Springs, Va., August 5. Col. Wilson served during the war in the 148th Pennsylvania Volunteers, attaining the rank of captain, and gaining a high character for efficiency and gallantry, receiving the brevets of Major and Lieut. Col. In 1866, he was appointed a Captain in the 21st U. S. Infantry, and was mustered out in 1870, under the reorganization of the Army. He served for a long time as an Aide-de-camp on the staff of Major General Hancock, and was highly esteemed by that officer. He leaves a widow and three children. The deceased was a brother-in-law of ex-Governor Curtin, of Pennsylvania.

—

HENRY JOHNSON, late 1st lieutenant 8th U. S. Infantry, only son of Capt. Henry Johnson, Medical Department, U. S. A., died suddenly at San Francisco, of heart disease, Aug. 8, in the 31st year of his age. He was born in Delaware and appointed (from California) Oct. 15, 1875, a 2d lieutenant 8th U. S. Infantry, and promoted 1st lieutenant July 3, 1883. He resigned but a few short weeks ago, July 2, the condition of his health not permitting him to go with his regiment to Arizona. He was a Companion of the Loyal Legion, and a gentleman with a large circle of friends.

—

DR. HENRY VAN STUDDIFORD, a prominent physician of St. Louis, Mo., who died there July 31, married several years ago Margaret Thomas, second daughter of Col. Martin Thomas, founder and first commandant, it is said, of the U. S. Arsenal. Five of their children are still living, the oldest son, Thomas, following his father's profession; Mrs. Brantley, Mrs. J. C. Thompson, wife of Capt. J. C. Thompson, 3d U. S. Cavalry, of Fort Davis, Tex., a younger daughter and a son, Charles. All were present at his deathbed. Of late years the doctor had withdrawn from the more laborious duties of his profession, but retained a large office business, and was in great demand for consultation by his brother physicians. A biographical sketch of him, written a few years ago, said: "Gifted with a commanding presence, which would distinguish him in any assembly, his manners in ordinary intercourse would be considered rather reserved than otherwise; but among his more intimate friends this easily gives place to a more genial bearing, which discloses a mind well stored with professional and philosophical information, and a conversation full of anecdote and reminiscence, made peculiarly interesting by his long and varied intercourse with distinguished men."

MRS. QUACKENBUSH, who was buried at Jamestown, Rhode Island, on Aug. 6, was the sister-in-law of Admiral Quackenbush and the mother of Mrs. Davis, whose husband, Commander Davis, is now absent on a cruise in the training ship *Saratoga*. Mrs. Quackenbush has been in delicate health for some time past. The immediate cause of her death was a stroke of apoplexy Monday, Aug. 2, and although she was most skilfully treated by Medical Director Gorgas and Medical Inspector Kindleberger, also Dr. McClellaud, of Philadelphia, nothing could be done to restore her consciousness during her brief illness of six hours. Her sudden death cast a gloom over those who knew this estimable lady. The pall bearers were Admiral C. H. Wells, U. S. N.; Prof. Bartlett, U. S. A.; Lieut. Ackley, U. S. N., and Mr. Rice, of Boston, a relative of the deceased. The remains were conveyed to Albany in charge of Rear Admiral Quackenbush and Lieut. Richards, also connected by marriage with the deceased.

THE BARON TREUVILLE DE BEAULIEU, claimed by the French as the inventor of rifled cannon, was buried with military honors July 27. The projectile which bears his name and was brought forward in 1842, was an adaptation of a shot to a rifled gun, by placing upon it twelve zinc studs, or buttons, in pairs, which were designed to take the six grooves of the rifling. Beaulieu had been retired, with the rank of General of Division and Grand Cross of the Legion of Honor, since April, 1879. He was born May 7, 1809, entered the Polytechnic School in 1829, was Brigadier General in 1867, and promoted to the command of a division in 1871.

FRANK H. HAMILTON, M. D., LL. D., one of the most eminent and successful of our physicians, died Aug. 11 at his residence in New York City. He served with distinction in the Medical Department of the Army during a portion of the war. It may be remembered that almost immediately after President Garfield was shot, in 1881, Mrs. Garfield insisted upon sending for Dr. Hamilton. He was telegraphed for, and a special train being provided him, he went directly to the President's bedside. Until the President died Dr. Hamilton, in connection with Drs. Bliss and Agnew, was almost constantly in attendance.

WE regret to learn of the death of the infant son of Gen. A. McD. McCook, U. S. A., at Fort Leavenworth Aug. 8. The Kansas *Times*, referring to the sad event, says: "The health of the little one had not been good for some time, and it was the intention of Mrs. McCook to leave for the North at the suggestion of the physician. The General and Mrs. McCook have the deep sympathy of the entire garrison in their sad bereavement. The parents will leave with the remains Aug. 9 for Cincinnati, where the interment will take place. The immediate cause of death is said to have been diphtheria."

THE Rev. Moses A. Hopkins, colored, Minister Resident and Consul General from the United States to Liberia, who died there recently, had an eventful career. During the war he ran away from his master's plantation to serve as a cook at the headquarters of Gen. George Crook, U. S. A., subsequently joined the ministry and preached in Franklinton, N. C., until sent to Liberia in 1885.

MR. JAMES BLOODGOOD, a respected and venerable gentleman, father to Medical Director Delavan Bloodgood, U. S. N., died at Springville, N. Y., Aug. 9 in his 86th year.

DR. HORACE B. PIKE, who was connected with the Medical Department of the Navy during the Mexican War, died suddenly at Yonkers, N. Y., Aug. 9.

GEORGE MCCULLOH, a veteran of the War of 1812, and a prominent frontiersman in his day, died Aug. 5, near Bellefontaine, O., aged ninety-seven.

WE regret to learn of the death, at Chatham, Mass., August 1, of Mrs. Rockwell, wife of Lieut.-Comdr. Chas. H. Rockwell, U. S. Navy.

MAJOR HENRY DE LA CHERE, who for five years was Military attaché to the French Legation at Washington, died at Paris, July 11.

LATE ARMY ORDERS.

The following officers, recently promoted, have been ordered to report to the commanding Generals of the departments for assignment to stations: Lt.-Col. Horace Jewett, 3d Inf., Dept. Dakota; Major E. J. Spaulding, 4th Cav., Dept. Arizona; Major Daniel Madden, 7th Cav., Dept. Dakota; Maj. Emil Adam, 6th Cav., Dept. Arizona; Major James F. Randlett, Dept. Platte; Major John B. Parke, 16th Inf., Dept. Texas; Capt. S. A. Mason, 4th Cav., Dept. Arizona; 1st Lieut. Charles J. T. Clarke, 10th Inf., Fort Bliss, Texas (S. O., H. Q. A., Aug. 12.)

Deputy Q. M. Gen. B. C. Card, ordered from Washington to San Francisco on public business. Major J. T. Randlett, 9th Cav., is granted leave for four months (S. O., H. Q. A., Aug. 13.)

THE ARMY.

G. O. 54, H. Q. A., Aug. 6, 1886.

The following act of Congress is published for the information and government of all concerned:

An act for the enlistment and pay and to define the duties and liabilities of "general service clerks" and "general service messengers" in the Army.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of War be, and he is hereby, authorized and directed to cause to be enlisted and mustered into the service of the United States, for clerical service and messenger duty at the headquarters of the Army and at the several division, department, and district headquarters, headquarters general service, at recruiting depots, and at West Point, New York, in the Army, a corps of men not to exceed one hundred and seventy, who shall be subject to the Articles of War and Army Regulations the same as enlisted men on duty in the line, but shall not be subject to be assigned to any other than clerical and messenger duty, as hereinbefore specified; nor shall this number be computed as a part of the number at which the Army is now limited by law.

Sec. 2. That of the men so enlisted one hundred and twenty-five shall be "general service clerks," who shall be classified and paid as follows: Class one shall consist of ninety clerks, at one thousand dollars per annum; class two shall consist of twenty-five clerks, at one thousand one hundred dollars per annum; class three shall consist of ten clerks, at one thousand two hundred dollars per annum; and the remaining forty-five of such men shall be "general service messengers," who shall be paid at the rate of sixty dollars per month; and all of such men shall be mustered for pay monthly the same as enlisted men, and shall receive no other compensation, pay, or allowance, except when on duty, when necessity requires, they shall each be allowed for subsistence one ration in kind to be issued by the Commissary Department.

Sec. 3. That the provisions of law relating to the retirement of enlisted men shall be construed to include "general service clerk and general service messengers" and, for the purpose of retirement, they will rank as follows: General service clerks of class three with first sergeants of the line. General service clerks of class two with sergeants of the line. General service clerks of class one with corporal of the line. General service messengers with privates of the line.

Approved, July 29, 1886.

By command of Lieutenant General Sheridan:
R. C. DRUM, Adjt.-Gen.

G. O. 55, H. Q. A., Aug. 6, 1886.

Publishes the act approved July 20, 1886, authorizing the Secretary of the Interior to transfer the U. S. barracks at Baton Rouge to the Louisiana State University and Agricultural and Mechanical College, at said place, for educational purposes, and granting to the city of Marquette, Mich., certain lands for park purposes.

Also the acts approved July 23, 1886, authorizing the Secretary of War to credit the State of Kansas with certain sums of money on its ordnance account with the General Government; and authorizing construction of a road to the National Cemetery at Knoxville, Tenn.

G. O. 57, H. Q. A., Aug. 11, 1886.

Publishes the following acts of Congress:

1. An act for the benefit of the States of Texas, Colorado, Oregon, Nebraska, California, Kansas, and Nevada, and the Territories of Washington and Idaho, and Nevada when a Territory.

Approved, Aug. 4, 1886.

2. An act to authorize the Secretary of War to permit the Carrollton and Lock Number One Turnpike Road Company to locate and construct its road on land belonging to the United States at Lock Number One, on the Kentucky River, in the State of Kentucky.

Approved, Aug. 2, 1886.

By command of Lieutenant General Sheridan:
R. C. DRUM, Adjt.-Gen.

G. O. 58, H. Q. A., August 11, 1886.

The following acts of Congress are published for the information and government of all concerned:

Authorizing the construction or maintenance of bridges across the St. Croix River, in Minnesota; the Mississippi at Keithsberg, Ill.; Winona, Minn., and Red Wing, Minn.; the Illinois and the Des Moines, Dubuque, Iowa; over the Red River, Texas; the Yellowstone, Montana; the Missouri, near Kansas City, Mo., and Council Bluffs, Iowa; the Tennessee, Tenn.; the Kansas River; the Missouri in the counties of Clay and Jackson, or the counties of Clay and Platte, Mo., or the county of Wyandotte, Kansas; near St. Charles, Mo.; near Sabine City, Mo.; near Atchison, Kansas; at Pierre, Dak.; near Chamberlain, Dak.; near St. Joseph, Mo.; west channel of Detroit River; certain bridges by the Bellingham Bay R. R. Co. in Washington Ty.; certain bridges by the Astoria and Winnemucca R. R. Co. in Oregon; the Willamette, at Salem, Oregon; and near Ray's Landing, Oregon; the Tennessee and Cumberland Rivers, Tenn.; across Young's Bay, Oregon; Menominee River, at Menominee, Mich.; the purchase of the aqueduct bridge or construction of a bridge near Georgetown, D. C.; across Arthur Kill, Staten Island; the Red River, near Browne's Ferry, Texas.

CIRCULAR 7, H. Q. A., Aug. 6, 1886.

The following decisions, rulings, etc., have been made during the month of July, 1886, and are published to the Army for the information of all concerned:

TACTICS.

In grand guard mounting.—"Chief of 2d platoon." "right guide of 2d platoon," etc., is a sufficient designation for the officers and non-commissioned officers acting as chiefs and guides of the 2d, 3d, and 4th platoons. The staff officer who mounts the grand guard may be the assistant adjutant general or one of the aides-de-camp. No sergeant major is required. It may be remarked that only the general principles upon which grand guard mounting is conducted are prescribed in the tactics; and it is believed to be the intention of the tactics to allow latitude and discretion in their application. It would be inconvenient if not impracticable to exact a rigid uniformity in all the details in the different circumstances and exigencies that might arise in large commands in garrison or in the field.—(Decision Lieut. Gen., letter July 8, 1886.)

In posting sentinels but one corporal goes out with a relief, except the relief of the new guard first posted after guard mount.—(General decision, letter July 21, 1886.)

Honors to be paid by troops.—Pars. 592, 593, and 594 of the Regulations refer to guards as well as to troops paraded for review or escort of honor.—(Decision of Lieut. Gen., letter July 24, 1886.)

HOSPITAL STEWARDS AT REVIEWS AND INSPECTIONS.

Hospital stewards belong to the non-commissioned staff of posts, and should appear under arms with the troops at reviews and inspections, as is now provided for other non-commissioned staff.—(Decision Lieut. Gen., letter July 17, 1886.)

REPORTS UNDER PAR. 687 OF THE REGULATIONS.

Par. 36 of the Artillery School Regulations, requiring the staff of the school to state the professional employments for

which student officers are specially qualified, does not relieve the commanders of the instruction batteries from the duty of reporting upon the special fitness for particular duties of the lieutenants of said batteries, under par. 687 of the Regulations.—(Decision Lieut. Gen., letter July 30, 1886.)

By command of Lieutenant General Sheridan:
R. C. DRUM, Adjt.-Gen.

S. O., H. Q. A., Aug. 7, 1886.

The following order has been received from the War Department:

WAR DEPARTMENT, WASHINGTON, Aug. 7, 1886.

By direction of the President, Fitz John Porter having been appointed a Colonel in the U. S. Army, under the provisions of an act of Congress approved July 1, 1886, is hereby placed on the retired list of the Army, in that grade, as of this date, in pursuance of the authority conferred by the said act, and at his own request.

WM. C. ENDICOTT, Secretary of War.

G. O. 26, U. S. ART. SCHOOL, FT. MONROE, Aug. 7, 1886.

Pursuant to a resolution of the Staff of the Artillery School, July 10, 1886, approved by the Lieutenant General of the Army, July 24, 1886, the following is ordered as the allotment of time to the different Departments of Instruction at the Artillery School, and the existing regulations of the School are amended accordingly.

FIRST YEAR.

Engineering.—From September 10 to December 22, and from January 5 to February 15.
Artillery.—From February 15 to July 1.

SECOND YEAR.

Ballistics and Chemistry.—From September 1 to Oct. 15.
Military Art.—From October 15 to December 22, and from January 5 to March 16.
Law.—From March 16 to June 20.
Final Examination.—From June 20 to June 30.

By order of Colonel Tidball:
ALBERT TODD, 1st Lt., 1st Art., A. A.

G. O. 17, DIV. MO., Aug. 10, 1886.

1. At his own request, and in order that he may accept the adjutancy of his regiment, 1st Lieut. Luther R. Hare, 7th Cavalry, is relieved from duty as inspector of rifle practice of the division, and will proceed to join his regiment at Fort Meade, D. T.

2. 1st Lieut. Philip Reade, 3d Infantry, is assigned to duty at these headquarters as inspector of rifle practice of the division.

3. 1st Lieut. Philip Reade, 3d Infantry, inspector of rifle practice of the division, will conduct the contest for places on the division rifle team, required in G. O. 11, c. s., from these headquarters, in place of 1st Lieut. Luther R. Hare, 7th Cavalry, relieved. He will report for that purpose to the Commanding General Department of the Missouri, by Aug. 26, 1886.

Upon completion of the competition Lieut. Reade will rejoin his station at these headquarters.

By command of Major-Gen. Terry:
ROBERT WILLIAMS, Asst. Adjt.-Gen.

STAFF CORPS AND DEPARTMENTS.

Judge Advocate General's Department.

Leave for twenty-seven days is granted Lieut. Col. H. B. Burnham, D. J. A. G. (S. O. 96, Aug. 3, D. Platte.)

Adjutant and Inspector Generals.

Lieut. Col. T. M. Vincent, A. A. G., will proceed to Forts Missoula and Ellis, M. T., on official business (S. O. 73, Aug. 2, D. Dakota.)

Major Theodore Schwan, A. A. G., will repair to Washington, D. C., and report to the Adjutant General of the Army for duty in his office (S. O., Aug. 9, H. Q. A.)

Leave for twenty days is granted Major Henry C. Corbin, A. A. G., Chicago, Ills. (S. O. 119, Aug. 9, Div. Mo.)

The Inspector General of the department will proceed, on inspection service, to Forts Keogh, Missoula, Shaw, Assiniboine, Maginnis and Custer, M. T.; and also inspect the accounts of the disbursing officers at Helena and Fort Keogh, M. T.; returning to these headquarters upon the completion of the duty (S. O. 75, Aug. 5, D. D.)

Quartermasters and Subsistence Departments.

Col. Chas. H. Tompkins, A. Q. M. G., will proceed on public business to Forts Preble, Warren, Adams, and Trumbull (S. O. 106, Aug. 10, Div. Atlantic).

During the absence on leave of Captain A. H. Russell, Chief Ord. Officer, Capt. W. S. Patten, A. Q. M., will perform his duties (S. O. 130, July 30, D. Columbia).

Commissary Sergt. Thos. Dowd, U. S. A., lately discharged at Cantonment on the Uncompahgre, Col., for disability, served nearly 26 years, and was an exemplary soldier. He has settled at Uncompahgre.

Com. Sergt. John B. Mack, recently appointed from 1st Sergt., Co. H, 14th Inf., will proceed to Cantonment on the Uncompahgre, Col., for duty (S. O., Aug. 5, H. Q. A.)

Pay Department.

The following changes in stations are ordered: Major John E. Blaine, paymaster, upon the expiration of his present leave from the Dept. of the East to the Dept. of Dakota. Major John B. Keefer, paymaster, from the Dept. of the East, and to report on or before Sept. 20, to the Comdg. Gen., Dept. of the Columbia, for assignment to duty. Major George W. Baird, paymaster, from the Dept. of Dakota, and will proceed to Boston, Mass., and report for duty there. Major Charles McClure, paymaster, from duty at Boston, and proceed to Newport, Ky., for temporary duty at Newport Barracks (S. O., Aug. 10, H. Q. A.)

Major John B. Keefer, Paymr., Newport Barracks, is relieved from duty in the Div. of the Atlantic, and Major Charles McClure, Paymr., as signed to temporary duty at Newport Barracks, Ky., is relieved from duty at Boston (S. O 106, Aug. 12, Div. Atlantic).

Major John E. Blaine, Paymr., will stand relieved from duty in the Div. of the Atlantic, at the expiration of his present leave (S. O. 108, Aug. 12, Div. Atlantic).

Leave for twenty days is granted Major James R. Roche, Paymr., Sioux City, to take effect about Aug. 10 (S. O. 74, Aug. 3, D. Dakota.)

Major James P. Canby, Paymr., will repair from Fort Cœur d'Alene to Portland, Ore., to which station he is assigned as Chief Paymr. of the Dept. Lt. Col. Rodney Smith, Deputy Paymr. Gen., will proceed to comply with the requirements of S. O. 150, c. s., A. G. O., ordering him to report as Chief Paymr., Div. of the Pacific (G. O. 18, Aug. 2, D. Columbia).

The leave granted Major Asa B. Carey, Paymr., is extended twenty days (S. O., Aug. 7, H. Q. A.)

Medical Department.

Capt. Robert H. White, Asst. Surg., is relieved from duty at Angel Island, and will proceed to San Diego Barracks, Cal., and report for duty as post surgeon (S. O. 64, July 28, D. California).

Leave for one month on surgeon's certificate, is granted Capt. Leonard Y. Loring, Asst. Surg., with permission to apply for an extension of two months (S. O. 59, Aug. 2, Div. Pacific).

Leave for one month, to commence on or about Aug. 15, is granted Major Wm. D. Wolverton, Surg., Washington Barracks, D. C. (S. O. 104, Aug. 7, Div. Atlantic.)

Capt. Robert B. Benham, Asst. Surg., is relieved from temporary duty at Fort Omaha, and will proceed to Fort Bridger, Wyo. (S. O. 97, Aug. 5, D. Platte.)

Asst. Surg. James C. Merrill is assigned as post surgeon at Fort Klamath, and will report for duty (S. O. 130, July 30, D. Columbia).

Capt. George W. Adair, asst. surg., will proceed to Fort Brady, Mich., and report for duty as post surgeon. Leave of absence for one month, with permission to apply for an extension of one month, is granted 1st Lieut. Charles M. Gandy, asst. surg., Fort Brady, Mich. (S. O. 103. Aug. 6, Div. Atlantic.)

Hospital Steward William Muench, recently appointed from private, Co. I, 17th Inf., will report to the Comdg. Gen., Dept. of Texas, for assignment to duty (S. O., Aug. 5, H. Q. A.)

Hospital Steward Albert C. Beals will proceed from Rock Island Arsenal, Ills., to St. Francis Barracks, St. Augustine, Fla., and report for duty (S. O. 108, Aug. 12, Div. Atlantic).

Engineers and Ordnance Departments.

Capt. Daniel W. Lockwood, C. E., will proceed to the harbor at Charlevoix, Mich., on duty connected with works under his charge (S. O. 108, Aug. 7, C. E).

Major Amos Stickney, C. E., will proceed to Madison, Ind., on duty connected with works under his charge (S. O. 107, Aug. 5, C. E.)

Lieut. Col Orlando M. Poe, C. E., will proceed to Buffalo, N. Y., on duty connected with works under his charge (S. O. 109, Aug. 9, C. E.)

Lieut. Col. George H. Elliot, C. E., will proceed to Nantucket, Mass., on duty connected with works under his charge (S. O. 110, Aug. 11, C. E.)

Major L. Cooper Overman, C. E., will proceed to Dunkirk Harbor, N. Y., and Toledo Harbor, Ohio, on duty connected with works under his charge (S. O. 110, Aug. 11, C. E.)

So much of S. O. 89, April 16, and 97, April 26, as directs Capt. Clinton B. Sears, C. E., to report for duty at Willet's Point, N. Y., is revoked (S. O., Aug. 10, H. Q. A.)

Leave of absence granted 2d Lieut. Henry C. Newcomer, C. E., is extended one month (S. O., Aug. 9, H. Q. A.)

The following named officers of the Corps of Engineers, recent graduates, will, upon the expiration of their present leave, report to Lieut. Col. Cyrus B. Comstock, C. E., Willet's Point, for duty with the Battalion of Engineers: 2d Lieut. Henry C. Newcomer; Addl. 2d Lieuts. Mason M. Patrick, Charles S. Riche and Thomas H. Rees (S. O., Aug. 9, H. Q. A.)

Leave for two months on surgeon's certificate is granted Lieut. Col. Wm. E. Merrill, C. E. (S. O., Aug. 7, H. Q. A.)

1st Lieut. John Biddle, Chief Engr. Officer, Dept. Dakota, will proceed to Fort Pembina, on official business (S. O. 73, Aug. 2, D. Dakota).

Leave for one month is granted Capt. Andrew H. Russell, O. D., Chief Ord. Officer (S. O. 130, July 30, D. Columbia).

1st Lieut. Frank E. Hobbs, Ord. Dept., will proceed to the Watertown Arsenal, Mass., on public business connected with the testing of specimens from steel for gun construction (S. O., Aug. 7, H. Q. A.)

Ord. Sergt. Michael Madigan, whose term of service expires Aug. 21, will proceed to Wilmington, N. C., and report to Capt. Wm. H. Bixby, C. E., for discharge and re-enlistment (S. O. 105, Aug. 9, Div. Atlantic.)

Chaplains.

Post Chaplain Joseph A. Potter will be relieved from duty in the Dept. of Arizona, and will report to the Comdg. Gen., Dept. of Cal., for assignment to duty (S. O., Aug. 9, H. Q. A.)

Signal Corps.

2d Lieuts. J. A. Swift and F. W. Ellis, Sig. Corps, are relieved from duty at Fort Myer, Va., and will report to the Chief Signal Officer for duty in Washington (S. O., Aug. 10, H. Q. A.)

2d Lieut. Julius H. Weber, Sig. Corps, will proceed to and take station at Wood's Holl, Mass., and take charge of the sea coast telegraph lines in that vicinity (S. O., Aug. 10, H. Q. A.)

THE LINE.

Changes of Stations of Troops Ordered.

As reported to the Adjutant-General's Office during the week ending August 7, 1886:

Troop E, 1st Cav., to Fort Custer, Mont.

1st Cavalry, Colonel N. A. M. Dudley.

Hdqrs., B, D, E, G, K, and M, Ft. Custer, Mont.; A, C and F, Ft. Maginnis, Mont.; I, Ft. Leavenworth, Kas.; H and L, Ft. Assiniboine, Mont.

Incident to the abandonment of Fort Ellis, Troop E will proceed to Fort Custer and Major Geo. G. Huntt to Fort Assiniboine for station (S. O. 73, Aug. 2, D. Dak.)

2nd Cavalry, Colonel Nelson B. Sweitzer.

Hdqrs., B, E, F, G, and I, Ft. Walla Walla, Wash. T.; A and K, Ft. McDowell, Ariz.; C, Ft. Bidwell, Cal.; D, Boise Barracks, Idaho; H, Ft. Spokane, Wash. T.; L, Ft. Cœur d'Alene, Idaho; M, Ft. Klamath, Ore.

Leave for one month is granted 2d Lieut. A. M. Fuller, to take effect Aug. 9 (F. O. 75, July 21, D. Ariz.)

1st Lieut. F. U. Robinson will proceed to San Francisco, Cal., in connection with the transfer of public property pertaining to Troop K (F. O. 75, July 21, D. Ariz.)

2d Lieut. A. M. Fuller, Fort Bowie, will proceed to Dragoon Summit, Fort Huachuca, and Crittenden, A. T., for the purpose of visiting the heliograph stations at those points (F. O. 77, July 26, D. Ariz.)

The leave of absence granted 2d Lieut. William H. Bean is extended one month (S. O., Aug. 9, H. Q. A.)

3rd Cavalry, Colonel Albert G. Brackett.

Hdqrs., C, F, M, Ft. Davis, Tex.; A, Ft. Concho, Tex.; G, Camp at Eagle Pass, Tex.; B, Ft. Leavenworth, Kas.; E, Camp Rice, Tex.; L, Camp Pena Colorado, Tex.; D and H, Ft. Sill, Ind. T.; I and K, Ft. Elliott, Tex.

The leave of absence granted 2d Lieuts. Jesse McI. Carter and William H. Hay is extended one month (S. O., Aug. 9, H. Q. A.)

4th Cavalry, Colonel William B. Royall.

Hdqrs., B, D, E, F, H, and K, Ft. Huachuca, Ariz.; A and M, Ft. Lowell, Ariz.; C, G, and I, Ft. Bowie, Ariz.; L, Ft. Leavenworth, Kas.

The journey performed by Capt. J. H. Dorst, from Huachuca Siding, A. T., to Albuquerque, N. M., is confirmed, the travel being necessary for the public service (F. O. 74, July 13, D. Ariz.)

Capt. J. H. Dorst, Albuquerque, N. M., will take charge of the party of Indians upon their arrival at that place and conduct them to Washington, D. C., and report with them to the Secretary of the Interior. Upon the completion of this duty he will return with the party of Indians in charge to Fort Apache, A. T. (F. O. 74, July 13, D. Ariz.)

1st Lieut. James Lockett, Fort Bowie, will proceed to Phœnix, A. T., and such other points as may be necessary to carry out the instructions of the Dept. Comdr. Sergt. Thomas Patton, Troop F, will accompany Lieut. Lockett (F. O. 75, July 21, D. Ariz.)

Fifteen cavalry horses for the 4th Cav. will be distributed as follows: 5 to Troop C, 2 to F, 6 to G, and 2 to H (F. O. 75, July 21, D. Ariz.)

1st Lieut. J. R. Richards, Jr., is relieved from duty in connection with Indian scouts and will report to the C. O. Dist. of Bowie, Fort Bowie, for temporary duty (F. O. 76, July 23, D. Ariz.)

1st Lieut. J. R. Richards, Jr., will proceed to Fort Huachuca, A. T., reporting to the C. O. for duty (F. O. 77, July 26, D. Ariz.)

Major E. B. Beaumont will proceed from Fort Bowie to San Francisco, and carry out the verbal instructions of the Dept. Comdr. (F. O. 78, July 28, D. Ariz.)

5th Cavalry, Colonel Wesley Merritt.

Hdqrs., D, E, H, and L, Ft. Riley, Kas.; A, F, I, and M, Ft. Supply, Ind. T.; B, C, G, and K, Ft. Reno, Ind. T.

The leave of absence granted 1st Lieut. C. H. Watts by the C. O. Fort Supply, I. T., is extended twenty-three days (S. O. 83, Aug. 6, Dept. M.)

The leave on Surgeon's certificate granted 1st Lieut. Henry J. Goldman is extended three months on account of sickness (S. O., Aug. 7, H. Q. A.)

1st Lieut. Francis Michler is relieved from duty on the recruiting service to date Aug. 15, 1886, and will join his troop (S. O., Aug. 7, H. Q. A.)

The leave of absence granted 2d Lieut. Charles L. Potter is extended one month (S. O., Aug. 9, H. Q. A.)

Leave for four months, from Aug. 15, with permission to go beyond sea, is granted 1st Lieut. Francis Michler (S. O., Aug. 9, H. Q. A.)

2d Lieut. John T. Barnett, having been found by an Army Retiring Board incapacitated for active service on account of disability incident to the service, is retired from active service (S. O., Aug. 10, H. Q. A.)

So much of par. 7, S. O. 177, Aug. 2, 1886, H. Q. A., as relates to 2d Lieut. Henry De H. Waite, is revoked (S. O., Aug. 11, H. Q. A.)

A furlough for six months, with permission to go beyond sea, is granted Sergt. Frederick Detthof, Troop L (S. O. 119, Aug. 9, Div. M.)

6th Cavalry, Colonel Eugene A. Carr.

Hdqrs., A, C, G, and L, Ft. Bayard, N. M.; K, Ft. Wingate, N. M.; B and F, Ft. Lewis, Colo.; D, E, and H, Ft. Stanton, N. M.; M, Ft. Leavenworth, Kas.; I, Ft. Cummings, N. M.

The journeys performed by 1st Lieut. William Stanton, A. D. C., from Willcox, A. T., to Deming, N. M., June 24, and from Albuquerque, N. M., to Whipple Barracks, A. T., July 13, were necessary for the public service (F. O. 78, July 28, D. Ariz.)

Owing to service in the field preventing their practice, the target practice season of Troop F is changed from May and June to September and October (S. O. 72, July 31, D. Ariz.)

A furlough for fifteen days is granted Sergt. James Brian, Troop A (S. O. 73, Aug. 2, D. Ariz.)

8th Cavalry, Colonel Elmer Otis.

Hdqrs., C, and H, San Antonio, Tex.; A, Ft. McIntosh, Tex.; I, Ft. Ringgold, Tex.; D, Camp Del Rio, Tex.; E, F, G, K, and L, Ft. Clark, Tex.; B and M, Ft. Brown, Tex.

2d Lieut. E. H. Crowder will proceed to Hillsboro, N. M., and report for duty with Troop G (S. O. 100, Aug. 4, D. Tex.)

The leave of absence granted 2d Lieut. Charles C. Walcutt, Jr., is extended one month (S. O., Aug. 9, H. Q. A.)

9th Cavalry, Colonel Edward Hatch.

Hdqrs., D, H, and L, Ft. McKinney, Wyo.; C, F, and K, Ft. Robinson, Neb.; A, G, and I, Ft. Niobrara, Neb.; M, Ft. Washakie, Wyo.; B and E, Ft. Duchesne, Utah (Post-office address via Ouray, Utah).

1st Lieut. B. S. Humphrey is relieved from duty on G. R. S. at Fort Robinson, Neb. (S. O. 96, Aug. 3, D. Platte.)

The leave of absence granted 2d Lieuts. Harry G. Trout and Edmund S. Wright is extended one month (S. O., Aug. 9, H. Q. A.)

The Valentine *Reporter* says: "Two soldiers of Troop A, Fort Niobrara, practicing for sharpshooters Monday, with revolvers, by way of innocent diversion on guard, sitting within a few feet of each other, were snapping empty pistols at each other. Of course their pieces were not loaded. However a sharp report brought the contest to a

summary close, and a military funeral was in order that evening. The ball entered directly over the man's eye and passed through his brain, causing instant death. He was one of the best men of the troop and was shot by his best friend and now feels with bitter remorse the result of his foolishness. It would seem that men drilled in the use of arms should know better."

10th Cavalry, Colonel Benjamin H. Grierson.

Hdqrs., **D, E, K,** and **L,** Ft. Grant, A. T.; **B,** Whipple Bks., A. T.; **A** and **H,** Ft. Apache, A. T.; **I** and **M,** Ft. Verde, A. T.; **C, F,** and **G,** Ft. Thomas, A. T.

1st Lieut. G. H. Evans, Fort Bowie, A. T., will proceed to Fort Thomas, A. T., for duty (F. O. 75, July 21, D. Ariz.)

1st Lieut. M. M. Maxon, R. Q. M., Fort Grant, will proceed to Whipple Barracks, A. T., for the purpose of transferring public property for which he is responsible as A. A. Q. M. (F. O. 75, July 21, D. Ariz.)

Twenty-one horses for the 10th Cav. will be distributed as follows: 4 to Troop B, 4 to E, 5 to F, 4 to G, 2 to I, and 2 to M. Lieut. M. M. Maxon, R. Q. M., will receive the horses at Willcox, A. T., and distribute them from there to the different posts (F. O. 75, July 21, D. Ariz.)

2d Lieut. P. H. Clarke will proceed to Fort Grant on public business (F. O. 76, July 23, D. Ariz.)

1st Lieut. S. L. Woodward is appointed recruiting officer at Fort Grant (S. O. 73, Aug. 2, D. Ariz.)

Before a G. C.-M. which convened at Fort Grant, Ariz., of which Lieut.-Col. Henry R. Mizner, 10th Inf., was president, was tried 1st Lieut. Charles R. Ward, 10th Cav. Charge—"Conduct to the prejudice," etc. Specification 1—"In that he was drunk at or near the camp of Troops D and L, 10th Cav., at Mescal Springs, A. T., on or about Jan. 1, 1886." Specification 2—"In that he did, by excessive and long continued indulgence in the use of intoxicating liquor, so incapacitate himself for the duties of an officer as to make it necessary that he should be carried to the post hospital at Fort Huachuca, there to be treated for the disease known as neurasthenia, at a time when he was liable to be called upon at any moment for field duty against hostile Indians." Plea—"Not guilty." Finding—"Guilty." Sentence—"To be dismissed from the Service." The proceedings, finding, and sentence having been approved by the proper reviewing authority and the record forwarded for the action of the President, the following are his orders indorsed thereon:

EXECUTIVE MANSION, August 5, 1886.

The proceedings of the General Court-martial in this case of Lieutenant Charles R. Ward, 10th Cavalry, are approved, but the sentence is deemed unnecessarily severe upon the proofs presented, and such sentence is therefore mitigated to suspension from rank and pay for three months from this date. GROVER CLEVELAND.

(G. C.-M. O. 67, Aug. 5, H. Q. A.)

1st Artillery, Colonel John C. Tidball.

Hdqrs., **A, H,** and **K,*** Presidio, San Francisco, Cal.; **B** and **C,** Ft. Winfield Scott, Cal.; **D** and **I,** Alcatraz Island, Cal.; **E,*** Vancouver Bks., W. T.; **F** and **L,** Ft. Canby, W. T.; **G,** Ft. Monroe, Va.; **M,** Ft. Mason, Cal.

* Light battery.

The leave of absence granted 2d Lieut. Charles T. Menoher is extended one month (S. O., Aug. 9, H. Q. A.)

2nd Artillery, Colonel Romeyn B. Ayres.

Hdqrs., **G,** and **L,** St. Francis Bks., Fla.; **A*** and **E,** Little Rock Bks., Ark.; **B** and **H,** Atlanta, Ga.; **C** and **D,** Mount Vernon Bks., Ala.; **F,*** Ft. Leavenworth, Kas., **K,** Ft. Monroe, Va.; **I** and **M,** Jackson Bks., La.

* Light battery.

Light Bat. F, Fort Leavenworth, will participate in the reunion encampment at Grand Island, Neb., from Aug. 30 to Sept. 4, 1886, upon the express condition that all expenses incurred in the movements of the battery in going to, and returning from, the encampment, be paid by the parties at Grand Island, as agreed upon. The C. O. of the battery will place himself in communication with Mr. J. D. Moore, Chairman of the Reunion Committee, for further particulars (S. O. 118, Aug. 7, Div. M.)

Leave for two months, to commence early in September, with permission to apply for an extension of two months, is granted Capt. Henry G. Litchfield, St. Francis Bks., Fla. (S. O. 105, Aug. 9, Div. A.)

3rd Artillery, Colonel Horatio G. Gibson.

Hdqrs., **A, C,*** **E, H, K,** and **L,** Washington Bks., D. C.; **B,** Newport Bks., Ky.; **D, G,** and **I,** Ft. McHenry, Md.; **M,** Ft. Monroe, Va.; **F,*** San Antonio, Tex.

* Light battery.

Major Edward B. Williston will proceed to Troy, N. Y., on public business, and on completion return to Springfield, Mass. (S. O., Aug. 7, H. Q. A.)

In order that the three batteries of the 3d Artillery at Fort McHenry, Md., may have the benefit of rifle practice at the longer ranges they will go to Washington Barracks, D. C., marching each way: Bat. D will start Aug. 30 and return to Fort McHenry Sept. 18; Bat. I will start Sept. 20 and return to Fort McHenry Oct. 9; Bat. G will start Oct. 11 and return to Ft. McHenry Oct. 30. The C. O. Washington Barracks will afford these troops every practicable facility for a thorough tour of duty on the rifle range. (S. O. 108, Div. Atlantic, Aug. 12.)

4th Artillery, Colonel Clermont L. Best.

Hdqrs., **B,*** **D, E, G,** and **L,** Ft. Adams, R. I.; **A** and **C,** Ft. Trumbull, Conn.; **F,*** Ft. Snelling, Minn.; **H** and **K,** Ft. Warren, Mass.; **I,** Ft. Monroe, Va.; **M,** Ft. Preble, Me.

* Light battery.

The leave of absence granted 2d Lieuts. John E. McMahon and Walter N. P. Darrow is extended one month (S. O., Aug. 9, H. Q. A.)

Col. Clermont L. Best will visit the camp of the brigade of Rhode Island Militia during the period of its encampment, from Sept. 7 to 11, inclusive, for the purpose of inspecting the troops taking part in the encampment (S. O., Aug. 9, H. Q. A.)

1st Lieut. Samuel R. Jones will visit the siege-gun and mortar battery erected at the State camp ground of the Connecticut State Troops, at Niantic, during the period of their encampment, from Aug. 23 to 28, for the purpose of instruction and practice of the said troops in heavy artillery drill (S. O., Aug. 9, H. Q. A.)

1st Lieut. Charles A. L. Totten will attend the encampment of the brigade of Connecticut National Guard, to be held at Niantic, for six days, commencing Aug. 23, for the purpose of inspecting the troops taking part therein (S. O., Aug. 10, H. Q. A.)

A foot battery of the 4th Art. at Fort Adams, R. I., to be selected by the colonel, will attend and participate with the Rhode Island Militia during the period of its encampment from Sept. 7 to Sept. 11, 1886, inclusive (S. O. 107, Aug. 11, Div. A.)

5th Artillery, Colonel John Hamilton.

Hdqrs., **F,*** **I, L,** and **M,** Ft. Hamilton, N. Y.; **A, C,** and **H,** Ft. Columbus, N. Y.; **G,** Ft. Monroe, Va.; **B,** Ft. Wadsworth, N. Y.; **D,*** Ft. Omaha, Neb.; **E** and **K,** Ft. Schuyler, N. Y.

* Light battery.

1st Lieut. Oliver E. Wood, having completed duties in connection with the rifle camp at Creedmoor, N. Y., will report for duty with his battery (S. O. 107, Aug. 11, Div. A.)

1st Infantry, Colonel William R. Shafter.

Hdqrs., **E,** and **F,** Angel Island, Cal.; **A** and **D,** Benicia Bks., Cal.; **C** and **G,** Presidio of San Francisco, Cal.; **I,** San Diego Bks., Cal.; **B,** Ft. Gaston, Cal.; **K,** Ft. McDermit, Nev.; **H,** Ft. Halleck, Nev.

1st Lieut. J. S. Pettit will proceed to the station of his company at Benicia, Cal. (F. O. 76, July 23, D. Ariz.)

The leave of absence granted 2d Lieut. Dwight E. Holley is extended one month (S. O., Aug. 9, H. Q. A.)

The *Alta* says: The superb band of the 1st U. S. Infantry was in attendance yesterday at the headquarters of the Reception Committee in the Palace Hotel. During the day the band played selections and won for itself great praise, not only because of the superior excellence and skill of the musicians, but also for the soldierly bearing and handsome uniforms of each member. The band is under the leadership of R. L. Deverell.

2nd Infantry, Colonel Frank Wheaton.

Hdqrs., **A, B, C, D, E, F,** and **H,** Ft. Omaha, Neb.; **G** and **K,** Ft. Niobrara, Neb.; **I,** Ft. Robinson, Neb.

S. O. 89, in regard to the "practice season" for the 2d Inf., is revoked, and the regiment not being in the Department when the "practice season" was designated, the months of August and September are designated as forming part of the "practice season" for the companies at Forts Robinson and Niobrara, Neb., and from Sept. 7 to Oct. 31, inclusive, for the companies at Fort Omaha (S. O. 95, Aug. 2, D. Platte.)

1st Lieut. Augustus R. Egbert is detailed for duty on G. R. S. at Fort Robinson, Neb. (S. O. 96, Aug. 3, D. Platte.)

Leave for one month is granted 1st Lieut. Charles W. Rowell, Adjt., Fort Omaha (S. O. 97, Aug. 5, D. Platte.)

3rd Infantry, Colonel John R. Brooke.

Hdqrs., **A, G, H,** and **K,** Ft. Shaw, M. T.; **B, D, F,** and **I,** Ft. Missoula, M. T.; **C** and **E,** Ft. Custer, M. T.

Lieut.-Col. Geo. Gibson will proceed from Fort Missoula to Fort Keogh, Montana, for station, in anticipation of his promotion to Colonel 5th Inf. (S. O. 73, Aug. 2, D. Dak.)

Incident to the abandonment of Fort Ellis, M. T., Cos. C and E, now at that post, will take station at Fort Custer, M. T. (S. O. 73, Aug. 2, D. Dak.)

The leave of absence granted 2d Lieut. Harry Freeland is extended one month (S. O., Aug. 9, H. Q. A.)

4th Infantry, Colonel William P. Carlin.

Hdqrs., **C, D, E,** and **H,** Ft. Cœur d'Alene, Idaho; **A, B, F, I,** and **K,** Ft. Spokane, Wash. T.; **G,** Boise Barracks, Idaho.

Major J. Ford Kent will inspect clothing and equipage, Q. M. stores, and cavalry horses at Fort Spokane, for which 1st Lieut. Curtis B. Hoppin, 2d Cav., is accountable (S. O. 129, July 27, D. Columbia.)

2d Lieuts. Silas A. Wolf, J. A. Leyden, and Chas. McQuiston will repair to Vancouver Barracks, to arrive not later than Aug. 10, for duty on the rifle range (S. O. 130, July 30, D. Columbia.)

5th Infantry, Colonel George Gibson.

Hdqrs., **A, B, D, E, F, G,** and **H,** Ft. Keogh, M. T.; **I** and **K,** Ft. Totten, D. T.; **C,** Ft. A. Lincoln, D. T.

Incident to the abandonment of Fort Ellis, M. T., Cos. I and K, now at Fort Custer, will take station at Fort Totten, D. T., to move after the arrival at Fort Custer of the companies from Fort Ellis (S. O. 73, Aug. 2, D. Dak.)

So much of S. O. 73, of Aug. 2, as directs that Co. I will proceed from Fort Custer, M. T., to Fort Totten, D. T., is revoked. Co. I will instead, upon arrival of Cos. C and E, 3d Inf., at Fort Custer, proceed from Fort Custer, M. T., to Fort Keogh, M. T. (S. O. 75, Aug. 5, D. Dak.)

The C. O. Fort Keogh, M. T., will grant a furlough for three months to Sergt. Joseph Yung, Co. G (S. O. 74, Aug. 3, D. Dak.)

The C. O. Fort Custer, M. T., will grant a furlough for three months to Sergt. Patrick Delmore, Co. K, with permission to go to Providence, R. I., to take effect after his re-enlistment (S. O. 75, Aug. 5, D. Dak.)

6th Infantry, Colonel Alex. McD. McCook.

Hdqrs., **H,** and **I,** Ft. Leavenworth, Kas.; **A, B, C, E, F,** and **G,** Ft. Douglas, Utah; **D,** Camp on Montezuma Creek, San Juan County, Utah; **K,** Salt Lake City, Utah.

2d Lieut. John J. Shaw, Salt Lake City, will proceed to Ogden and relieve Capt. Charles H. Ingalls, A. Q. M., of his duties as Depot Quartermaster, performing those duties until the arrival of Capt. John L. Clem, A. Q. M. (S. O. 95, Aug. 2, D. Platte.)

The leave of absence granted 2d Lieut. Amos B. Shattuck is extended one month (S. O., Aug. 9, H. Q. A.)

1st Lieut. R. E. Thompson, A. S. O., is relieved from duty at Fort Myer, Va., and will report to the Chief Signal Officer for duty in Washington (S. O., Aug. 10, H. Q. A.)

A furlough for four months, with permission to go beyond sea, is granted Sergt. James Kelly, Co. D (S. O. 117, Aug. 5, Div. M.)

HEADQUARTERS SIXTH U. S. INFANTRY,
FORT LEAVENWORTH, KANSAS, August 4, 1886.

Orders No. 54.

I. The following letter is published to the regiment:

HEADQUARTERS DEPARTMENT OF THE PLATTE,
OMAHA, NEBRASKA, June 28, 1886.

Private James Manning, Company D, 6th Infantry (Through Commanding Officer, Camp on North Fork Montezuma Creek, Utah):

SIR: The Department Commander desires to express to you his appreciation of your courageous and generous conduct at the crossing of the Grand River Ferry just above the rapids near Moab, Utah, on the 6th of June instant. Your gallant effort to rescue Captain Murdock, 6th Infantry, is appreciated, and your success in saving Private Edmonds from drowning, at no small risk to yourself, is worthy of high praise. Very respectfully, your obedient servant,

(Signed,) SAM'L BRECK, Assistant Adjutant-General.

Private Manning, by his heroic action, has added lustre to the record of his regiment. Plunged in the resistless torrent of a mountain stream, where to save himself might seem a despairing chance, he yet in disregard of his own great peril sought by repeated efforts to save the lives of others. Words cannot measure the value of such generous courage and devotion to the call of duty and of honor. Glad to do him honor, the Colonel commanding directs that this order be read to each company of the regiment.

By order of Colonel McCook:

S. W. GROESBECK, 1st Lieut. and Adjt. 6th Inf.

7th Infantry, Colonel Henry C. Merriam.

Hdqrs., **A, C, D, F, H,** and **K,** Ft. Laramie, Wyo.; **B** and **E,** Camp Pilot Butte, Wyo.; **G** and **I,** Ft. Washakie, Wyo.

8th Infantry, Colonel August V. Kautz.

Hdqrs. **F,** and **H,** Ft. Lowell, Ariz.; **A,** Ft. Bowie, Ariz.; **C,** Ft. Mojave, Ariz.; **D** and **K,** Ft. Huachuca, Ariz.; **B, E,** and **I,** Ft. Grant, Ariz.; **G,** Ft. McDowell, Ariz.

S. O. 49, granting one month's leave to 1st Lieut. John J. Haden, is revoked, and S. O. 56 is modified to relieve Lieut. Haden from duty at Fort McDermit and to direct him to join his company in Arizona (S. O. 58, July 30, Div. P.)

As the services of 2d Lieut. W. A. Mercer cannot be spared from duty in the field, S. O. 67 is rescinded (S. O. 72, July 31, D. Ariz.)

1st Lieut. J. McE. Hyde, Adjt., is appointed recruiting officer at Fort Lowell and 1st Lieut. P. H. Ray at Fort McDowell (S. O. 73, Aug. 2, D. Ariz.)

The leave of absence granted 2d Lieut. Colville M. Pettit is extended one month (S. O., Aug. 9, H. Q. A.)

9th Infantry, Colonel John S. Mason.

Hdqrs. and **F,** Whipple Bks., A. T.; **B** and **D,** Ft. Thomas, A. T.; **C, E, H,** and **I,** Ft. Wingate, N. M.; **A** and **G,** Ft. Apache, A. T.; **K,** Ft. Verde, A. T.

1st Lieut. J. McB. Stembel is appointed recruiting officer at Fort Verde and 1st Lieut. E. B. Robertson, Adjt., at Whipple Barracks (S. O. 73, Aug. 2, D. Ariz.)

Cos. C and I, Fort Wingate, will proceed to Datil, N. M., reporting to the C. O., who will assign them to stations (S. O. 59, Aug. 5, D. N. M.)

Co. E will proceed to near Alma, N. M. (S. O. 59, Aug. 5, D. N. M.)

The leave of absence granted 2d Lieuts. George B. Duncan and William G. Elliot is extended one month (S. O., Aug. 9, H. Q. A.)

10th Infantry, Colonel Henry Douglass.

Hdqrs., **B, C,** and **I,** Ft. Union, N. M.; **A** and **E,** Ft. Lyon, Colo.; **D, F,** and **H,** Ft. Bliss, Tex.; **G** and **K,** Uncompahgre, Colo.

Co. I, on being relieved at Lake Valley, N. M., will take station at Fort Union (S. O. 59, Aug. 5, D. N. M.)

11th Infantry, Colonel Richard I. Dodge.

Hdqrs., **A, D, E,** and **K,** Ft. Sully, D. T.; **B** and **F,** Ft. Yates, D. T.; **C** and **H,** Ft. Buford, D. T.; **G,** Ft. A. Lincoln, D. T.; **I,** Ft. Bennett, D. T.

Cos. B and F, Fort Yates, D. T., are authorized to extend their regular target practice to include from Aug. 2 to Aug. 9, 1886—time lost in changing station (S. O. 75, Aug. 5, D. Dak.)

12th Infantry, Colonel Orlando B. Willcox.

Hdqrs., **A, B, D, F, G,** and **I,** Madison Bks., N. Y.; **C,** Plattsburgh Bks., N. Y.; **E** and **K,** Ft. Niagara, N. Y.; **H,** Ft. Ontario, N. Y.

The leave of absence granted 2d Lieuts. David J. Baker, Jr., Benjamin A. Poore, and Walter H. Gordon is extended one month (S. O., Aug. 9, H. Q. A.)

13th Infantry, Colonel Luther P. Bradley.

Hdqrs., Santa Fe, N. M.; **A** and **B,** Ft. Bayard, N. M.; **C** and **E,** Ft. Stanton, N. M.; **D, F, G, H,** and **I,** Ft. Wingate, N. M.; **K,** Ft. Leavenworth, Kas.

Col. L. P. Bradley, Dist. Comdr., will proceed to Fort Wingate, N. M., for the purpose of inspecting the post hospital at that place (S. O. 58, Aug. 3, D. N. M.)

Co. H, on being relieved at Alma, N. M., will take station at Fort Wingate (S. O. 59, Aug. 5, D. N. M.)

Cos. D and F, on being relieved at Datil, N. M., will take station at Fort Wingate (S. O. 59, Aug. 5, D. N. M.)

Co. G will proceed to Lake Valley, N. M. (S. O. 59, Aug. 5, D. N. M.)

14th Infantry, Colonel Lewis C. Hunt.

Hdqrs., **B, C, D, E, F, G, H, I,** and **K,** Vancouver Bks., Wash. T.; **A,** Ft. Townsend, Wash. T.

2d Lieut. Joseph H. Gustin, on detached service at Seattle, W. T., will repair to Vancouver Barracks, to arrive not later than Aug. 10, for duty on the rifle range during the annual Department competition (S. O. 130, July 30, D. Columbia.)

Leave for two months, on Surgeon's certificate, is granted Col. Lewis C. Hunt, with permission to apply for an extension of two months (S. O. 58, July 30, Div. P.)

15th Infantry, Colonel Joseph N. G. Whistler.

Hdqrs., **E,** and **F,** Ft. Buford, D. T.; **A, C, D,** and **H,** Ft. Randall, D. T.; **B** and **I,** Ft. Pembina, D. T.; **G** and **K,** Camp Poplar River, M. T.

Leave for fifteen days is granted Capt. Casper H. Conrad, Fort Randall, D. T., to take effect about Sept. 6 (S. O. 75, Aug. 5, D. Dak.)

The leave of absence on Surgeon's certificate of disability granted 2d Lieut. Leon S. Roudiez is extended ten days on Surgeon's certificate of disability (S. O. 75, Aug. 5, D. Dak.)

Lieut. D. D. Mitchell granted leave for four months.

16th Infantry, Colonel Matthew M. Blunt.

Hdqrs., **A, B, C, F,** and **H,** Ft. Concho, Tex.; **D** and **E,** Ft. McIntosh, Tex.; **I,** Ft. Davis, Tex.; **G** and **K,** San Antonio, Tex.

17th Infantry, Colonel Alexander Chambers.

Hdqrs., **A, C, D, E, F, G, I,** and **K,** Ft. D. A. Russell, Wyo.; **B,** Camp Medicine Butte, Wyo.; **H,** Ft. Bridger, Wyo.

The 17th Infantry not being in the Department when the "practice season" was designated, the following are designated as forming part of the "practice season" for the regiment, in addition to that used in the Dept. of Dakota: N. C. Staff and Band and Cos. D and H, Aug. 15 to Oct. 26; Cos. A and G, Aug. 11 to Oct. 31; Cos. C and F, Aug. 15 to Oct. 5; Cos. E and K, Aug. 15 to Oct. 4; Co. B, Aug. 15 to Oct. 12; Co. I, Aug. 15 to Oct. 3 (S. O. 95, Aug. 2, D. Platte.)

The leave of absence granted 2d Lieuts. William H. Camp and James H. Frier is extended one month (S. O., Aug. 9, H. Q. A.)

Lieut. C. W. Howe granted leave of absence for four months.

19th Infantry, Colonel Charles H. Smith.

Hdqrs., **A, B, C, E, F, H,** and **K,** Ft. Clark, Tex.; **D** and **I,** Ft. Ringgold, Tex.; **G,** Ft. Brown, Tex.

J. W. Anness, 1st sergeant of Major Witherell'

Co. C, 19th Inf., presented the company with ice cream and cake Sunday evening last, as a reward for their having made the highest percentage at company skirmish firing at Fort Clark, this season. Major Witherell and Sergt. Anness, says the Brackett *News*, have worked hard this year to accomplish this end, and feel proud of the grand success.

20th Infantry, Colonel Elwell S. Otis.

Hdqrs., A, B, C, E, F, H, I, and K, Ft. Assiniboine, M. T.; D and G, Ft. Maginnis, M. T.

The leave of absence granted 2d Lieut. Albert D. Niskern is extended one month (S. O., Aug. 9, H. Q. A.)

21st Infantry, Colonel Henry A. Morrow.

Hdqrs., A, C, E, and G, Ft. Sidney, Neb.; D and H, Ft. Bridger, Wyo.; B, F, I, and K, Ft. Duchesne, Utah (Post-office address via Ouray, Utah).

The leave of absence granted 2d Lieut. Edward W. McCaskey is extended one month (S. O., Aug. 9, H. Q. A.)

22nd Infantry, Colonel Peter T. Swaine.

Hdqrs., A, B, D, G, H, and K, Ft. Lewis, Colo.; C, F, and I, Ft. Lyon, Colo.; E, Ft. Marcy, N. M.

23rd Infantry, Colonel Henry M. Black.

Hdqrs., F, G, H, and I, Ft. Wayne, Mich.; A and B, Ft. Brady, Mich.; C and D, Ft. Porter, N. Y.; E and K, Ft. Mackinac, Mich.

2d Lieut. J. A. Dapray, A. D. C., Fort Bowie, will proceed to Tucson, A. T., and carry out the verbal instructions of the Dept. Comdr. (F. O. 76, July 23, D. Ariz.)

S. O. 126 is amended so as to direct Lieut.-Col. Henry M. Lazelle, A. I. G., to proceed to Cœur d'Alene Mission instead of Fort Cœur d'Alene (S. O. 130, July 30, D. Columbia.)

Leave for twelve days, to commence on or about Aug. 14, is granted Col. Henry M. Black, Fort Wayne, Mich. (S. O. 107, Aug. 11, Div. A.)

The leave of absence granted 2d Lieut. George D. De Shon is extended one month (S. O., Aug. 9, H. Q. A.)

Leave for twelve days, to commence on or about Aug. 14, is granted Capt. Joseph T. Haskell, Fort Wayne, Mich. (S. O. 107, Aug. 11, Div. A.)

Leave for one month, with permission to apply for an extension of two months, is granted Capt. Louis R. Stillé, Fort Brady, Mich. (S. O. 108, Aug. 12, Div. A.)

24th Infantry, Colonel Zenas R. Bliss.

Hdqrs., D, and H, Ft. Supply, Ind. T.; A and K, Ft. Reno, Ind. T.; B and F, Ft. Elliott, Tex.; C, E, G, and I, Ft. Sill, Ind. T.

At his own request, S. O. 80, as applying to 2d Lieut. John Little, is revoked (S. O. 82, Aug. 2, Dept. M.)

Retired Officers.

1st Lieut. Charles A. Curtis, U. S. Army (retired), is detailed as Professor of Military Science and Tactics at the East Florida Seminary, Gainesville, Fla. (S. O., Aug. 10, H. Q. A.)

Courts-martial.

The following courts have been ordered:

At Fort Lowell, A. T., Aug. 2. Detail: Col. A. V. Kautz, 8th Inf.; Major H. E. Noyes, 4th Cav.; Capts. D. T. Wells and Thomas Wilhelm, 8th Inf.; Capt. Alleo Smith, 4th Cav.; 1st Lieuts. J. W. Summerhayes, R. Q. M., and Edward Lynch, and 2d Lieut. F. V. Krug, 8th Inf., and 1st Lieut. J. M. E. Hyde, Adjt. 8th Inf., J.-A. (F. O. 75, July 21, D. Ariz.)

At Fort Stanton, N. M., Aug. 9. Detail: Major D. M. Vance, 13th Inf.; Capt. W. M. Wallace, 6th Cav.; Capt. M. E. Taylor, Asst. Surg.; 1st Lieut. E. L. Fletcher, 13th Inf.; 2d Lieuts. Thomas Cruse and J. M. Stotsenburg, 6th Cav., and 1st Lieut. W. S. Davies, 13th Inf., J.-A. (S. O. 71, July 28, D. Ariz.)

At Fort Riley, Kas., Aug. 9. Detail: Capts. J. M. Hamilton and W. C. Forbush, 5th Cav.; Capt. W. A. Miller, 18th Inf.; 1st Lieuts. W. P. Hall, R. Q. M., and Robert London, 5th Cav.; 1st Lieuts. O. B. Warwick and G. L. Turner, 18th Inf.; 1st Lieut. H. W. Wheeler, 5th Cav.; 2d Lieut. Charles McClure, 18th Inf., and 2d Lieut. T. W. Griffith, 18th Inf., J.-A. (S. O. 82, Aug. 2, Dept. M.)

At Fort Hamilton, N. Y. H., Aug. 12. Detail: Major Albert Hartsuff, Surg.; 1st Lieuts. Selden A. Day, Paul Roemer, Benjamin K. Roberts, and William W. Galbraith, and 2d Lieut. John W. Ruckman, 5th Art., and 2d Lieut. J. Walker Benét, 5th Art., J.-A. (S. O. 106, Aug. 10, Div. A.)

At Fort Wayne, Mich., Aug. 17. Detail: Capts. Charles Wheaton, Richard I. Eskridge, 23d Inf.; Marlborough C. Wyeth, Asst. Surg.; 1st Lieuts. Frederick L. Dodge, Orlando L. Wieting, Charles H. Heyl, Stephen O'Connor; and 2d Lieuts. Edwin P. Pendleton and Daniel B. Devore, 23d Inf., and 2d Lieut. W. H. Allaire, 23d Inf., J.-A. (S. O. 108, Aug. 12, Div. A.)

At Fort McHenry, Md., Aug. 16. Detail: Major John Brooke, Surg.; Capt. John G. Turnbull, 1st Lieuts. Edward C. Knower, James O'Hara, Ramsay D. Potts and Charles G. Woodward, 3d Art., and 1st Lieut. Henry H. Ludlow, 3d Art., J.-A. (S. O. 108, Aug. 12, Div. A.)

Army Boards.

A Board of Officers, to consist of Major G. K. Brady, 18th Inf., and Capt. D. H. Kelton and 2d Lieut. C. J. T. Clarke, 10th Inf., will meet at Cantonment on the Uncompahgre, Colo., Aug. 9, to report upon the condition of the saw-mill at that post, list the same and the appurtenances pertaining thereto, and appraise its value (S. O. 82, Aug. 2, Dept. M.)

The board of engineer officers at New York is ordered to Washington to examine and report upon the new tunnel of the Washington aqueduct to determine what kind of lining it should have. Members: Gens. Duane, Abbot and Comstock and Cols. Houston and McFarland. A board consisting of Cols. H. L. Abbot and O. M. Poe, United States Engineers; Major Thomas Ward, Asst. Adjt.-Gen., and Capt. James M. Marshall, Asst. Q. M., has been ordered to meet at Fort Brady, Mich., Sept. 7, to select for purchase suitable grounds for a fort and to appraise for sale the present reservation.

Post Abandoned.—Under authority from the War Department, the post of Fort Ellis, M. T., will be discontinued and abandoned. All serviceable stores and property belonging to the respective supply departments, will be sent to other posts. The buildings will be disposed of as hereafter directed. Until that action a guard of one officer, one non-commissioned officer, and ten privates will be left for their protection. (S. O. 73, D. Dakota, Aug. 2.)

Springfield Carbines, New Model.—Gen. Ruger has directed Springfield carbines, new model, to be issued for trial as follows: 62 to Troops D, I, and M, 1st Cav., Fort Custer; 61 to Troop M, 7th Cav., Fort Meade. Commanders of the troops in their reports as to the merits of these guns will state the advantages, or disadvantages, of the carbine compared with the present Service model, particularly as regards its length and ease of carrying, when mounted, and the ballistic properties of the arm. The Secretary of War has authorized, for the trial of these arms, which fire the rifle cartridge, ammunition to the total value of $2.50 per gun, in addition to the present regular allowance.

Permanent Cantonment.—In accordance with telegraphic instructions of the Lieutenant-General commanding the Army, and the Major-General commanding the Division of the Missouri, dated July 29 last, a "permanent cantonment" will be established on the Uncompahgre Ute Indian Reservation, Utah, in the vicinity of the Ouray Agency, and near the confluence of the Du Chesne and Uintah Rivers. For the convenience of business, until otherwise ordered, this station will be known as Fort Du Chesne. Major F. W. Benteen, 9th Cav., with Troops B and E, 9th Cavalry, and Cos. B, F, I and K, 21st Infantry, are designated for the garrison of this post. These troops will reach their new station, using the utmost care and diligence, by way of Fort Bridger and old Fort Thornburgh, as already instructed in detail by telegraph, and put themselves under shelter by the labor of the troops, with the funds authorized, as rapidly as practicable. Brig.-Gen. George Crook, U. S. A., commanding the Department, accompanied by 2d Lieut. Lyman W. V. Kennon, 6th Inf., Aide-de-camp, will proceed to the site of Fort Du Chesne, Utah. Upon the completion of this duty Brig.-Gen. Crook and 2d Lieut. Kennon will return to these headquarters. (S. O. 99, Aug. 7, D. Platte.)

DEPARTMENT NEWS.

Dept. of Arizona.—Brig.-Gen. N. A. Miles.

The bread ration ot Fort Bowie has been increased to 22 ounces.

A Tombstone despatch of Aug. 9 says: "The country is terrorized, and ranches for almost a hundred miles around will be abandoned. It is thought to be a portion of Geronimo's band, sent out by him to divert the attention of Capt. Lawton, who has been pressing the wily chieftain to his utmost. Geronimo is engineering for time. What his next manœuvre will be no one can tell. It is highly probable that Capt. Lawton's pursuit has been so pertinacious that he has concluded that the Sierra Madres are untenable."

Gen. Miles having learned that scouting parties have purchased stores at prices locally correct, but far in excess of these paid by the Subsistence Department, has directed officers in charge of troops about to take the field to take pains to provide their commands with sufficient supplies to last the prospective time, and to make timely provision for new supplies beyond the time provided for, by calling on the nearest A. C. S.

A despatch of August 11, from Tombstone, says: "Mr. George Baker, a gentleman well known, came in this morning from Sulphur Springs Valley, bringing the startling report that the Mexicans have disarmed Capt. Lawton and his command in Sonora and taken them prisoners, and that when this became known at Fort Huachuca a company of troops was sent from there, with orders to push to Lawton's relief and stop for nothing, fighting their way through if necessary. A courier went through here in great haste this morning, bearing sealed despatches to the officers in the dragoon service." Like many Arizona newspaper despatches this proved to be without any foundation in fact.

Dept. of the Missouri.—Brig. Gen. J. H. Potter.

Fort Leavenworth is beginning to assume a very lively appearance. Many of the School officers are rejoining from leave and the officers detailed for duty in connection with the Dept. rifle competitions and as competitors are beginning to arrive.

A board of survey has been sitting at the Cantonment on the Uncompahgre for the purpose of reporting upon the condition of the saw mill at that point and appraising its value. This action is taken upon recommendation of the Department Inspector, who, in a recent investigation, finds that the numerour desertions from the companies stationed at the Uncompahgre were on account of the work the troops were compelled to perform in connection with the mill. Lieut.-General Sheridan approved the report and ordered that as no further use existed for the saw mill it be sold at public auction.

Dept. of the Platte—Brig. Gen. George Crook.

The Secretary of War at request of the Secretary of the Interior has ordered troops to the Yellowstone National Park to police it. This action is made necessary by the failure of Congress to make an appropriation to pay the salaries of the civil officers under the control of the Interior Department.

General Crook, under orders of Lieut.-General Sheridan, has ordered Major Benteen with two troops of the 9th Infantry from Fort McKinney to Northern Utah to establish a new military post to be called Fort Du Chesne, at the junction of Fort Ashley and the Du Chesne River, to take the place of old Fort Thornburg, as a cantonment among the Utah Indians. The post is to be located midway between the Nintsah and Utah Indians, and its garrison will keep the peace between those tribes while guarding the settlers in that rapidly developed region from invasion. It will also be but a short distance from Salt Lake City and in easy railroad connection with that city. In case of any outbreak among the Mormons the troops at Fort Douglas will be reinforced by detachments from Fort Du Chesne.

A roster of troops dated July 26, 1886, reaches us this week. It is an unusually complete document and contains some interesting "Notes" of movements of troops, detachments, etc.

Col. Benteen, 9th Cav., arrived at Rock Creek Station, U. P. R. R., this week, from Fort McKinney, in command of a battalion of the 9th Cavalry. From Rock Creek the command went west to Carter, whence they marched to Fort Bridger, where the garrison of six companies for the new post, Du Chesne, has been ordered to concentrate.

Dept. of Texas.—Brig. Gen. D. S. Stanley.

A despatch of Aug. 8 from Rio Grande City says: "A heavy force of Mexican revolutionists crossed the river into Texas Thursday night. A troop of the 8th Cavalry was ordered from Ringgold Barracks to pursue them."

A despatch from Laredo says: "The troops lately arrived at Nuevo Laredo have placed the cannon so as to command Fort McIntosh, and have been noticed taking observations from their position."

Division of the Atlantic.—Maj.-Gen. Schofield.

The Fort Adams nine played an excellent game against the Providence Colored Grays a few days ago, beating them by a score of 27 to 11.

Division of the Missouri.—Maj. Gen. Terry.

A "Roster of Troops" for August is brimful of information and shows the latest stations of regiments and companies serving in the Division.

Division of the Pacific—Maj.-Gen. O. O. Howard.

A "Visitor" to San Francisco writes: "At Alcatraz and Angel Island a few guns are in position, but, like the other defensive armament of the port, they are old-fashioned muzzle-loading guns of small range, and useless against such vessels as the European and some of the South American and Asiatic governments now passess. The harbor defences of San Francisco, as has been said, are not interesting as modern works, but as relics of the past they are worth studying."

RIFLE COMPETITIONS, 1886.

THE steps of the competitors, range officers, and assistants of various kinds are beginning to turn towards the several points fixed by Department commanders for the annual competitions and in a few days more the strife will commence in earnest. We append recent orders.

Department of the Platte.—The following officers will report Aug. 15, to Capt. James Ulio, 2d Infantry, commanding department rifle camp, on the Bellevue rifle range for duty as competitors:

1st Lieut. John Conline, 9th Cav.; 1st Lieut. Jos. Garrard, 9th Cav.; 2d Lieut. Warren P. Newcombe, 5th Art.; Capt. Aaron S. Daggett, 2d Inf.; 2d Lieut. Abner Pickering, 2d Inf.; 1st Lieut. Zerah W. Torrey, 6th Inf.; 2d Lieut. John L. Barbour, 7th Inf.; 2d Lieut. James T. Kerr, 17th Inf.; 1st Lieut. Harry L. Bailey, 21st Inf.; Asst. Surg. Louis W. Crampton, M. D. The following are detailed as range officers and will report at headquarters Aug. 12, to Major Guy V. Henry, Inspector of Rifle Practice, for instructions: 2d Lieuts. Grote Hutcheson, 9th Cav.; Virgil J. Brumbach, 2d Inf.; William M. Wright, 2d Inf.; Elmore F. Taggart, 6th Inf.; 1st Lieut. James M. Burns, 7th Int.; 2d Lieut. Charles H. Muir, 7th Inf. 1st Lieut. James B. Jackson, 7th Inf., having been designated to compete for a place on the Dept. rifle team, will report to Capt. James Ulio, 2d Inf. (S. O. 96, Dept. Platte, Aug. 3.)

The programme is as follows: First day, Aug. 20, preliminary practice, 200, 300, 500, and 600 yards; second day, Aug. 21, preliminary practice, 200 and 300 yards; third day, Aug. 23, preliminary practice, skirmish firing and preliminary practice, 500 and 600 yards; fourth day, Aug. 24, Dept. competition, 200, 300, 500, and 600 yards; fifth day, Aug. 25, Dept. competition, 200, 300, 500, and 600 yards; sixth day, Aug. 26, Dept. competition, skirmish firing and bull's-eye firing, or other matches; seventh day, Aug. 27, regimental team matches and bull's-eye firing and Dept. competition, skirmish firing; eighth day, Aug. 28, presentation of medals and other prizes.

In case of inclement weather, if the firing is not held, the day following, or the first suitable day, will be used instead of as indicated in programme.

Department of Dakota.—Last week we reported the progress in this Department. The *Pioneer Press* says: "The preparations are steadily progressing under the supervision of Lieut. Bates. At other posts rifle practice is going forward in a very satisfactory manner. Some excellent individual scores have been made by those who have qualified as sharpshooters, the best thus far being that of Lieut. Philip Reade, 3d Inf., who in May last made 97, 98, 95, 92, 94, and 85, respectively, at the 200, 300, 500, 600, 800, and 1,000 yard ranges, or a total of 561 out of a possible 600. Next to Lieut. Reade is Sergeant Lay, 5th Inf., with a score of 555, and following him are Lieut. Bowen, 5th, and Lieut. Fremont, 3d, who have a score of 553 each out of a possible 600. The figure of merit for the Department June 30 was 87.08.

The following named officers are selected as competitors for places on the Department Rifle Team, and will report in person, Aug. 21, 1886, to 1st Lieut. Robert F. Bates, 18th Inf., A. D. C., Inspector of Rifle Practice: Capt. Frazier A. Boutelle, 1st Cav.; 2d Lieut. Willard A. Holbrook, 1st Cav.; 2d Lieut. Geo. H. Cameron, 7th Cav.; Capt. Melville C. Wilkinson, 3d Inf.; 2d Lieut. Frank B. McCoy, 3d Inf.; 1st Lieut. Wm. H. C. Bowen, 5th Inf.; 2d Lieut. Frederick Perkins, 5th Inf.; 1st Wm. O. Cory, 15th Inf.; 2d Lieut. James A. Irons, 20th Inf.; 2d Lieut. James H. Waters, 20th Inf. (S. O. 75, Aug. 5, Dept. Dak.)

Department of the Columbia.—General Gibbon has issued a handy circular containing suggestions as to arrival at and departure of trains from Portland, means of transportation to Vancouver Barracks, etc., for the use of competitors in the Department rifle competition, which commences August 12, under Lieut. F. Taylor, 14th Infantry.

Department of the Missouri.—The competitions commence August 21 and terminate August 31. The Kansas *Times* says: "In comparing the standing in marksmanship in this Department with that of other Departments, for instance Dakota, where they claim at the end of June 233 sharpshooters and 2,154 marksmen and a Department figure of merit of 86.85, and even a maximum possible figure of 200 (in Co. F, 3d Infantry) with every man a sharpshooter, and other organizations in that Department with figures very near like the above, then it must be acknowledged that the Department of the Missouri is very much behind, but it is believed that the Missouri boys will give those from Dakota a hard tussle for places on the Division rifle team."

Division of the Atlantic.—The new range at Fort Niagara, N. Y., to be used hereafter for the annual competitions of the Division, will be ready for competitors on August 28. The range is equipped with 15 mid-range and four long-range targets.

For the accommodation of the officers and men, competitors and assistants, ample preparations are being made. The officers' lodge, a two-story building, with sleeping rooms above and officers' dining room and kitchen on the ground floor, will be furnished with complete mess outfit, bunks, mattresses, pillows, blankets, chairs, washstands, bowls and pitchers. Officers will be required to furnish their own bed linen, towels, etc., this

year. It is expected, however, that after the present year these will also be provided.

For the enlisted men a camp will be established near the range. Wall tents with floors will each be furnished with two bunks, two mattresses, two pillows, one chair and one camp-stool. The men, as the officers, will have to provide their own bed linen. A well-equipped kitchen and mess room insures that the ration, on which Congress has decided competitors shall subsist at the place of competition, will be served in the best style. Everything will be done to make the competitions pleasant and offer chances for everybody to win something. Pool shooting and various special matches will be provided for, open to all. It is expected that the paymaster will make a visit to the post for the payment of officers and men as soon as possible after muster day.

The official shooting will probably begin on Sept. 1 and, weather permitting, will close about Sept. 11.

Department of Arizona.—The preliminary practice commenced at Fort Wingate, N. M., Aug. 11, and the competition commences Aug. 14. The whole is under direction of Lieut.-Col. R. E. A. Crofton, 13th Infantry. The following officers have been ordered to report at Fort Wingate as competitors: Capt. Wm. Auman, 13th Inf.; 1st Lieut. T. S. McCaleb, 9th Inf.; 1st Lieut. John Baxter, Jr., 9th Inf., and 1st Lieut. G. R. Cecil, 13th Inf.

(Correspondence of the Army and Navy Journal.)

FORT D. A. RUSSELL, WYO.

AUGUST 5, 1886.

THE Inspector General of this Department visited us July 28, 29, and 30, and made a thorough inspection of the garrison and was much pleased with the result. He left July 31.

Cheyenne papers speak in high terms about our drills and especially about the band, the *Democratic Leader* saying: "The 17th Infantry band is the best in the U. S. Army."

Col. Alex. Chambers is still in feeble health. Lieut.-Col. Anderson, 9th Infantry, commands at battalion drills, dress parades, etc.

We are getting used to our new surroundings, life here being very pleasant both for officers and men. Old soldiers say: "This is the first post they have served in this country where pure military duty has the preference, and the men are not discouraged with unnecessary and oftentimes useless labor."

A base ball match was arranged for last Sunday between citizens of Cheyenne and our enlisted men, but was broken up before conclusion by a severe hail storm, which caused much damage to gardens, etc.

Eight recruits arrived from Denver last Sunday for assignment to the 7th. P.

(Correspondence of the Army and Navy Journal.)

FORT MONROE, VA.

AUGUST 10, 1886.

NOTHING special here at present. The five batteries have completed their course of target practice, except skirmish firing, which commenced a few days ago. The improvement on last year's practice is so marked that the number of men will more than compare, for good, steady and progressive firing, favorably with any similar number of men in the Army. A good team will represent the post at Fort Niagara Aug. 28.

The course of examination prescribed for the non coms. in here for promotion, finished to-day, and the impression is that all have passed successfully. Such is the wish of the entire garrison, as they (the non-coms) have made themselves special favorites with all; for whilst bearing themselves as gentlemen, there was a total absence of that pride of approaching rank, or anything to imply superiority over those they had necessarily to associate with. They found fault with nothing, liked the place and appreciated civilities, and enjoyed their messing, bathing and base ball playing like other enlisted men.

The class of '85-6 will soon be passed in to the history of the school. Some have already left, others are taking a brief leave, and the rest preparing for their final departure on September 1.

During an officer's term of two years here—now one of the most fashionable and health-giving watering places in the South—he forms so many pleasant associations that he (especially if single) always leaves with the regret experienced on a separation from home and friends. Where else could he have such social enjoyments as here? To be sure assiduity and an unclouded intellect are required to keep pace with the requirements of the school, and maintain an average position in the class; but hours of study are soon forgotten in the nightly dances, in the special parties, in boating excursions, and in the moonlight walks along the sandy beach of the historic Hampton Roads.

Last pay day two recruits deserted, each stealing from a comrade soldier a suit of citizen clothes. A telegram intercepted them; they were tried, convicted and sent to Leavenworth for three years. Honesty would have been their best policy; robbing a comrade deprived them of all sympathy, and of that precious liberty they would now be enjoying.

B. B.

MOVEMENTS OF GENERAL MILES.

THE Albuquerque *Democrat*, referring to the conference recently held there by Gen. Miles, Gen. Bradley, and Gov. Ross, says:

No additional troops have been asked for by Gen. Miles. The 1st Infantry having gone to California, the 9th was ordered from the Department of the Platte in its stead. From the first Gen. Miles has never lost confidence in the ultimate success of his undertaking, and the indications for a speedy termination of the campaign against the Indians are most promising.

Gen. Miles, accompanied by Lieut. W. Stanton and Lieut. J. A. Dapray, his brilliant young aides-de-camp, came down from Fort Union, and, by appointment, Gen. L. P. Bradley and Gov. Ross came down from Santa Fé on the same train, and had a long conference at the San Felipe Hotel. General Miles feels perfectly assured that the hostiles are all in Old Mexico and that there is not one Indian to-day on the warpath in either New Mexico or Arizona. But he is not satisfied with merely driving the red devils beyond the frontier. He has perfected plans for thoroughly guarding the border and making their return impossible except as captives. Captain Lawton, one of the most effective and efficient officers in the Service, is in command of the troops who are now in close pursuit of the hostiles in Old Mexico. His command is provisioned for sixty days and he can go as far as the Indians can. "I don't expect to occupy Old Mexico as well as New Mexico and Arizona," said Gen. Miles, and for this reason he has stationed the main body of his troops along the border and throughout the troubled districts to give security and confidence to settlers and has limited the pursuing command to a swift-moving body of men who will give no rest to the outlaws or no opportunity to replenish their stock of ammunition. New Mexico and Arizona may well congratulate themselves over this assuring state of things, and it is hoped that they can soon join in jubilating over the capture and punishment of Geronimo and his band of assassins.

Gen. Miles has always been known as the most courteous of our Generals, with possibly the bare exception of the lamented Hancock. There is further confirmation of the report that Geronimo has been wounded and that Natchez, his brother-in-law, is in command. The General says the Apaches now on the warpath do not number over forty.

THE NAVY.

NAVAL VESSELS IN COMMISSION.

WHEN AND WHERE LAST HEARD FROM.

N. Atlantic Station—Rear Admiral S. B. Luce.

GALENA, 3d rate, 8 guns, Comdr. Colby M. Chester. Sailed from Portland, Me., Aug. 6, on short cruise.

SWATARA, 3d rate, 8 guns, Comdr. E. T. Woodward. At Portland, Me.

TENNESSEE, 1st rate, 22 guns (f. s. n. a. s), Capt. Robert Boyd. At Portsmouth, N. H., Aug. 8.

YANTIC, 3d rate, 4 guns, Comdr. Francis M. Green. Sailed from Portland, Me., July 29, on a cruise.

S. Atlantic Station—Captain E. E. Potter (in command temporarily).

Acting Rear Admiral D. L. Braine will shortly command this station.

Mails should be addressed to care of U. S. Consul, Rio de Janeiro, Brazil, unless otherwise noted, or care of B. F. Stevens, 4 Trafalgar Square, London.

ALLIANCE, 3d rate, 6 guns, Comdr. Charles McGregor. Arrived at Newport, R. I., July 11. She will shortly be ordered to join the South Atlantic Station.

LANCASTER, 2d rate, 10 guns, (f. s. a. s.) Capt. S. L. Breese (ordered).

Capt. E. E. Potter, commanding the *Lancaster*, informs the Navy Department that he sailed from Cape Town, June 29, and arrived at Jamestown, St. Helena, July 11. He proposed sailing about the 30th of July, expecting to arrive at Rio de Janeiro, Brazil, about the 20th of August. He arrived Aug. 12, earlier than was expected.

TALLAPOOSA, 4th rate, 13 guns, Comdr. William Whitehead. Arrived at Bahia, July 31.

European Station—R.-Adml. Sam. R. Franklin.

Mails should be addressed to care B. F. Stevens, 4 Trafalgar Square, London, England, unless otherwise noted.

PENSACOLA, 2d rate, 16 guns(f. s. e. s.), Captain George Dewey. Arrived in Phalerum Bay, Greece, July 13. Would remain at Piraeus until July 20, and then proceed to Leghorn, touching at Zante and Messina en route.

KEARSARGE, 3d rate, 7 guns, Comdr. Charles D. Sigsbee. Was to remain in Phalerum Bay, Greece, until about Aug. 1. Has been ordered to return to U. S.)

QUINNEBAUG, 3d rate, 8 guns, Comd. Geo. W. Coffin. Arrived at Southampton, England, Aug. 3, 1886. Will leave the English channel by the middle of August or September for Genoa, touching on the Spanish coast and at Marseilles. Will be sent to the East for the winter, if no other vessel joins the squadron.

Pacific Station—Rear-Adm. E. Y. McCauley.

Mails, unless otherwise noted, should be addressed to care U. S. Consul, Panama, U. S. C.

ADAMS, 3d rate, 6 guns, Comdr. Louis Kempff. Left Callao, Peru, June 20, for Coquimbo.

HARTFORD, 2d rate, 16 guns (f. s. p. s.), Capt. J. H. Gillis. Was at Callao July 13.

Will remain on the Southern coast for some time to come in all probability. The Admiral of the Squadron was recently directed to retain her there, unless it was absolutely necessary to send her to San Francisco, in which event he should transfer his flag to another vessel of the squadron and remain.

JUNIATA, 3d rate, 8 guns, Comdr. G. T. Davis. At New York. Will make a voyage around the world to visit unfrequented ports. Ordered to delay sailing until the completion of the court of inquiry of Lieuts. Berryman and Quackenbush.

IROQUOIS, 3d rate, 7 guns, Comdr. Yates Stirling. At Callao July 13. Commander J. C. Watson has been ordered to command, and leaves New York per steamer of about Sept. 1.

MONONGAHELA, 2d rate, 9 guns, Lieut. Comdr. George B. Livingston in command. Used as a storeship at Coquimbo, Chili.

MOHICAN, 3d rate, 8 guns, Commander Benjamin F. Day. Was still at Apia, Samoan Islands, June 23, but was to leave there next day for the Tonga Islands to return in a month.

PINTA, 4th rate, screw, 2 guns, Lieut. Comdr. Henry E. Nichols. Address care of Navy Pay Agent, San Francisco, Cal. At Juneau, Alaska, June 8. Was to go to Sitka about the middle of July for supplies.

SHENANDOAH, 2d rate, 9 guns, Captain Byron Wilson. At Callao, Peru, July 13. Has been ordered to proceed to San Francisco for repairs, touching en route at South and Central American ports.

Asiatic Station—Rear-Admiral J. L. Davis.

Vessel with (†), address, Mail. to care U. S. Consul, Yokohama, Japan.

ALERT,† 3d rate, 4 guns, Comdr. Chas. J. Barclay. At Yokohama, Japan, July 11. She will return to the U. S., and expects to reach San Francisco some time in September. Was to sail from Yokohama for Hokodati on about August 5.

BROOKLYN, 2d rate, 14 guns, Capt. E. O. Matthews. Sailed from New York, Aug. 12, 7.30 A. M., for the Asiatic Station.

ESSEX, 3d rate, 6 guns, Comdr. T. F. Jewell. At Navy-yard, New York. Expects to sail soon for the Asiatic Station.

Advices from the Navy-yard state that the Board of Inspection and Survey, under the presidency of Rear Admiral J. E. Jouett, concluded the inspection of the *Essex* Aug. 12. The crew was found to be well drilled, considering the brief time the ship had been in commission. In point of speed the *Essex* proved quite up to the average of vessels of the class. She averaged on a six hours' trial ten knots and a quarter an hour, the engine working smoothly. The *Essex*, after receiving additional stores, will sail for Newport, where her ammunition and gun cotton and torpedo outfit will be taken on board, when, it is expected, she will sail for China, via the Mediterranean.

MARION,† 3d rate, 8 guns, Commander Merrill Miller. At Shanghai July 1—undergoing repairs.

MONOCACY,† 3d rate, 6 guns, Comdr. Henry Glass. Was at Canton July 1.

OMAHA,† 2d rate, f. s. a. s., 12 guns, Captain Thos. O. Selfridge, commanding. Reported by cable to the JOURNAL at Shanghai, China, July 17.

OSSIPEE,† 3d rate, 8 guns, Comdr. John F. McGlensey. At anchor off Yokohama, Japan, July 1, under orders to proceed to Chemulpo, Corea.

PALOS,† 4th rate, 6 howitzers, Lieut.-Commander T. Nelson. Was in all probability at Chemulpo, Corea, July 1, having sailed for that port from Nagasaki, June 3.

TRENTON, 3d rate, 10 guns, Capt. Robert L. Phythian. On her way home. Reported by cable to have left Gibraltar, Aug. 4, for the U. S.

Apprentice Training Squadron.

Address of *Portsmouth* and *Saratoga*, care of B. F. Stevens, 4 Trafalgar Square, London, England, until Aug. 25, and after that date Newport, R. I.

MINNESOTA, 1st rate. 24 guns, Comdr. T. F. Kane. Gunnery ship. Foot of W. 27th Street, North River. Entrance from W. 26th Street. P. O. address, Station E, New York.

NEW HAMPSHIRE, 1st rate, 16 guns, sails, flagship of training squadron, Captain Arthur R. Yates. Coaster's Island Harbor, Newport, R. I.

PORTSMOUTH, 3d rate, sails, 12 guns, Comdr. Chas. V. Gridley. Sailed from Newport, R. I., July 8, for a cruise in European waters.

SARATOGA, 3d rate, 12 guns, Comdr. C. H. Davis. Sailed from Newport, R. I., July 8, for a cruise in European waters.

On Special Service.

CONSTELLATION, 3d rate, 10 guns, Practice Ship of Naval Academy, Commander C. L. Huntington. On her practice cruise. Arrived at Portsmouth, N. H., July 14, and sailed July 31 for Chesapeake Bay.

DESPATCH, 4th rate, Lieut. Wm. H. Emory, Jr. At New York.

DOLPHIN, despatch boat, ——— At Norfolk, Va. Undergoing repairs.

JAMESTOWN, 3d rate, sails, 12 guns. Comdr. Horace Elmer. On practice cruise. Arrived at Portsmouth, N. H., July 17, and sailed July 31 for Chesapeake Bay.

MICHIGAN, 4th rate, 8 guns, Comdr. John J. Read. Arrived at Milwaukee July 23, and expected to leave July 25 for Toledo, reaching there Aug. 1.

RANGER, 3d rate, 4 guns, Comdr. Chas. E. Clark. At San Francisco July 5.

ST. MARY'S, sails, 8 guns, Comdr. Edwin M. Shepard. N. Y. Schoolship. On her annual cruise. Was at Funchal, Medeira, July 3. Expected at her wharf, foot of East 31st Street, in October.

ATLANTA, 2d rate, 8 rifled cannon and 12 machine guns, Captain Francis M. Bunce. At New York Navy-yard.

———

VANDALIA, 2d rate, 8 guns, Captain Henry L. Howison. At New York—anchored in the Bay. Has been ordered to the Pacific Station, and is expected to sail daily.

VARIOUS NAVAL ITEMS.

IT is intended to put the Arctic steamer *Thetis*, now lying at the New York Navy-yard, in condition for sea service at an early day.

THE Brazilian frigate *Almirante Barroso*, with Prince Leopoldo on board, left Newport, Aug. 9, and put to sea. The Brazilians are delighted with the hospitality and kindness shown them while in the United States.

A LETTER has been received at the Hydrographic Office from Capt. Trant, of the steamship *Venetian*, which picked up the disabled *Werra*, saying that he caused an oil bag to be hung from each side of the *Venetian* and towed some distance astern, with the instant result of smoothing the sea about the disabled ship.

THE Government will be represented at the ceremonies of the dedication of the statue erected at Annapolis to the memory of Baron de Kalb, Aug. 16, by Secretary of State Bayard and Assistant Secretary Moore. The Naval Academy authorities at Annapolis will participate in the ceremonies, procession, etc., and fire the necessary salutes requested by the committee.

A NAVAL court of inquiry was ordered last Saturday to meet at the New York Navy-yard on Monday to investigate allegations against the conduct of Lieuts. O. C. Berryman and S. W. Quackenbush. The former was charged with absence without leave, and the latter with drunkenness The court consisted of Commanders H. B. Robeson and Nicoll Ludlow and Capt. McLane Tilton, U. S. M. C., with Lieut. J. A. Hunker, Judge Advocate.

THE officers of the Hydrographic Office of the Navy Department are engaged in outlining a plan for the division of the North Atlantic into sections, over which the different maritime nations shall have control, the object being to rid the track of vessels from the derelict wrecks which now cause so much anxiety and danger. The August chart shows about twenty dangerous wrecks scattered along the path of vessels taking the international route to and from Europe, and under the existing arrangements no nation is responsible for them. These wrecks are mostly abandoned lumber-laden vessels which have become waterlogged, and which in many instances drift for months, making navigation near them exceedingly dangerous.

THE Secretary of the Navy has taken no steps as yet toward dropping with a year's pay the surplus naval cadets who completed their six years' course this year. Twenty of the class have received commissions as ensigns, and five more are hopeful of getting the vacancies in the Engineer Corps. As to the latter there is some question and consequently delay in discharging the surplus promotions. Congress having adjourned without passing the bill giving the cadet engineers, recently restored to the Service, their original places, these gentlemen are not willing to relinquish their claim to the vacancies, and still they are not particularly anxious to accept promotion at this time, fearing that they may injure their chances of securing legislation next session. It is

not improbable that vacancies in the Engineer Corps will be kept open until Congress meets again, and then if Congress provides for the cadet engineers, five of the naval cadets can be given the vacancies referred to, and the remainder discharged with their year's pay from date of graduation.

THE *Wynberg Times and South African Agriculturist*, published at Simon's Town, Cape of Good Hope, makes mention of the fact that "the quarter master and quarrer-gunner of the United States steamer *Lancaster*" had devoted their leisure hours to writing verses, and on the arrival of the ship at Cape Town had succeeded in inducing an enterprising publisher to make a book of them. Two specimen poems are given in a review of the work—one called "The Sailor's Dream," the other "The Gallant Four Hundred," in which appears the following stanza:

Whiskey to the left of 'em,
Rum to the right of 'em,
Once the delight of 'em,
Now can't bear sight of 'em—
Lancaster's crew. Nobody "tight" of 'em
(I'm pleased this to write of 'em),
For old Doctor Ills,
With his nautical pills,
Now drinks lemonade till he's black in the gills;
And the pretty young barmaids in Cape Town, they wondered
When they charged temperance drinks to the gallant Four Hundred.

NAVY GAZETTE.

Ordered.

AUG. 7.—Lieutenant G. A. Norris, to duty at the New York Navy-yard Sept. 1.

AUG. 9.—Commander Nicoll Ludlow, to duty as Equipment Officer in New York Navy-yard Aug. 20.

Commander A. S. Barker, as assistant to Lighthouse Inspector of the 2d District Sept. 1, and on the 30th of that month to assume the duties of Lighthouse Inspector of that district.

Passed Assistant Paymaster Samuel R. Colhoun, to duty at the Naval Station, Key West, Fla., September 30.

AUG. 10.—Assistant Engineer W. H. Allderdice, to the Lancaster, South Atlantic Station, per steamer Sept. 17.

AUG. 11.—Lieutenant C. H. Arnold, to the Navigation Department of the New York Navy-yard.

AUG. 13.—Commander F. J. Higginson, to torpedo instruction at Newport Sept. 1.

Passed Assistant Surgeon Geo. P. Lumsden, to Naval Hospital, Mare Island Navy-yard.

Detached.

AUG. 7.—Lieutenant E. S. Prime, from duty at the Navy-yard, New York, Sept. —, and ordered to the Lancaster, South Atlantic Station.

Lieutenant Andrew Dunlap, from the Lancaster and ordered to return home and report arrival.

Chief Engineer A. W. Morley, from duty at the Morgan Iron Works, N. Y., and ordered to special duty in connection with the machinery of the Atlanta.

Passed Assistant Engineer Harrie Webster, from the Atlanta and placed on waiting orders.

AUG. 9.—Passed Assistant Paymaster John W. Jordan, from the Naval Station at Key West, Fla., Sept. 30, and ordered to settle accounts.

AUG. 10.—Assistant Engineer Howard Gage, from the Bureau of Steam Engineering and ordered to the Lancaster per steamer Sept. 17.

Assistant Engineers F. C. Bieg and Albert O. Young from the Lancaster on the reporting of their reliefs and ordered to return home and report arrival.

AUG. 13.—Surgeon J. L. Neilson, from the Ranger and ordered home to wait orders.

Passed Assistant Surgeon L. B. Baldwin, from the Mare Island Naval Hospital and ordered to the Ranger.

Resigned

Assistant Engineer G. H. T. Babbitt, to take effect Aug. 10.

MARINE CORPS.

AUG. 9.—Captain Geo. C. Reid, leave of absence granted for twenty days from Aug. 12.

AUG. 11.—1st Lieutenant M. C. Goodrell, detached Aug. 17 from the Marine Barracks, Annapolis, Md., and ordered to proceed to Portsmouth, N. H., and report Sept. 1 for duty at the Marine Barracks there.

1st Lieutenant Geo. R. Benson, preparatory orders for sea service issued.

1st Lieutenant B. R. Russell, preparatory orders for sea service issued.

NAVY DEPARTMENT, WASHINGTON, July 31, 1886.

General Order No. 351.

Payments under the following items in the act making appropriations for the Naval Service for the fiscal year ending June 30, 1887, approved July 26, 1886, will, from July 1, 1886, be charged under the appropriation "Pay of the Navy," viz.:

For Secretaries to the Admiral and Vice-Admiral; Clerks to Commandants of Yards and Stations; Clerks to Paymasters at Yards and Stations, Inspectors, Receiving-ships, and other vessels, and extra pay to men re-enlisting under honorable discharge.

Section 2 of the same act provides that "all balances of moneys appropriated for Pay of the Navy or Pay of the Marine Corps, for any year, existing after the accounts for said year shall have been settled, shall be covered into the Treasury."

These appropriations will, therefore, be used only for the payment of services or in the settlement of claims for the year for which made, and must be accounted for accordingly.

Disbursing officers in making requisitions for money under "Pay of the Navy" or "Pay of the Marine Corps" will state the year under which drawn.

WILLIAM C. WHITNEY, Secretary of the Navy.

NAVY DEPARTMENT,
BUREAU OF EQUIPMENT AND RECRUITING,
WASHINGTON, D. C., August 1, 1886.

Circular.

By direction of the Department, the Bureau of Construction and Repair will hereafter have charge and control of all "boat detaching apparatus," "rubber balsas, or life-rafts," and "chairs and camp-stools" for the use of Naval vessels.

All such articles now on hand will be transferred accordingly, accompanied by an inventory or descriptive statement, to be certified by the officer receiving the same.

W. S. SCHLEY, Chief of Bureau.

NAVY DEPARTMENT, WASHINGTON, July 1, 1886.

General Court-martial Orders No. 23.

Before a General Court-martial, which convened Jan. 4, 1886, on board the U. S. S. *Marion*, at Nagasaki, Japan, by order of Rear Admiral John L. Davis, U. S. N., commanding the U. S. Naval force on the Asiatic Station, and of which Court, Captain Robert L. Phythian, U. S. N., was President, was arraigned and tried Passed Asst. Engr. William A. Mintzer, U. S. Navy.

Charge I.—"Scandalous conduct tending to the destruction of good morals."

Specification.—"That he was, on or about Dec. 19, 1885, under the influence of intoxicating liquor; this on board the said *Marion*."

Charge II.—"Conduct unbecoming an officer and a gentleman."

Charge III.—"Using provoking and reproachful words toward another person in the Navy."

Specifications.—"That he did apply to Lieut. John E. Roller, U. S. N., attached to the said ship *Marion*, the vile epithet of 'you damned ——— — — ———,' or words to that effect, and did use other obscene, vulgar, profane and abusive language toward the said Lieut. John E. Roller, his brother officer; this on board the said *Marion*," saying: "Why don't you go up and report me," and referring to the said Lieut. John E. Roller, U. S. N., "that G—d d——d Jew has reported me," or words to that effect, and did use other vulgar, profane and abusive language to the said Lieut. John E. Roller, U. S. N., this on board the said *Marion*."

Charge IV.—"Attempting to bribe another person in the Navy."

Specification.—"In this, that he did, through Chief Engr. Frederick G. McKean, U. S. N., attached to the said *Marion*, make an offer of a corrupt nature to Lieut. John E. Roller, U. S. N., attached to the said *Marion*, to induce him, the said Lieut. John E. Roller, U. S. N., to withdraw a report made against him, the said William A. Mintzer; this on board the said *Marion*."

Plea, not guilty, except to Charge III. Guilty of Charges I., II., and III., and the specifications, except the words "did apply to Lieut. John E. Roller, U. S. N., the vile epithet of you d——d ——— — — ———, or words to that effect," which words are not proved. Charge IV., "Not Proved," and of the Charge, "Not guilty."

Sentence.—"To two years' suspension from rank and duty, on furlough pay, and to retain his present number in the grade of passed assistant engineers."

The proceedings, findings and the sentence of the General Court-martial in the foregoing case of Passed Assistant Engineer William A. Mintzer, U. S. Navy, were approved by Rear Admiral John L. Davis, who convened the court.

The sentence in the case of Passed Assistant Engineer William A. Mintzer, U. S. Navy, takes effect from Jan. 6, 1886, the date of its approval.

WILLIAM C. WHITNEY, Secretary of the Navy.

(Correspondence of the Army and Navy Journal.)

NAVAL ACADEMY.

ANNAPOLIS, MD., Aug. 10, 1886.

CADET C. B. MORGAN, of Mississippi, fell and broke his arm in two places, while playing ball on the Academy grounds last Wednesday. He was moved to the hospital, where his injuries were cared for by Dr. Steele.

The practice ships, *Constellation* and *Jamestown*, are expected at Cape Henry on the 14th inst. Miss Beckman, of New York, is visiting the Misses Murray, at Acton.

Lieut. Calahan has been detailed as officer in charge during the absence of Ensign Blish. Preparations for the unveiling of the De Kalb monument, in Annapolis, are being pushed forward with great vigor. The exercises will take place on the 16th inst; various military organizations throughout the State participating.

The Naval Cadets attached to the Academy will form as a battalion of artillery. The presence of the Marine Band, of Washington, will add greatly in creating an excitement that this sleepy old town hasn't seen since the days of our Republican grandsires.

HONORS TO ADMIRAL FRANKLIN.

FROM the *Oriental Advertiser* of Constantinople we learn that at the dinner given at the Admiralty, July 7, in honor of Admiral Franklin and his officers there were present: Minister Cox; the commander of the *Kearsarge*, Mr. Sigsbee; Lieuts. Staunton, Potts, Adams, Winslow; Ensign Daugherty; the interpreter of the United States Legation, M. Gargiulo; Admiral Hassan Pasha, Ottoman Minister of Marine; the commander of the *Mahmoudie*, Hakki Bey; the introductor of ambassadors, Ibrahim Bey, etc. In an apartment adjoining the dining room fifty American and thirty Turkish seamen, the latter speaking English, were assembled together. The Ottoman Minister of Marine, Admiral Hassan Pasha, made a brief speech, concluding with a toast to the American Navy. This was responded to by Minister Cox, who said, among other things:

Your East is bound to our West not only by international regard, but by mutual obligations and aspirations. Some one has said that the United States is composite, a mosaic of many characteristic races and religions. So is Turkey. America is the recipient of the varied qualities of every nation. Our language is enriched with many tongues, Arabic, Greek, Latin and Teutonic. We have the common law from England; our religion is from Judea: our federal system from Holland; our marine codes from Russia; the very hymns in our churches, many of them are from India. But it is in the Orient that we find the fountain of our material strength and progress. We derive our mathematics from this source of light and science. It was the East that transmuted astrology into astronomy and alchemy into chemistry; and you, Mr. Minister, are familiar with the explosives and forces which practical men of the West have given you in compensation for the abstract teaching which, under the Oriental sky, led the car of advancement when the dark ages prevailed in Europe. (Applause.)

Mr. Cox was afterwards called out to the apartment where the sailors were dining and made some further remarks, in explanation of the exceptional hospitality all alike were receiving from his Majesty. He called for three cheers, which were given with a heartiness that made the building ring again.

The next day, Prince Selim went aboard the *Kearsarge* at 2 o'clock in the afternoon, and addressed the officers and crew of that vessel in the following terms:

I come on the part of my august father and master to salute you in his Imperial name, and I am the more delighted to accomplish the mission both as a soldier and aide-de camp of my beloved Sovereign. His Imperial Majesty the Sultan beheld with great satisfaction the American corvette in Turkish waters, and his Majesty considers this visit to his capital as a fresh proof of the friendship which exists between the United States and the Ottoman Empire. I salute you in the name of my august father and our country, and I shall ever cherish the precious remembrance of the mission which I have fulfilled to-day.

Admiral Franklin, surrounded by his officers, replied as follows:

We are very happy to receive to-day on board the *Kearsarge* the visit of your Highness, which is a further proof of the sympathy which his Majesty entertains for us. The exceptional kindnesses your august father has bestowed on us were such that they will never be forgotten. They tend to strengthen the good relations so happily existing between the two respective countries. Therefore I beg of you to offer to his Imperial Majesty, your august father, our cordial thanks, and tell him that the President of the United States will be thoroughly informed of the splendid attentions we have received at this splendid capital.

COST OF THE WARS OF THE UNITED STATES

IN answer to a letter from Gen. Warner, asking for the expense of the various wars in which the United States have been engaged in, Gen. Rosecrans has written the following letter:

The Hon. A. J. Warner, House of Representatives:

DEAR SIR: Yours of the 11th inst. duly received. I am unable to find any statement of the expenses of the Revolutionary War, the War of 1812, and the Mexican War prepared by the Treasury Department. I do not know of any statements having been published elsewhere which may be fairly termed trustworthy. I have roughly estimated the expense from the figures of national expenditures, as increased during the years of war, respectively:

Revolutionary War—$6,000,000. This is the sum assumed and paid by the United States, and has no reference to the expenditures of the several colonies.

War of 1812—$115,000,000.

Mexican War—$135,000,000.

The War of the Rebellion—$6,189,920,908.

An article in "Putnam's Magazine" for August, 1856, on the cost of war has some general statistics (not verified) on this subject. The Peace Society has printed some statements, but they are not reliable to a statistician.

Very respectfully, W. S. ROSECRANS, Register.

ASSISTANT ENGINEER A. W. STAHL, U. S. N., leaves St. Paul this week for Lake Elmo, Minn., where he will remain for several weeks.

ARMYNAVY.

A D'ARTAGNAN, OR A NAPOLEON?

THE French press, professional and political, is far from being harmonious in its appreciation of General BOULANGER's policy and aspirations. Still, there is an obvious consensus of opinion that he is a capable soldier and a brave man. With the organs of monarchy and imperialism the antagonism to an officer comparatively so young, however much a veteran in service and experience, is essentially sentimental and partisan. The pronounced Republican journals, and such strongly national papers as our wide-awake exchange, *La France Militaire*, are equally earnest in their support of the new army *regime*, and are evidently disposed to accept the Minister as something more than a popular hero—a man of Providence. The aspersions cast upon General BOULANGER by the opposition involve his personal traits rather than his professional qualities. He is charged with gross ingratitude to his alleged patron, the Duke D'AUMALE, accused of military insubordination and violating his own expressed theories of deference to superior rank; satirized as a debutante seeking to play the leading role of a NAPOLEON, and ridiculed for the imposing splendor of his staff surroundings, the gaudiness of his personal bearing and the dramatic effects he is constantly producing. So far as the expulsion of the Orleans Princes goes, honest observers all over the world have come to regard it as little less than an imperative necessity for the French Republic. It was not the act of General BOULANGER, but of the Republican Government of which he was a Minister, which would have been blind had it not seen with jealous eyes the machinations of the Orleans party, and at not too late an hour driven their leaders from France. As Americans we cannot forget the very conspicuous services in behalf of the Union so gallantly performed by the Comte de PARIS, his brother, and their uncle, the Prince de JOINVILLE; but as Republican America, we owe our sympathy to Republican France. All nations permit foreigners, men without a country, to seek sanctuary within their boundaries so long as they respect the local law and are exempt from the action of secret treaties that concern assassins and anarchists; but no nation can safely or consistently nurse, with rights of residence and immunity of citizenship, the growth of a power within herself that threatens her own vitality.

Setting aside a consideration of the penalty inflicted upon the Orleans Princes as a matter of equity, and of General BOULANGER's instrumentality therein, what now most interests observers of the situation are the personal character and professional ability of the man whom fortune has raised to the control of the French Army. General BOULANGER's career as a soldier need not be recapitulated. His record is not only that of a gallant officer in war, but of an able organizer, rigid disciplinarian, and thorough instructor in peace. To these qualities we must doubtless add the aspiring purpose of a man who cultivates the present with a keen eye to the future, pretty correctly understands his countrymen, feeling the national pulse with a sensitive thumb, and is master of those arts that not only make popularity but secure adherence.

But France more than any other nation needs and looks for a *deus ex machina*. As a soldier the first NAPOLEON filled this place. Is BOULANGER one of *les hommes providentiels* born to return Lorraine and Alsace to France?

On July 23, 1870, when LOUIS NAPOLEON had discharged his chief of staff, General LE BOEUF, and his armies were suffering reverses that threatened seriously the fortunes of the Empire, the JOURNAL hazarded the prophecy that General JULES LOUIS TROCHU would be the next administrative head of the military resources of France. Three years before a remarkably thorough and severe criticism of the existing military system, in the form of a pamphlet entitled *L'Armeè Francaise*, which reached its tenth edition, attracted our attention to its author, of whom, though a General of Division, there was little to be learned other than the record of a few lines allotted to him in *Le Dictionaire Contemporaine*, in *L'Armeè Francaise* and a subsequent work of a similar character, and a reference to him in KINGLAKE's Crimea. TROCHU was not simply an assailant of all that was fraudulent and ineffective in the Army schemes out of which LE BOEUF and others high in rank were filling their pockets at a deadly cost to their country; he was also the originator of a better, more honest, order of things, advancing a theory of reorganization which—though it came too late to save France from her humiliation—was to have its pronounced influence when the war was over.

It was assumed that TROCHU's trenchant condemnation of existing inadequacies and abuses had rendered him obnoxious to the Emperor, whose perception had been blinded to the military situation by misrepresentations of his staff. The event showed, however, that NAPOLEON was not to be permanently hoodwinked. TROCHU, within three weeks after our suggestion in the JOURNAL, was appointed to LE BOEUF's position, thus becoming practically the head of the Army.

The career of General TROCHU during the few months of his power was not a success. His object was to render Paris impregnable, and that end secured, to aid the provinces in their assaults upon detached corps of the enemy. In all his actions he exhibited the soldierly qualities that any intelligent student of his career would have attributed to him; ability to organize, ability to keep order, ability to lead troops to battle, steadfast adherence to his "plan," and a courage so conspicuous that it was said of him that he sought death to release him from his position. The London *Spectator*, writing of him after the surrender of Paris said:

If we could thoroughly understand the failure of General Trochu, we could understand the cause of the failure of France. Something is wanting among Frenchmen, some-

thing as yet undefinable, and General Trochu, dealing with a representative crowd of Frenchmen, with the population of Paris, with an army recruited from all the provinces, and with mobiles from all the northern departments, has failed to supply that deficiency. No one in England would have hesitated to give command to a General of his antecedents, and no one in England doubted that he was precisely the man to organize the fluid enthusiasm for independence and free government which had raised him to power. Of his ability to organize, in the ordinary sense of organizing, no proof is needed, beyond the proof that his organization exists. In a city closely invested he has created an artillery, an army, and a system of transport—a fact which, under the conditions, is one of the greatest ever performed by an administrator.

Possibly no man, under the circumstances, could have achieved the results for which the Army and the people of France, during a few weeks, looked so confidently to their man of providence, and the failure of TROCHU under the circumstances should not obscure his undoubted merits. General BOULANGER is the antithesis of TROCHU; he was a simple soldier whereas BOULANGER is a politician, as well as a soldier, and is influenced by a desire to control popular sentiment which TROCHU never showed. He aspires not merely to command the French armies, but to put himself at the head of the French nation, by leading public sentiment and making himself the essential factor in the realization of national hopes and national aspirations. His first step is to republicanize the Army and make it more subject to his will. During his brief holding of a Cabinet office he has undertaken more in the way of military organization than have his predecessors for years, and his plan of reorganization has extorted the favorable criticism of those who must be the best critics in French eyes—the German staff. He has secured the passage of *le loi d'espionage*, which discourages the residence of German officers in France under assumed names and occupations. His most recent act, the inauguration of *Le Cercle National*, a great Army and Navy Club, to which every officer in the Paris garrison must belong, and which is designed to be the nucleus of associated clubs throughout the Departments, though arousing all the casuistry of the Conservative press, has proven a grand success and is a most popular move with the two services.

It is very evident that BOULANGER thoroughly estimates the traditions of the army, and the nature of his compatriots. His demonstrations are full of the *feux d'artifice* that win the heart of an emotional people. On his return to the Ministry from the Charlais Park, the scene of his duel with DE LAREINTY, after accepting the congratulations of the officers who received him, he said to them, (we quote *La France Militaire*), "There is too much fuss about this affair; it is the duty of all soldiers to fight. Besides, that Charlais Park is wonderfully convenient for these rencounters. Whenever any of you have occasion for it, I will place it at your disposal."

How far the attempt to discredit BOULANGER because of his treatment of d'AUMALE will succeed is not yet apparent. Ingratitude and prevarication, the two offences with which he is charged, are most inconsistent with soldierly character, and it is not impossible that the growing popularity of the French War Minister may have received a check from which it cannot recover.

NAVAL ORDNANCE.

THE Navy, in the matter of Ordnance, met with much better treatment at the hands of Congress this year than the Army. One million dollars was appropriated for new guns for the Navy, and not a single cent for the Army. The Navy will thus be able to continue its improvements in heavy gun construction, while the Army must of necessity lag behind until Congress sees fit to provide means for its advancement. This partiality for the Navy suggests the inquiry whether it is in any measure due to the fact that the control of Ordnance matters for the Army is in the hands of a special corps, whereas it is intrusted in the Navy to officers detailed from the line, and who are thus kept in constant contact with the ideas and requirements of the general body of the service. In the matter of heavy guns the Army is where it was twenty-five years ago, before the outbreak of the War of the Rebellion. Our forts are still armed with the guns which were found there in 1860–61.

To equip main batteries of the vessels, referred to in the bill for the increase of the Navy, according to their design, a total of twenty-two 10-inch and twenty-eight 6-inch guns will be required. The 4,000 ton vessel calls for twelve 6-in. B. L. R.; the 1,700 ton gunboat six 6-in; the 870 ton gunboat four 6-in; the 3,730 ton twin screw cruiser (*Naniwa-Kan*) two 10-in., and the five double turret monitor four 10-in. (it is supposed) each. Of course, one million dollars will not be sufficient to build all these guns, but it will enable the bureau to continue its good work of the past two years, so that as rapidly as ships are completed there will be guns to put on them.

A portion of the money appropriated, probably $250,000, will be utilized in improving the plant at the Washington Navy-yard. The purpose is to increase the facilities of the yard to a capacity sufficient to turn out all the guns required for the use of the Navy, and to depend upon gun and steel manufacturers for the guns in rough, only.

Although the bureau is well satisfied with the results of the steel guns recently built and tried, it is not the intention to pattern the proposed guns in all respects after them. Entirely new designs for the 6-inch guns are now in course of preparation. It is not learned exactly what the changes are to but it is understood that the guns are to be hooped to the breech, instead of every part way, the length increased and the chambers made smaller.

PENDING decision by the War Department on the new mileage law, the Paymaster General has, in answer to inquiries from officers of his department, issued instructions making the regulations under the law of July 24,'76, allowing eight cents, applicable to the new law. Mileage when authorized by law is to be allowed at the rate of four cents a mile, and railroad fares when paid. This action is based upon the ruling of Comptroller UPTON, which reads: "Officers travelling over either of the railroads on which troops of the United States are entitled to be transported free of charge are not entitled to mileage, but officers travelling under orders since March 3, 1879, over any and all other roads are entitled to mileage." The roads above referred to over which officers are not entitled to mileage are:

1. California and Oregon (Central Pacific Oregon Division).
2. Chicago, Mil., and St. P. (Hastings and Dakota Divisions), Minnesota.
3. Little Rock and Fort Smith, Arkansas.
4. Memphis and Little Rock, Arkansas.
5. Michigan Central (Saginaw and Mackinac Divisions), Michigan.
6. Missouri, Kansas, and Texas, Kansas.
7. Oregon and California, Oregon.
8. Southern Minnesota.
9. St. Louis, and Iron Mountain and Southern, Missouri and Arkansas.

ADVERTISEMENTS for proposals for the construction of the new vessels of war have been prepared and will be issued as soon as the Secretary decides upon the length of time to be allowed for the sending in of bids, and the specifications are furnished by the printer. The advertisement will invite proposals for five vessels, the Secretary having determined to have work on one of the vessels authorized by the late Naval increase act go on at the same time with the others. This vessel is the smaller of the two double bottomed cruisers authorized in the act referred to. The provision making the appropriation of $1,500,000 for it, calls for a cruiser of not less than 3,500 nor more than 5,000 tons displacement, designed to have the highest practicable speed and furnished with the best type of modern engines. The design adopted for this vessel is after the cruiser now building for the Spanish Government by J. and G. THOMPSON, of Clydebank, England. It is believed to be the fastest cruiser yet designed. The plans and drawings are among those recently procured by the Secretary through Sir NATHANIEL BARNABY.

THE action of the Senate in confirming the promotions made over the heads of Major MERRILL and Lieutenants BELLAS and KINGSBURY would seem to establish it as the rule under the present Administration to pass over officers awaiting retirement. To show who will be immediately affected by this decision, we give here a list of officers found incapacitated by retiring boards, with their numbers in the order of promotion. It will be seen that Captain DE HANNE, Medical Department; Lieutenant RAPHALL, 11th Infantry, and Lieutenant FLETCHER, 21st Infantry, are now at the head of the list, in their respective grades and arms. There is now a vacancy in the list of captains of the 11th Infantry, or at least will be in a few days, when Captain SCHWAN accepts his new commission as Assistant Adjutant General. The two officers—Lieutenants RAPHALL and TAYLOR—at the head of the list of 1st lieutenants of this regiment, have both been found incapacitated. It is not known whether they will be placed on the retired list immediately or not, but it is certain that they will not be promoted. This will give Lieutenant MATILE the third place on the list.

Asst. Surgeon J. W. Buell, Med. Dept., 56.
Asst. Surgeon W. R. Steinmetz, Med. Dept., 18.
Asst. Surgeon J. V. De Hanne, Med. Dept., 1.
Asst. Surgeon Jos. Y. Porter, Med. Dept., 47.

" " D. B. Taylor, 11th Inf., 2.
" " Geo. K. Spencer, 19th Inf., 6.
" " Thos. W. Lord, 20th Inf., 2.
" " Palmer Tilton, 20th Inf., 8.
" " Robert H. Fletcher, 21st Inf., 1.

AT this writing, August 12, two vacancies exist in the disability retired list of the Army. One retirement—that of 2d Lieutenant JOHN T. BARNETT, 5th Cavalry, occurred during the week, and also one death, that of Colonel ROBERT ALLEN. It is presumed that the two existing vacancies will be filled within a few days. There is an impression among some that the Department, in order to clear the way for promotion to the vacant Captaincy in the 11th Infantry, will select Lieutenants RAPHALL and TAYLOR for these vacancies.

THE latest information this week concerning Mexican affairs is to the effect that the Mexican Government, through a communication received from Minister JACKSON, requests the authorities at Washington to send a special envoy to Mexico, who can investigate impartially the legal questions involved in the CUTTING controversy and report thereon. To this the Cabinet has agreed in a peace-giving spirit, and meanwhile no action of any kind will be taken by either country. No selection of our representative has yet been made. Those who are expecting an immediate outbreak of hostilities with Mexico will do well to review the history of our previous difference with that country. On Feb. 8, 1837, President JACKSON, in a message to Congress, complained of "unavailing applications for redress" against Mexico such as "would justify in the eyes of all nations immediate war." Previous to this passports had been demanded on both sides, diplomatic intercourse was suspended and renewed, and again suspended, commissioners appointed to adjudicate differences, and finally a plenipotentiary, Mr. SLIDELL, was sent to Mexico and refused a hearing. So dispute and discussion, crimination and recrimination, continued for more than ten years, until, on the 8th of March, 1846, General TAYLOR took up his march for Corpus Christi.

THE wardroom of the new steel cruiser *Atlanta* is fitted up in an unusually gorgeous style. Sycamore is the wood employed, and in its treatment some exceedingly beautiful effects have been produced. Quite a new departure in the style of stateroom doors is to be observed, all of which slide instead of swinging, and are provided with ventilating blinds at top and bottom. The rooms are high and commodious, containing many conveniences hitherto unheard of in American men-of-war. The electric incandescent light will soon be installed in every part of this latest addition to our Navy, and the ventilation of the ship from end to end is most complete and thorough.

THE San Francisco *Report* refers in an atrabilious mood to the veterans in the processions which have tramped over the streets of that city recently, saying: "To be about six feet tall and weigh 250 pounds seems to be the popular idea of manly beauty and majesty. A pot-bellied citizen, with a double chin, a deep voice and an air of confidence, born of political conventions and outdoor rostrums, is the beau ideal of the San Franciscan, who thinks he knows what a fine presence and military bearing are. To the person who knows anything about the human form and constitution they suggest a barrel upon

two sticks; they speak of Bright's disease and dyspepsia, of lungs and heart loaded down with bad fat and working irregularly and painfully. They suggest gross feeding, heavy drinking, lack of exercise and all sorts of unpleasant things."

"GENERAL HAZEN," says a Washington despatch, "expresses himself as well satisfied with the general results of the session as regards the Signal Bureau. 'We won the fight,' said the General, 'but, of course, there were more or less casualties resulting from such a sharp battle. The victory is ours, however, for the Weather Bureau remains in the Signal Service and in the Army, and we can afford to take our losses very philosophically. Thirty men are lopped off from the Corps; but as it lacked twenty-two of being full, there is in reality a loss of but eight. These will come from the permanant party at Fort Myer, and the eight men will be mustered out. We lose Fort Myer as a Signal Service school, but it will be maintained as an Army post.'"

THE London *Army and Navy Gazette* tells us "that an extraordinary projectile has been prepared for the trial of the new submarine gun, shortly to take place at Pembroke. The shot is nearly as long as the gun and bears a strong resemblance to the fish torpedo. It was fully charged before leaving Woolwich Arsenal, and the doubts which have to be solved by the experiment are not only whether the projectile can be sent an effective distance under water in the desired direction, but whether so sensitive a charge as it contains will stand the shock of discharge without a premature explosion." We presume this refers to the Ericsson submarine gun, a sample of which was recently sent to England.

IT is to be hoped that Captain Rucker, of the 9th Cavalry, is incorrectly reported when he is accused of saying in his testimony before the McBlain court-martial: "Young officers are in the habit of taking ladies visiting at the post to entertainments of different kinds *as a matter of social duty*." Indeed, we feel a sense of reproach in reporting the statement, for if the young ladies visiting at Fort Riley should be persuaded that the attentions shown them were performed solely from a sense of duty, we fear that that fort would speedily become like the Garden of Eden before the advent of Eve. How could you say such a thing, Captain Rucker?

S. R. R., IN an article on our Mexican relations in the Cincinnati *Commercial Gazette*, says: "Mexico has our beautiful double back-action elliptic system of States and U. S. governments. If John Bull were to demand of our U. S. Government the rendition of a Britisher in the hands of the authorities of a State, the U. S. Government would have to call on the State, and await the course of law in her courts. As Mexico inherited this constitution of disorder from us, should we not give Mexico a little time for the same boggle? Time is good to Cutting. He likes it. It will make no difference to Arrasures."

WE had this year the usual unreasoning howl in the New York papers against the River and Harbor bill, which continued after the bill had become a law in spite of the fact that Gen. Newton assured the President that of the items in the bill, all except eighteen, comprising less than one per cent. of the amount appropriated, were meritorious beyond question, and, while he in no manner condemned those, he was unable to give a positive opinion because of lack of complete information concerning them.

THE boys of San Francisco, says the *Post* of that city, are getting magnificent lessons in patriotism these days. Every flag that flutters stirs their young imagination, and if in the time to come the country needs soldiers, the influence of this encampment will be felt at the recruiting stations.

VETERANS of the 23d Pennsylvania (Birney's Zouaves) unveiled at Gettysburg, August 5, an imposing monument on Culp's Hill, where they were engaged on the morning of July 3, 1863.

ECHOES FROM THE RIO GRANDE.

THE El Paso *Times*, summing up our situation with reference to Mexico, says: "Now it remains to be seen what Uncle Sam will do. We may have some fun, but the chances are that war will be avoided. The people of this section only ask one thing of their Government, and that is the protection of its citizens from Mexican injustice, only when it occurs, and if legal minds decide that Cutting is unjustly dealt with, we want him liberated."

(By Telegraph to the N. Y. Herald.)

AUSTIN, TEXAS, August 12, 1886.

To the Editor of the Herald:

YOU ask my views of the Cutting case. Cutting has never applied to me. It may be conceded, if necessary, that Cutting has been legally convicted under Mexican law, but the people and the Government of the United States can never submit to such a rule of law. Every editor and every other person who writes or prints matter in the United States obnoxious to the views of Mexican courts can at any time, when found in Mexico, be arrested and punished as Cutting has been. The person of Cutting is not involved. Surely our Government has not made an idle demand. No one wants war, and I trust no one wants peace at the expense of national honor and the rights of American citizens. The only way to avoid war is to be ready for it and show a willingness to accept it if it must be. Outrages have gone far enough and have been numerous enough.

JOHN IRELAND, Governor of Texas.

ARMY OF THE POTOMAC REUNION.

AT the business meeting of the Society of the Army of the Potomac at San Francisco August 2, the members of the Pacific Society were admitted on the payment of $2.50 each. A communication was received from the 5th Army Corps, enclosing resolutions expressing the liveliest satisfaction at the passage of the bill for the relief of Fitz John Porter, warmly congratulating General Porter upon the result, and thanking President Cleveland and the Senators and Representatives "who have so nobly sustained General Porter by their votes;" "for restoring General Porter to the Army, in which he rendered so many years of faithful and distinguished service." These resolutions were adopted by the society by a unanimous vote. Saratoga, New York, was decided upon as the place of the next meeting.

A committee of three, consisting of Generals F. H. Locke, H. C. King and M. T. McMahon, was appointed on getting up an emblem or button for the society representing the three branches of the Service, yellow, red and blue, to be worn on the left lappel of the coat.

The following officers were elected for the ensuing year: President, Gen. Martin T. McMahon; Vice Presidents, Gen. Lucius Fairchild, 1st Corps; Major M. Emmett Urell, 2d Corps; Major Wm. P. Shreeve, 3d Corps; Capt. L. E. Krone, 5th Corps; Gen. Geo. W. Ford, 6th Corps; Capt. J. S. Koster, 9th Corps; Gen. E. S. Salomon, 11th Corps; Gen. W. H. Webster, 12th Corps; Gen. N. B. Sweitzer, Cavalry Corps; Major A. M. Randol, Artillery Corps; Col. J. P. S. Gobin, 19th Corps; Lieut. J. Millard Brown, Gen. Rufus Ingalls, General Staff; Col. Samuel Truesdell, N. Y., Treasurer; Horatio C. King, N. Y., Recording Secretary; Gen. George N. Sharpe, Corresponding Secretary. The offices of Vice Presidents from the 4th, 2d, 9th and 10th Corps were passed.

The literary exercises were held at Metropolitan Hall, San Francisco, on the evening of the 3d. The poem was delivered by Frederick Emerson Brooks, and the oration by the Hon. Stewart M. Taylor, formerly of New York, and now of San Francisco. In the course of his address, he expressed a sentiment to which every soldier will respond: Do we seek more war, my comrades? No, no more war. The world begins to see that great questions can be best solved by cabinets instead of cannons. War marches with bloody feet, and puts out Joy's lamp in every heart.

The annual banquet was held on the evening of Aug. 4, Gen. McMahon presiding. Toasts were responded by Gov. Stoneman, Mayor Bartlett, General W. T. Sherman, Gens. Fairchild, E. D. Keyes, H. C. King, E. S. Salomon, Jas. A. Beaver and W. H. L. Barnes; Col. S. M. Taylor, Capt. F. V. McNair, U. S. Navy, Mr. F. M. Pixley, Mr. F. E. Brooks and Hon. A. E. Sargent.

COURT-MARTIAL OF CAPTAIN LEE.

BEFORE a G. C. M. convened at Fort Grant, A. T., and of which Colonel W. R. Shafter, 1st Inf., was President, was arraigned and tried Capt. P. L. Lee, 10th Cav., on the following charges: I. "Conduct to the prejudice, etc."; II. "Breach of arrest in violation of the 65th Article of War." The charges and specifications under the first charge were based upon a correspondence, of which the following is a synopsis:

Post Adjutant. Read to C. O., Troop G, 10th Cav., Feb. 1, 1886.

Asks explanation of the cause of absence of an officer from tattoo and reveille roll call Jan. 28 and 29.

Endorsement by Captain Lee, dated Feb. 2.

Respectfully returned. This letter dated Feb. 1 was received Feb. 2 at 5.30 P. M. From the length of time which has elapsed since the alleged absence, it is impossible for the officer, whose duty it was to attend the calls, to recollect whether he had any explanation to make or not.

A little more promptness on the part of the Adjutant's office is requested.

Endorsement by P. A., Feb. 4, by order of Major Mills.

Respectfully returned to Captain P. L. Lee, 10th Cavalry, who is informed that the statements contained in the foregoing endorsement are not considered as satisfying a reasonable and fair interpretation of the within letter.

Captain Lee will state, in an endorsement hereon, the name of the officer whose duty it was to attend tattoo and reveille roll calls of his troop on the 28th and 29th of last month, and cause him to state whether he has any recollection as to his presence, or absence, at said duties, and if he recollects that he was absent, whether such absence was caused by any reasonable accident or necessity. Captain Lee's attention is called to the fact that his endorsement is dated the 2d instant, while it was not handed into this office until this morning, the 4th. The Post Adjutant has already been instructed to be more prompt in such matters in the future, and his attention had also been called to a neglect on his part, in not calling on the Commanding Officer Troop G, 10th Cavalry, as directed by the commanding officer, on the morning of Jan. 18, for an explanation as to the absence of an officer in that troop at reveille and morning stables on that day, as reported by the officer of the day, Capt. Viele.

Endorsement thereon by Captain Lee, to wit, Feb. 4.

Respectfully returned. I considered that the first endorsement was a reasonable and fair interpretation of the within letter, from the fact that the commanding officer knows that I am the only officer with Troop G, 10th Cav., consequently in the 1st endorsement, "the officer whose duty" could but refer to myself—Capt. P. L. Lee, 10th Cav., comdg. Troop G, is the officer whose duty it is to attend all duties connected with said troop. Having been reported as absent, on the 28th and 29th, it was doubtless so. As I was not sick I have no explanation for the neglect; as I have been absent on several occasions, I neither know nor recollect the dates. The 1st endorsement was written on the 2d instant, but was accidentally left out of the morning report book, but was placed on the Adjutant's desk yesterday evening, as this will be this P. M.

This with the intent to treat lightly and contumaciously the proper efforts of his commanding officer, Major Anson Mills, 10th Cavalry, to learn the cause of his neglect of his duties. All this at or near Fort Thomas, A. T., on or about the 14th day of February, A. D., 1886.

Official communication sent to Captain Lee, May 5, 1886.

The Commanding Officer directs that you explain the cause of your absence from afternoon stables of your troop on the 4th instant. Explanation to be made by endorsement hereon.

Endorsement thereon by Captain Lee, to wit, May 5, 1886.

Respectfully returned to the Post Adjutant of Fort Thomas, A. T. I have no satisfactory explanation to make.

Endorsement of Order of Maj. Mills, May 6, 1886.

Respectfully returned to Capt. P. L. Lee, 10th Cav., who will state the reasons for his absence. The Commanding Officer will be the judge as to whether they are, or are not satisfactory.

Official Reply Thereto by Capt. Lee, May 6, 1886.

Respectfully returned to the Post Adjutant of Fort Thomas, A. T. I had no reason for my absence.

Official communication of same date.

Respectfully returned to the Post Adjutant, Fort Thomas A. T. I was engaged in conversation with friends at the sounding of the water-call, and stables were over before I was aware of lapse of time.

Communications addressed to the Post Adjutant of Fort Thomas, A. T., did make use of the following language, March 10, 1886:

Angered and insulted at the manner of the Commanding Officer.

March 25, 1886: "Lieut. Read did not make a full and conscientious report. In not reporting his absence to me, he deceived me." His attention being called "*to the fact that Lt. Read understood this last remark to imply moral turpitude, and being directed by his commanding officer to either withdraw the same or place it in such formal accusation as would enable Lieut. Read to defend himself*, did in a written reply addressed to the Post Adjutant of Fort Thomas, A. T., and dated April 4, 1886, make use of the following language: In regard to the question of moral turpitude, Lieut. Read must draw his own conclusions.

It was alleged in the specifications that these several letters and endorsements were with the evil intent of casting reproach and opprobrium upon brother officers and treating slightly and contumaciously the proper efforts of his commanding officer to learn the course of his neglect of duty. The Court found him not guilty of this intent and not guilty of Charge I. Also not guilty of charge and not guilty of the specifications under it, which alleged breach of arrest by unduly delaying his return from Solomville, A. T., where he had been permitted to go to testify as a witness before a civil court.

Findings.—"Not guilty."

"And the court does therefore acquit him."

The proceedings, findings and acquittal in the foregoing case of Capt. P. L. Lee, 10th Cavalry, are approved (G. C. M. O. 37, D. Ariz., June 20.)

THE McBLAIN COURT-MARTIAL.

THE Court-martial in the case of Lieut. McBlain, 9th Cavalry, was in progress at Cheyenne at last accounts. Lieut. McBlain's troop commander, Capt. L. H. Rucker, testified that McBlain always spoke to him of his wife in very high terms. It was a subject of general conversation in the garrison that he had obtained a divorce from her, previous to which he was paying marked attention to a young lady at Junction City, Miss Kitty White. Captain Rucker testified: "It was well known that the accused was a married man. He never tried to disguise that fact, so far as I know. I have no friendly feeling toward the accused." The question: "He preferred charges against you a short time ago?" was objected to by a member of the court. The objection was not sustained. Answer by Captain Rucker: "He did. The charge was conduct unbecoming an officer and gentleman. The specification was in regard to showing letters I received from his wife. I never made any attempt to stop his promotion that I know of. I cannot say how often he visited Miss White. It was a matter of general comment in the town. I do not know how many hours he remained with her when he called, nor that he was alone with her during these visits. I do not know that he was frequently invited to go there to play progressive euchre. It is not a fact that I made it my special business to pry into the affairs of the accused."

THE APPROPRIATION BILLS.

THE following is a statement of the appropriations made during the present session of Congress:

Bills.	Estimates for 1887.	As sent to President.	Law for 1886.
Agricultural	$651,875	$654,715	$585,790
Army	25,356,998	23,753,057	24,014,052
Consular and Dip	1,604,961	1,364,065	1,242,920
District Columbia	3,839,869	3,721,051(*a*)	3,622,683
Fortifications	3,396,000	not passed	725,000
Indian	6,051,259	5,546,262	5,762,512
Legislative, etc	21,523,565	20,654,346	21,376,708
Military Academy	412,075	297,805	310,021
Navy	30,836,357	12,989,507	15,070,837
Naval Increase	....	3,500,000	...
Pension	75,830,200	76,075,200(*b*)	60,000,000
Post-office	54,986,166	54,365,863(*c*)	53,700,990
River and Harbor	10,176,920	14,473,900	...
Sundry Civil	33,554,600	22,657,510	26,079,257
Deficiencies	14,687,264	13,960,880	4,926,855
Alabama Awards	5,769,015	5,769,015	....
Miscellaneous	5,000,000	5,000,000	2,177,648
Grand totals	$293,676,129	$264,783,579	$219,595,283

(*a*) Including the half paid by the District each year.

(*b*) Including $16,000,000 deficiencies in 1882-'83, and $6,431,500 in 1885-'87.

(*c*) Including estimated revenues of Post-office, $47,542,253 in 1886-'87, and $42,741,422 in 1882-'83.

REVENUE MARINE.

Orders have been issued for the following transfers of vessels in the Revenue Marine Service: The steamer *McLane*, now stationed at Galveston, has been ordered to relieve the steamer *Crawford*, stationed at Baltimore. The steamer *Crawford* will take station at Key West, relieving the steamer *Dix*, which will take station at Galveston.

FISH COMMISSION.

The Albatross, Lieut. Commander G. L. Tanner, comdg At Wood's Holl.

The Fish Hawk, Ensign Louis W. Piepmeyer, comdg. St. Jerome Creek, Md. P. O. address, Ridge P. O., St. Mary's County, Md.

The Lookout, Mate Jas. A. Smith, comdg. New York.

The *Grampus*, J. W. Collins commanding, at Wood's Holl.

MRS. EMMA DE LONG, the widow of the Arctic explorer, is visiting the family of Mr. H. O. Houghton, at Beverly Farms, Mass.

THE ARTILLERY SCHOOL.

THE report of the Board of Army Officers, consisting of Major-Gen. John M. Schofield, Col. Clermont L. Best, 4th Artillery, and Major Marcus P. Miller, 5th Artillery, appointed to attend the examination of officers who completed the course of instruction at the Fort Monroe Artillery School this year, has been received at Army Headquarters and placed on file, with the following endorsement:

The Lieutenant General has read this report with care. As many of its suggestions can be adopted by the commandant of the artillery school, he deems it best to defer any action on the other suggestions for the present.

The Board met at Fort Monroe June 22 and spent five days in its investigations. It then adjourned to meet at Governor's Island July 22, where the report was prepared. The report gives a roster of the personnel of the school, followed by a statement of the condition of the material used. During the past two years some improvements have been made in the minor machines and appliances of artillery and engineering, but the chief object of professional value, such as the guns, small arms, carriages and armament, remain unchanged. It is suggested in this connection that the school be supplied with the modern systems of cannon and small arms, or with models thereof. A field gun carriage of the Gubeanval pattern, with an 18-inch pounder bronze gun, a trophy of the Revolution, has been added to the museum. The quarters, recitation rooms, library and printing office were found in excellent order and equal to the wants of the school. The accounts of the post treasurer were found correct and the expenditures judiciously made.

The course of instruction during the past two years has been practically as laid down. A valuable addition to the instruction in the department of artillery has been the tour of inspection made under the supervision of Capt. J. B. Campbell, 4th Artillery, instructor, of four officers, Lieut. Macomb, 4th Artillery, Lieuts. Lemly and Williams, 3d Artillery, and Lieut. Marsh, 1st Artillery, who were especially selected for the purpose. They visited the South Boston Foundry, National Armory, Colt and Winchester Works, Frankford Arsenal, Pennsylvania Steel Company, manufactory of high explosives at Gibbstown, N. J., iron and steel works at Chester, Pa., Dupont Gunpowder Works, and Midvale Steel Works. The results of their observations are to be given in special reports.

While fully recognizing the importance of this addition to the course of instruction the Board is of opinion that it should not be restricted to a portion of the class. That four officers only were selected was probably due to economical reasons, but it is suggested that a tour of the entire class to the Tredegar Foundry, Richmond, or to the Cambria or Midvale Steel Works, would not be an extravagant project and would be more in harmony with the purpose of the school.

In the Department of Engineering the special problem given the class was "to cover Norfolk, Va., and its water supply from an invading army approaching from the sea, and by the roads coming from the eastward between Minmos bridge on the North and Knoxville, 4½ miles due South." More of these problems the Board thinks might well be substituted for much that is taught in the engineering course.

Instruction in photography was given by Major A. C. M. Pennington, 4th Art., and in Chemistry by Lieut. D. D. Johnson, 5th Art. The course of "science applied to military art," has been divided up among the other Departments as follows:

Part 1.—Geology.—Secs. 1. Dynamical, 2. Structural, 3. Lethological, 4. Historical, 5. Engineering, Geology. Military Geology transferred to Military Art.

Part 2.—Manufacture of Explosives.—Secs. 1. Powder, 2. Explosive compounds.

Part 3.—Military Pyrotechny.

Part 4.—Metallurgy of Iron.—Secs. 1. Mal. Iron, Steel, and Cast-iron, 2. Substance employed in manufacture of same, 3. Manufacture of cast-iron, 4. Manufacture of Mal. Iron, 5. Manufacture of steel, 6. Working of same. Transferred to the course in artillery,

Part 5.—Manufacture of cannon.

Part 6.—Manufacture of small arms. Transferred to the course in artillery.

Part 7.—Secs. 1. Electricity, 2. Telegraphy, 3. Defensive Torpedoes. Transferred to the course in artillery.

The programme of instruction to the division of enlisted men was carried out under the supervision of Capt. J. M. Ingalls, 1st Art. In addition to the usual course, instruction was given in the principles and construction of the Bell telephone and call box, and in elementary surveying. The instructor reports great interest and zeal, and the most excellent conduct on the part of enlisted men under instruction.

The Board recommends that the staff or Academic Board include the instructors, that is the battery commanders who are regarded as best qualified to judge of the proficiency of the several students. Under the present regulations the staff is composed of the three field officers on duty at the school.

The estimate placed by the instructor upon any performance of a student should be made known to him by the publication of his "mark," and these recorded marks of merit in the regular work of the course should be the basis of final standing in the class, a final essay or thesis being given only its proper relative weight in that record.

The performance of regular daily duty is the appropriate test of merit, which cannot be supplied by a single essay, however brilliant, upon a selected subject. The following recommendations are made regarding the system of details to the school:

In the opinion of the Board the primary object of the course of instruction at the Artillery School should be to prepare 2d lieutenants of artillery for promotion to the grade of 1st lieutenant, and it should, as far as possible, be made a condition of such promotion as that at the Military Academy is designed to prepare cadets for appointment to the lower grade of officers and is made the condition of such appointment. The law, paragraph 36, U. S. Army Regulations, which excepts cases of disability or other incompetency from the rule of regular promotion gives the executive, it is believed, all necessary power to make the Artillery School as effective in producing desired results as is the Military Academy.

In the earlier days of the school it was wise to give all the lieutenants, without regard to age, the benefit of its course of instruction. But now nearly all the older lieutenants have passed through the course, so that, with few exceptions, the officers to be most benefited by it are the young 2d lieutenants, and the permanent system of detail deemed best for the Service may now be adopted. The number of officers detailed for this instruction, every two years, should be about equal to the number of bi-annual appointments of 2d lieutenants, so that all may be instructed. This will be accomplished by the detail of three or four from each regiment. But the exact number of each detail may be determined in orders from Headquarters of the Army. No reason is seen why their number should be fixed for an indefinite period as at present. The officers detailed for instruction every two years should, in no case include any who have already passed through the course and should not, without their own application or consent, include any who have passed the appropriate age for such instruction. This would include all who have served as lieutenants longer than 12 years. Indeed, it would, in our opinion, be better if the details could be confined to those who have served only from two to six years and this limit may be adopted after a few more years."

It is recommended that the senior 1st lieutenant in each of the batteries should occupy the position of Assistant Instructor; he should be specially selected with reference to his qualifications and should not be subject to periodical change.

In regard to the course of instruction, the report says:

This board cannot undertake to say what modifications should be made in the details of the course at Fort Monroe. These details must of necessity be elaborated by the commanding officer and staff of the school. We can only indicate in general terms the principles which, in our judgment, should govern, viz.:

The course at Fort Monroe should be essentially post graduate to West Point.

The essential features of the West Point method, with which all are familiar and which led to so satisfactory results, should be preserved, with only such modifications as are suggested by the greater age, dignity, and self-respect of the officer students.

The subjects selected to compose the course should be, first, those which are essential to the accomplished artillery officer; second, those which are essential for the officers of the general staff, and, third, those more general subjects which are important to all officers of the Army.

In making choice from the great range of subjects in the above outline decided preference should be given to those elements which need for their ready acquirement the aid of an instructor, and of the material appliances afforded by a military establishment like Fort Monroe.

The general subjects of applied sciences and the subject of law might well be omitted, while the subject of torpedoes, offensive and defensive, and the subject of steam engineering, as applied to the manœuvres of heavy guns, should, by all means, be introduced into the course. Care should be taken to stimulate personal effort on the part of the student; he should resort to the sources of information abundantly supplied by the library, instead of waiting for the instructor to do that labor for him.

The report concludes with these remarks:

An artillery school at Fort Monroe, which, like the Military Academy at West Point, shall realize the highest ideal, must necessarily be the growth of many years, under the stimulating efforts of many officers and the liberal support of the Government. The most improved material for practical instruction is still wanting. Hence the practical instruction in modern artillery is unavoidably extremely imperfect. Yet the habit acquired by the students in the use of obsolete appliances which are now furnished them will be of great assistance to them in their future efforts to handle the service guns. The course of theoretical instruction is yet, in the opinion of this Board, susceptible of improvement, as suggested, as also the methods of administration and the rule of detail of students. Yet the Artillery School has already accomplished great good, and its institution has been of inestimable value to the military service. We take great pleasure in recording our high appreciation of the faithful and efficient service rendered by those officers who have thus far conducted it, and especially by the present commandant, staff, and instructors, whose work it has been our agreeable duty to inspect.

THE FORTIFICATION BILL.

WE give here the text of the fortification bill as left in conference. There is a likelihood of its becoming a law early next session:

An act making appropriations for fortifications and other works of defence, and for the armament thereof, for the fiscal year ending June 30, 1887, and for other purposes.

Be it enacted, etc., That the following sums be, and the same are hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for fortifications and other works of defence, and for the armament thereof, for the fiscal year ending June 30, 1887, and for other purposes, namely:

For the protection, preservation, and repair of fortifications and other works of defence for which there may be no special appropriation available, $100,000, the same to be expended under the direction of the Secretary of War.

(1) For continuing the sea-wall around Governor's Island, $50.000. For continuation of torpedo experiments and for practical instruction of engineer troops in the details of service, $20,000.

Sec. 2. (2) For the purchase, manufacture, and erection of the necessary tools and machinery for the finishing and assembling of heavy ordnance at the Frankford Arsenal, Philadelphia, Pennsylvania; for guns in process of construction, gun-carriages, projectiles, fuses, powder, implements, and materials for the trial and proof of such ordnance, and to complete the two ten-inch breech-loading steel guns now under fabrication, their trial and proof, and all necessary expenses incident thereto, including compensation of draughtsman on gun construction while employed in the Ordnance Bureau, $400,000, to be available until expended.

Sec. 3. That the sum of $50,000, or so much thereof as may be necessary, of the unexpended balance of $400,000 appropriated by the act of March 3, 1883, for armament of fortifications, is hereby reappropriated and made available for the construction and payment of the guns authorized by said act, and now being constructed by the South Boston Iron Works, under contracts dated Sept. 24, 1883, and June 30, 1884; and the extension of said contracts is authorized accordingly.

(3) Sec. 4. To enable the Secretary of War to contract with the South Boston Iron Works for the construction of ten 12-inch, muzzle-loading, rifled, cast-iron mortars, each of 31,000 pounds weight, at a sum not exceeding $6,000 each, or six with steel bands, not to exceed $10,000 each, in the discretion of the Secretary of War, $60,000, or so much thereof as may be necessary: *Provided*, That no part of this sum shall be paid for any such guns until after one of the same shall have been completed in accordance with the contract, and shall have endured a firing test of 200 rounds with standard charges adapted to such a weapon; and after such test each of said guns thereafter manufactured, and tested by ten rounds in the same manner, shall be paid for at the price aforesaid, on the completion and satisfactory trial-test of each; all of said guns to be completed within one year from the termination of the firing-test of the first gun.

(4) Sec. 5. That the Secretary of War and the Secretary of the Navy be, and hereby are, authorized jointly to make contracts with responsible steel-manufacturers, after suitable advertisements, to continue not less than 30 days, in newspapers most likely to reach the manufacturers addressed, for the supply of rough-bored, rough-turned, and tempered forged steel in forms suitable for heavy ordnance adapted to modern warfare, for Army and Navy purposes, in quantity not to exceed 10,000 gross tons, in quality and dimensions conforming to specifications, subject to inspection and tests at each stage of manufacture and including all the parts of each calibre specified: *Provided*, That no money shall be expended except for steel accepted and delivered; and each bidder shall contract to deliver yearly a specified quantity of each calibre, the time of delivery of the smaller calibres to commence at the expiration of not more than 18 months and the largest calibres at the expiration of not more than three years from the date of the execution of the contract; and all the forgings shall be of American product and manufactured in the United States; and one-half of the material purchased under this provision shall be for the use of the War Department, and one-half for the use of the Navy Department, in the armament of ships heretofore or hereafter authorized by Congress; and for the purposes of this section the sum of $6,000,000 is hereby appropriated, to be available during six years from the date of the execution of the contract.

(5) Sec. 6. To enable the Secretary of the Navy to provide and erect additional tools and machinery for the finishing and assembling of heavy ordnance at the Washington Navy-yard, $200.000.

Passed the Senate with amendments July 28, 1886.

SICKLES AT GETTYSBURG.

COLONEL G. G. BENEDICT, of the Burlington *Free Press*, has given to the Philadelphia *Press* the letter which follows, and which was called out by certain newspaper articles written by him, the substance of which appears in his work entitled, "Vermont at Gettysburg":

HEADQUARTERS MILITARY DIV. OF THE ATLANTIC,
PHILADELPHIA, March 16, 1870.
[Private.]

G. G. Benedict, Burlington, Vt.:

DEAR SIR: I am in receipt of your letter of the 13th inst., as also the copies of the *Free Press*, with editorials and comments on the address of Col. Grout before the Officers' Society and Legislature of the State.

I have carefully read your articles and feel personally under great obligations to you for the clear and conclusive manner in which you have vindicated the truth of history. I find nothing to correct in your statement except a fact you mention, which is a misapprehension.

I did not invite Gen. Humphreys* to be my chief of staff till after the battle, because I did not see him after assuming command till I met him on the field, and besides I relied on him as a mainstay in handling the 3d Corps, and did not wish to withdraw him from that position. I did ask General Williams to assume the duties in addition to those of adjutant general, but he declined. I also asked Gen. Warren, then my chief of engineers, to act temporarily as chief of staff, but he also declined taking on himself additional duties. Under these circumstances I asked Gen. Butterfield to remain till I had time to make permanent arrangements. On the third day, Gen. Butterfield having been disabled by being struck with a fragment of a spent shell, left the Army, and a few days afterwards Gen. Humphreys accepted my invitation.

My defence against the charges and insinuations of Gens. Sickles and Butterfield is to be found in my testimony before the Committee on the Conduct of the War. I have avoided any controversy with either of these officers—though both have allowed no opportunity to pass unimproved which permitted them to circulate their ex parte statements, and, as you justly say, to *distort* history for their purposes. Both perfectly understand what I meant by my ante-battle order, referring to Pipe Clay Creek, also my instructions to Butterfield on the morning of the 2d, which he persists in calling an order for retreat, in the face of all my other acts, and of the fact that I did not retreat when I could have done so with perfect ease *at any moment*. Longstreet's advice to Lee† was sound military sense; it was the step I feared Lee would take, and to meet which, and be prepared for which was the object of my instructions to Butterfield, which he has so misrepresented. Now, let me tell you another historical fact. Lt. Gen. Ewell, in a conversation held with me shortly after the war, asked what would have been the effect if at 4 P.M. on the 1st he had occupied Culp's Hill and established batteries on it. I told him that in my judgment, in the then condition of the 11th and 1st Corps, with their morale affected by their withdrawal to Cemetery Ridge with the loss of over half their numbers in killed, wounded and missing (of the 6,000 prisoners we lost in the field nearly all came from these corps in the first day) his occupation of Culp's Hill, with batteries commanding the whole of Cemetery Ridge, would have produced the evacuation of that ridge and the withdrawel of the troops there by the Baltimore, Pike and Taneytown and Emmettsburg roads. He then informed me that at 4 P. M. on the 1st, he had his corps, 20,000 strong, in column of attack, and on the point of moving on Culp's Hill, which he saw was unoccupied and commanded Cemetery Ridge, when he received an order from Gen. Lee directing him to assume the defensive and not to advance; that he sent to Gen. Lee urging to be permitted to advance with his reserves, but the reply was a reiteration of the previous order. To my inquiry why Lee had restrained him, he said our troops coming up (Slocum's) was visible and Lee was under the impression that the greater part of my army was on the ground and deemed it prudential to await the best of his—as you quote from his report.

But suppose Ewell with 20,000 men had occupied Culp's Hill and our brave soldiers had been compelled to evacuate Cemetery Ridge, and withdraw on the roads above referred to, could the Pipe Clay Creek order have been so very much out of place?

That order was to meet the very contingency here in question, to wit: A part of my army, overwhelmed by superior numbers, compelled to fall back, and a line of battle formed to the rear of my most advanced position thus necessitated.

As to Gen. Sickles having by his advance brought on an attack, and thus compelled the battle which decided the war, you have completely answered—and it is a very favorite theory with the partisans of this officer. But these gentlemen ignore the fact that of the 18,000 men killed and wounded on the field during the whole battle more than two-thirds were lost on the second day, and but for the timely advance of the 5th Corps and the prompt sending a portion on Round Top, where they met the enemy almost on the crest and had a desperate fight to secure the position—I say but for these circumstances, over which Sickles had neither knowledge nor control, the enemy would have secured Round Top, planted his artillery there, commanding the whole battlefield, and what the result would have been I leave you to judge.

Now, when I wrote my report of the battle I honestly believed Gen. Sickles did not know where I wished him to go, and that his error arose from a misapprehension of my orders, but I have recently learned from Gen. Geary, who had the day before been sent by Gen. Hancock to hold the left, and who in doing so had seen the great importance of Round Top and *posted a brigade on it*, that on the morning of the 2d, when he received my order that he would be relieved by the 3d Corps and on being relieved would rejoin his own corps (12th), on the right, after waiting for some time to be relieved he sent to Gen. Sickles a staff officer with instructions to explain the position and its importance, and to ask, if troops could not be sent to relieve him, that Gen. S. would send one of his staff to see the ground, and to place troops there on their arrival. He received for reply that Gen. S. would attend to it in due time. No officer or troops came, and after waiting till his patience was exhausted Gen. Geary withdrew and joined his corps. Now, my first orders to Gen. Sickles were to relieve the 12th Corps Division (Geary's) and occupy their position. Here is evidence that he knew the position occupied by Geary's Division, or could have known, and yet failed to occupy it. Furthermore, when he came to my headquarters at about noon and said he did not know where to go, I answered, "Why, you were to relieve the 12th Corps." He said they had no position; they were massed, awaiting events. Then it was I told him his *right* was to be *Hancock's left*, his *left* on *Round Top, which I pointed out*. Now his right was three-quarters of a

*Gen. Meade's recollection on this point seems to be slightly at fault. He did see Gen. Humphreys on the morning he assumed command of the Army of the Potomac at Frederick City, and he at that time expressed his desire of appointing him his chief of staff, but after discussion it was agreed between them that this officer could be of greater service by retaining command of his division in the 3d Corps during the impending battle.—Gen. Humphreys's testimony before Committee on Conduct of War.

†To move from his right upon Gen. Meade's communications.

mile in front of Hancock's left and his left one-quarter of a mile in front of the base of Round Top, leaving that *key-point unoccupied*, which ought to have been occupied by Longstreet before we could get there with the 5th Corps. Sickles's movement practically destroyed his own corps, the 3d, caused a loss of 50 per cent. in the 5th Corps, and very heavily damaged the 2d Corps, as I said before, producing 66 per cent. of the loss of the whole battle, and with what result—driving us back to the position he was ordered to hold originally. These losses of the first and second day affected greatly the efficiency and morale of the Army and prevented my having the audacity in the offensive that I might otherwise have had.

If this is an advantage—to be so crippled in battle without attaining an object—I must confess I cannot see it.

Pardon my writing with so much prolixity, but your generous defence and the clear view you have taken of the battle have led me to wander thus far.

Very truly yours, Geo. G. Meade.

We are in receipt of a letter and memorandum from Mr. James Beale, of Philadelphia, late 12th Mass. Vols. They are introduced by letter from Gen. Sickles, in which he says:

Mr. Beale has shown, that in marching from Emmettsburg, on my own responsibility—and a grave responsibility it was—to help the first corps at Gettysburg, I did a soldierly act, which should at least have silenced misrepresentation, if it failed to elicit praise.

Mr. Beale has likewise shown, that the assertions of Norris and Rosengarten are contradicted by the official records.

Major Rosengarten, in a letter addressed to me on the 24th ultimo, acknowledges his errors. He says: "I have written to Col. Norris, and express to you and to him my regret, that basing my statement on what now turns out to be only a partial exhibit of the evidence on the point at issue, I should have caused so much heart burning and recrimination at the recent Gettysburg Reunion."

Mr. Beale gave the following statement of his inferences from his digest of Sickles's movements:

(g) Sickles moved from Emmettsburg on his own responsibility and without delay.

(h) Meade was loth to let Sickles go, but on finding some troops had been left at Emmettsburg, Meade fully endorsed Sickles. (Sickles really had anticipated Meade's order.)

(k) On the evening of July 1 Meade was twice notified that the left of his line was weak.

Thus it is shown beyond a peradventure that the movements of July 1, until noon, as far as they were controlled by Gen. Meade, did not contemplate any serious engagement of 1st and 11th Corps; that the 3d Corps was operating under direct and positive instructions from Gen. Meade; that the 3d Corps commander was guilty of no delay or postponement on July 1 in coming to the front; that he actually went in advance of his orders; and that even before General Meade's arrival at Gettysburg, he had been twice notified that the left of his line would need special attention.

(Correspondence of the Army and Navy Journal.)

FLEET PASTIMES AT CALLAO.

Callao, Peru, July 14.

I send you a programme of the regatta held here on the 5th of July for men-of-war's boats, given by the U. S. fleet in celebration of the 4th of July. This and the other events were very exciting, and gave ample enjoyment to all who witnessed them. The committee were Capt. J. H. Gillis, Capt. Byron Wilson, and Comdr. Yates Stirling. Sub-committee, Lieut. H. McCrea, Lt. J. A. Norris, Lieut. J. V. B. Bleecker, and Lieut. T. N. Wood, Judges, Lt.-Comdr. C. M. Thomas, Lieut. Rouyer, and Lieut.-Comdr. J. J. Brice. Starters, Lieuts. A. Ward and L. Young. Stakeboat, Naval Cadet G. R. Slocum. The first race was for gigs or whaleboats, distance, two miles with turn; 1st prize, 21 soles; 2d, 14 soles. There were six entries in this event. The gig from the *Hartford* won 1st prize, and that from the *Iroquois* 2d prize. The race for catamarans and balsas, propelled by shovels, (no steering oar) was won by the Chilian man-of-war *Esmeralda*, with the *Fabert* second; there were five entries; the 1st prize was six soles, and the 2d three soles. The 3d race was for cutters; distance, two miles with turn; 1st prize, 36 soles; 2d prize, 18 soles, was won by the second cutter of the *Hartford*; the *Fabert's* 1st cutter winning 2d prize; there were nine entries. 4th race, dinghies (four oars): distance, one mile straight; 1st prize, 15 soles; 2d prize, five soles, was won by the *Hartford*, with the *Iroquois* 2d; five entries. The 5th race was free for all classes of boats, the distance being three miles with two turns, port helm. The prizes were 35 soles to 1st and 15 soles to 2d. The 14-oar barge from the *Hartford* won 1st prize, and the 18-oar cutter from the *Fabert* 2d. The 6th and last race for beaten cutters; distance, two miles with turn; prizes, 20 soles to 1st, 15 to 2d, 12 to 3d, and 10 to 4th, was won by the 4th cutter from the *Hartford*, (10 oars). The 1st cutter from the *O'Higgins*, (12 oars) came in second.

On July 5 the *Hartford* was dressed gaily, officially to a rainbow, and boat flags, signals, pictures, mottoes, etc., used in decorating between the guns, etc. The other vessels were also becomingly decorated.

The first thing on the programme was a "half-hour-go-as-you-please" around the deck; prizes, $15, $10, and $5—the winning man making 4¼ miles, the others close after him. Next came a run over the maintopmast head; prizes, $7 and $5. Time, 1 min. 14 secs. and 1 min. 18 secs. Then came an "obstacle race," which was very amusing, for the runners had to crawl through and climb over all kinds of things in the route. Prizes, $10, $7 and $5. The next was a three-legged race (two men with one leg bound to one of the other man's). Prizes, $5 and $3. Then came a sack race, the usual kind, as on shore, and gave lots of fun. Prizes, $5 and $3. The wind-up was what is called a "spud-race" (hands tied behind, a spoon in the mouth, and a potatoe on the spoon, and in running around the deck the potato is unavoidably dropped, and must be picked up again on the spoon to resume the race, and this part of it causes all the fun). Prizes, $7 and $5. This brought us up to noon; then, after dinner, the regatta came off.

July 12.—Dinghies of the *Iroquois* and *Hartford*, a mile and a half, straightaway, for a purse of $260, was won in 15.03 by the *Iroquois*. The next race was between the *Iroquois's* gig and the *Hartford's* staff-gig, a four-mile straightaway, for a purse of $340. Won in 41 mins. by our boat. Then a race between the second cutters of the *Shenandoah* and *Hartford*, three miles and a turn, for a purse of $280, was won by the *Shenandoah* on a claim of foul at the stakeboat. It was a bitter pill for the *Hartford* boys, as the race was conceded to be theirs in every other respect, and they were reimbursed by her officers and crew. The excitement of the gig race was the most intense I ever saw, for the outside bets were about $4,400. Of course, great preparations had been made, getting men and boats in trim. It was amusing to see a man in sandpapering our boat feeling for the proper degree of smoothness with his *cheek*, his hands being too hard I suppose. They coated the *Hartford's* gig's bottom with something I never saw used before—a mixture of beer and white of egg. It gives a very smooth and hard surface. The excitement at the homestretch was something fearful. Pandemonium was rampant, two-thirds of the ship's company aloft, and at the conclusion of the race a live rooster was thrown from the foretopsail yard and a broom run up to the mast head.

July 13.—Wind-up race. A cutter from the *Iroquois* and *Hartford*, a "three-mile, straightaway," for a purse of $240, won by *Hartford* in 28 mins. 30 secs., beating the *Iroquois* by 1 min. 40 secs. The boats were manned by firemen exclusively. No outside bets on this race. But there was some funny incidents in connection with it. One was the *Iroquois's* were very confident of their men and boat, but having lost all their money on the gig race, they had no money to bet, but they bent on a broom forward, and had partly hoisted it; and at the conclusion of the race our men caught sight of them hauling it down, and the cheers, cat-calls, etc., evoked were something terrific.

(From a Special Telegram to the Pittsburgh Dispatch.)

MR. ROACH TO RESUME.

Plans have been almost completed for a reorganization of the business of John Roach and Sons, under a syndicate, which will fly John Roach's name at its head.

As the *Dolphin* specifications, even down to the last of them, covering the hull, had been complied with in building that boat, and as renewed tests without warrant seemed to be constantly required, Mr. Roach saw a disposition on the part of the new administration to throw the vessel back on his hands, and he made the memorable assignment at a time when he owed no man a dollar which was not amply secured. The engines of the *Atlanta* and *Chicago* have had their dock trials, and have proved entirely satisfactory. They, together with the *Boston*, will be ready for delivery by the assignees about the 1st of October.

Mr. Roach is in impaired health. His life's aim was to build up American commerce to the plane attained by that of the other sea-going powers of the world. The alleged injustice came upon him with crushing effect in his declining years. He is now seeking rest and recuperation at Mount McGregor; but, before leaving for this point, he called his sons and the superintendents of departments to a consultation on the future management of the business. Two or more powerful syndicates are known to have made propositions looking towards acquiring possession of the business and plant.

These overtures to Mr. Roach were presented only in a general way at this consultation. It is known that the propositions of one of these syndicates was accepted. The details have not yet been made known outside of the circle of those immediately interested. Some of the points of minor importance have not yet been settled. It is known, however, that the reorganization contemplates the retention by Mr. Roach of a large interest in the business, and that he shall be retained as the nominal, if not the actual, head.

The matter has progressed so far that overtures have been made to Mr. J. M. Dodge, an eminent mechanical engineer of this city, to go with the new people as superintendent of the entire construction department. He has asked time to consider the proposition. Mr. Dodge is the son of Mary Mapes Dodge, the editor of "St. Nicholas." He is a graduate of Cornell University, and served his time as mechanical engineer in Mr. Roach's practical school. His executive abilities in addition to his professional qualifications make his selection a wise one. He is now in a flourishing business in this city, as a member of a firm of mechanical engineers, and it is a question if the appointment holds out sufficient inducement to justify him in giving up his business interests here.

The syndicate is fast getting into such shape that it will be able to bid on the new cruisers which are soon to be built for the Government. One bid for a new Government cruiser has already been made, in the name of Edward Faron, superintending engineer for John Roach. A bid has been made and the contract closed for an iron steamer for the Mallory line. Work on it will begin as soon as the successful syndicate is in proper shape to take the yard into its own management, out of the hands of Mr. Roach's assignees.

The statement here that Roach and Sons are building a steamer for the Mallory line is correct. It is not true, so far as we can learn, that there is any intention of forming a "syndicate" for carrying on the business of this firm. That at Chester has never passed beyond their control, and their resources are still ample for carrying on their works without seeking outside help. We very much doubt, however, whether Roach and Sons will be found bidding for any more Government work.

NAVAL STRENGTH AND ANNUAL EXPENDITURE OF DIFFERENT COUNTRIES.

Nations.	Total ships	Available ships	Total personnel	Annual expenditure	Population

A CARD FROM MR. HAMERSLY.

To the Editor of the Army and Navy Journal:

Will you oblige me by stating that the "United Service" will hereafter, commencing Aug. 15, 1886, be issued quarterly.

In reply to the letter of Colonel Dodge, U. S. A., published in the Army and Navy Journal, July 31, 1886, I desire to state that I have mailed Col. Dodge and Lieut. Hoyt publisher's receipts for the subscriptions referred to, and I regret extremely the carelessness in this office that caused the delay in attending to the correspondence which Col. Dodge complains of. T. H. S. Hamersly.

New York, Aug. 6, 1886.

Luther Gilbert Mann, Baldwin, Ill.; Robert L. Hamilton, Huttonsville, W. Va., and Joseph S. Hardin, Chester, S. C., were this week designated for examination for admission to the U. S. Military Academy in June next.

THE STATE TROOPS.

THE REORGANIZATION OF THE GUARD.

The abolishment of divisions and the consolidation of the National Guard of New York into four brigades, each commanded by a brigadier general, has absorbed the interest of the troops ever since the publication of the order promulgating the new state of affairs. Like all radical measures it has its opponents. They are most numerous among the ancient element, which openly avows that the foundation of all State troops is show, and among that class who on principle object to every measure from Albany as an interference with their sacred rights and hobbies. Others who approve of the measure say it was too sudden and unexpected, and almost discourteous to the older incumbents of the positions abolished. But among the bulk of the troops and the most progressive and valuable officers the reduction is estimated at its true value, and hailed as a wise provision, as timely as it was necessary. The order was sudden, but that is the nature of things military. It is not customary for a commander to consult with his subordinates before giving commands, and in the centralization of all power in its commander lies the strength of military organization.

The active strength of the National Guard at any time hardly exceeds 10,000 men. To command these there were four major generals and eight brigadier generals, each with an immense staff, with excessive rank, who performed little service except to exhibit themselves on parade for the glorification of their chiefs in the eyes of the non-military public—a source of unnecessary expense, ever-increasing circumlocution, and a continual obstacle in the way of everything tending to a simplification of military business. As a commander who had for years stood at the head of one of the best New York regiments, nobody understood these facts better than Gen. Porter, and his radical action is no matter of surprise to those who knew his views. On the other hand, the sweeping nature of the measure at once relieves him from any imputation as to personal motives or partiality, or that he acted for aught but the best interests of the service. The change can only result in a simplification of work of every description, reduced expenses, increased rapidity in the transaction of business, and a clearer, more effective supervision of each brigade by its commander.

No sensible person will assert that one general officer is not sufficient for 2,500 or 3,000 men. The State will hardly call out its troops for other than riot duty, which is invariably of such a nature as to require each regimental commander to operate independently under instructions from the central seat of power. A call for service in the field would emanate from the General Government, under whose charge would be the entire management, the assignment of troops, commanders, etc. For initial purposes four brigade commanders would be sufficient. For a peace establishment as now exists in New York, compactness, facility of being handled, close supervision of every organization by its general, are necessary to obtain a proper state of discipline and efficiency, without which troops are of no value. The new organization is more likely to produce such result than any previous one, and those who now oppose it will be compelled to acknowledge the correctness of the measure just as they were compelled to recognize the benefits of the reduction of five years ago, the establishment of the State camp, and other innovations of that nature introduced of late.

The reorganization of the line having been accomplished and its propriety acknowledged, attention is naturally attracted towards the staff, and here we find a state of affairs which demands with equal if not with greater force the application of the axe. We find an adjutant-general with the rank of major-general, and about a dozen departments each headed by a brigadier-general, who in turn has a number of assistants with excessive rank, generally colonels. A number of those departments are entirely ornamental. The Chief of Ordnance performs the duties of the Quartermaster's, Subsistence, and Ordnance Departments; hence there is no necessity for a quartermaster and a commissary general. The Pay Department performs little duty outside of the camp, the duties of the Medical and Judge-Advocate Departments are not arduous, the Inspector-General's and the Rifle Departments are probably employed the entire year, but beyond those the other departments are sinecures in the fullest sense of the word. The reduction of the rank of the adjutant-general from major to brigadier-general, that of the heads of the other necessary departments to colonel, and a reduction of their assistants to a corresponding grade customary in the Regular Army, are measures now demanding the immediate attention of the proper authorities. As now constituted the Guard is not only staff topheavy but lopsided, and justice to the line demands immediate action with a view to the restoration of the proper equilibrium.

The rank of the general staff cannot be changed except by the Legislature. Gen. Porter is heartily in favor of the reduction herein proposed, and the matter will be presented to the Legislature next session.

THE COMING BRIGADE COMMANDERS.

With the approaching election of Brigadier-Generals the interest in the subject increases. In New York City both Generals W. G. Ward and Louis Fitzgerald are candidates, but as to the result of the election there is still much doubt. Gen. Fitzgerald is sure of the three votes of the Seventh, and in all probability also of the two of the Eighth. The three votes of the Ninth are doubtful, particularly that of the Colonel, nor is there any certainty of the 11th. It is not believed that the 12th and the 22d will cast their ballots for either of the candidates, but if there should be no other choice, then, as an old commander of the 12th, Gen. Ward would stand the best chance with that regiment. Col. Cavanagh, of the 69th, will hardly be in favor of Gen. Fitzgerald, who may, however, be reasonably certain of receiving the votes of the Lieut.-Colonel and Major. Col. McAlpine, of the 71st, is abroad, the intentions of the Lieut.-Colonel are not known, while the Major, a former 7th regiment man, will probably be in favor of Fitzgerald. The votes of the two battery commanders are uncertain.

In Brooklyn the case rests between Generals McLeer and Ward. The latter is solid with the 23d, but is not the choice of the 47th, and hardly of the 32d. The 13th is doubtful, while the 14th stands like a man for McLeer, whose chances, under the circumstances, seem the most favorable.

This is the situation as we go to press, and, as the facts explain themselves, no comment is necessary.

LAST WEEK OF THE NEW YORK CAMP.

DURING the week, from Aug. 1 to Aug. 7, twelve separate companies, divided into three battalions of four companies, each under the separate command of a field officer, composed the garrison of the camp. The commanders were Lieut. Col. Sam. Welch, of the 65th; Lieut. Col. Heman Dowd and Maj. John J. Riker, both of the 12th. Col. Welch had for his adjutant Capt. G. E. B. Hart, of the 22d; Col. Dowd was assisted in the same capacity by Capt. W. Humphrey, of the 12th, and Maj. Riker by Adjt. J. E. Schermerhorn, of the same regiment. Capt. Hart was adjutant the previous week under Col. Harding. Col. Dowd is a graduate of West Point, while Lieut. Col. Welsh had served with his own regiment in camp in the beginning of the season. It was Maj. Riker's first experiment as an independent commander. All those from the start showed that they meant practical work, and plenty of it. No time was wasted in drilling officers and men in useless and untactical performances as addition to parades and other ceremonies. With remarkably cool and favorable weather there was plenty opportunity for work of the proper kind, and none of the battalion commanders allowed his opportunities to escape.

It is hardly necessary to again repeat the multitude of minor mistakes which were committed on duty of all kind in the beginning of the week. They were so similar to those we have been compelled to point out six weeks in succession that another repetition seems tedious. The two battalions under command of Col. Dowd and Major Riker were frequently consolidated for battalion drill, and no doubt the experienced eye of the commander and his decisive commands and rapid methods proved highly effective in bringing the ideas of the company commanders, which were as various and far apart as the locations of their commands, to a state of harmony necessary for effective work. Col. Welch frequently exercised his command in single rank, which was by some condemned because it created too large a front, while the battalion commander asserted that this was his very object, in order to accustom his temporary subordinates to more extensive formations. There was no harm done either way, and Col. Welch's battalion came out none the worse for it.

The details of the daily work required are well known, and nothing new to be said about that matter beyond the statement that the programme was well adhered to and fully carried out. As was only natural under the circumstances and principles which governed the progress of the camp, the last week proved the best, and the work was more thorough, the instruction more effective, the progress more rapid and complete than during any previous week. This statement is a general one, and refers to each week's duty as a whole. The three commanders proved themselves competent officers, while of Lieut.-Col. Dowd it may be said that he made a particular success of his first opportunity as a National Guard battalion commander. His command doubtless made the greatest progress.

To commanders as well as their staff officers belong the credit of having made the most successful week's work during the season, and the end of the camp justified the fairest hopes of those who made the plans on which it was carried out during the present season.

RESULTS AND LESSONS OF THE N. Y. CAMP.

THE New York camp of 1886, which after a continuation of seven weeks, concluded on Saturday, Aug. 7, was conducted on a system for which there is probably no precedent, but it was none the less successful. There was still much to criticise in every respect, but when the work is compared with that of 1882 and 1883, a degree of improvement became manifest, scarcely anticipated when the camp was first founded. The progress this year may be regarded as especially marked, when it is considered that the troops ordered up were among the most inexperienced in the very qualities required to do the practical work of the encampment in a satisfactory manner.

In taking charge of the camp personally, Adjt. Gen. Porter was guided by various reasons. It was not his desire or choice originally, but the difficulty of making a proper selection for a camp commander, compelled him to take the action he did. This action was by no means intended to imply that the National Guard was destitute of officers with the necessary qualifications to properly conduct the camp; on the contrary there are many, but the difficulty was that among these there was no one who could spare the necessary time. As this year's experiment was still untried, as uniformity of system through the entire seven weeks was an essential requirement, and as the work of the State instructors could only be performed with effect, if backed by the dictum of an officer of rank, there was under the circumstances no alternative but to take charge of the whole himself. In exercising his functions the immediate commanders of the troops were allowed the utmost latitude in their arrangements, provided the general programme of exercises laid down was adhered to, and the principles as to simplicity and the avoidance of show and unmilitary practices were not violated.

The aspect of the camp at first glance at once gave the impression that business and not tomfoolery was its object. This generally put the men on their best behavior from the start, and increased the interest of the officers in their work. The constant exercise of a uniform and rigid, but reasonable system of discipline, is at the bottom of the universal quiet behavior, obedience, soldierly bearing and strict attention to their work on the part of the men. It is safe to assert that no body of troops of this class was ever brought down to such a state of discipline as prevailed in this camp in so brief a period.

This is a matter of more than usual interest, and one reaching beyond the immediate subject of the camp, because it shows the calibre of the material composing the State troops, and demonstrates the ease and rapidity with which they could be moulded into practical soldiers under proper guidance, if emergency should arise. Their lack of knowledge of technical military requirements is a different matter.

To effect satisfactory and lasting results in this respect, the means of previous years have proven inadequate. The introduction this year of the system of general State instructors in the different branches points the way to accomplishing the result more effectually. The whole thing was only an experiment, an entering wedge, but its success has plainly proven that the only means to make the camp valuable is to transform it into one large school of instruction, with competent teachers for every branch. This subject is of great importance, but the perfection of details to make it effective requires time, and, therefore, no time should be lost in preparing the necessary plans. In connection with this subject, it would seem well to state that Col. Phisterer, Lieut. Thurston and Capt. Stacpole did valuable work as instructors in their several branches.

The sanitary condition of the camp, the health of the men, the policing of the ground, the preparation and quality of the food were almost perfect, and reflect equal credit upon all who were connected with their management.

When the punctuality and regularity in the transportation department, especially in moving the separate scattered companies to and from camp, is considered in connection with the constantly necessary issue, transfer, etc., of stores, and with the delicate and arduous duty of regulating the subsistence department, then it becomes simply a matter of justice to say that Gen. Varian, the chief of the supply and transportation departments, and his assistant, Gen. Brownell, are entitled to the highest praise.

It is intended immediately on evacuation of the camp to take up the contemplated improvement of the grounds. Improved drainage is the first requirement, and proper bathing facilities the next. Whether any rocks are blasted away or ravines filled does not matter much, and whether the camp is pitched on the newly acquired ground towards the old rifle range, or left where it is, or pitched over on the east side of the plateau, is of no importance. There is plenty of room under all circumstances.

The omission of rifle practice gave opportunity for attention to other necessary duties, and as Creedmoor offers ample facilities, there is no reason why it should be reintroduced at the camp, besides, it is important to keep up Creedmoor and not to draw away its supporters to a different point.

In summing up the whole, the conclusion is that the right system has been adopted and that there is nothing further required to transform the annual camp into a perfect school of instruction than the perfection of the system.

MILITIA ITEMS.

Col. Clark, on behalf of the active regiment, and Mr. Winchester, on behalf of the veterans, have entered into an agreement which puts an end to the war between the two factions. The terms of the agreement are not known. It is gratifying, however, to know that the disagreeable squabble has come to an end.

A battery of the regular artillery will encamp with the Rhode Island militia at Oakland Beach, in September next.

A board for the examination of officers now holding commissions in the Connecticut National Guard, to consist of Gen. F. E. Camp, Col. W. H. Tubbs, Maj. T. A. Barnes and Capt. W. H. Lee, has been ordered to convene at Camp Smith, Niantic, on Aug. 24 next. To judge from the number of cases before it the board will have a busy time.

MICHIGAN.

IN G. O. No. 18, the Commander-in-Chief expresses his pleasure in having been with the State troops during their encampment. The favorable auspices and pleasant surroundings under which they have been rendezvoused are fully recognized by him. The high standard of personal conduct and military discipline evinced by them generally during the encampment receive his fullest approbation, marred only by allowing too much straggling from camp, which he hopes will be corrected in future for the good reputation of the State. He notices with pleasure the fraternal relations existing in the whole command.

He has witnessed with satisfaction the manly and soldier-like bearing of the officers and men, coupled with their fine exhibit at battalion drill, skilfully performed by the regiments under their respective officers, while the manœuvres and fine display by the brigade under its able commander, General I. C. Smith, and his accomplished staff, have more than met his expectations.

He recognizes the prompt obedience of the officers and men to his orders and their attendance in camp in so large force, and the valuable service as United States Inspector of Brevet Colonel A. C. M. Pennington, Major 4th U. S. Artillery; thanks Brigadier-General Jno. Robertson, Adjutant-General, for the systematic and scrupulously careful manner in which he has managed his department, and repeats that to his care, fidelity, and ability, Michigan is indebted in a large measure for the present high status of its military forces, and Brigadier-General James H. Kidd, Inspector-General, for the very able manner in which he has conducted his department, which is shown in so marked a degree by the appearance of the troops.

He has taken great satisfaction in observing the very complete equipment of the camp and the thoughtful preparations made for the comfort of the command, for which thanks are due to Brigadier-General George A. Hart, Quartermaster-General. The quality of the uniform and its make-up warrants him in saying that it is the most complete yet provided for the troops, the credit of which is largely due to the labors of the Military Board. The attendance of his full staff in camp (which includes the Inspector-General and Quartermaster-General), all of whom distinguished themselves on many a battlefield during the war, and each bearing, as he does, the marks of wounds received in action, is a most satisfactory evidence of their personal attachment to himself, and exhibits a strong interest in the welfare of the troops which is most gratifying to him.

PARAGRAPH 818, UPTON.

To the Editor of the Army and Navy Journal:

CIRCULAR 7, c. s., H. Q. A., calls one's attention to par. 818, Upton. In this, as an intended improvement on previous practice, the about-to-be officers of the guard are required to take their places before they are detailed to them. If they have their places, what is the use of the adjutant reassigning them?

Was not the old system—of letting them group in the vicinity till the command *oo. and n.-c. oo. to the front and centre*, was given—the most logical? They came there to be assigned to command, and to assume the position, preassumes command.

The n.-c. oo. stay with their details till ordered to the front for assignment. If the officers take their tactical position without command, why shouldn't the non-commissioned officers do so?

I have thought this modernism violates a military principle. Were the officers directed to stand on the right, left, or rear of the details—well enough. The tactics do not treat it as a guard till the assignments are made, and why let the officers take a tactical position before their command is organized? It will be observed that the sergeant-major reports "the details" are correct, not the "guard" is correct.

Again, I ask, if the tactics posts them, why should the adjutant come in with his pleonasm on a *fait accompli?*

The reasons against prematurely taking position are multiplied in case of grand-guards: the officers for certain platoons may be a matter only confided to the adjutant before guard mounting, and they need not be assigned tactically. RONREVOG.

CAPTAIN GRANT'S OLD POST.

THE *Overland Monthly* for August contains an article on "Capt. Grant's Old Post, Fort Hamilton," (California,) in which will be found some interesting facts in the ante-bellum career of the late General. Of what is known as "The Grant House" the writer says it "presents a most forlorn and dilapidated appearance; had it sustained a bombardment it could not have suffered more. He says further:

The walls have been denuded of their plaster, the windows smashed, the doors torn from their hinges; nothing but an occasional stud prevents the crazy roof from coming down. The rear of the little domicil is almost buried in a mass of climbing vines, and they have looped and twined their tendrils around gaping doorway and shattered window frame and crumbling roof, as if desirous of concealing the erosion of a quarter of a century beneath their caressing folds. The spacious cottage of the commanding officer is situated at the northwestern corner of the campus, on the very edge of the low plateau upon which the post is situated. "And here," said my conductor, "I have often enjoyed a social evening, when, grouped around the cheerful back log, we listened to the yarn of some old hunter or Indian fighter, while the pleasant faced, silent Captain reclined on the rude camp bed and smiled encouragement on the little group between the puffs of his cigar. One of his leading characteristics of later days, when he was the director of the military energies of the North, was even then conspicuous—his entire freedom from the stiff formalities of the service when off duty."

NEW PUBLICATIONS.

Vermont lays claim to the banner, among our Northern States, as the State which at the outbreak of the War of the Rebellion was the first to respond by proclamation to the call for troops; which was the first to throw up on the soil of Virginia Union entrenchments, and the first to assault a confederate fortification; which had proportionately more killed in battle than any other; which took in battle as large or a larger proportion of colors than any other, and never left one of her own colors in the hands of the enemy. The story of her achievements during the war has been told by the historian appointed by State authority, Col. G. G. Benedict, whose first volume of "Vermont in the Civil War; a history of the part taken by Vermont soldiers and sailors in the War for the Union," has made its appearance from the office of the "Free Press Association," Burlington, Vt. "It is the war record," as the author tells us, "of a small and rural commonwealth, heavily drained of its able-bodied men by emigration, without large towns or floating population, and having thus much less than the average proportion of the material out of which modern armies are made, but which nevertheless sent to the war ten men for every one hundred of its population, and out of a total enrolment of 37,000 men liable to do military duty, stood credited at last with 34,000 volunteers." Not to be hypercritical, we may say in passing that out of just such material are made *modern* armies, which hold to the principle of universal service without exemption. Still, there can be no question that the stalwart sons of Vermont furnished material for soldiers such as no country in the world, and no State of the Union, could excel. It is well that the story of their military achievements should be told, and it is fortunate that the task of recording them should have been committed to so conscientious and painstaking a historian as Col. Benedict, a gentleman favorably known by his previous researches in the same field. The interesting letter to Col. Benedict from Gen. Meade, which appears elsewhere, shows what pains he has been accustomed to take to arrive at the truth. With this volume we have portraits of the War Governor of Vermont, Erastus Fairbanks; the Adjutant General, P. T. Washburn; Maj. Gens. Wm. Farrar Smith and John Sedgwick; Brig. Gens. W. T. H. Brooks and L. A. Grant. A dozen sketches of various battlefields are also given. This volume brings the history of the Vermont troops down to the close of the war; what is to follow does not appear. In concluding it quotes Gen. Wright as saying of the Vermonters: "As marchers they were unsurpassed, and as fighters they were as good as the best, if not a little better." Gen. Sheridan said: "I have never commanded troops in whom I had more confidence than I had in the Vermont troops, and I do not know but I can say that I never commanded troops in whom I had as much confidence as those of this gallant State."

The lecture delivered by Capt. O. E. Michaelis, Ord. Corps, U. S. A., on the applications of electricity to the development of marksmanship, has been reprinted in pamphlet form from the Journal of the Franklin Institute, July, 1886. It is a very interesting contribution to the subject of marksmanship. Capt. Michaelis's conclusion is that "the application of electricity to the determination of initial velocity has reduced the cumbersome ballistic pendulum, an apparatus, to the simple chronograph, a tool; that it has done away with all abstruse calculation, and has substituted therefor the method of the foot rule; that it has made it possible for every powder manufacturer to do his own proving. He can now ascertain the velocity of his powder as easily and surely as the apothecary weighs the ingredients of a prescription. He knows what is required—he can produce it, not once, but always. He can make a constant powder, and upon the uniformity of the powder depends the accuracy of the marksman."

The "United States Military List" for July, 1886, contains the names of officers of the Army, National Guard, Militia Volunteers, and the various military organizations of the several States and Territories: with a complete index, and a gazette of all changes to date of publication; also the station of troops by companies and regiments, list of garrisons, forts, cantonments, etc. Messrs. J. H. Soulé and Co., Washington, publishers.

We have received a copy of the song book of the Commandery of the State of Pennsylvania, of the M. O. L. L., U. S. It contains the songs with which the gay and festive "sojers," the Loyal Legioneers, enliven the hours which they devote to sociability, and forget for a time the smart of their wounds and the hardships they underwent in the cause of a country too prone to forget the services they have rendered.

Military Order of the Loyal Legion.

At a meeting of the District of Columbia Commandery held July 7, the following were elected Companions: Gen. E. D. Townsend, U. S. A.; Major T. J. Eckerson, U. S. A.; General M. P. Small, U. S. A.; Major C. A. Appel and Capt. A. Capron, U. S. V. The total membership is now 356, and the Commandery is in a very prosperous condition.

ANSWERS TO CORRESPONDENTS.

B.—You stand No. 30 on Commissary Sergeant list.

A. R.—You stand No. 31 on Commissary Sergeant list.

C.—We sent you, August 10, a copy of the order asked for.

J. B. asks: Did the State of Ohio ever award either badge or medal to the veterans of volunteers of that State? Ans.—No.

Hancock.—If the disability you mention is equivalent to total loss of arm, you will be entitled to $30 per month under the new law.

G. C. M.—Your question is vague, but we infer from it that under the circumstances the man *would* be amenable to trial for his desertion.

Taps.—There will be a vacancy at the Naval Academy for the Sixth Michigan District in 1891; at West Point the Fifth Michigan District is now vacant.

C. W. asks: What company of the 14th Infantry was stationed at Fort Bowie, Ariz., in 1868? Ans.—Co. G, 32d Inf., was at Bowie in 1868. Under the act of July 23, 1866, the 32d Infantry was formed from the 3d Battalion of the 14th Infantry.

Clinton asks: What became of the U. S. S. *Nipsic*? Ans.—She sailed from Montevideo, Uruguay, March 7, 1886, for New York, where she arrived May 22, after a passage of seventy-six days, being delayed by light winds and calms. She was placed out of commission June 10, 1886.

T. B. B.—Is it Fort or Fortress Monroe in Virginia, and what is the difference between a Fort and a Fortress? Ans.—Fort Monroe is the official designation. Fort and Fortress are used interchangeably, though the word "fortress" is applied more correctly to a fortified city or town, and "fort" to a single work of defence.

F. R. asks: Does an application for a non commissioned staff appointment, such as Ordnance Sergeant, stand good in the A. G. O., when a man leaves the Service and returns after an absence of a year and then gets appointed a Sergeant in a company again? Ans.—A new application will be necessary, but your service previous to leaving the Army can be counted.

P.—Senate Bill 119, for the increase of pay of 1st and 2d Class Hospital Stewards has *not* yet passed the House. It seems to be the impression that it will pass next session. The increase of pay will commence from the date the bill becomes a law. The appropriation for the Pay Department for the fiscal year 1886-87 does not include money for extra duty pay to enlisted men when employed as cooks and nurses in hospitals. If it was an oversight; a deficiency bill at next session may set the matter straight.

W. W. asks: 1. In the formation of a battalion do the markers present arms, or do they stand at carry? and do the right and left general guides on successive formation present or stand at carry? Ans.—If the markers carry guns they present, if they carry flags they do not. The right and left general guides present.

2. In company drill is it necessary to dress the line every time it is halted? Ans.—Tactics tell you all about it.

Tyro.—1. To bring a company marching in line to the rear on the command to the rear march to march to the original front, the command to the rear march is repeated.

2. While a company is in column of fours, and in motion, is it proper to give it the commands: 1. To the rear; 2. March; or 1. By the left (or right) flank; 2. March? Ans.—The commands are not prescribed in the school of the company, and on this account they may be objected to. They are, however, quite practicable, may become necessary under certain circumstances, and it is customary to execute them. We see no objection to their execution.

THE MESS.

Why is an old war horse like a summer hotel keeper? Because he is a famous charger.

Captain—"Sgt. Jones reports that you were drunk again last night. What excuse have you this time?" Private—"Well, Captain, I saw fellows from all the commands whooping her up at the sutler's, and not wishing 'em to think our company was anything mean, I went in for *esprit de corps*."—*Lowell Citizen.*

On the excursion to Bay Ridge yesterday a young man appeared on the train somewhat under the influence of liquor and very talkative. "My, my," said an old lady across the car, "what makes a man do so?" "Beg pardon, madam," he said, catching her remark, "but, you see, Congress failed to pass the Fortification Bill and the people have got to fortify themselves."—*Critic.*

Miss Emily—"Where is your regiment at present, Mr. Young?" Mr. Young—"We are still in *statu quo*, I'm sorry to say." Miss Emily—"Oh, indeed! is that far from Bar Harbor?"

One of the most curious of French duels was a meeting which took place between a cavalry officer and a senator. The senator had choice of weapons, and in a most chivalrous spirit, although he had never been on a horse, elected to fight with sabres on horseback. The combat took place, and was brought to an abrupt termination by the cavalry officer tumbling off his charger. It is only fair to his memory to relate that the accident was due to the fact that when standing up in his stirrups to smite his antagonist, one of the leathers broke, and over he went.

John Brown, Queen Victoria's body-guard, as he was called, made a maid of honor very angry once by saying: "Hoot toot, you are just the woman I have been hunting for. Her Majesty commands that you present appearance." The maid objected to the familiarity of John in calling her "a woman," and she went to the Queen and complained of John's rudeness. Victoria very coolly replied by asking her if she was not a woman, pray what was she?

We commend the following to the much-misrepresented Maj. McKee, who has fallen a victim to that love of a joke which makes him one of the pleasantest of companions:

Mr. Chauncey M. Depew, the railroad president and lawyer, was speaking recently of the trip he had made abroad in company with Gen. Horace Porter and the Hon. Daniel Dougherty. These three men are probably the best known story tellers in the country, and their fame as after-dinner speakers is more than continental. "We were the guests of a well-known London club," said Mr. Depew, "shortly after we reached London, and were treated to a very nice dinner. When the speechmaking began, Gen. Porter led off, and I followed. I began with an apology, saying that Gen. Porter had stolen my best stories, and that Mr. Dougherty's stories were so bad that I would leave all of them for him to tell. Then I looked around, and every Englishman in the room was sitting as solemn and unmoved as a marble statue. It was a dreadfully wet blanket to throw over a man who was trying to be entertaining, but I got through, somehow. Gen. Porter had said that he arrived in England by the Lane Route, and that he had found it very pleasant to see the trees growing along the lane, and to hear the birds singing in the branches. That, too, was received by the Englishmen in profound silence. When the affair was over we went after our hats and coats, and I heard a man behind a cloak screen say: 'Dayvilish queer fellahs, those Americans, don't you know? Stealing stories from each other! Did you ever hear of such venality—such breach of confidence?' 'Yes,' said another, 'but did you hear what that fellow said about the Lane Route? Why, that man is the most surprising liar I ever saw. Do you know, I've been to America and back by the Lane Route myself, and I do assure you, gentlemen, that you won't find so much as a shrub growing anywhere between the two continents. Trees, indeed! Really, the Americans are a dreadfully unprincipled set of people.'"

EXECUTION OF DESERTERS IN CUBA.

"El desertar!" "El desertar!" were the low-toned ejaculations I heard all about me one morning in the cabin of the ferryboat *Edoyard Fesser* as it left the Regla side for the two-mile trip across Havana bay to the city. The cabin was well filled, and in a moment there came fussing and fuming through the narrow passage to the forward cabin a Spanish sergeant and a guard having in charge a man of most pitiful appearance. I made room quickly, so that two seats were vacant near me, in which the guard and his prisoner sat, the latter next me, while the sergeant, bearing a paper with a dangling seal, strode forward a bit, pompous with the importance of his mission and charge.

I knew well enough what it all meant, having once been a soldier myself, but I did not catch the full import of the brutal celerity of Spanish military revenge until the guard—on closing a flippant recital to a passenger next him to the effect that the man had deserted from the forces at Moro Castle some weeks before, after a tremendous flogging for some slight infraction of discipline, had got as far as the Jarucho mountains where he had eluded pursuit for some time until finally run down by bloodhounds—remarked airily: "Ah, yes. He will really not even need breakfast again. The consejo de guerra (court-martial) is already awaiting his arrival.

This deserter was but a boy. He had a fair face, too, round, almost boyish, even through the hunted look that had made him an old man in terror and desperate effort during those few weeks in the chapparal. His feet were partly bound with rags and bark and thongs of the ribbon tree. He was bareheaded, his hair tangled and knotty, and in one place a sabre cut was still open and bleeding. But he sat there with his hands clinched and his face like a piece of marble begrimed with mud.

The deserter looked at Moro as with an awful fascination. Then, as if beyond it and what he knew was waiting for him there, the poor fellow's eyes seemed strained to some point far, far away. Ah, his frantic soul vaulted the hated walls to old Castile, mayhap to his own peasant home, to the mother, the sisters, to a peasant girl's thatched-roof home by the vineyards, and, brave as he was trying to be, his whole frame writhed, his breast heaved and surged and, though he clinched his hands tighter and looked old Moro squarely in the face, his blue eyes filled and filled again with tears that scalded their way through the chapparal filth on his face like torrents. A dozen schemes for rescue shot through my brain. The sight and thoughts sickened me. I could scarcely remain in that cabin nor the pity this man roused in me.

Through the clatter and clamor and crowds the deserter was shoved and sabre-prodded to the plaza de la San Carlos; hurried into a victoria, alongside which were two mounted guardas, and driven rapidly away. I could not work that day, and wandered along the

ROYAL BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum or phosphate powders. *Sold only in cans.* Royal Baking Powder Co., 106 Wall st., New York.

walls of La Punta, restless, heart-sick and with the white face of that desperate life ever before me. At 4 o'clock, just across the narrow harbor entrance, were heard some ominous drum beats. On the little plaza just over the sea, on the heights at Moro, there were movements of small squads of soldiery. We could see all this plainly from La Punta. I feared what it meant, could not bear it, and hurried away. Just as I reached the old Boquete there was a sound of musketry at Moro. I looked across the channel and saw the smoke from their pieces well nigh enfolding them all. But I saw through and through that cloud one face sealed in eternal rest, when some old fish wives on the Boquete walls near, crossing themselves as if it were an old habit, and for like occasions, lazily muttered: "El desertar!" "El desertar!"—*Correspondence Chicago News.*

FRENCH FENCING SCHOOLS.

A CORRESPONDENT of the New York *Times* describes the schools and clubs in France devoted to instruction in the national sport of fencing, which are too numerous to mention. He says: "The French Army takes very seriously what is called swordsmanship and has an elaborate system for the gradual selection of the best fencers among the different regiments and their further development into the prizemen, who instruct others in their turn, when they have become Prévôts or maitres d'armes. The centre of this system is the military school at Fontenay-sous-Bois, near Vincennes, under the charge of Capt. Dérué, otherwise called the Ecole d'Escrime de Joinville-le-Pont. The work goes on continuously morning and afternoon in the cabin-shaped salles d'armes under the eyes of the captain and four adjutants, who themselves have given proofs of extraordinary proficiency and won their places on the merits of their swordsmanship. As duelling is not only tolerated in the French Army, but insisted upon whenever there seems to be sufficient reason for a fight, the regimental master-at-arms has something more interesting from time to time than the functions of teacher. The soldiers do not always long to fight each other when the time comes, and I was given a most ludicrous description of the panic of two quarrelsome fellows when they found themselves on the field, stripped to the waist, the swords being measured and the regimental doctor stationed close at hand. They had to be boosted up to within touching distance and kept there by main force till one got a scratch. The army school is naturally the main source whence issue into private life the many teachers, prévôts, and maitres d'armes who are to be found in Paris, in other French towns, and, indeed, all the world over. It is something like a college. Most of the eminent Paris fencers are graduates of the army school. The art of the sword, far from decreasing since the perfection of pistols, has made great strides in France during the last quarter of a century, and the clubs devoted to it have multiplied. The Italian system of binding the hand to the sword is never used, but now and then you see a man using the cord that is meant to keep the sword from falling completely to the ground if the grip is lost. The foil, in ordinary scrimmages here, is often struck from the grasp. In Paris and at this army school the usual practice is with a very lightly held foil; the guard is rather low than high. Amateurs are very apt to wear the more convenient knee tights and long stockings since the introduction of bicycles and lawn tennis, but linen trousers are the rule at the army school and with the professors in town. Linen jackets are taking the place of leather among the amateurs, apparently in imitation of the military fencers. The hold that fencing has taken in the United States and Canada of late must excuse the length of this letter and the particulars into which I have gone; those who have practiced with the foils ever so little may be glad to know the state of the game in military and civil circles and enjoy a sketch, however slight, of the establishment which does most to keep alive the practical part of the noblest art of self-defence."

ENGLISH ORDNANCE OFFICIALS.

A DESPATCH of Aug. 7, from London, says: "The Sir William Armstrong Arms Manufacturing Company is resorting to extreme measures to estop the military newspaper exposures of the company's alleged corruption of government officials to secure contracts for the supply of ordnance. Recently the company applied to the Queen's Bench for an injunction to restrain Captain Armit from continuing to publish in the *Admiralty and Foot Guards Gazette*, as he has been doing every week, fresh allegations of corruption of ordnance officials by the Armstrongs pending the result of the action for libel brought by the company against the captain for his original allegation of corruption. In the succeeding exposures Captain Armit has described in detail alleged cases of the grossest character, charging several distinguished personages with corruption and conspiracy, and with having formed among themselves a ring for systematic robbery of the government. The Court of Queen's Bench has just rendered its decision upon the petition for injunction. The court refuses to grant the injunction, and bases the refusal upon the ground that the alleged libels fall within the class of 'privileged communications.' 'If these libels are true,' says the court, 'it is of the utmost importance that the country should be made aware of the knowledge they convey.' Captain Armit's object, it is believed, is to force the government to grant a royal commission of inquiry into his charges."

FOREIGN ITEMS.

ENGINEERS have been sent to Kertch by the Russian Government to survey and ascertain the depth of the harbor. It is intended to reconstruct the ancient Genoese mole and to deepen the basin so as to bring it up to the town,

DESPATCHES from Constantinople describe the formation of an army corps of 48,000 men in Macedonia as due to the recent language of M. Tricoupis regarding Greek claims, and to the efforts of Russian emissaries to foment a rebellion in Macedonia.

CAVALRY regiments in the German Army are being carefully drilled in the art of swimming their horses across rivers. The feat is said to be performed with the utmost precision and rapidity, whole regiments crossing and recrossing in an astonishingly short time.

THE Servian Government have just published an official list of the casualties suffered by the Servian Army in the late war with Bulgaria, viz.: Killed, 44 officers, 61 non-commissioned officers, and 669 men. Wounded—97 officers, 118 non commissioned officers, and 4,055 men. Total casualties, 5,314.

ANOTHER British steamer, the *Hok-Canton*, has been captured by the Atchinese pirates, her master, engineer, and others killed, the crew and passengers and master's wife taken prisoners, and the ship looted. The Dutch have sent troops to demand and exact reparation, but the Dutch seem powerless in those regions.

DURING the recent balloon voyage of Messrs. L'Hoste and Margot, between Cherbourg and London, M. L'Hoste made some interesting experiments to determine the feasibility of using balloons for war purposes. The aeronauts manœuvred while passing over ships, and threw down unloaded torpedoes, which, if charged with dynamite, would have played sad havoc, for the aim was almost uniformly successful. The result seems to establish the importance of the balloon in future warfare.

Horsford's Acid Phosphate
IN SICK HEADACHE.

Illustrated pamphlet in *sealed envelope* mailed free, by addressing VOLTAIC BELT CO., Marshall, Mich.

LORD GEORGE HAMILTON is once more the First Lord of the English Admiralty and Mr. W. H. Smith the Secretary for War.

THE recent meeting of the Emperors of Germany and Austria at Gastein and the protracted conferences of Bismarck and Kalnoky are regarded as omens of peace, and indicate, it is thought, that the alliance between Germany and Austria is to continue, and is to be made stronger.

GENERAL MIDDLETON, of Canada, has gone to British Columbia to arrange for the fortification of Vancouver and other points in that province. An effort is making to man these forts with regular troops from the British Army now on the reserve list. The War Office, however, objects to their leaving England for any point where they may not be available if required for immediate service.

THE twentieth anniversary of the battle of Lissa, in which the Austrian fleet under Admiral Tegethoff, defeated the Italian fleet under Admiral Persano, occurred July 20. A bronze statue of Admiral Tegethoff, somewhat resembling that of Nelson in Trafalgar Square, was to have been unveiled in Vienna on the anniversary of his victory, but that nothing should be done to mar the good feeling existing between the Austrians and Italians at the present time, the ceremony has been deferred until the end of September.

THE great fault which can be brought against General Boulanger—and for this he will be judged severely by those who pass sentence on him now or hereafter—is that he has introduced politics into the army, intentionally, and with a persistence which it is difficult to excuse. This is the greatest misfortune which could befall France—a misfortune which she had hitherto escaped, and to which she is now on the point of being condemned. We have now to reckon with this new factor which Gen. Boulanger has introduced into the public affairs of France, and perhaps even of Europe. Lastly, it must be remembered that when a man so ambitious as General Boulanger is, and in command of the army of a great country, is ridiculed—as he has been by some newspapers—as "a Bonaparte without victories," he is incited to desire to complete the resemblance.—*London Times.*

THE Russian torpedo cruiser *Lieut. Ilgin* was launched at St. Petersburg on July 24.

THE British warship *Vulture*, three guns, built at Sheerness about 18 years ago, and recently sold out of the Royal Navy as unfit for active service, was the last of the wooden gun vessels built before the introduction of composite shipbuilding, and has had a considerable amount of foreign service.

THE fortification works for the defence of the port and city of Odessa have been commenced. A chain of five powerful batteries will stretch from the harbor mouth to Cape Fountain, a distance of 10 miles, dominating the roads. A series of prominent headlands at various elevations afford favorable and commanding positions. Some 60 pieces of heavy cannon in all will be mounted on these batteries, but the plans for their full equipment are not yet perfected.

SPEAKING of the recent review in Paris, a German paper writes: "I saw the French Army march past, and I must say the impression made was most favorable. One must not draw conclusions from a comparison between the two armies. A German review differs from a French review in solidity, and the rigidity which characterizes the march of German lines has not yet been obtained by the French Army, and will probably never be obtained. The Russians resemble the Germans in this matter more than any other nation, and this portion of military instruction does not appear suited to the French method. Comparing a German with a French review, it is certain that Germany still possesses a superiority; but if we view the matter in another light and if we compare the French Army of to-day with what it was formerly, one must be blind not to see what an amount of work has been done, and what progress has been recently made in France."

R. W. TANSILL & Co., Chicago, are now making especially for the Officers of the Army and Navy a new and very fine Havana hand-made cigar, known as "TANSILL'S REINA." They are put up in beautiful packages of 25 cigars, each cigar banded. They come in three sizes, 4¼, 4½, and 4¾, inches, while their moderate cost, viz. $65, $70, and $75 per thousand brings them within the reach of the entire Service.

BENSON'S CAPCINE PLASTERS are well known in the Army and Navy as the most convenient and effective external remedy. For sprains, coughs, rheumatism, sciatica, and all ailments arising from exposure they excel every other application, giving relief and cure in a few hours. Avoid worthless imitations under similar names. Seabury and Johnson, Chemists, New York.

BIRTHS.

BUCK.—At Newport, Ky., August 2, to the wife of Lieut. W. L. Buck, 13th U. S. Infantry, a daughter.

MARRIED.

BULLER—BLAIR.—At London, Eng., July 20, the Hon. WALTER YARDE BULLER, brother of Lord Churston, and LEILAH KIRKHAM BLAIR, widow of D. Boyle Blair, and eldest daughter of Gen. R. W. Kirkham, formerly of the U. S. Army.

DIED.

Drawing and Painting, from the first beginning to the finished artist.

OPEN DAILY DURING the entire year.

NEW ENGLAND MUTUAL Life Insurance Company, OF BOSTON, Mass.

Assets, ------ $17,846,546.65
Liabilities, --- 15,238,761.16
Total Surplus, - $2,607,785.49

This Company insures the lives of Officers of the Army and Navy without extra premium, except when actually engaged in warfare, which premium if not paid at the assumption of the extra risk *will not invalidate the policy*, but will be a lien upon it, and also gives liberty of residence and travel, on service, in all countries, at all seasons of the year, without extra charge.

Special attention is called to the LIFE RATE ENDOWMENT policy, which combines insurance at low cost with an investment at a fair rate of interest, and at the same rate of premium formerly charged for life policies. Every policy participates in the *annual* distribution of surplus, and has endorsed upon it the cash surrender and paid up insurance values provided by Massachusetts laws.

ARMY AND NAVY JOURNAL.

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOLUME XXIV.—NUMBER 4.
WHOLE NUMBER 1200.

NEW YORK, SATURDAY, AUGUST 21, 1886.

SIX DOLLARS PER YEAR.
SINGLE COPIES, FIFTEEN CENTS

Publication Office, 240 Broadway, N. Y.

ARTILLERY regimental commanders, under G. O. 86 of 1884, are commencing to send in their recommendations for light battery commanders for the four years commencing Jan. 1, 1887. We shall announce the changes hereafter.

THE West Point graduates of 1886 are generally availing themselves of the full amount of leave authorized by the Secretary of War, and will report for duty with their respective companies and regiments about the middle of September.

WE notice, in recent orders, a Court-martial case where a soldier was tried for violating a solemn promise, given as a condition of his re-enlistment, that he would abstain thereafter from certain offences which seemed during his previous term to have become chronic with him. We merely refer to the case as many are not in favor of "conditions" of the kind referred to, nor, indeed, of any kind, where discipline is involved.

CHIEF ENGINEER HARRIS, of the Naval Bureau of Steam Engineering, assisted by Passed Assistant Engineer MATTICE, is busily engaged in perfecting the specifications for the new additions which are to be made to our Navy. Of necessity, these specifications are drawn with much care, and it is expected that few, if any, changes will be found necessary in them while being developed into the combinations of iron, steel, and brass, called the "Modern Marine Engine."

MAJOR DEWEY, as Chief of the Back Pay and Bounty Division of the Paymaster-General's Office, will have to pay about 12,000 claims, for which provision was made in the last General Deficiency bill. They are being received at the rate of about 200 a day and will be paid in the order of their receipt, but not so rapidly as received, only one clerk being engaged upon the work. In a few days, however, extra clerks will be put on and an effort made to dispose of at least a hundred claims a day.

IT is an evidence of the rapid progress of national homogeneity when we read that "General SAIGO, commander-in-chief of the Japanese Navy, is on a tour of observation in this country." And if further evidence were needed it would be found in the fact that General SAIGO is accompanied by Lieutenant SAITO, Captain SHIBOYAMA, Lieutenants FUNAKI, YOSKIN and HIDAKA; also Engineer HOVADA and Paymaster KATASKA. Veritably the world is progressing at a rapid rate. We welcome Japan to the community of nations, and hope that the day is far distant when any other than the most pleasant relations are maintained between our Asiatic friends and the people of the United States. They are our nearest neighbors on the West, and we trust that our intercourse with them may continue to grow more intimate and cordial.

A CORRESPONDENT, referring to a Court-martial case in which a soldier, being "sick in quarters," left the garrison, got drunk, etc., asks our opinion of the regulation which permits medical officers to so dispose of men, instead of admitting them to the hospital. We presume the regulation in question was established at a time when the post hospitals could not accommodate all the sick, but there are few posts, we imagine, without full accommodation in this respect. In our opinion, therefore, the regulation could well be amended so as to permit two methods of disposition of men reporting at sick call, namely, those undoubtedly sick to be admitted as patients, and those slightly indisposed, or suspected of merely coming to hospital for a rest, placed on observation for the day and in the evening, if found apparently well, returned to their barrack rooms and to duty.

THE President neglected to appoint a Surgeon-General before his departure, for the reason that his time was so continually occupied by other important matters during the closing days of the session of Congress that he did not have time to consider the subject carefully. In making Army appointments heretofore, he has carefully gone over in person all the papers of the many applicants and looked into their respective records, for the purpose of determining for himself the best selection to make. It is presumed that he did not care to make the Surgeon-Generalship an exception to the rule, and, therefore, postponed action until his return. Another important matter which will probably demand the attention of the President before Congress again assembles is the desirability of putting an end to the anomalous condition of affairs in the office of the Judge Advocate General of the Army. As yet, however, nothing has been done in this matter.

SECRETARY WHITNEY intends to carry out the policy of his predecessors in regard to sending officers abroad for a course in advanced sciences. Assistant Naval Constructors JOSEPH H. LINNARD and JOSEPH J. WOODWARD have completed their three years' tour at the Paris Polytechnic School and will shortly be ordered to return home. Two other young officers will be ordered in a few days to the same school. Ensign CHARLES H. HEWES, who stands at the head of the list of this year's graduates of the Naval Academy, will be one of them. The other has been selected but his name cannot be ascertained at this time. There will be no details to the Royal Naval College at Greenwich this year, for the reason that Ensigns SAMUEL W. ARMISTEAD and DAVID W. TAYLOR have still another year to serve there. The latter has just been appointed an Assistant Naval Constructor. It is understood that Ensign HEWES will also receive a commission as Assistant Constructor.

THE valuable and exhaustive report of Naval Constructor PHILIP HICHBORN, U. S. Navy, on European Dockyards, published in accordance with a resolution of Congress, has just been issued by the Navy Department. It discusses with great clearness the subject of national dockyards and British private yards, torpedo boats, details of the fitting of vessels, tools and shipyard appliances, iron and steel works, etc., etc. The subject of national dockyards is extensively set forth by numerous plans and well executed drawings, and the description of modern tools and shipyards appliances cannot but be instructive to our own shipbuilders. The drawings of the latest French and English armored ships are very complete and perfect in every detail. Constructor HICHBORN'S conclusions as to the method and progress of modern warship construction as well as the money consideration necessary to be accounted for in the production of a warship that will combine seaworthiness, high speed, manœuvring qualities, coal endurance, offensive and defensive power, are well considered and deserving of careful thought by those whose duty it is to decide the types and project the plans of new warships for our Navy.

COMMODORE D. L. BRAINE, U. S. N., before his departure for the South Atlantic Station, received the appointment of acting rear admiral. Commodore BRAINE retires on May 18, 1891, consequently he is but fifty-seven years of age; in these piping times of peace quite a youthful commander of a squadron. Still, the Commodore is not so youthful as to be entirely without experience. He was in the Home Squadron during the Mexican War; served with honor during the civil war, and commanded the *Monticello* in the first naval engagement of that war, the attack on Sewell Point Battery. He was in the attacks on Fort Fisher, and also in the attacks upon Fort Anderson and the forts on Cape Fear River. He realized LINCOLN'S saying that his gunboats could go wherever the ground was a little damp by trying conclusions with two regiments of confederate infantry, and rescuing the 20th Indiana Regiment which was surrounded by the enemy. Admiral BRAINE, as we may now call him, received his appointment as midshipman in 1846, his commission as lieutenant in 1858, as lieutenant commander in 1862, as commander in 1866, as captain in 1874 and his promotion to commodore last year. We know of but one objection to his selection for the command of a station, and that is that it takes him away from the important duty in connection with our auxiliary Navy. His place has been well filled, however, by the appointment of Captain HENRY ERBEN to the vacancy.

THE accidental capture by a French peasant, near Nevers, of a carrier pigeon marked with Prussian insignia, and carrying a cipher despatch, has led to an investigation by the French authorities, one of the results being the alleged discovery of a number of pigeon-houses and an organized scheme of pigeon communication, at Reims, kept up by the German government. By way of compensation for this invasion of France, it seems that Germany has to keep a sharp surveyance of its own strong places, Lieut. HARTUNG, an officer of engineers, having been arrested through the information of his deserted mistress, on charges of selling to foreign emissaries plans of the fortifications of Magdebourg, one of the most formidable fortresses in Europe. This is the third discovery of a similar treachery on the part of German officers. Even Italy seems not to be exempt from the spying policy of her neighbors, the popular feeling in Rome being much excited by the arrest of a French journalist, M. CHARLES DES DORRIDES, and two Italians, LIONEL and VICTOR VECCHI, one a foreman at the Arsenal at Spezia, and the other professor at the naval technical institution of Leghorn. On the 27th ult. these parties were brought into court, the brothers VECCHI on the charge of selling to the Frenchman plans of Italian war ships and other documents, and DORRIDES accused of having organized a system of espionage of government secrets in connection with them. DORRIDES admitted relations by letters with the brothers, and confessed to having received from them information attainable by any military attaché, but would not name the person to whom he had transmitted his papers and intelligence. The court adjourned pending the arrival of VAN ESSE, the accuser and principal witness. At its second session a verdict of not proven was reached.

PERSONAL ITEMS.

CAPTAIN D. M. SCOTT, U. S. A., is a guest at the Ocean House, Long Branch, N. J.

INSPECTOR-GENERAL A. BAIRD, U. S. A., is visiting General J. B. Fry at Newport, R. I.

LIEUTENANT J. D. MANN, 7th Cavalry, has joined at Fort Buford, D. T., for temporary duty.

MAJOR E. B. BEAUMONT, 4th Cavalry, has rejoined at Fort Bowie from a trip to San Francisco.

CHAPLAIN W. M. POSTLETHWAITE, U. S. A., of West Point, is visiting friends at Newport, R. I.

GENERAL RUFUS SAXTON, U. S. A., and Mrs. Saxton are spending a few weeks at Cresson Springs, Pa.

MAJOR S. C. VEDDER, 19th U. S. Infantry, lately in Virginia, has gone to Schenectady on a visit to his sister.

LIEUTENANT H. DE H. WAITE, 5th U. S. Cavalry, left Fort Monroe, Va., early in the week on a short vacation.

CAPTAIN J. E. GREER, U. S. A., has returned with his family to Fort Leavenworth, Kas., from Poncha Springs, Col.

COLONEL H. B. BURNHAM, U. S. A., will start for San Francisco next week to report to Major-General Howard for duty.

CAPTAIN EDWARD FIELD, 4th U. S. Artillery, on leave from Fort Adams, has been visiting friends at Independence, West Va.

MAJOR-GENERAL D. E. SICKLES, U. S. A., is a recent contributor to the *World's* fund for a testimonial to Mr. Gladstone.

SURGEON PASSMORE MIDDLETON, U. S. A., is visiting at Bradford, Pa., and expects to go to St. Augustine for duty early in September.

CAPTAIN L. R. STILLÉ, 23d U. S. Infantry, leaves Fort Brady, Mich., early next week to spend a few months with relatives in Philadelphia.

LIEUTENANT GEORGE ANDREWS, 25th Infantry, has succeeded to the adjutancy of the regiment, vice Captain D. B. Wilson, lately promoted.

CAPTAIN E. B. MOSELEY, Assistant Surgeon, U. S. Army, a good shot, will compete for a place on the Department of the Columbia rifle team.

SURGEON W. S. TREMAINE, U. S. A., who has been in Buffalo for a long time past on sick leave, has received a further extension of six months.

MAJOR GENERAL J. M. SCHOFIELD, U. S. A., is having several much needed improvements and additions made to his quarters at Governor's Island.

LIEUTENANT-GENERAL SHERIDAN and Colonel Sheridan returned this week to Washington from their annual visit to their old mother at Somerset, O.

CAPTAIN CYRUS ROBERTS, 17th U. S. Infantry, after visits to old friends in Omaha and elsewhere, has joined his company at Fort D. A. Russell, Wyo.

LIEUTENANT J. P. WISSER, 1st U. S. Artillery, relinquished duty on Gen. Gibbon's staff, August 5, and has left for the East to join at West Point Aug. 28.

LIEUTENANT R. F. BATES, A. D. C., has been acting as Adjutant-General of the Department of Dakota during the temporary absence of General Thos. M. Vincent.

GENERAL SHERMAN named St. Louis as the city for the next national encampment of the G. A. R., and St. Louis it was notwithstanding considerable opposition.

AN officer at one of the largest of our Western post writes: "I observe how well your issues are handled and congratulate you. The JOURNAL is well liked at this post."

LIEUTENANT A. G. TASSIN, 12th U. S. Inf., after a pleasant tour of duty at Fort Monroe, Va., has joined Co. A, of his regiment, at Madison Barracks, Sackett's Harbor, N. Y.

LIEUTENANT A. W. VOGDES, 5th U. S. Art., left New York City on Wednesday for Buffalo to attend the sessions of the American Association for the Advancement of Science.

GENERAL H. L. ABBOT, U. S. A., will preside over a Board to meet at Sault Ste. Marie, Mich., early in September, to select the site for the new post of Fort Brady to be built there.

MAJOR A. B. CAREY, Paymaster, U. S. A., who is in Alaska on leave from San Francisco, will call at Vancouver Barracks on his way home and report to Gen. Gibbon for temporary duty.

ASSISTANT SURGEON C. F. MASON, U. S. A., lately appointed, will continue on duty at Plattsburg Barracks, N. Y., where he has been for some time past stationed as Acting Assistant Surgeon.

LIEUTENANT C. A. CURTIS, U. S. Army, retired, who has resided for some time past at Gainesville, Fla., has been officially detailed as Professor of Military Science and Tactics at the East Florida Seminary.

ANNOUNCEMENT is made of the marriage in September of Lieut. Henry E. Waterman, Corps of Engineers, U. S. A., to Miss Clitz, daughter of Rear Admiral J. M. B. Clitz, U. S. N., and niece of Gen. H. B. Clitz, U. S. A.

COLONEL GUY V. HENRY, U. S. A., Inspector of Rifle Practice, took station at the Bellevue Rifle Range this week and will remain there until the rifle competitions of the Department of the Platte are completed.

ANNOUNCEMENT is made of the approaching marriage of Lieut. C. H. Cochran, 7th U. S. Inf., to Miss Anna Granger, of Zanesville, Ohio. Miss Granger is a relative of Gen. R. S. Granger, U. S. A., and of the late Gen. Gordon Granger.

LIEUTENANT J. S. PETTIT, 1st Inf., lately in Arizona, has joined his company at Benicia Barracks, Cal. His marriage to Miss Bessie Sharp, daughter of Major Alex. Sharp, Paymaster, U. S. A., is announced as an impending event.

COLONEL W. B. ROYALL, 4th Cavalry, East on sick leave, was in Washington a few days ago.

LIEUTENANT H. B. MOON, JR., 20th U. S. Inf., is spending a portion of his leave at Alexandria, Va.

CAPTAIN T. F. MOUNT, 3d U. S. Artillery, has gone to Rockville, Md., to spend a few weeks with his family.

MAJOR J. B. PARKE, 16th Infantry, lately promoted, will delay his departure for Texas until November.

THE engagement is announced of Lieutenant A. M. Fuller, 2d U. S. Cavalry, to Miss C. M. Scheller, of San Jose, Cal.

LIEUTENANT C. L. BEST, Quartermaster, 1st U. S. Artillery, has prepared and expects soon to publish a manual of guard duty.

LIEUTENANT J. R. RICHARDS, Jr., 4th Cavalry, after a temporary sojourn at Fort Bowie, has gone to Fort Huachuca for duty.

LIEUTENANT E. A. MILLAR, 3d U. S. Art., rejoined at Fort Monroe, Va., from a two months' sick leave much improved in health.

CAPTAIN P. L. LEE, 10th U. S. Cavalry, lately acquitted by the Court-martial at Fort Grant, has resumed command of his troop.

MAJOR C. C. RAWN, 24th U. S. Infantry, on sick leave from Fort Elliott, Tex., is spending a season with his family at Ocean Beach.

COLONEL B. C. CARD, U. S. A., of the Quartermaster General's Office, leaves this week for San Francisco on special official business.

LIEUTENANT EDWARD BURR, Corps of Engineers, and Mrs. Burr, on a visit East from Vancouver Barracks, were in Washington this week.

LIEUTENANT H. H. BENHAM, 2d U. S. Infantry, was a recent guest of Lieutenant J. M. Arrasmith's, same regiment, at Fort Leavenworth.

COLONEL H. M. BLACK and Capt. Joseph T. Haskell, 23d U. S. Inf., left Fort Wayne, Mich., this week on a short visit to Mackinac Island.

GENERAL J. J. TOMPKINS, U. S. A., and Mrs. Tompkins and Major W. P. Gould, U. S. A., were at the Aquidneck House, Newport, R. I., this week.

THE latest report from Fort Leavenworth as to the condition of Lieutenant J. J. Weinberg, 13th U. S. Infantry, seems to indicate improvement.

CAPTAIN J. M. INGALLS, 1st U. S. Artillery, who has been spending a vacation with his family in New England, has returned to Fort Monroe, Va.

LIEUTENANT CONSTANTINE CHASE, 3d U. S. Artillery, will spend the greater portion of his leave from Washington Barracks, D. C., at Vineyard Haven, Mass.

LIEUTENANT A. J. RUSSELL, 7th Cavalry, has taken charge of recruiting matters at Fort Totten and Lieutenant R. J. C. Irvine, 11th Infantry, at Fort Yates.

COLONEL J. P. MARTIN, U. S. A., who was expected to rejoin at Fort Leavenworth last week, did not return until this week, having received a short extension of his leave.

LIEUTENANT J. F. MCBLAIN, 9th Cav., has returned to Fort Washakie, Wyo., to await the result of the General Court-martial before which he was recently tried at Cheyenne.

LIEUTENANT-COLONEL T. M. ANDERSON, 9th Inf., relinquished duty at Fort D. A. Russell, Wyo., this week, to avail himself of two months' leave before joining his regiment in Arizona.

PAYMASTER J. B. KEEFER, U. S. A., left Newport Barracks, Ky., this week for Vancouver Barracks, and has been succeeded at the former post by Paymaster Chas. McClure, lately at Boston.

CAPTAIN GAINES LAWSON, 25th U. S. Inf., rejoined at Fort Snelling a few days ago from his inspections of Illinois Militia. He speaks highly of the welcome given him and praises the militia for its appearance and discipline.

LIEUTENANT J. W. WILKINSON, 7th Cav., who has been succeeded as regimental adjutant, at Fort Meade by Lieut. L. R. Hare, goes to Fort Buford for duty with Troop F. Lieut. Wilkinson has held the position since 1881.

FIVE hundred French Canadians visited Woodcrest, Staten Island, on Sunday and presented Gabriel Dumont, who was the fighting lieutenant under Louis Riel in the Northwestern rebellion, with a handsome gold watch.

GENERAL J. C. AND MRS. FREMONT are still at work on the General's memoirs. Doubtless, says the *World*, the old pioneer would rather undertake to find 40 paths over the Rocky Mountains than undertake to write one book.

THE Secretary of War has written to the Superintendent of the National Museum, asking his pleasure in regard to the Grant gifts, held by the War Department, which are, under the recent law, to be turned over to the museum.

COLONEL PETER C. HAINS, Corps of Engineers, U. S. A., has been assigned to temporary duty to make the disbursements of the War Department during the illness of Mr. E. M. Lawton, the disbursing clerk of the Department, who was stricken with paralysis last week.

CAPTAIN J. H. DORST, 4th Cav., and his party of Apache Indians, arrived at Fort Leavenworth last week on their return journey to Arizona. They had reached Florence, Kas., when Gen. Potter telegraphed him that under orders from the Secretary of War, the Indians were to be brought to Fort Leavenworth.

MR. J. PIERPONT MORGAN, of New York, has received for the Mrs. Hancock fund since last report $2,321 through Mr. Chas. McCready, of New Orleans, from friends and admirers of Gen. Hancock in New Orleans and Louisiana, and $30 from the "Boys in White," of Richmond Co., which brings the total up to $46,396.50.

MAJOR J. W. MACMURRAY, U. S. A., is still in poor health, and will prolong his visit East for some time longer.

LIEUTENANT D. D. JOHNSON, 5th U. S. Artillery, on leave from Fort Monroe, Va., is visiting friends at Meadville, Pa.

LIEUTENANT B. M. PURSELL, Signal Corps, U. S. A., was in Yankton a few days ago inspecting the signal station there.

CAPTAIN G. M. DOWNEY, 21st U. S. Inf., has gone from Fort Bridger to Fort Sidney, Neb., for light duty at the latter post.

MR. THOMAS EWING SHERMAN, son of General Sherman, is to be Professor of Rhetoric at Detroit College, the ensuing term.

COLONEL GEORGE GIBSON, 5th U. S. Infantry, will spend a few months in the East before joining his new regiment at Fort Keogh.

SECRETARY OF WAR ENDICOTT is at his home in Massachusetts, and Chief Clerk Tweedale, of the War Department, is at Asbury Park.

LIEUTENANT C. H. WATTS, 5th Cavalry, and Mrs. Watts have been visiting at Fort Leavenworth, the guests of Lieut. Paddock. They will shortly return to Fort Supply.

CAPTAIN J. H. WILLARD, Corps of Engineers, U. S. A., has established his office in the Mitchell Building, Crawford street, Vicksburg, and is making arrangements to finish the survey of the Red River.

MAJOR WM. ARTHUR, paymaster, U. S. A., whose orders to Texas were revoked some time ago, has received further orders, sending him to Texas in September. New York will regret to lose the genial major.

MRS. RODMAN, wife of Lieut. John B. Rodman, 20th Inf., Fort Assiniboine, Montana, is stopping at the Albion House, Baltimore. She has come East to place her daughter, Miss Edith, as a pupil at Notre Dame of Maryland.

MRS. PARKER, wife of Maj. Daingerfield Parker, 9th Infantry, who fractured one of the bones of her ankle last week at Fort Wingate, is, we are glad to learn, recovering, but, of course, will be unable to use her foot for some time to come.

A SUCCESSFUL war with the United States would make President Diaz the most popular man in Mexico. Santa Anna had some such notion as this, and now he is gone, leaving a cork leg to every museum in this country.—*Macon (Ga.) Telegraph.*

PAYMASTER GENERAL ROCHESTER, U. S. Army, rejoined his family at Vineyard Haven, Aug. 18, and will remain until the middle of September with them. He has recently purchased a lot there with the view of erecting a cottage and making it his future summer home.

LIEUTENANT JOSIAH KING, 8th U. S. Cavalry, was married Aug. 10, to Miss Gertrude Shepard, at the residence of the lady's parents, Iron Mountain Ranche, Presidio County, Texas. Lieut. King is on duty with Seminole Negro Indian scouts at camp at Nevill's Spring, near Fort Davis.

CAPTAIN C. B. SEARS, Corps of Engineers, U. S. A., who has been spending a portion of the summer on leave at Seabright, N. J., will shortly take station at Bismarck, Dakota, and take charge of the improvement of the Yellowstone River and of the Missouri River from Sioux City to Fort Benton.

THE Senate failed to confirm the nomination of Gen. Dabney H. Maury, as Minister to Colombia, it having been sent in at a late hour. He will doubtless be reappointed with the expectation of his confirmation at the next session. Gen. Maury is a graduate of the Military Academy, who won his title in the Confederate Service.

THE following extract is taken from a letter received in San Francisco by personal friends of the Grant family: "On Saturday we went to see Mr. and Mrs. Sartoris. Their home is so beautiful that I should be glad to describe it, if such a thing were possible. Mrs. Sartoris took especial pains to deny all stories about herself and Mr. Sartoris. She says she never thought of getting a divorce."

THE marriage of Lieut. J. T. Knight, 3d Cavalry, to Miss Edith Young, and of Lieut. G. W. Read, 5th Cavalry, to Miss Burton Young, both ladies being daughters of Col. S. B. M. Young, U. S. A., will take place at Fort Hancock, Texas, Sept. 2, at 9 P. M. The same evening the parents of the fair brides, Colonel Young and Mrs. Young, will celebrate their silver wedding. It is needless to say the occasion will be a more than usually joyous one, in view of the triple events.

INTEREST in Captain Howgate, late of the Signal Bureau, has been revived by the appointment of his daughter, Miss Ida E. Howgate, to a clerkship in the office of the Secretary of the Treasury. "This young lady," said Assistant Secretary Thompson, "passed the highest examination in her class and was certified by the Civil Service Commission for appointment. It is generally understood that she will be the principal support of her mother, and I do not think anyone is uncharitable enough to punish the daughter for the sins of her father." Miss Howgate is a graduate of Vassar College and is very highly esteemed by her associates as a young lady of decided character and unusual intellectual accomplishments."—*Critic.*

LIEUTENANT PHILIP READE, 3d Infantry, General Terry's new Inspector of Rifle Practice, was at Fort Leavenworth this week, and goes from there to Fort Clark, Tex., and takes notes of the Department rifle competition, and afterwards return to Fort Leavenworth to superintend the rifle competitions of the Division of the Missouri. The Kansas *Times*, referring to Lieut. Reade's appointment, says: "But few officers in the service are better fitted for the position of inspector of rifle practice than Lieut. Reade. To his excellent management in the target butts at Fort Snelling last year much of the success of that contest is due. Everything moved with the precision of machinery, and it is there where Gen. Terry discovered in Lieut. Reade the required qualifications for the performance of those duties to which he has been called."

MAJOR ANSON MILLS, 10th U. S. Cavalry, leaves Arizona on a four months' leaves.

MAJOR C. W. FOSTER, U. S. A., left St. Louis this week to be absent about three weeks.

1ST LIEUTENANT J. J. O'CONNELL, 1st U. S. Inf., has been designated for a two years' recruiting tour.

ASSISTANT SURGEON W. E. HOPKINS, U. S. A., is shortly to take charge of medical matters at Angel Island, Cal.

MAJOR G. M. BRAYTON, 15th Infantry, leaves Fort Pembina next week on a three months' leave for the benefit of his health.

MAJOR W. L. HASKIN, U. S. A., will rejoin at the Presidio of San Francisco towards the end of August, from a six weeks' leave.

LIEUTENANT J. R. WILLIAMS, 3d U. S. Artillery, who is to be married soon, we believe, will go to Europe in October and spend the winter there.

THE Board of Army Engineers, Generals Duane, Abbot and Comstock, appointed to examine the new reservoir and tunnel at Washington, were busy at the duty this week.

GENERAL W. T. SHERMAN, says a San Francisco correspondent, has sailed out at the Golden Gate, not for China, but for Oregon, whence he will go East by the Northern Pacific.

GENERAL A. McD. McCOOK, U. S. A., left Washington for Fort Leavenworth this week via Chicago, leaving Mrs. McCook to spend a few weeks with her brother-in-law, Surgeon C. C. Byrne, U. S. A., of the Soldiers' Home.

LIEUTENANT E. M. WEAVER, 2d Artillery, lately professor at the college in Charleston, S. C., reported for duty at St. Augustine, Fla., on Monday morning, August 16. Lieut. Weaver expects to join at Fort Monroe by September 1.

LIEUT. COL. D. R. CLENDENIN, 3d Cavalry, says the Presidio County *News*, has joined from leave, and is again commanding the post. His son, Dr. Paul Clendenin, ordered to Ft. Davis, accompanied him, and both were gladly welcomed by their many friends.

CAPTAIN MOSES HARRIS, who has gone with his troop of the 1st Cavalry to the Yellowstone National Park, will virtually be superintendent of the park until Congress sees fit to provide funds for the payment of the heretofore superintendent and his assistants.

THE Pittsburgh *Despatch* of the 14th inst. says that the friends of Sergeant William Thoma, who committed suicide on the 11th in the garret of the local recruiting office, persist in asserting his innocence of the crime imputed and have instituted an inquest. Bertie Bochan, the little girl, lies in a dangerous condition.

LIEUTENANT L. R. HARE, 7th Cavalry, was to leave Chicago this week for Fort Meade to enter upon the duties of regimental and post adjutant. General Terry parted with Lieutenant Hare with regret, but fully appreciated that officer's wish to accept a regimental appointment of so responsible a nature as the adjutancy.

LIEUTENANT C. A. EDWARDS, 23d U. S. Infantry, after a long tour of duty at Cleveland, O., in command of the guard over the tomb of President Garfield, has rejoined his company at Fort Porter, N. Y. The excellent manner in which he discharged the delicate duty entrusted to him at Cleveland is worthy of great praise.

LIEUTENANT W. L. PITCHER, 8th Infantry, left David's Island, N. Y., for Baltimore, to take charge of the recruiting rendezvous lately commanded by Major J. B. Parke, 16th Infantry. Lieut. Pitcher will also have charge of the cavalry recruiting rendezvous at Baltimore during the absence on leave of Captain Overton, 6th Cavalry.

MRS. PAVY, widow of Dr. Pavy, of the Greely Arctic Expedition, has donated to the National Museum the relics collected by her husband on his trip to the Arctic regions. Mrs. Pavy received lately the last installment of pay due her husband for his services in the expedition, thus showing that the Government recognizes her as his lawful widow.

THE Fergus County *Argus* of August 12 says: Lieut. McDonald visited Maiden Thursday....Troop F, Lieut. Bomus in command, expect to move to Fort Assinniboine most any day....Captain W. R. Maize and Lieut. Manley, with their company, expect to move in a few days....Captain Bradley and wife visited Maiden Saturday....Orders were received on Sunday by Colonel Smith, commandant at Maginnis, to send a company of cavalry to Fort Assinniboine, and one to the cantonment at Poplar River.

LIEUT. COL. A. K. ARNOLD, 1st U. S. Cavalry, is in command of Fort Leavenworth, during the absence of General McCook, who is in Cincinnati, where he recently buried his infant son. Referring to the death, the Kansas *Times* says: "It did not occur from diphtheria, as was reported. The cause of its death was teething and a severe cold connected with it. The announcement that the child's death was caused by diphtheria has given much anxiety to parents in the garrison. It is to be regretted that some residents of the garrison are not more careful in making statements for publication that are liable to give uneasiness."

THE Omaha *Excelsior* of Aug. 14 says:

A very jolly party visited the Bellevue rifle range Wednesday, consisting of Mrs. Gen. Crook, Mrs. Reed, and the Misses Springer, of Chicago, Summers, Balcomb and Berlin, escorted by Messrs. Collins, Vollum, Berlin and Hamilton. After shaking off the heat of Omaha they partook of an elegant luncheon brought by Mrs. Crook. Then the party adjourned to the bluff that commands a beautiful view of the river, and in the moonlight, with cool breezes blowing, sang sweet songs or built *Chateau en Espagne*, but the reality of parting dispelled the entrancing surroundings.....The coming season will find a new set of extremely pleasant Army people in our Omaha society, but at the same time the well-known and much esteemed 4th Infantry will be certainly missed.....1st Lieut. Chas. W. Rowell, Adjutant 2d Infantry, has gone East to see his old friends and comrades.....Capt. C. S. Roberts, U. S. A., with his family, left for Fort Russell Monday.

LIEUTENANT A. CRONKHITE, 4th U. S. Artillery, on leave from Fort Monroe, is visiting at Afton, Va.

LIEUTENANT H. C. HALE, 12th U. S. Inf., left Fort Niagara, N. Y., on Tuesday on a week's vacation.

GENERAL PHILIP R. DE TROBRIAND, U. S. A., registered at the New York Hotel, New York, on Wednesday.

LIEUTENANT C. L. COLLINS, 24th U. S. Infantry, goes abroad in a few days, to be absent for three or four months.

CAPTAIN G. G. LOTT, 11th U. S. Infantry, one of the new recruiting detail, has joined at David's Island, N. Y. H.

CAPTAIN E. C. WOODRUFF, 12th U. S. Infantry, spent a portion of the week at Norristown, St. Lawrence, Co, N. Y.

LIEUTENANT CHARLES HAY, 23d U. S. Infantry, left Fort Porter, N. Y., early in the week, on a short leave of absence.

GENERAL E. A. CARR, U. S. A., and Mrs. Carr, were in New York this week, and were heartily welcomed by many old friends.

CAPTAIN H. G. SHARPE, U. S. A., of West Point, was at Newport, R. I., this week, the guest of the Rev. Dr. Morgan, of New York.

SURGEON J. S. BILLINGS, U. S. A., now in England, has been the recipient of much attention from scientists and other professional men. He lectured in Brighton recently.

LIEUTENANT-GENERAL SHERIDAN and Col. Sheridan were present at the reunion at Creston, Iowa, Aug. 18, and attended the camp fire in the evening. A despatch from Creston says: "Thousands shook hands with Little Phil."

THE following officers were registered at the office of the Adjutant-General this week: 1st Lieut. Edward Burr, Eng.; Capt. R.W. Young, A. J.-A.; 2d Lt. Chas. G. Lyman, 5th Inf.; Lieut.-Col. Henry L. Abbot, Eng.; Lieut. Col. C. B. Comstock, Eng.; Col. J. C. Duane, Eng.; 1st Lieut. C. A. Williams, 21st Inf.; 1st Lieut. Geo. F. E. Harrison, 2d Art.; 2d Lieut. John S. Mallory, 2d Inf.; Lieut.-Col. Walter McFarland, Eng., and 2d Lieut. S. D. Furman, 10th Cav.

THE testimony of Mrs. McBlain in the Court-martial proceedings against her husband shows that her correspondence with him was conducted through the medium of her father, because she "was not a very good writer." She testified that she continued to work "in the mill" after marriage, earning $33 to $34 per month. Mrs. McB. said: "He wrote affectionate letters and mine were also affectionate. I at no time wrote to him letters of another character. I never accused him of conduct detrimental to his character. I state positively that I never called him an outcast."

Q. When did you first experience the strong affection for him that you have?

A. I always did have. I do not know how old he was then, nor how old I was at the time. This feeling was experienced for him alone. No one else ever shared this affection. I never gave anyone else any evidence of that feeling which I have for the accused. I never knew a man named John Ewing. I never had any relations with him of any kind whatever.

Being questioned as to the affidavit which she made in Philadelphia for the purpose of sending it to San Francisco to reopen divorce proceedings in that city, her answers were far different from those which appeared in the affidavit.

COMMODORE W. S. SCHLEY, U. S. N., and family, arrived at Newport, R. I., this week.

NAVAL CONSTRUCTOR J. W. EASBY, U. S. N., and family, have been spending a part of the season at Cape May.

LIEUTENANT COMMANDER THOMAS PERRY, U. S. N., visited New York this week, locating at the St. James Hotel.

COMMODORE BELKNAP, U. S. N., and Mrs. Belknap were the recipients lately of a handsome reception at Vallejo, Cal.

CHIEF ENGINEER S. D. HIBBERT, U. S. N., left Norfolk, Va., on Tuesday, to join his family at New York and spend a month's leave with them.

ENSIGN E. E. HAYDEN, U. S. N., who has recovered from the injuries he received about two years ago, has returned to his work at the Smithsonian, Washington, D. C.

ASSISTANT ENGINEERS W. H. ALLDERDICE and Howard Gage, U. S. N., sailed on Tuesday to join the *Lancaster* on the South Atlantic Station, to relieve Assistant Engineers Bieg and Young who will then return home.

LIEUTENANT S. SCHROEDER has been designated to escort the Japanese visitors through the Washington Navy-yard and show such attentions on the part of the Navy Department as custom and the circumstances demand.

LIEUTENANT WM. E. HALL, Pay Director Edward May, Asst. Engr. Howard Gage, Ensign W. R. Rush, Comdr. Wm. Folger, Ensign John G. Quinby, Lieut. W. H. Emory, and Lieut.-Comdr. Isaac Hazlett registered at the Navy Department during the week.

COMMANDER H. F. PICKING, U. S. N., Naval Secretary Lighthouse Board, was in New York this week to examine the plans and specifications for the new iron lighthouse tender and the two new lightships, for which Congress made appropriations at the last session.

FROM the Naval Academy comes the report that Capt. R. W. Huntington, U. S. M. C., at present on leave, will be ordered to the flagship *Hartford* as fleet marine officer of the South Pacific Station, relieving Capt. Wm. R. Brown, whose tour of duty will expire in October of the present year.

ADMIRAL PORTER is in Washington hard at work on his book. He is very brusque and is not in the habit of seeing every one who calls, no matter how important or how prominent he may be, but he has one standing order that any sailor who ever served in the Navy has a right to come right into his room without sending in a card or knocking at the door.

SECRETARY BAYARD, on Aug. 19, received a telegram from Lieut. W. H. Schuetze, U. S. N., announcing his arrival at St. Petersburg on his way home.

A. C. STEPHENS, of Cape Town, Africa, has arrived in Washington to present to the Navy Department the charges of irregularities in connection with the purchase of naval stores at that port.

SOME surprise has been expressed that Commander J. Crittenden Watson, U. S. N., should have been selected to relieve Comdr. Stirling on the *Iroquois*. However, what is loss here will be gain on the South Pacific.

P. A. ENGINEER JAMES ENTWISTLE, U. S. N., was not detached from the *Atlanta*, after her recent satisfactory trial cruise, and it is quite possible that he may be retained as one of the permanent quota of the cruiser.

THE daughter of Rear Admiral W. Radford, U. S. Navy, has written a novel which Cupples, Upham and Co., are to publish soon. The lady is the wife of M. De Meissner, an attache of the Russian diplomatic service.

MR. AND MRS. ALEXANDER M. THACKARA are rejoicing over a daughter born to them Aug. 9 at their summer home at Watts, Pa. The little one has been christened Eleanor, after her mother, who is the daughter of General Sherman.

ASSISTANT PAYMASTER J. D. DOYLE, U. S. N., has appointed his brother, Hiram Doyle, as his clerk, vice Meyers, defaulted. Both brothers are too well known in Washington to need comment on the ill luck which has brought them good fortune.

CHIEF ENGINEER CHARLES E. DE VALIN, U. S. N., assumed the duties of chief engineer of the Washington Navy-yard on Tuesday, Aug. 10, relieving Chief Engineer C. H. Baker on that day. Mr. Baker goes out as fleet engineer of the South Atlantic Station.

SURGEON H. J. BABIN, U. S. N., is attached to the *Vandalia*, which recently sailed for service in the South Pacific Squadron. Dr. Babin is remembered by many in Washington as the medical officer of the captured ram *Stonewall*, during her voyage from Havana to the Navy-yard there.

LIEUTENANT DOWNS L. WILSON, U. S. N., returned to Washington Saturday from the Rockbridge Baths, much improved in health and strength. The Lieutenant was accompanied home by Mrs. Wilson, Miss Emma Barbarin and Miss Grace Moffatt, both of Georgetown. The party passed a very enjoyable time at the Baths.

THEIR many friends on the Pacific Coast will be glad to learn that Medical Director George Peck, U. S. N., with Mrs. Peck, are living pleasantly at Elizabeth, N. J. The genial Doctor has lost none of the qualities which rendered him such a favorite at Mare Island, and his wife is in the midst of friends wherever she may be.

CHIEF ENGINEER HENRY L. SNYDER, U. S. Navy, Superintendent of the State, War and Navy Department Buildings, is still away enjoying a well-merited rest. During Mr. Snyder's absence his duties are performed by Passed Assistant Engineer John L. Tobin, U. S. N., who was ordered as assistant to the superintendent on the 26th of last May.

CAPTAIN D. PRATT MANNIX, U. S. M. C., who for some years was on duty for the Imperial Chinese Government, is now en route for that part of the world a second time, he being in command of the guard on the U. S. S. *Brooklyn*. The *Brooklyn* goes to the Asiatic Station as flagship, relieving the *Trenton* now due at Hampton Roads. Capt. Mannix will be welcomed by hosts of friends in China, where he was a deserved favorite.

AT a meeting of the Navy Mutual Aid Association, Aug. 14, Chief Engineer W. H. Harris was elected vice-president to succeed Commander C. T. Goodrich, who has resigned because of his orders to Newport. The following officers were added to the list of members: Capt. D. Pratt Mannix, M. C.; Lt. O. W. Lowry, P. A. Paymaster J. N. Speel, Lieut. N. E. Mason, and Boatswain John McLaughlin. The membership now numbers 775, paying a benefit of $3,647.

CHIEF ENGINEER ISAAC R. MCNARY, U. S. N., is now attached to the U. S. steamer *Atlanta*. He has been for some time previous to his orders to this ship, on duty connected with the Advisory Board, and has become thoroughly familiar with the ins and outs (and there are many of them) of the new steel cruisers, whose immediate future will be watched with much solicitude by the Navy of to-day. Mr. McNary claims the distinction of being the only one of his name receiving pay from the U. S. Government in either a civil or military capacity. He entered the Service as a Third Assistant Engineer May 13, 1861, and served with credit during the "late unpleasantness."

ASSAULT ON GENERAL AUGUR.

WASHINGTON was excited, on Sunday morning, to learn that at about 1 A. M. General C. C. Augur, U. S. A., retired, had been shot at and wounded, at his residence, by a negro named Wm. Pope. The particulars as given are as follows: The general was awakened by loud swearing in front of his house. On going to the door with a cane in his hand, he observed two negroes on the sidewalk cursing each other, and he ordered them away. Instead of obeying they turned their abusive and offensive language on the general. He became exasperated and advanced on them and struck one of them, Pope, a sharp blow on the head. The negro jumped aside, and drawing a pistol quick as a flash fired at the general four times, each shot taking effect. Three of the balls entered his legs and one in his side. His servant carried him bleeding into the house, and called medical attendance. The bullets were extracted, and Assistant Surgeon O'Reilly, U. S. A., thinks his patient is getting along very well towards recovery. Pope was captured by the police, and Aug. 16, was arraigned and held in $500 bail for trial on the charge of assault with intent to kill. He has a very bad record, and has been but a short time out of the Albany Penitentiary, where he was sent in 1880 for manslaughter.

RECENT DEATHS.

A FRIEND of the late Colonel William P. Wilson, whose death we announced last week, writes us as follows:

In every station he left hosts of friends, who remember him as the clear-headed, courteous staff officer, the genial friend and wise counsellor. He married 18 years ago Miss Ellen Dickson, daughter of the Rev. Dr. Dickson, of Philadelphia, and he leaves a widow and three sons. Blessed beyond the common lot in his domestic life, those who have enjoyed the hospitality of his beautiful home, will never forget that centre of all that is brightest and best in life, and his tender love for his wife and boys will be their most precious inheritance. Although he resigned from the Army in 1873, his association with his old Army comrades was close and constant, and his confidential relations with Gen. Hancock were only interrupted by death. The General relied upon him, especially after the death of his brother aide and life-long friend, Gen. W. G. Mitchell, to assist him in answering the thousands of letters from old officers and soldiers of the war, and Colonel Wilson's excellent memory of the details of the great events in which they had both borne an important part, rendered him of incalculable service to his old chief.

"O! true, brave heart, the man, the brother,
And art thou gone, and gone forever?
And hast thou crossed that unknown river,
Life's dreary bound?
Like thee, where shall we find another,
The world around?

NAVAL CADET OSKALOOSA SMITH SCHLEY, 3d class, Naval Academy, was killed on board the practice ship *Constellation*, Aug. 3, by a fall from aloft while at sea on the cruise from Portsmouth, N. H., to Hampton Roads. He was born in Indiana, and entered the Academy Sept. 17, 1885, from that State. The following particulars are given: The ship left Portsmouth on Monday, Aug. 2, and on Tuesday morning had a strong breeze. She was making some 13 knots an hour. The cadets were sent aloft about 10 o'clock on their usual morning drill, when Cadet Schley missed his footing and fell from the lee foretopmast rigging, a distance of 100 feet, striking on the vessel's rail and falling into the water. Orders were at once given to man the lifeboat and bring the ship up in the wind, which was now blowing half a gale. In the meantime the crew of seven men were in the lifeboat, which, through misconception of the order of the deck, was prematurely let go and at once swamped. Four of her crew managed to cling to her sides and hold on until they were rescued, but the other three—Emil Olsen, A. Carsen, and M. Doland, coxswain of the boat—were drowned before assistance could reach them. Schley was a bright young man, about 18 years or age, and a relative of Comdr. Schley, of Arctic fame. The loss has cast a gloom over the entire ship's company.

MAJOR HENRY DE LA CHERE, whose decease at Paris we briefly noted last week, during his four years' residence as military attaché of the French Legation, was esteemed as a gentleman of fine accomplishment and bearing, and made many friends in Washington. He returned to France in January, suffering from a general paralysis. He was *chef d'escadron* of the 3d Chasseurs, Chevalier of the Legion, and belonged to a family numerously represented in the Army.

THE death of Dolores Fosta, the widow of the Mexican General, Santa Anna, is announced. She was a woman of strong traits of character, and has lived in retirement since the death of her husband. The son of General Santa Anna is just reported to have committed suicide in Cuba, where he had a plantation.

A DESPATCH from Charlottesville, Va., says: "Mrs. Mary Scott, wife of Lieut. W. S. Scott, 25th U. S. Infantry, now at Fort Meade, Dakota, died August 14 of congestion of the lungs. Three little children survive her, the last born twins, being not over seven hours old at the time of her decease."

MRS. ELIZABETH MONROE BLIGHT, the venerable widow of Gunner John Blight, U. S. N., died at Brooklyn, N. Y., Aug. 18, in her 84th year. Gunner Blight died in 1854.

(Correspondence of the Army and Navy Journal.)

DEPARTMENT OF THE PLATTE RIFLE RANGE.

THIS is now finished, and is prettily located on a bluff, with cleared places for camps and range, surrounded by a heavy belt of timber. Landing at the rifle camp station, 800 yards north of Bellevue, Neb., you pass through a gate, and up a road in timber, about 100 yards; a sign "officers' camp" and a flight of steps lead you to one of the three camp places; on this is the tent of Col. Henry, inspector of rifle practice, and beyond are two parallel rows of wall tents, facing each other, and occupied by the range officers, six in number, the statistical adjutant and financial officer, quartermaster, commissary, and ordnance officer, with the adjutant's office at the end of the row. Opposite the tent of Capt. Ulio, commanding camp, and executive officer, are similarly arranged tents for the officer competitors. In the centre of this parade is the flagstaff. On the same knoll in a grove of trees, back of the first line of wall tents, is the officers' mess and cook tent, with, just below, the cellar and pump for water.

On the central piece of ground are the tents for the guard and those containing the Q. M., C. S., and ordnance stores. On the other parade, north of officers, are the tents for enlisted competitors, markers, scorers, etc., with their mess and cook tents, cellar, water, etc., and still beyond is the bakehouse, in connection with which field iron bake ovens are used this year, to be replaced next year by a brick one.

From this point a path leads through the woods to the open space by which, by means of a "covered way," you reach the target pits. On first level are four targets, 15 yards apart; in the centre of this pit is a store house by a flight of steps, all sheltered from fire; you reach the next level, where are four targets similarly arranged, with store house and telephone building, the latter with windows at each end so as to watch all targets, and receive and transmit promptly all messages from the firing points.

At the 600 yard firing points and in rear, is the visitors' stand, underneath which is a place for store room, office, and telephone. As the range takes up all the cleared space, except that occupied by camps, on coming from the cars, you continue on past the sign "officers' camp," turn on your left seeing the sign "visitors' stand," which, by steps, you reach, by going through a path in the woods, coming out in rear of the firing stands. The enlisted men in passing through the gate from the cars, following a sign, turn to their right, and by a walk of 200 yards reach their camp. In addition to above the tents of officers and men will be floored, the same as at Leavenworth, and bathing and other facilities will be afforded. We have thus a complete system of our own and are as independent as the best post, without any of the annoyances of begging or borrowing from any Post Commander things, which if given, are given with a bad grace, and, naturally so, as no one Post Commander should be called upon to nourish a Department affair. Has all this been an easy work? By no means. First, the material from the old range had to be utilized for economy, and by Lt. True's, 4th Infantry, great care, zeal, and efficiency in dismantling the old range, we have made our new one without asking for a thing, as far as range went. All this stuff of heavy timber and buildings, had to be hauled from Fort Omaha and reshipped. Then the dashing Lieut. McQuiston, of the 4th, went to work with details clearing ground, cutting trees, and grubbing roots.

He was relieved by an equally intelligent, if not as dashing an officer, Lieut. Noyes, of the 9th Infantry, who matured the plans proposed, and with a mathematical eye reduced the levels—made more perfect by the handsome Kennon, of the 6th Infantry, the aide. Then Lieut. Noyes, having selected Arizona for a station, left, being replaced by Lieut. Brooke, of the 21st Infantry, who, with an equal amount of intelligence and a greater avoirdupois than Noyes, brought matters to a culmination. Lieut. Styer, who has charge of the men's messing, as well as the officers, will receive, as caterers generally do, the thanks, if nothing else, of those concerned, at the proper time, and then comes Cochran, of the 7th, the confirmed bachelor, as well as efficient officer, if the two can go together. These all have done well the task allotted. Gen. Dandy, Chief Quartermaster, who promptly forwarded all requests, and aided in every way; Gen. Breck, Adjt.-Gen., who approved of all details, and who is zealous in all matters of duty, as well as the authorities in Washington, who approved of all we asked for, are not to be forgotten in our success in establishing a pretty range with all its facilities, and the part of the competitors for whom the others have labored so hard is now to show by their zeal and interest in the work before them, and in the large scores made, an appreciation of their surroundings, as well as the labor of weeks, patiently, and well done, by their brother soldiers to accomplish these results.

CHALLENGE FROM FORT MISSOULA, M. T.

To the Editor of the Army and Navy Journal:

SOME references to Fort Missoula, to the 3d Infantry, and to Capt. Wm. Krause, have come to public notice lately. The ARMY AND NAVY JOURNAL published three weeks ago an item mentioning the fact that Capt. Krause had completed his qualification as a sharpshooter, firing on the Fort Missoula range in all only 170 shots. This is true and we are sorry for it. If anybody beats that record the friends of the regiment, of Capt. Krause, and of this post, confidently assert that the captain will beat his own record. Only one condition will be insisted on, and that is that Capt. K. be permitted to do his shooting on his own range, that is the Fort Missoula range, of which it may be truthfully said that its record has no equal in the Army. Last year the figure of merit of this post was higher than that of any other post in the Army and it will be again this year.

Every officer at this post who fires at all at the targets, makes nothing but sharpshooters' scores. There isn't a man at this post on the firing list who isn't a sharpshooter, or who will not be one before the close of the target season.

Referring to Capt. Krause again we are in doubt whether to accept the squib mentioning his record as a veiled attempt at would-be sarcasm, or to regard it as a bona fide tribute to his skill. In either case, this seems to be a fitting time to mention the fact that the Colonel of the regiment to which Capt. K. has belonged ever since both served together in the 37th Inf., is the only sharpshooter of his grade in the Army.

Capt. Krause last year received, it is fair to presume, his inspiration under the example and tuition of his regimental commander. The Colonel of the 3d Infantry visited Fort Missoula early in July, and he fired a few shots himself on the range, and afterwards went down into the pit and expressed himself as gratified at the scores that Capt. Krause had made.

He was also pleased with those he himself had made, and he went out of the pit and away from the range, and left the post with the conviction that everything was all right.

Now, in conclusion, we will make a prediction. It is this. If anybody, anywhere, excels the record accredited to Capt. Krause, the latter will then beat his own record on his own range, and surpass that of his rival.

If any organization elsewhere than at Fort Missoula ties or overshoots Fort Missoula's figure of merit, and the fact becomes officially known at this post, we will guarantee to out-Herod it.

John Phœnix could break more pipes with a brick than Capt. Travis could smash with his hair triggers. Our maximum hasn't been reached yet. We challenge equality, much more superiority. We know our capacities, and judge of the future by the past.

We know what we can do, and, in partial proof thereof, we proudly record the fact that since Capt. Krause hung up his rifle for this year, Lieut. F. P. Fremont, 3d Infantry, rounded off his sharpshooter's scores, all of them, in 150 shots. Since then a private of Co. B, 3d Infantry, stationed here also, completed his little qualification as a sharpshooter in 145 shots. These facts are confirmed by the official records. The scores were all made on the Fort Missoula range, for which may be claimed as proficient shots and as competent markers as can be found in America. Further the deponent sayeth not. X. Y. Z.

THE ceremonies attending the unveiling of the De Kalb statue Aug. 16 caused this historic old city (Annapolis) to awaken from the lethargy with which it is usually enwrapped. Fully 10,000 strangers were in attendance and the city was gayly decorated in honor of the occasion. The statue represents the German soldier in Continental uniform, with sword upheld, and is a magnificent piece of bronze work, measuring 9 feet in height, mounted on a granite pedestal 13 feet high. It is erected on a knoll at the south end of the State House grounds and faces due south. The ceremonies opened with a parade in which part was taken by the United States Naval officers, cadets, and marines, all the State Militia, Knights of Pythias, German societies, and other organizations. The unveiling was according to the solemn ritual of the Masonic Order. The veil was withdrawn at 2.30 o'clock, when the national salute was fired from the Naval Academy. Secretary of State Bayard, who was accompanied by the Turkish Minister, received the statue from Sculptor Keyser and was introduced to the crowd by Gov. Lloyd. He accepted the statue in the name and on behalf of the Government and people of the United States, and paid a glowing tribute to the memory of Baron John De Kalb. A poem by Prof. John H. Hewitt, of Baltimore, was read, after which there was singing by the German societies of Baltimore and music by the Marine Band, and the exercises closed with the reading by Colonel J. Thomas Scharf of an oration on the life and services of De Kalb. The monument is suitably inscribed with a scroll setting forth the services of the soldier in whose honor it was erected by the Congress of the U. S.

THE ARMY

G. O. 59, H. Q. A., August 12, 1886.

Publishes the act, approved Aug. 4, 1886, making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1887.

WAR DEPARTMENT, A. G. O., Aug. 12, 1886.

Publishes proclamation of the President of the U. S., of Aug. 9, 1886, directing that the military reservation of Fort Fred Steele, Wyo., be placed under the control of the Secretary of the Interior for disposition, as provided for in the act of July 5, 1884, it having become useless for military purposes.

CIR. 16, DEPT. OF THE PLATTE, Aug. 12, 1886.

Publishes table exhibiting the figure and order of merit of posts for part of the target practice season ending July 31, 1886. Till all have had skirmish practice this order will be based upon the individual figure of merit.

G. O. 21, DEPT. OF ARIZONA, Aug. 12, 1886.

G. O. No. 16, c. s., these Headquarters is revoked.
[G. O. 16 set apart certain lands in New Mexico as a Military reservation.]

STAFF CORPS AND DEPARTMENTS.

Adjutant and Inspector Generals.

Major G. H. Burton, I. G., will inspect the posts of Forts Hays, Riley and Lyon (S. O. 84, Aug. 9, Dept. Mo.)

Lieut. Col. R. P. Hughes, Inspr. Gen., will inspect Forts Gaston and Bidwell, Cal. (S. O. 69, Aug. 10, D. Cal.)

Quartermasters and Subsistence Departments.

Brig. Gen. Samuel B. Holabird, Q. M. G., will proceed to Brooklyn, David's Island and Willet's Point, N. Y., on public business (S. O., Aug. 14, H. Q. A.)

Leave from Aug. 18, 1886, to Sept. 5, is granted Major Charles W. Foster, Q. M. (S. O., Aug. 16, H. Q. A.)

Capt. Wm. S. Patten, A. Q. M., will proceed to Portland, Ore., on public business (S. O. 133, Aug. 3, D. Columbia).

P. Q. M. Sergt. Robert Fallon, Boise Barracks, is selected to compete for a place on the Dept. Rifle Team, and will report at Vancouver Barracks, Aug. 10 (S. O. 135, Aug. 5, D. Columbia).

Major A. S. Kimball, C. Q. M., will report to the Comdg. Gen. at Willcox, A. T. (S. O. 74, Aug. 5, D. Arizona.)

Leave for twenty-five days is granted Captain Charles R. Barnett, A. Q. M., Portland, Ore., and during his absence Capt. Wm. S. Patten, A. Q. M., will perform the duties of disbursing quartermaster in Portland (S. O. 131, July 31, D. Columbia).

Pay Department.

Major Asa B. Carey, Paymr., now on leave, in Alaska Territory, will report, when en route to rejoin his station, to the Comdg. Gen., Dept. of the Columbia, for temporary duty (S. O., Aug. 13, H. Q. A.)

Major Charles M. Terrell, Chief Paymr., will proceed to the Bellevue Rifle Range on public business (S. O. 100, Aug. 9, D. Platte).

Major Thaddeus H. Stanton, P. Dept., Salt Lake City, will proceed to Fort Bridger, Wyo., on public business (S. O. 98, Aug. 6, D. Platte).

Major Wm. Arthur, Paymr., now awaiting orders in New York, will report on or before Sept. 30, to the Comdg. Gen., Dept. of Texas, for duty in that Dept. (S. O., Aug. 16, H. Q. A.)

Medical Department.

1st Lieut. Philip G. Wales, Asst. Surg., is relieved from duty in the Dept. of the Columbia, and will report at these H. Q. (S. O. 62, Aug. 9, Div. Pacific.)

A. A. Surg. A. F. Steizers will proceed to Angel Island, Cal., and report for temporary duty, relieving A. A. Surg. Loren N. Clark, who will proceed to Fort Lowell, A. T., for duty, relieving Asst. Surg. Wm. E. Hopkins, who will proceed to Angel Island, Cal., and report for duty as post surgeon, relieving A. A. Surg. Steigers, who will then return to Alcatraz Island, Cal. (S. O. 61, Aug. 6, Div. Pacific.)

1st Lieut. Charles F. Mason, Asst. Surg., is assigned to duty as post surgeon at Plattsburg Barracks, N. Y. (S. O. 113, Aug. 18, Div. Atlantic.)

Capt. R. G. Ebert, Asst. Surg., having completed duties in connection with the rifle camp at Creedmoor, will return to Fort Hamilton (S. O. 109, Aug. 13, Div. Atlantic)

Major Edwin Bentley, surgeon, having reported by letter from Little Rock, is granted a leave for one month, at the expiration of which he will report at Little Rock Barracks for duty as post surg., relieving Capt. Blair D. Taylor, asst. surg., who will proceed to Jackson Barracks, La., for duty as post surgeon (S. O. 113, Aug. 8, Div. Atlantic).

Leave for one month is granted Major Joseph C. Baily, surgeon, Fort Monroe, Va. (S. O. 112, Aug. 17, Div. Atlantic.)

The leave on surgeon's certificate granted Captain Leonard Y. Loring, Asst. Surg., is extended two months on surgeon's certificate (S. O., Aug. 16, H. Q. A.)

1st Lieut. Wm. C. Borden, Asst. Surg., Fort Douglas, will proceed to Fort Bridger, Wyo., and report for temporary duty during the absence of Asst. Surg. Louis W. Crampton (S. O. 100, Aug. 9, D. Platte).

A. A. Surg. M. A. Rebert, Fort D. A. Russell, will proceed to Omaha, Neb., and report to the Medical Director, Aug. 15 (S. O. 102, Aug. 12, D. Platte).

Capt. Edward B. Moseley, Asst. Surg., Vancouver Barracks, is selected to compete for a place on the Dept. Rifle Team, and will report Aug. 12 (S. O. 135, Aug. 5, D. Columbia.)

A. A. Surg. Cyrus K. Merriam, Fort Spokane will repair to the vicinity of Calispel Lake and report to Captain Randolph Norwood, 2d Cav., for temporary duty in the field (S. O. 132, Aug. 2, D. Columbia).

Leave for fifteen days is granted Major George M Sternberg, Surg. (S. O., Aug. 12, H. Q. A.)

1st Lieut. Charles F. Mason, Asst. Surg., recently appointed, will report by letter to the Comdg. Gen., Dept. of the East, for assignment to duty (S. O., Aug. 13, H. Q. A.)

The extension of leave on surgeon's certificate, granted Major William S. Tremaine, Surgeon, is further extended six months on account of sickness (S. O., Aug. 13, H. Q. A.)

So much of S. O. 92, as directs Major Edwin Bentley, Surgeon, to report at Fort Davis, Texas, for duty, is revoked, and he is, under the requirements of S. O. 179, c. s., A. G. O., relieved from duty in the Dept. of Texas (S. O. 103, Aug. 11, D. Texas)

Hospital Steward Charles F. Materne, now at Fort Lincoln, D. T., will proceed to Fort Custer, M. T., and report for duty, to relieve Hospital Steward James Carroll, who will report without delay at the Dept. H. Q. (S. O. 76, Aug. 9, D. Dakota.)

A furlough for two months is granted Hospital Steward Francis W. Fitz-Gerald (S. O. 122, Aug. 13, Div. Mo.)

Hospital Steward Wm. Bethon will be relieved from duty at Fort Clark, Tex., and in the Dept. of Texas, by the C. O. of that post (S. O. 101, Aug. 9, D. Texas.)

Hospital Steward Rudolph Werner will be relieved from duty at Fort Ringgold, and in the Dept. of Texas (S. O. 101, Aug. 9, D. Tex.)

A furlough for two months is granted Hospital Steward Frank Criss, Fort McDowell (S. O. 74, Aug. 5, D. Arizona).

Hospital Steward George D. Belt is relieved from duty at Fort Missoula, M. T., and will proceed to Fort Sisseton, D. T., and report for duty, relieving Hospital Steward Herman Wilkendorf, who will comply with par. 1, S. O. 178, c. s., A. G. O. (S. O. 77, Aug. 10, D. Dakota).

Hospital Steward Max Arendt, Fort Monroe, will be relieved from duty in the Dept. of the East, and will report to the C. O., Fort Myer, Va., for temporary duty at that post (S. O., Aug. 13, H. Q. A.)

Hospital Steward James Carroll will be relieved from duty in the Dept. of Dakota, and will report to the Comdg. Gen., Dept. of the Platte, for assignment to duty (S. O., Aug. 12, H. Q. A.)

The following Hospital Stewards are relieved from duty in this Department: William Torrens, Thomas J. Burke, Wm. F. Lambertson, and Wm. Edwards (S. O. 86, Aug. 12, Dept. Mo.)

Hospital Steward George Dieffenbach will proceed to Cantonment on the Uncompahgre, Colo., and report for duty (S. O. 86, Aug. 12, Dept. Mo.)

Hospital Steward David Robertson is discharged the service in order that he may be enlisted as a general service clerk (S. O. 111, Aug. 16, Div Atlantic).

Hospital Steward Max Arendt will be relieved from duty at Fort Monroe, Va., and in the Div. of the Atlantic, upon the receipt of this order at the post (S. O. 111, Aug. 16, Div. Atlantic).

Hospital Steward Andrew J. McAllister (recently appointed from private, Troop A, 5th Cav.), will report in person to the commanding general Dept. of Ariz. for assignment to duty (S. O., Aug. 18, H. Q. A.)

The commanding general Dept. Dak. will grant a furlough for six months, with permission to go beyond sea and to take effect after his re-enlistment, to Hospital Steward Jacob Martin, U. S. A., on duty in that department (S. O., Aug. 17, H. Q. A.)

Engineers and Ordnance Departments.

Capt. Clinton B. Sears will, upon the expiration of his leave, take station at Bismarck, D. T., relieving Capt. James B. Quinn, C. E., of the duties now under his charge. Capt. Quinn, upon being relieved, will take station at Duluth, Minn., relieving Major Charles J. Allen, C. E., of the charge of the harbors at Duluth and Grand Marias, Minn., and Superior Bay and Saint Louis Bay, Wis. Capt. Fredk. A. Mahan will be relieved from duty under the orders of Col. Quincy A. Gillmore, C. E., and will take station at Buffalo, N. Y., relieving Capt. Carl F. Palfrey, C. E., of the charge of the harbors at Erie, Pa., and Buffalo, Olcott, and Oak Orchard, N. Y., and of the improvement of Niagara River, N. Y., and relieving Major Lewis C. Overman, C. E., of the charge of the harbor at Dunkirk, N. Y. (S. O., Aug. 14, H. Q. A.)

One month's extension of leave of absence is granted Addl. 2d Lieut. Mason M. Patrick, C. E. (S. O., Aug. 13, H. Q. A.)

15th Infantry, Colonel Joseph N. G. Whistler.

Hdqrs., E, F, G, and K, Ft. Buford, D. T.; A, C, D, and H, Ft. Randall, D. T.; B and I, Ft. Pembina, D. T.

Leave for three months on Surgeon's certificate, with permission to leave the Div. of Mo., is granted Major George M. Brayton (S. O., Aug. 17, H. Q. A.)

A furlough for six months, with permission to go beyond sea, is granted 1st Sergt. Karl Copeland, Co. H (S. O. 124, Aug. 16, Div. M.)

16th Infantry, Colonel Matthew M. Blunt.

Hdqrs., A, B, C, F, and H, Ft. Concho, Tex.; D and E, Ft. McIntosh, Tex.; I, Ft. Davis, Tex.; G and K, San Antonio, Tex.

Leave until Nov. 1, on Surgeon's certificate, is granted Major John B. Parke (S. O., Aug. 14, H. Q. A.)

One month's extension of leave is granted 2d Lieut. Charles C. Ballou (S. O., Aug. 16, H. Q. A.)

1st Lieut. Wm. P. McFarland, granted five months leave from Sept. 10. (S. O., H. Q. A., Aug. 19.)

17th Infantry, Colonel Alexander Chambers.

Hdqrs., A, C, D, E, F, G, I, and K, Ft. D. A. Russell, Wyo.; B, Camp Medicine Butte, Wyo.; H, Ft. Bridger, Wyo.

1st Lieut. James M. Burns is relieved as J.-A. of the G. C.-M. at Fort D. A. Russell, Wyo., and 1st Lieut. James D. Nickerson is detailed as J.-A. of the G. C.-M. in his stead (S. O. 100, Aug. 9, D. Platte.)

1st Lieut. W. A. Mann, Adjt., is relieved from rec. service at Fort Yates (S. O. 78, Aug. 12, D. Dak.)

2d Lieut. E. I. Grumley is relieved from rec. service at Fort Totten, D. T. (S. O. 78, Aug. 12, D. Dak.)

One month's extension of the leave of absence is granted 2d Lieuts. James L. Druien and Lucius L. Durfee (S. O., Aug. 13, H. Q. A.)

18th Infantry, Colonel John E. Yard.

Hdqrs., A, B, and D, Ft. Hays, Kas.; E and F, Ft. Leavenworth, Kas.; C and I, Ft. Gibson, I. T.; G, H, and K, Ft. Riley, Ks.

Sergt. H. C. Weinhold, Co. A; 2d Lieut. C. B. Hardin, Co. B, and 2d Lieut. D. C. Shanks, Sergts. W. O. Donnell and F. Kose, Corpls. L. N. Borton and W. F. Patton, and Private W. W. Bisbee, Co. I, have qualified as sharpshooters.

19th Infantry, Colonel Charles H. Smith.

Hdqrs., A, B, C, E, F, H, and K, Ft. Clark, Tex.; D and I, Ft. Ringgold, Tex.; G, Ft. Brown, Tex.

One month's extension of leave is granted 2d Lieut. Frank McIntyre (S. O., Aug. 16, H. Q. A.)

Capt. John S. Wharton will report in person to Major-Gen. John M. Schofield, president of the Army Retiring Board convened at Governor's Island, N. Y. H., by an order from the War Department dated July 20, 1886, published in S. O. 168, July 22, 1886, from H. Q. A., for examination by the Board, and on the conclusion of his examination will return to the place whence ordered (S. O., Aug. 18, H. Q. A.)

20th Infantry, Colonel Elwell S. Otis.

Hdqrs., A, B, C, E, F, H, and K, Ft. Assiniboine, M. T.; D, Ft. Maginnis, M. T.; G and I, Camp Poplar River, M. T.

The extension of leave on Surgeon's certificate granted 1st Lieut. Thomas W. Lord is still further extended six months on Surgeon's certificate (S. O., Aug. 14, H. Q. A.)

21st Infantry, Colonel Henry A. Morrow.

Hdqrs., A, C, E, and G, Ft. Sidney, Neb.; D and H, Ft. Bridger, Wyo.; B, F, I, and K, Ft. Duchesne, Utah (Post-office address via Ouray, Utah).

Capt. George M. Downey, Fort Bridger, Wyo., will proceed to Fort Sidney, Neb., and report for such as he may be able to perform (S. O. 102, Aug. 12, D. Platte.)

One month's extension of leave is granted 2d Lieut. Charles G. Dwyer (S. O., Aug. 16, H. Q. A.)

Twenty-four recruits will be prepared and forwarded to such point in the Dept. of Platte as the Comdg. General of the Department shall designate for assignment to Cos. B, F, I, and K (S. O., Aug. 18, H. Q. A.)

22nd Infantry, Colonel Peter T. Swaine.

Hdqrs., A, B, D, G, H, and K, Ft. Lewis, Colo.; C, F, and I, Ft. Lyon, Colo.; E, Ft. Marcy, N. M.

1st Lieut. J. J. Crittenden, Fort Marcy, and 2d Lieut. E. O. C. Ord, Fort Lewis, will report at Fort Wingate, N. M., in time to take part in the rifle contest to be held there (S. O. 74, Aug. 5, D. Ariz.)

Leave for one month is granted 1st Lieut. C. C. Cusick (S. O. 85, Aug. 10, Dept. M.)

One month's extension of leave is granted 2d Lieut. William M. Swaine (S. O., Aug. 18, H. Q. A.)

23rd Infantry, Colonel Henry M. Black.

Hdqrs., F, G, H, and I, Ft. Wayne, Mich.; A and B, Ft. Brady, Mich.; C and D, Ft. Porter, N. Y.; E and K, Ft. Mackinac, Mich.

The journey performed by 2d Lieut. J. A. Dapray, A. D. C., from Bowie Station to Willcox, A. T., July 30, was necessary for the public service (F. O. 79, Aug. 1, D. Ariz.)

2d Lieut. William H. Allaire will proceed from Fort Wayne to Fort Mackinac, Mich., and report for temporary duty (S. O. 111, Aug. 16, Div. A.)

24th Infantry, Colonel Zenas R. Bliss.

Hdqrs., D, and H, Ft. Supply, Ind. T.; A and K, Ft. Reno, Ind. T.; B and F, Ft. Elliott, Tex.; C, E, G, and I, Ft. Sill, Ind. T.

Leave for ten days is granted Capt. A. C. Markley (S. O. 84, Aug. 9, Dept. M.)

The leave for seven days granted Capt. J. L. Bullis is extended ten days (S. O. 87, Aug. 13, Dept. M.)

One month's extension of the leave of absence is granted 2d Lieut. David W. Fulton (S. O., Aug. 13, H. Q. A.)

One month's extension of leave is granted 2d Lieut. Henry C. Keene, Jr. (S. O., Aug. 14, H. Q. A.)

Leave for four months, with permission to go beyond sea, is granted 2d Lieut. Charles L. Collins (S. O., Aug. 17, H. Q. A.)

Capt. J. M. Thompson, Sergt. L. W. McNabb, and Corpl. P. Conley, Co. D, and Corpl. W. Preston, Co. H, have qualified as sharpshooters.

25th Infantry, Colonel George L. Andrews.

Hdqrs., B, C, F, and I, Ft. Snelling, Minn.; A, D, H, and K, Ft. Meade, Dak.; E and G, Ft. Sisseton, Dak.

Leave for four months, with permission to apply for an extension of two months, is granted Capt. D. B. Wilson (S. O., Aug. 14, H. Q. A.)

Appointments, Promotions, Retirements, Transfers, Casualties, etc., of Commissioned Officers of the U. S. Army recorded in the Adjutant-General's Office during the week ending Saturday, August 7, 1886.

[All these have already appeared in the JOURNAL.]

During the week ending Saturday, August 14, 1886.

RETIREMENT.

2d Lieutenant John T. Barnett, 5th Cavalry, Aug. 10, 1886 (section 1251, Revised Statutes).

Military Academy.

The resignation of Cadet Frank I. Barrett, 4th Class, is accepted (S. O., Aug. 14, H. Q. A.)

—o—

Courts-martial.

The following courts have been ordered:

At Fort Leavenworth, Kas., Aug. 11. Detail: Capts. W. M. Wherry and J. P. Schindel, 6th Inf.; Capt. T. J. Lloyd, 18th Inf.; Capt. C. A. Woodruff, 2d Art.; Capt. J. B. Johnson, 3d Cav.; 1st Lieut. A. M. Wetherill, 6th Inf.; 1st Lieut. F. H. Barnhart, 18th Inf.; 1st Lieut. Hamilton Rowan, 2d Art.; 2d Lieut. W. M. Dickinson, 4th Cav., and 1st Lieut. O. L. Hein, 1st Cav., J.-A. (S. O. 84, Aug. 9, Dept. M.)

At Fort Robinson, Neb., Aug. 17. Detail: Lieut.-Col. Joshua S. Fletcher, Jr., 2d Inf.; Capt. Charles Parker, 9th Cav.; Capt. James Miller and 1st Lieut. Augustus R. Egbert, 2d Inf.; 1st Lieuts. Ballard S. Humphrey and Henry H. Wright, 2d Lieuts. William D. McAnaney and Philip A. Bettens, Jr., 9th Cav., and Capt. Walter Reed, Med. Dept., J.-A. (S. O. 100, Aug. 9, D. Platte.)

At Fort Custer, M. T., Aug. 16. Detail: Major Henry Carroll, Capts. James Jackson, Moses Harris, and Albert G. Forse, 1st Cav.; Capt. Curtis E. Price, Med. Dept.; Capt. Frank K. Upham, 1st Lieuts. Herbert E. Tutherly, Jacob G. Galbraith, and Oscar J. Brown, and 2d Lieut. George L. Byram, 1st Cav., and 2d Lieut. James B. Aleshire, 1st Cav., J.-A. (S. O. 78, Aug. 12, D. Dak.)

At Fort Shaw, M. T., Aug. 23. Detail: Capts. Edward Moale, Charles Hobart, and Joseph Hale, 2d Inf.; 1st Lieut. George F. Wilson, Med. Dept.; 1st Lieuts. Frederick Thies, R. Q. M., Frank P. Avery, and William E. P. French, and 2d Lieut. Henry P. McCain, 3d Inf., and 2d Lieut. John H. Beacom, 3d Inf., J.-A. (S. O. 78, Aug. 12, D. Dak.)

At Fort Grant, A. T., Aug. 16. Detail: Col. B. H. Grierson and Major Frederick Van Vliet, 10th Cav.; Capt. W. H. Corbusier, Asst. Surg.; Capts. Charles Porter, E. B. Savage, and Gordon Winslow, 8th Inf.; 1st Lieuts. S. L. Woodward, Adjt., and William Davis, Jr., 10th Cav.; 1st Lieut. J. A. Haden, 8th Inf.; 2d Lieut. C. P. Johnson, 10th Cav.; 2d Lieut. S. E. Smiley, 8th Inf., and 1st Lieut. L. P. Hunt, 10th Cav., J.-A. (S. O. 76, Aug. 9, D. Ariz.)

At Little Rock Barracks, Ark., Aug. 20. Detail: Major Francis L. Guenther and Capt. Frank B. Hamilton, 2d Art.; Capt. Blair D. Taylor, Asst. Surg.; 1st Lieuts. Asher C. Taylor, Ephraim T. C. Richmond, and John H. Gifford, and 2d Lieut. John T. Thompson, 2d Art., and 1st Lieut. Louis V. Caziarc, 2d Art., J.-A. (S. O. 112, Aug. 17, Div. A.)

At Madison Barracks, N. Y., Aug. 20. Detail: Capts. Harry C. Egbert, Alex. B. MacGowan, John M. Norvell, David J. Craigie, and George S. Wilson, 1st Lieuts. Augustus G. Tassin, Frederick Von Schrader, and Wallis O. Clark, and 2d Lieut. Charles W. Abbot, Jr., 12th Inf., and 1st Lieut. F. A. Smith, Adjt. 12th Inf., J.-A. (S. O. 113, Aug. 18, Div. A.)

At Alcatraz Island, Cal., Aug. 12. Detail: Major Alanson M. Randol, 1st Art.; Capt. Robert J. Gibson, Asst. Surg.; Capts. Richard G. Shaw and Edmund K. Russell and 1st Lieut. Henry M. Andrews, 1st Art., and 2d Lieut. Samuel D. Sturgis, Jr., 1st Art., J.-A. (S. O. 69, Aug. 10, D. Cal.)

The G. C.-M. at Alcatraz Island, Cal., of which Major Alanson M. Randol, 1st Art., is president, is dissolved (S. O. 69, Aug. 10, D. Cal.)

—o—

Army Boards.

A Board of Survey will convene at Santa Fe, Aug. 7, to fix the responsibility for wastage on 24,992 pounds issue bacon. Detail: Capt. C. J. Dickey, 22d Inf.; Capt. E. B. Atwood, A. Q. M., and 1st Lieut. T. S. Mumford, R. Q. M., 13th Inf. (S. O. 60, Aug. 7, D. N. M.)

A Board, to consist of 2d Lieuts. Joseph S. Powell and Frank Greene, Signal Corps, and Prof. T. C. Mendenhall, Assistant, will assemble, Aug. 10, to report upon the specifications for furnishing, delivering, and laying the submarine telegraph cable from Cape Charles to Cape Henry, Va. (S. O. 75, Aug. 10, Sig. Office.)

A Board of Survey, to consist of 2d Lieuts. Joseph S. Powell, Frank Greene, and John C. Walshe, Signal Corps, will assemble, Aug. 13, to fix the responsibility for deficiency in property received by Capt. Francis B. Jones, A. Q. M., from Private William D. Maxwell, Signal Corps (S. O. 75, Aug. 10, Sig. Office.)

A Board of Officers will meet at the Presidio of San Francisco, Aug. 10, to witness experiments with dynamite, to be conducted by Mr. J. W. Graydon. Detail: Capt. John W. Dillenback and 1st Lieuts. Henry L. Harris and Adam Slaker, 1st Art. (S. O. 67, Aug. 7, D. Cal.)

A Board of Survey, to consist of Capt. James M. Marshall, A. Q. M., and Capt. Charles C. De Rudio, 7th Cav., will assemble at the general depot of the Q. M. Dept., Philadelphia, Penn., Aug. 20, or as soon thereafter as practicable, for the

purpose of examining into certain deficiencies and excesses found to exist in making the transfer of the property at said depot from Capt. William H. Gill, M. S. K., to Capt. John V. Furey, A. Q. M. (S. O., Aug. 17, H. Q. A.)

Retirements of Enlisted Men.

Corpl. Lawrence Dwyer, Artillery Detachment, Military Academy.

Model Sights.—Division and Department commanders have directed that in case any of the model 1884 sights attached to the rifles now in the hands of troops do not work satisfactorily, they be taken off and sent by mail to the National Armory, marking the sights with their rifle numbers and retaining the base screws.

Movements of Troops.—Gen. Ruger, commanding Department of Dakota, in S. O. 76, of August 9, directs that consequent upon the transfer of the 17th Infantry to the Department of the Platte, the following changes of stations will be made: Troop F, 1st Cav., from Fort Maginnis to Fort Assinniboine, M. T. The troops will march via Fort Benton, M. T. Co. I, 20th Inf., from Fort Assinniboine, M. T., to Camp Poplar River, M. T.; Co. G, 20th Inf., from Fort Maginnis, M. T., to Camp Poplar River, M. T.; Cos. K and G, 15th Inf., (on arrival at Camp Poplar River of Cos. I and G, 20th Inf.) from Camp Poplar River, M. T., to Fort Buford, D. T.; Cos. C and H, 11th Inf., from Fort Buford, D. T., to Fort Yates, D. T.; without awaiting arrival of the companies of the 15th Infantry from Camp Poplar River. Co. F, 5th Inf., from Fort Keogh, M. T., to Fort Totten, D. T. All the movements, hereby ordered, be finished during August, if practicable. Cos. K and G, 15th Inf., will march from Camp Poplar River to Fort Buford, D. T. (S. O. 76, D. Dakota, Aug. 9.)

DEPARTMENT NEWS.

Dept. of Texas.—Brig. Gen. D. S. Stanley.

Current events, says the El Paso *Times*, are making it very plain that sooner or later El Paso will have to be made military headquarters for the Southwest. The Santa Fe *New Mexican* recognizes this fact and works itself into a perfect fever of excitement over it. It says that Fort Bliss is utterly unfit for a military post, being defenceless against a sudden attack. It forgets that if it should come to a war against Mexico, Uncle Sam would not be apt to act on the defensive. The *New Mexican* trots out an imaginary Army officer and makes him say as follows: "If we should have a little brush with our Mexican neighbors Fort Bliss wouldn't last three minutes. Its location is such that the Mexican soldiers could climb up on the high bluff, just across the river from the fort, and stone to death every American soldier stationed there. The situation of Fort Bliss shows the folly of our Government in locating its frontier posts. None of the towns along the extreme frontier would serve as points of rendezvous or for the storage of ordnance or Army supplies, should serious trouble arise at this time; therefore it is the better policy to establish the forts and the supply depots some distance back from the border." The *Times* makes free to say that there is not an officer in the United States Army who would be guilty of uttering such egregious nonsense.

Dept. of the Platte—Brig. Gen. George Crook.

At the eighth annual reunion of the Nebraska G. A. R., at Grand Island, Aug. 30 to Sept. 4, the first day will be devoted to the reception of the posts and evolutions by Regular troops in attendance. The second day an artillery drill, etc.; third day, a dress parade and representations of the battle of Belmont, and an English cutter attempting to run the blockade; fourth, a dress parade by U. S. Regulars and a fine naval scene—the fight between the *Merrimac* and the *Congress*. A complete representation of the battle of Five Forks and a naval scene of the renowned battle of the *Merrimac* and the *Monitor* will be the features of the fifth day.

Dept. of Arizona.—Brig.-Gen. N. A. Miles.

A despatch of Aug. 16 from Nogales, says: Couriers have arrived at Fort Huachuca from both Capt. Lawton's and Lieut. Parker's commands, and report no truth in the rumor of the former's capture. Capt. Lawton is still pursuing the hostiles, but is hampered by heavy rains. A private despatch received Aug. 15, from Huachuca states that a courier had arrived with despatches from Lieut. Richards, dated Bagriechi, Mex., Aug. 13, in which he says that James H. Kirk and five other ranchmen, who were out searching for Indian trails, were ambushed last Tuesday by a band of Indians in Santa Rosa Canyon. Two of Kirk's party were killed by the first volley. A desperate fight ensued, in which another ranchman was killed and two wounded. There were 11 Indians in the band. A despatch referring to the recent murder and burning of Mr. and Mrs. Martin and two children, says: "This is the most diabolical crime ever committed in Arizona by Indians or whites."

A later despatch says: "Two couriers arrived at Huachuca at 4 P. M., Aug. 17, bringing news that Lieut. Gatewood joined Lawton's command Aug. 6. Lawton has not seen or heard of hostiles since July 21. Heavy rains made it impossible to follow a trail over twelve hours old. At the time the couriers left Lawton was rafting his command over Arras River. Gatewood's Indians are to act as guides. The rains are unusually heavy.

Division of the Atlantic.—Maj.-Gen. Schofield.

The Chief of Engineers has received the report of Col. Gillmore, who is improving the fortification of Fort Monroe. A number of important changes have been made in the armament of the fort and the construction of barbettes.

Gen. Schofield has directed the C. O. Fort Warren to send four enlisted men to Fort Winthrop, Mass., to report to the ordnance sergeant and assist him in putting the armament, etc., in better order (S. O. 111, Div. A., Aug. 16.)

The War Department has placed a portion of Bedloe's Island at the disposal of the Charity Organization Society, so that poor and enfeebled women and delicate children may enjoy the salt breezes that blow up from the sea.

Dept. of Dakota.—Brig. Gen. T. H. Ruger.

A recent despatch reports serious prairie fires in the vicinity of Fort Assinniboine.

RIFLE COMPETITIONS, 1886.

OUR synopsis of last week brought matters up to Aug. 13, and we follow with the proceedings and orders, etc., of this week:

Division of the Atlantic.—Fort Niagara is now in good shape for the competitions and those going there should not fail to read our remarks of last week (pp. 51 and 52), as to accommodations, etc. Major-Gen. Schofield, Aug. 16, issued the following orders:

The following officers, selected as competitors for places on the Division team, will report Aug. 28, at Fort Niagara, N. Y.: Capt. Wm. P. Vose, 2d Art.; Capt. James B. Burbank, 3d Art.; 2d Lieut. Beverly W. Dunn, 3d Art; Capt. George G. Greenough, 4th Art.; 1st Lieut. Frederick A. Smith, Adjt., 12th Inf.; 2d Lieut. Wallis O. Clark, 12th Inf.; Capt. Joseph T. Haskell, 23d Inf.

The C. O. Fort Niagara, N. Y., will furnish from his command, and from the officers and troops ordered to report to him for this duty, such details of officers and enlisted men as may be necessary in conducting the rifle competitions. The specific duties on the range will be designated by the officer in charge of the competitions. The C. O. Fort Niagara, is authorized to send an officer of his command to Buffalo on public business relating to the Division rifle competitions.

The C. O. Fort Porter, will send Co. D, 23d Inf., (Smith's) to report to the C. O. Fort Niagara, Aug. 26, for duty during the rifle competitions.

The following officers will report Aug. 28 to the C. O. Fort Niagara, N. Y., for duty on the range during the rifle competitions: 1st Lieut. Geo. P. Scriven and 2d Lieut. John D. Barrette, 3d Art.; 2d Lieut. Edwin B. Babbitt, 5th Art.; 2d Lieut. Charles W. Abbot, Jr., 12th Inf., and 2d Lieut. Daniel B. Devore, 23d Inf. (S. O., 114, Div. Atlantic, Aug. 19.)

Department of Dakota.—Fort Snelling is filling up rapidly, and all is prepared for the competitions which commence on Saturday of this week, Aug. 21, under the supervision of Lieut. R. F. Bates, 1. R. P.

Department of California. — The contests took place at the Presidio, and were superintended by Lieut. T. L. Casey, Jr., Corps of Engineers. Lieut. H. L. Harris, 1st U. S. Art., was the Range, Financial and Statistical Officer, and the Range Officers were Lieuts. F. S. Rice and M. F. Harmon, 1st Art.

Department of Arizona.—The competitions commenced Aug. 14 and terminated Aug. 21. They were quite successful, but detailed results are not yet to hand. The team now goes to San Francisco to participate in the Division of the Pacific contest, which commences at the Presidio Sept. 1.

Department of the Missouri.—The competitions begin Aug. 21. The camp officers are as follows: In charge, Capt. T. J. Wint, 4th Cav.; Executive officer, 1st Lieut. A. M. Palmer, 24th Inf.; Range officers, 1st Lieut. H. J. McGrath, 4th Cav.; 2d Lieut. C. B. Hardin, 18th Inf., and 2d Lieut. Carl Reichmann, 24th Inf.; Adjt., Commissary and Q. M., 2d Lieut. W. T. Wood, 18th Inf.; Statistical and financial officer, 1st Lieut. W. A. Shunk, 8th Cav.

The programme is as follows: Competitors report by Aug. 19. Preliminary practice and competition take place between Aug. 21 and 31. 1st day, preliminary practice, 200, 300, 500, and 600 yards; 2d day, preliminary skirmish firing, bull's-eye firing, etc; 3d day, preliminary practice, 200, 300, 500, and 600 yards; 4th day, Dept. competition, 200, 300, 500, and 600 yards; 5th day, Dept. competition, skirmish firing, bull's-eye firing, etc.; 6th day, Dept. competition, 200, 300, 500, and 600 yards; 7th day, Dept. competition, skirmish firing, presentation of medals.

Department of the Platte.—Last week we gave the composition of the camp at the Bellevue rifle range. The competitions commence Aug. 20. We regret to learn that a storm on Friday last (Aug. 13) played havoc at the camp, as described in the letter which appears elsewhere.

Department of Texas.—The competitions closed at Fort Clark last week, under the direction of Major R. F. Bernard, 8th Cavalry. Results not yet to hand. The team now goes to Fort Leavenworth to participate in the Division of the Missouri contest, which commences at that post Sept. 13.

(Correspondence of the Army and Navy Journal.)

THE MILITARY ACADEMY.

WEST POINT, N. Y., Aug. 18, 1886.

A LARGE number of men have been at work in Cadet Barracks since July 1. New floors will be put in every room and hall not floored last year; the wood work of the walls of the rooms and halls have been kalsomined or painted. The cement walk in the area of barracks used for the formation of class parades has been extended to the end of the area. As the appropriation for repairing the Academic Building was not granted, but little will be done to make the section rooms more attractive.

The narrow door leading from the area into the basement of the Academic Building has been removed and in its place will be two large folding-doors. This is an improvement that has been long needed.

Last week the Point was visited by a genuine crank, who claimed to be a lineal descendant of the Great Napoleon; he said that he was being pursued by enemies and had come here to join the Corps of Cadets so as to have the protection of the Government. He is still a crank but not a cadet

Capts. Chas. Morris and J. M. Fessenden, 5th Art., and Lt. Alfred C. Sharpe, 22d Inf., were registered at the hotel last week.

Mrs. Thomas, widow of Gen. George H. Thomas, and her sister, Miss Kellogg, have been here several weeks; they are guests of the hotel.

Col. D. W. Flagler, Ordnance Dept., is visiting Col. Hasbrouck.

Major Spurgin and Lieut. Davis have returned from a visit to the seashore.

Lieut. C. M. Perkins and wife, of the Marine Corps, are registered at the hotel.

Col. John M. Wilson, of the Engineers, and Major John N. Andrews, 21st Inf., arrived on Tuesday.

The 17th Annual Report of the Association of Graduates will be mailed to members of the Association by the end of this week. It is an unusually interesting pamphlet of 162 pages. The obituary notice of Gen. Grant is written by Gen. Tower; of Gen. McClellan, by Gen. Franklin; of Gen. Hancock, by Gen. Wm. Farrar Smith; two of Gen. Hunter are by Gens. Ricketts and Townsend: two of Gen. Donaldson, by Gens. Hagner and Cullum; of Gen. Swords, by Gen Sherman and Col. Moulton of Capt. Boyd by Col. Savage. They will be read with a great deal of interest by all officers. The letters of Mr. Geo Ticknor, who was Secretary of the Board of Visitors in 1826, are added to the pamphlet as a supplement.

The Reminiscences of Miss Berard and Register of Graduates, with an index, corrected to date, will be ready in about a month. The copy is in the hands of the printer.

On Thursday last the horse Cruiser was run into by a gun-carriage: his leg was badly broken and it was necessary to shoot him, which was done in the presence of the large number of spectators viewing the drill. The horse was a favorite with the cadets. The poor animal's sufferings and tragic end had a visible effect upon all who saw him executed, three shots being required to put an end to his career.

The spacious parlor of Cranston's Hotel was filled Tuesday evening by a select audience to witness an amateur dramatic performance of the charming comedietta entitled, Who's to Win Him, for the benefit of the Cavalry Church Summer Home for poor and sick children.

The cast was as follows: Cyril Dashwood, Mr. V. Sternroyd; Mr. Prattleton Primrose, Mr. T. A. Maitland; Squire Brushleigh, Mr. W. Williams; Rose, Miss A. de H. Irwin; Sylvia, Miss N. Dickinson; Arabella, Mrs. James Mackin; Minnetta, Miss F. A. Dickinson; Musidora, Miss J. Murchesin.

Mr. Sternroyd is of the New York Lyceum Theatre. Mrs. Irwin was prompter. Miss Irwin arranged the stage in a beautiful and artistic manner and also rendered much assistance in preparing the toilets. The Miss Irwin in the cast is the youngest daughter of Dr. Irwin, U. S. A.; this was her first appearance and her part was very acceptably rendered. All of the ladies did exceedingly well. No more beautiful picture was ever seen on a stage than that presented by Mrs. Mackin. She was fairly deluged with bouquets and when the entertainment was over had enough flowers to start a horticultural exhibition.

Of the gentlemen, Mr. Maitland carried off the honors, although he failed (theoretically) to carry off one of the fair actresses.

The Color Line Entertainment was held Wednesday evening. It was witnessed by an immense audience, which seemed to include every man, woman and child within ten miles of the Point.

The feature of the evening was a silent manual drill by about a dozen cadets dressed in white. The manual was done without any commands whatever, every fourth bar of the music being the signal for executing the required movement. The following programme was distributed among the spectators:

CADET OPERA HOUSE

(Largest seating capacity in the world! Absolutely no dange from fire). Place de la Skinniere. Wednesday, Aug. 18, 1886.

Bill of the Play—Jenkins' Peerless Company in the "Sylph and the Sentinel"—An operetta in two acts. Following is the cast:

Adolphus—A somnolent sentinel, Mr. Russ.

Augustus—A typical West Point villain (Officer of the Day), Mons. Robinson.

First Cadet, Mr. Rhodes; Second Cadet, Mr. Randlett; Third Cadet, Mr. Moore.

Corporal, Mr. Lee.

Cynthia—(a beautiful maiden), Miss Molecule Lucas; Cynthia's Chaperone, Mrs. Gatchell.

Queen of the Fairies—(a sylph—premiere danseuse), Mlle. Perry

First Lady, Miss Landers; Second Lady, Miss Rogers; Third Lady, Miss Squier; Fourth Lady, Miss Skerrett.

BALLET (FAIRIES).

Princess, Mlle. Lenihan; Airy Fairy Lillian, Mlle. Haan; Mona, Mlle. Miley; Monica, Mlle. Edwards; Doris, Mlle. Wittenmyer; Phyllis, Mlle. Bruce; Molly Bawn, Mlle. Mitchell.

Chorus—Ladies, Cadets, Members of the Guard, and Fairy Army.

Indian Clubs—Cadet Hedekin, Cadet Langhorne.

Dancing—Cadet Slavens, Cadet Hart, J. A., Cadet Strawn, Cadet Butler, Cadet Kenly.

Hen—Cadet Johnson, A. S.

Scenic Artists—Cadet Wassell, Cadet Taylor, J, R. M.

Head Usher—Cadet Wheeler.

ORCHESTRA U. S. M. A. BAND.

N. B.—Opera glasses may be obtained from the Department of Practical Military Engineering.

Breezes from the mountain tops. Perfumes from the Hudson River Valley.

The stage scene was very fine. As the curtain rose, a beautiful view of a portion of cadet camp was displayed, with a live cadet in the foreground doing sentinel duty. The front of the stage was trimmed with a number of beautiful Chinese lanterns. The performance was ended with a display of fireworks on the cavalry plain.

Chas. F. Van Benthuysen, Albany; George D. Guyer (alt.), Albany; Elmer Lindsley, Franklin, N. Y., and Edward A. Holmes (alt.), Downsville, N. Y., have been designated for examination for admission to the U. S. Military Academy.

FORT APACHE, A. T.

August 9, 1886.

SINCE the early spring there has been a constant outgoing from and incoming to Apache. Almost every week has witnessed the departure of some much deplored or the arrival of highly appreciated friends. Last Sunday, Aug. 1, two companies of the 9th Inf. arrived in the post and selected quarters, this being their station for the present. Captains Morton and Bowman, Lieutenants De Laney, Miner and Tyson are the officers with these companies, and later Lieut. Wyatt is expected to join. The families of those gentlemen who are so blessed will arrive here during the autumn. Last Tuesday Captain Heiner left Apache for Benicia, Cal., via Holbrook. Mrs. Heiner and family joined him the following day. They will be greatly missed by their many friends and admirers in our garrison.

Next in the order of going is Mrs. Wade, the wife of our commanding officer, with her son John and daughter Clara, also Miss Marie Brown. The temporary loss of so lovely and capable a lady as Mrs. Wade would be severe enough to those who know and love her; but there is the probability that she may return to us no more, as her husband, Lieut. Col. J. F. Wade, stands at the head of the list, and will in the coming fall become Colonel of the 5th Cavalry, should Gen. Wesley Merritt be appointed to the vacancy in the brigadiers, which will occur in October.

The 10th will regret the loss of Col. Wade, and wherever he and his lovely family go, their presence and influence will surely prove a blessing to those who may have the good fortune to be stationed with them.

We are also to lose our Chaplain, with his dear little wife and their family. Chaplain Weaver will be greatly missed in Apache; but he goes to join the headquarters of the 10th Cavalry at Fort Grant, A. T., and we of the regiment who are left behind may dare hope to meet him and his again.

Friday evening last the young officers of the garrison gave an informal hop at the post library; it was generally attended and greatly enjoyed. Saturday evening Captain and Mrs. Cooper gave a card party in honor of Colonel and Mrs. Wade. Chaplain and Mrs. Weaver, Major Horton and Capt. Bowman, Lieut. Beck, Mrs. Beck and Miss Beck, Lieut. Finley and his sister, Mrs. Weston, were invited to meet them. Music and refreshments varied the programme of the evening, and all enjoyed the pleasant hospitality of the host and hostess.

The Indian news at present is that ten bucks and three squaws of Geronimo's band are coming this way. It is the general opinion that Gen. Miles will soon conquer these renegades, and it is also thought that the Mexicans need a little wholesome chastisement in order to impress them with the great importance it *might* be to them to treat Americans with a trifle more respect, or, in other words, "to think twice" before they act once.

We have been experiencing unusually warm weather here, but the fishing, horseback riding, lawn tennis, and croquet still go on, and the mountains look as fresh and green, and the musical rythm of the splash, splash of White River, as it flows on and on, is just as sweet and restful as the lullaby sung by a loving mother to a play-wearied child. All day the hot sun and military routine; all night the fresh breeze,

the silver moon, and the assuring call of the sentinel on his beat, "— o'clock and a-l-l-'s w-e-l-l," and a prayer ever ascends to heaven that the sentinels throughout the United States may ever be able to call out the hours of the night, with an "All's well."

FORT MISSOULA, MONTANA.

THE *Missoulian*, referring to the recent promotion and departure of Col. George Gibson, says:

Col. Gibson having received orders to Fort Keogh, the officers and ladies of Fort Missoula Wednesday evening gave a complimentary hop to him and his estimable lady. It was attended by all the officers and ladies at the post, and C. F. Davis's orchestra furnished the music. A most delightful evening was spent, the only bar to the pleasure of the occasion being the remembrance that it was a farewell to the colonel and his wife, whose friends are innumerable. At midnight the guests partook of an elegant lunch, and the party broke up at 2 o'clock in the morning.

Lieut.-Col. Geo. Gibson, 3d Infantry, has received his well-deserved promotion, becoming colonel of the 5th Infantry. He is of an old and prominent family of Pennsylvania, being the son of the late Chief Justice Gibson of that State, and entered the U. S. Army in 1853, and has been connected with the military service ever since, his record being without a stain. In this long and honorable career he has had the encouragement of a loving wife, whose superior mental and moral traits have made her popular wherever she went, adding to the happiness of her home and the honor of her husband. It is a matter of much regret at the post and in town that the vicissitudes of Army life take this distinguished officer and his charming lady away from us.

Other items from Fort Missoula are as follows:

Mrs. Edgerton, the fascinating Helena lady who has been visiting Mrs. Capt. Bartlett for several weeks, contemplates leaving to-night for Deer Lodge.

The successor of Col. Gibson in the 3d is Lieut.-Col. Horace Jewett. He is expected about the 1st of September. Until his arrival here Major Geo. E. Head will be in command.

(Correspondence of the Army and Navy Journal.)

COLUMBUS BARRACKS, O.

AUGUST 8, 1886.

CAPT. JOCELYN, 21th Inf., and guard, have returned from Fort Leavenworth, Kas., whither they conducted six military convicts. 1st Lieut. Wm. J. Campbell, 22d Inf., has been relieved from duty at Columbus Barracks and left for Cincinnati, where he will relieve Capt. John S. McNaught, 20th Inf., the recruiting officer in that city, who has been ordered to report for duty at this depot. 1st Lt. A. Ogle, 17th Inf., left the past week in command of a detachment of 21 recruits assigned to the 9th Infantry, Fort Thomas, Ariz. J. S.

COURT-MARTIAL CASES.

Private Louis La Dow, Troop C, 2d Cavalry, has been sentenced to dishonorable discharge and ten years' confinement at hard labor in the California State Prison for desertion, theft of jewelry from Captain E. J. Spaulding, 2d Cavalry, to the value of $691, and of jewelry from Lieut. Colon Augur, 2d Cavalry, to the amount of $214, theft of a public horse, and theft of military equipments. Fort Bidwell, Cal., was the scene of these depredations.

(Correspondence of the Army and Navy Journal.)

CYCLONES VERSUS BULL'S-EYES.

THAT the former can discount the latter we had good evidence on Friday night at the Department of the Platte rifle range. It had been blowing a fresh breeze all the evening, with continual flashes of lightning, when, about 12.30 P. M., a lull or deathly stillness prevailed, which, after about five minutes, was followed by a crash, a tornado of wind, floods of water, and most vivid lightning. In a few minutes the work of weeks, putting up tents, etc., was utterly destroyed. 47 tents were laid flat; several being blown away, others torn into whip cord; property scattered and everyone soaked to the skin. One sergeant was blown 50 yards; rifles and carbines lodged in tops of trees, one mule caught in a tent and carried into a tree, and several men injured. Lieuts. Brooke, Cochran, Styer and Hutcheson, drenched to the skin, shed their garments, and, in nature's apparel, flitted around camp, looking after the debris—the latter formed a striking picture in the moonlight, on top of his ridge pole, trying to adjust his tent fly. Lieut. Taggart, 6th Infantry, whose tent stood, slept through it all; and the boys started to pull his tent down, and he out, when he concluded to come out, when he was taken around camp, with nothing on but a breech clout. The water stood for some time nearly up to your knees, and the moon came out clearly, and smiled sweetly upon the successful work of the elements. Colonel Henry's tent was carried over his head and lodged in trees; and he, while holding on to front tent pole, thrown out, where he was found by Lieuts. Hutcheson and Brooke holding on to a tree, with his boy, expecting to land in the Missouri River, a short distance below. His carriage, fastened to trees, and in a hollow, was turned over and badly smashed.

Capt. Ulio's tent stood the storm, it not having struck that side. He remarked next morning that not having any cyclones, in the "promised land," from which the 2d Inf. had just come, he was anxious to see some of our products—his first cyclone seems to have satisfied him. Lieut. Burns, of the 17th, also on fortunate side, from Dakota, thinks Nebraska a success at blowing.

Speaking of this storm, a local says: "A terrific storm, in the nature of a tornado, passed over the western part of this country about half an hour after midnight, and in a S. W. course, striking the Missouri at Bellevue. It crossed the line of the Union Pacific Railway at Gilmore, where it took three box cars on a train, standing in front of the depot, and carrying them out like links in a chain, pulled up the rear of the train, and threw them over on their sides on the depot platform. . . The width of the tornado's track is pretty well measured by the three freight cars that it caught at Gilmore."

We can have one consolation, with it all, that in this baptismal of the new infant, Bellevue, on our rifle range, that whatever our failures in shooting away from here, we can impart all desired information to others, in reference to "points on the wind;" we prefer ours left. CYCLONE.

THE REASON WHY.

To the Editor of the Army and Navy Journal:

IN your issue of July 17, Deriter asks "How it comes to pass that the Army Mutual Aid Association, with something like a membership of 200 more than the Navy Mutual Aid, pays a benefit of $1,000 less?"

Now without going into a long explanation, and quoting figures to sustain it, as Mr. Duvall has done in your issue of Aug. 7, I will simply invite Deriter's attention to section 10 of By-Laws, pages 15 and 16, Fifth annual report of the association, published in 1884, which limits the "net benefit to $2,500, or a total of $300 per capita of the membership when the death occurs."

Had Deriter, in his quest for information (?), shown as much care in reading the Constitution and By-Laws of the association, as he has evidently shown in trying *not to find* what he sought, his question would have been unnecessary. A MEMBER.

THE NAVY.

NAVAL VESSELS IN COMMISSION.

WHEN AND WHERE LAST HEARD FROM.

N. Atlantic Station—Rear Admiral S. B. Luce.

GALENA, 3d rate, 8 guns, Comdr. Colby M. Chester. Sailed from Portland, Me., Aug. 6, on short cruise. Was reported at Halifax, N. S., Aug. 16.

SWATARA, 3d rate, 8 guns, Comdr. E. T. Woodward. At Portland, Me.

TENNESSEE, 1st rate, 22 guns (f. s. n. a. s), Capt. Robert Boyd. At Portsmouth, N. H., Aug. 8.

YANTIC, 3d rate, 4 guns, Comdr. Francis M. Green. Sailed from Portland, Me., July 29, on a cruise.

S. Atlantic Station—Captain E. E. Potter (in command temporarily).

Acting Rear Admiral D. L. Braine will shortly command this station.

Mails should be addressed to care of U. S. Consul, Rio de Janeiro, Brazil, unless otherwise noted, or care of B. F. Stevens, 4 Trafalgar Square, London.

ALLIANCE, 3d rate, 6 guns, Comdr. Charles McGregor. Placed in dock at the New York Navy-yard Aug. 17. She will shortly be ordered to join the South Atlantic Station.

LANCASTER, 2d rate, 10 guns, (f. s. a. s.) Capt. S. L. Breese (ordered). Arrived at Rio de Janeiro, Aug. 12. All well.

TALLAPOOSA, 4th rate, 13 guns, Comdr. William Whitehead. Arrived at Rio de Janeiro Aug. 14.

European Station—R.-Adml. Sam. R. Franklin.

Mails should be addressed to care B. F. Stevens, 4 Trafalgar Square, London, England, unless otherwise noted.

PENSACOLA, 2d rate, 16 guns(f. s. e. s.), Captain George Dewey. At Phalerum Bay, near Athens, Greece, July 20. Was to proceed to Leghorn, touching at Zante and Messina en route.

KEARSARGE, 3d rate, 7 guns, Comdr. Charles D. Sigsbee. Was to remain in Phalerum Bay, near Athens, Greece, until about Aug. 1. Has been ordered to return to U. S.)

QUINNEBAUG, 3d rate, 8 guns, Comd. Geo. W. Coffin. Arrived at Southampton, England, Aug. 3, 1886. Will leave the English channel by the middle of August or September for Genoa, touching on the Spanish coast and at Marseilles. Will be sent to the East for the winter, if no other vessel joins the squadron.

Pacific Station—Rear-Adm. E. Y. McCauley.

Mails, unless otherwise noted, should be addressed to care U. S. Consul, Panama, U. S. C.

ADAMS, 3d rate, 6 guns, Comdr. Louis Kempff. Left Callao, Peru, June 20, for Coquimbo.

HARTFORD, 2d rate, 16 guns (f. s. p. s.), Capt. J. H. Gillis. Was at Callao July 13. Will remain on the Southern coast for some time to come in all probability.

JUNIATA, 3d rate, 8 guns, Comdr. G. T. Davis. Sailed from New York, Aug. 16, for Pacific Station.

IROQUOIS, 3d rate, 7 guns, Comdr. Yates Stirling. At Callao July 13. Commander J. C. Watson has been ordered to command, and leaves New York per steamer of about Sept. 1.

MONONGAHELA, 2d rate, 9 guns, Lieut. Comdr George B. Livingston in command. Used as a storeship at Coquimbo, Chili.

MOHICAN, 3d rate, 8 guns, Commander Benjamin F. Day. Arrived at Auckland, New Zealand, August 17. Reported by cable from Melbourne, Aug. 20, to have sailed for Samoan Islands, to remain there during the session of Commission on Samoan affairs.

PINTA, 4th rate, screw, 2 guns, Lieut. Comdr. Henry E. Nichols. Address care of Navy Pay Agent, San Francisco, Cal. At Juneau, Alaska, June 8. Was to go to Sitka about the middle of July for supplies.

SHENANDOAH, 2d rate, 9 guns, Captain Byron Wilson. At Callao, Peru, July 13. Has been ordered to proceed to San Francisco for repairs, touching en route at South and Central American ports.

VANDALIA, 2d rate, 8 guns, Captain Henry L. Howison. Sailed from New York, 7.30 A. M., Aug. 14, for the Pacific Station.

The following is a list of her officers: Captain H. L. Howison, Lieut. Comdr. J. E. Craig, Lieuts. Jno. Garvin, Jno. C. Wilson and W. P. Ray, Ensigns H. M. Witzel, T. M. Brumby, W. E. Safford and Jno. Hood, Naval Cadets H. K. Hines, Geo. F. Cooper, Jno. T. McMillan and S. B. Winram, Surg. H. J. Babin, P. A. Surg. Robert Whiting, Paymr. Frank H. Hinman, Chief Engr. Geo. J. Burnap, P. A. Engr. A. B. Bates, Asst. Engrs. W. M. McFarland and J. M. Pickrell, 1st Lieut. (M. C.) G. F. Elliott, Gunner Samuel Cross, Actg. Carpenter J. B. Fletcher.

Asiatic Station—Rear-Admiral J. L. Davis.

Vessel with (†), address, Mail, to care U. S. Consul, Yokohama, Japan.

ALERT,† 3d rate, 4 guns, Comdr. Chas. J. Barclay. At Yokohama, Japan, July 11. She will return to the U. S., and expects to reach San Francisco some time in September. Was to sail from Yokohama for Hokodati on about August 5.

BROOKLYN, 2d rate, 14 guns, Capt. E. O. Matthews. Sailed from New York, Aug. 12, 7.30 A. M., for the Asiatic Station.

The following is her list of officers: Captain E. O. Matthews, Lieut.-Commander Washburn Maynard, Lieuts. E. D. F. Heald, W. H. H. Southerland, C. J. Badger, L. P. Jouett, and F. H. Holmes, Ensigns Wm. Truxtun, W. R. Shoemaker, and J. A. Hosgewerff, Naval Cadets W. L. Dodd, R. D. Tisdale, S. M. Strite, E. T. Witherspoon, C. C. Billings, D. M. Young, and F. A. Levis, Med. Insp. G. S. Beardslee, P. A. Surg. P. A. Lovering, Asst. Surg. O. D. Norton, Paymr. R. W. Allen, Chief Engr. S. L. P. Ayres, P. A. Engr. R. G. Denig, Asst. Engrs. C. A. E. King and W. F. C. Hasson, Chaplain J. D. Beugless, Capt. (U. S. M. C.) D. P. Mannix, Pay Clerk T. D. Davidson, Jr., Boatswain Edw. Bonsall, Gunner J. J. Walsh, Carpenter Gould Northup, and Sailmaker T. B. White.

An officer of the *Brooklyn* sends the following information regarding the ports to be visited: Lisbon, Portugal, is the first port at which the *Brooklyn* will stop. From there we go to Gibraltar and communicate with the commander-in-chief of the European station in regard to the transfer of the officers and stores which we have for the squadron. Then we will pass through the Mediterranean, stopping at a few of the principal ports, such as Naples, Jaffa and Alexandria. After passing through the Suez canal we will be at the western end of the Asiatic station, with Petropaulowski, in Kamtschatka, as the last port at the eastern end. Within these limits we will show our flag and do our best to make a favorable impression at Muscat, Busrah, at the head of the Persian gulf, Bombay, Colombo, Penang, Ceylon, Singapore, ports in Sumatra, Java, Borneo, the Celebes and in the Phillippine Islands, and finally bring up at Hong Kong. During the remainder of the cruise we will probably visit all the principal ports in Burmah, Siam, Cochin China, Corea, China, and Japan.

ESSEX, 3d rate, 6 guns, Comdr. T. F. Jewell. Word was received at the Navy Department on Thursday, Aug. 19, that the *Essex*, at New York, was ready to receive her sailing orders. They were at once issued directing her to proceed to the Asiatic Station.

MARION,† 3d rate, 8 guns, Commander Merrill Miller. At Shanghai July 1—undergoing repairs.

MONOCACY,† 3d rate, 6 guns, Comdr. Henry Glass. Was at Canton July 1.

OMAHA,† 2d rate, f. s. a. s., 12 guns, Captain Thos. O. Selfridge, commanding. Reported by cable to the JOURNAL, at Shanghai, China, July 17.

OSSIPEE,† 3d rate, 8 guns, Comdr. John F. McGlensey. At anchor off Yokohama, Japan, July 1, under orders to proceed to Chemulpo, Corea.

PALOS,† 4th rate, 6 howitzers, Lieut.-Commander T. Nelson. Was in all probability at Chemulpo, Corea, July 1, having sailed for that port from Nagasaki, June 3.

TRENTON, 3d rate, 10 guns, Capt. Robert L. Phythian. On her way home. Reported by cable to have left Gibraltar, Aug. 4, for the U. S.

Apprentice Training Squadron.

Address of *Portsmouth* and *Saratoga*, care of B. F. Stevens, 4 Trafalgar Square, London, England, until Aug. 25, and after that date Newport, R. I.

MINNESOTA, 1st rate. 24 guns, Comdr. T. F. Kane. Gunnery ship. Foot of W. 27th Street, North River. Entrance from W. 26th Street. P. O. address, Station E, New York.

NEW HAMPSHIRE, 1st rate, 16 guns, sails, flagship of training squadron, Captain Arthur R. Yates. Coaster's Island Harbor, Newport, R. I.

PORTSMOUTH, 3d rate, sails, 12 guns, Comdr. Chas. V. Gridley. Arrived at Lisborn Aug. 14.

SARATOGA, 3d rate, 12 guns, Comdr. C. H. Davis. Arrived at Lisbon Aug. 14.

On Special Service.

CONSTELLATION, 3d rate, 10 guns, Practice Ship of Naval Academy, Commander C. L. Huntington. On her practice cruise. Sailed from Portsmouth, N. H., July 31, for Chesapeake Bay.

DESPATCH, 4th rate, Lieut. Wm. H. Emory, Jr. Sailed from New York, Aug. 18, for New London, Conn. Was at Newport, R. I., Aug. 19.

Arrived at Newport about five o'clock on Thursday afternoon, with Secretary Whitney on board. She left New London at one o'clock. The object of the visit is to inspect the torpedo and naval stations, also Hrrreshoff's boat building establishment at Bristol. Secretary Whitney was accompanied by Commander C. F. Goodrich, who assumes command of the torpedo station on Sept. 7, and Commander Schley. Mr. Whitney went ashore soon after his arrival and took a drive about the city for about an hour and a half, returning on board the *Despatch* at at a quarter to eight. The *Despatch* was to leave in a day or two.

DOLPHIN, despatch boat, ——————
At Norfolk, Va. Undergoing repairs.

JAMESTOWN, 3d rate, sails, 12 guns. Comdr. Horace Elmer. Arrived at Hampton Roads Aug. 15.

MICHIGAN, 4th rate, 8 guns, Comdr. John J. Read. Arrived at Milwaukee July 23, and expected to leave July 25 for Toledo, reaching there Aug. 1.

RANGER, 3d rate, 4 guns, Comdr. Chas. E. Clark. At San Francisco July 5.

ST. MARY'S, sails, 8 guns, Comdr. Edwin M. Shepard. N. Y. School ship. On her annual cruise. Was in Hempstead Bay, L. I., Aug. 16.

ATLANTA, 2d rate, 8 rifled cannon and 12 machine guns, Captain Francis M. Bunce. At New York Navy-yard.

VARIOUS NAVAL ITEMS.

THE U. S. schooner *Eagre* arrived in Hempstead Bay, L. I., Aug. 12, from College Point and was to leave in a day or two for the Harlem River. The address of the *Eagre* will be "Station L, New York City."

A BEAUTIFULLY finished working model of the 75-ton crane erected in the New York Navy-yard has recently been received in the draughting room, Bureau of Steam Engineering. This model was executed at the Washington Navy-yard after models prepared from the original drawings by Passed Asst. Engr. Robert R. Leitch, U. S. N.

THE white cotton regulation hat now worn by the sailors of the Navy has sprung into sudden favor as a lawn tennis hat. This is especially true of New York and vicinity, where the hat can be procured with little difficulty. It has a decidedly nobby appearance when new, and its moderate cost, but forty cents, will ensure its adoption for tennis purposes wherever it can be procured.

IT was inadvertently stated in last week's JOURNAL that the recent Court of Inquiry at New York was to investigate charges of drunkenness against 1st Lt. S. W. Quackenbush, U. S. M. C., and of absence against 1st Lt. O. C. Berryman. The charges should have been reversed. The Court found that Lieut. Quackenbush was absent without leave but 48 hours. The matter was so trivial that the Navy Department deemed further action unnecessary, and Lieut. Quackenbush sailed in the *Juniata* on Aug. 16 for the Pacific Station. The findings of the Court in the case of Lieut. Berryman are understood to be of a more serious character. They are before the Department awaiting the action of the Secretary as to whether a Court-martial shall be ordered.

THE claims of naval officers for mileage and longevity pay which were allowed by the accounting officers and provided for in the General Deficiency bill are being settled by the disbursing officer of the Navy Department at the rate of about one hundred per day.

THE 4,500-ton vessels will, in accordance with law, be rated as first rate, and therefore will be named after the States. The cruisers of less than 4,500 tons are second rates and will be named after cities, towns or rivers in the United States, as the President may elect. The President is not restricted by law in naming the gunboats.

A DESPATCH from Halifax, Nova Scotia, Aug. 16, says: "Advices from Georgetown, Prince Edward Island, say that a number of American fishermen arrived there on Saturday, Aug. 14, for shelter. Several from West Cape reported that there were about 100 American seiners there making good catches, and that there were four American war ships at West Cape and on the north side guarding the fleet. The schooners left Georgetown on Sunday morning. The inland fishermen are said to be indignant at the manner in which the fishermen are protected."

A PRIVATE letter from a member of the expedition commanded by Lieut. Geo. M. Stoney, U. S. N., dated from Fort Cosmos, Putnam River, headquarters of the expedition, latitude 67 deg. 10 min. north, longitude 150 deg. 50 min. west, and is dated last Christmas day. The writer reports that Lieut. Stoney had discovered a river to the north, which the natives say empties into the Arctic near Point Barrow. The river is supposed to be the same as the one at the mouth of which Lieut. Ray established his headquarters during his observing expedition. The letter was brought to St. Michaels from Fort Cosmos, a distance of 450 miles, by a party under the command of Engineer Lane. It concludes by stating that Ensign Read remained at Fort Cosmos on account of delicate health, but he would accompany Lieut. Stoney on his sledging journey.

THE only report received by the Secretary of the Navy of the recent trial trip of the new cruiser *Atlanta* was a short one forwarded by her commanding officer, Capt. Bunce. The highest speed attained was 12.8 knots, but the trial was not regarded as complete, owing to the breaking of a shaft pin and the blowing up of a joint of the high pressure cylinder. The accidents were very trivial, and the damage can be easily repaired. They were not regarded in any way as an objection to the vessel, but as something that is liable to happen on any occasion of the kind. They will necessitate another trial trip of the vessel, however, which will be ordered at an early date. The *Atlanta* showed herself to be well constructed, and is regarded by naval officers as full of promise.

MATE CHARLES J. MURPHY AND JOHN T. JEFFERSON, of the Naval Academy, have lately invented a novel rudder and steering gear, designed to be used upon vessels of war, plans and specifications of which have been submitted to the advisory board at Washington, and by them referred to the Bureau of Construction and Repair at the Navy Department. The merits which these gentlemen claim for this invention are that the rudder is perfectly concealed while a ship is engaged in fighting in a sea-way, and by a system of connections the entire upper portion of the rudder is inclosed by the casement of the ship, thereby avoiding the danger of its being struck by shot or shell when the stern of the vessel rises in a sea-way. It also avoids the necessity of having the "overhang," a contrivance for the protection of the rudder now in use by some of the new cruisers. The inventors hope that the new invention may be applied to the vessels which are about to be built.

NAVY GAZETTE.

Ordered.

AUG. 16.—Assistant Surgeon A. R. Wentworth, to duty at the Navy-yard, League Island, Pa.

AUG. 18.—Commander William M. Folger, to report to the Chief of Bureau of Ordnance on October 15, for duty as Special Inspector of Ordnance.

Passed Assistant Surgeon G. C. Lippincott, to duty at the Naval Academy September 1.

AUG. 20.—Commodore P. C. Johnson, Commander G. Q. W. Sumner, and Commander R. B. Bradford, are ordered to witness examination of Class in Torpedo Instruction at Newport, September 1.

Detached.

AUG. 9.—Commander George H. Wadleigh was ordered to be detached from duty as lighthouse inspector of the 2d District, September 30, and after settling accounts to await orders.

AUG. 14.—Ensign John G. Quinby, from the Naval Academy and ordered to the Jamestown.

AUG. 16.—Captain Henry Erben, from the Navy-yard, Portsmouth, N. H., September 30, and ordered as President of the Board at New York, to visit the principal naval and mercantile vessels arriving at that port.

Assistant Naval Constructor Francis T. Bowles, from duty with the Naval Advisory Board, September 1, and ordered to duty at the Navy-yard, Norfolk, September 30.

Captain R. F. Bradford, from duty as a member of the Board of Inspection and Survey and ordered to duty at the Navy-yard, Portsmouth, N. H., as captain of that yard.

AUG. 17.—Lieutenant Robert M. Doyle, from the Galena August 31, and ordered to the Naval Academy.

AUG. 18.—Captain Frederick V. McNair, from duty at the Mare Island, California, Navy-yard, September 30, and placed on waiting orders.

Ensign Charles W. Jungen, from the Coast Survey and ordered to the Ranger.

Gunner William Wilson, from the Navy-yard New York, and ordered to temporary duty at the Naval Magazine, Ellis Island.

Gunner James Hayes, from the Naval Magazine and ordered to the Atlanta.

AUG. 20.—The present officers of the Torpedo Class will be detached, September 4, and ordered as follows: Captain N. H. Farquhar and Lieutenant Commander E. White, to waiting orders; Lieutenants S. M. Ackley, B. S. Richards, J. K. Cogswell, T. D. Bolles, W. H. Driggs, G. F. W. Holman, W. A. Marshall, F. H. Lefavor, H. Hutchins and J. C. Colwell; Ensigns G. W. Denfeld, A. W. Grant, B. C. Dent, R. F. Lopez, W. P. C. Muir, L. J. Clark, and Joseph H. Rohrbacher; Captain W. S. Nurse, and 1st Lieutenant H. N. Gilman, M. C., to duty at Naval War College; Lieutenant Wm. L. Rodgers, to Bureau of Navigation; Gunner C. Dugan, to Norfolk Navy-yard; Gunner C. Cronin, to Magazine, Ellis Island; Gunner W. Walsh, to Washington Navy-yard; Gunner T. P. Venable, from Norfolk Navy-yard, and placed on waiting orders.

Appointments.

David W. Taylor, to be Assistant Naval Constructor in the Navy from Aug. 14, 1886.

MARINE CORPS.

AUG. 17.—2d Lieutenant C. Marrast Perkins, the leave of absence granted for benefit of his health on July 23, extended two weeks upon the recommendation of the attending physician.

AUG. 18.—1st Lieutenant H. Clay Fisher, leave of absence granted for one month from September 2.

CASUALTIES.

Deaths in the Navy of the United States, reported to the Surgeon-General, during the week ending August 18, 1886:

L. F. Kragh, landsman, died on the U. S. S. Omaha, June 18.

O. S. Schley, cadet midshipman, fell from loft of the U. S. S, Constellation, Aug. 3, and was drowned.

Hans O. Sivertsen, ordinary seaman, died at Naval Hospital, Norfolk, Va., August 12.

Emil Olsen, seaman, attached to the U. S. S. Constellation, was drowned August 3.

Peller Larssen, seaman, attached to the U. S. S. Constellation, was drowned August 3.

Nicholas C. Doland, coxswain, attached to the U. S. S. Constellation, was drowned August 3.

NAVY DEPARTMENT, WASHINGTON, Aug. 9, 1886.

General Order No. 352.

Pay officers will hereafter note, in red ink, in the enlistment column of their pay rolls, the number of the certificate and the date of each enlistment of all continuous-service men, in the same manner as is now required on the pay rolls of marines.

J. G. WALKER, Acting Secretary of the Navy.

NAVY DEPARTMENT, WASHINGTON, D. C., Aug. 14, 1886.

G. O. No. 354.

The demand for increased facilities for constructing the batteries required for the armament of additional ships of war, now provided for, makes it necessary to reassign the shops and buildings of the Washington Navy-yard.

All the shops, machinery, tools and appliances assigned for the use of the Bureaus of Construction and Repair, Steam Engineering, Yards and Docks and Equipment and Recruiting will, therefore be turned over to the control of the Bureau of Ordnance on Oct. 1, 1886.

Such of the machinery, tools and appliances as may not be required by the Bureau of Ordnance will be transferred to stations where required by other bureaus, or otherwise disposed of as found best for the public interest.

The quarters now occupied by the representatives of the above-named bureaus will be vacated Oct. 1.

WM. C. WHITNEY, Secretary of the Navy.

(Correspondence of the Army and Navy Journal.)

NAVAL ACADEMY.

ANNAPOLIS, MD., Aug. 18, 1886.

THE return of the practice ships *Constellation* and *Jamestown* brings before the public the particulars of the frightful accident of Aug. 3. It seems that the *Constellation* left Portsmouth, N. H., Aug. 2, with a fresh breeze blowing, which increased to a gale on the 3d. On the morning of that date the officer of the deck, Lieut. Nicholson, was relieved by the executive officer, Lieut. Ross, who wished to exercise the cadets aloft. While the 3d classmen were exercising in crossing the masthead, Cadet O. Schley, of Indiana, fell from the lee foretopmast rigging, striking the topmast backstays and the rail during his descent and bounding into the water. The *Constellation* was then making 10 knots, with the wind off the quarter. Attempts were immediately made to lower the lifeboat and the first cutter, but, owing to the jamming of the former's falls, her entire crew of six men were precipitated into the water. The ship was then hove to and an immediate search begun with all the ship's boats, and three of the lifeboat's crew were soon picked up. An hour's search, however, failed to find the bodies of the other unfortunates, and the ship continued on her course. Cadet Schley entered the Academy in September, 1885, appointed from the 4th District of Indiana. He was a cousin of Commodore W. S. Schley, Chief of the Bureau of Equipment.

The U. S. steamer *Phlox* met the practice ships at the Capes, with supplies, and returned to the Naval Academy on Tuesday last. The ships will cruise in the Bay until the 27th inst., when they will anchor off Annapolis, and the cadets will be given a month's furlough.

The 2d class, who have been stationed at the Academy during the summer, will finish their work in the machine shops and be granted leave of absence on the 25th inst.

The brig *Amazon*, Capt. T. M. O'Leary, attached to the Maryland Military and Naval School, paid a visit to the Academy on the 17th inst. She had aboard 64 cadets who have just entered the school.

Quaint old Annapolis awoke from its century's nap on Monday last and took a holiday which recalled the days when her attractions drew thither the victorious Washington, the event being the unveiling of the bronze DeKalb statue erected by Congress on the State House Grounds. From morning until evening steamers vied with each other in blowing most discordantly at the river wharves, while at least 7,000 people swarmed the narrow, old-fashioned streets. The steamers *Joppa*, *Maryland*, *Pentz*, and *Pilot Boy* brought large excursions from Baltimore. The procession formed at 1.30 P. M. in front of the Governor's Mansion and extending around State House Circle. It was participated in by numerous bodies of Masons, Knights Templars, regiments of infantry and artillery, together with various band organizations, including the famous Marine Band of Washington.

When the statue was unveiled it was presented to the Secretary of State by Mr. Ephraim Keyser, the sculptor, who delivered a short, earnest speech. Secretary Bayard's reply was listened to by an immense crowd, filling roads, walks, trees, and housetops, which frequently interrupted his eloquent address with rounds of applause.

Col. T. J. Scharf, the prime mover in the erection of the statue, then described with great vividness DeKalb's valiant defence of the American flag upon Maryland soil, and the day's ceremonies were over.

The Marine Corps attached to the Naval Academy participated in the display. A salute of twenty-one guns was fired from the *Santee* at noon. To quote from a Knight who got left, "It was a perf'ly glori'sh 'fair."

CAPTAIN H. A. TROLLOPE, British Navy, retired, registered at the Brevoort House, New York, on Tuesday.

OUR AUXILIARY NAVY.

THE naval board of inspection at New York which was some time ago directed by Secretary Whitney to consider the availability of vessels of the merchant service as auxiliary cruisers in time of war, have reported to the Navy Department in detail upon two vessels: the *Louisiana*, of the Cromwell line, and the *Newport*, of the Pacific Mail Steamship Company, both built by John Roach and Sons. As yet the examination of such vessels as might be utilized by the Government in time of need, is confined exclusively to New York, but the matter is deemed of such importance that in the near future similar work will be done in Boston, San Francisco and perhaps one or two other important ports. The *Louisiana*, which was first reported upon, is regarded as superior to many first class foreign vessels which are depended upon as auxiliary cruisers, in strength of hull, general construction, engine power speed, and ability to carry a battery of 6-inch guns.

The report upon the *Newport*, which was but recently received, is a long and detailed one. It describes the materials of her construction, the details of the vessel and her machinery generally, and the minor alterations that would be necessary should she be needed as an auxiliary cruiser, and classes her in the first rank for such a purpose. In point of naval architecture the Board certifies her as one of the best vessels, American or foreign, that comes to New York; that she is fitted with every modern invention for increasing safety and speed; that she is built of the best heavy plate iron and triple-riveted, and the angle-irons are unusually heavy. She has two iron decks, six watertight transverse bulkheads, and the shaft alley, engines and boilers are inclosed by longitudinal bulkheads, thus protecting the engine and boiler rooms from danger in case of disaster from shot and collision. The vessel is 348 feet in length, 38½ feet beam, 23¾ feet depth of hold, and 2,735 tons displacement. Her engines develop more than one horse-power per registered ton, which is greater than that of the Guion steamship *Arizona* in proportion to the size of the vessel. She is fitted with the vertical two-cylinder compound engines of high power, and is capable of making 16 knots average speed an hour, or two knots greater than the requirements of the Secretary of the Navy's instructions as to limited speed. With all the coal she can carry in the various compartments she could remain at sea 94 days at a speed of ten knots an hour. The deck plans show that she can be fitted with six or more 5-inch and 6-inch breechloading rifles, and also several rapid-fire machine guns of the Hotchkiss or Gatling pattern.

BOILERS OF THE BROOKLYN.

THE delay in fitting out the *Brooklyn* for a cruise on the Asiatic station is explained in reports from the commanding officer and chief engineer received at the Navy Department on August 16. Their account of the condition of the boilers when the vessel returned to the Brooklyn Navy-yard in May last, and of the work performed upon them since that date, shows that they were not in as good condition as reported when the vessel went into commission in October, 1885. Many repairs were made and scale often removed during the eight months cruise, in spite of which, when the vessel arrived in New York in May last, the boilers showed an unusually large accumulation of scale for so short a cruise. The cleaning resulted in the removal of 27,000 pounds of scale to which is to be added 4,500 pounds taken out at various times during the cruise. The following rather unusual articles to be found in a steam boiler were also taken out: One working suit; one sledge; four hand lamps; two chisel bars; two scaling hammers; three flat chisels; one piece of 1¼-in. pipe and elbow; three wooden wedges; two pieces of board, and one wrench. Some of these articles have been preserved to show the thickness of the scale deposited and also to figure in the investigation that is likely to be instituted for the purpose of fixing the responsibility for their presence in the boilers.

FROM THE MOHICAN.

A CORRESPONDENT of the Baltimore *Sun*, writing from the U. S. *Mohican*, at Somoan Islands, July 17, says:

The Governor of Vavau is the heir to the throne, a grandson of the present King, and as he desired to go to Nukualofa, the capital of Tongatuba and the seat of the general government, passage on board the *Mohican* was accorded him. This prince is the first and most likely the last specimen of the native dude that we have seen. He is a man about 30 years of age, and of fine physique, attires himself in well-fitting clothes from an Auckland emporium of fashion, wears patent leather shoes a size too small for him, carries a light cane, the ivory head of which is occasionally ingulfed in his mouth, combs his hair in that plastered style so much affected by barbers' apprentices, and uses his knowledge of English in conversing only on subjects well adapted for the display of flippancy. Taking this crown prince on board, we left Vavau on July 1, and steamed in quest of a submarine volcano which has lately been shaking this part of the world with its quakes. Its exact position was doubtful, but it was known to have formed on a shoal located ten years ago by the British man of war *Falcon*. Last October the shoal elevated itself to the surface of the water and became a sub-marine volcano, the violent eruptions of which so raised the crest as to make it an island. The island is now one and a half miles in diameter, and its highest point 220 feet above the sea. Its position as determined by the *Mohican* is latitude 20 deg. 21 min. south, longitude 175 deg. 22 min. west. On July 3 we entered the port of Nukualofa. We left the Tongas on July 10, and shaped our course again for the Samoan group, arriving in Pago-Pago harbor on the morning of the 14th. Remaining at Pago-Pago several days to coal ship, we proceeded to this place, where we arrived this morning, and are patiently waiting the arrival of the mail from San Francisco. [This arrived on the 18th.—ED.]

REVENUE MARINE.

NEWS has been received from Ounalaska of the seizure, August 1, of three British schooners by the revenue cutter *Corwin* for violation of the seal fishing laws in Behring's Sea. These schooners are the *Thornton*, the *Onward*, and the *Caroline*. The crews of the seized vessels were sent to Sitka, whence a number of the men were brought to San Francisco by the *St. Paul*. The schooners were taken to Ounalaska, but the officers of the seized vessels were kept on board the *Corwin*. The matter has been referred to the British Consulate in San Francisco for investigation.

Str. *McLane* ordered to Baltimore, Md.

Commissioned.

Wm. C. Myers, of Tenn., 2d Assistant Engineer in U. S. Revenue Marine.

BLACK STARR & FROST

SUCCESSORS TO

Established 1811.
CHOICE OLD WHISKIES,
MILD, MELLOW AND DELICIOUS.

The peculiar medicinal qualities of Whiskey distilled from the finest growth of Rye in the renowned Valley of the Monongahela, have attracted the attention of the Medical Faculty in the United States to such a degree as to place it in a very high position among the Materia Medica.

We beg to invite the attention of connoisseurs to our celebrated fine OLD WHISKIES, which we offer at the following prices, in cases containing One Dozen Bottles each:

Old Reserve Whiskey, - - - - $18.00
Unrivalled Upper-Ten Whiskey, 15.00
Brunswick Club Whiskey, - - - 12.00

If you cannot obtain these Whiskies from your Grocer, we will, on receipt of Bank Draft, Registered Letter or Post Office Money Order, deliver them to your address, by Express, charges prepaid, to all points east of the Mississippi river; and by freight to any part of the U. S. (prepaid.)

For EXCELLENCE, PURITY AND EVENNESS OF QUALITY, the above are UNSURPASSED BY ANY WHISKIES IN THE MARKET. They are entirely FREE FROM ADULTERATION, and possess A NATURAL FLAVOR AND FINE TONIC PROPERTIES.

These Whiskies are sold under guarantee to give PERFECT SATISFACTION; otherwise to be returned at our expense.

ARMYNAVY.

THE WOES OF MR. CUTTING.

THE woes of Mr. Editor CUTTING seem to have awakened universal sympathy among his brethren, if we are to judge from the amount of attention given to him, as contrasted with the almost entire lack of interest in the case of Captain CRAWFORD. *Texas Siftings* covers its first page this week with an engraving entitled "Asleep on Post." It shows a mounted ranger, with "Texas" inscribed upon his belt, riding up to a U. S. soldier asleep in his sentry-box and shouting, "Wake up, Mr. Soldier, this is as much your fight as it is mine," while he points across the Rio Grande to a fort bearing the Mexican flag, and inscribed, "Mexican jail for Americans." Another picture in the same paper represents Uncle Sam on his knees before a half-masted American flag, while a Mexican greaser, with his flag flying aloft, is administering to the reluctant Uncle Samuel a nauseous dose from a bottle labelled "CUTTING'S mixture." The title is: "A Cutting Satire. Poor Old Uncle Sam! It is a bitter dose but he takes it like a little man."

Puck has a frontispiece bearing the legend 'Stealing Jingo Jim's Clothes—Mr. BAYARD is going to have a *vigorous* foreign policy too." It represents a lugubrious-looking individual bathing in "the waters of hope," who bears a marked resemblance to Mr. BLAINE, except for the absence of clothes. On the shore is Mr. BAYARD wearing the casque and plume of knighthood, but feloniously appropriating the habiliments of the unfortunate bather, preparatory to starting ahead of him up a road bearing a sign board inscribed "To Mexico."

As part of the more serious discussion of the case, we are told that Mr. ARTHUR G. SEDGWICK, the envoy, to whose mission we referred last week, is particularly charged with justifying all that Mr. BAYARD has claimed. The endeavor is to show:

First—All the evidence, newspaper reports and records from the first complaint against Cutting down to the exertions of the Mexican Government that he should have a fair trial shall fully corroborate the ground on which the demand for Cutting's release was peremptorily made.

Second—That the course of justice, had it not been for the firm and peremptory demand of the United States, would have been more arbitrary and oppressive than it was.

Third—That the whole line of prosecution was changed after the position of the United States Government was emphatically made known to the Mexican authorities.

Mr. BAYARD believes that the sagacity of the Mexicans will appear in the light of an afterthought when Mr. SEDGWICK has accomplished his mission. The real object, we are further told, is to arraign Mexico for repeated and wanton violation of friendly relations of which the CUTTING case is regarded as only one of many conspicuous examples. Mr. BAYARD, who, it seems, does not relish the idea of being put in a ridiculous attitude before the country, has committed to Mr. SEDGWICK the task of tracing, step by step, this judicial tergiversation, by which it is now made to appear that there was never just ground for interference in the CUTTING case. Mr. BAYARD refers to the consecutive accumulated records of the State Department for the last ten years as declaring with unchanged voice the utter hopelessness of obtaining justice to our citizens in cases where they had been wronged by the officials and Government of Mexico.

A NAVAL ORDNANCE FACTORY.

IT will be seen by the order of Secretary WHITNEY, which we publish this week, that the Washington Navy-yard is to be utilized as an ordnance factory and naval arsenal after Oct. 1. This is in accordance with the recommendation of the Gun Foundry Board, appointed by act of Congress March 3, 1883, to report upon the location of Government Heavy Ordnance Armories, and in pursuance of the policy advised by the subsequent Fortification Board and the Senate and House Special Committees on Ordnance and War Ships.

The bureaux now having quarters, with the Ordnance, at the Washington Navy-yard are the Yards and Docks, Construction, Steam Engineering, and the Equipment. The staff officers will be assigned to other quarters and a vessel ordered to receive the stores for conveyance to other yards. It is some years since this has been used as a construction yard, though possessing resources for building wooden ships of any size, and, owing to the absence of a dry dock, the repairs of large vessels have been restricted to their upper works. The plant for the building of marine engines and boilers of the largest class is in excellent condition. The Equipment Bureau has its most important shops at Washington, comprising appliances for the production of the largest anchors, machinery for making chain cables, etc. The bureaus experiencing most serious change by this transfer are, apparently, the Construction and the Equipment. Civil Engineer MENOCAL, Constructor HICHBORN, Pay Director WASHINGTON, and Chief Engineer BAKER are among the staff detached.

The prime necessity of the Washington Yard as an Ordnance Factory is the erection and equipment of a machine shop, the lathes and tools to have a capacity for the largest calibre of guns. The general press reports, that the Secretary will expend the $250,000 at his disposal in the erection of a foundry, is obviously erroneous, the existing foundry, with possible changes, being available for any present purpose, as the policy of our Government does not entertain the casting of guns or the forging of gun parts, but simply the finishing or assembling of castings and forgings.

It goes without saying that the removal of a considerable number of staff officers with their families not only from comfortable quarters to which they have become accustomed, but to fresh quarters and localities new, cannot be effected without inconvenience and discomfort. This is, however, one of the incidents of service life. The utilization of the Washington Navy-yard as an Ordnance Factory—since we are to have one—is undoubtedly good policy; the question remains, where are we to reassemble these bureaus, so essential to naval reconstruction, or will they be located at separate yards?

THE Board convened at Fort Monroe, on August 2, for the examination for promotion of the nine

non commissioned officers who successfully passed Departmental Boards, has completed its labors and the report is now in the hands of the authorities at Washington. The candidates were all successful in the mental and physical examination, but in one case there was some doubt as to moral fitness and it is held up for further investigation. It is expected, however, that they will all receive commissions as soon as a sufficient number of vacancies occur. There are now six vacancies—two in the Cavalry and four in the Infantry—and two that can be made at any time by retirements from disability.

THE advertisements inviting proposals for the new vessels of war are on Commodore WALKER'S desk awaiting a message from Secretary WHITNEY as to the manner in which they shall be published. They will certainly appear before the week closes. The new cruiser which was authorized among others at the last session of Congress, and for which the Secretary has decided to invite proposals at this time, is to be built after designs furnished by Sir WM. ARMSTRONG, with some few modifications by our own Construction Bureau. These plans were originally offered by the ARMSTRONG Co., in competition with others, to the Spanish Government, which, after receiving designs and proposals from fifteen of the most eminent private shipbuilders of England and the Continent, accepted the plans and terms of J. and G. THOMPSON, of Clydebank, as the most satisfactory. The ARMSTRONG plans being left on the market were accepted by Secretary WHITNEY, who, after consultation with shipbuilding experts in this country, decides that they are in every respect equal to those adopted by the Spanish Admiralty. A description and illustration of the new vessel will be found elsewhere.

THE Second Comptroller of the Treasury has rendered the following opinion on the question referred to him by the War Department, regarding the payment of mileage to officers of the Army for travel over land-grant railroads under the recent mileage act:

In my opinion, under the act of June 30, 1886, no mileage whatever can be paid, either over land-grant roads or any other railroads "where the officer is furnished transportation by the Quartermaster's Department."

This act does not make any change in the existing law, as to cases in which mileage can be paid or allowed. It neither enlarges nor restores the act of 1876 (19 Stats., 100, Sec. 2) in this respect. It simply, during the fiscal year 1887, prescribes a different rate at which mileage shall be computed, but in no case authorizes the payment of mileage where such authority did not or does not exist under laws previously enacted.

The act of 1876, in substance, provides that mileage shall not be paid where the officer is furnished transportation by the Quartermaster's Department, and the act of June 30, 1886, only provides for the payment of mileage according to the rate there established "when authorized by law."

To determine when mileage is "authorized by law" reference must be had to the act of 1876, and this, as we have seen, precludes the payment of mileage when the officer is furnished transportation by the Quartermaster's Department; and it makes no difference to the officer whether transportation is furnished over a land grant or non-land grant railroad.

This decision agreeing with the action (referred to last week in the JOURNAL) of the Paymaster General no further instructions will be issued to paymasters, and they will continue to make payments for mileage as they have done since the new law took effect.

CONGRESS having authorized the expenditure of $75,000 for "manufacturing, purchasing and experimenting with torpedoes," another Board will be ordered to investigate this subject. The detail for the Board is now being prepared. The development and experiments in torpedoes of all kinds have continued with considerable vigor since the experiments of the Naval Board of two years ago, and the new Board may therefore expect to find plenty of material to work upon. A number of new patents have recently appeared, although few of them have been subjected to practical test. The Howell, Sims, Edison, Patrick, and Berdan have attracted the greatest attention during the year. The Howell has increased in favor with naval officers, who are now beginning to compare it with the Whitehead. A company for the manufacture of this torpedo was formed in March last and a sufficient number have been completed for trial before the new Board.

WE thought it necessary in publishing the proceedings of the G. C. M. in the case of P. A. Engineer W. A. MINTZER, U. S. Navy, to insert dashes to indicate some of the foul language for which the accused was held to account. It may not be improper to call the attention of our naval authorities to the fact that Major-General HANCOCK issued an order to govern his command, stating that it was entirely unnecessary to recite the improper language verbatim in specifications to charges. If it is proper for the Secretary of the Navy to rebuke and punish an officer for using vile language to one other officer, is it not equally proper for him to refrain from using the same language in his General Orders to the whole Navy? It was our Army which "swore terribly in Flanders," but we have no similar report concerning the Navy. So it is a painful revelation to us to discover that there are naval officers who use naughty words, and we would never have believed it of the courteous Secretary of the Navy had not his own G. C. M. O. 23 convicted him.

THE American fondness for titles, to which we make some allusion elsewhere, is illustrated by the fact that Mr. ARTHUR G. SEDGWICK, since he became a Mexican envoy, is called "General" SEDGWICK. One of the daily papers goes so far as to represent him as speaking for the Army as one of its officers. The "interview" in which this appears is evidently manufactured, for Mr. SEDGWICK is not a man to assume to be what he is not. He is a gentleman of ability and cultivation, and his personal character and attainments in every way fit him for the office to which he has been assigned. He is too young a man to have acquired a title during the civil war, for he was but sixteen or seventeen years old when it closed. He is a graduate of Harvard, we believe, and commenced life as one of the editors of the *Nation*, passing from that to the N. Y. *Evening Post*, and finally assuming the practice of the law, for which he was originally educated. We hope for the best results from his mission to Mexico.

ORDERS were issued from the Navy Department Aug. 19, directing Commodore BANCROFT GHERARDI, at present superintendent of the Naval Asylum at Philadelphia, to assume command of the Newport Navy-yard Oct. 1, relieving Commodore RALPH CHANDLER, who will proceed some time during October to the Asiatic Station, to assume command of that station as the relief of Rear Admiral JOHN LEE DAVIS. Commodore CHANDLER is junior by nearly three months to the new commander of the South Atlantic Squadron, to whose youth we refer elsewhere. He, too, participated in the Mexican War, assisting at the capture of Mazatlan, and was also at Fort Fisher, being subsequently detailed to clear the James River of torpedoes. He commanded the *Swatara* in the transit of Venus expedition 1874-5, and received from the Chancellor of the German Empire, Prince BISMARCK, "his warmest thanks for the noble and valuable support" accorded to the members of the similar German expedition.

Harper's Weekly of August 21 has an article on our soldiers of the Southwest which is headed by an excellent illustration of one of them, giving point to its remark that "their uniform would attract attention but would hardly be regarded as a model of military dress." "General Miles himself wears buttons that do not glitter, boots that do not shine, a uniform the color and weight of which have been changed by many undisturbed deposits of dust. One spur is missing, and his trousers have been reinforced with buckskin, his hat is battered, and a soldier never had a better sun-tanned face." Whether or not his soldiers do "thirteen dollars worth of fighting" every month, "no other men in the Government's service," *Harper's* truthfully says, "so well earn their pay." "The military service done by General Miles's troops on the Southwestern border is as onerous and barren of opportunities for achieving renown as ever fell to any soldiers in any land." The play-day soldiers have all been rejected, or have deserted before this severe test of endurance and bravery has been reached, and if you were to ransack your whole philosophy for an explanation why these men endure such hardships without hope of military glory, and without chance of reward in money or in renown, you would find no better explanation than their own—"Oh, we like it!"

The frontispiece of this number is an illustration of the rescue by Lieut. P. H. Clarke, of the 10th Cav., of one of his colored soldiers, lying wounded in the open space, with "de Injuns," as a trooper described it, "jes fairly ploughing up the groun' wid bullets." "It is deeds of unselfish bravery like this," it says, "when done on battlefields that whole armies are watching and war correspondents see, that make heroes of men for all the world to admire. But the admiration of his comrades is as sweet to the trooper as praise in print could be; and sweeter than either is the feeling of having done a soldier's duty. The love of such service and the satisfaction that comes of doing a dangerous duty bravely and generously are the same to the born soldier in the Southwestern mountains as on a battlefield that will become historic; and this must be why these men love this hard life."

THE new 8-inch Army steel gun is now on trial at Sandy Hook, and the results thus far are very satisfactory, as we learn from Captain Rogers Birnie, Acting Chief of Ordnance, and Captain Smith, who witnessed the trial last week. This trial shows the following results:

Powder.	Projectile.	Muz. Vel.	Pressure.
(1) 100 lbs. Ger...	182 lbs.	2,145 ft.	29,500 lbs.
(2) 100 lbs. Ger...	235 lbs.	1,942 ft.	32,250 lbs.
(3) 100 lbs. DuP..	235 lbs.	1,937 ft.	32,950 lbs.
(4) 100 lbs. Ger...	286 lbs.	1,795 ft.	32 800 lbs.
(5) 100 lbs. DuP..	286 lbs.	1,820 ft.	35.450 lbs.

The rounds numbered three and five were fired with DuPont's brown prismatic powder, the others with the German brown prismatic powder. Thirteen rounds were fired on the first trial, and a new grade of powder was ordered from the DuPonts, in the hope of producing still better results. If this proves satisfactory the gun will be subjected to the statutory test. The 8-inch gun was manufactured by the West Point Foundry, the tube and jacket being obtained from Whitworth and the hoops and breech mechanism forgings from the Midvale Steel Works. The 8-inch naval gun, with 125 lbs. of powder and a projectile of 250 lbs., has an initial velocity of 2,075. The computed velocity of the Army gun, with a 286 pound shot, was 1,825 feet, and the pressure 36,000 lbs. The results actually obtained with DuPont powder agree very nearly with this, and though the German powder gives a lower initial velocity it produces it with but ninety per cent. of the pressure estimated for. The Royal English Gun Factories, 9.2 in. wire gun, with a charge of 330 lbs., and a projectile weighing 380 lbs. has a muzzle velocity of 2,520 feet, and an energy per ton of gun of 880 foot tons. The 9.2 inch Elswick wire gun with 200 lbs. of powder projectile (?) has 2,200 feet muzzle velocity and 709 foot tons of energy. *Harper's Weekly*, of August 21, has an illustration of the new 8 in. steel rifle gun for the *Atlanta*.

THE plans and specifications for the new Army Building on the right hand side of Whitehall street, between Water and Front, have been prepared by Mr. Roswell D. Hatch, the architect, and received the approval of the Department. Work will be commenced on the superstructure as soon as the necessary pile-driving for a foundation has been finished. The plans show a handsome building of eight stories, fronting on Whitehall, Water, Front, and Moore streets, and occupying the whole block. It will be well lighted throughout with large arched windows, and the elevation from the curb line on Whitehall street is 122 feet, while on each of the other fronts it is 112 feet. The frontage breadth on Whitehall street is 104 feet, and the same on Moore street, while on Water street it is 92 feet, and on Pearl street 72 feet. The principal entrance to the building is from Whitehall street through a handsome arched doorway in the centre of the building, approached by a flight of stone steps and with an appropriate symbolical device in granite over the archway. A broad hall runs from the entrance straight across the building to another entrance on Moore street. There is to be a passenger elevator on the right hand side of the hallway a little distance inside, and beyond that a freight elevator, while adjoining the Moore street entrance is another freight elevator running to the third story. The first three floors of the building will be used for storage purposes. The remaining five floors are devoted to offices.

THE Board of Officers, consisting of Capt. J. W. Dillenback and Lieuts. H. L. Harris and A. Slaker, 1st Art., recently appointed by Major-General Howard to witness experiments with dynamite conducted by Mr. Graydon, met for that purpose at the Presidio of San Francisco August 10 and adjourned to Fort Point, where 26 lb. shells were loaded each with one pound of No. 1 Giant Powder and fired at the bald bluffs, 2,200 feet from Linn Point. The first and second and fourth shells exploded in mid-air a quarter of a mile away, and the third fell short of the target. The difficulty was in the fuses and for the remaining 20 shots, we are told, Lieut. Graydon "alternated between detonators and nothing at all but the concussion or heat, or other force created by the contact of the shell with the target. In the latter instances the shell was simply stopped with a wooden plug, which seemed to act as well as the finest detonating cap ever patented." Most of the remaining shots, of which there were 24 in all, struck the cliff, and the last one, turned loose at an increased elevation, landed on the hill among the

chapparal and dry grass; the grass was seen to be blazing at a lively rate. The officers of the Board heartily congratulated Mr. Graydon on his success. The experiment has to follow with shells exploded in the air by time fuses.

THE Baltimore *Sun* says: "The Naval Advisory Board, in carrying out the intention of the act which created it, made a report on the *Atlanta*, in which it was suggested that the vessel would never be brought to the rate of speed required by the contract until she had the advantages of trained firemen. Secretary Whitney returned this report with a curt note, in which he informed the board that all he wished to know from it was whether, in its opinion, the failure of the *Atlanta* to reach the required rate of speed during the recent trial trip was due to any neglect of the contractor. The members of the board replied that in their opinion the contractor was not to blame. The Secretary directed the board on or before Sept. 1 to take station at Chester, where work on the *Chicago*, the last of the steel cruisers, is progressing. The change will save considerable mileage, but will remove from Washington several bright lights of society. One reason for the removal of the Advisory Board is that the Navy Department is rather crowded, and the rooms now occupied by it are desired for the accommodation of the Walker Board on additional cruisers." Another reason for the change is that at Chester closer supervision can be given to the work on the *Chicago* and consultation with the inspectors and other officers more readily had without the expense and delay attending the other arrangement. It will not be many months before the Board is dissolved. Its work in connection with the *Boston* and *Atlanta* is now practically over and by the 1st of the year the *Chicago* ought to be completed. Her machinery will be ready for trial on October 1. Asst. Naval Constructor Bowles, having been detached from the Board, will probably be succeeded by Assistant Naval Constructor Gatewood who, being in Chester, can perform the duties as recorder without interference with his present duties.

A VERY interesting engineering fact is found in the recent history of tunnelling on the new Croton aqueduct. O'Brien and Clark, May 18, offered a prize of $300 to their section gangs who, between the 25th of May and 25th of June, completed the greatest number of lineal feet of tunnel in the most satisfactory manner; and $200 to the next best. The $300 prize was won by the gang of shaft 18¼, section 9, allowance being made for bad ground and timbering needed. The record made is extraordinary, as follows, for a section 20 feet 10 inches by 18 feet driven, without timber, etc.:

Heading 18¼ S.....205 feet, equivalent to 307·5 feet.
Bench " .....175 " " " 262·5 "

This unrivalled tunnelling record was accomplished with three No. 13 Rand Slugger drills and two No. 3 Rand Little Giant drills. At shaft 13 of Messrs. Rodgers and Co., and under immediate supervision of Walking Boss Pat Kelly, the Rand drills drove 277 feet of heading alone.

GOVERNOR ZULICK, of Arizona, who is in St. Louis, is reported in the *Democrat* as saying:

General Miles is a most determined man, and he has proved himself to be an officer of remarkable energy and ability. At last the people of the Territory have a feeling of security growing out of the general confidence felt in his ability and good judgment. Satisfied that diplomacy is an unknown quantity with renegade Indians, his policy is to drive them, bag and baggage, out of the place. This he has already done in a great measure, as most of the Apaches on the warpath have been driven into Sonora, where they are being chased by Capt. Lawton, an intrepid soldier, who has won much admiration by his bravery during the tedious campaign. The Federal Administration are helping us very well and I suppose there are at least 5,000 troops guarding the passes and water-holes and protecting the people. It is true the number seems ridiculously large, considering how many of the marauders they have to deal with. Gen. Crook's estimate of 42 braves as the total of the hostiles we are satisfied is under the mark; but there cannot be over 200. If these would stand up and fight we would soon end the difficulty, but they will run no risk. They get very little sympathy from the Mexicans, and Gov. Torres is co-operating very heartily with our troops. We find the Mexican aid of great value.

NO ARRANGEMENTS have yet been made about garrisoning Fort Myer, Va., and the understanding is that none will be made until the Secretary of War and Lieut.-General have a consultation on the subject. Some say that one of the light and one of the heavy batteries of artillery now stationed at the Washington Arsenal will take station there, while others believe that it is the purpose to send several companies of cavalry there and that Major Biddle, of the 6th Cavalry, will remain in command of the post.

ACCORDING to statistics recently published on the railway enterprise of the world, the aggregate mileage to the end of 1884 was 290,750 miles, costing $24,000,000,000, viz.: Europe, 117,694 miles; Asia, 12,757; Africa, 4,075; America, 148,738; Australia, 7,486 miles. Australia has the largest amount in proportion to population, and the United States and Canada come next. The highest expenditure was in Great Britain, where it amounted to $205,840 per mile, as compared with $123,985 in Belgium, $124,640 in France, $105,205 in Germany (State railway), $104,425 in Austria, $82,245 in Russia, and $63,250 in the United States.

THE semi-monthly payments to the employees of the War Department did not take place on Aug. 15, owing to the serious illness of Mr. E. M. Layton, the disbursing clerk. Maj. Peter C. Hains, Engineer Corps, was designated to act in Mr. Layton's place, and after a few days' delay succeeded in arranging matters so that the payments could go on, much to the relief of the clerks who were waiting for funds for vacation purposes.

THE "Official Register of the Officers and Cadets of the U. S. Military Academy, June, 1886," reaches us this week, and like its annual predecessors is a valuable compendium of information. Pages 33 to 39, inclusive, are devoted to data concerning the appointment and admission of cadets to the Academy.

THE Omaha *Herald* says: "The 21st Regiment do not take kindly to the change from the Platte to Washington Territory. At least those at Fort Spokane do not relish it very much."

UNFINISHED WORK OF CONGRESS.

JULY 31, p. 11, we gave a list of the public measures of interest to the Services passed by Congress, and Aug. 7, p. 35, those of a private nature. The following is a list of the measures relating to the Army and Navy left on the calendar at the close of Congress. In cases where Senate bills appear on the House calendar and House bills on the Senate calendar, it will be understood that they have passed one house.

SENATE CALENDAR.

S. 98, relief of Major Wm. M. Maynadier.
S. 225, to retire Col. Geo. W. Getty as Brig. Gen.
S. 1302, authorizing the appointment of an Asst. Secretary of the Navy.
S. 137, to increase efficiency of Army (Manderson bill).
S. 470, for surveying railroad for Military and Naval purposes from mainland to Key West, Fla.
S. 1262, relief of Thomas G. Corbin.
S. 729, relief of Rear Admiral Carter.
S. 778, to equalize bounties of soldiers, sailors, and marines of the late war.
S. 2620, to repeal so much of the act of June 20, 1878, as provides for the appointment of second lieutenants in the Signal Corps.
S. 662, to encourage the manufacture of steel for modern Army ordnance, armor, and other Army purposes, and to provide heavy ordnance adapted to modern Army warfare.
S. 663, to encourage the manufacture of steel for modern naval ordnance, armor, shafting, and other naval purposes, and to provide heavy ordnance adapted to modern naval warfare.
S. 2268, granting leaves of absence to employees in United States Navy-yards.
S. R. 60, relief of Cadet Engineers restored by decision of Supreme Court.
S. 2400, relief of Paymaster James E. Tolfree, U. S. N.
S. 2399, relief of Pay Clerk Charles Blake, U. S. N.
H. R. 1659, relief of the survivors of the exploring steamer *Jeannette*, and widows and children of those lost.
H. R. 4616, relief of Major Michael P. Small.
S. 2627, to regulate the pay of the officers of the Army and Navy who refuse or neglect to provide for the support of their families.
S. 2814, to donate to Tampa, Fla., Fort Brooke Reservation, for free schools and other purposes.
S. 2139, to establish the order of promotion in the Medical Department of the Army.
S. 2777, To retire Brevet Major-General William W. Averell, U. S. A., as a brigadier-general.
S. 2764, to retire Alfred Pleasonton as a Major-General.

HOUSE CALENDAR.

H. R. 1600, for monument to Gen. Grant in the city of New York.
H. R. 53, to authorize the President to restore officers to the Army in certain cases.
H. R. 2075, for the erection of a branch home for disabled volunteer soldiers west of the Rocky Mountains.
H. R. 5867, authorizing the President to raise two regiments of volunteer cavalry in the Territories of New Mexico and Arizona to suppress Indian hostilities therein.
H. R. 4626 and S. 2652, for the construction of a military telegraph line from Sandford, Fla., to Point Jupiter, Fla., and the establishment of a signal station.
H. R. 1171, to amend an act entitled "An act to provide for the muster and pay of certain officers and enlisted men of the volunteer forces," approved June 3, 1884.
S. 222, to amend section 1661 of the Revised Statutes, making an annual appropriation to provide arms and equipments for the militia.
H. R. 1717, for the special and uniform instruction of State militia.
H. R. 2017, granting railroad right of way through the Arsenal and Naval Asylum Grounds.
H. R. 7886, relief of telegraph operators during the war.
H. R. 2257, limiting a portion of an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1883, and for other purposes.
H. R. 7656, to establish signal stations on the West India Islands.
H. R. 7192, to provide a school of instruction for cavalry and light artillery, and for the construction and completion of quarters, barracks and stables at certain posts for the use of the Army of the United States.
H. R. 8347, to authorize the construction of dry docks at certain navy-yards, to be hereafter selected, by contract, and appropriating money for the same.
H. R. 7634, to increase the efficiency of the line of the Army, and for other purposes.
H. R. 7764, for erection of officers' quarters at New York Arsenal.
H. R. 8819, to grant leaves of absence to employees in the U. S. Navy-yards.
H. Res. 191, for relief of cadet engineers restored under decision of Supreme Court.
S. 1935, to enlarge, repair, and complete certain military quarters and barracks in Wyoming Territory and in the State of Nebraska.
S. 872, authorizing purchase of lot at St. Augustine, Fla., for military purposes.
S. 1424, for the relief of graduates of the U. S. Military Academy.
H. R. 807, an act granting pensions to soldiers and sailors of the Mexican War.
S. 1526, relating to pensions to certain disabled persons who have served in the Navy or Marine Corps.
H. R. 7895, for the relief of certain officers of the Volunteer Army.
H. R. 1017, to relieve certain appointed or enlisted men of the Navy and Marine Corps from the charge of desertion.
H. R. 6758, authorizing the President to confer brevet rank on officers of the Army for gallant services in Indian campaigns.
M. Doc. 255, relative to the disbursements of public moneys of the Chief Signal Officer, United States Army.
H. R. 8331, to regulate the pay of the officers of the Army and Navy who refuse or neglect to provide for the support of their families.
M. Doc. —, resolution to fix a day for the consideration of business from the Committee on Naval Affairs.
H. R. 1686, to repeal certain provisions of the act approved March 3, 1875, relating to the purchase of arms for the use of the States.
S. 1154, to authorize the city of Newport, R. I., to use Fort Green as a public park.
H. R. 7819, to establish the order of promotion in the Medical Department of the Army.

There are a number of pension and other private bills on the private calendars of the House not mentioned here.

The list of the Senate bills pending before the House Committee on Naval Affairs at the close of the session of Congress appeared in the JOURNAL of Aug. 7, p. 34. The following House bills are also before that Committee, but have much less chance of passage than the bills the Senate has already acted upon:

S. 702, for relief of sufferers by the wreck of the *Tallapoosa*
H. R. 338, to regulate appointments in staff of Marine Corps.
H. R. 339, to authorize voluntary retirement of certain officers.
H. R. 340, to equalize pay of graduates of Naval Academy.
H. R. 345, to pay $200,000 prize money to officers and crew of the *Monitor*.
H. R. 2103, regulating the appointment of Assistant Naval Constructors.
H. R. 2256, amending act of Aug. 5, 1882.
H. R. 3268, regulating the number of Rear Admirals on the active list.
H. R. 3585, to retire officers on their own application.
H. R. 4245, to give lieutenants of the Marine Corps who have served as such 15 years or more the rank, etc., of captain.
H. R. 5475, to regulate the number of Naval Cadets to be selected each year.
S. 1417, deposit of seamen's savings.
S. 1527, providing a home for discharged seamen.
H. R. 6322, to establish the status of staff officers retired before March 3, 1872.
H. R. 6307, regulating promotions in the Navy.
H. R. 6900, to establish the rank of and to retire warrant officers.
H. R. 7189, providing for promotions of officers below the grade of commodore.
H. R. 9890, to construct steel-clad rams.

The following members have charge of these bills; Hale, 702, 1417, 1527; Thomas, 338, 339, 340, 345, 3268; Harmer, 2103, 6900; Ballantine, 2256, 6307; Goff, 7189; King, 9890; Wise, 5475, 6322.

The following are before the Senate Naval Committee:
S. 617, to give the commandant of the Marine Corps the rank of Brigadier General.
S. 672, relating to bureaus Navy Department.
S. 700, relief of Madeline V. Dahlgren.
S. 704, defining sea service.
S. 744, to pay $200,000 prize money to the officers and crew of the monitor that engaged the *Merrimac*.
S. 815, to regulate appointment of Assistant Naval Constructors.
S. 971, to retire mates in the Navy.
S. 1295, regulating promotions and retirements in Marine Corps.
S. 1371, to issue commissions to carpenters in the Navy.
S. 1419, to provide outfits of clothing for seamen.
S. 1575, to appoint astronomers at U. S. Naval Observatory, etc.
S. 2511, to construct three dry docks.
S. 2613, to present badges to officers of Greely Relief Expedition.
S. 2815, to retire officers for disabilities incident to the Service and defining the same.

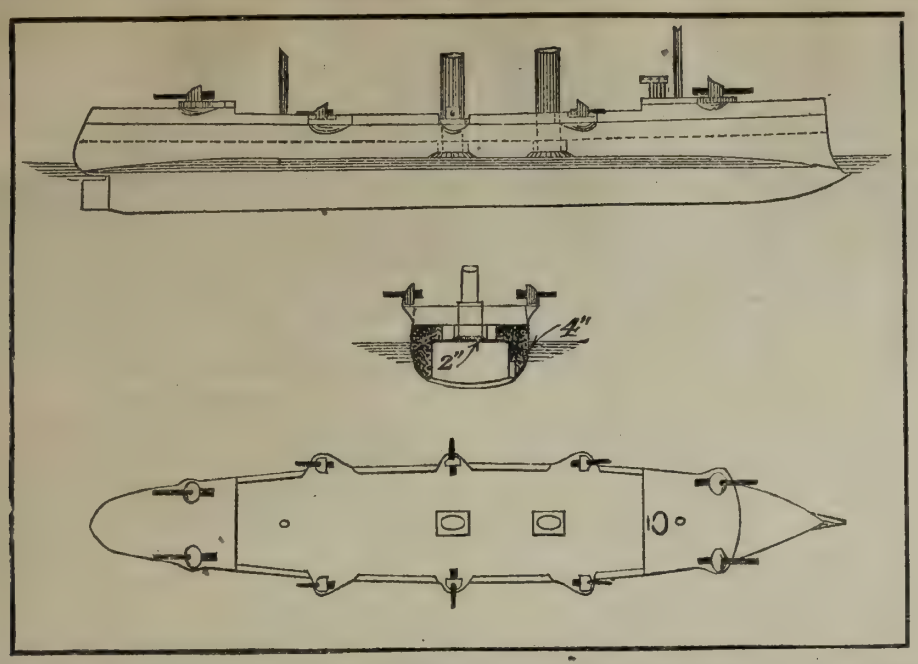
In charge of the following members: Hale, 617, 1419, 2613, 2815; Frye, 672; Sherman, 700; Aldrich, 704; McPherson, 744; Blair, 815; Butler, 971, 1295; Voorhees, 1371; Cameron, 1575, 2511.

FROM THE RIO GRANDE.

A DESPATCH from El Paso says: "El Paso and Paso del Norte are two of the quietest cities to be found. There are 300 soldiers doing police duty at Paso del Norte, but the Mexicans are sitting around saloons in utter ignorance of any war feeling. There is more evidence of life and animation on the American side of the river, as is natural for the more bustling Yankees, but no war talk is indulged in or thought of. The war is all further away, in Kansas, Missouri and New Mexico, where war is wanted by certain classes for speculative purposes."

Colonel Royall, commanding the 4th Cavalry, a portion of which is operating in Mexico against the Apaches, is reported from Washington as saying that the Mexican troops have been co-operating with our forces in the present campaign with the greatest cordiality.

"Among the men whom the National Government of Mexico has most to fear," says a Fort Worth despatch to the New York *Times*, "are Gov. Trebino and Gen. Naranjo. They, with a little group of wealthy followers, comprising not more than 20 men, have long wielded an almost irresistible influence in the States north of the Sierra Madre Mountains, notably in Tamaulipas, Coahuila, Nueva Leon, and Chihuahua. This territory contains only a small portion of the better people of Mexico, and from there comes all our trouble. Both the Gonzales and the Diaz Administration sought to hold this syndicate friendly, and to that end Trebino and Naranjo have in turn been given the position of Secretary of War in the Mexican Cabinet—one of the best positions in the Government."



A despatch of Aug. 20 from Laredo says: "News having been received that the Mexican authorities had fortified a small town some fifty miles up the river, called Pan, and placed a detachment of sixty troops there, the commandant of Fort McIntosh, Col. Bernard, detailed a detachment of twenty men, who left yesterday, and will remain for the present at Palafox, opposite Pan, on this side of the river, as rumors had arrived that the Mexicans had crossed the river to this side. Palafox is a deserted mining town, with but few inhabitants, but large ranches are adjacent to it and could easily be plundered."

(From the Detroit Tribune.)

IN PASO DEL NORTE.

The barracks in Paso del Norte are situated about 500 yards from an old church, and are composed of heavy adobe walls, in which two or three companies of regular infantry rendezvous. It is in this fort that Cutting probably has been confined. The city prisons are very weak adobe buildings, and the walls could be crushed in with a sledgehammer wielded by a muscular arm. Owing to the excitement over Cutting's case I should take it for granted he would be imprisoned in the fort. There is no ordnance in this fort, although it belongs to the general government. The Governor of Chihuahua has no control over the troops in these barracks, and so far as I know has no State militia of his own.

THE 4400 TON CRUISER.

WE give here an illustration of the new Spanish cruiser which, as we stated last week, furnishes the model for the designs adopted for the 4,500-ton cruiser for which proposals will be asked. The description of the vessel called for is as follows:

Length between perpendiculars, 315 ft.; length over all, 335 ft.; beam extreme, 48 ft, 8 in.; draft, forward, 18 ft.; aft, 21 ft.; mean, 19 ft. 6 in.; depth, 33 ft. 6in.; load displacement, ordinary draught, 4,400 tons; I. H. P., 10,500, forced combustion; twin screws, estimated speed 19 knots.

The ship has two military masts; no sail power except storm sail; coal capacity about 900 tons, Complement of men is 320.

The main battery consists of four 8-inch and six 6 inch breech-loading rifles. The secondary battery eight 57 mm. single shot Hotchkiss guns, two 37 mm. revolver machine guns, and one short Gatling.

The hull will be constructed of steel throughout, with double bottom running the entire length of the machinery space, or 150 ft. Throughout the length of the double bottom the ship is constructed on the bracket system or combination of the longitudinal and transverse systems. Before and abaft the double bottom the framing is of Z bars; the frames in the double bottom are spaced 43 inches between centres; before and abaft these points the spacing is 36 inches.

The outer plating varies from 30 lbs. to 17½ lbs., the ordinary weight being 20 lbs. per square foot.

The machinery, magazines, shell-rooms, torpedo-rooms, and steering-gear are placed below an armored deck, which is 4 in. thick on its sloping sides, and 2½ in. on the horizontal part midships. The outer edge of this deck is 4 ft. below the load line, rising to 1 ft. above the load line at the horizontal part midships. All the openings in this deck to machinery spaces, magazines, shell-rooms, etc., are protected by coffer-dams. Above the protective deck the machinery is still further protected by side belts of coal 10 ft. in thickness, averaging 8 ft. in depth, extending from the skin of the vessel inboard; while below this deck a similar belt is provided, 7 ft. in thickness.

The vessel is what is called a poop and forecastle decked ship with open gun-deck. The battery will be mounted in sponsons on central pivot carriages supporting segmental shields 2 in. in thickness; two 8 in. guns on the poop; two 8 in. guns on the forecastle decks, with the 6 in. guns mounted in the intervening space on the gun-deck. Two 8 in. guns and two 6 in. guns will concentrate within 100 ft. of bow or stern, while either 6 in. broadside can be concentrated within 100 ft. of the ship's side.

The vessel will be provided with five above-water torpedo-launching tubes, electric search-lights, incandescent lighting apparatus for lighting the ship, and a complete system of exhaust ventilation for living spaces in connection with the system for forced combustion.

The protective deck will be carried down to strengthen the ram-shaped bow, which will be thoroughly stiffened and strengthened for ramming purposes.

The hull will be divided into numerous water-tight compartments by means of longitudinal and transverse bulkheads.

The motive-power will be derived from two sets (each in a water-tight compartment) of triple expansion engines in connection with four double-ended boilers about 14 feet in diameter.

The engines will be capable of developing 10,500 I. H. P., with forced draught.

We add a description of the original vessel as designed for the Spanish Government.

Principal dimensions.—Length, 300 feet; moulded breadth, 50 ft; moulded depth, 31 ft. 6 inches; mean draught, 20 feet; displacement, 4,300 tons. The hull will be of steel, unsheathed, with cellular double bottom under engines and boilers, the sides, however, being single above the floor, and the hold will be divided by eleven complete transverse bulkheads and several partial ones into many watertight compartments. The protective deck will be unusually strong, 4¾ inches on sloping part and 3 inches at crown over engines, boilers, and magazines; before and abaft these spaces it will be 3¾ and 2 inches in thickness. The space between the main deck and protective deck will be minutely subdivided into coffer dams and compartments for coal, stores, and torpedo rooms.

Her freeboard will be about 14 feet, her quarters will be exceptionally comfortable and well ventilated, her metacentric height will be not less than 2½ feet when fully laden, and her reserve buoyancy will render her practically uncapsizable.

The armament will consist of four 8-inch 13-ton B. L. R., partially sponsoned on each side of poop and forecastle, with their axes about 27 feet above the load water line, and six 5-inch Hontoria B. L. R. on sponsons in broadside. The secondary battery will include 6 six-pounder R. F, four 1-inch Nordenfeldt, and four 11-millimeter Nordenfeldt machine guns; and the torpedo battery five tubes, two ahead, two in broadside, and one astern, all above water.

The engines will be of the triple expansion type in two separate compartments. I. H. P. under forced draft, about 11,000. The guaranteed speed under natural draft is 18½ knots, and under forced draft, 20½ knots. Total coal capacity about 1,100 tons or about 600 tons at normal draft. Endurance about 17,000 miles at 8 knots or about 10,400 miles at 10 knots.

Complement, 300 officers and men.

THE REUNIONS AT SAN FRANCISCO.

GOVERNOR STONEMAN, at the recent banquet in San Francisco of the Society of the Army of the Potomac, gave an interesting version of how the Army of the Potomac was named. He said: "I wonder if any man can tell me who named the Army of the Potomac or how it was named. It was thus: After the battle of Bull Run Gen. McClellan went East, and I went with him. We found Gen. Mansfield in command of the forces around Washington. We drove to see him. In doing so we passed the quarters of Gen. Scott, God bless him. We went to see him, and while we were discussing the name which should be applied to the Army, and after several names were discussed, the name Potomac was mentioned. The old hero, raising his finger as his habit was, said, 'Potomac, Potomac, appropriate and euphonious. Let it be called the Army of the Potomac.'"

THE PRESIDENT TO THE SOLDIERS.

The following letter from President Cleveland was read at the farewell banquet of the Grand Army of the Republic at its reunion in San Francisco on the evening of Aug. 5:

EXECUTIVE MANSION,
WASHINGTON, July 25, 1886.

Samuel W. Backus, Esq., Chairman, etc.:

DEAR SIR: I acknowledge with sincere thanks the receipt of an invitation on behalf of the General Committee of Arrangements to attend the twentieth national encampment of the Grand Army of the Republic, to be held at the city of San Francisco during the first week of August next. I desire also to express my admiration for the means by which the invitation was transmitted, which, by the unusual beauty of its design, enables me to always peruse a valuable souvenir of the thoughtfulness and consideration of the committee.

I regret exceedingly that official duties, just at this time unusually exacting, will not allow me to be present at the encampment.

Please convey to those in attendance my earnest wish that the occasion may strengthen the friendship and kind relations of those who by participation in danger became comrades, and that it may tend to the preservation of their common interests.

The Nation's gratitude to the soldiers of its wars should never wane or languish, but its manifestation should rest upon motives worthy of the subject, and should be characterized by fairness and impartiality.

I am sure the Grand Army of the Republic asks no more than this, and while it may well regard with watchful care the wants and the rights of its members, it will crown its mission by demonstrating to the people of the land how completely the American soldier with the cessation of conflict may merge in the American citizen; and how well prepared he is, in time of peace, by the exercise of his rights of citizenship, quickened by the risks and danger of his country's defence, to further protect her honor and to promote her prosperity and progress. Yours, very truly,

GROVER CLEVELAND.

The San Francisco *Report* sums up the national encampment of the G. A. R. thus: "It has brought a great deal of amusement and entertainment to San Francisco; we have enjoyed the pageantry and excitement; some of us have had the rare felicity of being hospitable upon other people's money; others have rejoiced in the personal prominence and leadership without which their life is not worth living; the city has not lost a cent by the affair, and California generally has probably done a good stroke of advertising through it."

GENERAL SHERMAN ON THE MEXICAN WAR.

General Sherman in his address to the G. A. R. gave an interesting review of the history of the Mexican War and the conquest of California by the United States, which he dated from July 7, 1846. In the course of his remarks he read the letter which follows:

NAVY DEPT., WASHINGTON, May 10, 1886.

Gen. W. T. Sherman, 912 Garrison ave., St. Louis, Mo.:

MY DEAR GENERAL: Your note of April 30, to Silas Bent, Esq., asking him to furnish you with certain information from his recollection of matters at Mazatlan in 1846, has been sent by him to the Secretary of the Navy, and referred to me for reply.

An examination shows that at the date of the declaration of war with Mexico, May 13, 1846, the Savannah, bearing the broad pennant of Commodore J. D. Sloat, the Cyane, Capt. Wm. Mervine, the Levant, Comdr. Hugh N. Page, and the Erie, storeship, Lieut. Comdr. C. C. Turner, were all at anchor in the harbor of Mazatlan, and that the Warren, Comdr. J. B. Hull, arrived the following day, May 14.

The logs of these ships show that Her Britannic Majesty's ship Collingwood, 80, the flagship of Rear Admiral Sir Geo. Francis Seymour, got under weigh at 6 A. M. on the 13th, went outside and stood off and on the harbor. The log of the Warren shows that on the 22d the Collingwood was off the harbor; she came in and anchored on the 23d, and on the 25th, at meridian, again got under weigh and went to sea. On May 19 the Cyane went to sea, followed on the 20th by the Levant and Erie.

Commo. Sloat reports that on June 7 he received information that a state of war existed between Mexico and the United States; that he sailed on the following day, the 8th, for the coast of California to carry out the orders of June 24, 1845, leaving the Warren at Mazatlan to take him any despatches or important information that might reach there.

There is nothing in the log books or report to show that the Savannah was followed or watched by the Collingwood. The Savannah arrived at Monterey on July 2, finding the Cyane and Levant in port. On the 7th, the commandant having declined to surrender the place, a force was landed and possession was taken. The Collingwood, with Rear Admiral Sir George Francis Seymour on board, arrived on the 16th, when the usual tender of courtesies and the facilities of the port were offered. The Collingwood was subsequently furnished with a set of top-gallant masts and other spars, and sailed on the 23d for the Sandwich Islands.

The report says: "The visit of the Admiral was very serviceable to our cause in California, as the inhabitants fully believed he would take part with them, and that we would be obliged to abandon our conquest; but when they saw the friendly intercourse subsisting between us and found that he could not interfere in their behalf, they abandoned all hope of ever seeing the Mexican flag fly in California again."

But there is nothing to show that the English Admiral said that he should have taken possession of California in the name of Great Britain if Commodore Sloat had not already taken possession in the name of the United States.

The Cyane and Levant went directly from Mazatlan to Monterey, the Cyane arriving June 20, the Levant arriving July 1. The Erie went to Honolulu and afterwards to San Francisco.

A report has been current in our Navy that the English intended taking possession of California, and were only prevented by the fact of finding the United States in possession, but I can find nothing official in support of this.

If I can be of any further use to you in this or other matters, please command me. Very truly yours,

J. G. WALKER.

In concluding his remarks Gen. Sherman said:

You, my beloved comrades of the war of 1861-5, have abundant reason for your faith in the majesty and security of this new Union, with the Atlantic States, the Pacific States, and the great centre bound together by rivers and mountains, and by bands of steel, each State controlling its own property and interests, with a strong government over all. Yet in your conventions and feasts you can well spare some words of cheer to your older comrades of the Mexican War who did so much to enlarge the national domain, and make possible the glorious work you soon afterward so thoroughly accomplished. We cannot expect to tarry long to enjoy the fruits of our labor, but untold generations of intelligent men and beautiful women will be here to protect, defend and maintain these conquests, and meantime we have a right to be proud and content that in our day and generation we have largely contributed to build up and strengthen the fabric of government fashioned by our fathers, sanctified by the great name of Washington, made doubly precious by the noble virtues of our martyred Lincoln, and crowned by the achievements of our comrade, Grant.

(Extract from the Speech of Senator John A. Logan.)

I am now going to say something at which some may be displeased, but I am alone responsible for it. It is this: I have health and strength. I ask nothing of this country. If I have been of use to the country I am glad of it, and I ask no recompense. But there are men and women who, crippled, diseased and hunting around from street to street, seek for the means of supporting life, and I say that any Government that permits an old soldier to wander thus has forgotten its duty. And so, too, while the good men and women behind the soldiers were exercising their devotion for our Army and called down God's blessing on them, and the women went to the hospital and the battlefield with the velvet hand to soothe the wounded, I say to them also we owe a debt. And of the hand that with a pen would strike down the charity which would aid such, I say, even if it were my own, "May God paralyze it!" [A voice, "Fitz-John Porter."]

(From the San Francisco Chronicle).

CALIFORNIA HOSPITALITY.

One of the visiting veterans, who claims to have attended every encampment of the Grand Army since the creation of the organization, declares that never was such treatment accorded to visitors in any city of the Union as in San Francisco. He says that while the comradeship may have been as strongly marked in other cities there was not that spontaneous enthusiasm which has been visible in every direction in this city. He adds that there is an entire absence of the commercial idea which seems to have pervaded the demonstrations in Eastern cities, and that, while our people may have counted the value of having a large body of Eastern men see for themselves the advantages of the coast, the hospitable features of the encampment have entirely overshadowed the gainful one.

An eccentric correspondent of the San Francisco *News Letter* writes anent the recent G. A. R. parade: "Didn't Col. Smedberg look awful nice a ridin' at the head o' the California chaps? If you ask my real opinion about which was the best lookin' crowd I'd say the Zouave chaps from New Jersey 'n the Veteran Guard o' 'Frisco 'ts their chums. The Zouave uniforms is just splendid, 'n though the Veterans aint so takin' to the eye in the matter o clothes, they are such a daisy lot o' fellahs they had lots o' admiration 's they went along. Then the magnificent Delaney 'n gorgeous Boland are always sure o' admirin' glances. Aint it worth goin' out to see Gen. Barnes when he 's in any kind of a procession? Aint Gen. McMahon real handsome, 'n warn't you pleased to see Sherman ridin' along with the fellahs 't was round him, 'Marchin' through Georgia;' 'n Logan, too! (Mrs. Logan 's just elegant 's ma met her to dinner the other evening', 'n says she 's too sweet for anythin'.) I just think the New York fellahs lovely."

(From the Augusta (Ga.) Chronicle, August 11.)

THE CONFEDERATE POWDER.

IN a recent conversation with the Rev. Mr. Jones the Hon. Jefferson Davis spoke with pride of what progress the Confederacy had made in creating material of war, until, at the end of the struggle, the best powder in the world was made at the Confederate Mill, near Augusta, under charge of Col. Rains. He said that while a prisoner at Fortress Monroe he was told that the powder which produced the best results in firing at iron plates was some of this powder captured from the Confederates.

CHARGES AGAINST NAVAL OFFICERS.

IF we are to believe the New York *World*, "there is about to be an outbreak between the State and Navy Departments, growing out of the official conduct of Naval officers at Capetown, on the southeast coast of Africa, mention of which appeared not long since in the *World*, based upon the reports of Consul Siler to the State Department."

According to this authority, Mr. A. C. Stevens has arrived direct from Capetown with a long story for the Navy Department with reference to the business methods of his former employer, a broker, Joseph Grady. Stevens asserts that Grady, who never owned a hundred dollars' worth of goods in his life, was always given the contracts in preference to large firms who had on hand the goods and could furnish them much cheaper than could Grady or any other broker who was compelled to buy from the wholesale stores.

The *World* says: "Other and more reputable dealers have attempted to make propositions to the officers offering to furnish the supplies 25 and 75 per cent. lower than the prices paid to Grady, but none of them were ever considered. In some cases Grady, according to Stephens's statement, charged as high as 300 per cent. more than the market value of the articles. Mr. Stephens says these things have been going on for the past five or six years by the officers of the *Pensacola*, *Brooklyn*, *Essex*, *Marion*, *Enterprise*, *Juniata* and *Lancaster*, all of which have procured supplies at this point. The law provides that each vessel shall advertise for bids before letting the contract, but Mr. Stephens says this was never done. The Consul at Cape Town has been so harassed by the merchants making complaints of what is supposed to be disreputable conduct upon the part of the American officers that he is trying to have it broken up.

"The Navy Department, however, are not inclined to believe the reports, and think the State Department is going beyond its jurisdiction in hunting down those connected with the Navy. Consul Siler has a great deal more evidence. He proposes to submit this before he returns to his post, which he thinks will cause a court-martial to be called and sent to Cape Town, when the matter will be fully investigated. It is claimed by the citizens of Cape Town that the Naval officers are robbing the Government, and this, Mr. Siler thinks, is also true by Grady dividing his enormous profits with them."

The *World* reports Colonel Remey, Judge Advocate General of the Navy Department, as saying: "If the charges are true, the Navy Department is more anxious than any other branch of the Government to be informed of it. We want to be thoroughly satisfied of the truth of the charges before we go to the expense of sending out a court-martial. So far there has been but one side of the controversy presented to the Department, and before authorizing an investigation it is necessary to know something from the officers themselves. When this is furnished it will then be the wish of the Department to proceed as it may think best. We are anxious that all the charges that are to be made shall be placed on file as soon as possible."

THE WAMPANOAG, INCONSTANT, ETC.

To the Editor of the Army and Navy Journal:

AS YOUR correspondent, "Observer," on page 35 of your issue of August 7, seems anxious for information regarding the *Wampanoag* and her famous trial trip, I cite some extracts from a letter written by the Chief Engineer of the vessel on that occasion to his friend, Chief Engineer Robert Danby, immediately after the trial. I have restricted the extracts, which have never before been published, to the parts relating to the vessel and machinery, in order to occupy as little of your space as possible.

WAMPANOAG, HAMPTON ROADS, VA., Feb. 17, 1868.

Chief Engr. Robert Danby, U. S. N., Navy-yard, New York.

DEAR DANBY: We have just arrived here after a very splendid trial of 38 hours; the average speed during that time being 16.66 knots per hour. For 24 hours we made 17 knots, or 407⅛ knots for those 24 hours, the best steaming on record. In 37 hours after leaving Sandy Hook, we were off Charleston Harbor, S. C. During the economic trial of 11 knots for 48 consecutive hours, which was terminated by a gale of wind in 24½ hours, we developed a horse-power for 2.4 pounds of coal per hour, the speed of the vessel being 11⅜ knots per hour, and the daily consumption of coal being 43¾ tons. As a sea boat she is very easy, and the engine when slowed down cannot be heard working in the ward room, and in the engine room there is not any sign of racing.

The following are the average speeds of the vessel as sent to the engine room by the officer of the deck.

Average speed of ship for	38	consecutive	hours,	16⅝	knots.
" " "	24	"	"	16 973	"
" " "	12	"	"	16.98	"
" " "	6	"	"	17.25	"
" " "	2	"	"	17.50	"
" " "	1	"	"	17.75	"
" " "	½	"	"	18.00	"

The engine is in tip top condition, and I would like to race her against either the *Scotia*, *Ville de Paris*, or *Periere;* I think that we would astonish them some. We made and maintained a very good vacuum this time and had just enough steam, average pressure being about 32 pounds. The weather was very pleasant, and the sea quite smooth, at least it was not rough. The winds were light, the strongest wind was logged at four and the lightest at one. The ventilators were trimmed ahead, as we outstripped whatever wind there was. No sail was set during the full power trial.

Truly your friend,
JOHN S. ALBERT.

From the above extracts "Observer" may learn that the *Wampanoag* after her trial was in as good a condition as before it. The vessel was built at the New York Navy-yard, with live oak frames, iron diagonal bracing, etc., and was in all respects as strong a nautical structure as was possible to be made of wood, copper and iron, and under the severest strains proved always perfectly rigid. He will also learn that the machinery did its unequalled work very easily; neither picked fuel nor picked firemen were used.

The *Wampanoag* was a wooden vessel of about 4,000 tons displacement, and went upon her trial with all her weights in, fully equipped for a cruise, and at her deep load draught of water. She was not only a full powered steamer, but a full powered sailing vessel, and (together with others of her class having duplicate machinery) was the only "cruiser" the American Navy ever possessed, or is likely to possess for a long time to come.

The British war steamer *Inconstant*, referred to by "Observer" in comparison, was built after and in competition with the *Wampanoag*, the avowed purpose being to produce a more formidable vessel with a higher rate of speed, to secure which a much larger displacement was taken. She was designed by Sir Edward J. Reed, a naval architect of the loftiest reputation, and the machinery was designed and built by the celebrated engineering establishment of Penn. If there be anything in parentage, she had the advantage of the greatest names. She had an iron hull sheathed with wood and coppered, and was of 5,782 tons deep load displacement. Like the *Wampanoag*, she, too, was not only a full powered steamer but a full powered sailing vessel. Not the slightest alteration was ever made in the *Wampanoag*, whose trim, stability, and nautical qualities were from the first all that could be desired, while the *Inconstant* was found to require, after her trials, 180 tons of ballast to be placed along her kelsons to give her the necessary stability. The vessel was "crank," very much by the stern, carried all her movable weights forward, and "stayed" and "wore" badly. The difference in the "endurance" of the two vessels was as strongly marked: the *Wampanoag* carried 750 tons of coal in her bunkers, while the *Inconstant* carried but 600 tons, notwithstanding her much greater displacement.

When completed, the *Inconstant* was tried at her light draught of water, about 450 tons of weight being left out. She was tried with picked "navigation" coal, the finest steam producing coal in the world, and with picked firemen from the naval reserve, according to the British Navy system. Under these conditions her full power trial consisted in actually running over the whole of six sea miles in smooth water, and the resulting speed was declared to be 16.512—she needs all the fractions—sea miles per hour. Had she, like the *Wampanoag*, been tried at her deep load draught of water, and had the trial been for 38 consecutive hours at sea, covering a distance of 634 sea miles instead of 6 miles, and had she been steamed with ordinary coal and firemen, does any person acquainted with such subjects imagine that her speed would have averaged 15 miles per hour? Under the most favorable conditions for the *Inconstant* her speed of 16.512 miles must be placed against the 18 miles of the *Wampanoag* maintained for half an hour. Furthermore, every person acquainted with such subjects knows that the larger the vessel the greater the speed with the same proportion of power to displacement, and that the *Wampanoag* is entitled, in the speed comparison, to a very large allowance in her favor for the large difference in the displacements of the two vessels. If a just allowance in this respect be made, the superiority of the *Wampanoag* would appear immense, for the speed values compare as their cubes and not in their direct ratio. When tonnage is taken into consideration, the *Wampanoag* was not only immeasurably the fastest steamer of her day (nearly 20 years since she was designed), but she remains to this hour very much the fastest steamer that has ever floated, naval or merchant, under proper comparable conditions.

Nevertheless, the *Inconstant* is a superb vessel, and worthy of all praise. More fortunate than her rival in being constructed of iron instead of wood, she has been able to outlive detraction, but a great many years elapsed after her trial before she was allowed to make a cruise, being laid up in ordinary while very inferior vessels were in constant use. Her designer, a man of genius, of extensive acquirements in all departments of human knowledge, and possessing great independence of character, was forced out of office by the opposition and jealousy of the officers of the Navy, and as much of his work as possible was consigned to obscurity.

For very similar reasons, the *Wampanoag* was put out of commission immediately after her trial, and never permitted to make a cruise. Her success had been too great to be forgiven, and her rare qualities have always been carped at with spite and belittled without knowledge by those who belong to the class of naval officers which has evidently the honor to include "Observer." ANTI-OBSERVER.

THE QUESTION OF NATIONAL DEFENCE.

To the Editor of the Boston Journal:

AFTER reading the article published in your Saturday issue on "Our Defenceless Coast," with head lines "Some Facts of Interest," I beg to suggest that other facts of equal interest should be presented to your readers to enable them to form a balanced judgment as to the merits of this important question. You state that the most powerful gun we had in 1860 was a cast iron gun of some 2,000 foot-tons muzzle energy. You should also state that we now have a cast iron breech-loading rifle, which has developed some 19,000 foot-tons muzzle energy, or nearly tenfold greater than the gun of 1860. You state that the modern steel rifles have a muzzle energy ranging from 20,000 to 35,000 and 40,000, and even 61,000 foot-tons muzzle energy. You should also explain that no one of these modern steel rifles has passed beyond the experimental stage—that is to say, that no one of them, either in Germany or France or Italy or England, has ever been fired rounds enough to demonstrate that it is a safe and reliable weapon for service. No steel rifle in Europe, of calibre as large as 12 inches, has ever been fired 200 rounds. This statement will seem incredible to most of your readers, but you will find it to be true. England, relying upon her military experts, has blindly invested millions in modern high-power guns (so called). These guns were designed by officials of the highest scientific attainments, and, no doubt, after much high-power mathematical calculation—in fact, the eminence of the designer was so satisfactory, and the mathematics so deep and searching, that it was thought not worth while to delay the work to satisfy any beggarly doubts as to the question of endurance. It turns out, however, that these guns now being put in service are breaking right and left. Gunpowder seems to have no respect whatever for all this eminent expert merit; and John Bull is now figuring up the real value of his gun investment, with mutterings deep and long. The last number of the *Admiralty Gazette* tells us that on July 2 last it was discovered that two of the 38-ton guns of the *Ajax* were disabled and rendered unfit for further service, their tubes having cracked, and on July 9 the whole four were found to be disabled. "England," it says, "has not a single gun on which to rely in case of need. Those on board the *Colossus*, guns of the latest pattern, dare not be used, and have been ordered not to be fired. We dare not at this moment engage in a war with a foreign naval power, and Russia, aware of the fact, tears up the treaty of Berlin as she did that of Paris in 1870."

Some writer says that Englishmen do not like to think, but prefer to follow the bell-wether and take their chances. Americans, probably, inherit this characteristic. And so we find Gen. Hawley demanding of Congress an appropriation of $6,000,000 to enable the Ordnance Department to contract with some steel manufacturer for 10,000 tons of heavy steel forgings. Now, a little thought would have shown him the propriety of finding some heavy steel gun that had shown satisfactory endurance before committing this Government to an expenditure of $6,000,000 upon a type of gun that is now of questionable strength, to say the least.

Very respectfully, WM. P. HUNT.
SOUTH BOSTON IRON WORKS, Aug. 9.

THE HARBOR CONTROVERSY.

To the Editor of the New York Times:

I AM glad to see that the course recommended by me in a not unfriendly correspondence which has recently passed between the Chairman of the New York Harbor Committee and myself is to be followed, and the further discussion of the New York Harbor Commission question is to be made before bodies entitled to act upon it. It is evident that we do not understand English in the same way, and it is best, therefore, that the letters that have passed upon the subject be left to speak for themselves.

There are two points, however, about which I do not wish the public to be left in doubt. In the first place, there is no quarrel between me and the merchants and the Chamber of Commerce of the city of New York, for whom I have the highest respect, although the attempt is made to make it appear so. My knowledge of the movement that was being made to push the Harbor Commission bill through was derived from a member of the Chamber of Commerce who was himself opposed to it, and my letter to the River and Harbor Committee of the House asking them to defer action upon it until a free discussion of it could be had was made upon the ground that the opponents of the measure had never had an opportunity of being heard either before the Chamber of Commerce or the Congressional committees. This certainly is not factious opposition. Second—That letter was my own alone, written hastily upon the arrival at Sharon on Saturday of the morning papers containing an account of the discussion of the matter before the Congressional committee, and mailed in time to reach Washington on Monday morning, and not another soul in or out of the Corps of Engineers knew anything about it until it reached its destination. The Corps is in no way responsible for this and should not be brought into the controversy.

Finally, let it be borne in mind that the fight has been about the Harbor Commission, and not at all about the Harbor improvement, although these two independent matters seem to have become inextricably mixed up in some of the letters which have passed—notably in the last one—only one-eighth of which is devoted to the original issue, the remainder being devoted to a discussion of the proposed plan of improvement. That is well enough. The plan ought to be discussed freely and fully, as it was expected that it would be, and I for one shall be very glad if a better and cheaper method of securing the end desired can be found than by the means proposed. I am unable to see the force of the objections to it made by the Chairman of the Harbor Committee, nor do I see that the execution of the plan involves necessarily the closing of the channels to which he refers. In the meanwhile the appropriation has been made under the approval of the Chamber of Commerce, and as it is to be expended under a project yet to be approved there will be abundant opportunity for every one who wishes to do so to present his views upon the subject.

WALTER MCFARLAND,
Lieutenant-Colonel of Engineers.
ENGINEER OFFICE, UNITED STATES ARMY, ARMY BUILDING, NEW YORK, Sunday, Aug. 15, 1886.

(From the Alta California, August 7.)

A PRESENT TO GENERAL SHERIDAN.

THE following letter was received yesterday by Gen. Samuel W. Backus:

OGDEN, UTAH, August 4, 1886.

Friend and Comrade Backus:

DEAR SIR: I send you, per bearer, a present for Gen. Phil. H. Sheridan. As I cannot be there to present it myself, please do me the favor to present it as a substitute for yours truly, L. MCCARTHY,
Ex-Sergeant Co. F. California Battalion, one of Phil. Sheridan's old scouts.

The "present for General Phil. H. Sheridan" is a wildcat of the wildest possible type, which "one of Phil. Sheridan's old scouts" has sent in a box to the care of Gen. Backus. The animal is now in the Post Office, and if anyone doubts the genuineness of the brute, the doubter can satisfy himself by interviewing the animal, who shows a pair of fiery, wicked eyes and snarls savagely. Gen. Sheridan is not here to receive the present in person, and Gen. Backus, who has no particular use for wildcats, is at a loss to know what to do with the animal.

MR. T. H. S. HAMERSLY AGAIN.

To the Editor of the Army and Navy Journal:

HAVING read Col. Dodge's letter in regard to the Editor of the "United Service Magazine," I send you a brief statement of the treatment I have received from the same gentleman, which I request you to publish, as I think it is time that the officers of the Army knew what kind of a man Mr. T. H. S. Hamersly is. In the spring of 1885 I met Mr. Hamersly in New York. He asked very earnestly for an article on the Afghan question, and a few days later offered in writing $25 for an article of fifteen pages, which I gave him. When I reminded him of the debt several months after he acknowledged it and said that he hoped to pay it by the end of the month. I wrote once or twice again, but received no answer. About a year after the publication I wrote a peremptory letter, telling him I was tired of such treatment and that if he did not pay I would put the matter in legal hands for collection. He wrote an apologetic letter and authorized me to draw on him at ten days. I did so through the Rhode Island National Bank. The note was returned unpaid, but not protested, at the request of Mr. Hamersly, who said he would attend to it at once. I got a telegraphic despatch from him to this effect: "Have written to you to-day to explain." Since this despatch, more than six months ago, I have never heard one word or received one line in explanation of his broken word and dishonored note.

Comment is unnecessary. I would merely ask officers and gentlemen if they think such a man should be encouraged by subscribing to or taking his magazine. Yours, etc.,
EDWARD FIELD, Captain, 4th Artillery.
INDEPENDENCE, W. VA., Aug. 11.

As soon as the cold weather sets in in Burmah, extended military operations will take place in that country. Reinforcements of 5,000 men will be despatched from India, and the operations will be under the supreme command of Sir Herbert Macpherson.

THE STATE TROOPS.

USE OF MILITARY TITLES.

EVERY one will rejoice that the active and the veteran members of the 7th N. Y. Regiment have smoked the pipe of peace, and are now on the trail together after the common enemy, instead of dividing their forces in profitless disputes. The agreement arrived at by Col. Clark, representing the active members of the 7th, and Col. Winchester, as the representative of the veterans, does credit to the good sense and the good feeling of both these gentlemen. And "Colonel" Winchester, he will continue to be called by those who know him, for the title to them represents their appreciation of those qualities which have made him so popular with the veterans, and led to his selection to preside over their organization. At the same time it is understood, we believe, that the veterans are to choose some other title for their presiding officer than a military one, thus following the usage prevailing in the organizations of officers and ex-officers who served in the late war. As head of the Military Order, Grant, Farragut and Hancock bore the title of "Commander," and the two officials immediately following each of them in order, that of "Vice-Commander," senior and junior. There is an obvious impropriety, which all military men recognize, in bestowing the titles of their profession in any way except that distinctly recognized by law. Indeed, the practice of continuing to use as a matter of courtesy the title once borne as a matter of right is carried too far; leads to confusion which is annoying, to say the least, and may lead to abuse. We are much too careless about this in this country, and Congress has to a certain extent sanctioned the custom by enacting that ex-officers of volunteers can, on occasions of ceremony, wear the uniform and use the title of their highest brevet rank. But even for them to *insist* upon this right does not seem in the best of taste, as it associates them with a profession whose functions they ceased to exercise nearly a quarter of a century ago. To an officer of the Regular Army, who struggles through a life time from grade to grade, in doubt which title will come to him first—that of "captain" or "grandfather"—it is not pleasant to see what costs him so much held so cheap by others. He feels like one of his class who told us that after being without rations on one occasion for three days he could never thereafter see a morsel of food wasted without a pang. As the war recedes, and its experience grows dimmer, it seems increasingly necessary to give heed to matters unimportant, except for the necessity of keeping in mind the fact that the military profession is one distinct in itself, and the one of all which requires the most exact and the most constant training and practice. It is not civilians alone who forget this. There are too many officers who seem content to rest upon past achievement instead of present attainment.

THE NEW YORK NATIONAL GUARD.

As WE have already said there is one logical result that should follow the changes made in the organization of the National Guard of New York; that is, the reduction of the rank of the Adjutant General to that of Colonel, and a corresponding reduction in the staff. No one will be quicker to see this than the present efficient Adjutant General, Gen. Porter, and we are assured that he will at the proper time make the necessary recommendation for a change in the Code. Gen. Molineux, we observe, objects to G. O. No. 21, on legal ground, for reasons which have been sufficiently set forth through the publication by the daily papers of his letter addressed to the Governor. General Molineux's first point is that G. O. No. 21 is "contrary to the spirit of the Constitution, inasmuch as it relieves the highest officers known in the Service from the necessity of confirmation by the Senate," and entirely ignores the mode prescribed by the Military Code for rendering general officers supernumerary, and by depriving an officer of his commission without process of law undertakes to exercise a power which is not existant. Concluding he says:

"The first principles of instruction to militia are obedience to the law and civil authority and that military authority is subordinate to them. The first principles of military discipline is exact obedience to the rules, regulations and laws governing the armed force. General Orders No. 21 appears to me to be little calculated to inculcate these principles, or to improve discipline and good order, not because the object aimed at in the concentration of the force is unwise, but that the manner in which it is attempted fails of due regard for the law and the constitution, and is calculated to sweep away the last vestige of the value of a commission of the State of New York. I have forwarded, through official channels, my resignation of an office received from your predecessor and confirmed by the Senate, thereby taking the questions herein presented out of all relation to my individual rights of commission.

General Molineux holds that as "there are officers already commissioned to command the 1st, 2d, 3d and 4th Brigades of the National Guard of the State of New York, and if they have not been legally rendered supernumerary their authority seems to be ample to assume command of the reorganized brigades bearing the same numerical designation, no matter what changes may have been effected in the military units of which they are composed." We are surprised to find an officer of so much experience overlooking the well-established military principle that rank and command do not necessarily go together, or, as it is expressed in the Army Regulations, "Without orders from competent authority, an officer cannot put himself on duty by virtue of his commission alone."

THE 74TH *V.* THE 8TH AT CAMP.

COL. BLOOMER, of the 74th, with regard to our article on the week's camp duty when he was serving at Peekskill in conjunction with the 8th, says:

Ordinarily I am very "thick skinned" about criticism and take it as it comes without comment, but I feel that your article, while in the main a very fair one, needs a reply, because in some of your statements you are hardly correct as to facts. You say that the applause arose from "a spirit of rivalry or jealousy," when as a matter of fact it was commenced by the 8th, in a spirit of extreme friendliness, at our first guard mount and was kept by each organization when the other was going through a ceremony. It was hardly the proper thing for Col. Scott or myself to stop it, because of the criticism that it would draw from the other organization, and as the post commander took the same view of it, he concluded that a direction from him was the proper thing and issued it accordingly.

In criticizing the Eighth's first guard-mount, you say that "there has been no organization here which did not become mixed up in the same manner," etc. Now I beg to differ with you: our first guard was marched on in a clean, even manner. The 1st sergeants did know what to do, and where to go, and the guard instructor, Lieut. Thurston, was kind enough to say that it was a most excellent ceremony. It seems to me that your article hardly did us justice in that respect.

The next matter is a personal one, and knowing your friendliness to me, I am quite sure that you are laboring under a misapprehension of the facts. The Post Adjutant pointed out to Col. Scott and myself where the right of the line would rest and where the left (between a tree and clump of bushes.) When I marched my regiment on I saw that the 8th was behind the line, and not to move twice I marched forward until I was about three yards behind the imaginary line, halted and waited for the 8th to dress and when they did I dressed on them. If I had been instructed to simply form on the left of the 8th then your remark would apply, but having been told just where to form, I think I was justified in moving to that point at once.

I can see no reason why you should endeavor to better the numerical showing of the 8th all through your article by belittling ours. We had 76 per cent. of our men present. How much better did they do? But you say "we are well situated and snugly quartered." This is all granted. We have been since the 8th of March, and before that we were as bad, if not worse, than the 8th. In fact, Gen. Porter will tell you that he was very reluctant to order us to the camp this year because we were in such bad shape, and thought that we ought to put in a season in our new armory before going to camp; and the two organizations being so nearly equal as far as their circumstances were concerned, I don't think you treat us fairly by carrying the impression all through your article that we were so much better prepared than they. Now as to company drills. Major Stacpole stated to me after the first company drill that he inspected that he had no criticism to make, and that the mistakes made were so trifling as not to be worthy of report, and he so reported to the post commander. I thought my men more in need of instruction in skirmishing, which they have not drilled (although you say they have, a pretty hard matter in a drill room 40 by 80), than they did company drill, and particularly so after Major Stacpole's report, so I devoted a great deal of time to it, and I think with benefit to the regiment.

I don't want to weary you, and think I have touched enough points to demonstrate that you did not do us entire justice. I am in full sympathy with you in your praise of the 8th Regiment. No better body of men ever marched into the State camp, and no better man or soldier than Geo. D. Scott exists, and I was more than pleased to see his regiment so far outstrip all our expectations, and I trust that he may soon be quartered in an armory that his energy and pluck under discouraging circumstances more than deserve. This letter is written in entire friendliness, and you may use it or not, just as you please. At any rate I should be glad to hear from you on the points I mention.

We publish this letter in justice to Col. Bloomer, but our report hardly called for it or anything of the sort. We condemned the clapping of hands in *both* organizations as an unmilitary practice, and have always done so. Whatever Col. Bloomer's reasons may have been when he asked as to his line of dress on the 5th of July, we or any other outsider do not know, but the inquiry seemed decidedly superfluous at the time. Our report as to the numerical showing of the 8th, as can be seen from the official figures, was as near to the facts as could be ascertained at the time, and we certainly had no intention of "belittling" the 74th—in fact, we are always anxious to point out any point in favor of any organization, and especially the 74th. Our report as to company drills was more with regard to skirmishing than any other manœuvres, and there was not an organization on the field this year that did not show very marked deficiency in this very respect, nor was the ceremony of guard mounting ever performed correctly, especially in the beginning of the week. If Col. Bloomer claims that that of his guard details on the occasion referred to was an exception, he is mistaken, although there may have been worse ceremonies on the ground. We recognize that he had trouble so far as an armory was concerned, but that trouble ceased to exist so long before the camp as to be out of place as an excuse for any regimental shortcoming on company drill. Our report was fair, and our statement that the 74th did well ought to be satisfactory, but they were by no means perfect. Comparisons between regiments serving together should not be made, and our article did not intend anything of the sort.

MILITIA ITEMS.

The following are the dates fixed for this year's inspections of the New York troops. There may be some immaterial changes made;

9th Regiment, Tuesday, Oct. 5; 22d, Thursday, Oct. 7; 11th, Friday, Oct. 8; 69th, Monday, Oct. 11; 71st, Tuesday, Oct. 12; 8th, Wednesday, Oct. 13; 7th, Thursday, Oct. 14; 12th, Tuesday, Oct. 26, in new armory; 14th, Monday, Oct. 18; 13th, Tuesday, Oct. 19; 32d, Wednesday, Oct. 20; 47th, Thursday, Oct. 21; 23d, Monday, Oct. 25; 1st Bat., Sept. 21; 2d Bat., Sept. 22; 3d Bat., Sept. 23, at Prospect Park, mounted.

The question as to the colonelcy of the 13th Regt. now rests between Lieut.-Col. Edward Fackner and Capt. William L. Watson, both good men. Col. Fackner is a fine tactician and a good officer in every respect; Capt. Watson not only holds the right of the line but also commands the largest company in the regiment. The matter will be decided at an early date. There is no doubt but that the Lieut.-Colonel, who is in every respect competent, will receive the appointment. Capt. Watson on a previous occasion had the opportunity to be elected colonel but declined the honor.

While the interest in the election of the Brigadier General for the New York City Brigade is unabated, there are no reasonable grounds on which to base any statement as to who will be elected. There are a number of candidates, among whom are most prominent: Generals W. G. Ward, Louis Fitzgerald and D. D. Wylie, ex-Colonel S. V. R. Cruger, Lloyd Aspinwall and others. While some of the electors have made up their minds for whom to vote, the majority are still undecided, and declare that they will not pledge themselves to any particular candidate. The meeting on Wednesday, August 25, will doubtless be interesting, but it is safe to say that many ballots will be cast until an agreement is reached.

In Brooklyn the voting officers held a caucus on Wednesday, August 18, with a view of arriving at a determination as to the election of a Brigadier General. The meeting was not well attended, in some cases only one field officer representing an organization. The caucus was secret and its exact doings are not known. What has leaked out, however, points to Generals McLeer, Ward, Barnes and Finkelmeier, as candidates, the first mentioned in the lead. The matter, however, looks so doubtful, that it need not be a matter of surprise if at the election a dark horse should win the field.

A special meeting of the 2d Battery was held last Tuesday evening, August 17, when six new members were added to the roll. The recruits drill every Thursday evening, and the regular battery drills will commence the first Tuesday in September.

In our remarks on the last week of the camp in issue of Aug. 14, the name Capt. W. Humphrey, 12th Regt., should read William H. Murphy.

CREEDMOOR.

THE 8th Qualification and Champion Marksman's Class Matches were shot on Saturday, August 14. The weather was not favorable, a strong left wind making it very hard to keep on the target. The attendance was good, almost all the regiments in the 1st and 2d Brigades being represented. Lieut. Edw. F. Young, Co. C, 7th Regt., was the winner of the Gold Marksman's Badge. He is now the 8th man in the race for it, no competitor having won it more than once. The following were the winners in this match:

Lieut. Edw. F. Young, Co. C, 7th Regt	20	24—44
Lieut. Richd. Oliver, staff, 23d Regt	19	24—43
Priv. G. L. Hoffman, Co. H, 7th Inf	20	22—42
Sergt. W. Lawson, Co. B, 12th Regt	19	22—41
Priv. D. Bacon, Co. K, 7th Regt	20	20—40
Sergt. T. Mahoney, Co. E, 12th Regt	21	19—40
Priv. J. E. Winslow, Co. E, 23d Regt	16	23—39
Priv. J. S. Dodge, Co. C, 7th Regt	18	21—39

Next matches Saturday, August 28.

(Correspondence of the Army and Navy Journal.)

THE GALVESTON DRILL.

THE great interstate drill ended Aug. 10, the interesting features of the day being the naval engagement, the individual competitive drill, and the sham battle. Col. T. E. Rose, Captain 16th U. S. Inf., was in command of the attacking forces, and the whole presented a fine display of military training. When the combatants had rested somewhat from their exertions, the companies which had entered in contest were formed in line, and the various captains came to the front and centre, where each in turn was greeted by Gen. D. S. Stanley, U. S. A., the judges, Gen. John M. Claiborne, and the members of the Board of Management. Lieut. S. W. Dunning, 16th U. S. Infantry then read the following:

CAMP MAGRUDER, GALVESTON, Aug. 10, 1886.

To the Camp Adjutant:

SIR: We have the honor to inform you that, having been appointed judges in the interstate and individual infantry contests, we have determined upon the following as the order of merit of the various competing companies:

Interstate Companies—1, Houston Light Guards, 90 per cent.; 2, Montgomery True Blues, 87½ per cent.; 3, San Antonio Rifles, 87 per cent.; 4, Branch Guards, 86 per cent.; 5, Louisville Legion, 77 per cent.; 6, Belknap Rifles, 76 per cent.

State Companies—1, San Antonio Rifles, 87 per cent.; 2, Belknap Rifles, 76 per cent.; 3, Sealy Rifles, 70 per cent.; 4, Bryan Rifles, 69 per cent.; 5, Artillery Light Guard, 64 per cent.; 6, Texas Rifles, 58 per cent.; 7, Douglas Rifles, 50 per cent.; 8, Bonham Rifles, 39 per cent.; 9, Brenham Rifles, 35 per cent.; 10, Brenham Light Guard, 34 per cent.; Prairie City Guards and Grayson Rifles withdrawn.

Winners of Individual Drill—1, Private A. Alphonze, Busch Zouaves; 2, Private Wagner, Louisville Legion.

R. R. STEEDMAN, 1st Lieut. 16th Inf.
S. W. DUNNING, 1st Lieut. 16th Inf.
W. K. WRIGHT, 2d Lieut. 16th Inf., Judges.

Next in order came the reading of the decision of the judges of the artillery drill, as follows:

As the Board of Judges appointed to determine the relative merit of the competing batteries of artillery, we submit the following report: Taking as a maximum 3, the per cent. is as follows: Washington, New Orleans, 2 94-100; Louisiana Field Artillery, New Orleans, 2 87-100; Crawford Battery, Dallas, Texas, 2 85-100. The Galveston Artillery withdrew before finishing the programme, owing to several men being prostrated by heat. We recommend them in the following order: Washington Artillery, Louisiana Field Artillery, Battery Crawford.

We recommend, also, the gunner of the Washington Artillery, Corpl. Fred. Kornbeck, as the best drilled gunner.

J. M. LANCASTER, Captain 3d Art.
H. C. DANES, 1st Lieut. 3d Art.
JOHN E. MYERS, 1st Lieut. 3d Art.

(Correspondence of the Army and Navy Journal.)

OHIO NATIONAL GUARD.

THE third brigade of the Ohio National Guard went into camp near Mount Vernon on August 3 and struck tents on August 10. It was composed of the 5th, 8th, and 17th regiments, infantry; 22 companies in all, and three batteries of the 1st Art. Col. Pocock, of the 17th, commanded. The camp itself was in a beautiful grove, where the trees were not so thickly planted as to exclude the proper amount of sunshine. The drill ground was fair, though hardly large enough. The routine work was about the same as at the preceding encampments and the results as good. Great interest was manifested by officers and non-commissioned officers at the schools of instruction, and the privates did their duties intelligently and willingly at the drill. The only target practice was that of the batteries, where good work was done at an 800-yard range, the ground admitting of no greater distance. There was more skirmish drill, though not enough. There was some fine exhibition drilling by the Wooster Guard and Co. A, both of the 8th, on Sunday. The latter company gave the skirmish drill and bayonet exercise. The police and sanitary arrangements of the camp were excellent, the cooking good, and the supply of food ample, except in the case of one or two companies, where some misunderstanding existed the first day concerning requisitions. The review held in honor of Governor Foraker was the best this summer. He is said to be much gratified at the progress made by the troops.

The officers of the O. N. G., are, as a rule, very punctilious in the observance of the regulations concerning salutes while meeting or passing each other. They do not, however, require the like observance from all enlisted men, and this is a neglect for which company officers are again principally, (not altogether) responsible. Compelling this observance is one of the mainsprings of authority and the very foundation of military discipline.

Even volunteers, men as good socially as their officers, can easily be taught that the salute is not a token of servility but of respect for office.

IOWA.

THE 1st Brigade Iowa National Guard went into camp near Oskaloosa on Monday, Aug. 2, and remained until Friday, Aug. 6. The brigade showed an aggregate of 1,151, 940 of whom were present in camp. The Iowa National Guard was organized in its present condition in 1880, and since then it has made considerable progress. The whole Guard consists of 6 regiments of 8 companies each. Encampments were first instituted in 1881 and since held annually with considerable success and good results. The troops are fed on Army rations and camped in loosely floored tents with bed sacks filled with straw, but no cots. Gen. H. H. Wright was in com-

mand. Col. R. I. Dodge, of the U. S. Army, inspected the camp on behalf of the Government. The work at the camp comprised the usual programme of guard duty, drill, and target firing, and as the weather was favorable fair work was done. On Thursday, August 5, the Governor reviewed the troops and as soon as the ceremony was concluded the troops at once executed company drills, in which all participated. The review was a fine affair. Camp was broken on Friday, August 6.

CONNECTICUT.

Adjutant-General S. R. Smith announces that 1st Lt. Charles A. L. Totten and 1st Lieut. Samuel R. Jones, 4th U. S. Artillery, have been detailed to instruct and practice the troops in heavy artillery drill at the siege gun and mortar battery, respectively. Brig.-Gen. C. P. Graham, commanding C. N. G., will give every opportunity to Lieutenant Totten to witness the drills, duties, and ceremonies during the encampment, and to make any inspections he may desire and make such details for instruction in heavy artillery drill as may be deemed necessary.

(From the Real Estate Record and Guide, August 14,)

POSSIBLE WAR WITH MEXICO.

The peremptory character of Secretary Bayard's despatch, demanding the release of Editor Cutting of the Mexican Government, contrasted with his far more politic manner of addressing the British Government anent the Canadian fisheries dispute, is attracting a good deal of attention in business circles, and the belief is entertained in some quarters that a war may result in the Southwest.

Colonel Wm. C. Church, of the Army and Navy Journal, said to the writer that he knew there were powerful influences at work in Mexico as well as in this country for a war. There are mining, ranch, cattle and other interests in Mexico which would like to see a war so that the United States could acquire the four northern States of that Republic. It would add immensely to the value of mineral, agricultural and railway property should these States be added to the American Union. There are insuperable difficulties in acquiring them peacefully. No Mexican Government would be tolerated which would agree to sell any portion of Mexican soil, nor would it be possible to get an American Congress to offer any large sum for acquisition, which would benefit only some Mexicans, a few American adventurers and the people living on our Southwest border. So to acquire these desirable States a warlike conflict is to be brought about. "It is civilians," continued Col. Church, "who are most apt to plunge nations into war. Peace is better assured when a man like Grant is at the head of the Government. If he had made a peremptory demand for the release of Cutting, as did Secretary Bayard a month ago, Editor Cutting would be on our soil by this time or our troops would have crossed the Rio Grande.* But Civilian Bayard uses big words and does not back them up by strong measures. He is all the more likely to get us into trouble."

It may be remarked in this connection that when William M. Evarts was Secretary of State he took the initiatory steps to bring on hostilities with Mexico, to acquire those very northern States referred to above; but President Hayes was too timid to carry out the scheme of the powerful syndicate, of which, by the way, Ben. Butler, was one, which had in view the acquisition of Northern Mexico.

*That is to say, Grant would not have made a peremptory demand until he was ready to enforce it. W. C. C.

NAUTICAL ROLLER SKATING.

There is a story told of "Prince John" Van Buren to the effect that he once entertained some of his constituents, among them an old Dutchman, who was so highly delighted that he expressed a desire to "reciprocate." But when Mr. Van Buren ascertained his definition of reciprocate he found he meant that he would like to come again. It was in a similar spirit that our sailors at Portland, Me., seem to have received the recent invitation to a roller-skating match. A correspondent writes:

Since Mr. McGurn, of U. S. steamer *Galena*, won the gold medal at the skating rink, the sailors of the remaining two vessels have talked of nothing else but racing on roller skates. The excitement run so high that Mr. Bailey, the manager of the rink, who highly appreciates the courtesy shown him by his sailor visitors, has sent out another challenge. This time the race was to be for a gold medal and the championship of the Navy.

The following sailors entered the race: H. P. Bennet, Frank Algier, and Frank Applebald from the *Tennessee*, and J. C. Postill, F. Peterson, and Anton Abarno from the *Swatara*. The following judges were chosen: Mr. James H. Doyle from the *Tennessee*, and Mr. Samuel Shields, *Swatara*. Mr. H. J. Hammett was chosen referee.

The first two laps were made in 20 seconds with Bennett three-quarters of a lap ahead. The first mile was travelled in five minutes with Bennett leading. The skaters were cheered and when Bennett finished the 45th and last lap of the three mile race the hall rang with the applause.

A large crowd gathered around the victor and his followers, and amid the cheers of over 2,000 spectators the handsome gold medal was presented to the champion and pinned to his breast. The crowd of sailors would not allow Bennett to walk from the rink, but carried him in triumph through the hall.

The medal which was presented to the champion of the Navy certainly is a handsome one and designed by Mr. C. E. Davis, of Portland. The medal consists of a gold shield resting upon a dark blue silk ribbon. The shield shows the engraving "Champion of the U. S. Navy," and the cross bar which holds the banner bears the words "Forest City Rink."

The three mile race was run in 15 minutes and 5 seconds. The other skaters did their best but could not keep up with Mr. Bennett.

NEW PUBLICATIONS.

It is stated that the Gettysburg writings of the Comte de Paris are to be brought out by Messrs. Porter and Coates in a volume distinct from the volumes of the "Civil War in America" series. This Gettysburg volume, which is edited by Col. J. P. Nicholson, is to contain about 200 pages. Included will be the most complete rosters yet published of the Union and Confederate armies, with the losses of every organization given in detail up to the morning of July 4. It will also contain important maps of the field, and editorial notes and comments by Col. Nicholson.

Military Order of the Loyal Legion.

The committee of the Pennsylvania Commandery to secure a suitable library and museum and permanent place of the meeting, as well as one for the Commander-in-chief, has been named, and will in a short time proceed to the execution of the duties devolved upon it.

THE MESS.

We find this story afloat:

Gen. Sheridan's brother, Col. M. V. Sheridan, is as brave as the General and is as ready to help anyone whom he thinks is in need of protection. He was on his brother's staff and stationed in Chicago at the time of the great fire. All manner of stories of incendiary attempts to complete the destruction of the city were afloat, and the women of Chicago were all in a state of terror. One evening, while on his way home from headquarters, Col. Mike stopped to call on the wife and sister of a brother officer, and found them in a state of excitement and terror. A man had been prowling for the last half hour in the alleyway back of the barn belonging to the house in which they resided. They knew he was an incendiary and was preparing to set fire to the barn. Like the gallant soldier he is, Col. Mike started to catch the villain. He went out of the house by the front basement door and around the block into the alley. With the caution and skill acquired in long years of Indian fighting, he stole from one cover to another until he got near enough to the man to see in the dusky light that the incendiary was picking up the hay lying loose about the place. The colonel sprang upon him and seized him by the back of his neck. The man rose and struck wildly, hitting the colonel in the jaw. This aroused all the blood of the Sheridans and in about five minutes the man was well thrashed and fleeing wildly down the dark lane. Col. Mike returned to the house and told the story of his encounter with the ruffian to the ladies and his brother officer, who had just returned home. He had just finished his tale and was blushingly receiving the thanks of his fair friends when a lady from next door—the wife of the landlord from whom the colonel's friends rented their home—rushed in with a request for arnica. Her husband, while engaged in picking up some loose hay in the alley, had been set upon and frightfully beaten by a burly ruffian of most ferocious appearance, and had been put in bed pending the arrival of the doctor, who had been sent for to repair his injuries. She besought Col. Sheridan to use his influence with his brother, the General, to have a guard placed about the house, which was at once promised, and the lady withdrew, well supplied with arnica and bandages. The four friends resolved to keep the matter secret, and Col. Sheridan had the guards duly stationed about the house for the next two weeks. He said it used to make him feel a little mean, however, when the lady used to thank him as she did on every possible opportunity for his kindness and sympathy in the time of her trouble.

LOVE'S CHOICE.

HE.

I pray, sweet maid, full well reflect
Which of these colors you'll select.
"I hope," he said, "you'll not choose red,
Nor yet that flaunting yellow,
The trooper off his horse is but a sorry fellow.
Oh! choose between those gorgeous hues
And this pure bridal white,
Oh! think of him who humbly sues
And worships you, his heart's delight."

SHE.

"Oh! no," she said, "I'll not choose red,
Nor e'en that gaudy yellow,
Although *I* think the trooper a *very* charming fellow."
Then with knitted brow and thoughtful mien
She paused for slight reflection,
Then chose the *white*, its lovely sheen,
Just suited her complexion.

F. T. Sidney.

The late Judge Curtis, of the New York Superior Court, used to tell a story of a colloquy with a witness who, when asked his name, answered: "Abraham Isaac Levy." Business? "Shentlemen's cloding store." Location? "Chatham street." Mr. Levy was finally asked, "What is your religion?" "I told you al-

ROYAL BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of ow test, short weight, alum or phosphate powders. *Sold only in cans.* Royal Baking Powder Co., 106 Wall st., New York.

Bayard to Mexico—Will you never release Cutting?

Mexico—Never!

Bayard—What, never?

Mexico—Well, hardly ever.

P. S.—If this doesn't provoke a war we will retire and weep for the decadence of national courage.—*Critic.*

ANSWERS TO CORRESPONDENTS.

—

Candidate.—Questions asked of candidates for promotion, by Boards, are not made public.

J. C. R. asks: In wheeling on the march is the touch towards the pivot and look towards the marching flank, as in wheeling from a halt? ANS.—Yes.

Saddler asks: How are saddlers enlisted in the Ordnance Department? ANS.—The laws vest the enlistment of artificers in the Ordnance Department, in the Chief of Ordnance. Write to him at Washington, D. C., and state your qualifications, etc.

P. B.—The Secretary of War might order you to be reimbursed for your outlay for the elastic stockings, on a proper representation of the facts. The stockings, however, might have been obtained in the first place, on a special requisition from the post surgeon.

G. E. D. asks: Is a Representative whose term of office expires this fall allowed to appoint a cadet to the Military Academy to enter next June? ANS.—If the District is entitled to a cadet appointment for next June, the present member of Congress is entitled to fill it.

E. asks: 1. When a battery of Artillery is formed in double rank, dismounted, how does the rear rank execute dress parade? ANS.—The same as the front rank.

2. What is the proper command to bring a squad from a guard to a carry? ANS.—Carry sabre.

Sailor asks: Would a young man of 22 years with a common school education stand any chance of advancement upon enlisting in the U. S. Navy, and what is the period of enlistment? ANS.—Your prospects of advancement would be slight as your age would only permit you to enlist as a landsman or coal-heaver. Efficiency and general standing are the ruling elements in the choice of warrant officers, to which grade promotion from the ranks is limited in the Navy. The term of enlistment is three years.

Constant Reader asks: What was the grade of a regimental quartermaster of an infantry regiment of volunteers during the Civil War? ANS.—Lieutenant.

P. L. asks the address of a French or Belgian military journal and the address of the *Deutsche Heereszeitung*, and the price of subscription of both of the journals. ANS.—The price of the *Deutsche Heereszeitung* is 6 marks per quarter. The *L'Avenir Militaire* is published at 13 Rue Voltaire, Paris, and costs 18 francs per annum.

B. E. C. asks: The battalion being in line and at a halt, the command is given (Upton, par. 522) change front on 10th Co., faced to the rear, companies left half wheel-forward march, guide left, guides post, what will be the respective positions of the 1st and 2d sergeants at the completion of the movement? ANS.—The 2d sergeants in the line of file closers and the 1st sergeants in their positions in line.

G. S. Clerk asks: Are general service clerks and messengers while on duty at Department Headquarters, entitled to a ration in kind under the provisions of the act published in G. O. 54, c. s., A. G. O.? ANS.—They are "when necessity requires." For instance, G. S. clerks on duty in the field with Gen. Miles would be entitled to rations, those accompanying surveying expeditions, etc. But ordinarily there is no necessity for the issue of rations in kind.

Y. D. asks: What was the term of enlistment in the Regular Army in May, 1863, and in October, 1863? ANS.—By the act of July 29, 1861, enlistments made after Jan. 1, 1863, were to be for five years. That continued until the passage of act June 15, 1864, which directed that thereafter enlistments should be for three years. In 1866 it was again changed by law to five years for cavalry and three for artillery and infantry. In 1869 it was made by law five years for the whole Army, and has so continued.

F. S. asks: What is the weight of the heaviest gun in the world and the weight of Krupp's heaviest gun? ANS.—The British Government has batteries at Gibraltar and Malta of 100-ton guns. The Armstrong Co. has furnished the Italian Navy with 100-ton guns for the *Italia*, *Duilio*, etc. The *Benbow*, *Collingwood*, and other barbette British warships are to be equipped with 110-ton guns, and 156-ton guns are in consideration. Krupp's heaviest guns are now in course of production for the Italian Navy, 15.75 in. cal., with a maximum weight of 119 tons. His heaviest gun so far weighs 71 tons.

Major asks: 1. Is a general alignment (par. 405) a simultaneous movement? ANS.—Yes, and they do not invert their pieces.

2. Orders are given to mount guard in fatigue uniform, would it be proper to wear white gloves? ANS.—On all occasions where arms are carried, gloves should be worn, and the militia is the only body of troops known who omit this.

3. Sentinel receiving countersign, should he stand at charge bayonet or right short thrust? ANS.—At charge bayonet. Where in the world do you get such an idea as right short thrust?

Tactics asks: A says, at dress parade of a battalion, the lieutenant colonel and major are opposite their places in line when at open order. B says, to comply with 4th paragraph (letter A. G. O., Dec. 29, 1882), their position is in advance (6 yards) of line of company and staff officers, opposite the officer on their flank of the line. By facing about and marching to the line of company officers they would be in proper position *without halting*, which (halt) is not prescribed. Which is right? ANS.—At open order the places of the field officers are 6 yards in front of the line of company officers, opposite their places in line. See par. 383, Tactics.

(By Cable to the New York Tribune.)

THE EXILE OF THE DUKE OF AUMALE.

Copyright; 1886: *North American Cable News Co.*

LONDON, Aug. 15.—The following letter has just been received from the Count of Paris in reply to an inquiry for the exact truth concerning the measures depriving the Duke of Aumale of his property and his commission. It may add to the interest of this letter to know that it is not a translation, but is written in English by the Count himself:

The grade or commission of a French officer when obtained according to the law is his absolute property, of which he can be deprived only by the sentence of a court-martial for special offences. The grade, observe, is distinct from the functions. The Minister of War has control over the latter, not over the former. He can refuse to give an officer employment or command; he can put him out of active service for special causes, such as some temporary infirmity, or he can put him in what is called "reform," for permanent infirmities or for demerits, after investigation and decision by court of inquest convened for the purpose, but no Minister can deprive a French officer of his commission. The Duc d'Aumale won his promotion very rapidly, but not more rapidly than many other officers in time of war, certainly not more so than Gen. Boulanger, whom we find serving as captain in 1870, and as colonel eleven months afterward—June, 1871.

Assuredly the promotions of the Duke of Aumale were made under and according to the existing French law, which provided that the French Princes could be promoted without the usual delays, as a recognition of good conduct in war. Every promotion of the Duke was won in that way. In consequence of this after the fall of the empire the Duke was at once replaced in the army list from which he had been arbitrarily and unjustly struck off at the Revolution of 1848. As to the other princes, the Duke of Chartres received from M. Gambetta in the Franco-German war the provisional commission of major under the assumed name of Robert Lafort and was confirmed in his grade by the Commission of Grades, a committee of the National Assembly clothed with sovereign power to settle without appeal all questions concerning grades obtained in that war.

The Duke of Alencon was made captain by a special law

of the same National Assembly. These three princes were deprived of their active functions in 1883 by Gen. Thibaudin, then Minister of War, who, as a political measure inspired by disappointment of the Radicals at the repeal of the law of exile, chose to inflict upon them that withdrawal from the service, which is generally considered the heaviest penalty any Minister can inflict of his own will. But at the same time Gen. Thibaudin took pains to declare in the House of Deputies that this political step was lawful and within his province expressly because it did not deprive the princes of their commissions.

The law of proscription passed June 23, 1886, provides that no member of the families which have reigned over France shall be allowed to enter the French army or navy. This is the language of the law, but Gen. Boulanger, contrary to the formal text of the law, chose to construe it as expelling from the army princes who already owned commissions obtained according to law, and he struck off from the lists of the army the Dukes of Nemours, Aumale, Chartres, and Alencon. Not content with this, he dealt in the same way with the two Princes Murat, who are only connected with the imperial Bonaparte family in the female line, and who had earned their promotions like all other officers. It was upon being notified of his illegal expulsion from the army, an expulsion totally unprovoked, that the Duke of Aumale wrote his noble letter to M. Grevy, who was base enough to take personal revenge for it by exiling the writer. This is the whole story of the case.

Believe me very truly yours,

Philippe, Comte de Paris.

FOREIGN ITEMS.

The Quetta section of the Bolan Railway has now been completed.

Last year more than a hundred thousand dollars worth of sabres were purchased in Germany for the British Army.

The German army manœuvres began Aug. 14. The weather was intensely hot and several fatal cases of sunstroke occurred.

It is reported that there is a Chinese army of 40,000 men quartered on the Sungani River, in Manchooria, near the Russian boundary.

The *National Zeitung* states that the manœuvres of the German fleet this year will extend over six weeks, and the principal features of these manœuvres will be the experiments tried with the two torpedo divisions.

The German ironclads *Baden* and *Wurtemberg* and the despatch boat *Zicthen* have just been commissioned at Kiel.

The Austrian War Ministry have decided that professional journalists are no longer to be officially recognized by and attached to the staff during the annual manœuvres of the Army.

A writer in the London *United Service Gazette* declares that "musketry in the militia is a farce and a sham, and an utter waste of time for officers, non-commissioned officers, and men"

The torpedo-boat *Habicht*, built by Schichau for the Austrian Navy, on its first trial trip attained during a three-hours run a speed of 21.77 knots—the contract speed being only 20.5 knots.

The *Esercito Italiano* (Rome) states that the steel foundry at Terni is now in a position to supply the whole of Italy with Bessemer steel. A gun foundry of considerable extent is connected with the works.

Great activity prevails at the camp of Tsarkoe-Zelo, where Russian troops are practising with a new explosible compound to supersede ordinary powder for rifle cartridges. The nature of the substance is kept a profound secret, and only the infantry of the Imperial Guard have as yet been permitted its use.

The *Orlando*, launched in England on Aug. 2, is the first of the belted cruiser class, of which seven in all are now building. They are quite a new departure in warship design, and while superior to anything of this class of war vessel afloat in point of speed, are much more heavily armed, and have greatly more defensive power than the *Mersey* class, which approach them nearest from a constructive point of view, the chief difference consisting of a belt of armor at the water line, which is fitted in the *Orlando* class, and from which they derive the name of belter cruiser. She is of steel, 300x56 feet, depth moulded, 37 feet; draught, 21 feet; displacement, 5,000 tons; speed about 19 knots, with about 9,000 I. H. P. She has compound or steel-faced armor. Armament consists of two 9.2 in. 22-ton guns, ten 6 in. 5-ton guns, six 6 pounder and ten 3 pounder Hotchkiss quick-firing guns, and numerous boat and field guns.

R. W. Tansill & Co., Chicago, are now making especially for the Officers of the Army and Navy a new and very fine Havana hand-made cigar, known as "Tansill's Reina." They are put up in beautiful packages of 25 cigars, each cigar banded. They come in three sizes, 4¼, 4½, and 4¾, inches, while their moderate cost, viz. $65, $70, and $75 per thousand brings them within the reach of the entire Service.

BENSON'S CAPCINE PLASTERS are well known in the Army and Navy as the most convenient and effective external remedy. For sprains, coughs, rheumatism, sciatica, and all ailments arising from exposure they excel every other application, giving relief and cure in a few hours. Avoid worthless imitations under similar names. Seabury and Johnson, Chemists, New York.

BIRTHS.

Neall.—At Fort Grant, A. T., August 10, 1886, to the wife of Lieutenant J. M. Neall, 4th U. S. Cavalry, a daughter.

Thackara.—At Watts, Pa., August 9, 1886, to the wife of Alexander M. Thackara, a daughter.

MARRIED.

Garlington—Buford.—At Trinity Church, Rock Island, Aug. 17, Lieut. Earnest A. Garlington to Anna B., youngest daughter of T. J. and Grace Buford.

King—Shepard.—At the residence of the bride's parents, at Marathon, Texas, by Chaplain B. C. Hammond, U. S. A., August 10, 1886, 1st Lieut. Josiah H. King, 8th U. S. Cavalry, and Miss Gertrude, only daughter of Captain and Mrs. A. E. Shepard.

DIED.

Blight.—At Brooklyn, N. Y., August 18, Elizabeth Monroe Blight, widow of Gunner John Blight, U. S. Navy, in her 84th year.

Richards.—At Auburn, Ala., August 11, Melzar, son of Lieutenant and Mrs. M. C. Richards, 2d Artillery, aged 10 months and 21 days.

Schley.—On board the practice-ship *Constellation*, Aug. 3, Naval Cadet Oskaloosa Smith Schley, U. S. N.

Scott.—At Charlottesville, Va., Aug. 14, of congestion of the lungs, Mrs. Mary Scott, wife of Lieutenant W. S. Scott, 25th U. S. Infantry.

NEW ENGLAND MUTUAL
Life Insurance Company,
OF BOSTON, Mass.
Assets, ------ $17,846,546.65
Liabilities, --- 15,238,761.16
Total Surplus, · $2,607,785.49

This Company insures the lives of Officers of the Army and Navy without extra premium, except when actually engaged in warfare, which premium if not paid at the assumption of the extra risk *will not invalidate the policy*, but will be a lien upon it, and also gives liberty of residence and travel, on service, in all countries, at all seasons of the year, without extra charge.

Special attention is called to the LIFE RATE ENDOWMENT policy, which combines insurance at low cost with an investment at a fair rate of interest, and at the same rate of premium formerly charged for life policies. Every policy participates in the *annual* distribution of surplus, and has endorsed upon it the cash surrender and paid up insurance values provided by Massachusetts laws.

Pamphlets explanatory of the New Feature may be had on application at Compy's Office,
POST OFFICE SQUARE.
BENJ. F. STEVENS, President.
JOS. M. GIBBENS, Secretary.

THE EBBITT:
WASHINGTON, D. C.
ARMY AND NAVY HEADQUARTERS.
Four Iron Fire Escapes.
TERMS-$3.00 and $4.00 Per Day.

Detachable Magazine, charged.

Remington-Lee Musket with Magazine attached.

The Remington-Lee Detachable Magazine Rifle.

Recommended by the U. S. Magazine Arms Board,

First in Order of Merit for Trial in the Field,

AS A SERVICE ARM FOR THE U. S. ARMY.

A single Breech Loader, that can be instantaneously changed into a perfectly safe Magazine Arm, giving an unequalled rapidity of fire.
Smaller number of component parts than any other Arm ever made. Every part simple and strong.
Magazine may be attached or detached in one second, and the Breech System dismounted or assembled in ten seconds.

The Rifle weighs 8¼ lbs. without bayonet, and can be used as a Sporting Arm.
The possibility of a premature discharge through the bullet of one cartridge coming in contact with the primer of another, from the shock of continuous firing, the simple performance of ordering arms, or the effects of a long march—incidents of danger inseparable from Repeating Arms that carry their cartridges in Tubular Magazines under the barrel or in the butt-stock—is absolutely prevented; the position of the cartridges in the Lee detachable magazine not only assuring safety against explosion by impingement but against the deformation of the projectile by "upsetting."

RELATIVE RECORDS of the three arms recommended in order of merit by the late U. S. Magazine Arms Board:

	Remington-Lee Magazine Rifle.	*Chaffee-Reece.*	*Hotchkiss.*
Two minutes' firing as repeater with accuracy	68 shots, 41 hits.	38 shots, 25 hits.	31 shots, 14 hits.
Two minutes' firing as single loader	46 shots, 31 hits.	41 shots, 15 hits.	45 shots, 21 hits.

THE LEE MAGAZINE RIFLE is the only Military Repeating Arm which has demonstrated its superiority in RAPIDITY with ACCURACY as a REPEATER over its execution as a SINGLE LOADER.

Descriptive pamphlets in English, Spanish, and French sent on application.

Present capacity of production 400 stand per day.

ARMY AND NAVY JOURNAL.

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOLUME XXIV.—NUMBER 5. WHOLE NUMBER 1201. | NEW YORK, SATURDAY, AUGUST 28, 1886. | SIX DOLLARS PER YEAR. SINGLE COPIES, FIFTEEN CENTS

Publication Office, 240 Broadway, N. Y.

THE Secretary of the Navy has decided upon the names of the three larger vessels shortly to be contracted for. The 4,000-ton cruiser designed by the bureaus will be called the *Newark;* the 3,730 ton cruiser (*Naniwa-Kan*) the *Charleston*, and the 4,400-ton cruiser (known as No. 27) the *Baltimore.*

THE Artillery School, Fort Monroe, Va., commenced to receive this week the officers of the new detail for the two years commencing September 1, 1886. Welcome the coming and speed the parting guest has been the order of the week and many pleasant associations have, perforce, been broken up. The same remarks apply to the Military Academy, at West Point, where several changes occurred this week.

COMMANDER BARTLETT, U. S. Navy, continues to receive, almost daily, letters from ship masters in various parts of the world commenting on the benefits derived from the use of oil in mitigating the effects of heavy waves against ships. The effect of a few gallons of oil seem to be most extraordinary, and it is fair to suppose that in the future all sailing craft will carry a quantity of some cheap oil for this purpose alone.

THE following allotments from the appropriations of $225,000, for improvements and repairs to barracks and quarters, have been recommended by the Quartermaster General, and concurred in by the War Department: For San Antonio, $50,000; Fort D. A. Russell, $20,000; Fort Robinson, $20,000; Fort Porter, $35,000; Fort Riley, $40,000; Atlanta, $40,000; total, $205,000. Reserved for future apportionment, $20,000. The apportionment having been made the next thing in order for the Quartermaster General's Office will be the submission of plans and estimates to conform to the amounts allotted.

THE rifle competitions for 1886 are now well under way, and our weekly accounts of their progress, etc., are made as full as possible. Great interest centres in the Army competitions of this year. In this connection, we desire to say a good word for the inspectors of rifle practice at the various headquarters, whose duties, in and out of season, are constant and exacting, and require an amount of patience and attention to detail not generally understood. To their zeal and intelligent development of the specialty entrusted to them is due much of the success and proficiency which has been attained in this most essential branch of military instruction.

WITH reference to a letter in the *Times* from Sir JULIUS VOGEL, in which he proposes that the United Kingdom and its colonies should form one mighty federation, which no colony should have power to quit under pain of coercion by the remainder, *Broad Arrow* says: "Although the various parts of the empire may closely unite for defence, they will never unite to coerce. They will content themselves with saying, 'Erring sister, go in peace.'" Our contemporary seems to forget that Sir JULIUS'S plan has been tried with such eminent success in this country that all are delighted with the result, North and South alike, and pleased to remember that we made short work of the erring sister departure party, which existed here at the outbreak of our civil contest. There is but one possible solution of the various problems that perplex the British nationality, and that is by a frank acceptance of our experience, and a re-adjustment of its shaky political system upon the lines that we have marked out. This is the conclusion to which many of the more thoughtful Englishmen are coming at last.

THE partisan bitterness of our French military contemporaries since the expulsion of the Orleans family is well illustrated by the comments of *L'Avenir Militaire* upon the parade of July 14 in Paris. It seems that the march-past of the *élevès* of the School of St. Cyr was noticeably defective in comparison with previous years. This our contemporary ascribes to the new military law. "Moreover," it says, "the recent expulsion from the army of the Orleans Princes, the especial patrons of the school, was not calculated to increase the enthusiasm of the cadets for General BOULANGER. We recall besides a faulty parade of the battalion some years since on July 14, because the venerated and noble chaplain of the school was excluded from the march of his pupils. It was a universal outcry on their part and they protested in their own way by spoiling the parade." "It is true that if General BOULANGER has not authorized the chaplain to parade, he has this year replaced him with a *continière* whose presence arouse bursts of hilarity and frenzied applause on the part of the spectators."

M. L'HOSTE'S voyage across the English Channel has given rise, as might have been expected, to renewed discussion on the great question of the navigability of balloons. On one side almost impossible things are promised; on the other the progress made during the last quarter of a century is minimized and few hopes of an ultimate solution are afforded. Among other things, it is claimed that the voyage has demonstrated the facility with which torpedoes could be dropped on vessels sailing beneath them. As to this, *Broad Arrow* asks: "Are not rockets the proper answer to balloons? No balloon would care to face a shower of rockets, and they would be at her before she could get over the ship, and to drop anything under such circumstances would be difficult, if not impossible. Ships can carry them with ease, and if made longer a balloon might be kept out of range for going much against the ship. A rocket will go straight enough in the light winds that a balloon would want to manœuvre in. We do not attach much importance to the harm a balloon could do to shipping, though we think too little attention has been paid to rockets."

THE general order announcing the appointments, promotions and other casualties which have occurred since January 1st, 1886, is in type and will be issued at an early date. The rule has been to issue an order of this kind quarterly, but in view of the delay attending the confirmation of Major MERRILL and certain other nominations, including those in the Medical Department, it was found necessary to suspend its publication until this time. The order is really equivalent to a semi-annual issue of the Army Register, and will therefore be in great demand by those accustomed to keeping their registers correctly posted. The most striking feature of the order is the unusually large number of casualties it shows in the 11th Infantry. Since the last Army Register was issued Captain SCHWAN has been appointed an Assistant Adjutant General, Captains JACKSON and WHITNEY have been retired, Captain BEACH has resigned, four Lieutenants have been promoted and two retired, and six Second Lieutenants advanced to First Lieutenants. These include the promotions to follow the retirement of Lieutenants RAPHALL and TAYLOR.

THE Ordnance Department of the Army has issued advertisements for proposals for a steel lining tube and 18 steel hoops of American manufacture for an 8-inch breech-loading rifle—the bids to be opened on September 16 next. The tube jacket and forged trunnion hoops for this gun were contracted for with the Midvale Steel Company, and should that firm get the contract for steel hoops and lining tube, they will have the honor of being the first American manufacturers to furnish the Army Ordnance Bureau with all the parts for an all steel 8-inch gun. The gun in question is intended to be built upon the same general design as the 8-inch gun now undergoing trial at Sandy Hook, the forgings for which were obtained from WHITWORTH.

THE following important Naval Boards have been appointed to carry out the provisions of various acts of Congress relating to the Naval Service: To conduct experiments with American torpedoes, in accordance with the act appropriating $75,000 for "manufacturing, purchasing and experimenting with torpedoes of American manufacture"—Captain A. P. Cooke, President; Comdr. C. F. Goodrich, Lieut. Comdr. R. B. Bradford, Lieuts. A. R. Couden and S. P. Comly, members. To carry out provision of the act of July 26, 1886, relating to the test of rifled cannon—Captain John A. Howell, President, and Lieutenants A. M. Knight and John F. Meigs members. To examine into the condition of the double-turreted monitors *Amphitrite*, *Puritan* and *Terror*, with the view to their completion, as authorized in the Naval Increase Act—Naval Constructors S. H. Pook, W. L. Mintonye and W. H. Varney and Assistant Naval Constructor Lewis Nixon members. The last Board convened at Wilmington, August 25, and from there will go to the League Island Navy-yard and thence to the Brooklyn Yard. The Boards on torpedoes and guns are to report to the Chief of the Bureau of Ordnance for instructions. The former will convene as soon as a sufficient number of torpedoes have been received from those desiring to compete. An advertisement will first be issued by the Ordnance Bureau inviting American torpedo inventors to present their inventions for test. It will be issued in a very few days. The Board on guns will convene at the call of its chairman, which will be very shortly, though it will likely be some time before the statutory tests are begun. It will first be necessary to determine upon the amount that can be spared to conduct the experiments with, and then upon the mode of conducting the tests. The law under which the Board will be governed in its actions, provides that "One or more rifled cannon of each type constructed at the cost of the United States for the Navy shall be publicly subjected to the proper test for endurance including such rapid firing as a like gun would be subjected to in battle. This test shall be under the direction and to the satisfaction of the Secretary of the Navy, and if such guns do not prove satisfactory, the type they represent shall not be put in use in the Naval Service."

PERSONAL ITEMS.

—

CAPTAIN L. O. PARKER, 1st U. S. Infantry, is at Virginia Beach, below Cape Charles.

MAJOR W. P. GOULD, U. S. A., is a guest at the Massasoit Hotel, Narragansett Pier, R. I.

GENERAL W. B. HAZEN is on his way to the Pacific Coast on an inspection tour of Signal offices and stations.

CAPTAIN J. S. MCNAUGHT, 20th U. S. Inf., left Columbus Barracks, O., this week to spend the fall and winter on leave.

LIEUTENANT H. L. HAWTHORNE, 2d U. S. Art., left Mount Vernon Barracks, Ala., early in the week for Fort Monroe, Va.

MAJOR C. H. CARLTON, 3d Cav., under recent orders from Major-Gen. Terry, goes from Fort Davis to Fort Elliott, Tex.

MAJOR GEO. W. BAIRD, Paymaster, arrived in Boston this week and established his office at 159 High street, in that city.

MAJOR ROYAL T. FRANK, 1st U. S. Art., left Fort Monroe, Va., early in the week, to be absent until about the middle of September.

LIEUTENANT L. R. HARE, the recently appointed Adjutant of the 7th Cavalry, has taken charge of recruiting matters at Fort Meade.

LIEUTENANT JOHN P. WISSER, 1st U. S. Artillery, arrived in New York from the West this week, and went on to West Point to report for duty.

COLONEL BASIL NORRIS, U. S. A., Medical Director on General Gibbon's staff, left Vancouver Barracks early in the month on a three weeks' vacation.

CAPTAIN G. K. SANDERSON, 11th U. S. Inf., who has been spending a leave at Springfield, O., was in Chicago a few days ago, stopping at the Palmer.

GENERAL ABSALOM BAIRD, U. S. A., who has been visiting General J. B. Fry, at Newport, was in New York early in the week, registering at the Hoffman House.

LIEUTENANT A. W. VOGDES, 5th U. S. Artillery, rejoined at Fort Columbus, N. Y. H., early in the week, from a pleasant and instructive visit to Buffalo.

COLONEL W. P. CARLIN, 4th Infantry, has been presiding over a general court martial of thirteen members, convened at Fort Walla Walla, by order of General Gibbon.

CAPTAIN J. L. BULLIS, 24th Infantry, whose wife recently died at San Antonio, will rejoin at Fort Sill early in September. Much sympathy is felt for the bereaved officer.

LIEUTENANT COLONEL G. A. FORSYTH, 4th Cav., has taken command of the regiment and post of Fort Huachuca, Colonel W. B. Royall, 4th Cavalry, having come East on sick leave.

LIEUTENANT ALBERT TODD, 1st U. S. Art., late of Fort Monroe, Va., spent a few days with friends in Boston this week preparatory to starting to join his battery at Fort Winfield Scott, Cal.

LIEUTENANT H. L. RIPLEY, 24th Inf., Acting Engr. Officer of the Department of the Missouri, was at Fort Riley, this week, on business connected with improvements to be made to the sewerage of that post.

LIEUTENANT A. C. BLUNT, 5th U. S. Artillery, was in New York this week, and reported to Major General Schofield for orders to go to Fort Niagara, N. Y., to take part in the Atlantic rifle competitions.

CAPTAIN J. S. WHARTON, 19th U. S. Inf., who has been residing with relatives at Montrose, N. Y., came to New York this week to appear before the Retiring Board at Governor's Island, of which Major-General Schofield is President.

CAPTAIN W. S. STARRING, Ordnance Corps, U. S. A., after a two years' tour of duty at the National Armory, will go in a few weeks to Omaha to report to General Crook for duty as Chief Ordnance Officer. He will also take command of the ordnance depot at Cheyenne.

LIEUTENANT H. H. SARGENT, 2d U. S. Cavalry, and Miss Alice C. Applegate, were married at Fort Klamath, Ore., August 15, and have gone to Champaign, Ill., the groom having recently been ordered to duty as Professor of Military Science and Tactics at the University of Illinois.

CAPTAIN J. H. DORST, 4th Cavalry, left Fort Leavenworth, Aug. 16, for Albuquerque, to report to General Miles, and the Apache Indians have been placed in temporary charge of Lieut. J. O. Mackay, 3d Cavalry, until Captain Dorst returns. The *Critic*, referring to the duty devolved upon Captain Dorst in this connection, says: "He is a young officer who is credited in the Army and on the frontier, where he won his spurs very soon after leaving West Point, with ability and judgment beyond his years, and if any unforeseen trouble has occurred, he has the confidence of his Army friends that he is exactly the man to carry out the plans of the authorities."

THE Brackett *News*, referring to the recent marriage of Lieutenant J. H. King, 8th Cavalry, to Miss Gertrude Shepard, says: "Captain Shepard, father of the bride, has one of the most beautiful and valuable ranches in all Western Texas, consisting of considerably more than 100,000 acres, of which he is himself the owner of 55,000 acres, the rest being leased from the State. He owns the land for some three miles about Marathon, together with the town site. He is from Erie, Pa., and the boyhood home of Lieutenant King was also there, and his family and that of Captain Shepard have been warm friends for many years. The Lieutenant is regarded as a very worthy officer, of excellent record and character, and himself and bride are both to be heartily congratulated on their happy union. Lieutenant Geo. H Morgan and Mrs. Morgan, friends of both Lieutenant King and Captain Shepard and family, accompanied Chaplain Hammond from Fort Davis to attend the wedding. All speak of the occasion as every way most enjoyable."

GENERAL ANSON G. MCCOOK and Mrs. McCook are in London.

MAJOR ALEX. MCKENZIE, Corps of Engineers, U. S. A., was a recent guest at the Windsor Hotel, St. Paul.

GENERAL RUFUS INGALLS, U. S. A., was in New York this week looking up old friends, whose number is legion.

COLONEL JULIAN MCALLISTER, U. S. A., and Mrs. McAllister, were at the Francis Cottage, Newport, R. I., this week.

COLONEL W. B. ROYALL, 4th U. S. Cavalry, was among the arrivals this week at the St. Sauveur, Bar Harbor, Me.

MRS. PAUL, widow of General Paul, and her two daughters, have returned to Washington from a visit to Cincinnati.

COLONEL J. K. MIZNER, U. S. A., visited friends in New York early in the week, making his headquarters at the Grand Hotel.

LIEUTENANT H. W. WHEELER, 5th Cavalry, designated for a two years' recruiting tour, arrived in New York City this week.

BRIGADIER GENERAL T. H. RUGER, U. S. A., and staff, attended the opening of the Minneapolis Industrial Exposition, Aug. 23.

LIEUTENANT T. J. CLAY, 10th Infantry, by direction of General Miles, was sent to the field to report to Captain Lawton for special duty.

CAPTAIN E. VAN A. ANDRUSS, 1st U. S. Artillery, on leave, from the Pacific Coast, was in New York this week, visiting old acquaintances.

LIEUT. W. L. PITCHER, 8th U. S. Inf., is now located at 218 West Pratt street, Baltimore, Md., being in charge of the Recruiting office there.

GENERAL BADEAU'S latest article on General Grant touches mainly on the great friendship existing between him and Lieutenant General Sheridan.

LIEUTENANT C. J. BAILEY, 1st U. S. Artillery, on his way from the Pacific Coast to duty at Fort Monroe, Va., visited friends in New York this week.

LIEUTENANT EATON A. EDWARDS, 25th U. S. Infantry, Professor of Military Science and Tactics at the Knox University, Galesburg, Ill., was a recent guest at the Leland Hotel, Chicago.

COLONEL DE LANCY FLOYD-JONES, U. S. A., who recently returned to his home at Oyster Bay, Long Island, from a tour around the world, was a recent guest at the New American Hotel, Richfield Springs.

LIEUTENANT A. C. TAYLOR, 2d U. S. Art., left Little Rock, Ark., early in the week, for Fort Niagara, N. Y., to compete for selection as a member of the Army team. He belongs to the "class of distinguished marksmen."

GENERAL JAMES B. FRY has been employing his leisure time at Newport, R. I., in writing a "Review of Natural Law in the Spiritual World, a Work by Henry Drummond, F. R. S. E., F. G. S." Gen. Fry has had his review published in pamphlet form.

COLONEL CHARLES L. FINKE, of the 23d Regiment, N. G. S. N. Y., has received a letter from Colonel John Hamilton, 5th U. S. Artillery, thanking him for the courtesies extended to him while he was the guest of the regiment at its Newport encampment, and highly praising the soldierly bearing of the men and the excellent discipline that was observed.

A SUMMER resident at Assateague Island, Va., writes: The lighthouse management here is most admirable, being under the care and inspection of Capt. G. B. White, U. S. N., whose headquarters are in Philadelphia. He is a strict disciplinarian, requiring full obedience to his rigid rules and the fullest performance of duty, with neatness in every detail; yet he is held in the highest esteem by those under him.

LIEUTENANT W. M. DAY, 9th Cavalry, passed through Kansas City last week, which gives the *Times* of that city occasion to say: "Lieut. Day is known as one of the best and coolest heads among the Indian fighters of the Army, and has had many years' experience as a scout. He believes that the renegade Indians, who for the past year or more have been committing the frightful depredations on the border, will surrender to Gen. Miles, and be duly punished."

"WE seem to be quite in the Arctic business in Rock Island," says the *Daily Union*. "First we (speaking parentally) marry a favorite daughter to Lieut. Schwatka (a remarkably fine young Arctic explorer being the result, in due course of time). Then we select another favorite daughter and wed her to Lieut. Garlington, of the Greely Relief Expedition, and we still have left, stowed away somewhere in our midst, the very girl to suit the discoverer of the North Pole, whoever he may be."

THE marriage of Lieutenant E. A. Garlington, 7th Cavalry, to Miss Anna Buford, at Rock Island, Aug. 17, to which we alluded briefly last week, seems to have been a very pleasant affair. The Rock Island *Daily Union*, referring to the event, says: "The bride-elect, with her father, arrived at Trinity Church promptly at noon, where they were met at the altar by the groom and his best man, Lieut. L. S. McCormick, 7th Cavalry, of Fort Leavenworth. Immediately after the ceremony the bride and groom with the bride's family repaired to the residence, No. 1210 1st avenue, where the wedding feast was spread. A large number of the immediate family friends were invited to the reception. Many and valuable were the presents bestowed upon the happy couple. Lieut. and Mrs. Garlington, accompanied by Lieut. and Mrs. J. F. Bell, leave to-night for Niagara Falls and the St. Lawrence River, and after a short visit in the East will repair to their home at Fort Buford, D. T. Mrs. Garlington is one of Rock Island's best known young ladies, having a large circle of friends by whom she will be greatly missed." The married couple arrived in New York on Wednesday and took apartments at the Grand Hotel.

COLONEL GILDER, having surmounted his recent difficulties, has again started for the North Pole.

LIEUTENANT C. H. HUNTER, 1st Artillery, left Fort Monroe, Va., on Monday on a week's leave.

CAPTAIN HORACE NEIDE, 4th U. S. Infantry, will go abroad in September to spend nearly a year.

A RUMOR abroad early in the week, that General Joseph E. Johnston was dying, has been positively contradicted.

GENERAL C. C. AUGUR, U. S. A., whose recent shooting by a negro we reported last week, is in a fair way to recovery.

LIEUTENANT W. H. COFFIN, 5th U. S. Artillery, spent this week at Burlington inspecting the Vermont militia encamped there.

LIEUTENANT C. A. L. TOTTEN, 4th U. S. Artillery, spent a busy week of it this week in the camp of the Connecticut National Guard at Niantic.

LIEUTENANT J. J. O'CONNELL, 1st U. S. Infantry, visited friends in San Francisco last week, on his way East to enter upon a tour of recruiting duty.

LIEUTENANT S. R. JONES, 4th U. S. Artillery, paid an official visit this week to the State Camp Ground, Connecticut, to inspect the siege gun and mortar battery.

CAPTAIN A. S. B. KEYES, 10th Cavalry, as will be seen in another column, has been acquitted of the charges on which he was recently tried at Fort Grant, Ariz.

LIEUTENANT H. B. OSGOOD, and A. Cronkhite, of the Artillery arm, under orders issued this week, will continue on special duty at the Artillery School, Fort Monroe.

LIEUTENANTS W. H. BEAN, 2d Cavalry, and C. G. Lyman, 5th Infantry, graduates of the year, visited their brother graduate, Lieut. W. G. Elliot, 9th Inf., at Newport, R. I., this week.

MR. A. S. ABELL, the esteemed proprietor and senior editor of the Baltimore *Sun*, celebrated his eightieth birthday, Aug. 10, at Guilford, his summer residence, in Baltimore county, Md.

A WASHINGTON "special" to a Western paper says: "The knowing ones are now backing Jedediah Baxter for the Surgeon Generalship. Secretary Endicott is backing him and third time of trial may bring him victory. Crane beat him first, then Murray, now is his turn."

COLONEL W. E. MERRILL, U. S. A., long in charge of the Ohio River improvements, and one of the ablest engineers in the Service, is recovering from his severe illness and will spend a two months' sick leave in the East. His many friends wish him a speedy recovery and safe return, says the Cincinnati *Commercial*.

CAPTAIN JACK CRAWFORD, formerly chief of the scouts in the Sioux and Apache campaigns, was bitten on the back of the right hand by a rattlesnake recently, while en route from his mines in the South Oscra mountains to his home at Fort Craig. His hand and arm are terribly swollen, but the physicians think he may recover.

CHAPLAIN J. V. LEWIS, U. S. A., of Fort Niobrara, delivered a powerful sermon before the G. A. R., at their recent reunion at Norfolk, Neb. After the sermon came the procession, headed, says a despatch, by the Fort Niobrara band. Then came General Brisbin and staff, mounted, and several troops of U. S. Cavalry. The cavalry was well mounted and made a fine showing.

AT the reunion last week at Des Moines, Iowa, of the veterans of the Mexican War, a resolution was adopted recommending to the President of the U. S. the name of our comrade and fellow member, Col. Albert G. Brackett, of the 3d U. S. Cavalry, for promotion to the grade of brigadier-general when a vacancy shall occur. At the banquet Gen. Brackett responded for the "Army and Navy."

IN a lecture on "The German Soldier in Newport," delivered before the Newport Historical Society, Mr. J. G. Rosengarter said: "Gen. Geo. W. Cullum's admirable historical sketch of the fortification defences of Newport contains a very clear, concise, and critical account of the siege, illustrated by a contemporary map discovered by him in the Massachusetts Historical Society Library."

THE German Minister of War, General Bronsart von Schellendorf, is described as an amiable gentleman of pleasant manners, who, however, appears in Parliament much less dignified than either of his predecessors, Gen. von Roon and Gen. von Kameke. He speaks too much and with too much zeal, but he shows on every occasion the cultivated soldier and true disciple of Gen. Moltke. Tall and commanding as Bronsart is in appearance, he seems slight in comparison with the Minister of Marine, General Caprivi, whose herculean proportions rival those of Bismarck.

THE Omaha *Excelsior* of Aug. 21 says: Captain C. A. Coolidge, 7th Infantry, has been called East by the death of his mother. Capts. George M. Downey, S. P. Jocelyn W. F. Spurgin, S. A. Haughey; 1st Lieutenants J. W. Duncan, Willis Wittick, Harry L. Bailey, Chas. M. Truitt; 2d Lieuts. John S. Parke, Jr., Lawrence Hearn, Henry L. Styer, Edward McCaskey are the officers of the 21st Infantry, and Capts. Olmstead and Dawson and Lieuts. Burnett, Trout, Taylor and Ladd those of the 9th Cavalry transferred to Fort Du Quesne, the post in northeastern Utah.

LAST week we reported the triple marriage and the silver wedding to occur at Fort Hancock, Tex., September 2, the principals being Colonel S. B. M. Young, U. S. A., and Mrs. Young, the Misses Edith and Burton Young and Lieuts. Knight and Read. Concerning the occasion, a correspondent of the Kansas City *Times* writes: "It will be one of the most brilliant affairs that has ever occurred on the border and at the same time one that will appeal largely to the hearts of all, involving as it does the cementing of old ties and of tried affection and the forming of new ones, full of youthful hope and tenderness. Not only military circles, but the entire community, join in wishing these charming people bon voyage on the matrimonial sea."

GENERAL THOMAS A. MCPARLIN, U. S. A., and family have returned to Omaha, Neb.

SECRETARY OF WAR ENDICOTT and Mrs. Endicott are at the Glen House, White Mountains.

COLONEL C. L. BEST, 4th U. S. Artillery, left Fort Adams, R. I., on Thursday, to be absent for a week.

MAJOR F. W. HESS, U. S. A., left Washington on Thursday to join his family at McConnellsburg, Pa.

GENERAL THOMAS J. WOOD, U. S. A., and wife have just returned from the seashore to their home in Dayton.

CAPTAIN J. H. HURST, 12th U. S. Infantry, rejoined at Fort Niagara, N. Y., the latter part of the week from a short leave.

LIEUTENANT H. J. REILLY, 5th U. S. Artillery, at present on leave, will join Light Battery F at Fort Hamilton in October.

LIEUTENANT S. F. MASSEY, 5th Artillery, will join the light battery of his regiment at Fort Douglas, Utah, early in October.

MISS GRACE W. STIVERS, daughter of Capt. Stivers, U. S. A., has returned home from a visit to Martha's Vineyard, Boston, and Pawtucket.

GENERAL A. MCD. MCCOOK, U. S. A., and Mrs. McCook have returned to Fort Leavenworth from their sad visit to Cincinnati to bury their little child.

LIEUTENANT H. L. HARRIS, 1st Artillery, has relinquished duty at the Headquarters Division of the Pacific, and gone to Fort Winfield Scott, Cal., for temporary duty.

LIEUTENANT A. C. BLUNT, 5th U. S. Artillery, who has been lately visiting at Liberty, N. Y., left the latter part of the week for Fort Niagara to act as statistical officer at the rifle competitions there.

THE Omaha *Herald* reports Gen. Hazen as saying, while there last week: "I shall be absent for four months, but will not return via Omaha. I shall cross the Isthmus and go up the Atlantic Coast, most likely."

GENERALS MCMAHON and Horatio King, of New York, were at Fort Leavenworth early in the week, the guests of Col. Gillis, and afterwards, with several others of the Loyal Legion, attended a dinner at the National Hotel.

THE following officers have been admitted to membership in the Army Mutual Aid Association since our last report: Lieuts. Edward Lynch, 8th Inf. (July 1, 1886); John S. Parke, 21st Inf.; John F. Morrison, 20th Inf.; Chas. G. Ayres, 10th Cav.; A. M. Palmer, 24th Inf.; Capt. G. C. Doane, 2d Cav.; Lieuts. Wm. Geo. Elliot, 9th Inf.; B. A. Byrne, 6th Inf.; Maj. A. E. Bates, Pay Dept.; Lieuts. B. M. Purssell, Sig. Corps; J. E. Maxfield, Sig. Corps; O. B. Mitcham, Ord. Dept.; B. C. Lockwood, 22d Inf.; John S. Mallory, 2d Inf.; Capt. Rogers Birnie, Jr., Ord. Dept.; Lieut. David Price, 1st Art.

MRS. HELEN M. CARROLL, who was divorced from Maj.-Gen. S. S. Carroll, U. S. A., retired, and afterwards remarried him, again sues for divorce, alleging that she remarried Gen. Carroll at his urgent request and on his solemn promise to stop drinking. He kept this promise for nearly twelve months, she says, when he fell into the company of bad men and women and began to drink again and to abuse her and call her vile names. He also refused to furnish her with the comforts or even the necessaries of life. She states that he boasts that the courts at Washington do not interfere with him, as he is a Major General in the Army, and that he will treat her as he chooses. She also alleges various acts of infidelity with lewd and abandoned women.

CAPTAIN A. H. VON LUETTWITZ, a retired Army officer, who lost his right leg ten years ago in a gallant charge upon Indians, has been sued by his former landlady, a Mrs. Sarah Zimmerman, for "attendance" upon him. She had sued him once before for "damages" for the same services, but withdrew her suit before the time set for trial. The Captain says that the full extent of her "attendance" upon him was limited to such assistance as she could render occasionally, while his colored attendant was temporarily absent, in enabling him to go down the back stairway of the house. Mrs. Sarah Zimmerman is the woman who startled the community a few weeks ago by suing Congressman Geddes, of Ohio, for slander, charging him in her bill of particulars with the alleged statement that no man was safe with her alone. She was recently charged by the Captain with stealing his wooden leg.

THE Vancouver *Independent* of August 12 says: Lieut. James A. Buchanan, 14th Inf., and wife, are at Clatsop Beach, inhaling ocean breezes....Captain C. H. Warrens, 14th Inf., came over from Seattle for a few days rest at the post this week....Captain Franck Taylor, 1st Art., took his family up to Fort Cœur d'Alene yesterday, to remain for a week or two in a spot quite as pleasant as any at the seaside. ....Surgeon E. B. Mosely, Vancouver Barracks, will this year try his nerve as a contestant in the Department rifle contest....Gen. W. T. Sherman, accompanied by his daughter Lizzie, are expected this week....Col. Lewis C. Hunt, 14th Inf., is quite sick at present, and unable to travel....The Department rifle contest commences in earnest to-day, and things are lively at the Vancouver Barracks target range. ....Lieut. J. P. Wisser, 1st Art., detailed to West Point, departed Saturday by way of San Francisco.

THE Vancouver *Independent*, of Aug. 19, says:

Col. N. B. Sweitzer, 1st Cav., is again at Walla Walla, after a brief tour in San Francisco.....Miss Katharine Beck, of Boston, is the guest of Lieut. and Mrs. J. A. Buchanan.....Lieut. D. L. Pearson, 2d Cav., has gone from Fort Walla Walla to the Sound, with his family, for a brief vacation....Major J. P. Canby has entered upon his duties as chief paymaster.....Col. De Russy gave a german at the post commander's residence Tuesday night which was largely attended, and a grand success.....Chief Justice Waite and party were at Vancouver Barracks on Tuesday. They were received with all due honors.....Gen. W. T. Sherman and daughter were at the barracks for a few hours Friday, the guests of Gen. Gibbon Gen. Lucius Fairchild, of Wisconsin, Commander-in-Chief of the G. A. R., is expected this week, on a visit to Gen. John Gibbon, his old companion in arms, in the famous Iron Brigade.....Among other nominations sent to the Senate by the President for confirmation was that of Dr. Eugene Stone, to be Assistant Surgeon in the Navy. Dr. Stone is a son of Col. E. W. Stone, 21st U. S. Inf., lately stationed at Boise Barracks.

LIEUTENANT H. H. SARGENT, 2d Cavalry, and Mrs. Sargent were at the Nicollet House, St. Paul, this week.

LIEUTENANT H. H. LUDLOW, 3d U. S. Artillery, left Fort McHenry this week for Fort Monroe, Va., his new post of duty.

CAPTAIN J. F. MUNSON, U. S. A., left Ocean Grove, N. J., this week for Indianapolis, his address while there being 13 West North street.

La France Militaire says Maj. Upham, 5th U. S. Cav., and Capt. Moylan, 7th Cav., will assist at the manœuvres of 1886, in the 12th *corps d'armée*, as representatives of the United States.

THE Presidio County *News* says: Major W. H. Gardner, who has been Post Surgeon for over four years, will leave Fort Davis, Texas, next week on an extended leave. Dr. Gardner is extremely popular, and his departure is deeply regretted by both officers and citizens."

THE following officers of the Army are registered at the office of the Adjutant-General: 1st Lieut. S. W. Fountain, 8th Cav.; Major J. R. McGinness, S.; Major Edwin Bentley, S.; 2d Lieut. H. B. Moon, 20th Inf.; 2d Lieut. J. F. Bell, 7th Cav., and 1st Lt. W. S. Wyatt, 9th Inf.

ADJUTANT GENERAL DRUM is now enjoying the bucolic delights of country life, and is determined to hold up the Army end in farming against Admiral Ammen, who represents the Navy. The General has a very handsome farm several miles from Washington, and drives out every afternoon after he has completed his official duties. He leaves the War Department rather early in the day, but makes up for it by being on hand early in the morning. He frequently startles the messengers by appearing at his desk before they have put the office in readiness for him.

A DESPATCH from Prospect House, N. Y., August 26, says: The President was a weary man to-night, for to day, in company with Dr. Ward, he had explored a half dozen lakes and ponds, travelling in all a distance of twenty miles, one-fourth of the journey being made on foot. They took their trolling lines along, but as they returned without any fish neither of them was willing to admit that they had had a day's fishing. The one unhappy moment of the journey was when they passed Col. A. H. Belo, of the Galveston *News*, on Long Pond, who triumphantly held up for their inspection a four-pound salmon trout. A deer got into the lake in front of Saranac Inn, while the President was eating his breakfast, and it was proposed to drive it ashore and give Mr. Cleveland a shot at it. The guides pulled toward the animal with all their might, but, like the bear which was on the lake the day before, it got ashore unhurt, notwithstanding that three balls from a Winchester rifle skipped over the water in dangerous proximity to it.

"YACHTING parties this summer," says the *Times*, "are considered to be 'quite the correct thing.' Everybody who owns, who can rent, hire, or beg a yacht takes his friends on a yachting party. But it was left for Captain Stafford, 15th Infantry, U. S. A., now stationed at David's Island, to make up a combination 'yacht clambake' party, and he did it royally last Friday. The captain is happy in the possession of a yacht; so are his friends happy. Friday was simply a glorious day, and the captain's yacht seemed to appreciate the fact that it was blessed with good winds and immaculate water. On board were Captain Stafford's wife and daughter; Mr. and Mrs. L. M. Hamburger, of Chicago, who owns one of the biggest ranches in New Mexico; Lieut. J. K. Waring, U. S. A., wife and daughter; Miss Lizzie Waring, of Fort Niobrara; Miss Lillian Lee, daughter of Colonel Lee, Chief Quartermaster of the Dept. of Missouri; Charles M. Stafford; Willis E. Stafford, his brother, and Miss Amelia Burt, who captured all masculine hearts on the pilgrimage. The party meandered gracefully and breezily over the ruffled waters of the Sound for hours, and then put in at Huckelberry Island. The clambake was a regular old-fashioned, gorgeous Rhode Islander, and several cases of Perrie Jouet didn't detract at all from its intrinsic merit. In the midst of the fun a party of non-commissioned officers from the captain's company came down from David's Island and set up their tents on the island and initiated the non-military into the mysteries of camp life. They had a splendid time. Some of the party got lost—they said they got mixed up in the mythical huckelberry bushes—but they were found, and it was late when the little party got back to New York."

LIEUTENANT C. J. BOUSH, U. S. N., and Mrs. Boush are at Williamsburg, Va.

REAR ADMIRAL W. E. LEROY, U. S. N., registered at the Victoria Hotel, New York, on Tuesday.

CAPTAIN HENRY WILSON, U. S. N., was a guest at the Westminister Hotel, New York, this week.

THE engagement is announced of Miss Boker, of Newport, R. I., to Lieut. M. F. Wright, U. S. N.

NAVAL CONSTRUCTOR THEO. D. WILSON, U. S. N., visited at Old Point Comfort early in the week.

COMMANDER JAMES O'KANE, U. S. N., registered at the Grand Hotel, New York, early in the week.

PAYMASTER L. G. BOGGS, U. S. N., registered at the Albemarle Hotel, New York, early in the week.

CAPTAIN R. W. MEADE, U. S. N., and the members of the Board, were at the Norfolk Navy-yard, this week.

LIEUTENANT F. S. CARTER and Ensign Hugh Rodman, U. S. N., were at Narragansett Pier, R. I., this week.

SECRETARY OF THE NAVY WHITNEY, on board the *Despatch*, went from Newport to Boston early in the week.

A BAR HARBOR "local" says: "Dr. Ruth, the Adonis of the Navy, is the guest of J. Biddle Porter, at the Wyandotte."

REAR ADMIRAL EDWARD SIMPSON, U. S. N., contributes to the September number of Harpers' Magazine an interesting article on "United States Docks and Navy-yards."

LIEUTENANT SEATON SCHROEDER, U. S. N., and the party of Japanese under his escort, arrived at Newport, R. I., on Monday.

CAPTAIN GEO. H. PERKINS, U. S. N., who has a cottage at Newport, R. I., was thrown from his horse last week and severely injured.

LIEUTENANT COMMANDER C. H. STOCKTON, U. S. N., of the Bureau of Yards and Docks, will shortly join his family at Saugatuck Lake.

ENSIGN E. E. WRIGHT, U. S. N., has an instructive and interesting article on the Apprentice Training Squadron in "Harper's Young People" for Aug. 24.

COMMODORE D. L. BRAINE, Captain G. B. White, Lieut. Commander R. B. Bradford, and Lieut. E. S. Jacob, registered at the Navy Department this week.

MEDICAL DIRECTOR DELAVAN BLOODGOOD, U. S. N., relinquished duty at the New York Navy-yard on Tuesday, and now goes to duty at the Norfolk Navy-yard.

REAR ADMIRAL C. R. P. RODGERS, U. S. N., leaves Sweet Springs, West Va., this week, for Far Rockaway, Long Island, N. Y., where he will spend the next five weeks.

LIEUTENANT E. L. JACOB, U. S. N. (retired), with his children, is spending a few days with his friend Lieut. Downs L. Wilson, U. S. N., at 1418 Thirty-third street, Georgetown, D. C.

MEDICAL INSPECTOR J. C. SPEAR, U. S. N., says the New York *Times*, who has just joined at the Brooklyn Navy-yard, is personally very popular in the yard, and has made a local reputation as a surgeon.

NAVAL CADET S. W. ARMISTEAD, appointed assistant naval constructor recently, was one of the graduates of the Naval Academy sent to the Greenwich Naval School, in England, for the two years' advanced course in construction.

LIEUTENANT A. E. CULVER, U. S. N,, who has been at Paris, France, since last October, was a passenger on board the *Alaska* on her recent trip and is now a guest of Mr. D. R. Case, at the country place of his father, Rear Admiral Case, at Bristol.

MRS. GENERAL HUNT and her daughter, Mrs. Robt. A. Marmion, are now the guests of Capt. Stivers, U. S. A., at his handsome residence in Dayton, Ohio. Mrs. Marmion expects to join her husband, whose ship, the *Juniata*, is on her way to Valparaiso.

ENSIGN M. K. EYRE, U. S. N., late of the *Ranger*, was married at Vallejo, Cal., August 14, to Miss Carrie Klink, and the married couple are now on their way to Annapolis, Md. Among the wedding gifts was a handsome clock presented by the officers of the *Ranger*.

CHIEF ENGINEER R. B. HINE, U. S. N., has gone to visit friends and relations on the Hudson, spending some time also at Lake George, and does not expect to return to Washington before Sept. 10 or later. Mr. Hine returned from the Brazil Station in the *Nipsic*, after a cruise of over three years.

P. A. ENGINEER JAMES ENTWISTLE, of the Navy, is still on "temporary duty connected with the trial of the machinery of the U. S. S. *Atlanta*." Mr. Entwistle prefers the quiet and seclusion of Paterson, N. J., to the rush and bustle of New York, and is living with his mother in that metropolitan suburb.

ASSISTANT PAYMASTER DOYLE, U. S. N., of the *Iroquois*, is so well remembered at the Navy Department that the following extract from a recent letter from his ship will be duly appreciated: "Our paymaster, Doyle, still carries on the conversation." From which it appears that he has lost none of his geniality nor capacity of expression.

CHIEF ENGINEER WM. H. HARRIS, the detail officer of the Bureau of Steam Engineering, left Washington on Thursday under orders, to witness certain tests of specimens of riveted steel joints for boilers with the testing machine at Watertown Arsenal. After he has completed his duties at the arsenal he will spend a week at his old home in that vicinity.

RECENT DEATHS.

CAPTAIN WILLIAM H. GILL, Military Storekeeper, of the Quartermaster's Department, U. S. Army, died suddenly at Asbury Park, N. J., August 21, in the fifty-ninth year of his age. He had been sick but a short time and was recuperating on leave at the seaside, but his sudden death was entirely unexpected. His career is thus summed up: He was born at Baltimore, Md., in 1828. In early childhood his parents moved to Ohio, where he learned the printing trade. At the age of nineteen he had become owner and editor of the *Jeffersonian*, a weekly newspaper still in existence at Cambridge, Ohio. While editor he was elected secretary of the Ohio Constitutional Convention. In 1850 he moved to New Lisbon, Ohio, and there edited the *Ohio Patriot*. In 1858 he received the appointment of military storekeeper at Fort Leavenworth, and there remained until the war broke out, when he was assigned to Cincinnati. While stationed at Fort Leavenworth he started the Fort Leavenworth *Herald*, the first daily paper in that section. During the war he was stationed at the Cincinnati Arsenal, where the bulk of the war stores were kept. From Cincinnati he was transferred to New York and from there to Philadelphia. He resigned his commission in 1870 owing to ill health. In 1874 he was elected to the New Jersey Assembly and in 1875 was re-elected. After serving his two terms in the Legislature he went to Washington as secretary of the Committee on Military Affairs. While there, by a special act of Congress, in 1882, he was restored to his former position in the Army and was assigned to the Schuylkill Arsenal, Philadelphia,

The funeral took place at Elizabeth, N. J., August 23, and was largely attended.

—

Second Lieutenant Jerome J. Weinberg, 13th U. S. Infantry, who was recently severely burned at Fort Leavenworth as reported last week from the explosion of a lamp, died in the hospital at Fort Leavenworth, Kas., Aug. 23. Lieut. Weinberg joined the Signal Corps in 1873 as a private, rose to sergeant, was discharged in March, 1878, and in September of the same year joined the 3d U. S. Cavalry, as a private, and was afterwards appointed a Hospital Steward. In 1884 he passed a successful examination for a commission, and was appointed, Aug. 4 of that year, a 2d Lieutenant of the 13th U. S. Infantry. He was regarded as an efficient officer with a wide and practical knowledge of Army matters.

—

Mrs. Bullis, wife of Captain J. L. Bullis, 24th U. S. Infantry, who had been in poor health for a long time died at San Antonio August 16. The San Antonio *Express*, referring to the sad event, says: "Mrs. Bullis had long been a patient sufferer, but bore up until the last with a fortitude hardly to be expected. At the time of her death she was 37 years of age, and was a direct descendant of the Rodriguez family, one of the original thirteen from the Canary Islands. She married Captain Bullis nearly thirteen years ago, and has ever since contributed the greater portion of the happiness he has enjoyed. She was loved by all who knew her and respected by all. Captain Bullis has the sincere sympathy of the entire community. The remains were taken from the residence to San Fernando Cathedral, where Bishop Neraz performed the rites. All the officers of the post did honor to the dead. The pall-bearers were Colonel John Withers, Major Bash, John Withers, Jr., R. Pereida, Wm. Cassin, Ed. Guilbeau, Mr. Hewitt, and Lieut. O. M. Smith.

At a meeting of the members of Company G, 2d Infantry, held at Fort Niobrara, Neb., on the evening of Aug. 15, 1886—president, Elie Rivers, 1st Sergt. Co. G, 2d Inf.; secretary, Joseph Honnel, Corpl. Co. G, 2d Inf.—the following resolutions were unanimously adopted, together with one requesting their publication:

Whereas, It has pleased the Almighty God to remove from our midst our beloved comrade Private Lawrence Crane, Company G, 2d Infantry, on the evening of Aug. 14, 1886, and

Whereas, We deeply lament his loss, which deprives us of a true comrade, and the company of an excellent soldier.

Resolved, That we deeply deplore our loss in the death of our comrade, who, during his long period of service in the United States Army, by his manly and soldierly conduct, made friends of all; we do hereby express sincere sorrow at his departure from our midst, and our appreciation of his many excellent qualities.

Resolved, That while we deplore his death we sincerely sympathize with all his relatives and friends, and assure them of our affectionate remembrance of him.

M. Boswell Seawell, a nephew of Gen. Washington Seawell, U. S. A., retired, died August 12 at his late residence in Gloucester County, Va., in the 70th year of his age. His remains were interred at Gloucester Place, the residence of ex-President Tyler while U. S. Senator, of whom the deceased was also a nephew.

Mrs. Anna M. Neil, who died at Detroit, Mich., August 15, in the 70th year of her age, was the mother of Captain C. A. Coolidge, 7th U. S. Infantry, and of E. B. Coolidge, formerly of the U. S. Navy. She was the eldest daughter of the late Henry Rice and Maria Burroughs, of Boston.

Mr. George A. Ludin, who died at Nyack, N. Y., August 20th, in his 28th year, was the son-in-law of Chief Engineer Louis J. Allen, U. S. Navy. Mr. Ludin was only married about nine months ago, and the widow and relatives are plunged in the deepest affliction. He died of congestion of the brain.

Mr. Eugene Moulton Keteltas, a brother of Col. Henry Keteltas, formerly captain 15th U. S. Infantry, died, of heart disease, at Newport, R. I., Aug. 26. He was unmarried.

Edward Stanislaus Jones, son of the late Capt. Jacob Jones, U. S. N., died at The Anchorage, near Cecilton, Md., Aug. 24, after an illness of several weeks.

Mary Benbridge, widow of John Quin, Master, U. S. N., died recently at Maplevue, Pa. Her husband died in 1858.

Mrs. Mary C. Cogswell, mother of Lieut. J. K. Cogswell, U. S. N., died at Philadelphia, August 5.

REGULARS IN SAN FRANCISCO.

The *Alta*, referring to the military procession of the G. A. R., etc., in San Francisco July 31, says: "The first to arrive and form line was the detachment of regular troops from the Presidio and military posts in and about the city. This was preceded by the 1st U. S. Infantry Band. Col. W. R. Shafter, 1st U. S. Infantry, was in command of the regular troops, and was accompanied by Lieuts. F. H. Edmunds, adjutant, and T. H. Barry, R. Q. M., of his staff. A battalion of the 1st Infantry followed, under command of Major E. Collins, which was composed of Co. C, Capt. W. N. Tisdall; Co. G, 2d Lieut. Thos. Connolly, and Co. F, 2d Lieut. R. H. Noble, making six platoons of twelve file front. A battalion of the 1st U. S. Artillery followed, dismounted, under command of Capt. J. W. Dillenback, comprised of Battery A, Lieuts. John Pope, Jr., and Chas. J. Bailey, and Battery C, Lieuts. W. P. Van Ness and Frank S. Rice. Light Battery K turned out with four guns and caissons under 1st Lieut. Frederic C. Nichols and 2d Lieut. Millard F. Harmon and Geo. W. Van Deusen. The dismounted artillery had four platoons of eighteen file front, and Light Battery K moved in single column. All the regulars made a magnificent appearance. Their lines were kept carefully dressed, and every step was made with precision, as, indeed, was every movement. It was easily noticed to what grade of service they belonged, and the uniforms were without a blemish and their arms and accoutrements presented the appearance of having been prepared for inspection."

ALASKA EXPLORING EXPEDITION.

The following private letter has been received from Passed Asst. Surgeon Nash, of the Alaska exploring expedition:

Headquarters Northern Alaska Exploring Expedition,
Fort Cosmos, Feb. 27, 1886.

On Dec. 26 last I sent a letter by Zane, who was going to St. Michaels. He has made the trip and safely returned, and this goes back by an Indian who acted as guide for him. As it has to pass through a good many hands, it is not certain that you will get it, but I am anxious to keep you as well informed as possible and so shall send it. Read has recovered and his condition is as good as when he left home.

The health of the remainder of the party is excellent. For the last few days the temperature has been so high as to become oppressive, having reached +13 Fahrenheit. One or two have slight colds of no importance. Affairs, official and personal, are getting on well. Stoney leaves to-morrow on a probable trip of two months. He will attempt to reach Point Barrow; the Indians say that they go there, but that is extremely improbable. It is astonishing how unreliable their information on such points is. They count their distances by "sleeps," and if they say that a place five sleeps off put it down as at least 15. We are having the sun now for ten hours a day and I notice a marked improvement in the dispositions of everybody. We never had darkness in the middle of the day, and have had the sun all the time except for about four days in December. Our lowest temperature has been —70 degrees. Zane had this the night of Jan. 1 on his way to St. Michaels. He was cold, but did not suffer, as he had a good fire and a sleeping bag. Here at the Fort we only had —68 degs. Life is, of course, somewhat monotonous, but time does not drag very heavily, as official duties and reading fill the day comfortably. As soon as Stoney returns the party will be broken up and scattered over the country to meet at the mouth of the river. After a separation from home for 18 months we will all be heartily glad to get back and learn what is going on in the civilized world. This place is longitude 156 degs., 57 min.; latitude 66 degrees, 55 min.

A report has been received at the Navy Department from Lieut. Stoney, dated Fort Cosmos, Putnam River, Dec. 26, 1885. He states that between the 10th and 19th of December, accompanied by Ensign Howard, he made a sledging expedition to the northward and reached the headwaters of the river which flows to the northward. The natives say that this river empties into the Arctic near Pt. Barrow. Owing to the shortness of the days, having only twilight and moonlight, he could not make much headway, and regarded it more practical to continue exploring the country nearer headquarters and take up the northern country when the days lengthen. Every effort would be made to explore the mentioned river, and also to reach Point Barrow, thereby completing the exploration of Arctic Alaska. On his northern trip he came across natives who had never before seen white men. They were at first much surprised to see the white man come amongst them.

There being but two in the party, Lieutenant Stoney at first thought he would have trouble, but on the contrary found them specially kind. Their curiosity was, however, beyond imagination. Some of these natives claimed to sometimes visit Point Barrow via the river. These natives live principally on the meat of the reindeer. The few fish they get out of the lakes are hardly worthy of mention. Their country abounds in reindeer. Many herds were seen, some of which numbered several hundred. For six days the party lived principally on deer meat. The winter quarters were as comfortable as possible. So far he had been able to procure fresh meat twice a week and he felt confident that he could continue to do so until spring, when game would be plentiful. The men were standing the Arctic winter perfectly. The winter that far had been milder than expected. Minus 45 degrees was the lowest temperature experienced.

A NEW TORPEDO BOAT.

(From the New York Times, Aug. 25.)

Persons walking along Riverside Drive at 86th street yesterday afternoon saw a black object skimming along on the surface of the Hudson. Then they didn't see it for a long time. Again it would appear at a distance. The object was not a sea serpent, but a submarine torpedo boat, the work of Prof. J. L. Tuck, who showed it off to a few friends yesterday. The boat is intended to approach a big naval vessel during war times under water, and, having left a couple of torpedoes under her hull, to withdraw to a convenient distance and fire them by means of an electric current from a battery. The little craft of iron and steel, weighing 20 tons, is named the *Peacemaker*. She is 30 feet long over all, 8½ breadth of beam, and 6 feet deep. Placed at each side of the keel is enough lead to load the boat to the water's edge. To sink the vessel below the water there are compartments which can be filled or emptied as required. Compressed air is held in iron pipes, to be liberated as the air grows foul. A common rudder steers the craft, and a horizontal rudder, centrally hinged in a frame at each side of the stern, raises or sinks the boat. On top is a little dome 12 inches high and 14 inches in diameter, with glass windows for light. When a ship is to be blown up as the boat passes beneath her a strong insulated wire carrying two cartridges, one at each end, is released. The cartridges are filled with a powerful explosive, and are lightened with corks so that they will rise against the bottom of the vessel. Then by means of the electric battery, after the boat has withdrawn, the explosion is effected. Yesterday the little craft dived to a depth of 40 feet in the river, and then took a submarine trip up toward Yonkers, remaining under water over seven minutes. The trials were a success, and the gentlemen interested in the boat were all pleased. Prof. Tuck said she had made 12 miles an hour, and that she could remain under water several hours.

A second exhibition was given on Thursday. About 3.30 P. M. the process of filling the *Peacemaker's* receiver with caustic soda was begun. The soda had been saturated with water, and in a few minutes the steam gauge showed 100 pounds pressure. Compressed air was then forced into pipes, placed so that small quantities can be released from time to time as the atmosphere in the hold grew foul. The pilot took his place amidships with his head inside the windowed dome, which rises two feet above the deck; the engineer followed him and firmly screwed down the manhole from the inside. These two men compose the entire crew. At once the vessel started up the river at a speed of about six miles an hour. By the use of her lateral rudders she sank below the surface almost immediately, and appeared again about half a mile up the river after a submersion of five minutes. On the second trip a reporter was added to the crew, and the *Peacemaker* made the longest dive that she had yet attempted, from one and a half to two miles, passing under two steamers and rising within 10 feet of a tow of canal boats. A third dive was attempted, but owing to the water in the boiler giving out, it was unsuccessful. Friday the vessel was to be hauled out of the water at 13th street, and several improvements made. Electric lights will take the place of the candles now used; a water gauge will be attached to the boiler; an additional reservoir for water will be added; the manhole by which the hold is entered will be made flush with the deck, and the machinery necessary for carrying and discharging torpedoes attached to her sides. The promoters of the enterprise are confident of success, and will build a second boat at once, 20 feet longer, that is, 50 feet over all.

TRIAL OF DYNAMITE SHELLS.

A second series of experiments were conducted at San Francisco, Aug. 13, in the presence of Captain Dillenback, and Lieuts. Slaker and Harris, of the Board of Officers; Senator Jas. G. Fair, Jas. C. Flood, Col. H. D. Ranlett, Col. Richard Savage, Col. Tucker, the Japanese Consul-General and the resident Consul, Lieuts. Scott and Richmond of the Navy, Commander Coghlan of Mare Island, Col. C. F. Mattison of Chicago, Major McRae, Major Collins, Adjutant Davis, Lieut. Harmon, Surg. Walker, Surg. Cochrane, Lieut. Moseley of the Intelligence Department, General Cannon, T. C. Wills, H. B. Smith, and others interested in various ways in the experiments. In addition to these there were a number of representatives of different governments present. The first shot was fired shortly before 11 A. M., under the same conditions of the experiments of Tuesday last, using a 4½-inch rifled gun, three and one-fourth pounds of powder to the cartridge, and twenty-six pound shells, each containing a trifle over one pound of dynamite. Twenty-seven shells were fired, and the *Alta California* reports that the Board of Officers was so well satisfied that the dynamite was under control that they abolished their strict rules of the preceding occasion, and the gun crew took no more precautions than they would in firing a salute. Lieut. Graydon personally pulled the lanyard in most instances, and stood within ten feet of the gun to do it, while his assistants were close at hand. Cakes of asbestos, cut in discs to fit the gun, were used for wads on top of the powder. A score of sheets of this material were used on each cartridge, and rammed well home, but the shell was left uncovered. The force of the dynamite was invariably with the direction of the shell. This, the mining gentlemen present thought, might be turned to account in tunnelling, and several of them requested conferences with Graydon with a view to discussing this matter. As a wind-up, and to demonstrate that he could use gelatine or any of the sensitive explosives as well as dynamite, Lieut. Graydon, for his twenty-seventh and last shot, in addition to the regular charge of dynamite, inserted in the shell a quantity of the finest rifle powder manufactured, and mixed with the load a liberal priming of fulminate of mercury. Photographs were taken by Lieut. Harris to accompany the report of the Board. We are told that "the Board expressed satisfaction with the demonstrations, but in their report they will recommend a further trial with an eight-inch rifle and one of the huge fifteen-inch Rodman smooth-bores. Lieut. Graydon expresses a willingness to submit to any test they may propose, and asserts that the larger the gun the easier it will be for him to make a showing of his capabilities. The Rodmans, however, are old, obsolete smooth-bores, and an accident might occur with them under any circumstances. Still, if desired, he will take the risk and responsibility."

SOME PERSONAL SKETCHES.

A Washington correspondent of the Philadelphia *Times* thus gossips:

Secretary Whitney, on the rare occasions he appears at the Navy Department, has altogether summer surroundings. He cares little for the dignity which is so precious to the head of the State Department. With a $2 striped office coat, almost transparent trousers, velvet slippers and a huge palm leaf fan he gets through his work in a manner suggestive of no great discomfort. Occasional sipping from a little peach-blow bowl close at hand adds to his comfort. Just what the bowl contains nobody has been able to discover, for the simple reason that nobody dares to approach it in the presence of the august Secretary and it is carefully locked up in his absence. There are stories afloat in the Department that a clerk who went too near the precious bowl was threatened with dismissal in case of a repetition of the offence. The liquid contents appear to be chameleon-like in hue. Some clerks are willing to swear that the liquid is red; others are equally sure it is pure crystal and others declare it is dark brown. No one has yet had the temerity to give an opinion as to the substance. The curiosity among the Navy Department people has grown positively intense and unless Mr. Whitney gratifies it soon some bold and curious subordinate is likely to investigate himself, even with the chances of dismissal. Farther down the corridor Secretary Endicott can be seen at his desk perhaps once in a week. He forms a perfect contrast to Bayard. While not actually puffing all the time, his breathing is so labored as to suggest some internal derangement. His usual position is one of comfort rather than elegance. It is a reclining one, and so very much so that, as he leans back with his feet resting on his desk, his body is perfectly horizontal. While writing he raises his head sufficiently to lay the paper across a large flat book on his lap. Of course, he occupies a more dignified position when official callers come in, but when alone, or with his subordinates, he shows a marked affection for the horizontal. A large red-silk handkerchief laid on a chair to his right serves as a mop, and a very frequent one, too. Mr. Endicott finds work in summer more unbearable than any of his Cabinet brethren, and comes to Washington only when the most urgent necessity compels him to do so.

The Philadelphia *Times* describes a "quartette" which recently met on the pier at Long Branch as follows:

The eldest of the lot is a man with what may be pronounced a great career—one of the remnants of that coterie of grand soldiers educated in the war with Mexico and long service on the frontier in the struggling days of the Republic—he makes a striking picture of age and accomplishment. He was among the earliest of those who began with Sherman, Sheridan, Grant and the manly men of that class who, later, contributed most to the salvation of the Republic. General Van Vliet may be regarded as the Nestor of the American Army, if age, strength, vivacity and mental activity are to be accounted the standards.

The group, beginning with Gen. Van Vliet, is numbered second by Gen. Horace Porter, the keenest and craftiest of the round of military characters which formed an appendage to Gen. Grant's civil administration and made it at times the subject of severe and acrimonious criticism. Horace Porter is a slick citizen. He comes of a slick family. Simon Cameron once told me that the elder Porter, when Governor of Pennsylvania, was one of those uncertain officials whose actions and utterances were tempered with a degree of ambiguity, both admirable and provoking. He also said that of all the military attaches of Gen. Grant Gen. Porter had the most influence, without seeming to exercise it, and did a good deal of ordering around without being seen on dress parade. Porter was the only one who came unscathed out of the turbulent period that saw the engulfing of Belknap and many other prominent men. He belongs to the order of managing men, whose fellow beings obey their behests and who never fall under or get left in the strife for the survival of the fittest.

Gen. Adam Badeau is no longer a heartily welcomed visitor in the Grant household, though the family rather like such of his articles as include reminiscences of his connections with the life and transactions of the father and President. Gen. Dent, the last, was stricken with paralysis some years ago and has never since been a mover in life nor any of its concerns.

THE ARMY.

G. O. 61, H. Q. A., August 20, 1886.

By direction of the acting Secretary of War, the troops stationed on Montezuma Creek, Blue Mountain, Utah Territory, will hereafter be paid by the officers of the Pay Department stationed in the Department of the Missouri, under the direction of the commanding general of that department.

By command of Lieutenant General Sheridan:
J. C. KELTON, Act. Adjt.-Gen.

G. O. 63, H. Q. A., Aug. 25, 1886.

Publishes the following act of Congress:

An act for the relief of the trustees of the Christian Brothers' College of Saint Louis, Missouri.

Approved, August 3, 1886.

By command of Lieutenant General Sheridan:
J. C. KELTON, Act. Adjt.-Gen.

STAFF CORPS AND DEPARTMENTS.

Quartermasters and Subsistence Departments.

Capt. Wm. S. Patten, A. Q. M., will proceed to Portland, Ore., on public business (S. O. 139, Aug. 11, D. Columbia).

The Brackett *News* says: "The friends of Commissary Sergt. O. W. Carroll regret that he has been ordered from Fort Clark, Tex., to Fort Apache, Ariz. Sergt. Carroll by his accommodating ways and gentlemanly conduct toward all, has won a host of friends both at the fort and in town who will regret his departure."

So much of par. 2, S. O. 178, Aug. 3, H. Q. A., as directs Com. Sergt. Charles Raab to proceed to Fort Shaw, Montana Ty., is revoked. Commissary Sergt. Charles Raab, upon being relieved by Commissary Sergt. Fagan, will proceed to Fort Supply, Indian Ty., to relieve Commissary Sergt. Wm. D. Curtis, who will proceed to Fort Shaw, Montana Ty., to relieve Commissary Sergt. Garrett Farley (S. O., Aug. 25, H. Q. A.)

Pay Department.

Major George W. Baird, Paymr., is relieved from further duty in the Dept. Dakota (S. O. 80, Aug. 16, D. Dakota).

Medical Department.

Leave of absence for fourteen days, to take effect on or about Sept. 1, is granted Major Alfred A. Woodhull, Surg. (S. O., Aug. 25, H. Q. A.)

Leave for two months, with permission to apply for an extension of one month, is granted Capt. John V. Lauderdale, Asst. Surg. (S. O., Aug. 23. H. Q. A.)

The leave granted Major Morse K. Taylor, Surg., is extended one month (S. O., Aug. 23, H. Q. A.)

A. A. Surg. C. L. G. Anderson will proceed to Whipple Barracks, Ariz., and report for assignment to duty (S. O., Aug. 23, H. Q. A.)

1st Lieut. Chas. M. Gandy, Asst. Surg., will, on the expiration of his present leave, be relieved from duty in the Dept. of the East, and will report to the Comdg. Gen., Dept. of Tex., for assignment to duty (S. O., Aug. 23. H. Q. A.)

A. A. Surg. Wm. Craig will proceed from Santa Fe, N. M., to Willcox, A. T. (S. O. 78, Aug. 16, D. Arizona.)

1st Lieut. Charles M. Gandy, Asst. Surg., Fort Brady, will stand relieved from duty in the Div. of the Atlantic, at the expiration of his present leave (S. O. 120, Aug. 26, Div. Atlantic).

1st Lieut. Henry S. T. Harris, Asst. Surg., recently appointed, will report to the Comdg. Gen., Dept. of Texas, for assignment to duty (S. O., Aug. 19, H. Q. A.)

Leave for twenty days is granted Surg. Basil Norris, Med. Director. During the absence of Surg. Norris, Surg. John W. Williams will take charge of the office of the Medical director (S. O. 137, Aug. 7, D. Columbia).

A. A. Surg. S. S. Turner will accompany the battalion of the 11th Inf. on change of station from Fort Buford to Fort Yates, D. T. (S. O. 81, Aug. 17, D. Dakota.)

A. A. Surg. David S. Snively is relieved from duty at Fort Sully, and will proceed to Fort Randall, D. T., and report for duty (S. O. 81, Aug. 17, D. Dakota).

Asst. Surg. J. E. Pilcher will accompany Troop M, 1st Cav., to the Yellowstone National Park (S. O. 79, Aug. 13, D. Dakota).

The C. O., Cantonment on the Uncompahgre, will send Hospital Matron Maggie O'Brien, pronounced insane, under escort of Hospital Steward Wm. Edwards, to Washington, D. C., with a view to admission to the Government Hospital for the insane (S. O. 89, Aug. 16, Dept. Mo.)

Hospital Steward Wm. F. Lamberton will proceed to Plattsburg Barracks, N. Y., and report for duty (S. O. 117, Aug. 23, Div. Atlantic).

Hospital Steward Wm. Bock is relieved from duty at Fort Klamath, Ore., and will proceed to Fort Bidwell, Cal., for duty (S. O. 65, Aug. 19, D. P.)

Hospital Steward Wm. Edwards having performed the duty assigned him, will proceed to Fort Columbus, N. Y. H., with permission to delay ten days en route (S. O., Aug. 24, H. Q. A.)

Engineers and Ordnance Departments.

S. O. 184, and S. O. 188, relating to Capt. Clinton B. Sears, C. E., are revoked (S. O., Aug. 24, H. Q. A.)

Major Wm. H. H. Benyaurd, C. E., will proceed to Peoria, Ill., and the lock site at La Grange, Ill., on duty connected with works under his charge (S. O. 117, Aug. 31, C. E.)

Lieut. Lansing H. Beach, C. E., will proceed to Grand Chain, Ohio River, on duty connected with works under his charge (S. O. 117, Aug. 21, C. E.)

Capt. Daniel W. Lockwood, C. E., will proceed to Frankfort Harbor, Mich., on duty connected with works under his charge (S. O. 118, Aug. 23, C. E.)

Lieut. Col. Walter McFarland, C. E., will proceed to Canarsie and Sheepshead bays, and Sumpawanus Inlet, N. Y., Woodbridge, Cheesequakes, and Mattawan creeks, N. J., on duty connected with works under his charge (S. O. 119, Aug. 25, C. E.)

Lieut. Col. Wm. P. Craighill, C. E., will proceed to Wilmington, N. C., Washington, D. C., Richmond, Va., and Norfolk, Va., on duty (S. O. 116, Aug. 20, C. E.)

Lieut. Col. John W. Barlow, C. E., will proceed to Frank's Ferry on the Caney Fork River, on duty connected with works under his charge (S. O. 116, Aug. 20, C. E.)

1st Lieut. Wm. M. Medcalfe, Ord. Dept., will proceed to Wilmington, Del., on public business connected with the manufacture of powder (S. O., Aug. 19, H. Q. A.)

Capt. Wm. S. Starring, Ord. Dept., is relieved from duty at the National Armory, and will report to the Comdg. Gen., Dept. of the Platte, for assignment to duty as chief ordnance officer and to the command of the Cheyenne ordnance depot (S. O., Aug. 19, H. Q. A.)

Capt. Frank Baker, O. D., will proceed to Wilmington, Del., for the purpose of inspecting powder being manufactured in that city for the Ord. Dept. (S. O., Aug. 24, H. Q. A.)

Chaplains.

Post Chaplain J. A. Potter will report to the Comdg. Gen., Dept. of Cal., for assignment to duty (S. O. 78, Aug. 16, D. Ariz.)

THE LINE.

The Stations of Companies not mentioned here will be found by reference to last number of the JOURNAL.

1st Cavalry, Colonel N. A. M. Dudley.

Hdqrs., B, D, E, G, K, and M, Ft. Custer, Mont.; A and C, Ft. Maginnis, Mont.; I, Ft. Leavenworth, Kas.; F, H, and L, Ft. Assinniboine, Mont.

1st Lieutenant Frank A. Edwards is granted one month's leave. (S. O., W. D., A. G. O., August 26.)

Troop M, Capt. Moses Harris, will proceed from Fort Custer, M. T., to the Yellowstone National Park, there take station, and perform the duties recently devolving upon the superintendent and his assistants (S. O. 79, Aug. 13, D. Dak.)

The Kansas City *Times* says: "Absalom Blakeburn, the old veteran who tried to poison himself Tuesday, is all right again. He had become downhearted, was discharged a few days ago from Capt. Carr's Troop I, 1st Cav., for disability, and was making arrangements to go to the Soldiers' Home. He had about $80 in money, of which he was robbed, and hence became despondent."

2nd Cavalry, Colonel Nelson B. Sweitzer.

Hdqrs., B, E, F, G, and I, Ft. Walla Walla, Wash. T.; A and K, Ft. McDowell, Ariz.; C, Ft. Bidwell, Cal.; D, Boise Barracks, Idaho; H, Ft. Spokane, Wash. T.; L, Ft. Coeur d'Alene, Idaho; M, Ft. Klamath, Ore.

Private F. B. Cornell, Troop C, has qualified as a sharpshooter.

3rd Cavalry, Colonel Albert G. Brackett.

Hdqrs., C, F, M, Ft. Davis, Tex.; A, Ft. Concho, Tex.; G, Camp at Eagle Pass, Tex.; B, Ft. Leavenworth, Kas.; E, Camp Rice, Tex.; L, Camp Pena Colorado, Tex.; D and H, Ft. Sill, Ind. T.; I and K, Ft. Elliott, Tex.

Official notification having been received of the promotion of 1st Lieut. Edgar Z. Steever, Troop M, to be Captain Troop G, vice Crawford, deceased, he will proceed to join his troop at Camp at Eagle Pass, Tex. (S. O. 106, Aug. 16, D. Tex.)

Official notification having been received of the promotion of the following officers, they will be taken up as of their present rank on the rolls of the troops to which promoted, viz.: 1st Lieut. James F. Simpson, Troop F, to be Captain Troop M, vice Monahan, retired; 2d Lieut. George H. Morgan, Troop M, to be 1st Lieutenant Troop F, vice Simpson, promoted; 2d Lieut. Joseph T. Dickman, Troop F, to be 1st Lieutenant Troop M, vice Steever, promoted (S. O. 106, Aug. 16, D Tex.)

Major Caleb H. Carlton is relieved from duty at Fort Davis and will proceed to Fort Elliott for duty (S. O. 126, Aug. 21, Div. M.)

4th Cavalry, Colonel William B. Royall.

Hdqrs., B, D, E, F, H, and K, Ft. Huachuca, Ariz.; A and M, Ft. Lowell, Ariz.; C, G, and I, Ft. Bowie, Ariz.; L, Ft. Leavenworth, Kas.

Leave for month is granted Capt. C. A. P. Hatfield (F. O. 80, Aug. 5, D. Ariz.)

The journeys from Huachuca Siding to Benson, A. T., and return, performed by Col. W. B. Royall, between March 17 and 22, 1885, were in obedience to summons as a witness before a G. C.-M. at Fort Grant (S. O. 78, Aug. 16, D. Ariz.)

1st Lieut. James B. Erwin is appointed Regimental Adjutant, to date from July 1 (Orders 23, July 1, 4th Cav.)

Col. W. B. Royall, having been authorized to leave the Dept. of Arizona on sick leave, Lieut.-Col. Geo. A. Forsyth assumes command of the regiment (Orders 26, July 31, 4th Cav.)

Q. M. Sergt. Frederick Roecker has been appointed sergeant-major, vice Seymour, appointed ordnance sergeant, and Private Joseph J. Hittinger, Troop K, has been appointed quartermaster sergeant, vice Roecker, promoted sergeant-major.

Gen. Forsyth has directed that the practice of publishing in troop orders the reduction, appointment, and promotion of non-commissioned officers subject to the approval of the regimental commander be discontinued, and that troop commanders desirous of having N. C. O.'s appointed or promoted, will make application, by letter, with their recommendation, whereupon the action of the regimental commander will be made known to them.

6th Cavalry, Colonel Eugene A. Carr.

Hdqrs., A, C, G, and L, Ft. Bayard, N. M.; K, Ft. Wingate, N. M.; B and F, Ft. Lewis, Colo.; D, E, and H, Ft. Stanton, N. M.; M, Ft. Leavenworth, Kas., I, Ft. Cummings, N. M.

Leave for one month is granted Major Emil Adam (S. O., Aug. 23, H. Q. A.)

7th Cavalry, Colonel James W. Forsyth.

Hdqrs. A, C, E, H, K, and M, Ft. Meade, Dak.; B and D, Ft. Yates, Dak.; F and L, Ft. Buford, Dak.; G, Ft. Keogh, Mont.; I, Ft. Totten, Dak.

1st Lieut. Luther R. Hare, Adjt., is detailed for duty on G. R. S. at Fort Meade, D. T., vice 1st Lieut. John W. Wilkinson, relieved (S. O. 79, Aug. 13, D. Dak.)

8th Cavalry, Colonel Elmer Otis.

Hdqrs., C, and H, San Antonio, Tex.; A, Ft. McIntosh, Tex.; I, Ft. Ringgold, Tex.; D, Camp Del Rio, Tex.; E, F, G, K, and L, Ft. Clark, Tex.; B and M, Ft. Brown, Tex.

Leave for one month, with permission to apply for an extension of one month, is granted 2d Lieut. M. F. Steele, Fort Clark, Tex. (S. O. 109, Aug. 18, D. Tex.)

The leave granted 2d Lieut. Edward C. Brooks is extended to Sept. 30, 1886 (S. O., Aug. 25, H. Q. A.)

10th Cavalry, Colonel Benjamin H. Grierson.

Hdqrs., D, E, K, and L, Ft. Grant, A. T.; B, Whipple Bks., A. T.; A and H, Ft. Apache, A. T.; I and M, Ft. Verde, A. T.; C, F, and G, Ft. Thomas, A. T.

The leave granted 2d Lieut. Seward Mott is extended one month (S. O., Aug. 24, H. Q. A.)

Before a G. C.-M. which convened at Fort Grant, A. T., of which Col. W. R. Shafter, 1st Inf., was president, was tried Capt. Alexander S. B. Keyes, 10th Cav. Charge I.—"Drunk on duty." Three specifications, alleging drunkenness on duty while in command of troops in the field operating against hostile Indians, Dec. 15, 1885, and April 27 and 28, 1886. Charge II.—"Neglect of duty." Spec. 1—"In that he, being on duty in command of his troop at Rice's Ranch, Ariz., and having received an order from his C. O., Col. W. B. Royall, 4th Cav., to proceed at once, or at daylight, towards a point indicated and look out for the trail of the hostiles, and if the trail is found pursue vigorously, did proceed with his troop to Washington Camp, Ariz., near the place in which killing by hostile Indians was said to have taken place, and remain there in a drunken condition from about 10 o'clock A. M. until about 3 o'clock P. M., and did fail, during said time, to pursue the Indians or to look for the trail." Spec. 2—"In that he, having proceeded with his troop to Washington Camp, A. T., was in an intoxicated condition on the bed of one H. D. Stevens, a citizen, at Washington Camp, April 27, 1886, and when told by an enlisted man of his command that there were official despatches for him at Crittenden, A. T., did say 'God damn the despatches; let them wait,' or words to that effect, and did refuse to take notice of said despatches, and did fail to send for said despatches, notwithstanding the fact that there was reason to believe that said despatches contained important instructions in regard to the pursuit of said hostile Indians." Plea—"Not guilty." Findings—"Not guilty," and "the court does therefore acquit him." The proceedings, findings, and acquittal in the case of Capt. Alexander S. B. Keyes, 10th Cav., are approved.

By command of Brigadier-General Miles:
M. BARBER, Asst. Adjt.-Gen.

(G. C.-M. O. 30, D. Ariz., 1886.)

1st Artillery, Colonel John C. Tidball.

Hdqrs., A, H, and K,* Presidio, San Francisco, Cal.; B and C, Ft. Winfield Scott, Cal.; D and I, Alcatraz Island, Cal.; E,* Vancouver Bks., W. T.; F and L, Ft. Canby, W. T.; G, Ft. Monroe, Va.; M, Ft. Mason, Cal.

* Light battery.

The leave for seven days granted Capt. Franck E. Taylor, Vancouver Barracks, is extended ten days (S. O. 139, Aug. 11, D. Columbia.)

The following are appointed recruiting officers: 1st Lieut. Frank S. Rice at Fort Mason, Cal., and 1st Lieut. Henry M. Andrews at Alcatraz Island (S. O. 70, Aug. 11, D. Cal.)

2d Lieut. George W. Van Deusen will report to the C. O. Fort McDermit, Nev., for Gar. C.-M. duty (S. O. 70, Aug. 11, D. Cal.)

1st Lieut. Frederick C. Nichols is detailed as recruiting officer at the Presidio of San Francisco, vice 1st Lieut. Henry L. Harris, relieved (S. O. 72, Aug. 16, D. Cal.)

1st Lieut. Henry L. Harris is relieved from special duty in the Engineer Office at Div. Hdqrs., and will report to the C. O. Fort Winfield Scott for temporary duty with Bat. B (S. O. 65, Aug. 16, Div. P.)

Leave for twenty days is granted Major Royal T. Frank, Fort Monroe, Va. (S. O. 115, Aug. 20, Div. A.)

The leave granted 1st Lieut. Albert Todd, Fort Monroe, Va., is extended four days (S. O. 116, Aug. 21, Div. A.)

Dennis Driscoll, of Bat. D, sustained severe injuries at Alcatraz Saturday. He was wiping one of the guns and when the salute was being fired upon the arrival of the steamer *Aurora*, Driscoll, thinking his gun had been fired, advanced to sponge it out, when his right arm and hand were caught by the discharge, which was just being fired. Both were badly mangled and the hand was blown into pieces.

Sergt. Alfred Freeland, Light Bat. K, has, for drunkenness, etc., been reduced to the ranks.

2nd Artillery, Colonel Romeyn B. Ayres.

Hdqrs., G, and L, St. Francis Bks., Fla.; A* and E, Little Rock Bks., Ark.; B and H, Atlanta, Ga.; C and D, Mount Vernon Bks., Ala.; F,* Ft. Leavenworth, Kas., K, Ft. Monroe, Va.; I and M, Jackson Bks., La.

Lancaster, 3d Art., will convene at San Antonio, Aug. 23, to make a report upon damage caused to the public buildings at Dept. Hdqrs., at the San Antonio Depot, and at the post of San Antonio, by the tornado of Aug. 22 (S. O. 111, Aug. 23, D. Tex.)

DEPARTMENT NEWS.

Division of the Pacific—Maj.-Gen. O. O. Howard.

At the Presidio, August 12, another test was made of Lieut. Graydon's dynamite shell. The firing took place from an 8-in. gun on the lower tier of the fort. The affair was in every way successful, and it was fully demonstrated that dynamite can be fired with security. The test was made both with a time fuse and with concussion. Lieut. Graydon will leave shortly for Europe, where he intends to introduce his invention.

Dept. of the Platte—Brig. Gen. George Crook.

The *Herald* says: "The allotments made for repairs of post barracks are: For Fort Omaha, $2,200; Fort Sidney, $1,200; Fort Robinson, $1,800; Fort Niobrara, nothing. This aggregates only one-quarter of the amount urged by Senator Manderson, and is very far from a liberal share of the $620,000 appropriated by Congress for the repairs of Army posts."

Dept. of Arizona.—Brig.-Gen. N. A. Miles.

A despatch from Nogales, of Aug. 21, conveyed the welcome intelligence to the East that while negotiations were pending between the Mexican authorities and Geronimo, near Arispe, the Mexicans quietly surrounded the Indians, and had them where there was no possibility of escape. Geronimo was notified that the only terms were an unconditional surrender.

Closely on the heels of this came a despatch giving the following particulars of the situation and alas, of Geronimo's escape: "Geronimo and 23 bucks came into Cuchuta Ranch. Six bucks came forward with a white flag to five Mexicans, and stated their desire to make peace with the Mexicans and raid into Arizona and New Mexico. A couple of days afterward Captain McDonald and two companies of U. S. troops arrived from Rucker by forced marches, with a view of surprising the Indians. They, however, had become aware of the movement and slipped away several hours before the arrival of the troops, in two bands, one, of ten, coming north, and the other, of 13, going east. This shows how extremely difficult it is to surprise the Apaches, who are as alert as weasels. Part of Captain Lawton's command came in while the informant was at the ranch. Some of the men were wounded. Captain Lawton, who is uninjured, was expected daily. Gen. Forsyth, who went down from Huachuca, is on his way back."

Gen. Miles, Aug. 24, telegraphed to Washington as follows, from Huachuca: "Lieut.-Col. Forsyth returned yesterday from Fronteras. He reports that hostiles are in the mountains some distance from Fronteras; that the Mexican authorities were to answer Geronimo's overtures yesterday; that the Indians were apprehensive of trickery on the part of the Mexicans. I am informed by Governor Torres that he has directed his officials to offer only terms of unconditional surrender, the same as our officers require. All report the Indians worn down and tired. Capt. Lawton's command is in good condition, and he believes he can kill, capture or force the Indians to surrender, and I have every confidence in his ability and untiring energy. Should he force them near our line our troops will assist him."

Gov. Zulick had a long interview with the Secretary of the Interior in regard to the removal of the Warm Spring and Chiricahua band of Apaches from Arizona, which is being strongly urged. He said these Indians had defied every attempt to civilize them, and the humane policy of the Government in supplying the Chiricahuas with the richest lands within the Territory, clothing and feeding them, has been repaid by treachery and bloodshed. The reservation of San Carlos stands as a door opening through mountain ranges, every foot of which has been known to these Indians and their ancestors for centuries to the Sierra Madre range, whose almost inaccessible fastnesses present for them a home of perfect security.

A despatch of Aug. 26 says: During the expedition of General Forsyth into Sonora after Geronimo his force made an extraordinary march. After leaving Huachuca on the 18th the column was on Friday, the 20th, 101 miles distant, with 100 fighting men, consisting of troops A and D, 4th Cavalry. Geronimo is badly used up, with an arm broken and nearly blind from wounds received in the fight with Captain Hatfield. Both he and his men are said to be very anxious to make terms, and army officers who know what is transpiring say very important news may be expected within forty-eight hours.

RIFLE COMPETITIONS, 1886.

LAST week we closed our report Aug. 21, and continue the data up to Aug. 28, including orders issued:

Division of the Atlantic.—Fort Niagara presented a busy scene this week, and its hospitality and accommodations were well taxed to make the visiting riflemen comfortable. Gen. Penrose, post commander, and his staff, Capt. Brown, Range Officer; Lieut. Allen, Inspector of Rifle Practice and Supervisor of the competitors were active and energetic in their efforts, and good results are anticipated.

2d Lieut. Albert C. Blunt will proceed to Fort Niagara, N. Y., and report for duty on range during the rifle competitions. (S. O. 120, Div. A., Aug. 26.)

1st Lieut. Asher C. Taylor, 2d Art., and Sergt. John Nibill, Bat. B, 5th Art., members of the "class of distinguished marksmen," will proceed to Fort Niagara, N. Y., with a view to compete for selection as members of the Army team (S. O. 116, Div. A., Aug. 21.)

The C. O. Madison Barracks, N. Y., will select four enlisted men, one a non-commissioned officer, one competent for clerical duty and two with experience in cooking, and send them to Fort Niagara, N. Y., for temporary duty (S. O. 117, Div. A., Aug. 23.)

The officers of the rifle camp are: 2d Lieut. Samuel E. Allen, 5th Art., Inspector of Rifle Practice, in charge of competitions; 1st Lieut. Geo. P. Scriven, 3d Art., Financial Officer; 2d Lieut. Albert C. Blunt, 5th Art., Statistical Officer; 1st Lieut. S. Allen Dyer, 2d Lieuts. Charles W. Abbot, Jr., Clarence R. Edwards, Edwin B. Babbitt, John D. Barrette, and Daniel B. Devore, range officers. The competing officers are: Capts. William P. Vose, James B. Burbank, George G. Greenough and Joseph T. Haskell; 1st Lieuts. Frederick A. Smith, Wallis O. Clark and Edward T. Brown; 2d Lieuts. Charles G. Treat and Beverly W. Dunn.

1st Lieut. Edward T. Brown and 2d Lieut. C. G. Treat, having been selected to compete for places on the Division rifle team, will proceed to Fort Niagara, N. Y. (S. O. 118, Div. A., Aug. 24.)

2d Lieut. Samuel E. Allen, 5th Art., Inspector of Rifle Practice, will proceed to Fort Niagara, N. Y., and take charge of the rifle competitions of 1886 (S. O. 119, Div. A., Aug. 25.)

Department of the Columbia.—2d Lieut. Stephen J. Mulhall, 14th Inf., Vancouver Barracks, is selected to compete for a place on the Dept. rifle team. (S. O. 138, D. Columbia, Aug. 9.)

The competitions have closed and the team has gone to the Presidio of San Francisco.

Department of Dakota.—1st Lieut. Jacob G. Galbraith, 1st Cav., is selected as a competitor for a place on the Department rifle team, and will report August 21 to 1st Lieut. Robert F. Bates, A. D. C., Inspector of Rifle Practice. (S. O. 81, D. Dakota, August 17.)

So much of S. O. 71, as directs 2d Lieut. Daniel L. Tate, 1st Cav., to report to the Inspector of Rifle Practice, for duty in connection with Dept. Rifle Competition, is revoked. (S. O. 79, D. Dakota, August 13.)

So much of S. O. 75, c. s., as directs Capt. Melville C. Wilkinson, 3d Inf., and 2d Lieut. Willard A. Holbrook, 1st Cav., to report to the Inspector of Rifle

Practice, as competitors for places on the Dept. Rifle Team, is revoked. (S. O. 79, D. Dakota, Aug. 13.)

Capt. Edwin J. Stivers, 25th Inf., is selected as a competitor for a place on the Dept. Rifle Team, and will report to 1st Lieut. Robert F. Bates, Inspector of Rifle Practice. (S. O. 80, D. Dakota, Aug. 16.)

The following officers will report, Aug. 19, to the Inspector of Rifle Practice, for duty in connection with the Dept. Rifle Competition: Capt. David B. Wilson and 1st Lieut. Edwin F. Glenn, 25th Inf. 2d Lieut. Godfrey H. Macdonald, 1st Cav., Fort Maginnis, M. T., will report, Aug. 21, for duty in connection with Dept. Rifle Competition. (S. O. 80, D. Dakota, Aug. 16.)

The competitions commenced, as per programme, August 21 amid great enthusiasm. The composition of the camp is as follows: Officer in charge—Lieut. R. F. Bates, Inspector of Rifle Practice: Range officers—Captain Geo. D. Wallace, 7th Cav.; Capt. D. B. Wilson, 25th Inf.; Lieut. D. D. Mitchell, 15th Inf.; Lieut. J. M. T. Partello, 5th Inf.; Lieut. E. F. Glenn, 25th Inf.; Lieut. W. H. Sage, 5th Inf.; Lieut. G. H. MacDonald, 1st Cav. The statistical officers are Lieuts. H. D. Reed, 25th Inf., and J. F. Morrison, 20th Inf. Captain Gaines Lawson, of the 25th Inf., is the commandant of the camp, and exercises general supervision over the men when they are not on the rifle range.

Department of California.—The competitions have closed and all are looking ahead to the Division of the Pacific contests, which commence next week, Sept. 1. The Department competitions were in charge of Capt. W. N. Tisdall, 1st Inf.

1st Lieut. Clermont L. Best, Jr., R. Q. M., 1st Art., is announced as a contestant for a place in the Dept. rifle team. (S. O. 72, D. Cal., Aug. 16.)

Capt. Wm. N. Tisdall, 1st Inf., is designated to take charge of the preliminary practice and competition for places on the Dept. rifle team vice 1st Lt. Thomas L. Casey, Jr., Corps of Engineers, relieved. (S. O. 71, D. Cal., Aug. 13.)

2d Lieut. Samuel D. Sturgis, Jr., 1st Art., is detailed as range officer vice 1st Lieut. Frank S. Rice, 1st Art., relieved. (S. O. 71, D. Cal., Aug. 13.)

Department of Texas.—The team has gone to Fort Leavenworth to engage in the Division of the Missouri competitions, to commence Sept. 13. Our account closes with the aggregate of the results of the three days preliminary practice, August 19, 20 and 21 (two days known distances, one day skirmish): Sergt. Fink, 19th Inf., 423; Sergt. Crawford, 19th Inf., 422; Sergt. Green, 8th Cav., 420; Capt. Witherell, 19th Inf., 417; Sergt. Morgan, 19th Inf., 410; Corporal Gormley, 8th Cav., 404; Corpl. Tomey, 3d Cav., 404; Sergt. Garlinghouse, 8th Cav., 404; Pvt. Forsyth, 19th Inf., 399; Corpl. Schmitt, 19th Inf., 398; Lieut. Buck, 16th Inf., 397; Pvt. Taliafero, 3d Cav., 388; Sergt. Nilsson, 16th Inf., 385; Sergt. Sandford, 3d Cav., 382. The prize of the Brackett business men—a beautiful gold medal made by Pedersen, of N. Y.—was won by Sergt. Fink, Co. H, 19th Inf. Aggregate score, 40 shots, skirmish, 1st day, 28; three days, 200, 300, 500 and 600 yards, 423.

Department of Arizona.—The competitions having closed this week the team has gone to the Presidio of San Francisco for the Division competitions which commence Sept. 1.

The team is as follows:

	Total score.
1st Sergt. Ryan, 8th Inf	458
Lieut. W. A. Mercer, 8th Inf.	458
Corpl. Saladin, 8th Inf	453
Lieut. Ord, 22d Inf	453
Pvt. Streuer, 13th Inf	452
Sergt. Simon, 4th Cav	445
Corpl. Robinson, 9th Inf	444
Pvt. De Leal, 22d Inf	442
Capt. Auman, 13th Inf	439
Sergt. Pendergrass, 10th Cav	438
Sergt. Gifford, 10th Inf	435
Musician Temple, 9th Inf	431
Corpl. Harney, 13th Inf	431
Sergt. Morrison, 6th Cav	428

The medal was awarded to Sergt. Ryan. Corpl. Robinson won the skirmish medal with scores of 92 and 60—152.

Department of the Missouri.—The competitions closed this week and were most successful. At the first day's preliminary competition Private Michael, Troop I, 4th Cav., led the way. Lieut. Foster, 5th Cav., was second, and is liable to be heard from before the contest ends. The camp is located near the range in a splendid grove of young trees just south of the range building and only a step to the range.

Department of the Platte.—The competitions have closed at Bellevue and the team gone to Fort Leavenworth. The three days' preliminary practice ended Monday, August 23, with the following men on team of 12 for this firing, viz.:

	Fixed dist. score.	Skir. score.	Tot.
1. Sgt. Stevens, 7th Inf	321	174	495
2. Lieut. Terrey, 5th Inf	325	154	479
3. Sgt. Reilley, 5th Inf	331	144	475
4. Capt. Kelly, 5th Inf	309	158	467
5. Sgt. Holen, 7th Inf	320	136	456
6. Pvt. McKenzie, 17th Inf	318	137	455
7. Pvt. Stone, 7th Inf	315	127	442
8. Lieut. Garrard, 9th Cav	327	115	442
9. Pvt. Hoffman, 21st Inf	298	143	441
10. Lieut. Barbour, 7th Inf	309	119	428
11. Pvt. Ruse, 17th Int	293	134	427
12. Capt. Dietz	332	90	422

A correspondent writes: Tuesday work will begin in earnest. Everyone is delighted with the beauty of the range and its many conveniences. Everything moves like clockwork. The officers' and men's messes, notwithstanding the latter have no commutation, is very good. The dollar brought by each man provides sufficient vegetables, in addition to the regular ration.

FORT McDOWELL, A. T.

A CORRESPONDENT of the Phœnix *Herald* writes: Last week Col. and Mrs. Bryant entertained their garrison friends with a dinner. These guests were Major, Mrs. and Miss Edith Burt, Lieut., Mrs. and Mr. John O'Connell, Dr. Crosby, Mr. and Mrs. Wilcox, George and Miss Julia Wilcox and Mrs. Prescott.

The menu was excellent, in fact a very serious undertaking for an interior post in Arizona.

The guests were seated at 7.30 P. M. and the *cafe noir* was drunk about 10 o'clock, after which there was an adjournment to the parlor and veranda to listen to some delightful music, both vocal and piano. Mrs. Bryant sang several selections cleverly, and Mrs. O'Connell gave a brilliant piano recital.

It will hardly be believed, but it is the cold, frozen truth that, notwithstanding the balmy Arizonian atmospheric effects, certain of the officers proposed—a waltz. To which several ladies—not all at once, whispered, "Yes." This in dress coats, buttoned to the chin! The thermometer danced to about 104 an undress performance only equalled by an hour glass (a bit of mantel bric-a-brac) on this occasion sweating sand.

The dancers survived to join in a number of jolly college songs and choruses, which just preceded the break ranks for home and *parade de chambre au porchautiere a la Arizonee*, except the bolder spirits who nightly pitch their cots under the moonbeams' shadows, which don't shade to any degree.

THE MILITARY ACADEMY.

WEST POINT, N. Y., Aug. 25, 1886.

THE last days of the camp of '86 are rapidly drawing to a close. The harvest moon, which for many nights has shone on mountain and river, changing with its mellow light our ivy-covered buildings into weird and picturesque old abbeys, has passed away, leaving with the cadet many tender recollections of the dear and old traditional stroll under its gentle rays.

The plebes, numbering 44, including seven alternates, are to report on Friday; on Saturday morning the furlough class will return; on Saturday evening the last hop will take place in the mess hall; on Monday next camp will be broken, and one week from to-day the annual section room work is to begin.

Prominent visitors to the Point this week are Dr. Head, U. S. A., retired; Colonel Craighill, Engineer Corps, and two daughters; Captain Palfrey, of the Engineers; Major Overman, of the Engineers, and wife, who are at Cranston's; Lieutenant Benjamin Alvord, 20th Inf., and bride; Colonel Mizner, 8th Cav., and wife, and Lieut. Pitcher, 1st Cav.

Lieut. Edward Burr, Engineer Corps, and bride, are guests of Captain and Mrs. Price.

John D. Wilkins, Brevet 2d Lieut. 4th Infantry, was registered at the hotel last week. The veteran colonel has evidently turned back the hand of time and is starting life anew, as he did forty-one years ago.

On Tuesday afternoon Mrs. Merritt gave a lawn party to a number of ladies and cadets of the First Class. The handsome grounds surrounding the Superintendent's quarters presented a very picturesque appearance.

Fort Clinton, which has witnessed many sanguinary encounters at which the personal differences of cadets were adjusted, was to-day taken possession of by the young ladies at Cranston's, who invited their cadet friends to a picnic. As the "friends" included about all the members of the First and Third Classes, the old fort presented a very animated appearance between one and three o'clock, the mess hall at dinner containing only the plebes and a disconsolate few whom duty kept away from the feast. One incident of the picnic was the stirring up a hornet's nest, which tended to enliven the party.

—

The following designations of candidates for admission to the U. S. Military Academy were announced this week: Levi Pownall Webb, Unionville, Pa.; John Noble Guss (alt.), West Chester, Pa.; Leroy S. Lyon, Richmond, Va.; Wm. D. Moore, Connellsville, Pa.; Mosheim S. Waters (alt.), Uniontown, Pa.; George G. Gatley, Portland, Me.; Frank S. Long, Norwich, Conn.; Lewis C. Lawton (alt.), Brooklyn, Conn.; T. G. Settle, Gainsboro, Tenn.; Harry Alex. Smith, Atchison, Kan.; Powell Conrad, Fountleroy, Staunton, Va.; Claude B. Sweezy, Penfield, Kan.

(Correspondence of the Army and Navy Journal.)

FORT D. A. RUSSELL, WYO.

AUGUST 15, 1886.

A DETACHMENT commanded by 1st Lt. E. W. Howe, left here Aug. 6 for Fort Fred. Steele, to take charge temporarily of that post, now abandoned.

The rooms of the 17th Infantry club were thrown open Aug. 7 for the use of the enlisted men. Beer, wines, cigars, and tobacco, are sold at just about wholesale prices, on promissory notes or for cash. The profits will be divided among the companies. Two billiard tables are coming from Chicago. The club promises to be a great success under the excellent management of Captain W. M. Van Horne.

Lieut.-Colonel T. M. Anderson, 9th Infantry, leaves Aug. 18 for Philadelphia. He was mustered in as a comrade of J. F. Reynolds Post G, A. R., at a meeting held at Cheyenne August 7.

During the late illness of 1st Lieut. P. and R. Adjt. W. A. Mann, 1st Lieut. P. and R. Q. M. D. H. Brush, attended to the Adjutant's office. 2d Lieut. J. T. Kerr, the excellent marksman, 17th Infantry, of Fort Bridger, paid a short visit here, while en route to the Omaha target grounds.

The first concert and ball was held Aug. 11. For the occasion the post hall was nicely decorated and illuminated.

Target practice will commence on Monday next.

We all think here very highly of Post Chaplain Brady, an amiable old gentleman who so wholly fulfils the duties of his position. Long may he live. P.

(Correspondence of the Army and Navy Journal.)

ALBUQUERQUE, N. M.

AUGUST 12.

THERE is no truth in the report that General Miles is to establish the permanent headquarters of the Department of Arizona here, but his purpose in setting apart a military reservation at Albuquerque recently was to establish a supply depot. That, as you know, has been "knocked in the head" by orders from Washington, and General Miles has revoked his G. O. 16, of 1886. I fancy that Secretary Endicott and Lieut. General Sheridan are inclined to Santa Fe as the place for permanent headquarters, as that would be in harmony with the administrative desire to economize in every way during their present term, and prevent expenditures of large sums where the same result can be obtained without much additional cost. Why they should spend $200,000 or $300,000 in new buildings here, is a mystery to many, and it is not believed any change will be made: at least, not until Congress again meets, when kindred matters can receive full discussion and action at the same time. Albuquerque has an attraction certainly on its railroad bearing, but is not, I think, as desirable as Santa Fe. It is oppressively warm and sultry, and almost as remote for reaching the mountain passes as old Santa Fe. However, if the pressure has any weight in Washington I suppose a great deal will be accomplished for it by and by. R.

(Correspondence of the Army and Navy Journal.)

FORT VERDE, A. T.

"AND now comes the hour of parting." Thus I soliloquized when the orderly trumpeter handed me a telegram on a hot afternoon in July while I was engaged in coaching a few of the immortals on the target range at Fort D. A. Russell. "The 9th Infantry is ordered to Arizona, movement to begin not later than the 20th inst.." thus it ran. I looked toward the Medicine Bow, decked with its coronal of everlasting snow, and, turning, surveyed the roofs and church towers of Cheyenne, all dancing in the mirage, and thought to myself there be worse places than the Magic City and the old 9th is going there, more's the pity. So home and to pack *lares et penates* and *impedimenta* for the route.

Promptly, on July 20, at the hour ordered, eight companies headed by the band, fell into line in heavy marching order, with every man in his place, wide awake, and duly sober. We marched out of garrison to the inspiring quickstep of the "Girl I Left Behind Me," our comrades of the 17th Infantry bidding us Godspeed. Some eyes, albeit unused to the melting mood, were suffused with natural moisture, as the two big trains, with the whole regiment aboard, pulled out toward the West from Cheyenne, with whose purlieus some of us had been acquainted for over 17 long years. During that time the hamlet had grown to a town and the town to a city, adorned with private residences that might lend an added grace to Euclid avenue in the Forest City. Some of us, yet not all; others of the regiment had, during this period, wandered far afield, from the northern borders of Montana, to the North Park in Colorado, with Crook in his campaigns against the Sioux and the Utes, and the Southern Cheyennes, and with Howard and Miles in Kansas and Utah, ever obedient and loyal; *semper paratus.*

Some of the officers, and not a few of the rank and file, had formed associations in Omaha, (ever ready to welcome the 9th Nebraska) in Cheyenne, and far away Buffalo Town at the toothills of the Big Horn Mountains, which only death could sever; and so the hour of parting came and went.

On account of washouts on the Atchison, Topeka and Santa Fe, some of us were detained six days and nights on the cars. At La Pueblo we halted two days and nights and although the men had a free run through the town we do not lose a man, which speaks well for the discipline of the regiment.

At Holbrook, Arizona, we dropped two companies ordered to garrison Fort Apache. At Wingate we parted with four more companies destined to service in New Mexico. At Albuquerque we bade good bye to two more which were ordered to Fort Thomas, while "Old F" and the "Katbinds" continued on to Ash Fork, the former going with Regimental Headquarters to Whipple Barracks, and the latter to Fort Verde, an oasis in the desert, where they now are.

During the march hither, the heat was intense, although not a tent was pitched en route. The men spread their canvas on the broad terrace and slept soundly under the canopy lighted by the stars. We marched thro' Hell Canyon, Lonesome Valley, and Copper Canyon, the latter road having been selected in recent years for Grief Hill, which describes in about five miles a descent of 2,500 feet in altitude. During the last day's march the road swarmed with covies of quail, and was bordered on either side with sycamore and walnut trees, and wild grape vines, nourished by perennial springs of ice cold water. The cuttings on the declivity were from 5 to 20 ft. thick, and the road reminded one of the passages across the Alps. This labor was done, and all the expense involved was borne by the people of the county which is sparsely settled. Who will say that the Arizonians are not enterprising? The road bed is paved with lava and scoriæ—the whole face of the country shows remote volcanic action of the most violent character, and the surface across valley and over mesa, is hot by day and night as though warmed by subterranean fires.

Ice is a remembrance of the past; to some of us of Clear Fork Canyon and Bridger, and to others of Sidney and Washakie; but we have melons in abundance of the most delicious flavor. It is a matter of wonder how the slender vines can extract so much fluid from the arid soil. We use the olla, the same earthen jar for cooling water which was manufactured by the Aztecs in the time of Cortez, 300 years ago. After a few days' experience we have concluded that ice water is a luxury and not a necessity.

Hard by this place are some celebrated ruins abandoned long since by the cliff and cave dwellers. Your correspondent may, if he musters sufficient energy, visit them and recount what he learns thereanent. CARTOUCHE.

COURT-MARTIAL CASES.

1st Sergt. J. P. Stewart, Co. B, 15th Infantry, recently tried at Fort Pembina for theft of company rations, Q. M. stores, company funds, etc., was found guilty and sentenced to dishonorable discharge and confinement at hard labor for two years. General Ruger, in reviewing the case, says: "The proceedings are approved. The Department Commander after a careful study of all the evidence in the case has been unable to concur in the conclusions of the court and determine that there was no room for a reasonable doubt as to the prisoner's guilt. His previous excellent record of long and faithful service should be of some value to him, and weight is given to it in his behalf. The record indicates that a loose method of dealing with the company savings prevailed in the company, and it seems a fair inference that it had its effect upon him, particularly as, in some instances, he was permitted to make sales without specific authority, and instructed to defer until further orders the making entry of a transaction involving the expenditure of nine dollars derived from company savings. It is not clearly established, however, that he was dishonest for gain. The findings and sentence are therefore disapproved. 1st Sergt. Stewart will be released from arrest and restored to duty." (G. C.-M. O. 30, D. Dakota, 1886.)

In the case of a private tried at Fort Buford for disobedience of orders, General Ruger says: "The following record appears in the second day's proceedings: 'Captain James A. Finley, Assistant Surgeon, U. S. A., being notified by the Judge-Advocate that the court would meet at 11 o'clock, did reply that he would not be able to attend for half an hour until his duties as post surgeon were completed. The time set for the court to meet having passed some few minutes the president of the court sent word to the absent member that the duties of the court would have to be attended to before other duties, to which he replied that the duties of the post surgeon would have to be attended to first.' It also appears that this officer subsequently appeared in court during the progress of the trial, and was excused by the court from serving as a member in the pending trial for the reason that he had not been present during the first day's proceedings. No request was made by him, nor was the prisoner asked if he had objection to his sitting as a member. But one witness had been examined on the previous day, and unless the prisoner had objection to make, the officer excused should have been sworn as a member of the court, having the testimony already given read over to him. Touching the assumption of this officer that he could decide for himself what duties he should first attend to, it is remarked that the exercise of such a power does not fall within the province of a member of a Court-martial. His appointment as such member imposes upon him as a paramount duty a strict observance of the hours of a court's session. If a medical officer is prevented from attendance by an emergency requiring the immediate exercise of his professional skill, he should report such fact to the president of the court, for the information of the reviewing authority. Attending to routine duties cannot be accepted as a legitimate excuse. In the case under consideration no excuse was offered; merely a reason stated why the member failed to appear in court. That reason, so far as it appears of record, was insufficient."

Military Order of the Loyal Legion.

A meeting of the Michigan Commandery will be held at Detroit Sept. 1, when several candidates will be balloted for. Major Chandler, the recorder, has established his office at Nos. 2 and 3 Merrill Block.

THE NAVY.

NAVAL VESSELS IN COMMISSION.

WHEN AND WHERE LAST HEARD FROM.

N. Atlantic Station—Rear Admiral S. B. Luce.

GALENA, 3d rate, 8 guns, Comdr. Colby M. Chester. Sailed from Portland, Me., Aug. 21, on short cruise. Arrived at Newport, R. I., Aug. 26.

SWATARA, 3d rate, 8 guns, Comdr. E. T. Woodward. Sailed from Portland, Me., Aug. 21, on a short cruise. Address, Newport, R. I.

TENNESSEE, 1st rate, 22 guns (f. s. n. a. s), Capt. Robert Boyd. Sailed from Portland, Me., Aug. 21, on a short cruise. Address, Greenport, L. I.

YANTIC, 3d rate, 4 guns, Comdr. Francis M. Green. Sailed from Portland, Me., Aug. 21, on a cruise. Address, Greenport, L. I.

The *Yantic* arrived at Picton, N. S., Aug. 13, for coal, after a cruise of ten days in the gulf of St. Lawrence. She visited the mackerel fleet, but no vessels in distress were met or heard of. The mackerel were found mostly off shore, so that the question of three mile limit did not arise. The masters of the mackerel schooners had fairly good luck, and the officers of the domestic cruisers were not wanting in civility to them.

S. Atlantic Station—Captain E. E. Potter (in command temporarily).

Acting Rear Admiral D. L. Braine will shortly command this station.

Mails should be addressed to care of U. S. Consul, Rio de Janeiro, Brazil, unless otherwise noted, or care of B. F. Stevens, 4 Trafalgar Square, London.

ALLIANCE, 3d rate, 6 guns, Comdr. Charles McGregor. At the New York Navy-yard. She will shortly be ordered to join the South Atlantic Station.

LANCASTER, 2d rate, 10 guns, (f. s. a. s.) Capt. S. L. Breese (ordered). Arrived at Rio de Janeiro, Aug. 12. All well.

TALLAPOOSA, 4th rate, 13 guns, Comdr. William Whitehead. Arrived at Rio de Janeiro Aug. 14.

European Station—R.-Adml. Sam. R. Franklin.

Mails should be addressed to care B. F. Stevens, 4 Trafalgar Square, London, England, unless otherwise noted.

PENSACOLA, 2d rate, 16 guns(f. s. e. s.), Captain George Dewey. At Phalerum Bay, near Athens, Greece, July 20. Was to proceed to Leghorn, touching at Zante and Messina en route.

KEARSARGE, 3d rate, 7 guns, Comdr. Charles D. Sigsbee. Was to remain in Phalerum Bay, near Athens, Greece, until about Aug. 1. Has been ordered to return to U. S.)

QUINNEBAUG, 3d rate, 8 guns, Comd. Geo. W. Coffin. At Southampton, England, August 11, 1886. Will leave the English channel by the middle of August or September for Genoa, touching on the Spanish coast and at Marseilles. Will be sent to the East for the winter, if no other vessel joins the squadron.

Pacific Station—Rear-Adm. E. Y. McCauley.

Mails, unless otherwise noted, should be addressed to care U. S. Consul, Panama, U. S. C.

ADAMS, 3d rate, 6 guns, Comdr. Louis Kempff. Left Callao, Peru, June 20, for Coquimbo. Was at Iquique, July 31.

HARTFORD, 2d rate, 16 guns (f. s. p. s.), Capt. J. H. Gillis. Was at Callao July 31.

JUNIATA, 3d rate, 8 guns, Comdr. G. T. Davis. Sailed from New York, Aug. 16, for Pacific Station. The following is a list of her officers: Commander Geo. T. Davis; Lieut. Commander Wm. T. Burwell; Lieuts. N. H. Barnes, Wm. M. Wood, and A. C. Baker; Lieut. (junior grade) N. R. Usher; Ensigns T. S. Rodgers, Harry George and F. L. Chapin; Naval Cadets W. A. Edgar, W. H. Foust, E. V. D. Johnson, G. F. Hawk, and J. G. Berry; Surgeon R. A. Marmion; Asst. Surg. F. N. Ogden; Paymaster Jno. F. Tarbell; Chief Engr. Geo. P. Hunt; P. A. Engr. J. P. S. Lawrance; Asst. Engr. W. C. Herbert; Cadet Engr. Albert Maritz; 1st Lieut. U. S. M. C. S. W. Quackenbush, and Pay Clerk Geo. H. Vernon.

IROQUOIS, 3d rate, 7 guns, Comdr. Yates Stirling. At Callao July 31. Commander J. C. Watson has been ordered to command, and leaves New York per steamer of about Sept. 1.

MONONGAHELA, 2d rate, 9 guns, Lieut. Comdr. George B. Livingston in command. Used as a storeship at Coquimbo, Chili.

MOHICAN, 3d rate, 8 guns, Commander Benjamin F. Day. Reported by cable from Melbourne, Aug. 20, to have sailed for Samoan Islands, to remain there during the session of Commission on Samoan affairs.

PINTA, 4th rate, screw, 2 guns, Lieut. Comdr. Henry E. Nichols. Address care of Navy Pay Agent, San Francisco, Cal. At Juneau, Alaska, June 8. Was to go to Sitka about the middle of July for supplies.

SHENANDOAH, 2d rate, 9 guns, Captain Byron Wilson. At Callao, Peru, July 31. Has been ordered to proceed to San Francisco for repairs, touching en route at South and Central American ports.

VANDALIA, 2d rate, 8 guns, Captain Henry L. Howison. Sailed from New York, Aug. 14, for the Pacific Station.

Asiatic Station—Rear-Admiral J. L. Davis.

Commodore Ralph Chandler has been ordered to command this station, and will probably leave the U. S. early in October.

Vessel with (†), address, Mail, to care U. S. Consul, Yokohama, Japan.

ALERT,† 3d rate, 4 guns, Comdr. Chas. J. Barclay. At Yokohama, Japan, July 11. She will return to the U. S., and expects to reach San Francisco some time in September. Was to sail from Yokohama for Hakodadi on about August 5.

BROOKLYN, 2d rate, 14 guns, Capt. E. O. Matthews. Sailed from New York, Aug. 12, for the Asiatic Station.

ESSEX, 3d rate, 6 guns, Comdr. T. F. Jewell. At New York. Has received her sailing orders to proceed to the Asiatic Station.

MARION,† 3d rate, 8 guns, Commander Merrill Miller. At Shanghai July 1—undergoing repairs.

MONOCACY,† 3d rate, 6 guns, Comdr. Henry Glass. Was at Canton July 1.

OMAHA,† 2d rate, f. s. a. s., 12 guns, Captain Thos. O. Selfridge, commanding. Reported by cable to the JOURNAL, at Shanghai, China, July 17.

OSSIPEE,† 3d rate, 8 guns, Comdr. John F. McGlensey. At anchor off Yokohama, Japan, July 1, under orders to proceed to Chemulpo, Corea.

PALOS,† 4th rate, 6 howitzers, Lieut.-Commander T. Nelson. Was in all probability at Chemulpo, Corea, July 1, having sailed for that port from Nagasaki, June 3.

TRENTON, 3d rate, 10 guns, Capt. Robert L. Phythian. On her way home. Reported by cable to have left Gibraltar, Aug. 4, for the U. S.

Apprentice Training Squadron.

Address of *Portsmouth* and *Saratoga*, care of B. F. Stevens, 4 Trafalgar Square, London, England, until Aug. 25, and after that date Newport, R. I.

MINNESOTA, 1st rate. 24 guns, Comdr. T. F. Kane. Gunnery ship. Foot of W. 27th Street, North River. Entrance from W. 26th Street. P. O. address, Station E, New York.

NEW HAMPSHIRE, 1st rate, 16 guns, sails, flagship of training squadron, Captain Arthur R. Yates. Coaster's Island Harbor, Newport, R. I.

PORTSMOUTH, 3d rate, sails, 12 guns, Comdr. Chas. V. Gridley. Arrived at Lisbon Aug. 14.

SARATOGA, 3d rate, 12 guns, Comdr. C. H. Davis. Arrived at Lisbon Aug. 14.

On Special Service.

CONSTELLATION, 3d rate, 10 guns, Practice Ship of Naval Academy, Commander C. L. Huntington. Sailed from Fort Monroe, Va., Aug. 25, for Annapolis, Md. Officers of the *Constellation* will be detached Aug. 31, and ordered to the Naval Academy.

DESPATCH, 4th rate, Lieut. Wm. H. Emory, Jr. Was at Bridgport, Conn., Aug. 26. Was to leave in a day or two.

DOLPHIN, despatch boat, ———— At Norfolk, Va. Undergoing repairs.

JAMESTOWN, 3d rate, sails, 12 guns. Comdr. Horace Elmer. Sailed from Hampton Roads Aug. 25 for Annapolis, Md. Comdr. Chas. J. Train is ordered to command Aug. 31.

MICHIGAN, 4th rate, 8 guns, Comdr. John J. Read. Arrived at Buffalo, Aug. 23, from Erie.

RANGER, 3d rate, 4 guns, Comdr. Chas. E. Clark. At San Francisco.

ST. MARY'S, sails, 8 guns, Comdr. Edwin M. Shepard. N. Y. Schoolship. On her annual cruise. Was in Hempstead Bay, L. I., Aug. 16.

ATLANTA, 2d rate, 8 rifled cannon and 12 machine guns, Captain Francis M. Bunce. At New York Navy-yard.

Receiving Ships, Iron-Clads, Etc.

FRANKLIN, 1st rate, 20 guns, Capt. Henry Wilson. Receiving ship. At Norfolk, Va.

INDEPENDENCE, 3d rate, sails. 6 guns. Commander Frederick Rodgers. Receiving ship. At Mare Island, Cal.

RESCUE, 4th rate, Mate Samuel F. Lomax. Used as a fire tug. Washington, D. C.

FORTUNE, 4th rate. Lieutenant O. W. Lasher. At Norfolk, Va.

ST. LOUIS, 3d rate, sails. Lieut. Comdr. Chas. A. Schetky, commanding officer pro tem. Receiving ship. League Island, Pa.

WABASH, 1st rate, 26 guns. Captain Joseph N. N. Miller. Receiving ship. Boston, Mass.

VERMONT, 2d rate, 7 guns. Captain Augustus P. Cooke. Receiving ship. At New York.

DALE, 8 guns. Commander Silas Casey. Receiving Ship. At Washington, D. C.

PHILOX, Naval Academy Tug. Mate B. G. Perry in command. At Annapolis, Md.

MAYFLOWER. Mate Kuhl, commanding. At Norfolk.

The iron-clads *Ajax. Catskill. Lehigh, Mahopac, Manhattan* and *Wyandotte*, are laid up at City Point, Va., in command of Comdr. D. W. Mullan.

VARIOUS NAVAL ITEMS.

THE U. S. Fish Commission steamer *Albatross* passed Cape Race Aug. 21, bound west.

SERGEANT ADAMS, of the *Ranger*, who recently shot a man at Vallejo, who died subsequently, has been arrested and arraigned for murder.

THE British corvette *Diamond* took possession in the name of the British Crown of the Kermodee Islands, in the South Pacific Ocean, Aug. 1.

THE office of Engineer-in-Chief Loring is undergoing quite a transformation at the hands of the fresco painters and other artists of the brush and stencil.

THE U. S. steamers *Tennessee, Galena* and *Yantic*, of the North Atlantic Squadron, arrived at Boothbay, Me., on the evening of Aug. 22, being on a short cruise.

AN examination was held Friday last in the West 35th Street School Building, New York, from the 11th Congressional District, for a nomination to the Naval Academy. The successful candidate was Eugene Ryan, of No. 210 West 17th street. His percentage was 86.5.

IN our issue of June 12, in regard to the court-martial of Lt. Comdr. J. E. Noël, it was stated that he was tried for absence without leave and drunkenness, and acquitted of the first charge, but found guilty of the second, etc., which is not the case. He was found guilty of the first charge and acquitted of the second.

A MEETING of the Newport branch of the Naval Institute was held at 8 P. M. Aug. 25, when a paper by Comdr. Albert S. Barker, U. S. N., on "Firing High Explosives From Great Guns" was read. The paper gives an account of his experiments in firing shells charged with dynamite from the ordinary service howitzer, etc.

THE Advisory Board, having about concluded its labors in Washington, will soon, in compliance with Secretary Whitney's order, be in full working order in Chester, where the *Boston* but awaits orders for New York, and the *Chicago* is nearing completion. Chester is to be congratulated.

THE *Admiralty Gazette* says: "Very's system of night signalling, which has been used by the Channel Squadron in the practice at torpedo attack at Bantry, has not proved altogether satisfactory. The general opinion appears to be that it is rather confusing, and further trials at Milford Haven are anticipated with interest."

SECRETARY OF THE NAVY WHITNEY reached Bridgeport, Conn., Aug. 26, from New London, on the U. S. S. *Despatch*. A number of prominent citizens embraced the opportunity to greet the Secretary, who took a train at half-past five P. M. for Lenox, Mass., where he has a villa, and where he will remain for a few days.

PERHAPS New London would not be so eager to get the naval school ship and naval college to occupy their deserted navy-yard if they knew of the effect of these attractions upon the residence quarter of a quiet city. The opinion is widely current at Newport that the proximity of the middies is nothing to be desired.—*Springfield Republican.*

THE commanding officer of the U. S. S. *Galena* has reported to Admiral Luce that during the recent cruise of the *Galena* in Canadian waters it was learned that there was no trouble existing between the American fishermen and the Canadian authorities, and that everything was peaceable and quiet. The fishermen were all fishing outside the three mile limit.

THE public, misled by much foolish newspaper talk, hardly anticipated that the Naval Board of Inspection would find hailing from the port of New York alone 102 American iron steamships of over 2,000 tons, capable of running 14 knots an hour, and fitted for auxiliary cruisers in case of war. Yet this is the actual result, and the report on the second ship of this number, the *Newport*, is not a whit less gratifying than that on the *Louisiana.—Boston Journal.*

A NAVAL court-martial was ordered to assemble at the New York Navy-yard Aug. 27 for the trial of 1st Lieut. O. C. Berryman, U. S. M. C., on charges of drunkenness. The court consists of Capts. Chas. S. Norton and T. F. Kane, Lieut. Col. John L. Broome, U. S. M. C.; Lieut. Col. C. D. Hebb, U. S. M. C.; Comdr. Wm. H. Whiting, Comdr. F. W. Dickins, Lt. Comdr. Jas. G. Green, Capt. R. W. Huntington, U. S. M. C., and Lieut. C. H. Arnold, with Lieut. S. C. Lemly, judge advocate.

THE latest addition to the fleet of high-speed torpedo boats already afloat in various parts of the world (with the exception of the western hemisphere) is now en route for China from the works of Mr. Schichau, of Elbing. This craft, whose cruise to China via the Suez Canal, will be watched with much interest, has developed a speed of 24.23 knots for one hour in the Baltic Sea, and for a period of four hours, with bunkers filled, an average speed of 22½ knots was maintained. Her engines are capable of developing 1,500 horse power.

COMMODORE CHANDLER on Aug. 25, in accordance with telegraphic orders from Washington, detailed a force of officers and men to go to Chester, Pa., and bring the steel cruiser *Boston* to New York to be made ready for a trial trip. Comdr. C. M. Schoonmaker was put in command of the force and all went to Chester Thursday afternoon. The *Boston* will reach New York about Monday next. A Navy-yard tug will act as convoy. Messrs. Roach and Son were asked to man her, but replied that they would man her engine room but could not take charge of the deck.

A DESPATCH from Newport, R. I., Aug. 20, says: Secretary Whitney and Capt. Emory, of the *Despatch*, stayed at the Ocean House last night. The Secretary and party have been inspecting the torpedo and naval stations. One of the Herreshoffs' swift launches, which they want to sell the Government, came down from Bristol and took the Secretary off the *Despatch* this morning to let him see what the launch could do. It went outside the harbor, testing its speed to a high rate, when the piston suddenly gave way and another part of the machinery got out of working order, and the launch came to a stand still. There was considerable excitement for a time, but finally the launch of the U. S. S. *New Hampshire* came down and rescued the Secretary.

THE pay officers on duty in the Bureau of Provisions and Clothing received an unexpected visit this morning. They have been laboring under the impression that their bureau was in no way a model, and could not be wiped out too soon. This morning, however, Paymaster N. Kataoka, of the Japanese Navy, and Lieut. M. Saito, naval attache of the Japanese legation, presented themselves to one of the pay officers and requested permission to spend some time in studying the bureau system. The permission was of course granted, and the two seekers after information spent the entire morning talking about the workings of the bureau. Several years ago the system of keeping accounts used on board U. S. naval vessels was adopted by Japan, but she as yet has no bureau system. The visit created some amusement. While Secretary Whitney is endeavoring to change the bureau system, Japan seems disposed to adopt it.—*Baltimore Sun.*

NAVY GAZETTE.

Ordered.

AUG. 23.—Medical Inspector John H. Clark, to special duty at Portsmouth, N. H., Sept. 1, and in charge of the Quarantine Hospital at Wiscoe's Island, Me.

Medical Inspector D. Kindleberger, to the Naval Hospital, Washington, D. C., Oct. 1.

AUG. 24.—Captain Chas. S. Norton, as a member as the Board of Inspection and Survey.

Lieutenant Henry H. Barroll, to duty at the branch Hydrographic Office, Philadelphia.

AUG. 25.—Commander Wm. H. Whiting, to the New York Navy-yard.

Lieutenants E. D. Taussig and A. E. Culver, to the training ship Jamestown.

AUG. 27.—Assistant Surgeon E. P. Stone, to the New Hampshire.

Pay Inspector George Cochran, to the Naval Asylum, Philadelphia, Oct. 1.

Commander Horace Elmer, as Light House Inspector, 11th District.

Ensigns W. L. Capps and C. H. Hewes, to instruction at the University of Glasgow.

Detached.

AUG. 19.—Commodore Ralph Chandler, from the command of the Navy-yard, New York, Oct. 1, and ordered to hold himself in readiness to command the Asiatic Station.

Commodore Bancroft Gherardi, as Governor of the Naval Asylum, Philadelphia, Sept. 30, and ordered to command the New York Navy-yard Oct. 1.

AUG. 23.—Medical Director Delevan Bloodgood from the Naval Laboratory, New York, Sept. 28, and ordered to the Naval Hospital, Norfolk, Sept. 29.

Medical Director John Y. Taylor, from the Naval Hospital, Norfolk, Sept. 29, and ordered to the Naval Hospital, New York, Oct. 1.

Medical Director A. L. Gihon, from the Washington Naval Hospital Oct. 1 and ordered to the Naval Hospital, Mare Island, Cal., Navy-yard, Oct. 15.

Medical Director Richard C. Dean, from the Naval Hospital, New York, Oct. 1, and placed on waiting orders.

Medical Inspector John C. Spear, from the Navy-yard, New York, Sept. 27, and ordered to duty at the Naval Laboratory, New York.

Medical Director Somerset Robinson, from the Naval Hospital, Mare Island, Cal., Oct. 15, and placed on waiting orders.

AUG. 24.—Lieutenant A. B. Wyckoff, from the branch Hydrographic Office, Philadelphia, Sept. 1, and ordered to the Lancaster per steamer Sept. 11.

Passed Assistant Engineer Wm. A. Windsor, from the Tennessee and placed on waiting orders.

Passed Assistant Engineer E. A. Magee, from the Minnesota and ordered to the Tennessee.

Passed Assistant Engineer James Entwistle, from temporary duty on board the Atlanta and ordered to the Minnesota.

AUG. 25.—Commander Horace Elmer, from the command of the Jamestown Aug. 31 and placed on waiting orders.

Commander Chas. L. Huntington, from the command of the Constellation Aug. 31 and ordered to the Naval Academy.

Lieutenant R. T. Jasper, from the Naval Academy Aug. 31 and ordered to the training ship Jamestown.

Lieutenants C. W. Bartlett, Wm. J. Barnette, D. H. Mahan, J. O. Nicolson and J. T. Smith, and Ensign J. H. Gibbons and Paymaster J. P. Loomis, from the Constellation Aug. 31 and ordered to the Naval Academy.

Lieutenants James M. Miller, Theodoric Porter, H. O. Rittenhouse, A. C. Hodgson and C. R. Miles, from the Jamestown Aug. 31 and ordered to the Naval Academy.

Lieutenant Albert Ross and Ensign Wm. F. Fullam, from the Constellation and ordered to hold themselves in readiness for sea service.

Ensign P. W. Hourigan, from the Naval Observatory Aug. 31 and ordered to the training ship Jamestown.

Ensign J. L. Jayne, from the Jamestown Aug. 31 and ordered to duty at the Johns Hopkins University, Baltimore, Md.

Ensign H. S. Knapp, from the Jamestown Aug. 31 and ordered to hold himself in readiness for sea service.

Surgeon W. J. Simon, from the Constellation Aug. 31 and ordered to temporary duty at the Naval Academy.

Chaplain A. A. McAlister, from the Constellation Aug. 31 and placed on waiting orders.

AUG. 27.—Commander Chas. J. Train, from the Bureau of Equipment Aug. 31 and ordered to command Jamestown.

Lieutenant Walter McLean, from the Vermont and ordered to the Coast Survey.

Ensign W. J. Maxwell, from the Fish Commission to the Coast Survey.

Passed Assistant Surgeon H. B. Fitts, from Naval Asylum, Philadelphia, and to wait orders.

Assistant Surgeon Chas. P. Henry, from the New Hampshire and ordered to the Naval Hospital, Philadelphia, Pa.

Paymaster Joseph Foster, from the Naval Asylum, Philadelphia, ordered to settle accounts and wait orders.

Commander F. A. Cook, as Light House Inspector, 11th District, on Sept. 13, and ordered to command the Ranger.

Commander Chas. E. Clarke, from command of the Ranger and ordered home.

Assistant Engineer W. J. Baxter, from the Swatara and ordered abroad for instruction at the University of Glasgow.

Passed Assistant Engineer C. R. Roelker, Cadet Engineer G. Kaemmerling and Douglass Zevely, clerk, transferred from the Navy Department to the Advisory Board at Chester, Pa.

To Delay.

Lieutenant W. A. Marshall to delay reporting to the Naval War College till Sept. 6.

MARINE CORPS.

AUG. 23.—Captain J. H. Higbee granted one month's leave from Sept. 2, (upon return of Major James Forney from leave).

AUG. 25.—Captain W. S. Muse and 1st Lieutenant H. K. Gilman detached Sept. 4 from the Torpedo Station, and ordered to report same day for temporary duty at the Naval War College.

Captain R. L. Meade having reported from sick leave ordered to duty at the Marine Barracks, Brooklyn, N. Y.

NAVY DEPARTMENT, WASHINGTON, Aug. 13, 1886.

General Order No. 353.

Gives direction as to administering the oath required by the act approved May 13, 1884, Statutes at Large, Vol. 23, page 22, which applies to all persons, not ordinary mechanics and workmen, *appointed* to places of profit at the Navy-yards and Stations, on vessels, and in the Navy Department (whether as clerks, writers, or in other subordinate positions), as well as to commissioned and warranted officers of the Navy, and must be observed.

FROM THE PACIFIC STATION.

REAR-ADMIRAL MCCAULEY reports to the Navy Department the following movements of the vessels of the Pacific Station during July, under date of Callao, Peru, July 31:

The *Hartford*, *Shenandoah*, and *Iroquois* were at Callao during the month.

The *Mohican*, which left Callao, for the Islands, March 6, was at sea, March 6 to April 11, stopping on April 7 at Muka Hiva, Marquesas Islands; Dean's Island, April 11 to 16; at sea, April 17; Tahiti, April 17 to May 6; at sea, May 6 to 10, and at Samoa, May 19 to last accounts, May 28.

The *Adams* left Callao, June 20, for Coquimbo; at sea, July 20 to 24, and Iquique, July 24 to 31.

The storeship *Monongahela* was at Coquimbo during the month.

(Correspondence of the Army and Navy Journal.)

FROM THE NORTH ATLANTIC STATION.

BOOTH'S BAY, ME., Aug. 22, 1886.

THE entire landing force of the North Atlantic Squadron, composed of officers, seamen and marines of the flagship *Tennessee*, *Swatara* and *Yantic*, embarked yesterday afternoon in their respective boats in order to land on the beach near Fort Preble, where a sham fight was to take place. At one o'clock general signal was thrown out for the brigade to embark "armed and equipped."

The field artillery, consisting of two 3in. rifles and two Gatlings was dismounted and each one lashed securely to a balsa as though the intended landing were to be made through the surf. The balsas were sent ashore in tow of steam launches, all precautions being taken to prevent water and sand getting into the mechanism and movable part by stowing them in waterproof bags. The lashings securing them were passed with a view to a possible capsizing of the balsas; and as a proof of the thoroughness with which this was done, one of the balsa actually did "turn turtle" without the loss of an article belonging to gun or carriage and without injury to the service of the piece.

The boats when fully manned were formed in column and under direction of the officer commanding the brigade, who was in his gig, from which signals to the flotilla were made, pulled along parallel to the beach, and when abreast the proper position for landing, marked previously by small flags planted ashore, signal was made to change directions by left flank, which brought each boat's head pointing to the beach. Orders were then given for boats containing skirmish companies to advance. Quickly in obedience to this order the men in two of the largest cutters bent lustily to their oars and pulled rapidly for the shore. Upon taking ground the crews headed by their officers jumped over into the water and immediately deployed as skirmishers covering the whole space to be later on occupied by the Brigade.

As the rest of the boats of the flotilla, some 16 or 18 in number, pulled for the beach, keeping excellent dress and distance they presented a very picturesque as well as quite formidable appearance. On landing the companies were at once formed and marched to places assigned them along the proposed line of intrenchments which had previously been staked out in strict accordance with the rules of art of Military Engineering. The pieces of artillery were landed, mounted, and hauled to their positions on the flanks and in the centre of the line of works, one 3in. rifle and one Gatling being in the earthwork on the extreme right, a 3in. rifle on the left, and a Gatling in the centre. The men were told off into working parties and reliefs and under the direction of their commanding officers supervised by the officers of the general staff, were soon busily at work digging up the sand, filling the bags and barrels and placing them in position to form protection against the supposed advancing enemy. The original line of skirmishers was relieved by the Marine Battalion and withdrawn into the line of intrenchments where they proceeded to throw up cover. Barrels filled with sand, drift wood and all other material on hand were used to make as complete protection as was possible; the earth being generally sand, there was but little hard digging to be done and in less than two hours after the landing the trenches were ready to be manned and the artillery in position. Some willow trees near by afforded the necessary brush to screen the heads of the men as they fired over the top of the earthwork, and did not detract at all from the general appearance of the whole.

Upon the sounding of the bugle the men fell into their places in the trenches and prepared to drive back the enemy who were at this time making it too warm for the skirmishing marines, who were compelled to fall back; this they did in very good order at first, firing away most vigorously after their pursuers, but being altogether overmatched and their ammunition giving out, they broke, and, on the dead run, rushed over the earth works to find shelter. The firing along the whole line, which had been withheld while the marines occupied the ground, was now broken up; and the enemy, first checked, were soon in their turn forced to beat a hasty retreat. Skirmishers were now called out of the intrenchments, and as they were reinforced were soon strong enough to charge the enemy; the artillery pieces were limbered up and the whole brigade in excellent order, and on the run charged up the slightly rising ground until the crest was reached and the enemy scattered in every direction.

After sufficient breathing time had been allowed, the order to put on the leggins and get ready for the review was passed along. Belts and caps were adjusted and sand beaten off the clothing, which, with the snow white leggins, soon made a considerable change for the better in the appearance of the men.

The Marine Battalion formed on the right, then the six companies of sailors as infantry, followed by the four pieces of artillery, and all, headed by the band from the flagship *Tennessee*, started on the march for the campus of Fort Preble, where the dress parade and review were to take place.

The Rear-Admiral, the Commander-in-Chief and his Staff received a marching salute as the brigade passed, and when the formation in the fort was complete the dress parade was held, followed by a march in review. Capt. Boyd, of the *Tennessee*, and Gen. Graham, commanding the post at Fort Preble, were the reviewing officers, and spoke in high terms of the appearance of the men and of the creditable work they had accomplished in throwing up their entrenchments.

Among the prominent guests present were Gen. John M. Corse, of Hold the Fort fame, who immortalized himself at Altoona; Gen. John Marshall Brown, an officer of large experience during the civil war, and at present commanding Maine State troops; Maj. Smith, U. S. Engineer Corps, to whose kindly advice and practical suggestions the success of the line of intrenchments was greatly due; Col. Brinton, and a large number of prominent citizens and ladies.

The brigade was then marched to the wharf where the boats had been assembled and all embarked, returning to their respective ships.

The improvement shown by this second drill at intrenching is most encouraging proof of what can be accomplished, even with the limited means at hand, and gave to all who participated many valuable points to which in actual need they can refer.

Drills of this kind are of the greatest value to both officers and men, and while our Navy has at the present time but few, if any ships, which could be brought into action with the ironclads of the present day, still the skill and energy and the learning are there, and it is sincerely hoped that a repetition of the sham fight may soon take place.

GUS. C. ROEDER.

After the crowds had indulged in skating at the rink the other night the floor was cleared at 9 o'clock and Mr. Bailey appearing on the floor, informed the spectators that a game of ball was to be played on skates by teams from the U. S. S. *Tennessee* and *Swatara*. But before the game came off he wished to introduce Mr. Harry Beus, of the *Tennessee*, who would produce some very fine contortion acts. Amid the loud applause of over 3,000 people Harry Beus appeared on the floor, clad in a beautiful suit of tights and in his performance certainly astonished the crowd. Had the announcement of a game of ball to be played on skates caused a great deal of amusement the appearance on the floor of the *Tennessee's* team, who were not clad in the Naval uniforms, but appeared in regular minstrel suits, caused more. Clowns, harlequins, Uncle Sam and even a nigger wench were represented by the ball players.

The following are the teams:

Tennessee's Team.—J. J. Heary, short stop; J. Hardman, pitcher; F. Algier, catcher; J. Gandy, 2d base; C. W. Riggin, right field; B. Dissoway, 1st base; W. J. C. Ward, 3d base; G. B. Moncrief, centre field; S. S. King, left field.

Swatara's Team.—M. Dooley, pitcher; C. Morgan, cather; E. Aiken, 1st base; C. Hopkins, 2d base; H. Mahr, short stop; W. Donnelly, 3d base; A. J. Kimmel, left field; T. McKay, centre field; J. C. Postill, right field.

The game finished with a score of 10 to 2 in favor of the *Swatara's* team. The handsome pennant was presented to the champions by Mr. Bailey amid the cheers of the crowds of enthusiastic spectators.

The *Swatara's* team now holds the championship of the North Atlantic Squadron, and there is no doubt that the champions will receive numerous challenges from the base ball players of the other ships of the fleet.

(Correspondence of the Army and Navy Journal.)

NAVAL ACADEMY.

ANNAPOLIS, MD., Aug. 19, 1886.

A PARTY of Japanese officials, consisting of Count Saigo, secretary of the Japanese Navy; Capt. Shibayama, Lieuts. Funaki, Hitaka, and Sito, the latter an attache of the Japanese Legation at Washington, made a visit to the Naval Academy, Aug. 19. Accompanied by Lieut. Seaton Schroeder, U. S. N., they visited points of interest at the Academy and the ordnance proving ground opposite, where everything of interest was pointed out to them by the officials in charge. Returning to the Academy in the afternoon from the proving ground, where they witnessed interesting experiments, the visitors were joined by Lieut. Charles T. Hutchins, acting superintendent of the Academy, and a salute of 19 guns was fired for the Japanese secretary.

The second class of naval cadets, who have been undergoing practical instructions in steam engineering and other studies at the Naval Academy during the summer, left Annapolis Aug. 25 for a month's vacation.

On the return of the *Constellation* and *Jamestown* from the practice cruise this week, the cadets on board will also be given leave. Some of the students who live at a distance will not go home, but will spend the vacation with friends nearer Annapolis.

All the cadets must return by Sept. 30 for the reopening of the Academy on Oct. 1.

The third relief of officers detailed for the summer went on duty at the Naval Academy Aug. 25. They are Lieutenants Leutze, Colvocoresses, Mitchell, Tyler and Boush, and Assistant Engineer Scribner.

OLD POINT COMFORT.

"SOPHIE SPARKLE" in a recent letter, dated Hygeia Hotel, says: "The arrival of the *Constellation* gave new impetus to the gay season at Old Point, and on Tuesday evening of this week the ladies of the Hygeia gave one of the most brilliant germans of the summer, in compliment to the cadets and officers of the ship. The ball room of the Hygeia was beautifully decorated for the occasion with flags from the fort. The belles wore their prettiest toilets and the beaus were gorgeous in blue, with gold stripes and brass buttons. Lieut. Bartlett, U. S. N., led the german with a great deal of dash and grace, and was voted by the fair ones present to be one of the handsomest men upon the floor. Capt. Huntington, U. S. N, and Paymr. Loomis, U. S. N., also tripped the light fantastic toe with inimitable grace, enjoying themselves in that merry fashion which only gallant sailors who have braved old Neptune's storms to find a safe and delightful harbor at last, can understand. Commo. Greer, U. S. N., regretted that he had not his uniform here, that he also might have waltzed with the belles; and Paymr. Woodhull, U. S. N., found himself to be in the same unenviable fix. Uncle Sam's officers in old Fortress Monroe found themselves totally eclipsed and forgotten in the presence of these gallant and handsome sailors. You can see Army officers every day at Old Point, but it is only at rare intervals that one of Uncle Sam's frigates lies off shore long enough for the naval officers to add to the brilliancy of social life at the Hygeia by their presence.

"Of course, the belles were in a flutter of delight when it was announced that both the *Constellation* and the *Jamestown* were in port with numbers of cadets on board. Lieut. Barnett, Ensign Jane and Cadet Blue were immensely popular on this occasion. Among the distinguished spectators present were: Colonel Whitehead, U. S. Army; Paymr. Tiffany, U. S. N., of the *Jamestown;* Paymr. Woodhull, U. S. N.; Commo. Greer, U. S. N.; Dr. Dickson, U. S. N., of the *Constellation*, and many others. Miss Woodhull, daughter of Paymr. Woodhull, U. S. N., was naive and charming as usual in pink silk and flowers. Miss Wadsworth, of Washington, was much admired in becoming costume of white with garniture of flowers. Miss Jordan, daughter of Paymr. Jordan, U. S. N., who dances very beautifully, wore a becoming toilet of pale blue surah, white lace and flowers."

STATIONS OF COAST SURVEY VESSELS.

W. H. Brownson, Lt. Comdr. U. S. N., Hydrographic Insp'r.
Lt. J. F. Moser, U. S. N., Coast and Geodetic Survey Office.
Lt. Geo. H. Peters, U. S. N., Coast and Geodetic Survey Office.

CHOICE OLD WHISKIES,
MILD, MELLOW AND DELICIOUS.

The peculiar medicinal qualities of Whiskey distilled from the finest growth of Rye in the renowned Valley of the Monongahela, have attracted the attention of the Medical Faculty in the United States to such a degree as to place it in a very high position among the Materia Medica.

We beg to invite the attention of connoisseurs to our celebrated fine OLD WHISKIES, which we offer at the following prices, in cases containing One Dozen Bottles each:

Old Reserve Whiskey, - - - - $18.00
Unrivalled Upper-Ten Whiskey, 15.00
Brunswick Club Whiskey, - - - 12.00

If you cannot obtain these Whiskies from your Grocer, we will, on receipt of Bank Draft, Registered Letter or Post Office Money Order, deliver them to your address, by Express, charges prepaid, to all points east of the Mississippi river; and by freight to any part of the U. S. (prepaid.)

For EXCELLENCE, PURITY AND EVENNESS OF QUALITY, the above are UNSURPASSED BY ANY WHISKIES IN THE MARKET. They are entirely FREE FROM ADULTERATION, and possess A NATURAL FLAVOR AND FINE TONIC PROPERTIES.

These Whiskies are sold under guarantee to give PERFECT SATISFACTION; otherwise to be returned at our expense.

No attention is paid to anonymous communications, but the wishes of contributors as to the use of their names will be scrupulously regarded.

Remittances should be made by express, or post-office money order, check, or draft, made payable to W. C. and F. P. Church. Postmasters are obliged to register letters if requested. No responsibility is assumed for subscriptions paid to agents, and it is best to remit direct to the office.

Subscriptions, $6 a year, and pro rata for a less period. In clubs of five, $4; clubs of ten or more, $3.

Postage within the United States prepaid. Foreign postage, $1.00 per annum, should be added to the subscription price.

Change of address will be made as frequently as desired, upon notification; not otherwise, as the changes announced in the orders published in the JOURNAL furnish no authority for changing the address of the paper. Both the old and new address should be given.

We should be very glad to learn from any of our subscribers of any delay or failure to receive the JOURNAL, so that we may give the matter our immediate attention.

ARMYNAVY.

THE NEW ARMY GUN.

WE gave last week some account of the preliminary trial of the first 8-inch, all steel, gun ever constructed in America, after designs by the Army Ordnance Department. The cut we give this week showing the gun is produced from a photograph taken shortly after the recent firings. The carriage upon which it is mounted is the one designed by the Department and manufactured by the West Point Foundry about six months since. It was designed as a proof carriage for this gun and also for the 10-inch steel gun in course of construction. It is adapted to the larger gun by introducing two steel bushing rings fitted into the cheeks of carriage to secure the trunnion of the gun.

The gun represented is an 8 inch, all steel, breech-loading rifle, manufactured by the West Point Foundry, upon designs from the Army Ordnance Bureau. The tube and jacket were obtained from WHITWORTH, and the hoops and the breech mechanism forgings from the Midvale Steel Company. The total weight of the gun is 13 tons; total length, including breech mechanism, 271 inches; length of bore in front of gas check, 30 calibres; powder space in chamber, 3,109 cubic inches; charge, 100 pounds. The tube extends back to breech recess from muzzle, in one solid piece. The breech block is carried in the jacket, the thread cut in the rear portion of the jacket. The jacket extends forward and is shrunk over the tube about 87½ inches. The re-enforce is strengthened by two rows of steel hoops; the trunnion hoops form one of the outer layers. In front of the jacket a single row of hoops is shrunk on the tube and extends toward the muzzle, leaving 91 inches of the muzzle end of the tube unhooped. The second row of hoops is shrunk on forward of the trunnion hoops for a length of 38 inches to strengthen the gun, and the hoop portion forms three conical frustums. The elastic resistance of the gun to tangential rupture over the powder chamber is computed by Claverino and kindred formula, to be 54,000 lbs. per square inch.

The breech mechanism is modelled after the DE BANGE system. The block has three smooth and three threaded sectors and is locked in place by one-sixth of a turn of a block and secured by the eccentric end of a heavy lever which revolves into a cut made in the rear breech of the gun. The gas check consists of a pad made of two steel plates or cups, between which is a pad of asbestos and mutton suet formed under heavy pressure. The rifling consists of narrow grooves and lands, 45 of each. The depth of the groove is six-one-hundredth of an inch.

Although the gun is designed for a charge of 100 pounds it is believed that it can be increased to 105 pounds without giving dangerous pressure, and the intention is to increase the charge to that amount when the new powder is received from DU PONT.

The following is a very full synopsis of the official report of the preliminary firings—13 rounds—with this gun:

The first seven rounds were fired with German cocoa powder, which was received from Watervliet Arsenal. There were two kinds of cartridges, one kind weighing 85 pounds, and having 30 grains in each layer, the other weighing 100 lbs., and having 27 grains in each layer. In two of the first seven rounds the weight of the charge was 65 pounds, the projectiles weighing 182 and 286 pounds; in the next two rounds charges of 85 pounds were fired, the projectiles as before weighing 182 and 286 pounds, while in the last three of the rounds fired with cocoa powder the charge was 100 lbs., while the weight of the projectile was 182, 235, and 286 pounds. At the seventh round was fired the normal charge, 100 lbs. of powder, and a projectile weighing 286 pounds, for which the gun was designed The mean pressure for this round determined by two crusher gauges was 32,800 pounds, and the velocity at 150 feet was 1,787 feet.

Two kinds of DU PONT's brown prismatic powder marked P. A. and P. I. were then fired. With the normal charge of P. A. powder (round 12 of the record), the mean pressure was 35,450 pounds, the velocity at 150 feet was 1,812 feet. For P. I. powder (round 13 of the record), the pressure was 26,925 pounds, the velocity was 1,702 feet, and a considerable amount of unconsumed powder was ejected, showing that the P. I. powder is not a suitable one for this piece. The highest pressure indicated with the normal charge of P. A. powder was 36,200 pounds, exceeding by 1,200 pounds the provisional limit of pressure.

At the fifth round the breech block opened with some difficulty, and an examination showed that the resistance resulted from the diametral enlargement of the rear plate. Directions have been given to correct this defect. The star gauge records show that no material change took place in the diameter of the chamber or the bore. From 30 inches to 54 inches (measured from base of the breech), there

was a diminution in diameter of from 0.001 in. to 0.002 in.; in rear of 30 inches there was no change. No enlargement in the shot chamber exceeded 0.001 in. From the bottom of the bore (the beginning of the rifling) to the muzzle the average enlargements were as follows: 0 in. to 6 in., 0.005 in.; 7 in. to 14 in., 0.003 in.; 15 in. to 29 in., 0.002 in.; 30 in. to muzzle, 0.002 in. to 0.001 in.

After the third round the joint between the D. and D. rings opened slightly on the top, and measured after the 13th round showed that the opening was about 0.004 in. wide. It cannot at present be stated whether or not this opening increased during firing, but the defect has been noted and will be carefully observed. Enough cocoa powder remains to allow a comparison to be made with such brown prismatic powder as may be adopted finally. No firing has been done as yet to test the best position for the bands, but it will take place as soon as enough of some standard powder is obtained to fire ten consecutive rounds.

NAVAL DOCKS AND YARDS.

NAVAL CONSTRUCTOR HICHBORN has evidently kept his eyes open while "doing" Europe. Of course, from a constructor's view, the docks at the various points included in Mr. HICHBORN'S points of observation received much attention, and his chapter on this subject is of great interest and value. He specially mentions the Alexandra docks as being of the latest and newest type, and particularly well built. "The Langton Graving-Docks, also new, are two parallel docks, 951 feet in length." These docks can be divided by gates, making four docks. Following European practice, these docks, as well as many others in London and Liverpool, are fitted with cast-iron keel blocks, wedge-shaped and capped with wood, and adjustable. The gates are of wood, of the swinging type. The bottom of these docks is crowned instead of being flat, and consequently the drainage is to the sides. They are to be fitted with all modern appliances, a large hydraulic crane placed between them, work upon the foundation of which is already in progress. The dry docks on the Thames, and especially in the vicinity of London, are very numerous, and are of sizes ranging from 140 feet to 520 feet in length, and although many are built of wood, the principal ones are of stone, both natural and artificial. While in London Mr. HICHBORN embraced the opportunity of inspecting the pumping machinery constructed by Mr. ALLEN for use in connection with the large dock at St. John's, Newfoundland, constructed by J. E. SIMPSON, of New York. The "Simpson Docks" are of wood, many of them are in use in the United States, and they have the great advantage over the graving docks, as built here and in Europe, in cost and accessibility. Wooden docks cost much less than stone, and but little if any repairs are required for the first fifteen or twenty years after their installation. In conclusion, Constructor HICHBORN says :

> The lack of important naval battles in recent years stands in marked contrast to the desperate efforts of European powers to equip extraordinary vessels, designed to combine the invulnerable and the irresistible; and to the rarity of great sea fights may be indirectly attributed the superabundance of types; for we cannot but believe that a war of moderate duration . . . would speedily settle such vexed questions as the utility of the wholly armored water line versus the citadel ship, and would fix irrevocably the status of such craft as the *Esmeralda* and the *Giovanni Bausan*. . . . . Such a war . . . would prove, what has long been the apprehension of intelligent officers, that the warship of our day has become far too complicated for the people who may be called upon to work; and that a balance of advantage, unsuspected by many, rests with that vessel which has comparative simplicity, even though it be concomitant with a greater exposure of life, a lower speed, and reduced powers of offence.

From this it appears that the Constructor places greater reliance upon personal bravery and skill on the scene of battle than upon the multifarious appliances designed to render the one of the minimum advantage, and the other a question of memory and study. FARRAGUT once expressed the opinion that "wooden walls with iron hearts are better than iron walls with wooden hearts."

"Harper's Magazine" for September contains an article by Rear Admiral EDWARD SIMPSON, U. S. N., on the kindred subject of United States Docks and Navy-yards. He shows that the insignificant capacity of our present docks prevent proper attention to the bottoms of naval vessels, and docking for the purpose of inspecting and cleaning is the exception in our practice. This difficulty will increase with the introduction of iron and steel hulls. The Admiral gives a history of our present docks at Portsmouth, Boston, New York and Norfolk, and a description of them. He considers the question of providing additional docking facilities, and in connection with it the character and location of our Navy-yards. The conclusion is that selection of sites for Navy-yards should be confined to sites already owned by Government. Of these the yards at New London and Norfolk should be retained, and that on the Thames furnishes a solution of the problem how to provide the Navy with docking facilities. The Navy-yard at Portsmouth, N. H., is of little or no use; the yard at Boston should be sold, dock included, as soon as a more suitable dock is built elsewhere. What now constitutes the yard proper at Brooklyn should be retained and the rest of the land sold. Pensacola should be abandoned, excepting a naval station for coal, etc., and a site for a large yard on the Gulf coast obtained. The Navy-yard at League Island is utterly condemned, and a strong argument is made on behalf of New London, because of its natural adaptability to the purpose intended, its capacity for defence and its importance to the defence of Long Island Sound, "the Mediterranean of the Western hemisphere, which remains undefended, ready to welcome an enemy to a hospitable anchorage, where he can establish his depots, and from which he can sally forth for the destruction of coast trade and to lay cities under contribution. We shall be wise," concludes Admiral SIMPSON, "if in the rehabilitation of the Navy we refer all our acts to the standard of national defence, and see to it that in all ways possible we make the one secure with the other."

GENERAL NEWTON'S APPOINTMENT.

WE recall no incident, in an observation of New York municipal affairs extending over thirty years, which is so encouraging to the cause of good government, as the selection of General JOHN NEWTON for the position of Commissioner of Public Works, vice SQUIRE, removed. As the *Post* says, it is the substitution of an ideally fit man for an ideally unfit man. It is not merely the character of General NEWTON which offers encouragement, for good men have been appointed to office before him, even in New York, and at least two of his predecessors in this very office have been graduates of the Military Academy. But by a happy conjunction of circumstances an opportunity offers for putting this Department upon a sound basis of administration, such as has not occurred before since its affairs assumed the importance which the growth of New York has now given them. The politicians are, for the moment, demoralized; the chief political bosses have passed away, leaving no immediate successors, and the political rings are thrown into confusion for the time being. It is just now their Five Forks, and if General NEWTON follows up his advantage, he can force them to an Appomattox surrender.

He is sufficiently familiar with New York to be quite aware that he will find the administration of a municipal department very different from the direction of the affairs of a corps in which each subordinate is a man of special technical training, and, above all, an honorable gentleman, whose good faith and fidelity to trust are to be implicitly relied upon. In New York he will find himself embarrassed in every way by intrigue and misrepresentation, and he will learn before he has gone far, if he has not already, how wonderfully the world is given to lying.

To the Department of Public Works, of which General NEWTON assumes control, was allowed for its expenditures this year $2,771,000. General NEWTON will receive a salary of $8,000 a year and hold office until May 1, 1889. He will have the appointment of a deputy with a salary of $5,500, a chief clerk at $4,400, a chief engineer at $7,000, a consulting engineer at $5,000, topographical engineer at $5,000; seven assistant engineers with salaries from $1,800 to $3,000, eight heads of bureaus with salaries from $2,750 to $4,800. The politicians are already plotting to get control of his department, through his selection of his subordinates, and especially of his chief deputy. One of the most honest and capable Commissioner of Public Works that New York has seen of late years was Mr. CAMPBELL, brother of Dr. CAMPBELL, of the Army, and he appointed HUBERT O. THOMPSON as his deputy. Through THOMPSON the department was transformed into a political machine for the benefit of one of the local factions. General NEWTON'S knowledge of the affairs of New York city will put him on his guard against the attempts which will be made to control by indirect methods the action of a man whom it is well known cannot be approached directly. But the politicians will have this advantage: to accomplish their ends they will work six days; as well as Sundays while the General is saying his prayers. There is no sort of intrigue and indirection that they will not resort to, and it is extremely difficult for any man whose mind is trained to honest methods to follow the ramifications of their crooked courses. But we believe that the appointment of General NEWTON will be followed by such a complete deliverance of his department from political associations that the intriguers will find no foothold there. Upon this the success of his administration depends.

THE publication in the JOURNAL of Aug. 7, of the elevations and deck drawings of the new cruisers has naturally elicited much criticism. Generally the comments are favorable to the designs of the vessels, and, perhaps, especially so to those produced by our own Naval Constructors—the purchase of designs in England or elsewhere out of the United States for our warships, and the policy thereby indicated of relying upon foreign talent, seeming to be anything else than popular with both the Service and the people. Of this policy we intend to say more in the future; at present a brief reference to certain suggested errors of judgment in the armament of the cruisers will be opportune. As an instance of the adverse comments in this direction, we quote from the communication of a Naval officer :

> In a spirit of kindness alone I wish to call attention to one or two points wherein I am sure many will be found to agree with me that error has been made. I refer to the almost entire lack of protection from machine-gun fire secured to the men at the guns and the powder-passers. Take, for example, the 4,000 ton poop and forecastle cruiser to be built upon designs of the Bureau of Construction. Fairly speaking, she seems for her class beyond criticism in all but one or two points; one—the light character of her battery and the other the default to which I have referred. The first may or may not be an objection, being largely a matter of individual preference and the recent practice of European powers seeming to be in the direction of reducing the calibre—which reduction is certainly carried out in the ship under discussion. The battery is certainly not heavy enough to cause a commander to give fight to an over powerful foe through professional pride alone, an objection urged recently by an eminent authority against the *Naniwa*.
>
> The other criticism which I would make in common with all who speak to me on the subject, is one that I fear cannot be so easily met. In view of the recent rapid development of the machine-gun and its general adoption by all nations, the failure to take all means necessary and possible to protect the combatant element of a ship from its fire is quite unaccountable. What body of men will stand at a gun and make it a weapon to be feared when exposed to such a hail of explosive bullets as, beyond all question, will be showered upon them? How will powder and projectile reach such a gun? Machine-guns are adaptable to any vessel, be she a dinghy or a *Devastation*, and can anyone doubt that they will be placed where they are adaptable? While perfect protection from their deadly shower is clearly beyond the power of naval architects in such vessels as the 4,000-ton cruiser, yet it is feasible to arranze the battery and so protect it and its approaches as to offer a very complete guarantee that the larger portion of machine-gun projectiles shall fail in their work, and this, I claim, is an object of paramount necessity, one of which little concern seems to have been taken in the design referred to.

We believe that a majority of naval officers will concur with this criticism, and it would be of service in designing other vessels if officers would express their opinions more freely than they do. Mere captious fault finding is out of place, but intelligent criticism may serve to direct attention to defects that can be remedied, if taken in time.

IT is now a little more than four years since the reduction in the number of line officers allowed upon the active list of the Navy was made by Congress. In our issue of August 26, 1882, was given a table showing the effects of the Act of August 5 upon promotion, and it may be of interest to see how the predictions of that day have been verified. The following table will show this to a partial extent :

Date of Reduction to Legal Number.	Supposed.	Actual.
Admiral	July, 1884.	October, 1883.
Commodore	February, 1888.	October, 1886.
Captain	October, 1885.	March, 1884.
Commander	December, 1886.	July, 1884.
Lieutenant-Commander	March, 1889.	March, 1885.
Lieutenants	No date.	October, 1885.
Lieutenant (Junior Grade)	No date.	January, 1886.

The table above referred to took into account only the retirements due to age; in a subsequent issue was inserted another table in which an attempt was made to allow for casualties, showing the supposed date of reduction as follows: Commodore, February, 1888; Captain, February, 1888; Commander, October, 1887; Lieutenant-Commander, September, 1888; Lieutenant, November, 1888.

It was believed that a fair percentage of casual-

ties was introduced in the second table, but it is evident that such was not the case, and that therefore there has been much faster promotion than had been supposed likely or even possible. The farther we go down the list, the greater is the apparent gain; for instance, the last junior lieutenant promoted gained nearly three years on the date of the second table; while the last ensign has gained nearly as much. Now that the reduction of all the grades is an accomplished fact, promotion, in the higher grades especially, will seem to move more rapidly. While the loss of many men is to be lamented, the survivors are to be congratulated upon their fortune, which has been, and is still likely to be, so much greater than was anticipated. The staff of the Navy are still suffering from the effects of the law, and it will be some time before their numbers are reduced to the legal limit; but there are more promotions among them than were counted upon, as will always be the case.

The reports in our German and French service contemporaries of the total number of repeating rifles produced by each Government up to the latest minute before going to press have attained to such regularity of appearance and exuberance of expression as almost to suggest the suspicion that our friends on both sides are engaged in playing an old American game of bluff. Referring to the *fete* at Spandau on the occasion of the completion at that arsenal of the one hundred thousandth Mauser conversion, *La France Militaire* says: "Although we have neither held a noisy jollification nor fired cannon, as Germany has done, at the baptism of the one hundred thousandth repeater, we are not on that account behind our beloved neighbors. Very quickly, should the desire inspire us, we could celebrate the christening of the two hundred thousandth converted Gras. At this moment there have been received by the trial commission one hundred and thirty thousand stand, not only completed, but inspected, proved, and accepted. The new arm is of the very best character, possessing many distinctive advantages over similar inventions."

In deference to general demands of the military staff the Belgian War Office has ordered a commission to test all the most approved magazine rifles and report as promptly as possible. The Italian Government is also much exercised about the rearmament of its infantry.

Volume 17, part 1, of the Official Records of the War of the Rebellion, containing the reports of the operations in West Tennessee and Northern Mississippi, from June 10, 1862, to Jan. 20, 1863, is now being received at the War Department for distribution. We understand that a supplement to vol. 12, which will contain the proceedings and findings of the original Fitz John Porter trial, the non-publication of which created such a controversy in the Senate last session, when the legislative bill was under consideration, is also in the hands of the Public Printer, and may be looked for shortly. This work is gaining in popular favor with the lapse of time. Under the law 11,000 copies are published, and distributed by the Secretary of War as follows: To the Executive Departments and to officers of the Army and contributors to the work, each, 1,000; to such libraries, organizations and individuals as may be designated by Senators, Representatives and delegates of the 47th Congress, 8,300; to be sold by the Secretary of War, 700. The few extra volumes authorized to be sold are being subscribed for daily. These volumes are sold at the actual cost of printing, with ten cents added to cover little extras. They range in price from 55 cents to $1.85, according to size of book and quality of binding. Mr. David Fitzgerald, the intelligent, urbane and industrious librarian of the War Department, is charged with the distribution, under the Secretary of War, of the entire work, and a very arduous task he finds it, 11,000 copies of each volume passing through his hands.

General John Newton, Chief of Engineers, on Thursday afternoon received informal notice of his appointment to be Commissioner of Public Works of New York City. He at once proceeded to the War Department and made application to be placed upon the retired list of the Army. An order was issued on Friday retiring him from that date. There is a good deal of speculation already as to who will be appointed Chief of Engineers to succeed him, but it is the general impression that Colonel James C. Duane, the President of the Board of Engineer officers in New York City, will be chosen, and there can be no better selection. Colonel Charles S. Stewart, the ranking officer of the corps, is in very poor health, and if he has not already applied for retirement, will, in all probability, do so before the appointment is made. Colonel Charles E. Blunt, who stands next in rank, will be retired in February, and this fact is regarded as precluding his promotion. Colonel Duane, who comes next in rank, is an officer of whose eminent fitness for the position it is hardly necessary to speak. If appointed he will have nearly two years to serve, as he does not retire until June 30, 1888. The date of General Newton's retirement for age is Aug. 24, 1887, and that of Colonel Stewart April 11, 1887. Colonel Gillmore, who follows Colonel Duane, retires Feb. 28, 1889, and then comes Colonel Casey, who does not retire until May, 1895, and whose star as the coming Chief is fast rising above the horizon. According to the West Point record, showing age of General Newton when he entered the Academy, he was originally put down as retiring on July 1, 1886. Within the past year, however, he has furnished documentary proof that he was born on August 24, 1823, and the record was accordingly changed.

The advertisements for proposals for the construction of the five new vessels of war have not yet made their appearance. The delay is due to the fact that Secretary Whitney has not returned to the Department the copies that were mailed to him for approval. Nothing whatever has been heard from him on the subject and it is presumed by the Acting Secretary that he has not yet opened the mail containing them. Simultaneously with the publication of these advertisements we learn that advertisements will be issued inviting shipbuilders from this and foreign countries to submit designs for the two vessels referred to in the following clause of the Naval Increase Act: "Two sea-going double-bottomed armored vessels of about 6,000 tons displacement, designed for a speed of at least 16 knots an hour, with engines having all necessary appliances for working under forced draught, and costing, including engines and machinery and excluding armament, not more than $2,500,000 each. Said vessels shall have each a complete torpedo outfit and be armed in the most effective manner." The advertisements will be published in a number of English papers.

The two vacancies on the Army disability retired list have been filled, as we predicted they would be, by the retirement of Alfred M. Raphall and David B. Taylor, the two senior First Lieutenants of the 11th Infantry. These retirements clear the way for the promotion of First Lieutenant Leon A. Matile and Second Lieutenants Robert J. C. Irvine and Pierce M. B. Travis to the vacancies caused by these retirements, and Benjamin F. Handforth to that resulting from Major Schwan's resignation of his line commission. It is now settled that there are to be no more promotions among Army officers who have been recommended for retirement by Retiring Boards, and there is every indication that when vacancies occur on the retired list they will be filled from disabled officers who block the way for the promotion of others.

The recent sad occurrence by which three men lost their lives on the *Constellation* while engaged in the heroic attempt to rescue Cadet Schley, emphasizes the oft-repeated truth that some more efficient boat-detaching apparatus than that in use in the time of Drake and Cook and Nelson should be employed. The account of the occurrence says: "Attempts were immediately made to lower the life-boat and the first cutter, but, owing to the *jamming of the former's falls*, her entire crew of six men were precipitated into the water." So it would seem that it was by little short of a miracle that the entire boat's crew were not drowned.

The French are enjoying, with a true Gallic sense of the ridiculous, the *maladresse* of Germany and Italy in their diplomatic courtesies. It seems that the two governments could think of nothing better to send to the Sultan of Morocco than the portraits of Emperor William and of Victor Emmanuel. It need not be added that the pictures never reached the interior of the palace; scarcely had the embassies which bore them left Fez when they were placed with their faces to the wall, in a court reserved for waste and dirt thrown there to be removed. Could Germany, so intelligent and learned, be ignorant of the horror of Mussulmans for images and especially for the images of *infidels*?

The Naval Advisory Board has been busily engaged this week packing up its office furniture, books and papers for shipment to the new quarters at Chester. The first meeting of the Board will be held there on Wednesday next. A recorder to succeed Assistant Naval Constructor Bowles has not yet been selected, but it is understood that either Assistant Naval Constructor Gatewood or Assistant Engineer Kammerling will fill that position. The latter has been on duty with the Board since his restoration to the Service and will accompany it to Chester whether made recorder or not. P. A. Engineer Roelker will also continue his connection with the Board at Chester.

The appointment to 2d Lieutenancies of the non-commissioned officers, who successfully passed the Fort Monroe Examining Board a few weeks since, will probably not be made until the Secretary of War returns from his vacation. There are now just enough vacancies for them all, three having occurred during the past week by the retirements of Lieutenants Raphall and Taylor, of the 11th Infantry, and the death of Lieutenant Weinberg, 13th Infantry. Seven of the existing vacancies are in the Infantry and two in the Cavalry.

"Now's the day and now's the hour," as the Scotch poet says. Fort Myer, Va., has been abandoned by the Signal Service, and is the very place for the establishment of the Light Artillery School, so strongly recommended of late years by Generals Sheridan, Hancock, Schofield and other prominent officers. Possibly the governing military authorities are already considering the proposition.

A London despatch to the N. Y. *World* reports that the naval manœuvres and sham fight at Milford-Haven which attracted so much attention during the week ending Aug. 21, have tended to show that permanent forts, protecting an enormous "boom" and mine fields with electric lights on shore, to discover the whereabouts of the enemy, are insufficient for harbor protection against ships. Admiral Sir William Hewitt, who is an extremely able strategist and a dashing commander, by the aid of smoke rafts rendered the searching electric light on shore of little use. The torpedo-boats blew up, the boom destroyed the mines by means of countermines, and then one of the ironclads went through the "boom" without the slightest hindrance. If he had been a real enemy he could have forced his way up to Milford-Haven and to the Pembroke Dockyard in spite of everything that had been devised to keep him out. The sham fight itself was a ridiculous farce, by which nothing was accomplished except the waste of enormous quantities of good ammunition.

Mr. Cutting has been released by the Mexican court on the ground that Medina, the injured party, has waived his right to a civil suit for damages, and it is held that this ends the proceedings by the State. It is expected that a claim for damages will follow. The Arresures murder is still a subject of correspondence, or rather of inquiry. As it appears at present, the only act for which this Government can demand redress is that of kidnapping Arresures when he was domiciled on this side of the border line. In no event can it be expected that Mondragon will be surrendered for trial to American authorities, a special treaty clause intervening to warrant the refusal upon Mexico's part to surrender one of her citizens upon any pretext.

At an outlay of about two and one-half millions of dollars England was able during the Russian scare to obtain and arm fourteen fast cruisers, a fact which is to be borne in mind in considering the subject of our auxiliary navy. The vessels taken up by the British Government included several of the finest and swiftest merchantmen in the world. The charter payments averaged $145,462 for the fourteen vessels, the highest being $210,000 for the *Massila*, and the lowest $94,135 for the *Moor*. Besides the amounts expended for hire of the above vessels

£29,824 was expended on fittings, £51,585 on restoration, and miscellaneous expenditure amounted to £46,773, making the total cost of the fourteen cruisers £535,476.

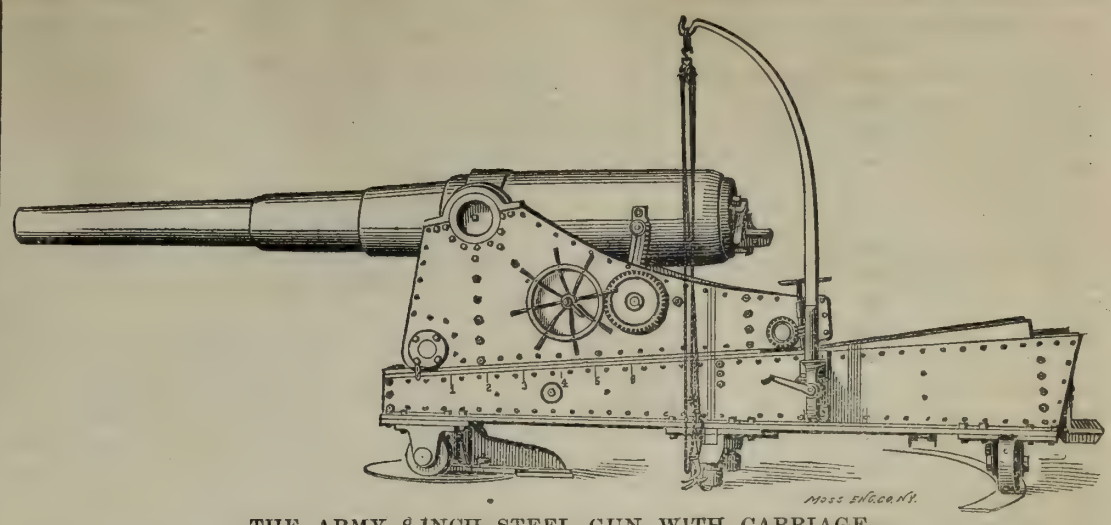
IT is evident that there are better days ahead for the Navy and especially for our younger naval officers, whose interests are identified with our reconstructing service. With reference to this a Washington correspondent of the Baltimore *Sun* very truthfully says: "In the next five years there will be a complete revolution in the floating property of the Navy. The outlook is that within that time there will be an entirely new navy with modern steel guns. It has been the cry since the war that the Navy was top heavy, there being too many officers for the number of vessels. Naval officers of a practical turn of mind say that this state of things will soon be reversed. It will be the vessels that are too many and the officers too few. Besides the new vessels will be of a type that none of the present officers understand. The old officers have passed the age when new ideas can be taken. The only source from which officers of the new navy can be drawn is young men, and in order to render these capable and efficient officers of modern steel vessels it will be necessary to give them an extended course in the management of such vessels. The old officers are reconciled to the fact that these officers will have to be depended on for commands in the future, and think that preparation should be commenced at once to fit them for the important duties soon to be imposed upon them."

IN regard to the payment of telegrams the Second Comptroller of the Treasury decides that: Where the telegram is sent prepaid by the officer, who is reimbursed by the paymaster, a copy of the telegram certified by the officer with the amount paid marked on it, may be regarded as a sufficient sub-voucher; but where the telegram is sent by another party, the receipt of the telegraph company, showing the amount paid and by whom paid, with copy of the telegram certified by the officer should accompany the voucher.

COMMODORES D. L. BRAINE and Walter W. Queen were examined on Thursday by a special board consisting of Rear Admirals John L. Worden, James E. Jouett and John H. Russell. Commodore Braine was examined for promotion in anticipation of the retirement of Admiral Russell, and Commodore Queen for appointment as Acting Rear Admiral in command of the South Atlantic Station.

THE new recruiting detail is now complete with the exception of the 7th and 9th Cavalries and the 13th Infantry. Captain Frank D. Garretty, 17th Infantry, is the latest addition to the list. It is very probable that 1st Lieutenant John W. Wilkinson will be chosen to represent the 7th Cavalry.

NO ACTION will be taken upon the charge preferred against General Fitz-John Porter by General Philip St. G. Cooke. The acting Adjutant-General has decided that too long a time had elapsed for them to be taken into consideration.



THE Lieutenant-General has taken no steps since he returned to Washington toward garrisoning Fort Myer, and it is presumed now that the subject is to be left for the decision of the Secretary of War.

TO THE credit of the delegation of G. A. R. men who passed through our city East, says a Portland, Ore., paper, there was none of that tomfoolery "Col.," "Capt.." "Maj." or "Gen." prefixed to their names on the hotel registers. They were a fine body of representative Americans, to whom the country is grateful and of whom the people are proud.

THE War Department library, which was closed some time ago by order of Secretary Endicott to enable Librarian Fitzgerald to rearrange the books and classify the works purchased during the past year, will not be reopened before September 1, at the earliest.

THE "Mutual Benefit Life Association of America," in another column, express their desire to secure agents "at all Army posts and Naval stations, and on U. S. vessels."

THE *Alta California* says: "Three well-known rifle shots, Messrs. Hermansen, Vicker, and J. P. O'Reilly, went over to Shell Mound Park to make a test of a brand new magazine rifle, owned by Mr. Vicker. The shooting machine in question is a magazine gun somewhat similar to the well-known Winchester, but differing on certain clearly defined principles from the well understood old timer. The *Alta* reporter present regards the weapon as a modification of the Sharps-Burchard magazine model, but possessing little or no recoil. The gun is a good one as a shooter, and has good power on the 200-yard range, which was all she was tried on, but the barrel is far and away too heavy for field work."

THE ARMY 8-INCH STEEL GUN WITH CARRIAGE.

LATE ARMY ORDERS.

Brig.-Gen. John Newton has been retired from Aug. 27, 1886, at his own request (S. O., H. Q. A., Aug. 27.)

Insp.-Gen. Absalom Baird is ordered to Fort Riley via Headquarters Dept. Missouri, on official business under instructions from the Lieut.-General (S. O., H. Q. A., Aug. 27.)

Paymaster Chas. McClure, granted one month's leave (S. O., H. Q. A., Aug. 27.)

Sergt. Thos. Casey, Bat. E, 3d Art., is retired at his own request (S. O., H. Q. A., Aug. 27.)

Col. Charles S. Stewart, Engineer Corps, has applied for retirement—over 40 years service.

THE CAPE TOWN CHARGE.

To the Editor of the Army and Navy Journal:

MY name has been brought before the public lately, in connection with an inquiry held on board the U. S. S. *Lancaster*, accusing me of defrauding the U. S. Treasury Department, by overcharging the war vessels visiting this port for stores, etc., on an affidavit signed by one named Walter, and supported by the consul, J. W. Siler, lately of this city. The result of the inquiry referred to was to exonerate me on all counts and the decision being that the whole affair was prompted by motives of jealousy and for the purpose of ruining me. Siler, Walter and his party evidently thought that the whole affair would have been investigated at Washington, thus precluding me of a fair hearing, they being called as witnesses, and one of them, Walter, would have escaped the two months' imprisonment he is now undergoing for embezzlement, had he gone. Siler's conduct I cannot understand, for, by evidence, he sent the affidavit signed Nov. 4, 1885, to Washington, and by the 7th of the same month, after the *Juniata* had left, and on the arrival of the *Lancaster*, Jan. 25, 1886, Siler, as consul, goes on board and recommends me, never mentioning to Capt. Porter or anyone else, that his Vice Consul, S. A. Walter, had signed any affidavit, that I whacked up with the officers, which he as well as his satellite, Walter, knew was one of the most libellous statements ever made on oath, and if he had been here, I would have immediately instituted a case of perjury against him. Further, I know I should have reported him to the Secretary of State as well as to the Secretary of the Navy, but I shall leave that to the reports now going home about him, and his character here in the colony, which is well known to nearly all the commanders and officers of the Navy who have visited this place and St. Helena during his consular régime there.

During the stay of the *Lancaster*, January-February, 1886, of about 30 days, Siler requested me to get Walter something to do, which I agreed to, employing him to entertain the officers, etc., while I was busy on board, by making small purchases for them and meeting them in my office when they came ashore. I knew nothing then of this affidavit, and, to show up treachery of Siler, he got this Walter, who was now admitted to my confidence, to make notes of my business transactions, and to go about collecting any evidence which he thought likely to crush me and to report the *Lancaster*. Knowing that this vessel was to return here in June, Siler suddenly gets leave of absence and goes home by an Italian bark, asking, or getting, a boy who was worthless to me and was also under suspension, to run away from his friends and creditors, promising him a good situation. Walter's embezzlement case having come on, he was suspended as Vice, and another one appointed. I think Mr. Siler's sore point was that I would not pan out for all the exorbitant demands made on me; so he endeavored to ruin me, as above stated. I would have forgiven him had he attacked me alone and not made such libellous statements touching the commanders and officers of the U. S. Navy, as during our term of friendship I always did my utmost to shield his faults; in fact, in many instances, wrote to commanding officers not to report him, when I knew they had left here with that intention. Now, sir, I have taken this step of writing to your journal, not only to clear my character with regard to my dealings, (which are of 16 years' duration) with the vessels of the U. S. Government, but principally to vindicate and cast aside those libellous imputations made by Siler, in his affidavit, on the officers of the U. S. Navy, and I can only do so effectually through the columns of your paper. In conclusion I may mention that the worthless boy, Stephens, will, no doubt, be found in company with Siler, who is now in Washington, and whom I defy to substantiate any of the charges made against me, principally that of *whacking it up with officers*, a term in itself so vulgar that it requires an explanation, and could only be used by such as he and those utterly void of self respect.

Requesting that you will be good enough to give this whole or part insertion in the columns of your valuable journal, I have the honor to be, sir,

Your obedient servant,

JOSEPH GRADY.

CAPE TOWN, July 21, 1886.

THE Second Comptroller recently allowed the following Mexican War claims: Wofford, John, late Capt., 13th U. S. Int., $120; Miner, Francis P., late Corporal, Gen. Serv., U. S. A., $27; Trowbridge, Henry, late Private, Co. F, 4th U; S. Inf., and Co. D, 28th, and 942 Wis. Vols., $21; Turnley, Parmenas, late 2d Lieut., 1st U. S. Inf., M. W., $75, and King, Benj., Asst. Surg., U. S. Army, $150.

List of Colleges, Universities, etc., at which officers of the Army are detailed under Section 1225, R. S.

Maine State College, Orono, Me., Lieut. Charles L. Phillips, 4th Art., detail commenced, July 1, '85.

University of Vermont, Burlington, Vt., Lieut. William H. Coffin, 5th Art., detail commenced, Nov. 18, '85.

Massachusetts Agricultural College, Amherst, Mass., Lieut. George E. Sage, 5th Art., detail commenced, Oct. 5, '85.

St. John's College, Fordham, N. Y., Lieut. Herbert G. Squiers, 7th Cav., detail commenced, Sept. 26, '85.

Cathedral School of St. Paul, Garden City, Long Island, N. Y., Lieut. Thomas Ridgway, 5th Art., detail commenced, April 21, '86.

Union College, Schenectady, N. Y., Lieut. Henry H. Benham, 2d Inf., detail commenced, Sept. 13, '86.

Cornell University, Ithaca, N. Y., Lieut. William P. Van Ness, 1st Art., detail commenced, Oct. 1, '86.

Rutgers College, New Brunswick, N. J., Lieut. John T. Honeycutt, 1st Art., detail commenced, Oct. 1, '85.

Pennsylvania Military Academy, Chester, Pa., Lieut. Geo. T. Bartlett, 3d Art., detail commenced, July 6, '85.

Allegheny College, Meadville, Pa., Lieut. Alfred M. Fuller, 2d Cav., detail commenced, April 15, '84.

Pennsylvania State College, Centre County, Pa., Lieut. Samuel S. Pague, 15th Inf., detail commenced, April 9, '86.

St. John's College, Annapolis, Md., Lieut. Chas. W. Foster, 3d Art., detail commenced, Sept. 10, '84.

West Virginia University, Morgantown, W. Va., Lieut. James L. Wilson, 4th Art., detail commenced, Sept. 29, '84.

Virginia Agrl. and Mech. College, Blacksburg, Va., Lieut. John C. Gresham, 7th Cav., detail commenced, Aug. 23, '84.

Bingham School, Orange County, N. C., Lieut. Henry Wygant, 24th Inf., detail commenced, Aug. 1, '86.

South Carolina Military Academy, Charleston, S. C., Lieut. Albert L. Mills, 1st Cav., detail commenced, Aug. 15, '86.

North Georgia Agricultural College, Dahlonega, Ga., Lieut. William C. Rafferty, 1st Art., detail commenced, Sept. 6, '84.

Alabama Agricultural and Mechanical College, Auburn, Ala., Lieut. Melzar C. Richards, 2d Art., detail commenced, Oct. 1, '85.

Agricultural and Mechanical College of Miss., Oktibbeha County, Miss., Lieut. Henry C. Davis, Jr., 3d Art., detail commenced, July 1, '86.

Thatcher Institute, Shreveport, La., Lieut. Francis J. Kernan, 21st Inf., detail commenced, June 19, '86.

Agricultural and Mechanical College of Texas, College Station, Tex., Lieut. Guy Carleton, 2d Cav., detail commenced, Sept. 6, '86.

University of the South, Sewanee, Tenn., Lieut. Edmund K. Webster, 2d Inf., detail commenced, Aug. 15, '86.

Agricultural and Mechanical College of Kentucky, Lexington, Ky., Lieut. Frederick E. Phelps, 8th Cav., detail commenced, Sept. 2, '84,

Ohio State University, Columbus, Ohio, Lieut. Augustus P. Blocksom, 6th Cav., detail commenced, July 1, '84.

University of Wooster, Wooster, Ohio, Lieut. Alfred C. Sharpe, 22d Inf., detail commenced, April 14, '84.

Ohio Normal University, Ada, Ohio, Lieut. Harris L. Roberts, 19th Inf., detail commenced, July 31, '84.

Michigan Military Academy, Orchard Lake, Mich., Lieut. Frederick S. Strong, 4th Art., detail commenced, Sept. 8, '84.

Michigan Agricultural College, Lansing, Mich., Lieut. John A. Lockwood, 17th Inf., detail commenced, Oct. 31, '84.

De Pauw University, Greencastle, Ind., Lieut. Will T. May, 15th Inf., detail commenced, July 1, '86.

Knox College, Galesburg, Ill., Lieut. Eaton A. Edwards, 25th Inf., detail commenced, June 23, '86.

Southern Illinois Normal University, Carbondale, Ill., Lieut. James P. Bell, 7th Cav., detail commenced, July 1, '86.

University of Illinois, Champaign, Ill., Lieut. Herbert H. Sargent, 2d Cav., detail commenced, Sept. 1, '86.

University of Wisconsin, Madison, Wis., Lieut. Luigi Lomia, 5th Art., detail commenced, July 6, '85.

University of Missouri, Columbia, Mo.

Iowa State University, Iowa City, Iowa, Lieut. Joseph M. Califf, 3d Art., detail commenced, July 1, '86.

Cornell College, Mount Vernon, Iowa, Lieut. Edwin S. Curtis, 2d Art., detail commenced, June 17, '86.

University of Nebraska, Lincoln, Neb., Lieut. Edgar S. Dudley, 2d Art., detail commenced, Nov. 12, '84.

Kansas State Agricultural College, Manhattan, Kan., Lieut. William J. Nicholson, 7th Cav., detail commenced, Aug. 11, '84.

University of California, Berkeley, Cal., Lieut. Geo. F. E. Harrison, 2d Art., detail commenced, Sept. 23, '86.

NEW PUBLICATIONS.

From the press of the Artillery School, Fort Monroe, Va., have recently issued the following works: "An historical account of the development of small arms and ammunition for the same and the effect of the same upon the science of war," by Lieut. C. A. Bennett, 3d U. S. Art.; "Notes on experiments with high explosives at Fort Monroe, May, 1886," by Lieut. M. M. Macomb, 4th U. S. Art.; "Comparisons of the Armaments of European nations, describing their systems of artillery," by Lieut. A. D. Schenck, 2d U. S. Art.; and "Notes on the Distribution of Iron Ores in the U. S.," by Lieut. A. W. Vogdes, 5th U. S. Art.

REVENUE MARINE.

Acting Secretary Fairchild has received a supplemental report from Special Agent G. R. Tingle in regard to the Alaska seal fisheries, dated San Francisco, August 18, in which the agent says: "On my arrival at Ounalaska I met the revenue cutter *Corwin*, Capt. Abbey, in charge of four schooners, viz., *San Diego*, *Onward*, *Thornton* and *Carolina*, the three last named being English vessels from Victoria. Captain Abbey has unfortunately been short of coal, or he would have made more seizures. He has, however, been very active, and has done good work. I urged him to remain, if he could, cruising around the island until the *Bear* arrived to relieve him."

THE STATE TROOPS.

ELECTIONS OF BRIGADIER-GENERALS.

The election of a Brigadier-General for the brigade in New York City came off at the arsenal, corner 35th street and 7th avenue, on Wednesday, Aug. 15. The affair was quiet and there was no excitement. The election was made on the first ballot. Col. Emmons Clark, of the 7th Regiment, presided. The ballot showed fourteen votes for Gen. Louis Fitzgerald, six for Gen. Daniel D. Wylie, two for Col. S. V. R. Cruger, lately of the 12th Regiment, and one for Brig.-Gen. W. G. Ward, who lately commanded the 1st Brigade, N. G. S. N. Y.

If, by the recent wholesale disbandments of generals the military authorities at Albany intended a change of policy, they will find out that their method was a mistaken one so far as New York City is concerned, for matters will remain as they were before. As it stands the whole thing might as well have been left as it was before, with the advantage of having avoided much bad blood and ill-feeling caused by disbandments and elections.

As it stands the election is a very satisfactory one to all concerned, and it could have been made unanimous, if a motion to that effect had been offered. Gen. Fitzgerald had no serious opposition to meet, and those who voted for others, did not do so because they objected to Gen. Fitzgerald, but because they "loved their own candidate better."

Gen. Fitzgerald is an accomplished and meritorious soldier, as will be seen from the following official record:

UNITED STATES SERVICE.

Sergeant, Co. C, 7th Regt., N. Y. S. Militia, in U. S. Service from April 19 to June 3, 1861; 1st Lieutenant 11th N. Y. Vols., June 2, 1861; Captain, July 21, 1861; resigned Sept. 1, 1861; Adjutant 40th N. Y. Vols., Jan. 24, 1862; Captain, May 26, 1862; Provost Marshal and Aide-de-Camp, Kearny's and Birney's 1st Division; Aide-de-Camp to Major-General Foster, 18th Army Corps; discharged July 6, 1864; Major and later Lieutenant-Colonel, 1st Regt. Militia, District of Vicksburg, Miss., and discharged in February, 1865.

NATIONAL GUARD SERVICE.

Private Co. C, 7th Regt., Dec. 30, 1857; Corporal, Jan. 4, 1860; Sergeant, Feb. 4, 1860; 2d Lieutenant, Sept. 23, 1861; 1st Lieutenant, Co. E, Dec. 6, 1861; vacated office by enlisting in N. Y. Vols., January, 1862; 1st Lieutenant, Co. E, 7th Regt., Oct. 14, 1865; Adjutant, 7th Regt., May 1, 1867; Lieutenant-Colonel, Nov. 9, 1876; Brigadier-General, March 28, 1882.

In Brooklyn the election fell unanimously upon the commander of the late 3d Brigade, Brig.-Gen. James McLeer. Gen. McLeer's record is as follows:

UNITED STATES SERVICE.

Private, Co. C, 14th N. Y. S. Militia (84th Vols.), April 18, 1861; discharged as Sergeant (loss of left arm), July 27, 1863; Brevet Captain N. Y. S. Vols.

NATIONAL GUARD SERVICE.

Private, Co. C, 14th Regt., April 18, 1861; discharged as Sergeant, July 27, 1863; 1st Lieutenant, Co. C, 14th Regt., May 27, 1865; Quartermaster, 14th Regt., Sept. 9, 1867; Major, Aug. 16, 1869; Lieutenant-Colonel, Nov. 7, 1870; Colonel, June 6, 1873; commanding 3d Brigade since Sept. 17, 1883.

When General Fitzgerald was captain and A. D. C. on the staff of General Foster, Edw. E. Potter, the brother of Asst. Bishop Potter, was Brigadier-General and chief of staff; Francis Darr, now of San Francisco, Lieut.-Colonel and C. S.; Jas. H. Strong and Geo. E. Gourand, Captains and A. D. Cs.; Francis N. Farquhar, late of the Army, 2d Lieut. F. G. Snelling, Med. Director, and Jas. C. Slaght, Captain and A. Q. M. Those who remember that period will recall the controversy of those gentlemen with Gen. D. Hunter when he assumed command of the Department of the South in February, 1863, which led to his S. O 97 of that year, against which these gentlemen protested in a letter addressed to Secretary Stanton. General Fitzgerald appears among the wounded in General Phil Kearny's report on the battle of Fair Oaks as "1st Lieut. Lewis Fitzgerald, of the 40th N. Y.," and as having conducted himself "with great coolness and bravery" in the report of Lieut.-Col. Egan, commanding.

In Buffalo the election of Brig. Gen. Peter Doyle was unanimous.

The result in Albany is the most surprising, because the election of Gen. Robert Shaw Oliver was generally considered a foregone conclusion. He was defeated, however, by a vote of 14 against 13, the favorite candidate being Col. Amasa J. Parker, the author of the well-known code of 1882. Gen. Oliver's apathy, just like that of Gen. Wylie, had doubtless much to do with his defeat.

At the meeting of the field and company officers of the 3d Brigade to elect a Brigadier General, the resolution which approves Adt. Gen. Porter's reorganization of the National Guard and G. O. 21, was unanimously adopted. The resolution reads:

Resolved, That we, the commanding officers of the 10th Battalion, several separate companies, and batteries of the 3d Brigade, hereby indorse, and we do hereby approve of General Order No. 21, Headquarters State of New York, and it is in our opinion the right move in the right direction to increase the efficiency of the National Guard of the State of New York.

(Correspondence of the Army and Navy Journal.)

NATIONAL GUARD ARTILLERY.

In view of the changes lately made by the authorities in the organization of our National Guard, it may not be out of place to bring up for consideration the subject of remodelling the artillery branch of the service. Conceded that the object of the existence of the National Guard is two-fold: 1st. To provide an armed force for the suppression of insurrection. 2d. To train the citizens of the State in the use of arms, so that in case of war efficient troops could be put into the field, the present system as applied to infantry would appear to meet these objects in an economical manner. But the condition of the artillery shows the necessity of a change in system and organization. The National Guard includes, at present, seven mounted batteries, four guns each. With one or two exceptions their condition is reported by the State authorities to be unsatisfactory. The drawbacks to the advancement of this arm are stated to be inexperience and want of knowledge on the part of officers at present in commission—the first principles of the service greatly neglected or superficially taught—too much attention paid to mounted parades, which with green horses and drivers, are practically of no benefit, while incurring a useless expense to the State.

The authorities might as well give up the idea of maintaining mounted light batteries, capable of active field service as compared with the infantry, their efficiency being mostly dependent on trained horses and drivers, and on officers possessing a much more thorough military education than National Guard officers can spend the time and energy to acquire. Even with the honest intention to become thoroughly up in their branch of the Service, their batteries are limited by circumstances to the standing gun drill, which is obsolete, a superficial knowledge of the school of the battery dismounted, and a very few manœuvres of the battery mounted, the drill in which, occurring at such rare intervals, with green horses and drivers, amounts practically to nothing at all. The firing is limited to blank charges. Thus the most important parts of the mounted field battery service are practically untaught. They can, in truth, be acquired only in the field, or in regular camps of instruction preparing troops for actual war. It goes without saying, that field manœuvres are unnecessary in riot duty. But the time and money expended on mounted batteries in trying to make them that which circumstances will not admit of, could be used to advantage in a form of Artillery Service, which could be made practically and thoroughly efficient to meet the requirements of the before-named two objects of the National Guard. Let the authorities disband all the batteries, excepting, possibly, those which possess the facilities for, and show indications of, becoming serviceable. Give to the Infantry Regiments the privilege of organizing regimental artillery companies. Properly posted military men are aware that this is no innovation. In 1809, Napoleon ordered that *each* regiment of infantry of the line or light infantry of the French Armies, should have as part of its organization an "artillery company," armed and equipped with two field guns and the necessary accessories. Such a company, as part of a National Guard infantry regiment, might be made up somewhat as follows: 1 1st Lieutenant; 1 2d Lieutenant; 1 1st Sergeant; 2 Sergeants (chiefs of sections, one to act as Q. M. Sergeant); 4 Corporals (2 as gunners and 2 as caisson corporals), and from 30 to 40 men. It should be equipped with two Gatling guns or two rifled steel guns. Howitzers should be discarded, being obsolete, and of no special value in riot duty, where cannon need only be used against barricades and out of range of small arms. These, with the limbers and caissons, should be moved by means of drag ropes. Such a company might also have charge of a small arm ammunition wagon and an ambulance.

It should also be equipped with axes, shovels, picks, and crowbars. In addition to the handling of the guns, practical range finding and firing with shell, case shot, etc., it should receive instruction in erecting street barricades and simple field works and obstructions—cutting through walls, fortifying buildings, and such other duties as would suggest themselves to an energetic commander.

The advantages of this plan seem to be that a regimental artillery company would be perfected in so much of the artillery service as the present system admits of, which, joined to the other duties mentioned, would enable an infantry regiment to act, as it should in riot duty, as an independent corps. Through contact with their infantry comrades the officers and members would acquire a knowledge of infantry tactics and military routine which is indispensable to a good artillerist, together with the rudiments of military engineering, with which every soldier should be familiar. In actual riot duty, which at best is trying to raw troops, the two branches would, through their comradeship, possess a feeling of confidence in each other which is recognized as of great value in troops of different arms acting together.

The State would be put to no additional armory expense, and the cost of maintenance would be more than covered by the amount saved by disbanding the practically useless mounted light batteries now existing. E. E. B.

Brooklyn, Aug. 23, 1886.

ATTENDANCE AT THE NEW YORK CAMP.

The orders fixing the number of service days necessary, in order to entitle the men to pay, had the desired effect, and the attendance was regular, as will be seen from the following schedule:

14th Regiment.—June 20, 35 officers, 427 men; June 23, 34 officers, 434 men; June 26, 35 officers, 432 men: average attendance, 77.71 per cent.

8th Regiment.—July 4, 19 officers, 344 men; July 7, 20 officers, 345 men; July 10, 19 officers, 346 men; average attendance, 78.80 per cent.

74th Regiment.—July 4, 22 officers, 271 men; July 7, 23 officers, 277 men; July 10, 23 officers, 280 men; average attendance, 74.49 per cent.

69th Regiment.—July 11, 38 officers, 586 men; July 14, 36 officers, 592 men; July 17, 38 officers, 596 men; average attendance, 73.29 per cent.

65th Regiment.—July 18, 29 officers, 417 men; July 21, 30 officers, 432 men; July 24, 30 officers, 427 men; average attendance, 85.16 per cent.

11th Regiment.—June 27, 29 officers, 352 men; June 30, 27 officers, 355 men; July 3, 27 officers, 355 men; average attendance, 79.42 per cent.

32d Regiment.—June 27, 26 officers, 334 men; June 30, 25 officers, 337 men; July 3, 25 officers, 339 men; average attendance, 79.92 per cent.

13th Separate Co.—2 officers, 32 men; or 60.71 per cent. of aggregate.

24th Separate Co.—3 officers, 20 men; or 47.91 per cent. of aggregate.

26th Separate Co.—July 18, 3 officers, 95 men; July 21, 3 officers, 97 men; July 24, 3 officers, 98 men; average attendance, 95.87 per cent.

32d Separate Co.—July 18, 3 officers, 65 men; July 21, 3 officers, 64 men; July 24, 3 officers, 64 men; average attendance, 87.57 per cent.

1st Separate Co.—July 25, 28 and 31, 4 officers, 49 men; or 96.36 per cent. of aggregate.

8th Separate Co.—July 25, 2 officers, 68 men; July 28, 2 officers, 67 men; July 31, 2 officers, 67 men; average attendance, 96.03 per cent.

25th Separate Co.—July 25, 28 and 31, 3 officers, 37 men; or 75.47 per cent.

34th Separate Co.—July 25, 28 and 31, 3 officers, 51 men; or 93.10 per cent. of aggregate.

29th Separate Co.—July 25, 2 officers, 47 men; July 28, 2 officers, 47 men; July 31, 2 officers, 46 men; average attendance, 81.18 per cent.

31st Separate Co.—July 25, 2 officers, 45 men; July 28, 3 officers, 46 men; July 31, 3 officers, 46 men; average attendance, 78.10 per cent.

2d Separate Co.—July 25, 3 officers, 73 men; July 28, 3 officers, 72 men; July 31, 3 officers, 75 men; average attendance, 74.33 per cent.

39th Separate Co.—July 25, 3 officers, 57 men; July 28, 3 officers, 57 men; July 31, 3 officers, 58 men; average attendance, 86.32 per cent.

10th Separate Co.—July 25, 2 officers, 43 men; July 28, 2 officers, 42 men; July 31, 2 officers, 43 men; average attendance, 87.95 per cent.

12th Separate Co.—July 25, 2 officers, 70 men; July 28, 1 officer, 70 men; July 31, 2 officers, 70 men; average attendance, 76.95 per cent.

18th Separate Co.—July 25, 28 and 31, 3 officers, 44 men; or 90.38 per cent. of aggregate.

30th Separate Co.—July 25, 28 and 31, 3 officers, 57 men; average attendance, 86.12 per cent.

3d Separate Co.—August 1, 4 and 7, 3 officers, 48 men; or 98.07 per cent. of aggregate.

7th Separate Co.—August 1, 3 officers, 53 men; August 4, 3 officers, 53 men; August 7, 3 officers, 52 men; average attendance, 77.22 per cent.

21st Separate Co.—August 1, 2 officers, 61 men; August 4, 2 officers, 62 men; August 7, 2 officers, 62 men; average attendance, 87.47 per cent.

33d Separate Co.—August 1, 4 and 7, 3 officers, 60 men; or 98.44 per cent. of aggregate.

4th Separate Co.—August 1, 3 officers, 53 men; August 4, 3 officers, 48 men; August 7, 3 officers, 50 men; average attendance, 83.21 per cent.

14th Separate Co.—August 1, 4 officers, 55 men; August 4, 4 officers, 55 men; August 7, 4 officers, 52 men; average attendance, 80.75 per cent.

15th Separate Co.—August 1, 3 officers, 40 men; August 4, 3 officers, 38 men; August 7, 3 officers, 39 men; average attendance, 73.42 per cent.

23d Separate Co.—August 1, 3 officers, 44 men; August 4, 3 officers, 44 men; August 7, 3 officers, 43 men; average attendance, 64.08 per cent.

16th Separate Co.—August 1, 3 officers, 38 men; August 4, 3 officers, 37 men; August 7, 3 officers, 37 men; average attendance, 73.73 per cent.

27th Separate Co.—August 1, 3 officers, 57 men; August 4, 3 officers, 58 men; August 7, 3 officers, 59 men; average attendance, 90.82 per cent.

36th Separate Co.—August 1, 4 and 7, 3 officers, 52 men; or 93.33 per cent. of aggregate.

37th Separate Co.—August 1, 4 and 7, 3 officers, 39 men; or 70 per cent. of aggregate.

PREMATURE EXPLOSIONS.

A deplorable accident recently happened at the firing of a salute at Oakland, Cal., in honor of the G. A. R. veterans. A gun exploded twice prematurely, and one man had his hand blown off, his other hand badly shattered and his face burned; while several others were badly injured in various ways.

A correspondent asks:

Is not this a strong argument against the "theory" that we can put efficient soldiers in the field in any numbers without any previous training? Not one of the young men mentioned knew a solitary thing about handling a piece of artillery, and the result was all were more or less injured. It is perfect folly to imagine that soldiers can be improvised in a day; the use of arms, and engines of war, like every other profession, takes time to learn, and neither artillery, infantry, or cavalrymen are born such. Even after long and patient drilling many men turn out failures.

In the case cited, the people who fired the guns seem to have had but little, if any, training as artillerymen, and our correspondent is right in what he says about the general superficial training of our soldiers in that branch. Accidents of the sort referred to are altogether too common, and they are the result in the first place of laxity in the drill of the men in handling field artillery and in the second place to the fact that we persist in keeping in service obsolete muzzle-loaders and expose to their dangers imperfectly drilled men, while in every other country with the least military pretensions the breechloader has been for years adopted as the service arm.

RIGHT TO COURT-MARTIAL A MILITIAMAN.

Kansas City, Mo., Aug. 19.—A Court-martial was recently ordered by officers of the State militia to try Rollin Bingham, lieutenant in a Kansas City regiment, for misconduct during the last annual encampment.

Judge Slover, of the Circuit Court, granted a habeas corpus, and to-day he made permanent an injunction against the State holding such Court-martial. The court held that members of the militia are liable to Court-martial only while performing military duty, and that attendance on encampments does not come under that head. The court, therefore, holds that the State law for the regulation of militia discipline is practically inoperative.

This law consists of the embodiment of United States Army rules of war, the constitutional effect of which is held to be that control over the militia can be enforced only through the Federal Government.

MILITIA ITEMS.

After a long illness, on Friday, Aug. 20, Adjt. George B. Davis, of the 13th Regt., passed into eternity. His illness began early during the past winter with a bronchial trouble, which gradually developed into consumption. Though he fought bravely against the disease he was of late completely confined to his bed and almost wasted away to a skeleton. He was an excellent officer and a fine gentleman, having been in the 13th Regt. since September, 1872. He was appointed Adjutant by Col. D. E. Austen, in September, 1880, and held that position until death called him away.

MASSACHUSETTS ENCAMPMENT.

The annual encampment of the 2d Corps Cadets, was held at Centennial Grove, Essex, Mass., Aug. 10, 11, 12, 13, and 14, inclusive. For all practical purposes the grounds are very well adapted for a camp. They are situated about 27 miles from Boston and 11 miles from the armory of the Corps in Salem. The grounds are on the border of a large body of fresh water, which offers excellent facilities for bathing, and the grove which surround the camp furnish a shade and allow company drills to be held without exposing the men to the sun. The organization is composed of two companies, both quartered in the same building in Salem, Mass., and is commanded by Lieut.-Col. J. Franklin Dalton. It has also a Major and an Adjutant, Quartermaster, Surgeon, Assistant Surgeon, Paymaster and Chaplain, and a Sergeant Major, Hospital Steward, and Drum Major.

Unlike the brigades this command pitches and strikes its own camp, and the entire organization arrive on the grounds the day preceding the tour of duty and lay out the grounds and pitch the tents, which in the encampment just closed was very thoroughly and systematically done.

The hours of service were as follows: Reveille, 6 A. M.; breakfast, 7; surgeon's call, 7.30; 1st sergeant's call, 8; guard mounting, 8.15; fatigue immediately after guard mounting; drill, 9.30; recall, 10.30; dinner, 12.30 P. M.; 1st sergeant's call, 3.45; drill, 4; recall, 5; inspection and muster, 5.30; dress parade, 6; supper, 6.30; tattoo, 10; taps, 11.

Camp was reached Wednesday, at about 9 A. M., and the grounds had been carefully policed. Four of the enlisted men were engaged in a game of tennis, two of whom were in their shirt sleeves, but it is only fair to state that during our stay in camp these were the only men seen out of their quarters in that condition, although when off duty the blouses of officers and men were not in all cases buttoned, but well open, displaying immaculate vest fronts. This is a custom which is noticeable at all the camps and should be discontinued.

The first duty witnessed was company drill and it is with pleasure that we speak of the careful and intelligent manner in which the company commanders explained movements and corrected errors. Of the matters which were corrected we make no mention, but to the following points which were not corrected we wish to call the attention of the company commanders: A failure on the part of the men to take the full length step at the command, March, and of the rear fours to march squarely to the wheeling point in changing direction. In executing the manual, when the left hand is at the height of the right shoulder the left elbow should be held close to the body; in coming to the order the piece should be *placed* on the ground and not brought down with a thud, and the lieutenants should learn to carry their swords properly when marching.

At the battalion drill which followed, the companies were not equalized, Co. A appearing with 20 files and Co. B with 16. The Lieut.-Colonel was the only officer who wore his belt as prescribed by General Orders, *i. e.*, outside his blouse. It would look much better if all the officers would provide themselves with black leather belt and bronze scabbard for an undress duty.

The battalion drill was excellent, guides being well informed in their duties and prompt in taking position. Markers well instructed and in every instance properly posted by the Adjutant and Sergeant Major.

Inspection and muster, which followed, were executed strictly in conformity with the Tactics, the only error being made by the 1st Sergeant of Co. A, whose men fixed bayonets before they fell in. Dress parade followed, and, like the preceding ceremonies, was as nearly perfect as one can hope to see.

At tattoo roll call Thursday, the men in Co. A all wore overcoats and were very orderly in the ranks, In Co. B five

men were seen without their overcoats, and the steadiness of the men was not equal to that of the other company. At this encampment the band falls in and answers to roll call at reveille and tattoo, the same as the companies, but it would be well if they paid a little more attention to uniformity of dress on these occasions. At the sounding of taps a man was stationed in each tent and at the sounding of the last note extinguished the light, to remain so. This was one of the features of the camp of the corps and is worthy of special mention; the only lights allowed after taps being at headquarters, at the guard tent, and in the quarters of the officer of the day.

In company with the Adjutant General, who was in camp in the capacity of Inspector-General, we visited the guard tent and heard his questions, which covered every conceivable emergency, answered in the main very intelligently, which showed that the men had a good understanding of their duties; on grand rounds we found the sentinels well informed. The ceremony of receiving the countersign from the commander of the rounds at the guard tents was properly executed.

During the night absolute quiet reigned. At reveille roll call the men fell in promptly. After the roll they had a fifteen minute drill in the setting up exercises.

Guard mounting followed, the detail for the ceremony consisting of 32 privates, one sergeant, and two corporals. The ceremony was well done, the only error being made by the corporal who was assigned as left guide and guide of the second platoon, who upon taking his post brought his piece to the order, the guard being at carry.

The position of the Adjutant's sword when at parade rest was not strictly in conformity with the Tactics. At the guard tent the commander of the old guard should have waited until the new guard had passed before he brought his men to carry, and the corporal in posting the relief should, when he relieved the man at the guard tent, have left him behind.

Short company and battalion drills were held and improvement noticed, the commanding officer explaining the principles of alignments.

The Governor arrived at noon, Friday, and was received with a salute of 17 guns fired from a small yacht cannon, at 40 second intervals

At the review at 3.30 the formation and steadiness of the men was excellent, when the companies wheeled to the right and started for the march past. All went well until just as they executed the second change of direction an unevenness in the ground caused the first company to waver, and as the change of arms came at that time the men were unable to steady down, and, as a result, the first company which, up to this time was doing well, was obliged to march past with a wavering line. The second company evidently profited by the experience of the other and made an excellent appearance. The salutes of the Lieut.-Colonel and staff, while well delivered, were a little hasty. The company officers saluted in good shape. When left into line wheel was executed, the left guide of the second company failed to halt promptly, and, as a result, the company was a little crowded. The right guide of the first company came into the line and inverted his piece, which was altogether wrong, as this was not a successive formation. The battalion marched across the parade ground a second time in line in good shape, the only out being the left general guide who brought his piece to a carry, the battalion being at a right shoulder.

Inspection, muster and dress parade closed the exercises of the day and was witnessed by a large number of spectators.

Considerable attention was given to rifle practice at 200 and 500 yards during the week. There was considerable interest taken in the contest for the "Dewson Medal," which was presented the Corps by Lieut. James B. Dewson, Co. G, 7th New York. It is to be competed for annually and awarded to the man making the best score in 7 shots at 200 yards.

The entire corps mess together, the quartermaster purchasing the necessary supplies and hiring the cooks and waiters. The quartermaster, 1st Lieut. Edward A. Simonds, is worthy of special mention, he having served 42 years.

The attendance was, on Tuesday, 119; Wednesday, 120; Thursday, 121, and Friday, 123, or 77.34 per cent. The health of the men was good, but two men being excused from duty. On the following points the Corps should be marked excellent: Thorough policing of the camp, the deportment of the men at all times and especially after taps, the neatness of the quarters—no unnecessary luggage or fanciful interior decoration being seen, and entire absence of excessive indulgence in intoxicants, the cleanliness of uniforms and equipments, and last, but not least, military courtesy.

(Correspondence of the Army and Navy Journal.)

ILLINOIS NATIONAL GUARD.

THE 2d Brigade, I. N. G., went into camp at "Camp Lincoln," Springfield, on Monday, August 2, and remained until the following Sunday evening and Monday morning.

The camp of the 2d Brigade was arranged the same as that of the first, with one notable exception.

In the 1st Brigade all the dining tents were placed in the rear of the headquarters' tents in each regiment, and the cook tents back of the dining tents. In this way all the odors and smoke were removed from the "living" part of the camp. In the 2d Brigade, however, the company dining and cook tents were placed between the tents of the men and those of the company officers, so that any one who wished to go from the parade ground or the company streets to a company officers' tent, or to regimental headquarters, had to run the gauntlet of the cooks, who were preparing the meals, to say nothing of the smoke and the odors. The way the 2d Brigade had this arranged may be more military, but that of the 1st Brigade has the merit of common sense.

Aside from this, I saw little to criticise in the camp. The men have improved wonderfully since last year. I could scarcely believe it was the same brigade I saw at Springfield last August. During the year that has passed, Adjt. Gen. Vance has succeeded in replacing the motley uniforms which were seen at the last camp, with the neat service uniform of the State. It was this Brigade, too, which did such remarkably good service at East St. Louis during the troublous times of last spring, and the schooling they received there was worth a dozen brigade encampments as they are usually conducted. The improvement over last year was marked not alone in guard duty and salutes, but in the general bearing of the men, and General Reece and the officers of the 2d Brigade are entitled to much credit for having brought about the change. During the year the 7th regiment was consolidated with the 5th, and the 9th with the 8th. There was an unfortunate affair in the 5th, from one of the companies of the old 7th. The men became dissatisfied with their captain, he having had occasion to reprimand some of them while at East St. Louis last April. This was done in a manner which gave offence to some of them. On their return a petition was circulated and signed by both lieutenants, the non-commissioned officers and the men, requesting that Captain Risse be ordered before a board of examination to ascertain whether he was competent to command the company. This was forwarded direct to State headquarters, and Col. Hamilton was ordered to investigate the matter and report. As a result, the officers and non-commissioned officers who had signed the petition were ordered in arrest, and a court martial ordered to try those who were guilty of such a breach of discipline. The officers plead guilty, and were sentenced to be relieved of their commands for sixty days, and reprimanded in orders.

Gov. Oglesby approved the findings and sentences and further said: "So much of the sentences as relate to suspension from rank, is remitted, from the fact that such suspension would excuse the officers from attendance at drills, and carry with it no punishment. It is necessary that officers of the Illinois National Guard should remember that they are soldiers to all intents and purposes, and that they must submit to such laws, rules, regulations, customs and usages as govern military forces. In the present case a violation of one of the first principles of discipline was committed by two commissioned officers, who themselves should act as examples to the enlisted men in a scrupulous observance of all points of discipline. The fact of being tried by a Court-martial and degraded by its sentence is humiliating to honorable men, and it is to be hoped that the lesson in these cases will not be forgotten and a further reprimand will not be necessary."

No rain fell during the stay of the 2d Brigade, and the dust was almost intolerable. Gen. Reece had a sprinkler on the ground all the time, but its effect was scarcely perceptible. Fortunately the weather was not as hot as that which greeted the 1st Brigade, and the necessary drills were not so severe on the men, and much work was done. The 2d Brigade have had the advantage of a rifle range at their camp for several years, and I think for this reason they did better work at the butts than the 1st Brigade.

I saw so little of the work of the 2d Brigade that I am unable to criticise them, except in this general way, and, while hoping that next year may show as great an improvement as this has done, can scarcely believe it possible, for then they would be, indeed, a model brigade.

On Monday evening last the 2d Infantry, I. N. G., opened their new armory, corner Washington Boulevard and Curtis street. This building, which was once a skating rink, was purchased last spring by the Commercial Club and presented to the regiment. The building is of brick, 200 by 125 feet, one story high, with a truss roof. The price paid was about $15,000, and about $10,000 more has been spent in fitting it up. The present lease has three years to run, and, I understand, an arrangement has been made to secure the renewal for seven or ten years more. The floor is 187 by 77 feet, with a small gallery at the north end; seats for spectators on the west side, while the south and east sides are taken up by the company rooms, eight in number. These average about 15 by 32 feet, and are simply partitions which run up about 10 feet from the floor, without ceiling. This appears to me to be a great drawback, as it will not only be hard to keep them warm in winter, but the men cannot use them as assembly rooms during the evenings when other companies are drilling, as any loud conversation will disturb the company drilling. The regiment has the now renowned Haymarket square for battalion drills, this being only five or six blocks distant.

Col. Wheeler and the officers of the regiment took pride, on Monday night, in showing their friends their new home, and well they may, for taken as a whole, it is a good armory. A number of the officers of the 1st Infantry and the Cavalry were present and the evening was pleasantly passed.

On Saturday night, Col. Hamilton and Lieut.-Col. Durand inspected the 2d. The time was inopportune, as the regiment had just returned from camp, and, I understand, the notice that the inspection was to occur was only received a few days previous, and many men were out of the city. At any rate, the number present was small.

The first formation was in single rank and the companies marched off to re-form in double rank. In this formation, although there were no markers, the guides of the color company did not come out, nor did the guides of three other companies come on the line and invert their pieces. When the formation was nearly completed, the Adjutant saw there was not room enough on the left, so, with guides on the line, he gave the command "Carry Arms!" and then side step to the right. Well, they did it.

There were a number of variations from Upton in addition to this, but it must be remembered that the 2d has never had an opportunity for battalion drill. And there is no doubt that the officers will profit by the new armory, and ere another year has passed, the "breaks" will be few and far between.

The rifle range is not yet completed, but Capt. Helton, the new I. R. P., hopes soon to have a first-class range, 160 or 170 feet long. Lieut. Hare, of Gen. Terry's staff, is, I understand, superintending its construction, and this is sufficient guarantee that it will be built right.

Major C. R. E. Koch, 1st Inf., I. N. G., has been detailed by special orders from State Headquarters, to visit the camp of the Connecticut National Guard at Niantic, Conn., and report results of his inspection.

H. T. L.

(Correspondence of the Army and Navy Journal.)

OHIO NATIONAL GUARD.

THE 4th Brigade of the Ohio National Guard encamped at Sandusky, Aug. 12, remaining eight days. It was composed of the 2d, 3d, and 16th regiments Infantry, there being no Artillery, the remaining battery of the 1st encamping at Fort Wayne, Indiana.

Col. Norton, of the 16th, commanded. The location was hardly as good as that of the other encampments, the area being so small that the company streets were very narrow and the tents crowded together. There was not enough room on the drill ground for many battalion movements. There was not so much drill as at the other camps, as several excursion parties of officers and soldiers went out on the lake, and the street car line to the centre of the city was within a few rods. It would be much better for the National Guard were the State to buy or lease ground near the centre of it and a considerable distance from any town; this could be made a permanent camp ground, the advantages of which are many, and the result will be more efficiency of the troops and in the end economy to the State.

The work done this summer has been, on the whole, very satisfactory.

The National Guard is full of the right spirit and making great progress. It only needs a little closer application to essential routine work and less attention to fancy street parades and reviews and *fine* tactical points.

WISCONSIN.

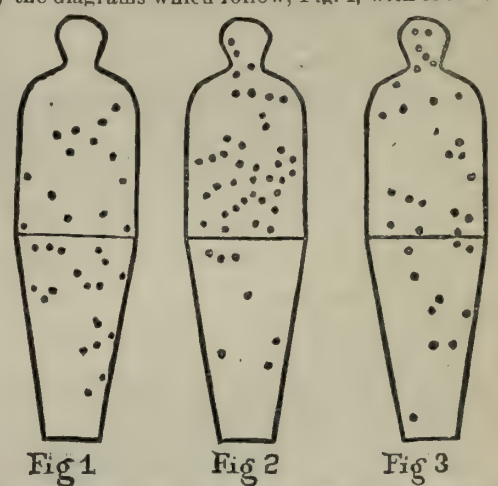
THE new armory of the Light Horse Squadron at Milwaukee, received its housewarming on Monday evening, Aug. 16. A select audience, numbering about 1,500 persons, was present. Col. Charles King made the presentation speech and he was tremendously applauded at its close.

THE WIMBLEDON MEETING.

THE Wimbledon meeting of last month showed that the interest in rifle shooting is not abating in England, and though it is not worth while to take up space with what is after all largely a matter of pot-hunting, there are some interesting features in the meeting to which it is well to allude. One was the public school shooting, of which the *Times* says: "In point of importance the international contest, of course, takes the principal position, but the struggle between the public schools is one of very great interest to a number of persons spread through the country who in the ordinary way are not in the habit of following the records of rifle shooting with especial care. Older men also, men who hold high places in the rifle-shooting world, are apt to study the public school shooting with the view of extracting from the score lists the names of those young shots who may be expected to become prominent in the future."

This year, for the fifth time since 1861, the prize, the Ashburton Shield, was won by a boy from the Harrow School. Naturally connected with the greater competition for the Ashburton Shield is the Cadet Corps match, which is contended for by files of Volunteer cadets under 17 years of age at the same ranges as the Ashburton Shield. The majority of the competitors are connected with the public schools, but the individuals who shoot for the Ashburton Shield are excluded from this competition.

Another interesting competition was that for the Brinsmade Challenge Shield, competed for by not more than one team of six from any ship of the Royal Navy, the different depots of Royal Engineers, any Brigade of Royal or Marine Artillery, or any battalion of Regular Infantry, Militia, or Rifle Volunteers. Nine shots at unknown distances from 600 to about 200 yards at targets representing the figure of a man, which will be visible nine times for 15 seconds at uncertain intervals, one shot being fired at each appearance of the figure. This was won by H. M. S. *Cambridge* by the score indicated by the diagrams which follow, Fig. 1, with 33 hits.



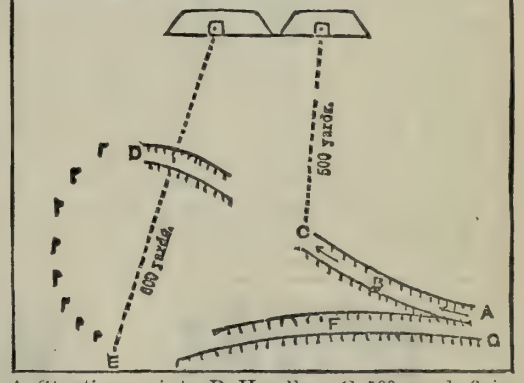


Fig 1 Fig 2 Fig 3

Of the same character was the Mullens, the targets in which are shown in Figs. 2 and 3, the first, with 44 hits, being that of the 1st Berks, R. V.; the second, the 5th Lancashire, R. V. This contest was open to teams from each battalion of six Volunteers qualified to fire for the Queen's Prize. Moving target representing the figure of a man, six feet in height, 20 inches wide across the chest, and diameter of head eight inches. Unknown distances; one minute's rapid firing at a point between 400 and 300 yards, then three volleys at a point between 300 and 200 yards, finishing with half a minute's rapid firing at 100 yards.

The match for the Royal Cambridge Challenge Shield, which is also illustrated here, was won by the 7th (Queen's Own) Hussars. It was open to sections of four mounted men, on *bona fide* troop horses, from each regiment of Household Cavalry and Cavalry of the Line. Sections to ride about three-quarters of a mile, taking three flights of hurdles in the course, and fire dismounted. Seven shots each at 500 and 600 yards.

A, Starting point; B, Hurdles; C, 500 yards firing point; D, Hurdles; E, 600 yards firing point; F, Hurdles; G, Finishing point.

Another competition of similar character was the Loyd-Lindsay, confined to sections of four mounted men from regiments of Yeomanry, Cavalry, Volunteer Light Horse, Mounted Rifles, and troops of Mounted Infantry. The proceedings are the following: The men are drawn up in line at a starting-point and directed to follow a course of about three-quarters of a mile in which are three flights of hurdles. At a range 500 yards from one of the butts a halt is made and each man fires not more than five rounds; not more than two men can fire simultaneously, since the remaining men are required to hold the horses. The firing over, a route marked out by flags, is taken to the 600 yards range, at which the same process is repeated. Then the men gallop back to the starting point, the object being to complete the course in the least possible time and to obtain the greatest possible number of marks at the ranges. There were 12 competing sections, whose scores and times are given below:

	Time. M. S.	500 Yds.	600 Yds.	Ded.	Tl.
£50, Dorsetshire Yeomanry	9 23	63	56	0	119
£30, 2d Devon Mounted Rifles	8 57	63	43	0	106
£20, Ayrshire Yeomanry (2d team)	9 34	44	52	0	96
£10, Warwick Yeomanry (2d team)	9 1	53	41	0	94
£10, Ayrshire Yeomanry (1st team)	8 25	61	32	0	93
Dorsetshire Yeomanry (1st team)	8 54	50	39	0	89
Border Mounted Rifles (2d team)	9 4	47	39	0	86
Border Mounted Rifles (1st team)	9 59	50	27	0	77
Warwick Yeomanry (1st team)	9 49	44	31	0	75
1st Middlesex Mounted Rifles	9 45	41	33	0	74
Hants Yeomanry	10 17	51	20	7	64
Gloucester Yeomanry	11 24	45	22	21	46

An experiment of an unusually interesting nature was tried with the new Enfield-Martini rifle. About a score of the most renowned marksmen in the kingdom tried the new weapon at 1,000 yards, but the competitors were using weapons to which they were not accustomed, weapons with a trajectory entirely different from that of the Martini and approximating to that of a match rifle, and carrying a lighter bullet than the ordinary Government rifle. These facts contributed to render difficult any calculations as to windage, and the morning happened to be one upon which this was a matter of great difficulty. The competitors, on the whole, seemed to be satisfied with the weapon, although there were a good many differences of opinion on the matter. The following were the principal scores obtained:

Capt. Lamb (prize of £5).....3 5 3 5 5 4 2 5 5 0 4 3 2 5 5—56

	Pts.		Pts.
Lieut.-Col. Humphrey	54	Major McKerrell	45
Capt. Godsal	51	Mr. Whitehead	44
Major Walter	51	Sergt. Dods	44
Mr. Turner	50	Mr. Braithwaite	43

Col. Sir H. Halford	48	Major Young	41
Corporal Caldwell	48	Capt. Gibbs	41
Captain Dutton Hunt	47	Private Lowe	37
Private M'Vittie	47	Qr. Mr. Gouldsmith	36
Col. Slade	47	Corporal Parry	30

This is described as the most successful meeting ever held on Wimbledon common, "remarkable for the increased skill shown by the various competitors, for the discovery of marksmen hitherto comparatively unknown, and for the presence of an unprecedented number of visitors from distant lands."

In a speech at a dinner given to the teams who had competed for the Kolapore Cup, Sir Henry Wilmot alluded to the extraordinary increase in the number of Colonial teams by which the present year had been marked, and wished that the colonies had been allowed to take a more conspicuous part in certain recent wars, and expressed an opinion that the most effectual kind of Imperial Federation was that which was to be found upon Wimbledon common.

ANSWERS TO CORRESPONDENTS.

X. H. X.—You stand No. 3 on Commissary Sergeant list.

O.—No. 1 on the Commissary Sergeant list has about 18 years service.

W. G. W.—The report of Naval Constructor Hichborn is not for sale. A copy might be furnished by the Navy Department, on applying therefor.

Service.—The Act approved March 3, 1875, directed that "No more appointments shall be made in the grade of military storekeepers in the Quartermaster's Department and this grade shall cease to exist as soon as the same becomes vacant by death, resignation, or otherwise, of the present incumbents."

W. C. R.—The officer of the day is one of the persons authorized to give orders to sentries. If therefore he should demand a sentry's musket on post, the latter would have no other alternative than to obey.

L. R. asks: 1. How long has Battery K, 2d Art., been stationed at Fort Monroe, Va.? Ans.—About twenty years.

2. Who are the officers of the battery at the present time? Ans.—Captain J. H. Calef and Lieuts. G. S. Grimes, A. D. Schenck, G. F. Barney and W. P. Stone.

3. When will the battery have a change of station? Ans.—Whenever the proper military authorities so decide.

G. S. Harrington.—When a company is exercising in the manual first sergeants do not execute arms port except otherwise directed. If in any other way the necessity should arise for the company to execute arms port the first sergeant would certainly not be excepted. First sergeants execute parade rest on dress parade. We know of no other instructions in this matter besides the Tactics. You might, however, find more explicit directions in some of the works elucidating Tactics; for instance, Lieut. Reed's book.

Soldier asks the weight of the lightest bullet, and the quantity of the smallest charge of powder which can be used in a cartridge, Remington 50 cal., for a gallery range of 200 feet, with accuracy; and whether a round (sphere) bullet used similarly to a conical one, has any injurious effects upon the rifle, and give as good results. Ans.—Use a spherical bullet of smaller cal. than the rifle, with a linen patch lubricated, on top of from 6 to 8 grains of powder in the shell, and your gallery practice will improve your gun for real work, if a new one, by rendering it less liable to "lead" when you come to use the regulation naked bullet.

C. S.—An English army corps is supposed to consist of 34,526 men of all ranks, and 12,934 horses. In it there are 3 divisions and a cavalry brigade, with 5 batteries of corps artillery, 2 reserve ammunition columns, the pontoon train, field park, and other establishments peculiar to the corps. A division consists of 2 brigades of infantry, a regiment of cavalry, and a battalion of rifles, 1 company of Royal Engineers, 1 company of Commissariat and Transport Corps, and 3 batteries of artillery. A brigade of cavalry consists of 3 regiments, 1 battery of artillery, and 1 company of Commissariat and Transport Corps. A brigade of infantry consists of 3 battalions and 1 company of Commissariat and Transport Corps.

THE MESS.

Go fling the starry banner out,
Unfurl it to the sky,
Let every noble freeman shout
To see it float on high.

Let Canada and Mexico,
Go—anywhere you wish—
For news has come to town, you know,
That Grover's caught a fish.

A man died of "alcoholism" a few days ago, and his widow has been advised to apply for a pension, on the ground that her husband "contracted the disease in the Army."

"You sit on your horse like a butcher," said a pert young officer, who happened to be of royal blood, to a veteran General who was somewhat bent from age. "It is highly probable," responded the old warrior, with a grim smile; "it is because all my life I've been leading calves to the slaughter."

The El Paso *Times*, "in order to keep abreast with the spirit of energy" which characterizes the press, sent a representative recently to Paso del Norte in order to obtain inside knowledge as to Mexico's preparations for war. A suitable subject for an interview having been secured, the representative asked:

"Have you seen any troops moving or massing anywhere?"

The reply came: "Troops? Well, I should smile! Troops? Gosh, I've seen more troops 'n you could count in a month! The woods is full of 'em! From the city up to Paso del Norte the train what I cum up on jes plowed its way through troops! They were so close they had to sleep standin'. Them what was killed by the train never made a hole in the ranks. Troops? Well, I should sort o' pucker up my under jaw! An' they're all comin' up by horse-power, too, except some, an' they're comin' up by 'burro-power,'—two soldiers to one power. Troops?"

Lieut. George Monroe had a day off and went to Nantasket. On the boat, with several friends, there was a talk about personal resemblances.

"Wohl! I have been daken for Bismarck, in Berlin," said a German gentleman.

"Aussi, of a time in Paris, I was, as the Count de Paris, saluted, so like him I resembled," said a teacher of French.

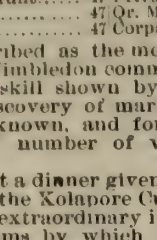
"That's nothing," said George; "a fellow came up and slapped me on the back, right on Tremont street the other day, and cried out—'Great Cæsar! Is that you?'"

The recent batch of promotions in the Army included one in the —th Infantry, which recalls a good story to an old Army man here. Many years ago a 1st lieutenant in the —th died at a far western post where the commanding officer was an old bachelor light cavalryman. The lieutenant left a charming widow, beloved of all who ever knew her, and—a 2d lieutenant of his company, who was next for promotion. For the sake of the story the names of Farr, Damp, and Beavens are extemporized to designate the cavalryman, the charming widow, and the second "luff." Major Farr did all that a brother officer could do under such circumstances, and thinking often of the bereaved widow, finally concluded he loved her. He obtained a long leave, came East, laid siege, and Mrs. Damp rejoined the Army as Mrs. Farr. It happened that Lieutenant Beavens, then promoted to the dead man's place, was in the same city at the time, also on leave, and while other officers were expressing surprise at Major Farr's promotion to the ranks of the Benedicts, remarked: "Well! I suppose we may as well regard poor Damp's affairs fully administered upon now. I've got his rank and Farr's got the widow. It seems to settle everything up."—*Critic.*

The Italian papers state that the Pope has purchased the Palace Mignanelli for the sum of $300,000, and intends fitting it up as a printing and publishing office, which will probably entail an additional expense of $100,000. It is said that he has long been engaged in publishing religious works, and that the business has grown to large dimensions. Wait till His Holiness begins to read his proofs for a test of his infallibility.—*Commercial Advertiser.*

FOREIGN ITEMS.

The Commander-in-Chief of the Army of Madagascar, was, not many years ago, a midshipman of the English Navy.



The French are adopting the system England had in 1849 of keeping certain ships half manned, as the English do their 1st Reserve Squadron, except during their yearly monthly cruise.

Some tall shooting is reported from India. Lieut. Orr, of the Hyderabad Contingent, it is said, has bagged in a month a dozen tigers and tigeresses, besides a wild buffalo, antelope and other large game.

The Japanese Army Department intends to construct 50 new forts, and to rebuild all the forts now existing, so as to make the coast defences of Japan more efficient. No fewer than 900 guns have been ordered from the manufactory of Herr Krupp.

Grave doubts are, it is said, entertained about H. M. S. *Imperieuse.* She is already immersed down to her water-line, and yet has seme 1,400 tons of stores to ship, which when put on board will probably bring her down another 20 inches, causing the armor belt to be lower in the water than was originally intended, and the torpedo tubes to be submerged contrary to design. The *Naval and Military Record* says: "Sir Edward Reed's heart must laugh within him on hearing how well his prophecy anent this vessel's unseaworthiness has proved his critical acumen in naval architecture. Fancy the Constructive Department of the Admiralty being 1,400 tons out of their reckoning as to her displacement, the model barbette ship with her stores and armament floating some four feet lower in the water than she was designed to do."

ROYAL

BAKING POWDER
Absolutely Pure.

This powder never varies. A marvel of purity, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of ow test, short weight, alum or phosphate powders. *Sold only in cans.* Royal Baking Powder Co., 106 Wall st., New York.

NEW YORK

A NEW compound called "candillium" having been submitted to the Admiralty by Mr. F. Noel as a substitute for gun-metal, experiments are to be made at Chatham with samples.

THERE is a movement on foot in the French Army to do away with the canteen, except for service, and to allow soldiers in barracks or permanent quarters to dine like other civilized beings off plates and dishes.

IT does not seem that Persia entertains very friendly feelings towards Russia at present. A recent telegram from Aschabad says that the Persian Government has strictly prohibited the export of corn and fruit into the Trans-Caspian.

"It is believed," says the *Times*, "that one of the results of the recommendations of the committee now engaged in considering the question of compulsory retirement in the army will be the prospective abolition of the rule under which an officer attains the rank of colonel by reason of four years' service as a lieutenant-colonel."

GENERAL BOULANGER has appointed the officers who are to represent France at the foreign manœuvres. No French mission will be sent to the manœuvres taking place in Alsace. In Italy, owing to the outbreak of cholera in the Peninsula, the military manœuvres have been countermanded. The officers appointed are: For Austria-Hungary—Gen. de La Bonninière de Beaumont, Lieut.-Col. Chevroton, Capt. de Pange, Military Attaché. For Russia—Gen. de la Hayrie, Lieut.-Col. de Masin, Captain La Chaise, Col. de Sermet, Military Attaché; Capt. Moulin, second Military Attaché. For Sweden—Commandant Cardot, Attaché; Capt. Appert, Military Attaché. For Switzerland—Commandant Zédé, Commandant Sever, Military Attaché; Capt. Francfort.

THE latest despatches from Central America seem to indicate that the revolution in Honduras headed by General Delgado is a failure.

LORD CHARLES BERESFORD, as Naval Lord of the Admiralty, is to make a thorough weeding out of "brown paper" ships and one paper reports 80 ships as scheduled for sale.

A SHIP laden with dynamite and gunpowder which had gone ashore exploded at Havre. There were originally 22 tons of dynamite on board besides the powder. A portion had been removed, but 100 cases of dynamite and 900 kilogrammes of powder exploded. The explosion was terrific, and several persons in the town were injured.

THE French Admiralty have given orders for the construction of a seagoing torpedo vessel of a new type and unparalleled speed, to be called the *Ouragan*. Her length will be 46 mètres, breadth, 4.80 mètres, draught, 2.55 mètres, with a displacement of 148 tons. In addition to her torpedoes she is to be mounted with two guns. Her speed is to be 46 kilomètres an hour. This, it is claimed, will be quicker than the speed of any war vessel existing.

According to *Le Progres Militaire*, English contractors have offered to construct for the Spanish Government four large ironclads, each upwards of 10,000 tons, speed 25 knots, to carry two guns, price over £400,000 each; fifteen men of war, of the *Esmeralda* type, of 3,000 to 5,000 tons, minimum speed 20 knots; armament, guns of 25 to 30 tons. Ten to cost £280,000 each, five £200,000 each; 40 torpedo cruisers, upwards of 2,500 tons each, speed 20 knots; 20 to cost £80,000 each, 20 £40,000 each; 120 torpedo boats, 75 to carry coal for voyages of from 1,500 to 2,000 miles, 45 for coast defence, the former to cost £11,000 each, the latter £8,000; 6 transports of 4,000 tons, at £16,000 each.

A BICYCLIST troop, on the Austrian model, will take part in the forthcoming manœuvres of the 18th French Army Corps.

THE Trans-Caspian railway to Merv has been completed. It is to be continued to the Amu-Daria, and will have other ramifications of a purely strategical nature.

VERY poor accounts are received of the Armstrong guns supplied to the Brazilian Government. The outcry against these guns has been so great in Rio that Admiral Costa Azevedo has retired, and the new Minister of Marine has announced that the approved and adopted ordnance of the Brazilian Government is the Whitworth, and that the Armstrong system has only been on trial.

THE Portuguese warship *Alphonso Albuquerque*, having on board the King of Portugal, failed to find Plymouth, England, and is reported to have gone up Channel as far as the Start Point in a vain search for the western port. Here she was met by a yacht and shown the way back to the Eddystone, where a pilot was taken on board, and the ship was brought safely into port.

SINCE 1879 the French Army military bands perform "The Marseillaise" wherever they are called to take part in any ceremony, but as it appears there is no recognized version of the French national tune, bandmasters make the most of their musical abilities to arrange, transpose, and elaborately orchestrate it according to their personal taste or inspiration. Hence, no two bands could perform together without a previous rehearsal in common. Gen. Boulanger has now asked all bandmasters to forward to him their favorite transcriptions. One among these will be selected to become the official national tune. It will be published at the expense of the State.

A SAFE INVESTMENT

For both large and small sums of money is offered in the DEBENTURE BONDS of the NEBRASKA LOAN AND TRUST CO. and the CENTRAL LOAN AND LAND CO. These bonds are secured by mortgages on productive real estate after the manner of securing National Bank notes, bear 6 per cent. interest and run 10 years. Experience proves that they are one of the safest investments ever devised, and they are commended to the attention of officers of the Army and Navy.

For sale by JOHN ROCKWELL, 20 Nassau St., New York.

NEW ENGLAND MUTUAL Life Insurance Company, OF BOSTON, Mass.

Assets, - - - - - - $17,846,546.65
Liabilities, - - - 15,238,761.16
Total Surplus, - $2,607,785.49

This Company insures the lives of Officers of the Army and Navy without extra premium, except when actually engaged in warfare, which premium if not paid at the assumption of the extra risk *will not invalidate the policy*, but will be a lien upon it, and also gives liberty of residence and travel, on service, in all countries, at all seasons of the year, without extra charge.

Special attention is called to the LIFE RATE ENDOWMENT policy, which combines insurance at low cost with an investment at a fair rate of interest, and at the same rate of premium formerly charged for life policies. Every policy participates in the *annual* distribution of surplus, and has endorsed upon it the cash surrender and paid up insurance values provided by Massachusetts laws.

Fall Term begins September 9, 1886. For Illustrated Calendar, with full information, address, E. TOURJEE, Dir., Franklin Sq., BOSTON, Mass.

A NORWEGIAN Commission, after experimenting with Krupp and De Bange guns, have unanimously decided in favor of the latter.

THE superintendent of the English Royal Gun Factory has received the report of the experts sent down to examine the guns of the *Ajax*. The guns are reported to be perfectly sound and serviceable. The A tube is uninjured and the statement that the axial vent had gone wrong arose from the fact that the vent had not been properly screwed home after it had been taken out for cleansing purposes.

SHELLS seem to be much more effective as civil than as military weapons. It is reported that as a wagon load of old artillery material, which a dealer in iron had bought from the English Government at public auction, was being discharged on the 14th inst. at the purchaser's place of business in St. Petersburg, a 9 in. shell, supposed to have been duly unloaded, burst in the midst of a number of people, killing 16 persons, including four children, on the spot. Others were more or less seriously injured.

THE Manchester Ship Canal will extend from the deep water of the Mersey at Eastham—a point on the Cheshire shore just above and almost opposite to Liverpool—and will proceed thence by Ellesmere Port, Runcorn, Warrington and Barton, to Manchester, being in length about 35 miles. It will have a minimum depth of 26 ft. of water, and will be wide enough for the largest vessels to pass each other at any point, and may be compared with Suez and Amsterdam Canal in width and depth as follows: Suez—Gill., Depth, 26 ft.; bottom width, 72 ft. Amsterdam—Depth, 23 ft.; bottom width, 89 ft.

Broad Arrow says: "Those who viewed, as we did the other day, the torpedo boats in commission as they lay in one of the wet docks at Portsmouth, can well realize the discomfort of those on board, which, at all events in harbor, might be reduced to a minimum, were they attached to a properly fitted and torpedo-carrying armed store-ship, which we have all along advocated. A dozen seagoing torpedo-boats, say from 115 to 150 ft., or even 200 ft., might form a squadron under the command of a captain. The officers and crew would then have a proper mess on board the ship we propose, and the boats themselves, when moored for the night, have a proportion of their crew only in charge.

NOTWITHSTANDING the difficulties arising from exceptionally heavy rains and the hardness of the rock met with, work on the Corinth Canal proceeded successfully during last winter. In the month of December alone 500,000 cubic feet were excavated.

COLONELS RAVENHILL and Phillips, who were sent to Canada, to purchase such horses as could be landed in England within the regulation price find that the prices asked by Canadian horse breeders, and the freights demanded by railway companies and shipowners together, have prevented much business being done.

A SHORT time ago the Portuguese Government commissioned the Austrian Small Arms Factory at Steyr to supply 40,000 rifles of small calibre, on the system of Lieut. Guèdes. Shortly after commencing the manufacture, however, it was found by experiment on the range at Tancos, that the weapons in question were highly defective, and Lieut. Guèdes was unable, it seems, to suggest any practical improvement. The *Deutsche Heeres-Zeitung* (Berlin) now reports that an arrangement has been concluded between the Portuguese War Office and the Austrian factory, by which the latter is to supply 40,000 Kropatschek rifles of 8 mm. calibre in place of the condemned weapons.

THE immense masses of snow, says the *Deutsche Heeres-Zeitung* (Berlin), by which all northern countries are covered during many months of the year, would render all military operations impossible but for the aid of the snow-shoe. In Norway snow-shoe exercises are annually undertaken in winter; and the following instance may afford some idea of their military value: A detachment of infantry was ordered to cross a plateau 100 m. high and 10 km. long, the places of departure and arrival being of equal elevation. The main body, without snow-shoes, required, it was found, 2 hours 45 minutes; the advanced guard, with snow-shoes, 1 hour 45 minutes; the patrols, with snow-shoes, from 1 hour 25 minutes to 1 hour 30 minutes. The men provided with snow-shoes arrived quite fresh; those without them were wholly exhausted at the end of their journey. On the following day a number of men with snow-shoes covered the double distance in 2 hours 30 minutes; and on another occasion the single journey required only 1 hour 8 minutes.

R. W. TANSILL & Co., Chicago, are now making especially for the Officers of the Army and Navy a new and very fine Havana hand-made cigar, known as "TANSILL'S REINA." They are put up in beautiful packages of 25 cigars, each cigar banded. They come in three sizes, 4¼, 4½, and 4¾, inches, while their moderate cost, viz. $65, $70, and $75 per thousand brings them within the reach of the entire Service.

BENSON'S CAPCINE PLASTERS are well known in the Army and Navy as the most convenient and effective external remedy. For sprains, coughs, rheumatism, sciatica, and all ailments arising from exposure they excel every other application, giving relief and cure in a few hours. Avoid worthless imitations under similar names. Seabury and Johnson, Chemists, New York.

STEAM-HAMMERS, HYDRAULIC PRESSES, ETC., ETC., WITH FIXTURES AND MACHINERY FOR CASTING AND FINISHING PIECES OF ALL SIZES UP TO ONE HUNDRED TONS WEIGHT.

Castings from Gun-Iron a Specialty.

A FAVORABLE OPPORTUNITY
TO
Officers of the Army and Navy
To Obtain Additional Life Insurance at a Nominal Sum.

As many officers are desirous of obtaining insurance upon their lives in excess of that furnished by the Benefit Associations of the two Services, we would call their attention to the advantages offered by an institution organized upon a similar plan, namely:

THE MUTUAL BENEFIT LIFE ASSOCIATION OF AMERICA.

Through this Association additional insurance can be obtained as cheaply as from the Mutual Aid Associations of the Army and Navy, with the addition only of the cost of conducting the business, which is very moderate, as it is distributed over a large line of policies—the total amount of insurance written at this date being over twenty millions of dollars.

The success of the Army Mutual Aid Association, and the Navy Mutual Aid Association, have made officers familiar with the workings of this plan of insurance. It is far less expensive than the old plan, and quite as safe where the affairs of a company are well conducted; and when it comes to that, it is not safe to deal with any company whose affairs are not well conducted, as some officers have already learned to their sorrow. It is to be admitted that the large accumulation of assets of which some few of the old line companies boast is a pledge of safety, but it is to be remembered, on the other hand, that these assets have been taken from the pockets of the insured, and there is no prospect that they will ever be returned to them or to their heirs, as the cost of yearly insurance, aside from the useless accumulation of property, will, on the average, more than equal the amount returned to the beneficiaries of the insured.

The guarantee of safety in the Mutual Benefit Life Association is the interest of each member to maintain an insurance which costs him less than one-third what it does in companies which proceed upon the theory that the honesty and prudence of a board of directors, chosen by themselves to administer upon an enormous estate, are more to be depended upon than those of the average man, who is prompted to fulfill his pledges by the strongest motives that can appeal to the class of men who seek insurance—the desire to make provision for their families in the event of death. Abundant experience shows that that insurance is the safest, as well as the cheapest, which trusts to this instinct. At the same time, the Mutual Benefit Life Association, to cover contingencies that cannot be foreseen, and which may affect its policyholders without their fault, sets aside a portion of the amount received from each mortuary premium paid, and deposits it to its special and personal credit as a reserve fund the accumulation of which will, it is calculated, after ten years furnish a fund which will greatly lighten the burden of insurance thereafter.

The Mutual Benefit Life Association of America invites inquiry into its methods. It would be glad, if possible, to obtain the address of some one at each Army post, at each Naval station, and upon the vessels of the Navy and the Revenue Marine, who will undertake to act as its agent upon proper terms, to investigate its methods and to explain them to those who may desire insurance.

MUTUAL BENEFIT LIFE
Association of America.
Home Office: 240 BROADWAY, New York.

Incorporated under an Act of the Legislature of the State of New York, passed May 12, 1875, for the insuring of lives at cost.

Depositary of General Fund—The National Citizens' Bank of the City of New York.

Trustee of Mortuary and Reserve Fund—The Farmers' Loan and Trust Company of New York.

AN EXTRAORDINARY RAZOR.
HAS BEEN INVENTED BY THE QUEEN'S OWN COMPANY of England. The edge and body is so THIN and FLEXIBLE AS NEVER TO REQUIRE GRINDING and hardly ever setting. It glides over the face like velvet, making shaving a luxury. It is CREATING A GREAT EXCITEMENT in EUROPE among experts, who pronounce it PERFECTION. $2 in buffalo handle; $3 in ivory. Every razor, to be genuine, must bear on the reverse side the name of NATHAN JOSEPH 641 Clay Street, San Francisco, the only place in the United States where they are obtained. Trade supplied; sent by mail 10c. extra or C. O. D.

NEW YORK
CONSERVATORY OF MUSIC

Proposals For Quartermaster's Stores.

NEW YORK DEPOT OF THE QUARTERMASTER'S DEPARTMENT, HOUSTON ST. Cor. Greene, New York City, Aug. 14, 1886.

SEALED PROPOSALS, in triplicate, subject to the usual conditions, will be received at this office until 11 o'clock A. M., Sept. 14, 1886, at which time and place they will be opened in the presence of bidders, for furnishing and delivering at this depot, Miscellaneous Quartermaster's Stores, such as Tools, Iron Pipe, Fittings, etc., etc., specified on schedule to be seen and had at this office.

The Government reserves the right to reject any or all proposals, or to accept, as may be most advantageous to the Department.

A preference will be given to articles of domestic production and manufacture, conditions of price and quality being equal, and such preference given to articles of American production and manufacture produced on the Pacific coast to the extent of the consumption required by the public service there.

Blanks and information as to bidding, etc., will be furnished by this office on application.

Envelopes containing proposals should be marked "Proposals for Quartermaster's Stores, to be opened Sept. 14, 1886," and be addressed to the undersigned.

HENRY C. HODGES,
Lieut.-Colonel and Deputy Quartermaster-General, U. S. A., Depot Quartermaster.

ARMY AND NAVY JOURNAL.

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOLUME XXIV.—NUMBER 6. WHOLE NUMBER 1202. | NEW YORK, SATURDAY, SEPTEMBER 4, 1886. | SIX DOLLARS PER YEAR. SINGLE COPIES, FIFTEEN CENTS.

Publication Office, 240 Broadway, N. Y.

THE great earthquake on the evening of August 31, which wrought such havoc in the South, especially in Charleston, S. C., has been the sensation of the week.

THE gold medal of the Military Service Institution of the United States for the prize essay of 1886 has been awarded to Colonel A. A. WOODHULL, Medical Department, U. S. A. The essay by Colonel R. I. DODGE, 11th U. S. Infantry, received honorable mention. The subject, as may be recollected, was "The Enlisted Soldier."

THE Second Comptroller, in a long opinion recently rendered, holds that the accounting officers of the Treasury cannot allow claims for compensation for the use and occupancy of real property by troops during the war in the border States or in the region of military operations, unless some express agreement or contract was entered into at the time.

THE construction of four new forts at Antwerp for the defence of the passages of the Scheldt has been commenced. They are of the new system, with ironclad turrets. The old forts of the Vauban system, which are now nearly useless, will be gradually demolished. Perhaps it would be better to ship them to the United States; our economical Congress might be disposed to buy them.

THE Irishmen living at Innishowen were under the impression for a time that war between England and Ireland had actually been declared. A 150 lbs. shot fired from H. M. S. *Inscrutable* landed in their vicinity, demolishing a shed and raising consternation in its vicinity. Some years ago there was a similar accident, the Coastguard station and the farms on Ireland's Eye being visited by a flight of shells on the cliffs from men of-war practising, which cleared the natives out in all directions.

THE *United Service Gazette* complains that the English transport service is so short of material hat they let the Volunteers at Aldershot go without their breakfast, and left them to fast until they returned to camp at 3 P. M., after an exceedingly heavy day's work. Even the baggage had to be conveyed to the railway stations in PICHFORD'S vans. England may have the men, and the money, too, "by jingo," but, if the English service papers are to be believed, her guns are unreliable, her bayonets useless, and in various ways she is playing the role of "Athelstane the Unready."

UNDER the operation of the royal warrant issued in 1881, no fewer than seventy-one English lieutenant-colonels of cavalry on full pay will have to retire next year, having reached the limit of service at six years in their substantive rank. It is expected that this rule will be rescinded. If not, one will be retired after but one year in command; six after less than one year and six months; twelve after less than two years; twenty with two years or upwards; and thirty six with less than two years and six months. Altogether fifty-four officers would be removed with less than three years' service in command. One is but thirty-eight years of age; two are but forty-two; two are but forty-three; one but forty-four, and three but forty-five.

SOME of the daily papers are making much ado about nothing in criticizing the manner in which the order was issued retiring General NEWTON, Chief of Engineers. These foolish reports have been published without a knowledge of the facts in the case. The circumstances are these: General NEWTON on August 26 received formal notice of his appointment under the New York City government, and late the same afternoon he proceeded to the War Department and made application for retirement under the 40 years' service act. The Adjutant-General, as Acting Secretary of War, immediately directed that the necessary order be prepared announcing the retirement, and at the same time telegraphed the Secretary of War the fact that General NEWTON had applied for retirement. On Friday morning the order was presented to General DRUM for signature and, being signed, was immediately issued. Later in the day a telegram was received from Secretary ENDICOTT, requesting information as to the law governing such retirements and directing that no action be taken until he looked into the matter. The Acting Secretary thereupon recalled the order temporarily and informed the Secretary that the law was mandatory, leaving the President no discretion after the application for retirement had been made. Mr. ENDICOTT, understanding this, had no further reasons for delaying the matter, and the Acting Secretary being so informed, the order was thereupon officially promulgated.

J. H. C. DALTON, B. A., Trinity College, Cambridge, has in the last number of the Journal of the Royal U. S. Institution an interesting calculation, showing the deviation of the rifle bullet, due to the rotation of the earth. He finds that the lateral deviation for the same distances varies as the sine of the latitude, and is to the right on the northern and to the left on the southern hemisphere; being zero at the equator, which would seem to be the ideal place for establishing a rifle range, except for the fact that there you find the maximum vertical deviation which is always zero at the poles. The vertical deviation is always upward when the targets are more easterly than the firing point, and the maximum vertical deviation is when the range is due east and west and zero in any range due north and south. In the latitude of Wimbledon, 51 deg. 25 min., the lateral deviation is 6.14 inches to the right or within one one thousandth of an inch of that. When the range faces east or west the maximum vertical deviation is 4.9 inches. The horizontal and vertical displacements of a bullet on the 1,000 range at Wimbledon is 4.61 inches downward and 6.14 inches to the right. This requires 25 seconds of elevation for its correction. The amount of correction required is independent of the length of the range, depending only on the time of flight of the bullet; that is, if a bullet from one rifle at 1,000 yards were to arrive at the target in the same time as a bullet from another at 800 yards, the same correction would be required for both the rifles at their respective distances.

GRANT in his Memoirs gives a hint which may be of service to some officers. He compliments Colonel STEVEN KEARNEY as a gentleman, a thorough soldier and an excellent post commander. His excellence was shown, GRANT tells us, in this, that while requiring his officers to promptly attend their drills and duties and when at those duties to conduct themselves in the most strict and soldierly manner, he did not during the hours between their duties harass them by petty restrictions. The result of GRANT'S observation of post commanders was that those who in time of peace worried their officers when off duty by petty restraints, and interfered with the pleasure and comfort of their troops, did not in war show themselves to be good soldiers. Some of our officers have apparently overlooked the fact that our last war was officially declared to have ended twenty-one years ago, for they continue to maintain the restraints which are only essential in time of war. That officers should be held strictly to duty there can be no doubt, but when an officer is off duty is it absolutely essential to the integrity of the Service that he should be held like a school boy strictly accountable for his every movement? At most posts any officer wishing to be absent from the post for half an hour, although he may have no duty to perform for several hours, must (like a small boy) hunt up the post commander and obtain special permission. A Lieutenant must, in addition, first hunt up and obtain his Captain's permission. Often an officer could go and return in the time it takes him to get permission to go, and as the seniors when found are not necessarily civil to their juniors, a post too often becomes like a prison to its officers.

NOTWITHSTANDING that the policy of Congress is to practically discourage ship building in the United States, that industry is obviously at present in a more prosperous condition than it has been for two or three years past. In the construction of iron ships, it may, indeed, be said that the outlook is more promising than it has ever been. We noticed some weeks since the contract made by JOHN ROACH AND SONS' Chester Works, with the MALLORY Company for a large iron steamer for the New York and Galveston Line. At Wilmington it is understood that the local firms, HARLAN, HOLLINGSWORTH AND Co., and others, are doing well, though rather in the direction of yachts and pleasure craft than of commercial constructions. The steam yacht building by HARLAN, HOLLINGSWORTH AND Co. for WILLIAM K. VANDERBILT, is to be one of the largest, if not the largest, of its type in the world, and, though not especially designed for speed, is a sea-going vessel of the first-class. At Philadelphia the shipbuilding yards on the upper Delaware are all doing well, and that of WILLIAM CRAMP'S SONS, employing 1,800 men, has ten months' work ahead. Four steamers are very nearly ready for launching, a fifth, the *Seminole*, a large iron ship for W. P. CLYDE AND Co., having left the stocks on Saturday last. Besides this the keel of an iron steamer of considerable size for the Metropolitan Steamship Company, of New York, to be named the *Herman Winter*, after the consulting engineer of the line, was laid last week, and the *El Monte*, of the new Morgan Line, had a successful trial trip. The present week an iron vessel to ply between Tampa, Fla., and Havana has been laid down. These facts are exceedingly encouraging for the future, not only of the shipbuilding but the structural iron and plate-rolling industries, indicating, as they do, that American enterprise and skill have not yet lost their faculty of achievement, either in the way of design or execution. On the Pacific Coast a new vessel for Government service was launched last week at San Francisco, from the dock of the Union Iron Works. She is of a steel, 125 feet long by 25 feet beam, and named the *General McDowell*.

PERSONAL ITEMS.

LIEUTENANT H. B. SARSON, 2d Inf., who is at Maywood, Ill., on leave, has received a two months' extension.

GOVERNOR ZULICK, of Arizona, has been visiting friends in Newark, N. J., before returning to the Territory.

CHAPLAIN G. G. MULLINS, U. S. A., has arrived at St. Louis, Mo., and will establish his permanent home there.

LIEUTENANT C. A. CHURCHILL, 5th U. S. Infantry, has taken charge of recruiting matters at Fort A. Lincoln, D. T.

LIEUTENANT M. H. BARNUM, 3d Cavalry, a recent graduate, has been spending his leave at Thousand Islands, N. Y.

CAPTAIN J. F. STRETCH, 10th U. S. Infantry, has started East from Fort Union, N. M., on a four months' leave.

CAPTAIN GEORGE W. CRABB, 5th U. S. Artillery, left Fort Hamilton, N. Y. H., on Wednesday, to be absent for a month.

LIEUTENANT-COLONEL HORACE JEWETT, 3d Infantry, has been assigned, on promotion, to command of Fort Missoula, Montana.

GENERAL JAMES B. FRY, U. S. A., came to New York from Newport, R. I., early in the week, registering at the Windsor Hotel.

CAPTAIN C. A. COOLIDGE, 7th Infantry, recently called East by the death of his mother, will rejoin at Fort Laramie, Wyo., next week.

CAPTAIN JOHN S. WHARTON, U. S. A., lately before a Retiring Board, is visiting friends at No. 52 West 124th street, New York City.

CAPTAIN J. H. DORST, 4th U. S. Cavalry, has returned to Fort Leavenworth from his trip to Albuquerque to confer with Gen. Miles.

PAYMASTER CHAS. MCCLURE, U. S. A., will spend the month of September on leave and join at Newport Barracks, Ky., early in October.

MAJOR W. F. RANDOLPH, U. S. A., and family, have returned to Fort Hamilton, N. Y. H., from a visit to friends in Rhode Island and Maine.

INSPECTOR-GENERAL ABSALOM BAIRD, U. S. A., left Washington this week for Chicago to consult with Gen. Terry, thence to Fort Riley, Kansas.

THE late Major-General McDowell, U. S. A., is honored in the naming of the new Government steel screw steamer just launched at San Francisco.

MAJOR D. C. POOLE, Paymaster, U. S. A., has recently returned to Vancouver Barracks, W. T., from a short visit to friends in the Mohawk Valley, New York.

LIEUTENANT F. A. EDWARDS, 1st U. S. Cavalry, late in charge of the Cavalry Recruiting Rendezvous at Cincinnati, leaves there next week on a month's leave.

LIEUTENANT W. S. SCOTT, 25th U. S. Infantry, recently called East by the death of his wife, will return to Fort Meade, Dakota, towards the end of September.

DOCTOR F. H. HOADLEY, who accompanied the Greely Relief Expedition, under Lieutenant Garlington, was recently placed in the insane asylum at Bloomingdale, N. Y.

MAJOR H. P. CURTIS, Judge Advocate, U. S. A., took charge on Tuesday of the legal matters of the Division of the Atlantic, and has moved into quarters at Governor's Island.

LIEUTENANT D. J. RUMBOUGH, 3d U. S. Artillery, of San Antonio, is rejoicing over the advent of a son and heir. The young gentleman has been named Stanley Maddox Rumbough.

CAPTAIN SELDEN A. DAY, 5th Artillery, received his commission of Captain August 26, the anniversary of the battle of Cross Keys, in West Virginia, his first hard fight, 25 years before.

MAJOR W. MCK. DUNN, 2d U. S. Artillery, was in Washington this week from Maine, where he has been spending a portion of the summer. He is due at Little Rock Barracks in a few days.

JUDGE-ADVOCATE ASA BIRD GARDINER, U. S. A., is in poor health, and it is doubtful if he will be able to assume the duties of Judge-Advocate of the Department of the Missouri for some time to come.

CAPTAIN C. E. DUTTON, Corps of Engineers, U. S. Army, has made an elaborate report to the Geological Survey on Crater Lake, Oregon. He regards the lake as the deepest body of fresh water on this continent, attaining a depth of 2,005 feet.

LIEUTENANT W. H. COFFIN, 5th U. S. Artillery, has been much praised for his efficient inspection, recently, of the Vermont Militia. The Burlington *Free Press* says: "Lieutenant Coffin has been indefatigable in his efforts to promote the success of the muster and has won the high regard of the troops."

THURSDAY of this week, Sept. 2, was a great day at Fort Hancock, Tex., the occasion being the silver wedding of Colonel S. B. M. Young, U. S. A., and Mrs. Young, and the marriage of their two daughters, the Misses Edith and Burton, to Lieutenants J. T. Knight, 3d Cavalry, and G. W. Read, 5th Cavalry. Particulars, of course, are not yet to hand, but it can be easily imagined that the triple event would be an eventful and a very pleasant one.

LIEUTENANT R. H. YOUNG, 4th Inf., on sick leave, is at Grayson Springs.

CAPTAIN C. C. DE RUDIO, 7th Cavalry, is spending a few days at Cape May, N. J.

CAPTAIN C. A. P. HATFIELD, 4th Cav., has returned to duty with his troop in Arizona.

LIEUTENANT W. H. BALDWIN, 7th Cav., is East from Fort Meade, D. T., on a month's leave.

COLONEL R. I. DODGE, 11th Inf., has completed a most interesting inspection of Iowa troops.

GENERAL C. C. AUGUR, U. S. A., recently shot by a negro in front of his house, is able to be out again.

LIEUTENANT O. M. LISSAK, 4th U. S. Artillery, lately at Fort Monroe, has joined at West Point for duty.

MAJOR ALEX. MACKENZIE, Corps of Engineers, U. S. A., was a recent guest at the Planters' Hotel, St. Louis.

COLONEL S. C. KELLOGG, A. D. C., has been spending a few days at Fort Monroe, Va., accompanied by his son.

SURGEON J. C. BAILY, U. S. A., of Fort Monroe, Va., is spending a few weeks' leave at Old Sweet Springs, W. Va.

COLONEL E. F. TOWNSEND, 11th Infantry, attended, officially, this week, the encampment of the militia of Dakota Territory.

LIEUTENANT F. M. H. KENDRICK, 7th Inf., is visiting at St. Paul, Minn., preparatory to entering upon a tour of recruiting duty.

COLONEL C. L. BEST, 4th U. S. Artillery, will spend most of next week in the camp of the Rhode Island militia at Oakland Beach.

COLONEL R. N. BATCHELDER, U. S. A., visited old friends in New York this week, making his headquarters at the Hoffman House.

COLONEL H. M. BLACK and Capt. J. T. Haskell, 23d U. S. Infantry, returned last week to Fort Wayne, Mich., from a trip to Mackinaw Island.

THE engagement of Lieut. F. L. Palmer, 21st U. S. Infantry, and Miss Mollie Simpson, daughter of Chaplain Simpson, U. S. A., is announced.

MRS. CUSTER, widow of Gen. G. A. Custer, U. S. A., is said to be exclusively devoting herself to the preparation of a biography of her husband.

IT is reported on good authority, says the Kansas City *Times*, that Lieutenant John Y. F. Blake, 6th Cavalry, will shortly resign from the Army.

COLONEL J. M. MOORE, U. S. A., General Ruger's Chief Quartermaster, has left Fort Snelling on a visit to Fort Buford and Camp Poplar River.

SIR CHARLES DILKE, accompanied by the Earl of Kingston, was in Winnipeg last week, registering as J. C. Tatlow. They are en route to Australia.

LIEUTENANT ARTHUR MURRAY, 1st U. S. Artillery, and Mrs. Murray are visiting relatives at Old Point Comfort, and will shortly leave for the Pacific Coast.

LIEUTENANT JOHN E. MYERS, 3d Artillery, has left San Antonio, Texas, for the North, on leave, and will join for duty at Washington Barracks in October.

GENERAL BADEAU, in his latest paper on General Grant, gives an interesting account of the inner history of Grant's irreconcilable conflict with Andrew Johnson.

LIEUTENANT C. H. HUNTER, 1st U. S. Artillery, has left Fort Monroe for San Francisco, where he will shortly be married, and then join at Vancouver Barracks, W. T.

LIEUTENANT E. A. MILLAR, 3d U. S. Artillery, left Fort Monroe, Va., early in the week, and will shortly start for San Antonio to join Lancaster's Light Battery.

MR. JOHN BAULCH, chief of the Fort Monroe fire department was in New York this week, and was tendered a reception by the Live Oak Exempt Firemen's Association.

LIEUTENANT J. W. BENÉT, 5th Artillery, under recent promotion, will remain on duty with the Light Battery at Fort Hamilton, N. Y. H., until Oct. 1, when he will join Brinckle's Battery L at the same post.

CAPTAIN MYLES MOYLAN, 7th Cavalry, on completing the service in connection with the French Army manœuvres for which he has been selected will spend several weeks in Europe before returning home.

CAPTAIN H. C. CUSHING, 4th U. S. Artillery, has rejoined at Fort Trumbull, Conn., from a ten days' sojourn at Fisher's Island, N. Y., with his battery, where it had been engaged in long range and skirmish target practice. The range at Fisher's Island is said to be one of the finest in the country.

THE Brackett *News* has the following Fort Clark items:

Captain Remington went to Eagle Pass to join his company Saturday....Lieut. Cunningham and Lieut. West came up from Camp Eagle Pass Tuesday ...Major Bernard, who had charge of the annual rifle competition, arrived the past week, accompanied by Lieut. O. M. Smith, Inspector of Rifle Practice....Comy. Sergeant D. W. Carroll left Tuesday for Fort Apache. Universal regret is felt at the departure of the sergeant. The good wishes of his many friends accompany him.

E. V. SMALLEY, in *Northwest*, says:

I recently spent a pleasant hour at Fort Missoula with Colonel Gibson and Lieut. Fremont and their families. Col. Gibson, just ordered to the command of Fort Keogh, comes of a long line of soldier ancestors. His grandfather was an officer in the Revolutionary War, and was killed at the battle known as St. Clair's defeat. Lieut. Fremont, is a son of Gen. John C. Fremont, the heroic "pathfinder" of the early days of Western exploration, the conqueror of California, the Republican nominee for the Presidency in the campaign of 1856; and the first author of an emancipation proclamation during the War of the Rebellion. General Fremont is now writing his memoirs. I was shown proofs of some of the engravings for the work made from the original daguerreotypes taken by a member of Fremont's famous expedition across the plains.

LIEUTENANT E. A. MILLAR, 3d U. S. Artillery, was in New York this week.

COLONEL S. E. BLUNT, U. S. A., will arrive at Fort Leavenworth about the middle of September.

CAPTAIN F. D. BALDWIN, 5th Infantry, left Fort Custer Aug. 29 with his company for Fort Totten, D. T.

MRS. SHERMAN, wife of Gen. W. T. Sherman, was in New York this week, stopping at the Fifth Avenue Hotel.

COLONEL C. A. WOODRUFF, U. S. A., was at Grand Isle, Neb., this week, with his light battery from Fort Leavenworth.

LIEUTENANT P. READE, 3d U. S. Infantry, Inspector of Rifle Practice, Division of the Missouri, has arrived at Fort Leavenworth.

COLONEL R. S. LA MOTTE, U. S. A., was in New York this week on his return journey from the Pacific Coast to Plattsburg Barracks, N. Y.

LIEUTENANT A. CRONKHITE, 4th U. S. Artillery, who is spending a leave at Afton, Va., will rejoin at Fort Monroe, Va., about the middle of September.

LIEUTENANT JOHN MCCLELLAN, 5th U. S. Artillery, has relinquished charge of the Quartermaster's and Subsistence Departments and gone to Fort Monroe.

LIEUTENANT W. C. MUHLENBERG, 2d U. S. Inf., who was left sick at Boise Barracks, I. T., has become convalescent and joined his company at Fort Omaha, Neb.

CAPTAIN EZRA P. EWERS, 5th Infantry, on relinquishing recruiting duty at Boston, Mass., Oct. 1, will avail himself of a month's leave before joining his company at Fort Keogh.

CAPTAIN J. G. TURNBULL, 3d U. S. Artillery, took his battery early in the week from Fort McHenry to Washington Barracks, D. C., for a couple of weeks target practice at the long ranges.

COLONEL H. C. HASBROUCK, U. S. A., of West Point, and several other officers there stationed, attended the formal opening Sept. 2 of the new Free School at Newburgh, N. Y. The exercises were very interesting.

THE British Parliament has made a great ado over Gen. Buller's going to Ireland. Now, if it was Gen. Butler, as some of the papers have made it in their head lines, there would be some excuse for it. —*Springfield Republican.*

LIEUTENANT-COLONEL A. L. HOUGH, 16th Infantry, is busy closing up his business at David's Island, with a view to the early assumption of the duties of superintendent general recruiting service, with headquarters in New York City. Lieut.-Col. R. F. O'Beirne, 15th Infantry, will shortly arrive East to replace Col. Hough at David's Island.

MR. ARTHUR JOHNSON, of the Class of '86, U. S. M. A., was granted his diploma August 28, and subsequently spent a few days in New York City. On Monday evening he was entertained by those of his classmates who were in New York. Lieuts. Keene, Trout, Duncan, Pettit, Winn, Godfrey, Bean, McMahon and Andrews. A life-sized photograph, elegantly framed, was presented by the class to the mother of Mr. Johnson.

GENERAL SHERMAN when asked what he thought of the Cutting case said: "You may say that Cutting is a contemptible little ass, who thinks he can carry the jurisdiction of the United States in his pocket wherever he goes, that is all there is of it." Of the action of Governor Ireland he said: "If Governor Ireland attempts to act for the Federal Government and commits an overt act, we will try him and hang him for treason. The question of States' rights was settled years ago."

IN compliance with instructions, Captain J. H. Dorst, 4th Cavalry, left Fort Leavenworth Aug. 28 in charge of four of the Apache Indians, with two interpreters, for Holbrook, Ariz., and two other Indians for Wilcox, Ariz. The party had hardly reached Topeka when another telegram was received from the Secretary of War to recall Captain Dorst and his Indians. No one seems to know what all this means. The Indians feel very uneasy over this latest move.—*Kansas City Times.*

GENERAL ADAM BADEAU, U. S. A., is thus described in an exchange: On Sherman's staff, on Grant's, familiar with Washington and its life, equally at home in London, enjoying a long diplomatic experience and of a habit and manner which never prevented General Badeau from knowing other men or making himself known, General Badeau adds to all this that most precious of all gifts the reporter's. Through it he has written a book, "English Aristocracy," which will stand on the shelf by Emerson's "English Traits," and will some day be coupled with Edward Young's merciless report of the French *noblesse* before it went over the dam. But while Mr. Young's book was read by a few hundreds, General Badeau's articles have had the greatest audience of all time—the reader of the Sunday newspaper.

THE Vancouver *Independent*, of Aug. 26, says:

Lieut. C. H. Warrens arrived from Fort Townsend to Department of Columbia, for assignment to duty ....The wife and daughters of Lieut. W. P. Goodwin, 14th Infantry, Fort Townsend, have gone to Ohio, where the young ladies will attend school....Capt. Warrens' and Capt. Carpenters' companies 14th Inf., returned to Vancouver Barracks Aug. 19... On Aug. 19 Gen. John Gibbon and Capt. C. A. Woodruff left Tacoma with a party, to ascend Mount Ranier to the glaciers, and possibly to the summit.

THE Presidio *News* of Aug. 27 has the following Fort Davis (Tex.) items.

Mrs. Dickman, wife of Lieut. J. T. Dickman, who was ill last week, is improving.....Capt. J. F. Simpson has assumed command of Troop M, 3d Cav. Capt. Steever left for his new station Wednesday.....The silver wedding of Major and Mrs. S. M. B. Young, 3d Cav., takes place at Fort Hancock, Sept. 2. At the same time their two daughters are to be married, Miss Edith to Lieut. John T. Knight, 3d Cav., and Miss Burton to Lieut. Geo. W. Reed, 5th Cav. ....Maj. W. H. Gardner, post surgeon, granted leave of absence, has been disappointed by the non-arrival of his successor, Captain Appel, and will probably be detained until the middle of September. .....Lieut. Geo. K. Hunter, 3d Cav., left Fort Davis Wednesday with his family, for St. Louis on recruiting service after taking Mrs. Hunter and their children to her home at Cincinnati.

LIEUTENANT SEWARD MOTT, 6th Cavalry, is spending his graduating leave at Bouckville, N. Y.

GENERAL T. M. VINCENT, U. S. A., has returned to Fort Snelling, Minn., from a trip to Montana.

GENERAL CHAUNCEY MCKEEVER, U. S. A., has returned to San Francisco from a trip to Fort Halleck, Nevada.

GENERAL A. J. PERRY, U. S. A., has arrived in San Francisco, and assumed the duties of Chief Quartermaster, Division of the Pacific.

COLONEL A. P. BLUNT, U. S. A., commandant of the Military Prison at Fort Leavenworth, is expected East next week on business matters.

CHAPLAIN DANIEL KENDIG, U. S. A., has been spending the summer at Hot Springs, Lake Tahoe, and will return soon to the Presidio of San Francisco.

SURGEON PASSMORE MIDDLETON, U. S. A., was to start this week from Bedford. Pa., for St. Augustine to take charge of medical matters at St. Francis Barracks.

MAJOR THOMAS WILSON, U. S. A., Gen. Potter's Chief Commissary of Subsistence, left Fort Leavenworth this week, to be absent until the end of the month.

CAPTAIN J. B. JOHNSON, 3d Cavalry, of Fort Leavenworth, spent the week with his troop at St. Joseph, Mo., participating in the Interstate Exposition being held there.

LIEUTENANTS W. A. NICHOLS, D. E. McCarthy and W. H. Johnston, U. S. A., left Fort Leavenworth this week for Jacksonville, Ills., to act as judges of the interstate military drill to be held there from Sept. 6 to 11.

THE following officers were registered at the office of the Adjutant-General this week: Capt. H. J. Nowlan, 7th Cav.; 2d Lieut. Chas. G. Lyman, 5th Inf.; 2d Lieut. Thos. B. Morton, 1st Art.; 1st Lieut. James O'Hara, 3d Art.

THE Paxton, says the Omaha *Herald* of August 29, sheltered last night Lieuts. E. F. Taggart, Grote Hutcheson, E. H. Brooke, J. L. Barbour, J. W. Burns, J. B. Jackson and Surgeon L. W. Crampton, of the U. S. A. They will all remain over Sunday to attend divine service.

LIEUTENANT TORREY, 6th Infantry, the winner of the Platte gold medal, has, says the Kansas City *Times*, asked to be relieved from further duty with his team. His health is very poor and recent burglaries committed in his residence at Fort Douglas have compelled him to take the step.

COLONEL W. B. ROYALL, 4th Cavalry, is sojourning at the St. Sauveur, Bar Harbor, accompanied by his wife and daughter. He is a sufferer from insomnia, owing to his long residence in Arizona acting upon old wounds received in the late war. The bracing breezes of Bar Harbor always make a new man of him though.

MAJOR SCHWAN, the new Assistant Adjutant General, is due in Washington Sept. 10. For a few months he will be assigned to duty with one of the other Assistant Adjutant Generals. Some changes will then likely be made in the stations of the officers of this Department. Majors Ward and Volkmar will probably be the first to be relieved from duty at headquarters.

GENERAL COUNT SAIGO, His Imperial Majesty's Japanese Minister of Marine, and suite, and Lieut. S. Schroeder, U. S. N., visited Governor's Island on Tuesday and were hospitably received by Major-General Schofield, attended by his staff. The day being wet there was no review of the troops, but a salute was fired and the band of the 5th U. S. Artillery discoursed appropriate music during the stay of the visitors. They were much interested and pleased with what they saw at Governor's Island.

THE Omaha *Excelsior*, of Aug. 28, says:

Col. Burnham has returned from the East....Lieut. Bonesteel has been appointed post adjutant at Fort Sidney ...Gen. Hazen is visiting his ranch near Sidney....Mrs. Capt. Haughey and Miss Ida Haughey have returned to Fort Sidney from the East....Gen. A. J. Perry has been on a short visit to Omaha, and left for San Francisco Thursday ...1st Lieut. Frederick M. H. Kendrick, 7th Inf., Fort Laramie, Wyo., is to go to Columbus Barracks, O....Mrs. Haskins, wife of Dr. Haskins, Fort Omaha, and her sister, Miss Bundy, left for Rochester, N. Y., Thursday. They will be missed in the garrison....The officers of the 2d Infantry were favored with a pleasant visit on Friday evening from about twenty-five Elks from Omaha, and were much pleased to have the opportunity of making the acquaintance of these very pleasant gentlemen....1st Lieut. W. C. Muhlenberg, 2d Inf., joined at Fort Omaha this week from Idaho. Lieut. Muhlenberg's health has not been good for several years.

CAPTAIN J. H. HIGBEE, U. S. Marine Corps, left Norfolk, Va., this week on a month's leave.

ADMIRAL DAVID D. PORTER, U. S. N., registered at the 5th Avenue Hotel, New York, on Tuesday.

LIEUTENANT COMMANDER E. W. WATSON, U. S. N., has returned to Norfolk, Va., from a month's vacation.

VICE-ADMIRAL S. C. ROWAN, U. S. N., was in New York this week with quarters at the New York Hotel.

THE Naval Inventory Board, Capt. Meade presiding, arrived in New York this week from Norfolk, Va.

LIEUTENANT-COMMANDER E. W. WATSON, U. S. N., returned to Norfolk, Va., this week from a month's vacation.

COMMANDER J. H. SANDS, U. S. N., sailed for Antwerp on Saturday last on the *Noordland* of the Red Star Line.

SURGEON-GENERAL F. M. GUNNELL, U. S. N., has returned to Washington from a tour of inspection of hospitals.

COLONEL JAMES FORNEY, U. S. Marine Corps, has returned to Norfolk, Va., from a pleasant sojourn at Cape May.

PROFESSOR L. F. PRUD'HOMME, U. S. Navy, was in New York early in the week with quarters at the Grand Hotel,

COMMANDER C. J. TRAIN, U. S. N., joined at the Naval Academy Sept. 1, and assumed command of the *Jamestown*.

LIEUTENANT W. A. MARSHALL, U. S. N., is due at Newport, R. I., on Monday next for duty at the Naval War College.

SECRETARY WHITNEY arrived at Southampton, L. I., this week, and Secretary and Mrs. Endicott at Mount Washington.

COMMANDER P. H. COOPER and Paymaster H. C. Machette, U. S. N., left Norfolk, Va., on Tuesday on a month's vacation.

LIEUTENANTS A. Ross and J. W. Robinson and Ensign Frank R. Heath were registered at the Navy Department this week.

LIEUTENANT S. W. FOUNTAIN, 8th U. S. Cavalry, and Cadet M. L. Bristol, U. S. N., were in Philadelphia this week, registering at the Girard House.

CHIEF ENGINEER W. H. HARRIS, U. S. N., has gone to the cool shades of Massachusetts, from whence to draw renewed strength for the arduous task of perfecting specifications for the "New Navy."

COMMANDER A. G. KELLOGG, U. S. N., and family are trying to keep cool at Deer Park, where they will remain for the present. Comdr. Kellogg's present station is at the Washington Ordnance Yard.

COMMANDER GEORGE W. SUMNER, U. S. N., who is spending a brief interval at Newport, has been on leave of absence since May last, previous to which he was on duty in the Bureau of Ordnance, Navy Department.

LIEUTENANT DOWNS L. WILSON, U. S. N., has begun the erection of a fine residence on Stoddert street, Georgetown, D. C., so the lieutenant is assured of occupation for all of his time not taken up with the official business of the Hydrographic Office for several months to come.

IN Lieutenant Bradley A. Fiske, U. S. N., the *Atlanta* possesses an officer thoroughly well versed in the theoretical and practical applications of electricity so freely employed in this vessel. Lieutenant Fiske has given a text-book on this puzzling subject highly spoken of at home and abroad.

LIEUTENANT M. FISHER WRIGHT, U. S. N., who is to be married to Miss Boker, of New York, is enjoying a leave of absence, having made his last cruise on the *Alliance*, from which vessel he was detached in June last. Miss Boker is a granddaughter of Mr. E. J. Anderson, well known in New York.

THE last act in the sad drama of the *Jeannette* has been concluded through the skill and perseverance of Lieutenant William H. Schuetze, U. S. N., whose safe arrival at St. Petersburg has been announced by telegraph. The report of his expedition into the wilds of the Lena Delta will undoubtedly be of interest and value.

LIEUTENANT S. C. LEMLY, U. S. Navy, has gone to New York in connection with the G. C.-M. convened there for the trial of 1st Lieutenant O. C. Berryman, U. S. M. C. Lieutenant Lemly's recent trip to China on duty connected with the Watkins case was not altogether a pleasant one, as part of the time he was under the weather while on the station.

P. A. ENGINEER JAMES ENTWISTLE, U. S. N., has been detached from temporary duty connected with the trial of the machinery of *Atlanta*, and relieves P. A. Engr. E. A. Magee, U. S. N., on the *Minnesota*, receiving ship for boys, at New York. This duty will not materially intertere with Mr. Entwistle's enjoyment of the quiet of Paterson, N. J.

REAR-ADMIRAL JOHN H. RUSSELL, U. S. N., has been passing a few days in Washington, having registered there the past week. The Admiral has been placed upon the retired list of the Navy, at his own request, thereby promoting Commo. Queen to Rear Admiral before the date of his retirement, viz., Oct. 6. Rear-Admiral Russell was born July 4, 1827.

THE recent order relative to changing the status of the Washington Navy-yard will have the effect of changing the stations of the following officers of the staff: Pay Director Richard Washington, Chief Engineers Charles E. De Valin and D. P. McCartney, and P. A. Engineers Robert D. Taylor and Robert R. Leitch, Naval Constructor Philip Hichborn, Civil Engineers A. G. Menocal and Robert E. Peary.

COMMANDER JAMES H. SANDS, U. S. N., and family have left the United States for a protracted sojourn abroad. The commander has received a year's leave of absence, with permission to leave the United States, but it is understood that Mrs. Sands and children will remain abroad several years. They will reside for the most part in Freiburg, in the canton of the same name in Switzerland, situated northeast of the Lake of Neuchatel and northeast of the Lake of Geneva, in the valley of the Sarine. The principal church edifice in the town is the collegiate church of St. Nicholas, commenced about 1283, but not completed until late in 15th century. Its noble belfry is 245 feet in height, and it contains the most famous organ in the world, constructed by a native of the place named Aloys Mooser in 1824 to 1834. The population of Freiburg in 1870 was about 11,000.

IT was stated early in the week that the wife of Myers, Paymaster Doyle's clerk, who disappeared from the *Iroquois* at Callao, Peru, with $4,000 belonging to members of the crew, had received a cablegram from a sailor stating that her husband had been murdered by two guides. Mrs. Myers has since denied the receipt of such cablegram or any reliable information whatever regarding her husband's whereabouts. An officer on board the *Iroquois* writing to a friend in Washington about Myers, the absconding pay clerk, says:

CALLAO, Aug. 6, 1886.

The paper to-day tells about the murder of a man in Chili, near Autofogato, who had bought three mules and hired a guide and servant to go to the interior, and as he was supposed to have a great deal of money with him and was anxious to get off the coast, the authorities surmise all is not right. That he was murdered for the money he was supposed to have there is no doubt, as the servant he engaged was a suspicious character. The description of the man, his date of arrival, and the name corresponds with that of our missing Pay Clerk, and we are inclined to think that the two men are one and the same.

COMMODORE J. G. WALKER, U. S. N., sailed on Wednesday on the *Saale* for Bremen, thence to Heidelberg to join his family.

P. ASST. SURGEON W. R. DU BOSE, U. S. N., and family, of Norfolk, have gone on a month's vacation to the mountains of Virginia.

LIEUTENANT W. W. KIMBALL, U. S. N., and Mrs. Kimball registered early in the week at No. 25 Boulevard des Capucines, Paris, France.

PAYMASTER I. G. HOBBS, U. S. N., was at the Riggs House, Washington, this week, on business relating to allegations made against him by Consul Siler of Cape Town.

CHIEF ENGINEER D. P. MCCARTNEY, U. S. N., and Lieutenant William M. Irwin, U. S. N., are still tarrying at Saratoga. Mr. McCartney finds much benefit from the springs.

COMMANDER JOHN R. BARTLETT, hydrographer of the Navy, left Washington Aug. 30 with his family on his annual leave, leaving Lieut. Wm. H. Parker, Jr., in charge of the Hydrographic Office.

LIEUTENANT-COLONEL C. D. HEBB, U. S. Marine Corps, and Medical Director J. M. Browne, U. S. N., were in New York this week, the former registering at the Astor House and the latter at the Gilsey House.

LIEUTENANT N. E. NILES, U. S. N., Hydrographic Office, has wisely taken his leave in time to avoid the sweltering days of late August and early September. Lieutenant C. F. Emmerich, less fortunate, is busily engaged in keeping up the current work of his special department during the absence on leave of nearly the whole force.

THE monument to the memory of Lieut.-Commander Gorringe was raised to its position in Rockland Cemetery, Sparkill, N. Y., Aug. 30. The shaft is made after the model of the obelisk which Commander Gorringe brought over, and the whole body of granite in position weighs about 40 tons. It is located in a very attractive part of the cemetery, and will draw many visitors thither.

IN the present dearth of social festivities, says the San Francisco *News Letter*, "our gallant defenders have been doing their little utmost to enliven things up a bit. One of the exhibitions of the dynamite shells was made the occasion for quite a society gathering at Fort Point, a charming lunch bringing the day to a most pleasant conclusion; and at Mare Island the hop given by the officers of the United States steamship *Ranger* was one of the handsomest affairs of the kind which has occurred at the Navy-yard for a long time. The music was good, the supper excellent; the guests included a number from 'Frisco, Oakland, and Benicia, and a most enjoyable evening was spent."

THE Vallejo *Chronicle* says: On March 11, 1883, Chief Engineer William H. King, U. S. N., died in San Francisco, and his remains were brought to Mare Island and interred in the Naval Cemetery. At the solicitation of Lieutenant Singer the officers of the station made up a purse of $200, with which to pay for a suitable grave stone to be placed over the last resting place of their late brother officer. The order was given to Civil Engineer Wolcott, and a granite head stone four feet high and two feet wide was gotten out on the yard. The money, however, does not appear to have been sufficient for putting the stone in its place. A short distance from the stone shed is an outhouse and directly in front of its door is the grave stone bearing the following inscription:

Chief Engineer
W. H. King.
DIED
March 11, 1883.

On the base of the stone is the name

KING.

It is a humiliating commentary upon the want of respect which the living officers entertain for their dead comrades, and it is to be hoped that the foregoing reference to the object toward which most of the present officers at Mare Island contributed may cause the person who took charge of the work to see to it that the monument is placed, without further delay, where it properly belongs.

RECENT DEATHS.

GENERAL GEORGE H. GORDON, formerly of the U. S. Army, died suddenly of heart disease at his home in Framingham, Mass., on the evening of Aug. 30. He was in his sixty-second year. He entered West Point in 1842, was graduated July 1, 1846, and promoted Brevet 2d Lieutenant Mounted Rifles. He served with credit during the Mexican War, 1846-7, being engaged in the siege of Vera Cruz, the battles of Cerro Gordo, Contreras, and Chapultepec, and the assault and capture of the City of Mexico, Sept. 13, 14, 1847. For his bravery at Cerro Gordo, where he was wounded, he was brevetted 1st Lieutenant. After the Mexican War he served principally on frontier duty until Oct. 31, 1854, when he resigned from the Army and began the practice of law in Boston. When the attack on Sumter opened the Civil War Gordon raised the 2d Massachusetts Volunteers and took the field as its colonel. He took part in the operations in the Shenandoah Valley under General Banks, January to March, 1862, being engaged in several skirmishes, and in the battle at Winchester, May 25, 1862. On June 9, 1862, he was appointed Brigadier-General of Volunteers. Among the engagements in which he displayed great bravery and military knowledge were the battles of Cedar Mountain, of South Mountain, and of Antietam. He was also active in the operations about Charleston Harbor from August, 1863, to April, 1864, and in the following month was placed in command of Florida. From March to June, 1854, Gen. Gordon was in command of the Eastern District of Virginia,

and while serving at this post he was brevetted Major-General of Volunteers April 9, 1865, for meritorious and distinguished services. He was mustered out August 24, 1865, and returned to the practice of law in Boston, and for a time was Collector of Internal Revenue.

The funeral took place from the family residence Sept. 2. The body was clothed in the full uniform of a major general, and upon the casket were several beautiful floral pieces contributed by comrades in arms. The interment was in Edgill Grove Cemetery.

—

GENERAL H. H. SIBLEY, formerly of the U. S. Army, died at Fredericksburg, Va., Aug. 22, aged 70. Born in Louisiana he entered the Military Academy in 1833, was graduated in 1838 and promoted to the 2d Dragoons, rising to 1st Lieutenant, March 8, 1840. He served in the Florida War, and from 1842 to 1846 was Adjutant of his regiment. On the 16th of February, 1847, he was promoted Captain. He performed gallant service through the Mexican War, receiving the brevet of Major for the affair of Medelin near Vera Cruz. On the 13th of May, 1861, he was promoted Major of the 1st Dragoons, but resigned the same day and joined the Confederacy. After the war he went to Egypt and served as a Brigadier-General in the Egyptian Army from December, 1869, to September 1873. Since his return home he has lived mainly in the South. Many of the older officers of the Army, his comrades in the days gone by, will regret to learn of his death.

The tent to which General Sibley's name has been given was an adaptation of a single pole to Sioux lodge, the credit for which is due to General W. W. Burns. He was at that time a young officer, and, with the modesty characteristic of that class, called it after his commanding officers, both of whom were named Sibley, and one of whom, the dragoon, was with him on a hunt at the time the idea of the adaptation suggested itself.

—

THE funeral of Lieut. Jerome J. Weinberg, 13th Infantry, took place at Fort Leavenworth, August 24, with due military ceremony. Lieut. W. H. Johnston, 16th Infantry, commanded the escort, and the following were the pall-bearers: 2d Lieuts. Frank O. Ferris, 1st Inf.; E. B. Weeks, 5th Inf.; A. P. Buffington, 7th Inf.; T. W. Moore, 22d Inf.; Wm. J. Pardee, 18th Inf., and J. Y. Mason Blunt, 10th Inf. Chaplain Barry officiated.

—

GENERAL COUNT FREDERICK VON BOTHMER, of Bavaria, who greatly distinguished himself in the Franco-German War, died recently at Munich. It is said of him that he was a plain spoken, clean handed, high hearted gentleman; a lover of peace, a healer of quarrels, an authority on nice points of honor, a true friend, and a generous enemy. Private foes he had none; to the public service he had devoted his life; and the Bavarian Government knew well how to value and reward his soldierly achievements, while the army, to a man, regrets the loss of so distinguished an officer.

INFORMATION is received of the death at Wytheville, Va., of the Rev. Alexander Marks, Rector of Trinity Church of Natchez, Miss. He was a student at Princeton College when the war broke out, and entered the Confederate Army, serving as adjutant of the 15th Louisiana Infantry. He was captured and held a prisoner at Governor's Island and Fort Warren. At the close of the war he returned home, studied law, and was admitted to the Bar. Wearying of the law he took orders in the church, and had been presiding over Trinity Church, at Natchez, for twelve years.

GENERAL PINELLI, commanding the forces of United Italy at the entrance of Rome in 1870, on the departure of the French, is reported by the French papers to have committed suicide recently at his hotel in Milan. He was found dead, a revolver in his hand. Upon a table were left four letters, in one of which, opened and addressed to Gen. Level, he asked that he should be interred with the most simple obsequies.

ORLANDO TABOR, a pay clerk in the U. S. Navy, died at Hanover, N. H., Aug. 29, of Bright's disease, at the age of 46. He served during the War, going out first as Lieutenant in a Kentucky regiment. For the past nine years he has been serving on the *Quinnebaug* and *Shenandoah*, and at the torpedo station at Newport.

THE HON. RUFUS PAINE SPALDING, who died at Cleveland, O., August 29, aged eighty-eight, was the father of Captain Geo. S. Spalding, U. S. Army, who left the service in 1870. The deceased gentleman was a distinguished lawyer and prominent in public affairs.

REPORT ON THE BOSTON.

COMMANDER C. M. SCHOONMAKER, commanding the steamer *Boston*, reports the arrival of that vessel at the Navy-yard, New York, on Aug. 30. She left Chester, Pa., at 12.45 P. M., Aug. 28, accompanied by the tug *Nina*. Running down Delaware Bay and River a speed of 11½ knots was made with from 46 to 49 revolutions, steaming with the four boilers, pressure about 75 lbs. At 7.20 P. M. anchored at the Breakwater to await the *Nina*, and not thinking it prudent to go to sea at night without having the deviation of the compasses upon northerly courses, which could not be taken on the passage, remained there until 6.09 A. M. the following morning, when accompanied by the *Nina* started again for New York. During the passage to Barnegat an average of 12 knots was made; thence to Sandy Hook, 12.6 knots; maximum revolutions, 66; maximum pressure, 85 lbs. Speed was determined by distances between landmarks, allowing for the estimated strength of current, no logs having been furnished.

The services of Lieut. C. C. Cornwell in adjusting and ascertaining the errors of the compasses are commended.

(Correspondence of the Army and Navy Journal.)

COLUMBUS BARRACKS, O.

AUGUST 30, 1886.

THE surviving members of the Regular Brigade, 14th Army Corps, will, through the kindness of Col. Offley, Commandant of the Depot, hold their annual reunion at Columbus Barracks, on Wednesday, Sept. 1. The members of the various G. A. R. posts in the city have been invited and a very enjoyable time is anticipated.

Capt. J. S. McNaught, 20th Infantry, who has been granted six months' leave on surgeon's certificate of disability, has left the Depot for Madison, Wis., where he will sojourn for the present.

1st Lieut. Frederick M. H. Kendrick, 7th Inf., has been ordered to Columbus Barracks for a two years' tour of recruiting duty.

Seven recruits for Light Battery F, 3d Art., San Antonio; five each for Light Battery F, 4th Art., Fort Snelling, and Light Battery D, 5th Art., Fort Douglas, and all specially assigned men for these posts left on Saturday, Aug. 28, for their stations.

Lieut.-Colonel T. M. Anderson is visiting friends in Columbus. J. S.

U. S. ARTILLERY SCHOOL, FORT MONROE.

IN S. O. 24, of Aug. 30, Gen. Tidball relieves the following from duty at the School and Post of Fort Monroe, Va., to take effect Sept. 1: 1st Art.—1st Lieuts. Joseph S. Oyster and Albert Todd, and 2d Lieut. Charles H. Hunter. 2d Art.—1st Lieuts. Geo. S. Grimes and Alex. D. Schenck, 2d Lieuts. George F. Barney and William P. Stone. 3d Art.—1st Lieut. John R. Williams, 2d Lieuts. Charles A. Bennet, and Edward A. Millar. 4th Art.—2d Lieut. Ormond M. Lissak. 5th Art.—1st Lieuts. Thomas R. Adams and David D. Johnson, and 2d Lieut. Albert C. Blunt. Attached—1st Lieut. Solon F. Massey, 5th Art.

In S. O. 25, of Aug. 31, Gen. Tidball details 1st Lieut. T. C. Patterson, 1st Art., Instructor in the course in Chemical Manipulations in place of 1st Lieut. D. D. Johnson, 5th Art., relieved. Lieut. Patterson, while upon this duty, will be excused from officer of the day duty, and details on garrison courts and boards of survey.

In G. O. 28, of Aug. 28, Gen. Tidball announces the hours for sounding the daily trumpet signals during September.

THE THIRD INFANTRY BAND.

CHIEF JUSTICE WADE being in Helena recently, the band of the 3d U. S. Infantry tendered him a serenade. In returning thanks he said:

"GENTLEMEN: If this were a court and somebody was to be sentenced to death I should feel a good deal at home and know what to say, but to respond to a charming serenade I am a good deal at sea. But these inspiring strains ought to lend eloquence to every tongue. I am profoundly grateful for this token of your esteem and regard, and though a stranger to you, you have touched the chord that makes us all of kin. It is no small favor to listen to the 3d Infantry Band. Its fame is wider than wide Montana, indeed I believe it extends to the uttermost limit of this great country that we love so well. I am not unmindful that at the centennial of our liberties, competing with the world, this band stood at the very top of the ladder, and though our morning drum beat follows the sun across half the world, nowhere along its majestic course are its gladdening rays greeted more sweetly than in this far western world by the band of our pride. And so though not known to you personally, I have, as we lawyers say, the means of knowing your general reputation, and am a swift witness to declare that it could not be better."

After some more pleasant remarks he concluded by saying: "Please walk into the library. There upon the shelves are the masters of the profession to which I have given the best energies of my life. They are not very talkative, but they are very solid old gentlemen, and you should meet them. Come in."

The invitation being accepted, a liberal hospitality was exercised. Adjt. Roe was warmly thanked for his courtesy and aid in the matter.

RIFLE MATCH AT FORT MONROE.

To the Editor of the Army and Navy Journal:

FOLLOWING is the score of a rifle match fired between teams from Batteries K, 2d, and I, 4th Artillery, at Fort Monroe, Va., Aug. 27, 1886:

Bat. I, 4th Art.	200 Yards.	300 Yards.	600 Yards.	Grand Total.
Lieut. C. P. Miller	21, 23—44	20, 20—40	20, 18—38	122
Sergt. Massey	17, 17—34	21, 20—41	5, 18—23	98

Best percentage at 600 yards, Bat. I, 82.; Bat. K. 86.
Best individual percentage, Bat. I, 84.; Bat. K, 80.6. Worst, Bat. I, 60.6; Bat. K, 60.

(Correspondence of the Army and Navy Journal.)

FORT DU CHESNE, UTAH.

AUGUST 23.

THE celerity with which this new post has been established is so remarkable that it may be of interest to some of your readers. Early in August, Col. Benteen and two companies of the 9th Cavalry were selected as commanding officer, and part of the garrison, respectively, of the new post. Being stationed at Fort McKinney, and having 225 miles to travel to the railroad, their march was begun at once, while what companies of infantry were to make up the balance of the post was not yet known.

On Friday, Aug. 6, about noon, the garrison at Fort Fred. Steele was startled by a telegraphic order to abandon the post and move without delay to Fort Bridger, Wyo., en route to Fort Du Chesne. The same night, Lieut. Howe and 20 men, of the 17th Infantry, arrived to take charge of the post, and the next night the three companies, B, I and K, 21st Inf., under commrnd of Maj. Downey, 21st Inf., left on a special train for Carter Station.

At Carter they were joined by Asst. Surg. R. B. Benham, Med. Dept., and Co. F, 21st Inf., under command of 1st Lieut. J. W. Duncan, the four companies marching at once to Fort Bridger, a distance of 10 6-10 miles. Two days were spent in fitting out transportation, and on Wednesday morning the column started.

Maj. Downey, whose health is too delicate to permit of rough field service, then relinquished the command of the battalion, which was assumed by Lieut. Duncan, who was next in rank, Capt. Haughey being absent, sick, Capt. Jocelyn on recruiting service, and Capt. Spurgin at West Point on special duty. The column which started for the Indian country then was as follows: 1st Lieut. J. W. Duncan, 21st Inf., commanding battalion, and Co. F, 21st Inf.; 1st Lt. Willis Wittich, Bat. Adjt., A. C. S., and commanding Co. B, 21st Inf.; 2d Lieut. L. J. Hearn, 21st Inf., Bat. Q. M.; Asst. Surg. R. B. Benham, Med. Dept.; 1st Lieut. H. L. Bailey, commanding Co. I, 21st Inf., and 2d Lieut. J. S. Parke in charge of Co. K, 21st Inf. Lieut. C. M. Truitt joined a day or two later and assumed command of Co. K, having been detained on court-martial duty.

A singular thing about this command, for so large a one, is the comparative youth of the officers, the oldest being 33½ years, and the average age about 31.

Being under orders to go to a certain point and wait the distance was covered by easy marches, but over atrocious roads and through showers of rain.

On Aug. 18 the halting point, the saw-mill near the summit of the Uinta Mountains, was reached. Here, the next morning, like a thunderbolt from a clear sky, the order to "break camp without delay," was received from the Department Commander and at noon the whole command was again on the road making Fort Thornburgh, 21 miles, by night.

The next day with a fairly early start, a march of 35 miles over rolling sage brush country was made with not a drop of water in the whole distance.

The command arrived here about 7 P. M. in good order, making 56 miles in 31 hours. It was rather singular to be told "Here s Fort Du Chesne."

Dry, hot and dusty, the vegetation being sage brush, shad scale and prickly pear. Along the Uinta River, on which the post will be built, there are cottonwood trees and underbrush. The Uinta Mountains are in view about 20 miles distant, near the base of which the Uinta Agency can be seen.

The ground selected can be irrigated, and in time, no doubt, a beautiful post can be made here. Almost anything will grow with proper care and sufficient water.

Capt. Olmstead's Co. E, of the 9th Cav., arrived here on Aug. 22 and on Aug. 23 the permanent commanding officer, Col. Benteen with Capt. Dawson's Co. B, 9th Cav., and Lts. Burnett and Ladd arrived. W.

The White River and Uncompahgre Utes threatened to oppose the march of the troops, but a rapid march from the Ashley Valley placed the command on the spot designated for the post before the Indians could muster their forces. The White River Utes have never been punished for the Thornburgh massacre, and they do not think the Government is able to punish them. It is not improbable that trouble will occur before a great while. The troops are hard at work making adobes to build quarters.

(Correspondence of the Army and Navy Journal.)

FORT YATES, DAKOTA.

AUGUST 24, 1886.

ALTHOUGH we see but little in the columns of Army papers about Fort Yates, we are by no means behind other posts in matters of interest, both social and military. As to the latter, target practice comes first, and skirmish firing, bull's-eyes, sharpshooters, and marksmen keep the air blue with—smoke.

Two more companies of the 11th Infantry are expected here daily from Fort Buford, which addition will make our garrison six companies strong, four of the 11th, and two of the 7th Cavalry, the latter having been stationed here eight and nine years. We have been quite enlivened during the past week by the presence of a party of Army ladies from Fort Lincoln—the Misses Townsend, daughters of Lieut.-Col. Townsend, of the 11th Infantry, with Mrs. Heistand and Mrs. Hoyt, of the same regiment. Major and Mrs. Page, whose guests they are, gave them a most enjoyable entertainment on the evening of Aug. 19. Major Page, with his magic flute, with Mr. Harry McLaughlin and Master Harry Page accompanying him with their violins, and various brilliant performers among the ladies, assisted in giving us good dancing music. The evening flew merrily by until the "wee sma' hours," when an elegant supper was daintily served in the spacious dining room. Among the guests, all of whom appeared in full dress, were: Mrs. McCrory, of Nashville, Tenn., with her two lovely daughters, Miss McCrory and Miss Clara McCrory, a brilliant young pianist; Dr. and Mrs. Spencer, Miss Brandreth, of Sing Sing, N. Y.; Mr. and Mrs. Russell, of St. Louis; Mr. Ed. Sharp, of Chicago; Mr. Sloan Tracey, of St. Louis; Mr. Howard Page, who is spending his vacation with his father and mother at this post; Mr. and Mrs. Douglas, Mr. Watson Gilbert, Capt. and Mrs. McDougall, Chaplain and Mrs. Dunbar, Miss and Mr. Dunbar, Capt. and Mrs. Reed, Miss McLaughlin and Mr. Harry McLaughlin; the dashing young cavalryman, Lieut. Selah (alias Tommy) Tompkins; Lieut. and Mrs. Irvine, Capt. Godfrey, Lieut. Slocum, and others too numerous to mention.

Last night (the 24th), Dr. and Mrs. Spencer entertained the same party very handsomely at a Mikado party. All were in Mikado costumes, and the "three little maids," and, indeed, the entire party, scored a success by their inimitable acting and the gorgeous costumes. Mrs. Hoyt's dress was pronounced the most perfect Japanese costume, and Capt. McDougall's a perfect Chinese outfit. Others were appropriate and very becoming, and essentially Mikadoish. Major Page made a splendid Mikado.

We have been visited during the past month by terrible storms, hail, rain, and thunder and lightning. The hail left scarcely a whole pane of glass, taking 30 or more at a clip. Our gardens are all gone.

Dr. and Mrs. Spencer entertained a number of friends at a very handsome dinner last week. Their hospitable house is always open and a very popular resort. Capt. McDougall returned recently from a six days' hunt. He reports game scarce, having been killed off by the recent hail storms. He, however, brought home some trophies in the way of ducks and chickens. Saw antelope, but did not get any.

LATE ARMY ORDERS.

Leave for ten days, to take effect upon the completion of his duties as a competitor in the Division rifle competition at Fort Niagara, N. Y., is granted 1st Lieut. Wallis O. Clark, 12th Inf. (S. O. 127, Div. Atl., Sept. 3.)

THE ARMY

G. O. 56, H. Q. A., Aug. 9, 1886.

Publishes list of bonded Pacific railroads as follows:

Central Pacific from Ogden, Utah, to Sacramento, Cal.
Central Pacific from Brighton, Cal., to Niles, Cal.
Central Pacific from Niles, Cal., to San Jose, Cal.
Missouri Pacific, Central Branch Division, from Atchison, Kans., to Waterville, Kans.
Sioux City and Pacific from Sioux City, Iowa, to Fremont, Nebr.
Union Pacific, Union Division, from Omaha, Nebr., to Ogden, Utah.
Union Pacific, Kansas Division, from Kansas City, Mo., to a point on the railroad between Monument and Gopher Station, 393.94 miles.
Also a list of U. S. military telegraph lines.

3. In compliance with the requirements of the decisions of the Second Comptroller of the Treasury, published in G. O. 124, series of 1885, and No. 16, series of 1886, from this office, all accounts for telegrams on military business sent and received by officers of the Army which pass over any of the lines constructed and operated along the railroads named in par. 1 of this order, and all similar accounts for telegrams which pass partly over the military telegraph lines named in par. 2 of this order and partly over connecting lines of private companies, will be forwarded to the office of the Q. M. Gen., for transmission to the proper accounting officers of the Treasury for settlement.

All claims for reimbursement of amounts paid by officers of the Army for telegraphic service will likewise be forwarded for settlement by the accounting officers.

4. All other accounts for telegrams on military business, when prepared in the name of the proper telegraph company at the rates fixed by the Postmaster General, will be settled and paid by the Quartermaster's Dept., through its disbursing officers.

By command of Lieutenant General Sheridan:
R. C. DRUM, Adjt.-Gen.

G. O. 62, H. Q. A., August 25, 1886.

Publishes the act, approved Aug. 5, 1886, making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes. * * *

Sec. 7. For examinations, surveys, and contingencies, and for incidental repairs, for which there is no special appropriation, for rivers and harbors, one hundred thousand dollars: *Provided*, That no survey shall be made of any harbors or rivers until the Chief of Engineers shall have directed a preliminary examination of the same by the local engineer in charge of the district, or an engineer detailed for the purpose; and such local or detailed engineer shall report to said Chief of Engineers, whether, in his opinion, said harbor or river is worthy of improvement, and shall state in such report fully and particularly the facts and reasons on which he bases such opinion, including the present and prospective demands of commerce; and it shall be the duty of the Chief of Engineers to direct the making of such survey, if, in his opinion, the harbor or river proposed to be surveyed be worthy of improvement by the General Government; and he shall report to the Secretary of War the facts, and what public necessity or convenience may be subserved thereby, together with the full reports of the local engineer. Said reports of preliminary examinations and surveys shall be made to the House of Representatives, and are hereby ordered to be printed when so made.

Sec. 8. That the Secretary of War shall report to Congress, at its next and each succeeding session thereof, the name and place of residence of each civilian engineer employed in the work of improving rivers and harbors by means and as the result of appropriations made in this and succeeding river and harbor appropriation bills, the time so employed, the compensation paid, and the place at and work on which employed.

Approved, August 5, 1886.

By command of Lieutenant General Sheridan:
J. C. KELTON, Act. Adjt.-Gen.

G. O. 64, H. Q. A., Aug. 25, 1886.

Publishes promotions, appointments, and transfers in the Army of the U. S., made by the President, by and with the advice and consent of the Senate, since the publication of G. O. 76, of July 11, 1885, and No. 50, of July 16, 1886, together with retirements and casualties, are announced. The names of captains and lieutenants of the line are arranged so as to show the troops, batteries, and companies to which they have succeeded by promotion, or to which they have been assigned by competent authority.

G. O. 11, DIV. OF THE ATLANTIC, Aug. 31, 1886.

1. Major Herbert P. Curtis, Judge Advocate, having reported in compliance with par. 13, special orders No. 128, Headquarters of the Army, A. G. O., June 3, 1886, is announced as Judge Advocate of the Division of the Atlantic and of the Dept. of the East.

2. In compliance with War Department instructions, dated August 24, 1886, 2d Lieutenant Richard W. Young, 5th Art., is relieved from duty as acting judge advocate of the Div. and Dept. Staff, and will rejoin his battery.

By command of Major General Schofield:
WILLIAM D. WHIPPLE, Asst. Adjt.-Gen.

CIR. 7, DEPT. OF THE COLUMBIA. Aug. 20, 1886.

Publishes the report of the annual competition in rifle firing held at Vancouver Barracks, W. T., August 16, 17, 18 and 19.

(See under head of "Rifle Competitions.")

STAFF CORPS AND DEPARTMENTS.

General Officers.

The Dept. Comdr., Brig. Gen. John Gibbon, will proceed to Seattle, W. T., on public business (S. O. 141, Aug. 14, D. Columbia).

Certain journeys made by Brig. Gen. Nelson A. Miles, accompanied by Capt. W. A. Thompson, 4th Cav., A. A. A. G., on public business, under the direction of the Dept. Comdr., are confirmed, being necessary for the public service (F. O. 82, Aug. 10, D. Arizona).

Brig. Gen. Nelson A. Miles, accompanied by 2d Lieut. J. A. Dapray, 23d Inf., A. D. C., will proceed to El Paso, Fort Wingate, and such other points in New Mexico and Arizona as may be necessary to carry out the plans and instructions of the Dept. Comdr. (F. O. 82, Aug. 10, D. Ariz.)

Adjutant and Inspector Generals.

Lieut. Col. Chauncey McKeever, A. A. G., will proceed to Fort Halleck, Nev., in compliance with the instructions from the Dept. Comdr. (S. O. 73, Aug. 18, Dept. Cal.)

Judge Advocate General's Department.

Leave of absence for six months, from Aug. 28, 1886, on surgeon's certificate of disability, is granted Maj. Asa Bird Gardiner, judge advocate. (S. O., H. Q. A., Sept. 1.)

Major Asa B. Gardiner, Judge Advocate, is relieved from duty as Judge Advocate of the Div. A., to date from Aug. 28 (S. O. 127, Div. A., Sept. 3.)

Quartermasters and Subsistence Departments.

Captain William S. Patten, A. Q. M., Vancouver Barracks, will proceed to Portland, Ore., on public business (S. O. 141, Aug. 14, D. Columbia).

Private Herman Loth, Co. F, will proceed to Fort Lowell for duty as hospital steward of the 2d class (S. O. 80, Aug. 25, D. Ariz.)

10th Infantry, Colonel Henry Douglass.

Hdqrs., B, C, and I, Ft. Union, N. M.; A and E, Ft. Lyon, Colo.; D, F, and H, Ft. Bliss, Tex.; G and K, Uncompahgre, Colo.

Leave for one month, to take effect on or before Sept. 8, is granted 2d Lieut. I. W. Littell (S. O. 93, Aug. 23, Dept. M.)

11th Infantry, Colonel Richard I. Dodge.

Hdqrs., A, D, E, and K, Ft. Sully, D. T.; B and F, Ft. Yates, D. T.; C and H, Ft. Yates, D. T.; G, Ft. A. Lincoln, D. T.; I, Ft. Bennett, D. T.

1st Lieut. H. O. S. Heistand is relieved from Gen. Rec. Service at Fort Abraham Lincoln, D. T. (S. O. 82, Aug. 19, D. Dak.)

The C. O. Fort Snelling will forward under charge of a commissioned officer all recruits for the 11th Infantry at that post destined for Fort Sully (S. O. 85, Aug. 24, D. Dak.)

The resignation by Major Theodore Schwan, A. A. G., of his commission as Captain, 11th Inf., only, has been accepted, to take effect Aug. 7, 1886 (S. O., Aug. 28, H. Q. A.)

By direction of the Acting Secretary of War the appointment of Cadet Arthur Johnson, graduate of the Military Academy, to be 2d Lieutenant, 11th Inf., to date from Aug. 28, 1886, is announced, and he is granted leave for one month. Upon the expiration of his leave he will report for duty with his company, F, Fort Yates, D. T. (S. O., Aug. 31, H. Q. A.)

Sick leave is further extended 2d Lieut. Benj. F. Handforth for three months (S. O., Sept. 2, H. Q. A.)

The following promotions in the 11th Infantry are announced: 1st Lieut. Leon A. Matile, to be Captain, Aug. 7, vice Schwan, who resigns his line commission only; 2d Lieut. J. C. Irvine, to be 1st Lieutenant, Aug. 24, 1886, vice Raphall, retired; 2d Lieut. N. B. Travis, to be 1st Lieutenant, August 24, vice Taylor, retired; Cadet Arthur Johnson, to be 2d Lieutenant, August 28, vice Irvine, promoted. An adjutant, vice Matile, is yet to be appointed.

12th Infantry, Colonel Orlando B. Willcox.

Hdqrs., A, B, D, F, G, and I, Madison Bks., N. Y.; C, Plattsburgh Bks., N. Y.; E and K, Ft. Niagara, N. Y.; H, Ft. Ontario, N. Y.

Official information has been received of the following promotion: 1st Lieut. George S. Wilson to Captain, Feb. 12, 1886, vice Stacey, deceased, which carries him from Co. F to Co. A, both stationed at Madison Barracks, N. Y. (S. O. 123, Aug. 30, Div. A.

14th Infantry, Colonel Lewis C. Hunt.

Hdqrs., B, C, D, E, F, G, H, I, and K, Vancouver Bks., Wash. T.; A, Ft. Townsend, Wash. T.

Cos. G and K, on detached service at Seattle, W. T., will return to Vancouver Barracks. A. A. Surg. Robert P. Finley will accompany the battalion (S. O. 142, Aug. 19, D. Columbia.)

16th Infantry, Colonel Matthew M. Blunt.

Hdqrs., A, B, C, F, and H, Ft. Concho, Tex.; D and E, Ft. McIntosh, Tex.; I, Ft. Davis, Tex.; G and K, San Antonio, Tex.

Gen. Stanley issued the following recently: "Co G, 16th Inf., will march to Fort Clark and then practice upon the rifle range at individual and company skirmishing to include Sept. 14, 1886. It will return by marching. The C. O., 1st Lieut. E. Cushman, will report on arrival at Fort Clark to the C. O." It is 130 miles from San Antonio to Fort Clark. The rifle range at San Antonio was engineered by an officer of the Engineers' Corps some years ago, and cost a large sum of money, but the range can't be utilized for skirmishing. Lieut. Cushman was unfortunate enough to never have had any skirmish practice; hence the above order, which, by the way, was suspended after the tornado of last Thursday wrecked things so in San Antonio that the soldiers had to be kept at work cleaning up the débris. "It's an ill wind," etc.—*K. C. Times.*

17th Infantry, Colonel Alexander Chambers.

Hdqrs., A, C, D, E, F, G, I, and K, Ft. D. A. Russell, Wyo.; B, Camp Medicine Butte, Wyo.; H, Ft. Bridger, Wyo.

18th Infantry, Colonel John E. Yard.

Hdqrs., A, B, and D, Ft. Hays, Kas.; E and F, Ft. Leavenworth, Kas.; C and I, Ft. Gibson, I. T.; G, H, and K, Ft. Riley, Ks.

A furlough for four months is granted Sergt. Frederick Imhof, Co. G (S. O. 131, Aug. 30, Div. M.)

19th Infantry, Colonel Charles H. Smith.

Hdqrs., A, B, C, E, F, H, and K, Ft. Clark, Tex.; D and I, Ft. Ringgold, Tex.; G, Ft. Brown, Tex.

Sick leave is extended Capt. John S. Wharton until further orders (S. O., Sept. 2, H. Q. A.)

Captain John S. Wharton has been found incapacitated for active service, and his leave of absence has been extended till further orders. (S. O., H. Q. A., Sept. 2.)

20th Infantry, Colonel Elwell S. Otis.

Hdqrs., A, B, C, E, F, H, and K, Ft. Assiniboine, M. T.; D, Ft. Maginnis, M. T.; G and I, Camp Poplar River, M. T.

Sergt. John O'Connor, Co. G, for, by neglect of duty as sergeant of the guard, enabling a prisoner to escape, has been reduced to the ranks.

21st Infantry, Colonel Henry A. Morrow.

Hdqrs., A, C, E, and G, Ft. Sidney, Neb.; D and H, Ft. Bridger, Wyo.; B, F, I, and K, Ft. Duchesne, Utah (Post-office address via Ouray, Utah).

22nd Infantry, Colonel Peter T. Swaine.

Hdqrs., A, B, D, G, H, and K, Ft. Lewis, Colo.; C, F, and I, Ft. Lyon, Colo.; E, Ft. Marcy, N. M.

1st Lieut. Wm. J. Campbell is constituted a board of survey to fix the responsibility for the loss of certain clothing by theft from the recruiting rendezvous, N. Y. City. (S. O., H. Q. A. Sept. 2.)

23rd Infantry, Colonel Henry M. Black.

Hdqrs., F, G, H, and I, Ft. Wayne, Mich.; A and B, Ft. Brady, Mich.; C and D, Ft. Porter, N. Y.; E and K, Ft. Mackinac, Mich.

Leave for twelve days is granted 1st Lieut. Stephen O'Connor, Fort Wayne, Mich. (S. O. 125, Sept. 1, Div. A.)

24th Infantry, Colonel Zenas R. Bliss.

Hdqrs., D, and H, Ft. Supply, Ind. T.; A and K, Ft. Reno, Ind. T.; B and F, Ft. Elliott, Tex.; C, E, G, and I, Ft. Sill, Ind. T.

Leave for ten days on Surgeon's certificate is granted Capt. A. C. Markley (S. O. 92, Aug. 21, Dept. M.)

25th Infantry, Colonel George L. Andrews.

Hdqrs., B, C, F, and I, Ft. Snelling, Minn.; A, D, H, and K, Ft. Meade, Dak.; E and G, Ft. Sisseton, Dak.

The leave for seven days granted from Fort Meade, D. T., to 1st Lieut. Walter S. Scott is extended twenty-three days, with permission to apply for a further extension of one month (S. O. 86, Aug. 25, D. Dak.)

Capt. John W. French is appointed to act as inspector on certain camp and garrison equipage at the recruiting rendezvous, New York City (S. O., Sept. 2, H. Q. A.)

Appointments, Promotions, Retirements, Transfers, Casualties, etc., of Commissioned Officers of the U. S. Army recorded in the Adjutant-General's Office during the week ending Saturday, August 28, 1886.

RETIREMENTS.

Brigadier-General John Newton, Chief of Engineers, August 27, 1886 (act June 30, 1882).

1st Lieutenant Alfred M. Raphall, 11th Infantry, August 24, 1886 (section 1251, Revised Statutes).

1st Lieutenant David B. Taylor, 11th Infantry, August 24, 1886 (section 1251, Revised Statutes).

CASUALTIES.

Colonel Robert Allen (retired), died August 5, 1886, at Geneva, Switzerland.

2d Lieutenant Jerome J. Weinberg, 13th Infantry, died August 23, 1886, at Fort Leavenworth, Kansas.

Courts-martial.

The following courts have been ordered:

At Angel Island, Cal., Aug. 26. Detail: Capt. Edmund K. Russell, 1st Art.; 1st Lieuts. Thomas H. Barry, R. Q. M., Frank de L. Carrington, and Louis P. Brant, 2d Lieuts. Charles B. Vogdes and Thomas Connolly, 1st Inf., and 1st Lieut. Frank H. Edmunds, Adjt., 1st Inf., J.-A. (S. O. 74, Aug. 20, D. Cal.)

At Fort Yates, D. T., Aug. 30. Detail: Major John H. Page, 11th Inf.; Capts. Thomas M. McDougall and Edward S. Godfrey, 7th Cav.; Capt. Ogden B. Read, 11th Inf.; Capt. William G. Spencer, Med. Dept.; 1st Lieut. Herbert J. Slocum, 7th Cav.; 2d Lieut. Robert J. C. Irvine, 11th Inf.; 2d Lieut. Selah R. H. Tompkins, 7th Cav., and 1st Lieut. William H. Wheeler, 11th Inf., J.-A. (S. O. 85, Aug. 24, D. Dak.)

At Newport Barracks, Ky., Aug. 30. Detail: Capt. William A. Elderkin, Sub. Dept.; Capt. John L. Tiernon, 3d Art.; Capt. John DeB. W. Gardiner, Asst. Surg.; 1st Lieut. William J. Campbell, 22d Inf.; 1st Lieut. Frank A. Edwards, 1st Cav., and 2d Lieut. Elisha S. Benton, 3d Art., J.-A. (S. O. 121, Aug. 27, Div. A.)

At Fort Adams, R. I., Sept. 3. Detail: Major Dallas Bache, Surg.; Capts. John Egan, George B. Rodney, and John W. Roder, 1st Lieuts. William Ennis, Richard P. Strong, and Charles A. L. Totten, 4th Art., and 1st Lieut. Alexander B. Dyer, Regtl. Adjt., 4th Art., J.-A. (S. O. 124, Aug. 31, Div. A.)

At Fort Wayne, Mich., Sept. 6. Detail: Major Henry McElderry, Surg.; Capts. George M. Randall and Richard I. Eskridge, 1st Lieuts. Frederick L. Dodge and Orlando L. Wieting, 2d Lieuts. Edwin P. Pendleton and Daniel B. Devore, 23d Inf., and 1st Lieut. Charles H. Heyl, 23d Inf., J.-A. (S. O. 125, Sept. 1, Div. A.)

Army Boards.

A Board of Survey, consisting of 1st Lieut. Wm. J. Campbell, 22d Inf., will assemble at the cavalry recruiting rendezvous, Cincinnati, Ohio, Sept. 6, for the purpose of fixing the responsibility for the loss of certain clothing (S. O., Sept. 2, H. Q. A.)

The Board, consisting of 2d Lieuts. Joseph S. Powell, Frank Greene, and John C. Walshe, Signal Corps, will assemble, Aug. 28, for the purpose of examining samples of telegraph supplies (S. O. 86, Aug. 25, Sig. Office.)

A Board of Survey to consist of Capt. Samuel Munson, 9th Inf.; Capt. John W. French, 25th Inf., and 1st Lieut. Robert H. Patterson, 1st Art., will assemble at the cavalry recruiting rendezvous, New York City, Sept. 6, for the purpose of fixing the responsibility for the loss of one Springfield carbine, for which Capt. Clarence A. Stedman, 9th Cav., recruiting officer, is responsible. (S. O., H. Q. A., Sept. 1.)

Disinfectants.—The Acting Secretary of War has decided that (during the current fiscal year 1886-87) disinfectants required for the health of commands shall be supplied by the Medical Department of the Army on recommendation or requisition by post surgeons.

DEPARTMENT NEWS.

Dept. of Arizona.—Brig.-Gen. N. A. Miles.

A despatch of August 29 from Wilcox says: Col. Wade has rounded up all the Chiricahuas and Warm Spring Apaches, numbering 420. He has them under guard, and will, unless some accident occur, carry out General Miles's plan of moving them out of Arizona. Captain Lawton is in close proximity to Geronimo, who has asked for better terms than an unconditional surrender.

A despatch from Fort Bowie, of Sept. 1, says: "The Apache campaign seems to be fast drawing to a close. On July 13 Lawton surprised the hostiles camped on the Arras River in Sonora and captured all their stock. The Indians then raided through the districts of Saveripi and Ares, killed a number of people and secured fresh mounts. They then headed north through the district of Montezuma, leaving a track of blood behind, and attempted to return to Arizona for another raid. Capt. Lawton followed closely upon their trail, and Gen. Miles, who had been informed of their movements, pushed troops toward the line to head them off. This movement was highly successful, and the hostiles found themselves confronted by a large American force at Fronteras. At this juncture Geronimo, with his characteristic cunning, made overtures of peace with the Mexican authorities and the prefect of Arizpe. This caused hostilities to be suspended, when Geronimo escaped in the night. Capt. Lawton followed him, and Geronimo sought an interview, declaring that he would surrender if his life was spared. At last accounts Capt. Lawton was moving toward the line, and Geronimo was coming to surrender. The camps are close together and passing and repassing is kept up continually. Geronimo is in fine health and condition. He has never been wounded as reported."

A despatch of the day previous says: "A Mexican who spent a day in the hostiles' camp states that Geronimo informed him that the terms under which he offered to surrender were that his two wives be brought back from Florida and that he and nineteen of his companions be given a separate reservation, not on the seacoast. He said, in other words, that if Miles did not want to agree to these terms he could go to hades."

A visitor to Geronimo says: "He is in first-class condition, physically and mentally, and all that troubles him is that he is out of ammunition. Geronimo was seated on a rock on a mountain. He saw Forsyth hunting for him at Cuchuta Ranch. The effect of Forsyth's march was to prevent the raid on Arizona which Geronimo admits he was about to make."

The bread ration at Fort Huachuca is fixed at 20 ounces.

Governor Torres, of Sonora, Mexico, in a recent letter to an American in Tombstone, says: "I received information of the rumor spread by some of your fellow countrymen at Tombstone stating that the Sonora troops had disarmed some American troops (Captain Lawton's). I regarded the same as unworthy of attention and gave it no thought. It is a pity that so many efforts should be made by Americans to discredit their own powerful, glorious country."

A despatch to the San Francisco *Morning Call*, from Tombstone, is said to confirm a previous rumor that Mexican troops demanded from American troops the release of Geronimo, and that when the latter refused a conflict ensued, during which Geronimo escaped.

Dept. of the Missouri.—Brig. Gen. J. H. Potter.

Fort Bliss, says the El Paso *Times*, is a good site for a large post. Uncle Sam has only one first-class fortified place—Fort Monroe. It ought to have another one on its southern border, and El Paso is the very place for it. The foot-hills just back of it are splendidly adapted for bastions.

The Secretary of War has appropriated $20,000 for Fort Leavenworth, to be applied to the construction of two sets of officers' quarters, a guardhouse and a bakery.

The sum of $40,000 is to be expended at Fort Riley, Kas., for additional quarters, guard house, etc. Capt. Pond will superintend and General Sheridan has sent Insp.-Gen. Baird to the post to look into matters.

On Friday, Sergeant Stellar, who, for a long time, was in charge of the magazine ground at Jefferson Barracks, Mo., was fished out of a pond located on the grounds, and it has been learned that the drowning was not accidental, but a case of suicide, and that Stellar had been threatening suicide for several weeks prior to the finding of his body.

Dept. of the Platte—Brig. Gen. George Crook.

The Helena *Independent* does not seem to favor the recent placing of the Yellowstone National Park under control of the military (Capt. Harris with his troop of the 1st U. S. Cavalry has taken charge.) The *Independent* says: "When a free American citizen goes to the nation's pleasure ground, he will be humiliated to find himself under the restrictions of red tape bayonet rule. Mr. Vest made a strong plea for providing for the park as was contemplated in the original dedicatory act, but the Senate failed to sustain him and the Army theory of park protection prevailed."

Senator Manderson, of Nebraska, in a recent conversation concerning the proposed sale of Fort Omaha, said it was what the War Department wanted rather than what the people of Omaha desired. "It requires an act of Congress," he said, "to establish a post, but it requires only an order from the Department of War to abolish it. The War Department will not give us any more money to put Fort Omaha in a condition for the garrison the Department wants. I have been told that by General Sheridan. If the War Department can't get here what it wants, why it will be compelled to go elsewhere. Denver feels as if she would like to secure our headquarters, and has already given 640 acres for a post. Cheyenne thinks she has a superior position as a distributing point. Chicago has just given 500 acres of land for the establishment of a post, and several other places are in line in the same manner."

Dept. of Dakota.—Brig. Gen. T. H. Ruger.

The Montana *Courier* says: "The cavalry troop at Fort Ellis took up its line of march for Fort Custer on Sunday. Fort Ellis is now abandoned to the bugs and graybacks, which, for years, have given the 'boys in blue' a severer siege and bloodier battle than they ever experienced in any other active campaign."

Division of the Atlantic.—Maj.-Gen. Schofield.

Gen. Schofield has directed the C. O. Fort Trumbull, Conn., to issue to the Governor of the State of Connecticut the following ordnance and ordnance stores: 12 10 inch mortar shells, 25 lbs. cannon powder, 25 time fuzes, and 25 friction primers.

RIFLE COMPETITIONS, 1886.

OUR report this week includes the information received up to September 3.

Division of the Atlantic.—Fort Niagara has not been so lively for years as it was this week, and the competitions in progress excited much interest. Lieut. Allen, in charge of the competitions, the officers of the post, range officers, etc., were indefatigable in their efforts to make Niagara's first great rifle season a success. Preliminary practice commenced Sept. 1, and continued for three days. On the fourth day the Division Competition commenced, and will continue on the 5th, 6th and 7th days, with skirmish and bull's-eye firing, etc. On the 8th and 9th days the competition for the Department Skirmish Medal will take place, after which will come the presentation of prizes. Major-General Schofield will present the medals in person.

The C. O. Madison Barracks, N. Y., will send the band of the 12th Inf. to report, Sept. 4, to the C. O. Fort Niagara for duty during the Division rifle competitions (S. O. 125, Div. A., Sept. 1.)

Division of the Pacific.—The competitions commenced Sept. 1, in charge of Capt. W. N. Tisdall, 1st Infantry, with Lieut. H. L. Harris, 1st Artillery, for range, statistical and financial officer, and Lts. John Pope, M. F. Harmon, and S. D. Sturgis range officers. The teams of California, Arizona, and Columbia were duly on hand and eager for the fray.

Department of the Columbia.—The competitions closed Aug. 19, and the team has gone to the Presidio of San Francisco with Lieut. Frank Taylor, 14th Inf., for its captain. 1st Sergt. Edward A. Hudson, Co. H, 14th Inf., won the first place on the team and was awarded the Department medal, and having also made the best aggregate score for the two days' competitive skirmish firing was awarded the Department skirmish medal. The prizes were presented in the presence of the troops of Vancouver Barracks, W. T., Aug. 24. The following is the team:

	Known distances	Skirmish.	Tot
1. 1st Sergt. E. A. Hudson, H, 14th Inf.	336	211	547
2. 1st Sergt. Ludwig Roper, F, 4th Inf..	344	198	542
3. Pvt. Frederick Naujoks, I, 14th.....	344	191	535
4. Sergt. James B. Denny, D, 14th Inf..	327	153	480
5. Corpl. George E. Miller, H, 2d Cav..	311	132	443
6. 1st Sgt. W. A. Hubbard, G, 14th Inf.	323	117	440
7. Sergt. Eugene Malches, E. 14th Inf..	332	106	438
8. Musician D. E. Lunsford, F, 14th Inf	319	117	436
9. Sergt. Morrow C. Gustin, B, 2d Cav..	336	96	432
10. Corpl. Chas. L. Hart, K, 4th Inf.....	305	126	431
11. 1st Sergt. William Land. E. 2d Cav..	320	109	429
12. Sergt. Ernest G. Ebers, C, 4th Inf....	322	104	426
13. Sergt. Hans Lauridsen, E, 4th Inf....	315	109	424
14. Sergt. George F. Pryor, H, 4th Inf..	302	118	420

The two latter are alternates.

Department of the Platte.—The competitions closed August 27, giving the following team:

		Two Days Firing at Known Distances.		Two Days Skirmish Firing ...		Aggregate for 4 Days.
		Total..	Order.	Total..	Order.	Total..
1	1st Lt. Zerah W. Torrey, 6th Inf.....	342	1	148	1	490
2	2d Lt. Jas. T. Kerr, 17th Inf.....	324	11	146	2	470
3	1st Lt. Jos. Garrard, 9th Cav.....	329	6	132	8	461
4	Corpl. Jas. P. Kelly, Co. E, 6th Inf..	314	29	140	3	454
5	Corpl. Harry Annis, Co. C, 21st Inf..	317	23	137	5	454
6	Pvt. Frank Hoffman, Co. F, 21st Inf.	316	27	130	7	446
7	Sergt. Jas. Kelly, Co. B, 6th Inf.....	308	36	137	4	445
8	Pvt. Geo. W. Elliott, Co. D, 9d Inf..	330	5	114	12	444
9	Sergt. C. H. Reilly, Co. G, 6th Inf...	322	14	120	10	442
10	Sergt. Geo. A. Lewis, Co. I, 7th Inf..	311	34	130	6	441
11	Sergt. E. H. Stevens, Co. G, 7th Inf.	312	2	98	25	440
12	Sergt. John O. Holen, Co. C, 7th Inf.	319	19	119	11	438
—	ALTERNATES.					
1	Pvt. Robt. P. Stine, Co. F, 7th Inf..	339	3	98	26	437
2	Pvt. D. McKenzie, Co. K, 17th Inf..	324	10	112	15	436

The presentation of the medals to the successful competitors was made by Col. Frank Wheaton, 2d Inf., on behalf of the Department Commander, at the Bellevue Rifle Range, Aug. 28. We give a full account of the presentation elsewhere. The team has now gone to Fort Leavenworth in command of 1st Lieut. John Conline, 9th Cav.

The totals made by the first 12 men on the first day of competition at 200, 300, 500 and 600 yards amount to 1,996 against 1,963 last year. Lieut. Conline, 9th Cav., at 500 yards made one 3 and nine 5's, or 48 out of 50. The totals for first day's competition, at the four ranges for 61 men, is 9,688 points. Last year it was 8,926, or a gain of 762 points. At 500 yards they made 2,445 out of 3,010. This is doubtless due to the increased proficiency of the soldier, and the above record speaks for itself.

Department of Dakota.—A despatch of August 30 says: So far the following are ahead:

Lieut. Perkins, 5th Inf	253
Sergt. Sobel, 3d Inf	245
Corpl. Mayo, 15th Inf	242
Private Lubecki, 20th Inf	242
Sergt. Ley, 5th Inf	242
Corpl. Drake, 3d Inf	239
Sergt. Unger, 5th Inf	239
Sergt. Ogden, 1st Cav	237
Sergt. Woods, 3d Inf	235
Corpl. Daykin, 3d Inf	233
Private George, 25th Inf	232
Corpl. Boyle, 20th Inf	232
Sergt. Marti, 3d Inf	232
Sergt. Wood, 20th Inf	231

Department of the Missouri.—The contest closed Aug. 28 and the team is now resting on its laurels until the time to enter the Division competition has arrived. The following is the team with scores:

	Two Days' Known Distance..		Two Days' Skirmish Firing..		Aggregate Four Days.
	Total..	Order.	Total..	Order.	Total..
Corpl. Michel, L, 4th Cav..	335	1	144	1	479
Lieut. Shank, 18th Inf	319	5	142	2	461
Pvt. Ehrenfried, Band, 18th Inf	320	4	136	4	446
Sergt. Ray, A, 10th Inf	305	14	127	3	432
Sergt. Rose, I, 18th Inf	318	6	96	6	414
Pvt. Garrard, K, 10th Inf	306	13	103	5	409
Pvt. Peterson, A, 5th Cav	312	10	86	9	398
Pvt. Miller, B, 3d Cav	299	24	95	7	394
Lieut. Macomb, 5th Cav	326	2	64	18	390
Sergt. Conley, D, 24th Inf	310	11	79	19	389
Sergt. Hamburg, E, 10th Inf	313	9	75	14	388
Pvt. Baker, H, 24th Inf	304	15	82	18	381
Patrick Kenney, B, 18th Inf	284	36	94	8	378
Sergt. Crosse, H, 3d Cav..	300	22	78	13	378

Corpl. Michel, Troop L, 4th Cav., wins both the Department gold medal and the Skirmish medal and has been warmly congratulated on his success.

Department of Texas.—The following made the highest scores during the annual competition:

Pvt. Chas. Forsyth, Co. C, 19th Inf	507
Corpl. Fredk. Schmitt, Co. E, 19th Inf	505
Sergt. W. Garlinghouse, Troop E, 8th Cav	500
Sergt. James E. Morgan, Co. B, 19th Inf	495
Sergt. Joseph F. Crawford, Co. A, 19th Inf	494
Sergt. S. F. Randall, Troop L, 8th Cav	485
Pvt. John O'Brien, Troop H, 8th Cav	482
Pvt. G. C. Taliafero, Band, 3d Cav	480
Pvt. John Garvin, Band, 8th Cav	477
2d Lieut. B. S. Buck, Co. D, 16th Inf	476
Sergt. S. M. Green, Troop G, 8th Cav	471
Corpl. John Gormley, Troop B, 8th Cav	469
Pvt. H. Ohlschlaeger, Co. D, 19th Inf	469
Capt. Chas. T. Witherell, Co. C, 19th Inf	468
Pvt. C. F. Dugger, Co. F, 19th Inf	461

The percentages of regimental teams were: 8th Cavalry, 57.21; 19th Infantry, 55.78; 3d Cavalry, 51.00, and 16th Infantry, 48.58. The 8th Cavalry won the "Bell Cup." Private Chas. Forsyth, Co. C, 19th Inf., gets the Department gold and silver medal.

Capt. C. T. Witherell, 19th Inf., and 2d Lieut. B. B. Buck, 16th Inf., members of the Department rifle team, will proceed to Fort Leavenworth. (S. O. 115, D. Texas, Aug. 27.)

The enlisted men selected for the Department rifle team and alternates will proceed to Fort Leavenworth. The detachment will leave Fort Clark Aug. 29. (S. O. 115, D. Texas, Aug. 27.)

Department of Arizona.—We gave the team and its scores last week, and it has now gone to San Francisco. Gen. Miles presented the medals in person to the successful competitors at Fort Wingate, N. M., Aug. 19.

(Correspondence of the Army and Navy Journal.)

WEST POINT, N. Y.

SEPTEMBER 1, 1886.

TO-DAY the new academic year began with a first class of sixty-five, a second class of fifty-one, a third class of sixty-four, and a fourth class of one hundred and twenty-nine. The number of sections into which the classes are divided will be given next week.

Forty candidates passed the physical examination last week. Of these twenty-seven were yesterday admitted, the others having failed to pass the mental examination. The names of the successful candidates are:

Allen, Stuart Ashby, Ky.	Johnson, Wm. Orlando, Ky.
Bess, Charles Thos. Myers, La.	Lafitte, James Livandais, La.
Clark, Charles Carr, Pa.	Learnard, Henry Grant, Mich.
Gatley, George Grant, Me.	Lindsay, James Robert, Ill.
Giblin, Arthur Leon, N. Y.	Manu, Luther Gilbert, Ill.
Gregory, Le Roy, Ky.	Nichol, William, Ark.
Guyer, Geo. Dickinson, N. Y.	Perry, Howard Rand, Ill.
Hamilton, Robert Lee, W. Va.	Plummer, Fred. Weston, Me.
Heavey, John William, Ill.	Ramsay, Geo. Douglas, N. Y.
Holloway, Henry Wilson, S. C.	Rayburn, Saml. King, Jr., Ala.
Holmes, Wm. Howard, W. Va.	Smith, Harry Alexander, Kas.
Hornbrook, James Jos., Ind.	Todd, Henry Davis, Jr., Pa.
Hoskins, Geo. Coleman, Miss.	Webb, Levi Pownall, Pa.
Jackson, Franklin Mills, at l.	

One of them, Holloway, of S. C., is colored.

Edward F. Searing, from Minnesota, was admitted as a cadet to date from Aug. 28. His case is peculiar. He came here in June to take the place of Arthur Johnson, of the 1st Class. Cadet Johnson, in consequence of the sentence of a Court-martial, did not graduate until Aug. 28, therefore there was no vacancy for Mr. Searing. He was allowed to remain so as to get the benefit of the encampment, but had to bear his own expenses. All of the new officers have reported for duty except Lieut. Mitcham, of the Ordnance.

Lieut. Marsh is assigned to duty in Philosophy; Lieut. Lissak in Mathematics; Lieut Wisser in Chemistry, of which he will be Assistant Professor; Lieut. Gordon will be Assistant Professor in the Department of Philosophy.

Lieut. Warren has been relieved from duty in Engineering and will serve with the Engineer Company.

The hop on Aug. 28 was a brilliant one. The attendance was not as large as at previous affairs, but what it lacked in numbers was more than made up in the number of handsome ladies and pretty costumes. There was no german. Dancing at Schofield Hall went on at the same time as in the Mess Hall. An elaborate supper was served during the evening, as the refreshments could be had at any time. There never was a crowd near the tables. About a dozen of last June's graduates were present. We also noticed Lieut. Patterson, 14th Inf., and wife; Lieut. J. F. Bell, 7th Cav., and wife; Lieuts. Garlington, 7th Cav., and Mallory, 2d Inf., with their brides.

Major Volkmar, of the Adjt.-General's Dept., arrived yesterday, to remain several days.

The large paintings of Generals Sedgwick, Reynolds, Ord, Schofield and Abert, which formerly hung in Schofield Hall, have been removed to the Cadet Mess Hall, where they now adorn the walls and add much to the appearance of the Hall.

—

Ross L. Bush and Walter Puterbough, of Peoria, Ill., Tiernan N. Horn, of Plainfield, N. J., and Herbert N. Royden, of Milford, Conn., have been designated for examination for admission to the U. S. Military Academy.

(Correspondence of the Army and Navy Journal.)

WASHINGTON BARRACKS, D. C.

AUGUST 31.

THE troops of this command was mustered this afternoon under the command of Gen. Gibson. The annual inspection takes places to-morrow at 10 o'clock A. M.

The regimental band returned on Monday night from Atlantic City, after an absence of 10 days. Dress parades which has been suspended during their absence is in full bloom again.

The skirmish firing for the season, which has been conducted under the personal supervision of Col. Bainbridge, has just closed. The range will now be occupied by the batteries from McHenry, one of which will probably reach here to-morrow. Many officers are absent just at present, some enjoying their vacation on leave of absence, and others on duty at various points.

The intense heat which we have experienced for some time is very disagreeable. The long wished for change has come at last. To-day is quite delicious; just that feeling of chilliness in the air which makes one believe that there are some days in the year when living is a pleasure, and that this is one of them. Malaria prevails very much. Quite a number of the men have been compelled to seek relief on the sick books.

Another team goes to Baltimore this week to recover the honors lost by the teams of last week. The paymaster is now the countersign, and the men are anxiously on the lookout for him.

Just as I am about to close a slight shock of earthquake is felt in this vicinity.

(Correspondence of the Army and Navy Journal.)

FORT LYON, COL.

AUGUST 24, 1886.

THE post has been very pleasant this summer. Mrs. Dr. Powell's sister and her little daughter are spending the summer with her. Mrs. Lieut. Root's sister, Miss Eddy, who has been spending the last three months here, leaves on the 27th for her home in the East. Mr. Samuel Barnes, from Boston, has been visiting his daughter, Mrs. Capt. Cusick, this summer. Col. Conrad returned from a seven days' leave last Saturday evening, the 21st. Capt. Clark and his family returned here on the 16th. Capt. Clark has been on a two months' sick leave. Capt. C. C. Cusick is on a thirty days' leave in the East. The lawn and shade trees in the officers' yards and around the parade are looking nice and green. Mr. Forrester from Denver held services and communion in the post hall last Sunday morning. There was a large attendance. We have had a very hot summer; temperature from 95 to 109 in the shade, and a hot wind some of the time. We are all anxious to know when Fort Lyon will be abandoned. SOLDIER'S DAUGHTER.

FORT DU CHESNE, UTAH.

THE following is the garrison: Major Frederick W. Benteen, 9th Cavalry, commanding.

Troop B, 9th Cavalry.—Capt. Byron Dawson (*a.l.*); 1st Lt. Geo. W. R. Burnett; 2d Lieut. Harry G. Trout.(*a.l.*)

Troop E, 9th Cavalry.—Capt. Jerauld A. Olmstead; 1st Lt. F. Beers Taylor (d.s.s.); 2d Lieut. Eugene F. Ladd.

Co. B, 21st Infantry.—Capt. Stephen P. Jocelyn(d.s.r.); 1st Lieut. Willis Wittich; 2d Lieut. Henry D. Styer[*d.s.*]

Co. F, 21st Infantry.—Capt. James A. Haughey[*s.*]; 1st Lt. Jos. W. Duncan; 2d Lieut. John S. Parke, Jr.

Co. I, 21st Infantry.—Capt. Wm. F. Spurgin(d.s.); 1st Lt. Harry L. Bailey; 2d Lieut. Lawrence J. Hearn, A. A. Q. M.

Co. K, 21st Infantry.—Capt. Geo. M. Downey[*s.*]; 1st Lieut. Chas. M. Truitt, A. C. S.; 2d Lieut. Edw. W. McCaskey[*a.l.*]

Assistant Surgeon Robert B. Benham.

We have heretofore given the location of the post. The P. O. address is Ouray, and telegraph station Green River City, Wyo.

COURT-MARTIAL CASES.

In the case of a soldier recently tried at Fort Bowie, for absence without leave and drunkenness, Gen. Miles says: "The Court found him guilty, but in view of the fact that the records show that the soldier has already served four months confinement in the guard house, does not adjudge any further punishment." The reviewing authority, Gen. N. A. Miles, thereupon says: "The court by omitting to impose sentence after proving the accused guilty transcended its authority by exercising a function which is wholly and alone within the province of the reviewing authority. Courts-martial are appointed for the purpose of trying and determining cases according to the evidence, and their duty is to "duly administer justice" without favor or prejudice to the accused. The well defined law governing military proceedings and of which the most inferior courts should take cognizance, require that some sentence must always follow conviction, and courts are strictly and specifically prohibited from omitting to award sentence for any reason whatever, and especially on account of even the unreasonably long confinement of the accused. It was the duty of the court in this as in all cases: 1. to determine the guilt or innocence of the accused. 2. to prescribe the punishment usual in offences of like nature; and then if there had been any mitigating or palliating circumstances involved, to recommend the accused to the mercy of the reviewing authority. (G. C.-M. O. 41, D. Ariz., 1886.)

In the case of a soldier tried for being asleep on post, Maj.-Gen. Howard says: "There was great carelessness on the part of the accused in going into the sentry-box, in not challenging the sergeant on his approach to his post, and in parting with his rifle. Still, notwithstanding this evident and gross dereliction of duty, he may not have been actually asleep, and cannot be punished for other delinquencies not charged or specified. Therefore, giving the accused the benefit of the doubt, the findings and sentence are not approved. (G. C. M. O. 33, D. Cal., Aug. 21.)

COMMANDER HOFF, Lieut. R. T. Milligan, Comdr. F. J. Higginson, U. S. N., and wife were guests at the Aquidneck, Newport, R. I., this week.

THE NAVY.

NAVAL VESSELS IN COMMISSION.

WHEN AND WHERE LAST HEARD FROM.

N. Atlantic Station—Rear Admiral S. B. Luce.

GALENA, 3d rate, 8 guns, Comdr. Colby M. Chester. Off Greenport, Long Island, Aug. 31. Ordered to Portsmouth, N. H., Aug. 31.

SWATARA, 3d rate, 8 guns, Comdr. E. T. Woodward. At Halifax, N. S., Sept. 3. To leave as soon as coaled. Ordered to Portsmouth, N. H., Aug. 31.

TENNESSEE, 1st rate, 22 guns (f. s. n. a. s), Capt. Robert Boyd. At Greenport, L. I.

YANTIC, 3d rate, 4 guns, Comdr. Francis M. Green. On a cruise. Address, Greenport, L. I. Ordered to Portsmouth, N. H., Aug. 31.

S. Atlantic Station—Captain E. E. Potter (in command temporarily).

Acting Rear Admiral D. L. Braine will shortly command this station.

Mails should be addressed to care of U. S. Consul, Rio de Janeiro, Brazil, unless otherwise noted, or care of B. F. Stevens, 4 Trafalgar Square, London.

ALLIANCE, 3d rate, 6 guns, Comdr. Charles McGregor. At the New York Navy-yard. She will shortly be ordered to join the South Atlantic Station.

LANCASTER, 2d rate, 10 guns, (f. s. a. s.) Capt. S. L. Breese (ordered). Arrived at Rio de Janeiro, Aug. 12. All well.

TALLAPOOSA, 4th rate, 13 guns, Comdr. William Whitehead. Arrived at Rio de Janeiro Aug. 14.

European Station—R.-Adml. Sam. R. Franklin.

Mails should be addressed to care B. F. Stevens, 4 Trafalgar Square, London, England, unless otherwise noted.

PENSACOLA, 2d rate, 16 guns(f. s. e. s.), Captain George Dewey. Arrived at Leghorn, July 28.

KEARSARGE, 3d rate, 7 guns, Comdr. Charles D. Sigsbee. Was to remain in Phalerum Bay, near Athens, Greece, until about Aug. 1. Has been ordered to return to U. S.)

QUINNEBAUG, 3d rate, 8 guns, Comd. Geo. W. Coffin. At Southampton, England, August 11, 1886. Will leave the English channel by the middle of August or September for Genoa, touching on the Spanish coast and at Marseilles. Will be sent to the East for the winter, if no other vessel joins the squadron.

Pacific Station—Rear-Adm. E. Y. McCauley.

Mails, unless otherwise noted, should be addressed to care U. S. Consul, Panama, U. S. C.

ADAMS, 3d rate, 6 guns, Comdr. Louis Kempff. Left Callao, Peru, June 20, for Coquimbo. Was at Iquique, July 31.

HARTFORD, 2d rate, 16 guns (f. s. p. s.), Capt. J. H. Gillis. Was at Callao July 31.

JUNIATA, 3d rate, 8 guns, Comdr. G. T. Davis. Sailed from New York, Aug. 16, for Pacific Station.

IROQUOIS, 3d rate, 7 guns, Comdr. Yates Stirling. At Callao July 31. Commander J. C. Watson has been ordered to command, and leaves New York per steamer of about Sept. 1.

MONONGAHELA, 2d rate, 9 guns, Lieut. Comdr George B. Livingston in command. Used as a storeship at Coquimbo, Chili.

MOHICAN, 3d rate, 8 guns, Commander Benjamin F. Day. Reported by cable from Melbourne, Aug. 20, to have sailed for Samoan Islands, to remain there during the session of Commission on Samoan affairs.

PINTA, 4th rate, screw, 2 guns, Lieut. Comdr. Henry E. Nichols. Address care of Navy Pay Agent, San Francisco, Cal. At Juneau, Alaska, June 8. Was to go to Sitka about the middle of July for supplies.

SHENANDOAH, 2d rate, 9 guns, Captain Byron Wilson. At Callao, Peru, July 31. Has been ordered to proceed to San Francisco for repairs, touching en route at South and Central American ports.

VANDALIA, 2d rate, 8 guns, Captain Henry L. Howison. Sailed from New York, Aug. 14, for the Pacific Station.

Asiatic Station—Rear-Admiral J. L. Davis.

Commodore Ralph Chandler has been ordered to command this station, and will leave San Francisco per steamer of Oct. 30.

Vessel with (†), address, Mail, to care U. S. Consul, Yokohama, Japan.

ALERT,† 3d rate, 4 guns, Comdr. Chas. J. Barclay. She will return to the U. S., and expects to reach San Francisco some time in September. Arrived at Hakodadi, July 21.

BROOKLYN, 2d rate, 14 guns, Capt. E. O. Matthews. Sailed from New York, Aug. 12, for the Asiatic Station. Arrived at Lisbon, Portugal, Sept. 2, 1886.

ESSEX, 3d rate, 6 guns, Comdr. T. F. Jewell. Sailed from New York for the Asiatic Station Sept. 2, 1886.

MARION,† 3d rate, 8 guns, Commander Merrill Miller. At Shanghai July 21—undergoing repairs.

MONOCACY,† 3d rate, 6 guns, Comdr. Henry Glass. Was at Canton July 21.

OMAHA,† 2d rate, f. s. a. s., 12 guns, Captain Thos. O. Selfridge, commanding. Reported by cable to the JOURNAL, at Shanghai, China, July 17.

OSSIPEE,† 3d rate, 8 guns, Comdr. John F. McGlensey. Left Nagasaki, July 10, for Chemulpo, Corea. Has been ordered to return to New York by the middle of February, 1887.

PALOS,† 4th rate, 6 howitzers, Lieut.-Commander T. Nelson. On her way from Chemulpo to Shanghai July 21.

TRENTON, 3d rate, 10 guns, Capt. Robert L. Phythian. Arrived at Fort Monroe, Va., Sept. 2, 1886.

Apprentice Training Squadron.

Address of *Portsmouth* and *Saratoga*, care of B. F. Stevens, 4 Trafalgar Square, London, England, until Aug. 25, and after that date Newport, R. I.

MINNESOTA, 1st rate. 24 guns, Comdr. T. F. Kane, Gunnery ship. Foot of W. 27th Street, North River. Entrance from W. 26th Street. P. O. address, Station E, New York.

NEW HAMPSHIRE, 1st rate, 16 guns, sails, flagship of training squadron, Captain Arthur R. Yates. Coaster's Island Harbor, Newport, R. I.

PORTSMOUTH, 3d rate, sails, 12 guns, Comdr. Chas. V. Gridley. Sailed from Lisborn for Newport, R. I., Aug. 31.

SARATOGA, 3d rate, 12 guns, Comdr. C. H. Davis. Sailed from Lisbon for Newport, R. I., Aug. 31.

On Special Service.

CONSTELLATION, 3d rate, 10 guns, Practice Ship of Naval Academy, Commander C. L. Huntington. Put out of commission at Annapolis Aug. 31.

DESPATCH, 4th rate, Lieut. Wm. H. Emory, Jr. Was at Bridgport, Conn , Aug. 26. Was to leave in a day or two.

DOLPHIN, despatch boat, ———— At Norfolk, Va. Undergoing repairs.

JAMESTOWN, 3d rate, sails, 12 guns. Comdr. Chas. J. Train assumed command Aug. 31. At Annapolis, Md. Assigned to Training Squadron.

MICHIGAN, 4th rate, 8 guns, Comdr. John J. Read. Arrived at Buffalo, Aug. 23, from Erie.

RANGER, 3d rate, 4 guns, Comdr. Chas. E. Clark. At San Francisco.

ST. MARY'S, sails, 8 guns, Comdr. Edwin M. Shepard. N. Y. Schoolship. On her annual cruise. Was in Hempstead Bay, L. I., Aug. 16.

ATLANTA, 2d rate, 8 rifled cannon and 12 machine guns, Captain Francis M. Bunce. At New York Navy-yard.

VARIOUS NAVAL ITEMS.

THE books, models and papers pertaining to the Naval Advisory Board, shipped from the Navy Department to Chester, Pennsylvania, made a full car load.

ROUMANIA is making efforts to show her flag at sea. The training ship *Mirzea*, with a crew of 108, of whom 50 are boys, after cruising in the Black Sea visited Russian and Turkish ports.

HELIOGRAPHS are to be supplied to several ships of the English Navy, and it is expected that they will come into general use in the Navy. The semaphore has already largely superseded bunting.

"FULL speed ahead, and helm hard-a-port," was the order given just in time to save the royal yacht *Victoria and Albert* from being run down by a large steamer one night, when she was en route to convey the King of Portugal to Flushing.

THE Naval Board of Inspection and Survey, consisting of Rear Admiral James E. Jouett, president, Capt. Robert F. Bradford, Comdr. Henry C. Taylor, Chief Engr. Philip Inch and Naval Constructor Philip Hichborn, paid an official visit to the Portsmouth Navy-yard Saturday last.

THE Swedish journals are now discussing the merits of a new project submitted by the Engineer de Rothe to the Swedish and Danish Governments to unite the two countries by means of a submarine tunnel between Copenhagen and Malmo. De Rothe has presented the scheme in the name of a French company. He was for many years employed in the works of the Panama Canal.

WASHINGTON, says the *Critic*, is always flooded with "middies" each year when the practice course is completed at the Naval Academy, and as the cruise ended Saturday the complement is here, although a contingent of over 160 went West yesterday. There are no "middies" now officially in our Navy, but Naval cadets will always be "middies" to the old officers and their wives and daughters.

THE U. S. Navy has been content to look on while others have been adding to their strength. But at last the time has come for a forward movement, and as our American cousins never do things by halves, they have now ordered a new cruiser, which is to be "the most powerful in the world." This, we take it, is the first step towards the fulfilment of their long-standing promise to "lick creation."—*Admiralty Gazette.*

THE fine model of the *Naniwa Kan*, made under the direction of Constructor Hichborn at the Washington Navy-yard, and which occupies a prominent place in the Secretary's office, attracts much attention. It is on a sufficiently generous scale, and with all is so complete in its details that even a landsman can but see the manifest design of the many new instruments and appliances which go to the making of a modern war ship.

THE American Ephemeris and Nautical Almanac for 1889 is now ready for issue to scientific institutions and for sale, the first copies having been received at the Navy Department Aug. 30. It shows two total eclipses for the year, one Jan. 1 and the other Dec. 22. The path of totality of the first named covers San Francisco, while that of the other skirts the northeastern coast of South America and crosses the continent of Africa.

AN effort is being made to secure an amendment of the order in reference to the reorganization of the Washington Navy-yard. The order issued by Secretary Whitney abolished a number of departments in the Yard, including that of yards and docks. It is argued that the duties of the representatives of this bureau are simply to retain the custody and be responsible for the repair and care of the buildings and docks, and that ordnance employees could not be assigned to such work, and valuable property in the Yard would fall into decay and deteriorate in every way.

THE third report from the Board on Auxiliary Cruisers is on the steamer *Saratoga*, of the New York and Cuba Steamship Line. She can be made available as an auxiliary cruiser of the first-class. She is 2,500 tons register, 320 feet long, and 38 1-3 feet beam and 31 feet depth of hold. Her hull is built of the best plate iron, triple riveted, and the angle-irons are unusually heavy. The *Saratoga* has six water-tight bulkheads and two complete iron decks. She has compound engines of 2,000 horse power, calculated to give her a speed of 15 knots, and can steam, with present and additional coal accommodations recommended, at full speed, about 40 days, or 13,675 kots; and a total distance, at 10 knots an hour, of 24,240 knots with all coal carried, or 101 days.

REAR ADMIRAL THOMAS O. SELFRIDGE went from San Francisco last week on the lighthouse steamer *Madrono* with his family to visit Commodore Belknap at the Mare Island Navy-yard.

THE Navy Department is making rapid progress in issuing requisitions for the payment of the Graham mileage claims appropriated for last session. Between four and five hundred, aggregating $86,000, over half the amount appropriated, have already been settled, and the remainder are being disposed of at the rate of 50 per day. They will all be settled, as far as the Navy Department is concerned, before Sept. 15. The accounting officers are still receiving a few claims of this character, and are adjusting them as rapidly as they come in. They will have to be reported to Congress, however, before they can be paid.

THE annual examination of the torpedo class began Sept. 1 in the presence of a board of officers consisting of Comdrs. Johnson and Sumner and Lieut.-Comdr. Royal B. Bradford, the class having been under instruction three months. The board was received at the station by Capt. Sampson and his officers in uniform, and after making a tour of inspection went to work to perform the duties for which they were selected. About two-thirds of the members of the class will go to the War College after the examination for further instructions. Several members will remain at the station all winter and take the advanced course.

NAVY GAZETTE.

Ordered.

AUG. 27.—Passed Assistant Surgeon G. C. Lippincott to duty at the Naval Academy, Oct. 1.

AUG. 28.—Medical Director Richard C. Dean as a member of the Naval Examining and Retiring Board at Washington, D. C., on Oct. 5.

Cadet Engineer Frank B. Dowst to the Saratoga.

SEPT. 2.—Chaplain Edward K. Ransom to the Naval Academy, Sept. 15.

SEPT. 3.—Sailmaker Geo. T. Douglass to duty at office of Captain of New York Navy-yard.

P. A. Paymr. James E. Cann will relieve P. A. Paymr. J. W. Jordan at Key West, Fla., Oct. 1.

Paymr. E. N. Whitehouse to special temporary duty at the Navy Department.

Comdr. B. H. McCalla to temporary duty at the Norfolk Navy-yard.

Detached.

AUG. 27.—Ensign Thomas W. Ryan from the Ranger, Oct. 1, and placed on waiting orders.

Passed Assistant Surgeon S. H. Dickson from the Naval Academy, Oct. 1, and ordered to the Navy-yard, Washington.

Assistant Engineer W. J. Baxter from the Saratoga and ordered to duty in the shipbuilding establishment of the Messrs. Napier at Glasgow, Scotland.

AUG. 28.—Rear Admiral John Lee Davis from the command of Asiatic Station, on the reporting of his relief, and ordered to return home, reporting his arrival.

Commander Wm. B. Hoff and Lieutenant Richard T. Mulligan from duty at the Bureau of Navigation and ordered to special temporary duty on board the Tennessee.

Medical Director Edward Shippen from the Naval Hospital, Philadelphia, Pa., and ordered to attend officers of the Navy and Marine Corps at Philadelphia, not otherwise provided with medical aid.

Medical Director Wm. T. Hord from duty as a member of the Examining and Retiring Boards at Washington on Oct. 5, and ordered to the Naval Hospital, Philadelphia.

AUG. 31.—Lieutenant John W. Stewart from the Pinta and ordered to proceed home and await orders.

Lieutenant W. G. Hannum from the Coast Survey and granted four months' leave.

Surgeon John F. Bransford from the Iroquois, July 8, and ordered to Naval Hospital, New York, Sept. 10.

Passed Assistant Surgeon C. H. H. Hall from the Naval Hospital, New York, Sept. 11, and ordered to duty at Naval Hospital, Yokohama, Japan, per steamer, Sept. 21.

Ensign Charles P. Plunkett from the Atlanta and ordered to the Pinta.

Passed Assistant Engineer G. D. Strickland from the Mare Island Navy-yard, Cal., and ordered to the Coast Survey steamer Hassler.

Assistant Engineer E. T. Warburton from the Hassler and placed on waiting orders.

Mate Charles Wilson from the Navy-yard, New York, and ordered to duty at the Naval Station, New London, Conn.

SEPT. 2.—Ensign Edward E. Capehart from the Galena and placed on waiting orders.

Chaplain A. A. McAlister from the Naval Academy, Sept. 15, and placed on waiting orders.

SEPT. 3.—Asst. Payr. John S. Carpenter, from the Yantic, and ordered to settle accounts and await orders.

Asst. Paymr Thomas J. Cowie, as commissary on board the New Hampshire, and placed on waiting orders October 1.

Leave.

Granted Ensign Harry McL. P. Huse for 23 days.

Retired.

Rear Admiral John H. Russell, from Aug. 27, 1886.

Revoked.

The order of Lieutenant W. McLean to the Jamestown and he will remain on duty on board the Vermont.

Resigned.

Cadet Engineer A. R. Bush to take effect from Aug. 31.

MARINE CORPS.

AUG. 28.—Captain Geo. C. Reid, present leave of absence extended until Sept. 10, 1886.

AUG. 31.—Lieutenant-Colonel J. L. Broome granted leave of absence for 15 days upon the General Court-martial, of which he is a member, being dissolved.

SEPT. 1.—1st Lieutenant Geo. R. Benson, detached from the Marine Barracks, Brooklyn, N. Y., and ordered to the U. S. S. Jamestown, at Annapolis, Md.

SQUADRON REPORTS.

REAR-ADMIRAL S. R. FRANKLIN, commanding European station, under date of Aug. 18, informs the Navy Department that the *Pensacola* was at Syra, Greece, from July 1 to 13; at Phalerum, 13 to 21; at Zante, from 22 to 24; and at Leghorn, Italy, from 27 to 31. The *Quinnebaug* was at Gravesend, England, from July 1 to 3; at Margate, 3 to 4; at Flushing, Holland, 4 to 5, and 19 to 25; at Antwerp, Belgium, 5 to 19; and at Cherbourg, France, 26 to 31. The *Kearsarge* at Rayukdore, Turkey, from July 1 to 3; at Constantinople, 3 to 9; at Prinkifo, Turkey, 9 to 10; at Syra, Greece, 12 to 13; at Phalerum, Greece, 13 to 31; and sailed Aug. 1 for a cruise on the coast of Syria.

Under date of July 21, Rear-Admiral John Lee Davis reports that the *Omaha* left Nagasaki, Japan, July 12 and arrived at Shanghai on the 15th. The *Ossipee* left Nagasaki July 10, and should have reached Chemulpo, Corea. The *Marion* is at Shanghai. The *Alert* left Yokohama for Hakodudi July 15 and arrived there July 21. The *Monocacy* is at Canton. The *Palos* should be on her way from Chemulpo to Shanghai. The health of the officers and men is good.

Comdr. Charles V. Gridley, commanding training squadron, reports the arrival of squadron at Horta, Fayal, July, 25, twenty-one days from Newport, R. I.; all well. Pleasant weather was experienced with the exception of two days, on one of which, July 12, it was necessary to heave to for some hours in a gale from S. and W. Eight days of the passage the winds were very slight. On arrival the Portuguese flag was saluted with 21 guns, which salute was returned gun for gun. The U. S. Consul paid a visit to the ship, and was given the usual salute upon leaving. The Governor was called upon, and the call returned on the following day, and upon leaving was given the usual salute. The squadron was to leave for Lisbon on Aug. 2.

NAVAL ACADEMY.

ANNAPOLIS, MD., Aug. 29, 1886.

About eighty young men have received permission to enter the September examination at the Naval Academy, which begins next Wednesday. Among the applicants will be some who failed at a former trial and have been fortunate enough to receive a reappointment. It is expected there will be two Japanese students to enter the Academy this year.

Three Japanese students have already completed a full four years' course at the Naval Academy, and two others a partial course. Several who had entered resigned on account of ill-health and for other reasons after remaining a year or so at the institution. Zunzo Matzmuller was the first Japanese to graduate, completing a successful course in 1873. Giro Kunitomo and Koro Katz left the Academy during the term of 1876-77, and Tasuka Sarrata and Sotokichi Uriu finished a four-year term in 1877. Some of the Japanese students showed talent, and kept up with their studies quite well.

The practice ships *Constellation*, Commander C. L. Huntington commanding, and *Jamestown*, Commander Horace Elmer, returned to the Naval Academy, Aug. 27, after a cruise of two months and eleven days. The *Jamestown* was the first to arrive, though both vessels were in company homeward bound. The *Constellation* came in two hours later, accompanied by the Government steamers *Phlox* and *Standish*, and anchored in the Severn near the *Jamestown*. The *Constellation* went out of commission Tuesday, and the *Jamestown* will return to the Training Squadron after receiving repairs at Norfolk. The officers will then be detached and ordered to duty elsewhere, and the cadets, except the youngsters who entered the Academy last May, will go on leave for a month. A dozen cadets, who were unsatisfactory in their studies at the annual examination, including six first class men, will report three days earlier for re-examination. The cadets, who were allowed to go ashore Aug. 27, were pretty well bronzed by the sun. The unfortunate accident by which Cadet Schley was killed by falling from the rigging of the *Constellation* and the drowning of three of the seamen cast a gloom over the entire cruise. But for this mishap the voyage would have been most pleasant.

A private letter received from a person on board the *Tennessee* reports the loss of one of the crew, who fell overboard on the morning of Aug. 25, near Gardner's Island. The *Tennessee* passed through a severe gale on Wednesday, which lasted until four o'clock Thursday morning. Funeral services were held for the drowned man Thursday, though his body was not recovered.

Naval Cadet David W. Taylor, of Virginia, who graduated at the Naval Academy in 1885 at the head of his class, is reported to have won the highest honors at the Royal Naval College, Greenwich, England, where he has been undergoing instruction since June 20, 1885. Cadet Taylor was for several years one of the most distinguished students of Randolph Macon College, and is a brother of Mr. Henry Taylor, Jr., a prominent lawyer of Richmond.

Naval Academy cadets who returned from the practice cruise Friday left Annapolis to-day by special train for a month's vacation.

The following have been announced as cadet officers for the battalion at the UnitedStates Naval Academy for the next academic year:

Cadet Lieutenant-Commander.—F. W. Hibbs.

Cadet Lieutenants.—Elliot Snow, Benton C. Decker, B. W. Wells, and Edward H. Durell.

Cadet Masters.—Walter S. Burke, L. C. Bertolette, Henry F. Bryan and Henry L. Peckham.

Cadet Ensigns.—William G. McMillan, George W. Logan, Edward Moale, Guy H. Burrage and Henry A. Allen.

Petty Officers.—First Class—Robert Stokey; Benjamin W. Stearns, T. Wasqington, Newton A. McCully, Andrew T. Long, A. H. Scales, F. M. Russell, C. Churchill, S. P. Edmonds, R. H. Jackson, Victor Blue and H. L. Draper.

Second Class—Frank Marble, W. N. Vansant, A. H. Robertson, D. W. Beswick, C. A. Ingate, C. B. Brittain, W. M. Crose, H. K. Benham, C. D. Wilbur, D. J. Anderson and H. O. Stickney.

A cadet adjutant is to be selected hereafter; also a new commanding officer in place of Ensign Fullam, ordered on sea duty.

LIEUT. SCHUETZE HOMEWARD BOUND.

THE Siberian *Gazette*, published in the city of Tomsk, Western Siberia, gives the following particulars with regard to Lieut. Schuetze's journey to the mouth of the Lena River, with gifts and rewards for the officials and natives who aided the survivors of the Arctic exploring steamer *Jeannette*.

"Lieut. Schuetze having discharged the duty laid upon him is now on his way home. He visited all the natives living at or near the mouths of the Lena and the Olenek, made a journey eastward as far as the river Indigirka, in order to give a reward to the Chuckchi who brought the news of the burning of the *Rodgers*, and then visited the town of Vilulsk to see Mr. Kocharofski, formerly Ispravnik, at Kolynisk, to whom the survivors of the *Jeannette* were also indebted.

"In the course of his travels Lieut. Schuetze made an interesting collection, consisting of specimens of Tongoose dress, weapons, domestic tools and utensils, and models of vehicles; and not less interesting will be found his personal observations upon the natives who live along the northern banks of the Lena and the Arctic Ocean.

"The quantity and the value of the rewards so carefully distributed by Lieut. Schuetze are unusual in our country. To the two Ispravniks (of Verkhoyansk and Kolymsk) he brought watches and gold medals. Among the other beneficiaries—principally natives—he distributed eight gold and twelve silver medals, with the inscription "For Courage and Humanity;" thirteen very valuable guns; twelve hundred roubles in money, and about four thousand roubles' worth of merchandise of various sorts, such as tea, tobacco, wearing apparel, dishes, ornaments, etc. The total number of persons who received rewards was 172. The late Gov. Chernalyef, of Yakoutsk, did not live to receive the sword which was destined for him."

REVENUE MARINE.

THE Acting Secretary of the Treasury Aug. 26 received a report from Captain Abbey, commanding the revenue steamer *Corwin*, dated Ounalaska, July 24. The vessel made an extensive cruise in the vicinity of St. Matthew's Island, St. George Island and Atka Island, returning to Ounalaska July 17. Only four vessels were seen by the *Corwin*—the schooners *Vanderbilt*, *Sierra*, *San Diego* and the *City of San Diego*. All were engaged in taking fur seals. No cause was found for seizing the *Vanderbilt*. She had some sealskins in salt, but the master claimed to have taken them in the Pacific Ocean. The masters of the *Sierra* and *City of San Diego* told similar tales. Neither vessel could be seized for lack of evidence, but as neither had permits for the breech-loading arms with which they were amply supplied, Captain Abbey seized the arms and ammunition. The *San Diego* was boarded July 17, about four miles from Ounalaska, by Lieut. Cantwell, to whom the master admitted he had been sealing and that he then had sealskins on board which were taken in those waters. The crew also made the same admission. Captain Abbey seized the vessel for violation of Section 1956, Revised Statutes, and of Executive Order of July 3, 1875, and took her into Ounalaska harbor. There the master became more reticent and Captain Abbey says he tried to arrange a story about having caught his seals off the Siberian coast. An examination of his cargo revealed 574 skins, of which 174 had been clubbed and not shot, which fact, Capt. Abbey says, proves conclusively that the crew must have landed to get them.

In a second report, dated August 7, Captain Abbey says: "On Sunday, August 1, 1886, while cruising about 65 miles southeast of St. George Island, the British schooners *Thornton* and *Caroline* were found with boats down engaged in killing fur seal. As each boat was taken in the act, and had freshly killed seals on board, the schooners were seized for violation of Section 1956, Revised Statutes, and taken in tow for Ounalaska harbor. At 5 A. M. on August 20 the British schooner *Onward* was spoken at a point about 120 miles southeast of St. George Island, and as the master reported that he was sealing and had taken about 400 skins in the waters near where I found him, I caused the seizure of the vessel for violation of Section 1956, and took her in tow also.

"As each of these vessels had from eight to ten breech-loading guns and ammunition for the same without permit, as provided by law, I seized them for violation of Executive Order of July 3, 1875, and proceeded toward Ounalaska, reaching that port on the night of August 2, 1886, where I anchored and secured the seized vessels, taking the arms and ammunition on board the *Corwin* for safety and safe keeping. I have now four schooners and 60 prisoners, with over 2,000 sealskins, and some other property, upon my hands."

The U. S. revenue cutter *U. S. Grant* came to anchor in the offing, Newport, R. I., on Thursday of last week, and the commander came ashore and went to the Watch Hill House and called upon Secretary Manning. The latter subsequently went aboard the vessel, and the anchor was weighed and the vessel steamed to the eastward. As the distinguished visitor boarded the vessel the regulation salute was fired.

The United States revenue cutter *Louis McLane*, Capt. A. A. Fengar, commanding, arrived at Baltimore, Aug. 31, from Galveston, stopping at Key West and Charleston en route. Capt. Fengar's staff consists of 1st Lieut. Thomas S. Smyth, as executive officer; 3d Lieut. Percy W. Thompson, Chief Engr. Geo. C. Dereamer, 2d Assistants Daniel T. Cross and H. Boyd, Pilot P. H. Peterson. The crew number 32 men. The *McLane* will be put out of commission, and her officers, crew, stores and armament transferred to the steamer *William H. Crawford*, recently rebuilt at Malster's shipyard. The *Crawford* will then proceed to Key West and take the place of the steamer *John A. Dix*, which has been transferred to the Galveston station. The *McLane* during the war was named the *Delaware*, and it was upon her that Vice-Admiral S. C. Rowan won his laurels, fighting her in the North Carolina sounds. When she was transferred to the revenue service she was named after Secretary of the Treasury Louis McLane, father of the present Minister to France and of Mr. Louis McLane, of Baltimore.

An application was received at the Treasury Department, Thursday morning, from the mayor of Wilmington, N. C., for transportation of a relief committee from Wilmington to Charleston. The revenue cutter *Colfax* was immediately placed at the disposal of the committee. Gen. Drum, Acting Secretary of War, has directed that tents be sent to Charleston to shelter the homeless people, and as railroad communications are interrupted, the revenue cutters will transport the tents to the distressed city.

2d Asst. Engr. W. C. Myers, assigned to steamer Boutwell, at Savannah, Ga.

The revenue steamer *McLane* has arrived at Baltimore from Galveston, Texas.

STATIONS OF COAST SURVEY VESSELS.

W. H. Brownson, Lt. Comdr. U. S. N., Hydrographic Insp'r.
Lt. J. F. Moser, U. S. N., Coast and Geodetic Survey Office.
Lt. Geo. H. Peters, U. S. N., Coast and Geodetic Survey Office.

Steamer *A. D. Bache*, Lieut. J. M. Hawley, U. S. N., commanding. Address Cutler, Maine.

Steamer *G. S. Blake*, Lt. J. E. Pillsbury, U. S. N., comdg. Address Lewes, Del.

Schooner *Eagre*, Lieut. Chas. P. Perkins, U. S. N., comdg. Address Station L, New York City.

Schooner *Earnest*, Lieut. C. T. Forse, U. S. N. Address Tulalip, Snowhomish, Wash. Ter.

Steamer *Gedney*, Lieut. F. H. Crosby, U. S. N., comdg Address Port Jefferson, L. I. N. Y.

Steamer *Hassler*, Lieut. David Peacock, U. S. N., comdg. Address Box 2402, San Francisco, Cal.

Steamer *M'Arthur*, Lieut. J. M. Helm, U. S. N., comdg. Address, Navy Pay Office, San Francisco, Cal.

Steamer *Patterson*, Lieut. Comdr. A. S. Snow, U. S. N., comdg. Address Navy Pay Office, San Francisco, Cal.

Steamer *Endeavor*, Lieut. G. C. Hanus, U. S. N., comdg. Address Bath Beach, King's Co., N. Y.

Schooner *Scoresby*, Lieut. Francis Winslow, U. S. N., commanding. Address New Berne, N. C.

Steamer *Arago*, Lt. F. S. Carter, U. S. N., comdg. Address Cold Spring Harbor, New York.

Schooner *Palinurus*, Lieut. D. D. V. Stuart, comdg. Address Mamaroneck, N. Y.

FISH COMMISSION.

The Albatross, Lieut. Commander G. L. Tanner, comdg. At Wood's Holl.

The Fish Hawk, Ensign Louis W. Piepmeyer, comdg. At St. Jerome, Md.

The Lookout, Mate Jas. A. Smith, comdg. At Wood's Holl.

The *Grampus*, J. W. Collins commanding. In Canadian waters.

PAYMASTER L. G. BOGGS, U. S. N., registered at the Albemarle Hotel, New Rork, on Thursday.

BLACK STARR & FROST

SUCCESSORS TO

BALL BLACK & CO.,

Fifth Avenue, Cor. 28th Street.

DIAMONDS AMERICAN AND FOREIGN, WATCHES, JEWELRY, STERLING SILVER AND PLATED WARE, FRENCH CLOCKS, BRONZES AND FANCY GOODS.

BLACK, STARR & FROST have models of the West Point Class Rings for many years, and can supply duplicates (in case of loss) at short notice.

BROWN BROTHERS & CO.,
59 Wall Street, New York,
Buy and Sell Bills of Exchange
on Great Britain and Ireland, France, Germany, Belgium and Holland, Switzerland, Norway, Denmark, Sweden, Australia, and British West Indies. Issue *Commercial* and *Travellers' Credits in Sterling*, available in all parts of the World. MAKE TELEGRAPHIC TRANSFERS OF MONEY TO EUROPE.

Established 1811.
CHOICE OLD WHISKIES,
MILD, MELLOW AND DELICIOUS.

The peculiar medicinal qualities of Whiskey distilled from the finest growth of Rye in the renowned Valley of the Monongahela, have attracted the attention of the Medical Faculty in the United States to such a degree as to place it in a very high position among the Materia Medica.

We beg to invite the attention of connoisseurs to our celebrated fine OLD WHISKIES, which we offer at the following prices, in cases containing One Dozen Bottles each:

Old Reserve Whiskey, - - - - $18.00
Unrivalled Upper-Ten Whiskey, 15.00
Brunswick Club Whiskey, - - - 12.00

If you cannot obtain these Whiskies from your Grocer, we will, on receipt of Bank Draft, Registered Letter or Post Office Money Order, deliver them to your address, by Express, charges prepaid, to all points east of the Mississippi river; and by freight to any part of the U. S. (prepaid.)

For EXCELLENCE, PURITY AND EVENNESS OF QUALITY, the above are UNSURPASSED BY ANY WHISKIES IN THE MARKET. They are entirely FREE FROM ADULTERATION, and possess A NATURAL FLAVOR AND FINE TONIC PROPERTIES.

These Whiskies are sold under guarantee to give PERFECT SATISFACTION; otherwise to be returned at our expense.

U. S. ARMY AND NAVY JOURNAL.
PUBLISHED EVERY SATURDAY.

NEW YORK, SATURDAY, SEPTEMBER 4, 1886.

Office, No. 240 Broadway New York.

No attention is paid to anonymous communications, but the wishes of contributors as to the use of their names will be scrupulously regarded.

Remittances should be made by express, or post-office money order, check, or draft, made payable to W. C. and F. P. Church. Postmasters are obliged to register letters if requested. No responsibility is assumed for subscriptions paid to agents, and it is best to remit direct to the office.

Subscriptions, $6 a year, and pro rata for a less period. In clubs of five, $4; clubs of ten or more, $3.

Postage within the United States prepaid. Foreign postage, $1.00 per annum, should be added to the subscription price.

Change of address will be made as frequently as desired, upon notification; not otherwise, as the changes announced in the orders published in the JOURNAL furnish no authority for changing the address of the paper. Both the old and new address should be given.

We should be very glad to learn from any of our subscribers of any delay or failure to receive the JOURNAL, so that we may give the matter our immediate attention.

Cable address: ARMYNAVY. 240 Broadway, New York.

CORRUGATED BOILER FURNACES.

AN illustration of the truth of the axiom, "that inventors are often born too early, and die too soon, to realize the value of their inventions," is furnished by the case of the inventor of what is known as the "Corrugated Boiler Furnace," an appliance now so extensively used throughout England, and examples of which can be seen in the boilers of many of the foreign steamers which visit this country. It is of interest to know that the boiler furnace at present so much in vogue, and which is put upon the market as the production of one of the largest wrought iron and steel plate manipulating establishments of England, is an *American invention*, and was patented by the late RICHARD MONTGOMERY (a resident of New York City) more than a quarter of a century ago. Mr. MONTGOMERY, whose demise was recorded a decade since, spent much of his time in endeavoring to convince the marine engine and boiler builders of America that the true way to produce a boiler furnace was to weld up a wrought iron cylinder, and corrugate the same at right angles to its axis; but the difficulty presented itself, that no one seemed to possess the art of welding plate iron to such a perfect degree that a wrought tube or furnace cylinder, of sufficient dimensions, could be produced. It was consequently reserved for the artizans of England, in later years, to accomplish what Mr. MONTGOMERY so strenuously insisted could be done by American mechanics, but which he failed to live long enough to see worked out and brought into practical service. Many of the senior chief engineers of our Navy, who, during and previous to the late war, were detailed to superintend the construction of marine machinery, will doubtless remember with what persistent vigor Mr. MONTGOMERY presented his claims to the Navy Department, and to the various establishments doing work for the same. How in season and out of season he exhibited his models for Corrugated Furnaces, and models of tubes not corrugated, and how he would stand his weight upon the former, to prove their collapsing resistance, while the latter would almost yield to the pressure of his hand. So earnest was he in pressing his demands upon engineers to be heard in support of his inventions that he fairly gained the reputation of a "crank." But time, which levels all things, has at last proved the correctness of his schemes, and, if he realized no monetary equivalent for his studies, he left recorded the fact that he was the inventor of the Corrugated Boiler Furnace, as it now obtains; and his name is entitled to and should receive the credit due therefor, in substantiation whereof there exists at the Patent Office of the United States ample proof. The fact that the invention referred to is an American achievement is of greater significance when we remember that by the last Congress appropriations were made for the building of several naval vessels, all of which are to be supplied with corrugated cylindrical furnaces, and that by the terms of the act these must be of American manufacture. It is as true to-day as it ever was that when a special want is made known American engineering skill and the mechanical resources of the country are found equal to the occasion.

ADMIRAL SIMPSON, in his article in *Harper's Magazine*, referred to last week, and Naval Constructor HICHBORN, in his report, present a picture of Congressional neglect, in the matter of docking facilities, in humiliating contrast with the efficient policy of England. Even her distant colony of Australia is provided with docking facilities about equal to those furnished at the Navy yard connected with our principal seaport. With the single exception of the nearly completed stone dock at the Mare Island Navy-yard, California, we have not a dock of greater length than that at Boston, 379 feet by 60, an extreme depth of water at the entrance of 25 feet accommodating a ship 354 feet long.

Turning now to the English dock yards we are told that the total value of the yards at Chatham, Sheerness, Portsmouth, Devonport and Keyham, and Pembroke was returned on March 31, 1884, at $63,684,570. . . . . To this should be added timber and the outfit of vessels amounting to about $12,000,000, making a grand total of $75,000,000 represented in the dock-yards alone. These dock-yards employ about 18,000 men.

The dock yard at Portsmonth now contains not less than 115 acres, and when completed it will be the most capacious of all, and will comprise three floating basins, a large dry dock, two floating basin docks, and a tidal basin, having an opening towards the harbor of 300 feet, and a main depth of 30 feet. The locks at the head of this basin with 28 feet of water, are fine docks in themselves, with a capacity equal to the largest iron-clad. They lead to the repairing basin, an excavation containing 22 acres, and carrying 35 feet of water. Leading out from this repairing basin will be four dry docks each with a depth of 30 feet of water. This yard then, besides being the centre of immense naval industries, contains no less than 15 dry docks and 5 building slips. The English Naval authorities, not content with having brought this branch of the service to a high state of perfection, are continually working out greater and more important changes, so that as fast as the types of ships change and advance, the dock-yard system shall be found fully competent to answer any demands made upon it.

THE new cruiser *Atlanta* will be ready for sea about September 15 and will shortly afterward start on a week's trial trip at sea, going in the direction of the Gulf Coast without making any port. The purpose is to test the vessel to her full capacity, and with that end in view the best fuel and well trained firemen will be procured. Engineer-in-Chief LORING will be on board to supervise the engines and machinery. The Naval Advisory Board may also be invited to make the trip. The vessel is to undergo a trip similar to that of the *Dolphin*. If a storm can be found it is not the intention to avoid it and her performance in both light and heavy seas is to be carefully noted. Nothing has yet been determined as to the *Atlanta's* station after the trial trip is completed, but she will, of course, remain on the home station until her battery is placed

aboard. Her guns are finished but have still to undergo the statutory test before they are placed on board, and two or three months will have elapsed before that is done.

THE Lieutenant General has before him the papers connected with the details of captains of light batteries for the four years, beginning Jan. 1 next, and the selections will therefore likely be made at an early date. Six details are to be made, the tour of duty of the following expiring upon the date mentioned: Captain Taylor, of the 1st Artillery; Captains Warner and Lancaster, of the 3d; Captain Smith, of the 4th; Captains Rawles and Randolph, of the 5th. The probabilities are that the successors to these officers will be Captain McCrea, of the 1st; Captains Turnbull and Barstow, of the 3d; Captain Rodney, of the 4th, and Captains Kinzie and Brinckle of the 5th. These officers are the next on the list of their respective regiments for this duty, and the understanding is that General Sheridan is not inclined to allow any one to escape his turn.

COLONEL CHARLES S. STEWART, Corps of Engineers, has made application to be placed upon the retired list, under the forty years' service act, on September 16. The law being mandatory after application is once made, his retirement will be ordered from that date. Colonel CHARLES E. BLUNT, who stands next in rank, will be retired in February next. Colonel JAMES C. DUANE will then be the ranking officer of the corps, and this added to his record and strong backing by personal and intimate friends of the President, would seem to assure his appointment as Chief of Engineers. Members of the Engineer Corps in Washington all agree that he is the coming man, and with that belief prevailing it is not known that anybody else is urged for appointment.

THE French Minister of War has appointed a mixed committee to consider all questions relating to aerial navigation. It will be composed as follows: President—the Chief of the General Staff; members—Lieut.-Colonel PEIGNÉ, Captain PENEL, Captain HALPEN, Captain RENARD, chief of the aeronautic establishment at Chalais; M. GASTON TISSANDIER, editor of *La Nature*, Chevalier of the Legion of Honor; Secretary—Captain BRALET, of the General Staff.

COMMODORE BANCROFT GHERARDI will not relieve Commodore Chandler, in command of the New York Navy-yard until October 15 next. Commodore Chandler will sail in the steamer of October 30 from San Francisco to relieve Admiral Davis, in command of the Asiatic Station.

THE Japanese Commission of military and naval officers, which has been inspecting the ordnance resources of the Atlantic coast, sails for Liverpool Saturday of this week by the *Aurania*. Since the Commission commenced its tour of investigation on the 16th of August, under the charge of Lieutenant Seaton Schroeder, of the Intelligence Bureau, detailed for the purpose by the Navy Department, it has visited the following places and objects of interest: The Naval Academy and Ordnance Proving Grounds at Annapolis; Du Pont Powder Works, Wilmington, Del.; shipyards of John Roach and Sons and William Cramp's Sons at Chester and Philadelphia, Penn., respectively; Torpedo Station and Training School at Newport, R. I.; South Boston Iron Works; Watertown Arsenal and Springfield Armory, Mass.; the works of the Pratt and Whitney Co. and the Colt Arms Co., at Hartford, Conn.; and Brooklyn Navy-yard, Governor's Island, Willet's Point, College Point and Sandy Hook, New York Harbor. At Willet's Point, on Wednesday, the Commission had an opportunity to study probably the highest development of ground torpedo-defence in the world and witness experimental trials of the Simms-Edison mobile torpedo, and at College Point an interesting exhibition of the Patrick torpedo was given for its benefit. On Thursday, General Count Saigo, with his staff, Capt. Shibayama, Lieutenants Funaki, Saito, Hidaka, Yoshü, Chief Engr. of Artillery Harada and Paymr. Kataoka, made their concluding visit, the objective being Ft. Lafayette and the Ordnance Proving Grounds at Sandy Hook. At Fort Lafayette they were recieved by Lieut. Zalinski and passed more than hour in a very careful inspection of the several models of the dynamite gun; the 8-inch gun, which unfortunately could not be fired owing to alteration in progress, particularly interesting the artillerists of the party. At the Sandy Hook officers' quarters a very handsome reception was tendered the Commission by the members of the Ordnance Advisory Board, Colonel McAllister, Major Mordecai and Captains Shaler and Whipple. The visitors reached the firing grounds fortunately during a firing trial of the new 8-inch. The firing was made for the purpose of determining the superior adaptability of broad or narrow bands to the projectiles. Four shots were fired at the farther target, 3,000 yards distant, and great accuracy secured, the elevation being but 2 3-10 degrees, with the usual charge of 100 lbs., Du Pont's cocoa powder and a projectile of 286 lbs. Experiments thus far indicate the superiority of broad bands for accuracy. The Powlett Pneumatic Gun-carriage and Pneumatic Gun-loader, upon which the 54-ton cast iron rifle, now resting from its endurance trial after its 137th shot, has been mounted, was the object at Sandy Hook which excited the larger and most sustained interest of the Commission As the gun is not to be fired until the question of steel-lining is settled, a firing exhibition was of course impossible. Under the direction of Mr. C. E. Creecy, president of the Pneumatic Gun-Carriage Company, however, the operation of the invention was shown in all its details, the gun being run in and out of battery, elevated and depressed, and the carriage traversed backward and forward. The celerity and ease with which these movements were executed by the will and strength of simply one individual operator very palpably impressed Count Saigo and his chief of artillery, Harada.

The Powlett carriage is the invention of Captain James A. Powlett, who, though a native American, has had a large experience in the English ordnance works. The carriage at Sandy Hook, after exhaustive trial, was accepted by the War Department last January. It was built at the South Boston Iron Works, and is apparently the type, with improvements now being patented, of the future equipment of heavy guns.

THE *Engineer* gives an account of supplementary trials at Spezia to test the projectiles used in the previous trial of shields. The programme consisted of two kinds of test. (1) Krupp 15 cm. projectiles (5.9 in.) should be fired taken from a batch whose excellence had been established in the recent competition at Muggiano. This had been suggested by M. Otto Budde, Krupp's representative. If these projectiles should break up in the same way as those already fired from the 100-ton gun, the natural inference would be that there was no ground for supposing that the large projectiles were inferior in quality; at all events, the fact of their breaking up affords no such ground. The *Engineer* says: "The object of this programme may be said to have been attained, as far as the chief practical bearing of it for Italy is concerned. Clearly all steel hitherto known must be expected to fly in pieces against chilled iron, whether the projectile be large or small. The St. Chamond projectile, however, did not strike in such a way as to admit of a comparison of its effect with that of any of Krupp's projectiles. The comparatively small effect produced by the French shot, when striking exactly on the most injured spot in the shield, speaks well for the resisting powers of the latter, even when much cracked. We have no conclusions to add to those expressed on the April experiments. We would only emphasize what we then said on the desirability of firing at Grüson's armor in this country."

FRANK R. SHERWIN, in a letter from Chihuahua to the New York *Tribune*, says: "I have resided in this city for nearly a year past and have been in communication with Americans doing business in all parts of this State, and I have yet to learn of any American citizen suffering any hardship whatever in Mexican courts or at the hands of Mexican citizens; and I assert positively that the lives and property of American citizens residing in this State are quite as safe as in Texas, New Mexico, and Colorado. As to the degree of order maintained by municipal governments, the towns in this State will compare favorably with towns of the same size in any of our Western States. I have never been among a more kindly, hospitable people; they are emphatically good neighbors, entitled to our respect and sympathetic friendship, and it is to be hoped that they will believe that the real sentiment of the people of the United States towards the Mexican Government and people was voiced by General Grant. Nevertheless the hostile and slanderous utterances now reaching them from so many sources in the United States will rankle deeply in the hearts of this proud and sensitive people, and will tend to retard the growth of commercial relations between the two countries to the great detriment of both."

CAPTAIN SICARD, Chief of the Bureau of Ordnance, is spending a month's vacation in western New York, and Chief Clerk Thad. K. Sailor is in charge of the bureau in his absence. The bureau has prepared the advertisements inviting American torpedo inventors to come forward with their inventions, and they will be issued the early part of next week. The board to conduct the experiments will then receive their instructions from Captain Sicard. No further steps will be taken toward converting the Washington Navy-yard into a gun foundry until Secretary Whitney and Captain Sicard have both returned. A defect having been found in one of the unfinished 6-in. guns at the Navy-yard, one of the New York papers has seen fit to abuse the Ordnance Bureau for it, but in its attempt to create a sensation has ignominiously failed. All during the construction of the guns they are carefully examined for defects, and there is nothing startling in the discovery of one. This gun had not been examined and pronounced perfect. It was upon its examination that the defect was discovered. It involves no loss to the Government, as the manufacturers of the steel are responsible for it. Moreover, the defect does not involve the rejection of the whole gun.

THE Portland *Oregonian* thus moralizes: "The fact that the great and wealthy city of New York 'passes the hat' to build her Grant monument is significant of a state of public sentiment that means Venice; means a great nation, sure to get rich; sure to be at peace and yet sure to become corrupt and finally go the devil through the loss of manly, patriotic pride and gallant citizenship. In the ordinary affairs of life one acute Yankee pedler mind is worth more for service to his time than forty poetic souls, but when the storms and strifes of politics split States, and we are where steel and not gold will get us honorably and honestly out, and the word is war, then it is that the sentiment side of human nature that poets and thinkers feed steps to the front and leads where the pure pedler nature dare not clear the way."

IT has leaked out, says the San Francisco *Examiner*, that during the recent Grand Encampment Dr. J. C. Tucker, of Oakland, was expelled from the Grand Army of the Republic on the ground that he never was a soldier. At the Grand Encampment in Portland, Me., last year he was elected Surgeon-General. This started somebody to searching his military record, when it was discovered that Dr. Tucker had none. Becoming aware of this discovery, Dr. Tucker, a few weeks before the recent Grand Encampment, sent in his resignation as Surgeon-General and also as a member of the Grand Army of the Republic. It was decided that as he had never been entitled to membership in the Grand Army his resignation could not be accepted. He was accordingly expelled.

THE London *Army and Navy Gazette* says: "The United States Congress has appropriated the sum of $350,000 for the construction of a dynamite gunboat. The company, of which Lieutenant Zalinski, of the U. S. Artillery, is the inventive genius, have received the order for its construction; but the money will only be paid to it should certain defined results be accomplished. Meanwhile, Lieutenant Zalinski continues to make good practice with his pneumatic dynamite gun, and should the development of his ideas in this direction attain anything like the success he claims they will, we may see ere long another factor introduced into the consideration of naval tactics which, rivalling the torpedo and the ram, may revolutionize gun warfare altogether."

A NOTABLE gathering was that which took place in the Baltimore and Potomac station, Washington, D. C., three years ago this month, on Friday, the 23d of September, 1883. While the train waited for the embarkation of the well-remembered funeral party accompanying the remains of President Garfield to Cleveland, and just before the coffin containing his remains was placed in the car destined to receive it, there stood, as closely arranged as the situation permitted, three Presidents of the United States, Grant, Hayes, and Arthur, while in their midst lay the body of a fourth, Garfield. Four Presidents in a group!

SUPERINTENDENT KIMBALL, of the Life-Saving Bureau, has received a letter from Admiral Ward, of the British Navy, and for many years connected with the Royal National Lifeboat Institution of Great Britain, in which he says that the American service shows by far the most complete record of life-saving work. Information has also been received showing that the Spanish Government has adopted the gun invented by Captain David A. Lyle, Ordnance Corps, U. S. A., and used in the service of this country, for throwing lines over wrecked vessels.

IRVING M. SCOTT, President of the Union Iron Works at San Francisco, has been at the East for some weeks past. M. Scott is much interested in the reconstruction of the Navy, representing, as he does, one of the distinctive industries of the Pa-

cific Coast. There is in fact no better equipped establishment in plant, locality and general resource for shipbuilding at the East than his, and his views are exceptionably broad and progressive. It will be remembered that his letter to Secretary Whitney, regarding the purchase of the *Nantwah Kan*, was marked by a unique independence of expression, presuming so far even as to suggest the possibility of improvements being made in several details of Armstrong and Co.'s design and production. Mr. Scott is understood to be a lineal descendant of the celebrated Col. Scott, at sight of whose rifle barrel the coon came down from the tree without debate.

THE following is the complete recruiting detail for the two years beginning Oct. 1, 1886: *Cavalry*—1st, Capt. James Jackson; 3d, Lieut. G. K. Hunter, 219 West 4th street, Cincinnati, O.; 5th, Lieut. H. W. Wheeler, 56 West street, New York; 7th, Lieut. H. L. Scott; 9th, Capt. J. S. Loud. *Infantry*—1st, Lieut. J. J. O'Connell; 3d, Capt. Chas. Hobart; 5th, Lieut. Geo. P. Borden; 7th, Lieut. F. M. H. Kendrick; 9th, Lieut. James Reagan; 11th, Capt. George L. Lott, David's Island, N. Y.; 13th, Lieut. S. S. Mumford; 15th, Lieut. Geo. H. Kinzie; 17th, Capt. F. D. Garretty; 19th, Lieut. Chas. A. Vernou; 21st, Capt. Evan Miles; 23d, Lieut. Charles H. Heyl; 25th, Capt. Chas. F. Robe.

CADET ARTHUR JOHNSON, one of this year's West Point graduates, who was tried by Court-martial for striking another cadet and sentenced to be confined to the limits of the post until August 28, has been commissioned a 2d Lieutenant in the 11th Infantry, vice Irvine, promoted, his commission dating from August 28. It was on the same date last year that Cadet Lorenzo J. Davidson, now 2d Lieutenant of the 7th Cavalry, who was also under sentence at time of graduation, received his commission.

COLONEL KOMAROF, editor of the St. Petersburg *Sviet*, has published in that journal a statement that a Prussian spy has been arrested at Smolensk. Col. Komarof adds that he is convinced that German officers are at this moment studying the line of Napoleon's march to Moscow. Perhaps it may be equally profitable to consider the line of his march back.

THE officers of our naval vessels in Canadian waters are doing good service by furnishing reliable information from that scene of disturbance, and correcting some of the erroneous reports concerning the action of the Canadian authorities.

ADVERTISEMENTS for five new vessels of war will be issued on September 4. Printed specifications are now ready for bidders, and bids are to be submitted within sixty days.

GEN. HAZEN ON GEN. HANCOCK.

THE San Antonio *Express* in reply to Gen. Hazen's denial that he libelled Gen. Hancock in his pamphlet, quotes the following from p. 76, the one referred to by Gen. Hazen:

In his attempt to justify his conduct, the officer was permitted to offer upon the stand stale camp gossip and tattle of the war referring to me, which had no foundation in fact, nor did anyone pretend it had. It was offered merely as his reasons for repeating the tales, that the court might excuse him, but it was printed in the newspapers, which were regulated by his counsel, and went to the world as facts. The counsel of the officer was a confidential friend of the president of the court, and conducted his campaign afterwards, when he became a presidential candidate. He had special facilities for guiding the city press of New York, where he lived and was well-known, and where the trial was held, and he placed the correspondent of the New York *Times* at his table in court, who made up each day, under his direction, an account of the trial and published it, that was in many respects untrue and in every way unfair to me, and that paper has kept up and been foremost in these assaults on me since. And while for a week the officer was permitted to offer, and his counsel to print this tattle in justification, my perfect contradiction of it only required a few hours, which, while satisfactory to the court, had little effect in correcting the public. The newspapers that tried me then have been trying me ever since, and whenever they have had the least opportunity to do anything unfriendly, these papers have done it. It is my wish that this trial should put an end to these assaults, but the court would not permit me to prove malice, and the reviewing officer said to me, we cannot afford to lose ——— out of the Army, and this seemed to be the keynote to the court's action. Law, equity and discipline were disregarded, which has encouraged these attacks.

THE ESMOND AND McGUIRL CASES.

IN its decision of June 16, 1886, the General Term of the Supreme Court of the District of Columbia reversed the order of the inferior court, discharging from the custody of the U. S. military authorities Frank A. Esmond and James McGuirl, late privates, Battery E, 3d Artillery, who were tried by court-martial at Washington Barracks for larceny, convicted and sentenced to the Albany Penitentiary. The prisoners had been previously tried and acquitted on the same charge before the civil authorities of the District, and the decision of the Supreme Court settles the point that the judgment of a court-martial is conclusive upon all matters over which it has power to adjudicate, and that the civil courts have no jurisdiction through a writ of habeas corpus to consider any question, but the jurisdiction of the court-martial and the validity of the sentences. Mr. Justice James, in delivering the opinion of the court, said: "It is clear, on principle, that these tribunals (courts-martial) have power to adjudicate conclusively whatsoever they have power to adjudicate at all. This general principle, applicable to all courts of final jurisdiction, has been applied by the Supreme Court of the United States to the judgments of courts-martial." The prisoners will therefore have to be sent back to the Albany Penitentiary to serve out their respective sentences.

OUR SOLDIERS IN THE NORTHWEST.

"HARPER'S WEEKLY" for September 4th has a second article on Our Soldiers in the Northwest, with two illustrations, by Frederic Remington; one a full-page frontispiece, representing a cavalryman abandoning his worn out horse on the trail, carrying off the saddle-bags on his shoulders; the other represents the order "saddle up," which is thus described: "When Gen. Miles's cavalry in the long campaign against the Apaches in the Southwest has chased the Indians to their own ground, the pitching of the camp is a very simple performance. Whenever a resting place for the night is selected, the soldiers dismount and unsaddle their horses. This done, they are in camp. There is little labor, and no ceremony. A roaring camp fire is a luxury they cannot now enjoy. They rest ready at any moment to be aroused. As soon as the first clear light of the morning comes and the horses are brought up from the grazing ground of the night, instead of the trumpet of the usual cavalry camp the simple order is heard, 'Catch your horses.' When they are picketed, the troopers eat their breakfast, fill their canteens, and supply their saddle-bags with rations from the pack, for they do not know what may happen before they make another halt. Anything is to be looked for except a fair fight, and when a day's march in the mountains is begun with a warm trail of a band of Apaches, the long safe marches on the plain seem as great a holiday as life in barracks seemed when they were on the plain. The packers load the mules with the scant *impedimenta* of the little Army, and readiness to begin the march is announced in the non-military phrase, 'All right, sarge.' The command to 'saddle up' is given in a more soldierly fashion, and every rough cavalryman spreads the blanket on his horse as tenderly as a mother covers a sleeping baby, for besides affection for the animal the soldier has another reason for tenderness—the fear of punishment and the loss of the respect of his comrades. And then the march begins. The scouts lead the way, following the trail with infinite patience and wonderful skill. They read every hoof-print and the position of every twig by the way with an accuracy that an Egyptologist might envy in his sign-reading. Across a valley the horse-tracks show that the enemy made good speed, and their freshness after the wind of the preceding morning tells that they travelled there in the afternoon. So long as the trail is plain the troopers make as good speed as they dare through the burning sand. The water in the canteens can wet but it does not cool their throats, and the tongues of the horses protrude from thirst. There is no consolation in the discovery which the scouts make from the trail, that the horses of the enemy were so weary here that they dragged their feet in the sand, but it gives hope that the trail will soon bring them to water. The scouts find blood-drops in the sand, which mean that the cruel riders urged their horses onward by thrusting knives into their sides; and they find the body of a beast that had lain down and died. When the heat and thirst become so intense as to overcome the horses of the Indians, the horses of the soldiers can hope for no better fate; and it is not uncommon that a cavalryman must, for lack of a horse, take a place in the rear with the packers."

GENERAL NEWTON'S PREDECESSOR.

To the Editor of the Army and Navy Journal:

DEAR SIR: Your valuable journal of Aug. 28, in alluding to the excellent appointment by Mayor Grace of Gen. Newton as Commissioner of Public Works of the City of New York, makes some kindly reference to me as a former commissioner; but succeeding remarks appear by implication to do me an injustice, which I am sure you will be willing to correct. You say that "Mr. Campbell appointed Hubert O. Thompson as his deputy. Through Thompson the department was transformed into a political machine for the benefit of one of the local factions."

Some might infer from this statement that my deputy made a political machine of a great department while I was its head. This is an entire error, as those who know me and who have knowledge of the operations of the department during my term, can well attest. But in the lapse of time important matters, like material improvements in the city, great reduction of expenditures and increased revenues, are forgotten, while the recent scandals of the department are prominently before the public eye.

When I accepted the commissionership in 1876, the deputy, who had been appointed by Gen. Porter, my predecessor, continued to act for one year, when he resigned, having been elected to an important city office. I then appointed Mr. Thompson deputy commissioner. He had been chief clerk of one of the bureaus a year before I entered the department, and had consequently acquired a knowledge of its business, being a young man of considerable business capacity. At that time there was no division in the Democratic party. He filled the office for two years, when he was appointed by the Governor to the important office of County Clerk.

The business of the deputy commissioner, in connection with the chief clerk, is to attend to the routine work of the department, which, of course, is very large, and which the commissioner himself cannot perform without neglecting more important matters. But the idea that a man of any experience should delegate to any subordinate the business of a great department, or the appointments to places of trust therein, is too preposterous and absurd to be entertained by any one who knows me. All appointments in the department, above that of common laborer, were made by myself, and the number of laborers was regulated by my own order, and limited to the necessities of the work.

When Mr. Thompson resigned to take the office of county clerk, I appointed, not a politician, but Mr. Hamlin, who had been an engineer in the department for several years, and of whose integrity I had a high opinion. I specially instructed him that I wished him to take no part in politics, but to attend to the business of the city.

Thus, during my term of five years as commissioner, I had three deputies, Mr. Thompson only occupying the office for two years. Though taking no part in politics, he only became a prominent leader while serving as county clerk, and afterwards as Commissioner of Public Works.

The citizens of New York were, I believe, well satisfied with the result of my administration. During my term of five years the expenditures of the department were reduced $20,000,000, or an average of $4,000,000 a year, as compared with the previous five years, while, at the same time, a large amount of useful and necessary work was accomplished.

For the extravagant and wasteful system of day's work, which had indeed made the department a political machine, the contract system was substituted, by which an army of laborers, clerks, inspectors, and engineers were dispensed with, thus largely reducing the patronage (so-called), but greatly benefiting the city. All contracts were considered and acted on by myself, and supplies of coal and other articles were purchased at the lowest market rates, of well known firms and dealers. The water supply was greatly improved by the construction of the great reservoir in Putnam County, by the high service works at 98th st., and the placing of large water mains in many avenues of the city. By extensive repairs in strengthening the Croton Aqueduct, which had sunken and cracked in several places, and by methods for preventing waste of water. The sewerage of the city was much improved, and the street pavements, which had become greatly dilapidated, were renewed with better stone, laid under new specifications. The public buildings were also put in good order. Politics were not allowed to interfere with the public interest, and the business of the Department was conducted on business principles. No doubt Gen. Newton will administer its affairs on the same principles, but I think you will concede that, while paying just tribute to the merits of that distinguished engineer and soldier, injustice should not be done to one of his predecessors who did his duty faithfully, making important improvements and saving some millions to the taxpayers.

May I ask you to publish this letter in the JOURNAL and oblige, Yours respectfully,

ALLAN CAMPBELL.

DEAL BEACH, N. J., Aug. 31, 1886.

PARALYZING AMBITION.

To the Editor of the Army and Navy Journal:

I WAS deeply interested in your letter published in JOURNAL of Aug. 21, on the subject of sharpshooting at Fort Missoula. We haven't as good a range here probably, as they have, though it is fair, and some posts that have no better have developed a large number of sharpshooters to the company in this department; so Fort Missoula doesn't possess *all* the talent in the way of accomplished markers. Here, we don't stand any show; some of the boys wanted to help the company records by fine marking, but a couple of lieutenants came poking their noses into things and couldn't find enough bull's-eyes and centres to match, and so threw off on the whole thing. It's just such interference as this that paralyzes ambition! We have as good markers as anybody if we only had a square show!

RICOCHET.

WYOMING, Aug. 27, 1886.

NEW TACTICS WANTED.

To the Editor of the Army and Navy Journal:

THERE is one very marked deficiency in "the Service," and from the slight cost necessary to remedy it, makes it still more odd that it is not remedied; in fact, I do not doubt but the party who starts at it to fill the vacancy will put money in his purse.

The deficiency is a new tactics, or rather a digest of all the orders and changes which have come to pass under one cover. Even the revised edition of 1883 is behind time from cadence and length of step on. I judge such a revised tactics, or digested tactics, would have a good sale among militia organizations, especially, if carefully prepared, it receives "official" sanction. In fact, the present tactics differ so materially from the books furnished, that tradition, a sort of *lex non scriptum*, seems a safer guide to

"A LANCE JACK."

BROOKLYN NAVY-YARD, Aug. 26, 1886.

THE GRAYDON DYNAMITE GUN.

THE following report of the experiments made by Lieut. J. W. Graydon with firing shells charged with dynamite has been made by the board of officers detailed from the Presidio:

PRESIDIO, S. F., CAL., Aug. 13, 1886.

Assistant Adjutant-General, Headquarters, Department of California:

SIR: We, the undersigned board of officers, convened by paragraph 2, Special Orders 67, Headquarters Department of California, dated Aug. 7, 1886, have the honor to report that we have witnessed the result of 52 shells filled with dynamite fired from the service 4½-inch siege gun, and that they were all fired with perfect safety to gun. Every shell that struck the cliff or bank, fired, with the exception of two—the result of which was lost on account of fog—exploded by concussion, no fuse being required for the explosion. In short, it is the opinion of this board that Lieut. J. W. Graydon has solved the problem of firing dynamite with perfect safety to the gun, and at the same time making explosion come upon impact of the projectile. For pending the completion of the full and extended experiments this board unanimously recommend further experiments to be continued with the 8-inch rifle (converted) and with the 5-inch smooth bore.

J. W. DILLENBACK, captain, 1st Art., president,
HENRY L. HARRIS, 1st Lieutenant, artillery.
A. SLAKER, 2d Lieutenant, artillery, recorder.

THE following in regard to General J. C. Duane, of the Engineer Corps, U. S. A., speaks for itself:

To the Editor of the New York Times:

In your issue of to-day, in commenting on Gen. Newton's possible successor as Chief of Engineers, you say: "Of these it is stated that Cols. Stewart, Blunt, Duane, and Casey have no record of service in the field with troops." This statement does Gen. Duane, at least, a grave injustice, which I hope you will correct. The fact is that Gen. Duane was among the first to enter the field at the outbreak of the Rebellion. He assisted in organizing the Army of the Potomac, and was its Chief Engineer throughout the entire war. He took a prominent part in the campaigns of this most prominent of our Northern Armies, and was frequently brevetted for "gallant and meritorious conduct" in the field. In addition to the above he is the only officer, as far as I can learn, who received a brevet for "highly distinguished professional services." Thus it will be seen that, far from having "no record of services in the field," Gen. Duane's war record has been an exceptionally brilliant and honorable one.

JAMES DUANE.

NEW YORK, Aug. 26, 1886.

(Correspondence of the Army and Navy Journal.)

DEPARTMENT OF PLATTE RIFLE RANGE.

PRESENTATION OF MEDALS.

EARLY Saturday morning, the range was gayly decorated, streamers flying, danger flags up, and the three classes of targets in position; the A, B and skirmish targets producing a charming effect. At 9 A. M., Gen. Wheaton, staff and band arrived. 10 A. M., a number of visitors had reached the beautiful grounds. The assembly sounded and the band struck up the march, when the team, under Lieut. Conline, formed in one line, and the competitors, under Lieut. Burns, another in rear. The line was then brought to attention, after the band had passed in review. Then Lieut. Cochran read the orders; the line was turned over to Col. Henry, who turned it over to Gen. Wheaton, who made the following remarks:

In the temporary absence of the Department Commander, the agreeable duty has devolved on me to congratulate you as the victorious contestants in the severe and interesting struggle that has just closed, inaugurating this beautiful new Rifle Range of the Department of the Platte.

It is an ancient, and it is an honored custom, to crown returning heroes who have won prizes in feats of arms on hard fought fields; and though the severe contest you have just won has been bloodless, you are none the less entitled to, and will receive, great credit for the handsome scores you have made on the new Department Range, and for your successful efforts to greatly advance all previous Department figures of merit, and to thus win the commendation of your commanders by your earnest devotion to this important branch, perhaps the most important branch of a soldier's education. The first rifle range competition in the Department of the Platte was in 1881. Then existing War Department orders did not require computations for figures of merit. None were called for in the following years of '82 and '83. In '84 the official reports show the figure of merit of the Department of the Platte to have reached 55.85; in '85 it reached 60.05; and though the requisite data for computing the figure of merit for the year '86 will not be available until after the 31st of October, there is reason to believe that this year the Department figure of merit will not be far from 90, an evidence of marked and gratifying progress, in all which, you, the victors of '86, may point with pride to your proud pre-eminence, representing, as you do, the best efforts of your Department in rifle firing during the present year.

Your comrades at their several points and stations have taken the deepest interest in your success, and all here wish you a pleasant journey to your respective stations with a hearty desire to see you return at some future contest able and eager to achieve still more brilliant victories on the Bellevue Range, and add to the laurels you have already won. I now have the pleasure of presenting the beautiful medals sent you by the War Department as valued souvenirs of your powers in this memorable contest.

After the conclusion of Gen. Wheaton's remarks Col. Henry said:

To the Department Team: I thank you for your patience and hard work, and for your success in obtaining a higher total than last year and probably higher than other Department teams. While at Ft. Leavenworth contending for places on the Division team, be careful in everything, as you have been here, and success will be yours—to which you will be entitled by your skill and soldier-like habits.

To the other Competitors: While you have not gained a place on the team, you have all helped by your skill and industry to give a high total to your scores—that of this year being near 1,000 points ahead of last year. You have all been faithful and soldier-like in the performance of your duties. Deprived of the usual commutation of $1.50 a day, you have met it cheerfully, as a soldier should. Returning to your posts carry back with you to your comrades any knowledge you have gained here.

To other Enlisted Men: Those of you who have borne the heat and burden of the day, by your labor of weeks, most industriously and patiently applied, your reward is in the praise of those who admire your beautiful range.

To the Officers: Who have for weeks worked in completing the range, and to those who have been range officers, carefully carrying out all orders in a most conscientious and soldier-like manner, a sense of duty well performed must be your reward. As Inspector of Rifle Practice, I again thank you all, and wish you all Godspeed,

Gen. Wheaton then presented the medals to Lieut. Torrey, 6th Inf., Mrs. Gen. Crook pinning them upon his breast. This was all the Government gave to the fourteen men. Three of them were officers. To the eleven enlisted men Colonel Henry gave each a $5 bill, which $55 had been generously given by S. P. Morse and other gentlemen of Omaha. The band then struck up and the command dismissed, thus ending the beautiful ceremonies.

THE BORDER POPULATION

(Described by a Man having Large Business Interests in the Southwest.)

THE great difficulty in the Cutting matter is that the Secretary of State and the people of the United States generally have not the remotest conception of the true state of affairs along the border. Even the people of eastern Texas have a very incorrect idea of the condition of things in Western Texas. All the western part of Texas, New Mexico and Arizona, and all the northern part of Mexico, are a dry country. It is what is called the "arid region." The rainfall is not more than one-fourth what it is in Washington. In all that region it is impossible to raise any of the ordinary agricultural products of the country without irrigation, and the possibilities of that are limited. But nature abhors both a vacuum and a desert. So she has planted in the arid region a variety of highly nutritious grasses. There, too, are found shrubs and small trees bearing nutritious leaves, and hence a vast and exceedingly valuable pastoral region, upon which are fed millions of horses, cattle and sheep. So you see that this border country between Mexico and the United States is what we sometimes call "Cow-boy country." The whole range cattle business had its origin in Mexico. The current phrases and the manners and methods of the business have been copied all over the United States where live stock is raised on the range. But the fact is the man with the spurs and the lariat gives character to this entire area, for, as I said, the herding business is the basis of all trade and the original source of all the comforts of life. Everything in business depends upon it. Everybody is more or less a cow-boy—the lawyer, the doctor, the shoemaker, the tailor, the merchant, and even the editor. Cutting is a sort of cow-boy newspaper man. Many of the real cattle men are as fine, generous and kind-hearted men as you ever saw, but there is also on both sides of the river a large number of rough men—regular desperadoes.

Cattle stealing, Indian fights, and fights among themselves appear to constitute the principal charm of life with them. So, take the entire border country, and you have a population which is not at all characteristic of the people of the United States nor of Mexico. A Chihuahua cow-boy is as peculiar a citizen of Mexico as a Texas cow-boy is of the United States. When we in the United States regard all Mexicans on a level with the people along the border, we are as much mistaken as the cultivated people of the City of Mexico would be in assuming, as I presume some of them do, that the people of Boston and New York and Washington are on the same level, morally and socially, with the cow-boys of Texas. Now, wouldn't it be outrageous for two adjoining countries to become embroiled in war on account of the antics of this wild border population? Of course, we must maintain the dignity of our Government and protect American citizens abroad, but I think the best way to regulate the border is for Mexico to punish our rascals when she catches them in her territory, and for us to punish her rascals when we catch them in the United States. I think that would be a good sort of reciprocity, and I'd be in favor of putting it in a treaty.

(Special Correspondence Kansas City Times.)

THE McBLAIN CASE.

CHEYENNE, W. T., Aug. 20.

THE trial of 2d Lieut. John F. McBlain, 9th Cav., is concluded. What the result is cannot be known until the orders in the case are promulgated by Gen. Crook, which will not be until his return from the new post in Utah. From the commencement of the trial and for some time prior thereto, the public sentiment at Cheyenne was decidedly against Lieut. McBlain. This feeling continued until the cross examination of Mrs. McBlain developed thereto unknown features to the case, when the public sentiment began changing, and before the defence began the feeling that had been so strong against him changed completely.

The cross examination developed the facts that when McBlain went to California in 1878 it was for the purpose of residence and of making a home, and his wife understood that so soon as he got employment he would send for her; that from 1875 until 1882 her entire correspondence with McBlain was conducted by her father, he writing the letters and signing her name thereto; that at the time she said she was obliged to ask the assistance of his superior officers to compel him to contribute to her support she had a small bank account, besides being well dressed and board paid; that it is not a fact that he failed to properly support her, as the drafts put in evidence completely negatived that assertion; that she did not try to ruin his reputation as an officer by writing to his superior officers, accusing him of being a bribe taker. She said she knew it was a bribe she took and used the money for two years, but knew nothing of the circumstances of his getting it. She testified that she never knew a man by the name of John Ewing and that no such man ever lived in her neighborhood. It was proven that she not only knew him, but was intimate with him. She also swears that she did not know John M. Wheeler, who testified to having delivered to her a copy of the summons (a petition in the divorce case). She swears she did not receive certain moneys which the indorsed drafts show she did receive, and she swears she did not get a notice of the summons, etc. These matters prove conclusively that her testimony is not entitled to any credence. John Rafferty also swore that she did not get the money represented by the drafts which he himself acknowledged indorsing and which she says she indorsed. Wm. D. Kelly, Jr., was subpœnaed ostensibly as a witness, but in reality as advisory counsel against McBlain. When he had himself named as a witness he knew that all he knew of the case was by hearsay and that he could not be a witness.

The attempt to make it appear that affection for another young lady was the actuating cause of his getting a divorce proved a lamentable failure and reflects no credit upon the persons involved in the attempt.

The court went outside of the matters covered by the charges and considered all things connected with the divorce which had already been passed upon by the California courts, and it was the duty of the Court-martial to confine itself to a consideration of evidence bearing on the allegations of the specification which were that he falsely represented himself as a resident of California; that he failed in having a copy of the summons sent his wife, that he concealed certain facts from the court. The residence question was the only one which the prosecution presented any testimony on, and that was in support of McBlain's position. Mrs. McBlain said she did not get a copy of the summons, but in the light of her contradictory and false testimony on other points the inference is strong that she did get it. The only testimony on the question of concealment is McBlain's and it is strong that he concealed nothing that had any bearing on the case. He wanted to produce Judge Lawler, the best witness on that point, but the court refused to subpœnae him. The evidence is overwhelmingly in McBlain's favor; so much so that the Cheyenne *Sun* said editorially that it showed "he was more sinned against than sinning." It is such a difficult matter to forecast the verdict of a Court-martial that we refrain from conjecture. A. E. W.

A NEW BOAT FOR SPORTSMEN.

A FORT HAMILTON correspondent of the Baltimore *Sun* writes: Among the curiosities of vessel-craft under construction here is a newly invented fishing, duck and bird shooting boat now being built by Capt. S. A. Day, 5th U. S. Artillery, the well-known marksman, gun and ammunition expert. The boat is built of such form and material as to be packed for shipment in a box not larger than an ordinary trunk, the box itself being part of the boat. When unpacked and launched it has cabin and sleeping accommodations for from four to six persons, with room for provisions for several weeks' excursion, with oars, sails and everything necessary for a hunting-boat's outfit. The hull of the boat is made of canvas, rendered both fire and water-proof. Its shape is something like the Brazilian "catamaran," or two small boats built together. It is expected to sail rapidly, and yet draw but a few inches of water, and can be navigated in a swamp almost as readily as in the open sea. When it is necessary to cross land two persons can easily carry the boat, if no mule is in convenient range. The boat is altogether a curiosity, and much interest has been manifested in it by members of the hunting clubs. A boat somewhat like this was used successfully by the inventor a year ago on the coast and in the swamps of Florida, but the present model is regarded as a great improvement on the first one. It will soon be ready for trial.

(Extract from a Letter to the Vallejo Chronicle.)

THE U. S. S. HARTFORD.

LETTER FROM DO-DO—A GREAT RACE.

WE came here from Payta immediately after the news to coal and provision up for the long passage. After leaving here, before reaching 'Frisco, we will make but one stoppage and that at Pichilnque for coal. The passage will be a very long one taking probably 50 days, and a very trying one, as the heat on the Mexican coast is oppressive. But we will brave all this like little men for one more fling in civilization. The desire to reach 'Frisco is very strong both fore and aft and when we once reach there we will make a stay of it. Everything is out of order, from the Captain's wash bowl to the sheet anchor. So we will give employment to all the Departments at the yard. Our repairs are of such a character that we will be obliged to be docked and receive a thorough overhauling, probably taking three or four months. The *Shenandoah* may go with us. From reports she is in a bad condition. She needs a new crew as the time of the crew on board expires soon. She may go out of commission. On our arrival here we found that the *Shenandoah* and *Iroquois* had preceded us.

On the 5th of July—in honor of the 4th—to liven matters up a little the boys on board got up a regatta; all the boats belonging to the men-of-war in the harbor were invited and entered. There were prizes for all classes of boats, but the *Hartford* won everything and took the cake as usual. While at Payta we traded our staff boat for the *Adams's* gig (formerly the *Lackawanna's.*) The *Iroquois* possesses a gig that they claimed was never beaten; they challenged our boat and was taken up. A crew was quickly gotten and the stake money raised, $340. We were perfectly aware that the *Iroquois* had the best boat, but our crew was a crack one and the boys on board backed them with confidence. The *Shenandoah* sided with the *Iroquois* and helped them as far as money was concerned. The *Iroquois* was in great favor on shore and many a Dago remembers her to his sorrow. The race was four miles straight away and was set for Monday, July 12. Before that date fully $5,000 (gold) was up between the two ships. The day of the race finally arrived and a better one could hardly have been wished for, there being not a breath of air and not a ripple on the water. The boats were towed to their position four miles astern—the race to finish at our stern. Our boat had the position close to the shore while the other was toward the sea. The order to start was given and both took to the water at once, the *Iroquois* started off with 33 and our boat 28 strokes to the minute. Both boats kept well together the first mile, then our boat began steadily to gain time and at the 2d mile was two lengths ahead. The *Iroquois* stroke was very unsteady, varying from 32 to 35 per minute. Our boat kept the same stroke, crossing the line a winner in the excellent time of 35 minutes and 8 seconds, beating the *Iroquois* 49 seconds. So ended what is said to be the best race that was ever pulled on this coast. There was supposed to be more money staked on the result than was ever on a single backed boat. The race was a great surprise to many, but to us it was only what we expected. Thousands of dollars changed hands on the result. Our crew did good work and deserve great praise. As they are known in Vallejo, we will add their names: Hugh Sweeney, Coxswain; J. K. Johansen, stroke; J. H. Hemberg, 2d stroke; J. H. Eckstrom, 3d stroke; A. G. Hansom, 3d bow; Thomas H. Allen, 2d bow; William Bullock, bow. The *Independence* held these men before they joined this ship and they must take a pointer in time; if they want to win fame and money they had better make a rustle. I may add in conclusion that the boys feel rather sore over the beat they received at the hands of the Vallejo boys in the "Black Boat" and are anxious to try conclusions again.

U. S. S. HARTFORD, 2D RATE.
AT ANCHOR OFF CALLAO, PERU, July 14, 1886.

OIL CALMS THE SEA.

CAPTAIN MURRELL, of the English steamer *Surrey*, reports to the U. S. Hydrographic Office that while on a voyage from Baltimore to London in March last, he experienced heavy gales, attended with a high and confused sea, sweeping the decks and causing considerable damage. He filled the pans of the water closets aft with oakum and waste, and then poured in machine oil until the waste was fully saturated, allowing the oil to drip gradually over the side. The effect was remarkable, as no more seas came aboard. At 12 o'clock at night the oil in the waste became exhausted, and almost immediately afterward a heavy sea swept the deck, washing the man from the wheel, and doing other damage. The supply of oil was replenished and no further difficulty was experienced, the ship running easily for eighteen hours, and shipping no more water on deck. The *Surrey* was loaded with cattle, and Capt. Murrell attributed the preservation of the animals entirely to the use of oil.

ANSWERS TO CORRESPONDENTS.

J. C.—September 3, 1889, is the proper date. The date given in JOURNAL of June 13 was corrected in the number of June 27, 1885, and the list subsequently published in pamphlet form.

Clericus.—It has been decided that as general service clerks and messengers do not belong to any of the grades specified in Section 4819 R. S., they are not subject to the deduction of 12½ cents per month from their pay directed by that law.

J. C. B. asks if a soldier's term of enlistment expires while on a campaign in a hostile country, could the military authorities refuse to give him his discharge and hold him as a soldier until hostilities should cease? ANS.—Under present conditions the enlistment is a specific contract for a specific period, and when that period fully expires the contract, of course, terminates.

Clinton asks: What is the reason that in the different firings, the *rear* rank always fires first? ANS.—The

custom is said to have originated at the time when the formation in line was made up of three ranks, when the front rank fired kneeling, the second rank standing, and the rear rank was employed exclusively in loading the pieces of the men in front. We have sent you a Naval register.

A. P. asks: Can a soldier who serves five years and is discharged at a frontier post be re-enlisted there for the Marine Corps upon application to the Adjutant-General? ANS.—Such an enlistment might be made under the approval of the proper authorities, but it is not customary. The best way would be to first get discharged from the Army and then report for enlistment at a Marine Corps recruiting rendezvous.

Constant Reader asks: Where can I obtain programmes of Louisville, Houston, Mobile, Savannah and Galveston prize drills and scores made by companies? What is the best method of judging a prize drill? ANS.—For programmes and scores write to the committees of the different places you refer to. The requirements for judging a prize drill are to know tactics perfectly and keep a sharp lookout on every motion so that no error escapes you.

W. H. S. asks: When the garrison flag is taken down at retreat by a corporal without arms and two members of the guard with arms on return of the party with the flag, what respect should the sentinel and No. 1 post pay to the party? ANS.—Proper respect to the flag is but seldom observed. Properly, while the flag is hoisted at reveille and lowered at retreat, the guard should be drawn up at present arms. When the flag has been rolled up and the corporal with his escort passes No. 1 in carrying it back to the guard-house, the latter, if he wants to pay any respects, can do nothing but stand at carry arms because the time for saluting has passed.

W. S. H.—There can be no question as to the power of a commanding officer, Army or Navy, to order a man to duty in opposition to the recommendation of the doctor. But in so doing he assumes the risk of being held responsible for his action by superior authority. The regulations of the Navy require the C. O. of a vessel to cause a convenient place to be set apart for sick or disabled men, to which he shall have them removed *when the surgeon so advises*. He is also required to "pay the greatest attention to the health of the crew," and the surgeon "to deposit daily in the barrack a list of those whose condition requires that they shall be excused from duty."

Lex asks: 1. What are the latest decisions on the 103d article, and where officially announced? ANS.—In reference to desertion the War Department's decision is to be found on pages 354 and 355 of Winthrop's Mil. Law. Decision as not been published in orders.

2. How does the case of the two enlisted men tried at Washington Barracks, G. C. M. O., Dec. 28, 1885, for theft, etc., after having been tried by civil courts, stand? Has final decision of the Supreme Court been announced? ANS.—The Supreme Court of the District of Columbia overruled Justice Carter, and the sentence stands as promulgated. We give a synopsis of the decision this week, elsewhere.

W. H. E. asks: The recent election of Brigadier General has raised an argument on the following questions: Is an officer on leave of absence or furlough entitled to vote? Is the presiding officer obliged to keep the polls open for one hour because one officer is away on furlough, everybody else having voted in the first five minutes? ANS.—Par. 34 of the Military Code requires the polls to be kept open at least an hour after the time appointed for the election unless all entitled to vote shall leave deposited their ballots. An officer on leave loses none of his rights and is therefore entitled to vote. Our correspondent, whom we expected to know better, is reminded that an officer may be on leave of absence but never "on furlough."

McC. B. takes exception to our answer No 1 to W. W. and No 2 to Tyro, both in the JOURNAL of August 14, saying the former is wrong and the latter against official decisions from the War Department. We regret that we cannot agree with McC. B. Our first answer implied that general guides, and markers when carrying muskets, present with the battalion when after forming it the adjutant turns it over to the commander. General guides and markers at that time are in line of file closers, and form part of the battalion. Par. 381 directs that the adjutant brings the *battalion* to a present and no exceptions are made in favor of either general guides or markers. There is no reason based on military custom or common sense why they should be exempted from a duty in which all members of the battalion, officers and men, who carry weapons with which honors can be rendered participate. What should they do with their pieces while the battalion presents arms to its commander? Of course our answer does not apply to markers who simply carry a flagstaff. Par. 419 moreover permits file closers to take the place of markers. Should these for that reason be exempted from rendering a prescribed salute to their commander? Finally, in all well regulated regiments it is the custom for general guides and markers to present with the battalion on such occasions as referred to herein.

As to the second answer we refer McC. B. to page 23, "Official Memoranda of Decisions on Points of Tactics" (War Department), where he will find that a column of fours, twos, or files may be "marched a short distance to the rear or to a flank," etc., etc., which was all our answer implied. It is well understood by military men of common sense that tactics must be applied according to the demand of the situation, and this view was expressed by General Upton on various occasions. He certainly must have had an object when he embodied the march to rear and by the flank in the school of the soldier. On ordinary occasions we do not advise any deviation from the prescribed routine in the school of the company. McC. B., who is a National Guard officer, may some day find himself in command of a company and in a tight place, where bricks and dynamite are flying, and where no about by fours can be executed. Would he there sacrifice himself and his command to his devotion to par. 222, or would he let discretion take the place of valor, and get out by the less showy but more practical means prescribed in par. 34?

A CHANCE FOR ASTRONOMERS.

PREMIUM of 50 mark for the best answer to the following questions:

I. Why do the astronomers consider the sun as being "*at rest*," while they are knowing and teaching that the sun moves? Laplace says: "The sun moves at least with the velocity of the earth in its orbit."

II. The sun moving and being not fixed, is the Copernican intuition of the world tenable yet now-a-days?

III. Are the astronomers right to assert that astronomy stands or falls with the system of Corpernicus, and that no other system, *even by way of trial*, can or may be established?

The answers to these questions to be addressed to Augustus Tischner, Marschnerstrasse 7, Leipsic, frco., until Mai 1, 1887. The decision about which of the concurrents shall receive the premium, will be committed to the "Astronomical Society," which in September of 1887 will hold its assembly.

The concurrence may be sent in English, German or French, by each one belonging to whatever country.

The pamphlets sent in will become property of the receiver and will not be returned; their publication, total or partial, if it needs, shall be allowed to the receiver.

LEIPSIC, Aug. 1, 1886.

50 Mk. = 62,50 Frcs. = 2½ £ = 12,50 $ = 25 Roebl.

The attention of members of the U. S. Naval Institute is called to the above, which has been sent to that institute for their information.

THE STATE TROOPS.

THE COMPANY DRILL SEASON.

WITH but few exceptions the companies composing the National Guard all through the country are well versed in the school of the company, or, in other words, they wheel well, step well, keep good alignments and distances, and accomplish everything necessary to show off well before an admiring multitude of friends, sisters, cousins, and aunts. As a general rule, when there is an "exhibition" drill a "guard mount" is included, and when the details manage to get on the line in fair shape, when the officer of the day and the drum-major render elegant salutes, when the adjutant and officers of the guard make no vital mistakes, and the platoons in marching past keep fair alignments, wheel into line, and break into fours in tolerable shape, then the command imagines it has accomplished the alpha and omega of military science. Whether officers and men know their practical duties as guards and sentinels, or whether they understand if when on a skirmish line they have to fire to the front or to the rear, does not make any difference. They can wheel like clockwork and salute in good style, and that ends the matter.

Most of the shortcomings in the New York as well as in every other camp, of which we have presented reports, are the direct results of too much attention to show drill and neglect of practical work. We call attention to the remarks on this subject in this week's issue by our Connecticut correspondent, who is an especially competent judge. What he says applies everywhere, and his remark that "no amount of fine guard *mounting* can compensate for execrable duty on post," is one to be taken into consideration by the entire citizen soldiery of the country.

The company drill season in some organizations has commenced, in others it will soon be taken up. Would it not be well now, before going to work, to consider this matter and make programmes of work in accordance with present requirements and abandon old militia customs? Men of intelligence, such as compose the National Guard, can easily be taught how to face, march, and wheel, etc., and if they once know how to do this with a reasonable degree of precision, any further attention paid to the matter is only a waste of time. Company commanders, therefore, should take measures to provide for the instruction of their men in guard, sentry, and skirmish duties. The armory, in teaching the two former branches, especially, affords equal facilities as the field. Commanders of separate companies should take particular notice.

A correspondent in the Cincinnati *Times and Star*, referring to the Ohio National Guard, says with regard to this subject:

Should not something be done to place us at work upon just such portions of the tactics as will be of service in time of active duty? We want to be prepared to move with ease in the best formations, or those "showing practical application in war," whether in the woods or in crowded streets. To do this we must have much practice, so that we cannot forget, no matter what may be our surroundings. The camps of the Ohio brigade this summer have shown nearly all of the time devoted to movements that find "no practical application in war." More than that, if called up the old officers will acknowledge that they found no use for "closed column" during the war. At that time and under the present system but little more can be said. Then officers will attempt little of the simple formations, but will devote hours to learning their regiments "to mass"—to get officers and men perfectly at home in the ployment and deployment, by divisions. What nonsense! Worse than that, what a waste of time!

Like the young doctor before the days of practical or bedside teaching, he must forget with his first patient the theories of the lecture room. So we, in our first experience, will find we have not been trained for service, but for "show."

I am surprised that officers high in rank (and I do not hesitate to include Gen. Axline) places a greater estimate upon the showy parts of the drill rather than such as "find practical application in war." What encouragement have we found in our feeble attempts to learn even a little of the skirmish drill by company? What time have we had for learning all that we should learn of the movements by fours for the company and battalion, the formation of the line and column in every way, and until we could no longer make mistakes? What portion of time have we had for the instruction of all of our officers and men in that most important part of our duty, the duties of guards?

If we tell the truth we must admit that we were required to turn aside from the battalion practice to practice the formation of the line of masses for dress parade, at other times to practice marching in column of companies that the review might be perfect.

The test was made upon the appearance at review. And how many of these we passed through, one after each evening parade, keeping the troops under arms an hour or two longer than the "bill called for," and unfitting them for the work of next day.

Some will say, what is your point? I name it—we should be limited in our practice to such parts of the drill as can be mastered by the poorest regiment in our service. That in an encampment we can cover all of the ground. Who will say our commander-in-chief may not select such portions of the standard tactics for field exercise as he may chose, when it is admitted upon all sides that Upton's company and battalion manœuvres embrace a great deal more than can be used? Why may not Ohio or other States select "a course of drill, and limit practice to these parts?" We must know that in the time allotted us (one week of practice in each year) we can only learn thoroughly the simpler portions of our drill. We fulfil our law if we practice these as required by the tactics. What a step to the front could we have an order now in which our commander-in-chief would say, "Practice in the several organizations of the National Guard will be limited to the following paragraphs of Upton's Infantry tactics." Then follow with the most practical portions of the School of the Soldier, the company and battalion, the skirmish drill and the ceremonies entire.

Without this, or something equal to it, our commanding officers will go on from year to year trying to cover the entire subject, but learning nothing perfectly. Let us have a few simple movements for drill; then, after six months, require that every officer in the service shall know these perfectly. Who will apply the remedy? Each regimental commander may for his own regiment. But why not have an order making the practice uniform? In our practice for the general camp of next year there is not a more important matter before us now. S.

NATIONAL GUARD INSPECTIONS.

If inspections are ordered for the purpose of ascertaining the actual condition of the troops, their preparation for service and general efficiency, then the inspector should be afforded full opportunity to satisfy himself on all the points in question. This cannot be done in a hurry, nor in a crowded room by gaslight. Last year's inspections in the evenings, so far as their affording the inspector an opportunity to form a correct judgment of what he saw is concerned, did not answer the purpose. We do not intend to call them farces, but they were but little better. So far as is known all the New York regiments intend to be inspected in some armory in the evening, the only exception known being the 22d, which will go to Governor's Island for the purpose.

If it is worth while to have inspections at all they should be held in the right manner, that is, in broad daylight, in the open field, and at least an afternoon should be devoted to the purpose, so that not only the condition of the arms, clothing, etc., but also the proficiency of the troops in company, skirmish, and battalion manœuvres can be ascertained. If no information, especially on the last mentioned point, is obtained, an inspection is without purpose and may as well be omitted altogether. It is still time to correct the matter by issuing orders to have the inspections in the field, and for this purpose we call attention to the matter.

CREEDMOOR MATCHES.

THE 9th "Qualification" and "Champion Marksman's Class" matches were shot at Creedmoor on Saturday, Aug. 28. The weather was very hot with a light southerly wind, which, being favorable to the competitors, the scores made were the best on the average made this season. The attendance was very large, nearly all the regiments in the 1st and 2d Brigades being represented. Capt. Fred. L. Holmes, Co. I, 23d Regt., was the winner of the Gold Marksman's Badge in this match and is now the ninth man to compete for it. The following are the best scores made, those marked thus (*) being the winners in this match:

	Co.	Regt.	200	500	Total.
Pvt. J. F. Klein,.	17th	Sep.	21	25	46
Capt. F. L. Holmes*	I	23d	22	24	46
Pvt. G. W. Lotz	G	13th	23	23	46
Gen. C. F. Robbins	Staff.		21	24	45
Sergt. A. D. Becken*	N. C. S.	23d	21	24	45
Col. F. C. McLewee	Staff.		21	24	45
Sergt. F. I. Perry*	I	23d	22	23	45
Capt. W. L. Candee*	B	23d	23	22	45
Pvt. H. D. Hamilton*	I	23d	21	23	44
Pvt. W. G. Owen*	I	7th	21	23	44
Lieut. E. F. Young	C	7th	22	22	44
Pvt. F. S. Kennedy*	F	7th	24	20	44
Capt. W. H. Palmer	Staff	7th	19	24	43
Pvt. J. B. Elmendorf*	G	7th	19	24	43
Pvt. S. C. Pirie	I	23d	20	23	43
Sergt. W. A. Stokes	I	23d	20	23	43
Col. J. B. Frothingham	Staff.		21	22	43
Lieut. N. B. Thurston	E	22d	21	22	43
Corpl. F. P. DeVigne	D	13th	22	21	43
Pvt. R. M. Kalloch	H	7th	20	22	42
Sergt. W. N. Bairer	B	22d	24	18	42

The next match where members of the N. G. can count their scores as qualifying scores, takes place in the Fall Meeting, Sept. 13 to 18, match No. 8, All Comers and Marksman's Badge Match, open every day during the meeting, and where they also will have an opportunity of winning other cash prizes, ranging from $5 to $25. There will also be three matches in October, and one on "Election Day" in November, which will close the season of 1886, and all competitors will be eligible to win prizes.

In a supplementary programme the following extra prizes and additional matches are announced: Messrs. Richard Oliver and Bloomfield, of No. 23 John street, prizes to the value of $50 for members of the National Guard, S. N. Y., using the Remington rifle, State model. Two additional prizes, value $5 each, will be given in matches No. 2, 4, 6, 7, and 17, to be awarded to the competitors making the highest scores, but failing otherwise to be prize winners in the above-mentioned matches.

NATIONAL GUARD ITEMS.

The 22d Regiment, N. Y., have received permission from Major-General Schofield to parade on Governor's Island for inspection on October 7 next. According to present appearances, this will be the only organization to be inspected in day time in the open field this year. It is gratifying to see the regiment stick to solid soldierly work. The board of officers have arranged for a trip up the East River on Thursday Sept. 2, which will include a clambake, to which the officers at Willet's Point have accepted an invitation. In return, the Willet's Pointers have made arrangements to entertain the 22d by a pontoon drill, which will doubtless prove an interesting affair.

The 12th regiment will soon begin their usual round of artillery drill and practice with heavy ordnance at Fort Wadsworth.

The annual clam bake of James C. Rice Post 29, G. A. R., will take place at "Roton Point Grove" Sept. 9, 1886. The steamer *Wm. Fletcher*, leaves foot of West 22d St., at 8.30 and East 23d St., at 9.30 A. M., sharp. There will be bountiful and variegated supply of choice viands and beverages, and it is safe to predict the usual "happy time" and that no one will get left.

In G. O. 15 the Commander-in-Chief of the Connecticut National Guard says: "The number of officers and men of the brigade who have been present during the encampment is large beyond precedent. They have been prompt, cheerful, and faithful in the performance of their duties. They have visibly improved in discipline from day to day. A cordial and kindly feeling among their different organizations towards each other has been especially noticeable. The Commander-in-Chief expresses his great satisfaction with them, and his belief that the National Guard is to-day worthy (as he trusts that it will always continue to be worthy) of the respect, the confidence, and the liberal support of the people of Connecticut."

Adjutant-General Stephen R. Smith, of Connecticut, at the close of the camp on Saturday, Aug. 28, became the recipient of an extremely handsome gold watch. The present was made by the officers of the Guard in appreciation of his high character as a soldier as well as an individual, and in commemoration of the 28th anniversary of his entry into the National Guard. The Governor made the presentation speech.

The 22d Regiment has been without an adjutant ever since the election of Lieut.-Col. W. J. Harding to his present position. Some time ago it was intimated that Lieut. N. B. Thurston would be appointed to fill the position, but since then circumstances have arisen which make it impossible for that able officer to accept the position. A regiment like the 22d should not be without an adjutant, especially when it is considered that there is no lack of material from which to make a good selection. As long as Thurston will not take the place, why not appoint Lieut. W. B. Smith, of Co. B, who has all the qualifications required to fill the office creditably?

Brigadier-General James McLeer has had a slight attack of bronchitis, but is on the way to recovery. The General only a few months ago recovered from a severe illness.

With regard to the recent election of Brigadier General, we publish the following telegram, dated Kingston, Ontario, Aug. 24, 1886, the day before the election:

"*Gen. J. M. Varian:*

I am not a candidate. Do not allow my name used.

DANIEL D. WYLIE."

The new Armory of the Light Horse Squadron of Milwaukee was opened on Monday evening, Aug. 16. A brilliant and large audience was present. Col. Charles King made the presentation speech in his usual felicitous manner.

The selection of Gen. Fitzgerald to command the reorganized brigade, will be entirely satisfactory to every one if the General finds time to give his personal attention to the duties of his position and selects a working and not an ornamental staff. The responsibility upon him is very serious, as under the reorganization the peace of the chief city of the Union, and the security of its million and half of inhabitants and its billions of property, in certain contingencies, entrusted to his keeping. The staff officers under an officer charged with such responsibilites, cannot be selected with too great care. We do not doubt

that General Fitzgerald fully appreciates this, and in any effort he may make to increase the efficiency of his command he can depend upon the support of the ARMY AND NAVY JOURNAL. There is one thing, however, that we are utterly intolerant of and that is the use of military appointments to administer to the vanity or the personal importance of anyone. The man who simply seeks to make himself conspicuous should join a theatre or jump from the Brooklyn Bridge, and not meddle with the serious business of war. This, Gen. Fitzgerald as a soldier of experience, fully understands, and it is only to second his efforts to secure an efficient staff that we say what we do.

Brig.-Gen. Louis Fitzgerald has appointed the following Board of Examination for officers: Lieut.-Col. Geo. Moore Smith, 7th Regt.; Lieut.-Col. Wm. J. Harding, 22d Regt., and Major Edward Duffy, 69th Regt.

(Correspondence of the Army and Navy Journal.)

THE CONNECTICUT CAMP.

THE Connecticut encampment commenced on Monday, the 23d, and terminated on Saturday, the 28th. The proficiency of the troops was illustrated in the usual guard mountings, parades, and drills, in a sham battle or field day on Thursday, and in the grand climax of the Governor's day on Friday. The troops present were the 1st, 2d, 3d, and 4th Regiments, the 5th battalion, 2 companies of Governor's Foot Guards, the battery and the Gatling batteries belonging to the different organizations. No special or marked improvement over last year could be seen by your correspondent, but when it is taken into consideration that all of these organizations are full of new men, and that these new soldiers fully keep up the well-deserved reputation obtained by their predecessors, it may well be said that, while as a *whole* there has been nothing gained over last year, the regiments are deserving of great praise that they keep up their efficiency under such circumstances. It would be well if the period of service of all men should not terminate until after the annual encampment is over, and thus the organizations could go on review with a full body of old and instructed soldiers. Every regiment did well, and each had its distinguishing excellence. The 2d, in the opinion of your correspondent, was generally the best in marching, manual, battalion movements, and appearance. The 4th continues to show improvement, while the 1st and 3d maintain their usual efficiency. The 3d went into camp with an almost entirely new body of field and staff officers, and of course suffers some from the swapping of horses while crossing a stream. The 5th battalion was particularly steady on review, and marched with a good step and steady line. The battery, as usual, surprised all of those who know what a difficult thing it is to whip a lot of horses into shape in four days. In battalion movements the 2d was decidedly ahead of any, and in the march past before the Governor on Friday was *facile princeps*. In this connection, however, it must be said that the first company of Governor's Foot Guards was in no respect behind any of the organizations in marching. I did not see it perform any manœuvres.

In the volley firing, which terminated the review of Friday, almost every regiment did remarkably well, but the 1st excelled all. Not a single firing was marred by an error. The camp was in a good state of police the day I particularly noticed it, and I am informed was kept so. No especial changes in its lay out and service have been made since last year. In point of fact there is really little to be noted different from the condition of things a year ago, with the exception that the battery has been provided with new 3-inch ordnance guns and the erection of a sea coast and mortar battery. The sea coast battery was unfortunately not completed in time for use this year, and the mortar battery was deficient in needed implements and material. But the latter was sufficiently in trim to enable it to be drilled at once, and to give an opportunity to the troops and spectators to see it in actual operation. Some firing with empty mortar shells and others with fuses in was had, and it was decidedly a novel sight to probably ninety hundredths of all the spectators. But it would be advisable next year to have such practice at a target in the river, or placed at some less dangerous point than that on which the shells finally landed, during these firings. While fortunately no accident occurred, it was possible that one might have taken place, as the mortars were fired from the lower end of the encampment, and the shells landed in and about its centre. As the boundary line was composed of soldiers and citizens, any error in aiming would have been prolific in disaster, and indeed when the fuse plugs were blown out, almost over the heads of the spectators, it is a wonder that somebody was not hurt. Such a thing should never be permitted. Sufficient for the day is the evil thereof. Without doubt the erection of these batteries will add much to the value of the encampment hereafter, and it is the move in the right direction as far as the preparation of this particular body of militia for practical service is involved. If they are ever called upon to protect their homes, it will have to be as artillerists and not as infantry. The field day movements I, unfortunately, did not see. I understand they were quite successful, being less of a hurly burly of firing, and more a study of positions and manœuvring.

Eventually such exercises will be carried out with a well defined purpose of instruction in which officers and men will acquire a truer knowledge of the requirements and exigencies of service. Lieut. Charles A. L. Totten, 4th U. S. Artillery, was this year detailed by the War Department to inspect the encampment and will undoubtedly give a valuable report thereon. This was another of the new departures of this year and Connecticut has joined her sister States at last in this custom.

In conclusion, it appears to me that the Connecticut Militia continues to maintain its high position. There is only one thing which is painfully apparent, and that is the utter inefficiency of the sentinels and their general ignorance of their duties. There is no excuse for this. Instruction in the duties of sentinels can be given in the armory and should be during the winter. No amount of fine guard *mounting* compensates for execrable duty on post. This matter should be attended to during the ensuing year, so that at the next encampment the man on post will understand that he is king for the time being, and will be so thoroughly acquainted with his business that he will impress all with the belief that he means what he says.

With this exception there was nothing to cavil at that came under my notice.

VERMONT.

THE annual encampment and muster of the Vermont troops was held near Burlington from Aug. 24 to Aug. 28, the camp being named Camp Stannard. The National Guard of Vermont is not extensive, consisting of one four-gun battery of artillery, one infantry regiment of 10 companies, and one separate company, all scattered through numerous towns of the State. The only time during the year when the regiment works as a unit is at the annual camp. The State, however, keeps up the brigade organization with a brigadier general and staff.

Owing to their dispersed locations the companies arrived in camp at various times during the day, and on this account and a heavy rain but little work could be performed. The tents had, however, been pitched beforehand, and the men on arrival in camp had little to do beyond taking possession and making themselves comfortable and attending to the wants of the inner man. In the afternoon the rain ceased, and at 4.30 things were in such shape that the guard was mounted, although still one company was missing. It would not be fair to criticise this ceremony, in view of the well under tood disadvantages and lack of opportunity of isolated companies, with regard to any drill beyond the school of the company. When this condition of things is taken into consideration, the first attempt was quite creditable. The dress parade, under command of Col. W. L. Greenleaf, was still better than the guard mount, but the companies worked together in the manual in but indifferent style, which, when the hurry in which they had to get ready for duty and their inexperience are considered, was but natural. Col. Greenleaf in the evening assembled the officers for theoretical instruction.

The second day found the entire 1st Regiment in camp, the last company having arrived at 5.45 P. M. the day previous The weather being favorable, the whole programme was carried out to the letter, and when dress parade closed the exercises of the day the bearing of the men and their work clearly showed the effects of the training they had received during the day. Of course, less noise would have been acceptable after taps, but in country companies, which become subject to strict rules of military discipline only during a few days each year, this is not unnatural.

The third day, in addition to the usual mornings work, presented something novel in National Guard camps—a street riot drill. Of course, this was not executed on the field, but the 1st Regiment marched to the city for the purpose. The various evolutions, which are few and simple and yet require intimate acquaintance with all the details of the drill, a cool head and presence of mind in a superior degree, were executed in a very satisfactory manner. Col. Greenleaf showed good judgment and appreciation of the necessities of the times in adding exercises of this sort to his programme.

The battery during the afternoon gave a very creditable exhibition of mounted artillery drill, having in the forenoon been inspected by the U. S. officer, Lieutenant W. H. Coffin, 5th Art. The usual dress parade, well executed, ended the day's exercises and showed that everybody was profiting by the constant attention to duty necessary to carry out the routine of exercises in a proper manner. The Governor arrived in camp, but the usual ceremonies attendant upon such visits were deferred to the following day. The presence of the Governor did not interfere with the carrying out of the usual forenoon programme, but in the afternoon a review and dress parade took the place of the customary work. In both instances the troops presented a very creditable appearance, and their progress since previous encampments was demonstrated beyond doubt.

The men were equally steady at the standing review, as on the march, and the bearing of the men of the light battery especially deserved the favorable comments of the Governor at the conclusion of the day's work. This is still more true with regard to their exhibition drill after the ceremonies, during which nearly 200 rounds of blank ammunition were fired with remarkable precision. In an hour after the conclusion of the drill the battery with horses and guns was aboard the train en route for home.

An infantry sham battle took place at the end of the gubernatorial ceremonies, and camp was broken early on Saturday, Aug. 28. The work done all through was creditable.

In the afternoon of Friday, Aug. 27, the 1st regiment and the 1st Separate Company passed in review before the Governor and staff and Brig.-Gen. Kingsley and staff. Senator Edmunds was a member of the party. The Governor's party then went to the headquarters tent. The National Guard formed in a hollow square, and addresses were made by Gov. Pingree, Lieut.-Gov. Orsbee, Senator Edmunds. Senator Edmunds thought the National Guard ought to have a new equipment and guns of the latest pattern. He said he would call the attention of the Secretary of War to the matter. Senator Edmunds was loudly cheered.

Brig.-Gen. Louis Fitzgerald has appointed W. Emlen Roosevelt and Frank K. Appleton aides on his staff. Both gentlemen served on the General's staff before.

THE GALVESTON PRIZE DRILL.

THE recent Galveston prize drill was a success in every respect. In addition to the competing companies there were on the ground Light Battery F, 3d U. S. Art., Capt. J. M. Lancaster, and three companies of the 16th U. S. Infantry and two U. S. bands. Forty-three National Guard companies were present, including Battery B, Louisiana Field Artillery, Battery B, Washington Artillery, of New Orleans; Dallas Rifle Company; Galveston Artillery and Gatling gun detachment of Battery A, St. Louis Artillery.

Infantry—Houston Light Guard; Sealy Rifles; Artillery Light Guard, of Galveston; Belknap Rifles, of San Antonio; Prairie City Guards, of Weimer; Chautauqua Guard, of San Marcos; Orange Rifles, Washington Guard, of Galveston; San Antonio Rifles; Palestine Light Infantry; Texas Rifles, of Austin; Douglass, of Tyler; Brenham Rifles; Collin Guard, of McKinney; Bonner Rifles, of Tyler; Reagan Guard, of Mineola; Bryan Rifles, Grayson Rifles, of Sherman; Terrell Rifles; Panther City Fencibles, of Fort Worth; Flatonia Rifles, Navastota Guard, Decatur Rifles, Gainesville Rifles, Alvarado Guard, Brenham Light Guard, Hibernia Rifles, of Dallas; Texas Home Guard, of Corsicana; Dallas Light Guard, Houston Light Infantry, Companies A, B, and C; Washington Artillery, of New Orleans; Branch Guard, of St. Louis; Montgomery True Blues, of Alabama; Co. F, Louisville Legion, and Busch Zouaves, of St. Louis.

The official scores were as follows, 100 being taken as a minimum percentage:

Infantry.—1. Houston Light Guard, 90 per cent., $4,500; 2. Montgomery True Blues, 87½, $1,500; 3. San Antonio Rifles, 87, $500; 4. Branch Guards, 86; 5. Louisville Legion, 77; 6. Belknap Rifles, 76.

State Companies.—1. San Antonio Rifles, 87 per cent., $1,000; 2. Belknap Rifles, San Antonio, 76, $750; 3. Sealey Rifles, Galveston, 70, $500; 4. Bryan Rifles, 69, $300; 5. Artillery Light Guard, Galveston, 64, $200; 6. Texas Rifles, Austin, 58; 7. Douglas Rifles, Tyler, 50; 8. Bonner Rifles, Tyler, 39; 9. Brenham Rifles, 35; 10. Brenham Light Guard, 34.

Prairie City Guards, of Weimer, and Grayson Rifles, of Sherman, withdrawn.

Winners of Individual Prizes.—First: Private A. Alphonse, Busch Zouaves, $150. Second: Private Wagner, Louisville Legion, $50.

(Signed), R. R. STEEDMAN, 1st Lieut. 16th Inf.,
S. W. DUNNING, 1st Lieut. 16th Inf.,
W. K. WRIGHT, 2d Lieut. 16th Inf.,
Judges.

Artillery, maximum 3.—1. Washington Artillery, New Orleans, 2.94, $1,000; 2. Louisiana Field Artillery, New Orleans, 2.87, $500; 3. Crawford Battery, Dallas, Tex., 2.85.

The Galveston Artillery withdrew before finishing the programme, owing to several men being prostrated by the heat.

Gunner Fred. Kornbeck, of the Washington Artillery, was recommended as the best drilled gunner.

(Signed), J. M. LANCASTER, Capt. 3d Art.,
H. C. DANES, 1st Lieut 3d Art.,
JOHN E. MYERS, 1st Lieut. 3d Art.,
Judges.

NEW JERSEY.

THE encampment of the New Jersey militia at Sea Girt, was completed on Saturday, Aug. 28. The troops acquitted themselves creditably, but the camp does not seem to have been without disagreeable episodes. This is sure to be the case when camps are used for other purposes than the purely military instruction of the troops.

One story told by the daily papers is to this effect: Dr Victor Mravlag, Assistant Surgeon to the regiment and a prominent physician of Elizabeth, was directed by Col. E. H. Ropes to call upon Quartermaster-General Lewis Perrine and have a matter of transportation adjusted. He found Gen. Perrine sitting on the porch surrounded by a number of ladies and staff officers. Raising his hand in proper salute he was about to report, when Gen. Perrine excitedly exclaimed: "Report back to your regiment, sir; you are too too d—d dumb to talk to. Tell your Colonel to send me a man with some sense. The ladies hastily arose from their seats and retired, when an exciting scene followed between the aged Quartermaster, who is 74 years old, and the Surgeon. Dr. Mravlag, a short time afterward, forwarded a charge against Gen. Perrine "for conduct unbecoming an officer and gentleman."

General Sewell is reported to have refused to attend a reception given by the Governor on the ground that the camp was supported by the State for the purpose of giving the militia a chance to learn practical soldiering, and not as a picnic party, and saw no reason why he should change now his invariable custom of never participating in any social entertainments outside of camp while on active duty.

MESSRS. J. H. MCKENNEY & Co., Grand street, N. Y., have just received orders from the General Government for the supply of 6,000 "Frazer" cartridge boxes to the National Guard of New York, Massachusetts and Connecticut. The cartridge box differs but little in size and shape from the McKeever box, but instead of containing two rows of loops in which the cartridges have to be inserted, one by one, it offers the facility for placing into the box a whole block containing 20 cartridges at a time, and when the cartridges are used the block can be thrown out and substituted by a new one without loss of time. This box is a great improvement. The McKenneys have also large orders for a new bayonet scabbard, which differs from the Hoffman scabbard inasmuch as it has a metallic "mouthpiece" attached, which facilitates the returning of the bayonet without injuring the leather part and obviates all difficulty in drawing and returning the bayonet.

NEW PUBLICATIONS.

In the "Magazine of American History" for September the Hon. Horatio King, a member of President Buchanan's Cabinet, writes a most readable paper on his "First and Last Sight of Abraham Lincoln." There is also a continuation of General Lee's valuable war studies, "From Cedar Mountain to Chantilly," one of the best accounts of that campaign yet given to the reading public. In the Original Documents of the number may be found the original letter of Washington's dentist, referring to "Washington's Last Tooth," an item that has been running through the newspapers during the past month.

The *Armee und Marine-Zeitung* (Vienna) states that the historical section of the German General Staff has prepared a complete history of the Danish War of 1864. It will form two large volumes, the first of which will be published this autumn, the other within at most one year.

Robert Clarke and Co., of Cincinnati, have issued "Bibliotheca Americana, 1886," a volume of 280 pages and a valuable catalogue of a collection of books and pamphlets relating to America. To this is added a descriptive list of Robert Clarke and Co.'s historical publications.

The September number of *Outing* contains, among other things, a continuation of the diary of Lieut. John Bigelow, Jr., 10th Cav., entitled, "After Geronimo."

The Rebellion Records office is about to issue a supplemental volume containing the proceedings of the Fitz-John Porter Court-martial.

THE MESS.

A SCREED FOR THE CRITICS.

Be like the skylark, O my soul!
That soaring loves to sing;
And upward cleaves the airy blue,
On heaven-aspiring wing.

And in its singing, soaring flight,
Drops down such tuneful rain,
That he who lifts a wondering eye,
To see whence comes the strain,

Asks not, if to the earth or sky,
Such melodies belong;
Or whether bird or angel sings,
But only lists the song.

Still higher mounts the little bird,
On palpitating wing;
Soars onward, upward through the blue,
And only soars to sing.

Until, lost in his heaven of song,
The earth left far below,
If gossips scold or critics rave,
How should he care or know? C. F. C.

Mr. Clarence Stetson furnishes *Puck* with the explanation which follows of the technical terms used in poker:

Age.—Any gray-headed player.

Ante.—An unpopular relative always present at games of poker.

Blaze.—Something seen when four aces are held against a Westerner with an ace high flush.

Blind.—A term applied to a man who don't see you playfully steal a blue chip off his pile. In such cases, keep it.

Call.—The sudden sense of duty that calls some men home when $100 ahead.

Chips.—Ivory or bone tokens, representing a fixed value in money —— or "wind."

Chipping, or to Chip.—Betting money, or "blowing in wind."

Discard.—Throwing away the cards given you by the dealer, and playing those in your boots.

Draw.—The act of drawing a player's attention while you deal yourself six cards.

Eldest Hand, or Age.—The oldest bald head present.

Filling.—Working the decanter, often.

Foul Hand.—Any hand that beats yours.

Frozen Out.—Going home in the morning, quite broke.

Going Better.—Going home with $10.

Going In.—The time when you feel sure you will win.

Jack-Pots.—A cross between a turkey-raffle and a chicken-shoot.

Limit.—An imaginary quantity.

Pass.—A term used when you want a friend to pass you a heart.

Say.—This is the word applied to the remarks you make after a four-hour run of bad luck.

Table Stakes.—Where the man, on the dealer's left, forgets to put up, and you play to see who has the table.

——— ——— !——— ! !———? ? .———

Marks used to indicate what you know your wife will say to you when you get home.

In "Some Hit and Miss Chat" we find the following: "It isn't often that a good story comes from West Point; there is the land of the chestnut incomparable; there stories that Chauncey M. Depew coined seasons ago, tickling tales that Horace Porter told in his first after-dinner speech in the boyhood of Noah, go the rounds as fresh specimens of the cuteness of this latter day, and the man who has a yarn to spin need never hesitate to handle it for fear its burrs may prick him. There is only one known instance on record where any protest against ancient history was heard on West Point ground. That was during this last Commencement season, when Gen. King, Gen. Francis T. Nichols, Gen. Horace Porter, and two or three of their newspaper friends were met together to kill a half hour that intervened between a couple of events of interest. Gen. Porter of course followed the instincts of his nature and began to tell a story. It was a good story—Horace Porter never told a story that wasn't good—and the recitation was hailed with applause. Only at its end one of the New York newspaper men said with a diabolical calmness: 'General, it seems to me that somebody stole that story from you when I was a boy, for I'm sure I came across it then in a book that was written by a person named Marryatt.'

"'Ah, my friend, quoth Horace Porter in quick

reply and all unabashed, "you're all right so far as you go; but the fact is that the man who stole that story first was Aristophanes, who boldly put it into one of his Greek comedies. You see that I suffered before Marryatt's day.'"

—

One of West Point's worthies is of the name of Wagstaff, a brave and daring fighter, a glorious comrade, a man of generous nature, and wit inimitable. West Point's rocks will crumble ere Wagstaff's stories are forgotten; but here is a sonnet that his name is attached to which I have never heard quoted off the ground up the Hudson where we make our soldiers, and I'm pretty sure that hitherto it has never gotten into the print that it deserves. Soldier Wagstaff ranked as Colonel in war times, but for "gallant and meritorious conduct" he was brevetted Brigadier-General. One day an acquaintance met the brave man on the street and asked whether it was his rank as Colonel or his brevet as Brigadier-General that regulated his salary. A merry twinkle came then into the Wagstaff eye and he replied:

"When Hamlet's father cried out: 'Oh, my offence is rank and smells to heaven!' he didn't mean brevet rank, for there isn't a d—d scent in it."

ATTACKING A RAILROAD TRAIN.

On the occasion of the military inspection of the 13th ult., General Borson, says the *Moniteur des l'Armée* (Paris), caused some interesting manœuvres to be executed. These consisted of an attack on a train in motion, which left Rodez at 2.20 P. M. with 400 men of the 81st regiment of the Line, carrying in addition ambulance wagons, officers' horses, and other regulation material. Gens. Borson and Marthé, and Col. Courtois were among the party. On arriving opposite the farm of Mazeilles the train, which was decorated with tricolor flags, was attacked by a body of men in ambush. An instant stoppage was made, the troops sprang from the carriages and opened fire on the enemy, who were held to have been driven back to a neighboring height. Gen. Borson in the meantime superintended the fixture of the inclined planes by which horses and material were to be detrained, an operation lasting only a few minutes. The troops then pursued the enemy, who were obliged to retire to Mazeilles and the adjoining woods. After a well-sustained fire of over half an hour, during which over 5,000 blank cartridges were expended, the bugles sounded the cease fire. Victors and vanquished then embarked on the train, which reached Rodez at five o'clock.

TROUBLES OF GENERAL BOULANGER.

Rumors of General Boulanger's resignation have been current in France, but they seem to be premature. On the other hand, fresh accusations are brought against the unfortunate and indiscreet War Minister, who is said a few years back to have offered his services to the Bonapartes. His letters are to be published. It may be remembered that in his letter to M. Limbourg, endeavoring to explain his conduct, he said: "When the Duc d'Aumale, without taking military regulations into account, on the pretence of hunting, but for an object which is clear to-day, gathered a number of officers round him, I was directed by the War Minister of the day to remonstrate with him, and I obeyed." Now, it is pointed out that there exists a Ministerial circular recommending cavalry officers to accept all such invitations as those issued by the Duc d'Aumale. In fact, the Duke, in inviting all the officers in the neighboring garrisons to hunt at Chantilly, was simply acting in accordance with the circular in question. However, the Radicals in Paris suspected the Duke of plotting, and M. Clémenceau complained to General Billot, who offered to bet that there was no foundation for the report. Colonel Boulanger was despatched to Chantilly to investigate matters, and he reported that there was not the slightest trace of any military conspiracy or any attempt to tamper with officers. It is now asked whether General Boulanger made a false report to General Billot, or whether he speaks falsely now in accusing the Duke of plotting against the Republic.—*Army and Navy Gazette.*

(From the London Times.)

CARRIER PIGEONS IN GERMANY.

Carrier pigeons have long been an object of attention to the Governments of Germany and France. In this latter country the Minister of War lately directed a census of the carrier pigeons to be made, when it appeared that at Lille there are 8,000; at Roubaix, 15,000; at the little town of Wattrelos, in the Department of the Nord, there are 3,000, partly belonging to private individuals, partly to societies who endeavor to improve the quality of the birds. Attention is paid to the birds chiefly in the manufacturing districts of the east and north. In Germany the War Department has 6,000 pigeons. There are about 100 associations that have about 15,000 birds. Independently of business messages there are frequent flying matches, and it has been ascertained that every year some thousands of pigeons are lost in those matches, or at least never arrive at their destinations or return to their homes. There is an erroneous impression generally prevalent that carrier pigeons always find their way, but German experience at least is quite against this. It has been found that birds frequently fly, not straight from point to point, but making a detour by some place with which they are familiar. By direction of the German War Office Dr. G. H. Schneider, who has devoted much attention to carrier pigeons, is investigating the question of how they find their way. He is inclined to think it is purely a matter of training and habit. They will almost always go astray if taken to distant places or neighborhoods to which they are not accustomed.

FOREIGN ITEMS.

—

At Constantinople it is stated that Batoum is being fortified with guns of the heaviest calibre, and that 6,000 men from the Caucasus have been ordered to reinforce the garrison there.

The French divisional manœuvres near the Sarthe, will commence on September 4 next, under the direction of General Coiffé, commanding the 7th Division of Infantry. The commanders of army corps during the approaching autumn manœuvres will only receive their ciphered instructions on the night preceding important movements. They will, therefore, have to prepare their plans of action almost at a moment's notice.

The Maharajah of Cashmere has expressed a desire that his State shall be placed in direct communication with the Indian system of railways. Survey is to be made of the various routes practicable for this purpose.

Rumors are in circulation at St. Petersburg that China is hastening her armament in a somewhat remarkable manner. It is asserted that several well-known English manufacturers have contracted to furnish her shortly with 200,000 rifles.

General Boulanger has presented M. Grévy, the President of the Republic, with a copy, in two volumes, of the "Lives of French Marshals, Generals of Division, and Camp Marshals," embracing a period of nearly 700 years—namely, from 1185 to 1880. This remarkable work, of which only a limited number has been printed, was compiled from the national archives under the direction of the War Minister. The first volume treats of the period comprised between 1185 and 1792, while the second dates from September 25 of the latter year and runs down to 1880.

A comparison of the ages of the several German-speaking universities is of interest just now in connection with the Heidelberg commemoration. The oldest is Prague, founded in 1348; next comes Vienna, founded in 1365; Heidelberg follows, being the senior of the universities in the German Empire, founded in 1386; then Leipsig, in 1409; Freidburg, (Baden,) in 1454; Griefswald, in 1456; Bale, in 1460; Munich, in 1472; Tubingen, in 1477; Marburg, in 1527; Konigsburg, in 1544; Iena, in 1558; Wurzburg, in 1582; Giessen, in 1607; Kiel, in 1665; Halle, in 1694; Breslau, in 1702; Gottingen, in 1737; Erlangen, in 1743; Berlin, in 1810; Bonn, in 1818; Zurich, in 1838; Berne, in 1834; Strasburg, re-established in 1872, originally founded in 1567.

The new 13·5-inch 68-ton gun, the largest of the new pattern breech-loading guns yet manufactured at Woolwich, has just been successfully proved at the butts at the Royal Arsenal. Ten rounds were fired from the gun, commencing with 480 lbs., and ending with 590 lbs. of powder, the proof cylinders being the same weight throughout. At the conclusion of the trial a careful examination was made of the bore, from which it appeared that the "liner" had given slightly. It was less than one-tenth of an inch, and was about two-thirds of the way down the bore towards the muzzle. This is not considered of sufficient importance to prevent the trial of the gun being continued, and it will be shortly sent to Shoeburyness to complete an exhaustive trial.

Experiments of an unusually valuable character have recently been made on the armor-clad *Provence* off the islands of Hyères. The trials in question were intended principally to determine the effects of machine-gun fire at from 1,200 to 1,500 metres on the deck, tops, and crews of an enemy's vessel. In this case the crew of the *Provence* were replaced by man targets. The results were most conclusive, and reflected, according to the *Moniteur de l'Armée* (Paris), the greatest credit on the officers and men who carried out the trials. The enemy's deck, it was found, would have been absolutely untenable in action, and the armored redoubt by which the commander is nominally sheltered would have been equally uninhabitable, as the projectiles penetrated in great numbers through the small apertures by which the movements of the vessel are directed. The funnel, tops, and rigging of the vessel were riddled with shot.

ROYAL

BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purty, strength, and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of ow test, short weight, alum or phosphate powders. *Sold only in cans.* Royal Baking Powder Co., 106 Wall st., New York.

4 Per Cent. LOANS 1 Per Cent.

LIFE LOANS

On any kind of securrty and good promissory notes. U. S. Government Bonds, Foreign Redemption Bonds sold on monthly payments. Large premiums for small investors. Reliable correspondents wanted everywhere. Liberal inducements. Address for full particulars, G. W. FOSTER, Banker, 42 Broadway, New York.

NEW YORK

THE first railway uniting Asia and Europe, from Perm to Tobolsk, via Ekaterinburg to Tiucmen, was opened a few days ago.

ADMIRAL BERANGER has invited tenders for 85 steel cannon and 97 carriages, to be constructed in Spain. The system of guns definitely adopted in the Spanish naval service is that of Brigdr. Hontoria, of the Spanish Marine Artillery.

THE *Whitchall Review* reverses its field glass on the United States when observing: "It is not a little amusing to note the double-faced action indulged in by the American press over the question of anarchy. So long as this is under the disguise of Fenianism, socialism and dynamiting conducted to the detriment of English life and property the Americans and their press have no sympathy to express for those troubles, but when the same form of rebellion takes place in America the instigators and perpetrators of civil rebellion are hunted down, captured, tried, and condemned. But, then, what happens in Chicago is one thing and what happens in London is another."

THE English Government has placed with Messrs. Campbell and Co., Cyclops Steel and Iron Works, and Messrs. John Brown and Co., Atlas Steel and Iron Works, of Sheffield, the order for the armor-plates for the *Nile* and *Trafalgar*, which are now building in Her Majesty's dockyards at Pembroke and Portsmouth. The total weight of the armor ordered is 4,908 tons. The work is about equally divided between the two companies. 1,132 tons of the plates are of 20 in. thickness, the heaviest which have yet been ordered for British war ships in steel-faced armor. The whole of these 20 in. plates will be made by Messrs. Cammell and Co. The nearest to them were the turret plates for the Italian armor-clad *Italia*, which were 19⅝ in. thick. The weight upon each ship will be 2,454 tons.

THE capital invested in the Indian railway system, with its connected steamer services, is estimated at £161,917,840. Of this sum the Government have spent directly £82,255,391.

THE Emperor of Austria opened Aug. 29, at Pesth, the new cavalry barracks in connection with the bicentennial celebration of the taking of Buda. The Emperor said he hoped his brave soldiers would find in the new barracks a dear home, from which they would gain fresh strength to fulfil their duties to the throne and to the Fatherland.

AT Milford Haven a torpedo boat going at full speed rammed another of these lightly constructed vessels. The rammer caught the rammee almost at right angles, and it was anticipated that she would have been seriously damaged, if not sunk. But, as a matter of fact, her injuries were repaired in the course of the day, while the rammer's bows were so stove in that she had to go to Pembroke for repairs.

THE *Admiralty Gazette* says: "It has been decided to 'chase-hoop' every gun in the service of new design, from 6 inches upwards, as, although reported safe by the Ordnance Committee in 1885, the guns have taken upon themselves to disagree with that report, by bursting when fired with reduced charges, and by performing various other antics. And this chase-hooping is not to be in one piece, but in several rings or hoops shrunk on side by side. How on earth," it says, "will this process strengthen the chase? It will add weight to the chase, but where the hoops meet, the strength of the chase will remain the same as it was before being hooped. The guns will burst the same as ever, and the whole world will now be aware of the fact that all British men-of-war armed with the new guns dare not use them until they have been 'chase-hooped,' and that when thus altered they need no more be feared than they are at present."

THE gunners of the Guard Artillery of the German Army are being put through a course of revolver practice.

MR. CHAMBERLAIN declares that the loss of life at sea during 1881 amounted to the alarming total of 1 in 60 of the total number of lives employed.

A VERY successful trial was made the other day near Berlin of a new system of attaching the cable of a military captive balloon—similar to that of M. Yon, now adopted by the Russian Government—in which comparatively great stability for the car was obtained in a fairly high wind.

TO GET an absolutely clear solution of shellac has long been a desideratum. The *National Druggist* says it may be prepared by first making an alcoholic solution of shellac in the usual way; a little benzole is then added, and the mixture well shaken. In the course of from 24 to 48 hours the fluid will have separated into two distinct layers, an upper alcoholic stratum perfectly clear, and of a dark red color, and under it a turbid mixture containing the impurities. The clear solution may be decanted or drawn off.

A BERLIN correspondent writes: "I am a poor one to know chancellory secrets, but I shall be much mistaken if all this enthusiasm about Prince Alexander, of Bulgaria, does not overthrow that despotic conspiracy known as the triple alliance. At best it had outlived its usefulness, and was getting to be an embarrassment for its authors. Bismarck, with all his faults, does not lack sense. He does not disdain popularity. In truth, he dearly loves it. Here at his feet is such a chance as he never had before since the formation of the Empire to make himself an idol of the German people here, and in Austria to win the regard of the Poles and Hungarians, and do what everybody knows must be done sooner or later—humble Russia. Will he seize this chance? I venture to think so."

NEW ENGLAND MUTUAL Life Insurance Company, OF BOSTON, Mass.

Assets, - - - - - - $17,846,546.65
Liabilities, - - - 15,238,761.16
Total Surplus, - $2,607,785.49

This Company insures the lives of Officers of the Army and Navy without extra premium, except when actually engaged in warfare, which premium if not paid at the assumption of the extra risk *will not invalidate the policy*, but will be a lien upon it, and also gives liberty of residence and travel, on service, in all countries, at all seasons of the year, without extra charge.

Special attention is called to the LIFE RATE ENDOWMENT policy, which combines insurance at low cost with an investment at a fair rate of interest, and at the same rate of premium formerly charged for life policies. Every policy participates in the *annual* distribution of surplus, and has endorsed upon it the cash surrender and paid up insurance values provided by Massachusetts laws.

Pamphlets explanatory of the New Feature may be had on application at Compy's Office, *POST OFFICE SQUARE.*

BENJ. F. STEVENS, President
JOS. M. GIBBENS, Secretary.

Horsford's Acid Phosphate
AS A NERVINE.

Dr. F. DE V. HOARD, Concordia, Kan., says: "I have used it personally, and am greatly pleased with its action as a nervine."

A SAFE INVESTMENT

For both large and small sums of money is offered in the DEBENTURE BONDS of the NEBRASKA LOAN AND TRUST CO. and the CENTRAL LOAN AND LAND CO. These bonds are secured by mortgages on productive real estate after the manner of securing National Bank notes, bear 6 per cent. interest and run 10 years. Experience proves that they are one of the safest investments ever devised, and they are commended to the attention of officers of the Army and Navy.

For sale by JOHN ROCKWELL, 20 Nassau St., New York.

CRAB ORCHARD WATER CO., Prop'rs. SIMON N. JONES, Manager, Louisville, Ky.

THE Chinese notion of England is said to be that of a tribute-bearing nation of men without pigtails, governed by a lady with large feet.

THE French *Bulletin de la Réunion* is devoting itself to strategical studies of the Franco-Italian frontier, and there are signs that the attention given in France to the military features of the mountain ranges which separate France from the dominions of the House of Savoy, produces uneasiness and irritation in the public mind south of the Alps.

IT is not surprising to learn that at the age of 90 the health of his Imperial Majesty is the object of greatest concern to his medical advisers; yet, though from time to time during the past six months the Emperor William has been ailing, later accounts report that he is unaffected with any organic complaint, and that the changes in his constitution are solely attributable to the laws of nature, which unfortunately forbid one to be as physically powerful at the age of 90 as at that of 19.

H. M. S. *Leander*, on her passage from Nagasaki to Yokohama, while steaming along at about 14 knots an hour, collided with a huge marine monster, weighing over half a ton, and supposed to be a species of sun fish. The collision was attended with fatal results—to the fish, the ship herself being uninjured. A bowline was passed round the creature's fin, and an attempt made to get it on board, but at the speed which the vessel was going, this proved an impossibility, and the victim to her prow was lost, to the great sorrow of the amateur naturalists on board.

THE Italian Minister of War has just tested with satisfactory result a new cartridge case, destined to solve the problem of furnishing ammunitions to the soldiers during action. It is proposed to let each company have eight, so that in surplus of the ordinary ration there will be available 2,112 more cartridges to each company in the line of fire. The new cartridge case is constructed so as to be portable on the shoulders during the time of action, and contains 264 cartridges in 33 pockets. While the troops are marching it is to be conveyed with the baggage and the drawback is that the soldiers may have to "wait for the wagons."

THE Italian War Minister, according to the *Esercito Italiano* (Rome), has decided to suspend the siege operations around Verona.

THE Germans have just celebrated the centenary of Frederick the Great with all the pomp and state due to the memory of that illustrious warrior.

SIXTEEN regiments of French foot artillery are ordered to be immediately armed with six-chambered revolvers and necessary equipments, in lieu of the short carbine formerly carried. The sword-bayonet adapted to the latter weapon is to be provisionally retained. Firing drill with the revolver is to be at once commenced, and all the time-expired men, of the 1881 class as well as the reserves, are to be kept with their batteries until proficient in the new exercise.

THE new 13.5-in., 68-ton gun, the largest of the new pattern breech-loading guns yet manufactured at Woolwich, has just been successfully proved at the butts at the Royal Arsenal. Ten rounds were fired from the gun, beginning with 480 lb. and ending with 590 lb. of powder, the proof cylinders being the same weight throughout. At the conclusion of the trial a careful examination was made of the bore, from which it appeared that the liner had given slightly—less than one-tenth of an inch and about two-thirds of the way down the bore, towards the muzzle. This is not considered of sufficient importance to prevent the trial of the gun being continued, and it will shortly be sent to Shoeburyness for an exhaustive trial. After a certain number of rounds the gun will be examined again to ascertain if the liner has been further affected, or whether any scoring of the rifling has taken place at that point. This, however, is not anticipated, the result of the Woolwich trial being deemed satisfactory.

R. W. TANSILL & CO., Chicago, are now making especially for the Officers of the Army and Navy a new and very fine Havana hand-made cigar, known as "TANSILL'S REINA." They are put up in beautiful packages of 25 cigars, each cigar banded. They come in three sizes, 4¼, 4½, and 4¾, inches, while their moderate cost, viz. $65, $70, and $75 per thousand brings them within the reach of the entire Service.

BENSON'S CAPCINE PLASTERS are well known in the Army and Navy as the most convenient and effective external remedy. For sprains, coughs, rheumatism, sciatica, and all ailments arising from exposure they excel every other application, giving relief and cure in a few hours. Avoid worthless imitations under similar names. Seabury and Johnson, Chemists, New York.

BIRTHS.

MORGAN.—To the wife of Major Jas. N. Morgan, Captain 24th Infantry, a daughter, at 3.45 P. M., Aug. 28.

Detachable Magazine, charged.

Remington-Lee Musket with Magazine attached.

The Remington-Lee Detachable Magazine Rifle.

Recommended by the U. S. Magazine Arms Board,
First in Order of Merit for Trial in the Field,
AS A SERVICE ARM FOR THE U. S. ARMY.

A single Breech Loader, that can be instantaneously changed into a perfectly safe Magazine Arm, giving an unequalled rapidity of fire.
Smaller number of component parts than any other Arm ever made. Every part simple and strong.
Magazine may be attached or detached in one second, and the Breech System dismounted or assembled in ten seconds.

The Rifle weighs 8¼ lbs. without bayonet, and can be used as a Sporting Arm.
The possibility of a premature discharge through the bullet of one cartridge coming in contact with the primer of another, from the shock of continuous firing, the simple performance of ordering arms, or the effects of a long march—incidents of danger inseparable from Repeating Arms that carry their cartridges in Tubular Magazines under the barrel or in the butt-stock—is absolutely prevented; the position of the cartridges in the Lee detachable magazine not only assuring safety against explosion by impingement but against the deformation of the projectile by "upsetting."

RELATIVE RECORDS of the three arms recommended in order of merit by the late U. S. Magazine Arms Board:

	Remington-Lee Magazine Rifle.	*Chaffee-Reece.*	*Hotchkiss.*
Two minutes' firing as repeater with accuracy	68 shots, 41 hits.	38 shots, 25 hits.	31 shots, 14 hits.
Two minutes' firing as single loader	46 shots, 31 hits.	41 shots, 15 hits.	45 shots, 21 hits.

THE LEE MAGAZINE RIFLE is the only Military Repeating Arm which has demonstrated its superiority in RAPIDITY with ACCURACY as a **REPEATER** over its execution as a SINGLE LOADER.

ARMY AND NAVY JOURNAL.

GAZETTE OF THE REGULAR AND VOLUNTEER FORCES.

VOLUME XXIV.—NUMBER 7. WHOLE NUMBER 1203. | NEW YORK, SATURDAY, SEPTEMBER 11, 1886. | SIX DOLLARS PER YEAR. SINGLE COPIES, FIFTEEN CENTS.

Publication Office, 240 Broadway, N. Y.

THIS is the month for annual reports of Division and Department commanders, reports on condition of post schools, causes of desertion, etc., so that much interesting reading may soon be looked for.

THE Division of the Atlantic, which has held the HILTON Trophy for two years, will enter a team this year to compete for it again. The team will come to Creedmoor as soon as the rifle competitions at Creedmoor are finished. A team of Regulars will also participate in the "General SHERIDAN'S Skirmishers' Match."

GENERAL MILES, says the San Francisco *Report*, in securing an order for the removal of the Apaches from Arizona has won the greatest victory of his life. An Army contractor in high favor with the Department is a powerful and dangerous foe, and more difficult to frighten than the savages. The Army contractor was the dictator of Arizona until Miles took command. It was the Army contractor who kept the Indians at war and fought every measure for a permanent place.

REAR-ADMIRAL EDWARD SIMPSON, U. S. N., will have a third article in *Harper's* for October, under the title of "United States Naval Artillery," fully illustrated. This article will contain an epitome of the progress of the United States in guns from the smooth bore carronade in the early days of the Republic, down to the chambered, long range, breech loading pieces fabricated in the Washington Navy-yard in the year of grace 1886. To many civilian readers the cabalistic symbols XV-in. M. L. R. and VIII in. B. L. R. will receive quite a new significance.

THE War and Navy Departments have been zealous this week to do all in their power for the suffering people of Charleston, S. C. Colonel R. M. BATCHELDER returned to Washington early in the week and made a report of his observations to the Acting Secretary of War, and certain officers of the Engineer Corps are now at Charleston making a critical examination of public buildings, etc., with a view to determine what disposition of them the public safety demands. The call upon the War Department for tents has somewhat taxed the available resources, for the expected influx of Apache Indians at Fort Marion, Fla., has necessitated a large invoice in that direction.

ACCORDING to *L'Avenir Militaire* the French Minister of War has been playing a little game of bluff in following the announcement that Germany had completed her hundredth thousand repeater, with the statement that he had issued for trial, in seventeen regiments, "a repeating arm incomparably superior to all that have been invented." This remarkable weapon, it appears, is simply the repeating rifle of 11 mm. calibre, known as the model of Chatellevault, which has already been tested in several corps and received uniformly unfavorable reports. Meanwhile trials—and these are to some purpose—are going on before the Commission between two models, one presented by the Artillery and the other by the Normal School of Chalons, both of which are of 8 mm. (.315) calibre. One fires a metallic cartridge, and is claimed to have an initial velocity of 1,800 feet, the new Enfield-Martini calibre .40 having but 1,570.

THE removal of the clothing factory and depot of the Marine Corps from No. 226 South Fourth Street to No. 216 South Second Street, Philadelphia, has been accomplished, and business is now moving smoothly and with system in the new establishment. In addition to clothing, small arms and ordnance stores will be supplied from this depot, also, by recent arrangements, all such articles of equipage as post flags, camp colors, brooms, brushes, buckets, shovels, spades, axes and table ware. To accommodate goods for manufacture and articles for issue has required the erection of more than 4,000 feet of shelving. Progress in the Marine Corps is slow but healthy. The leaven is at work, and when co-operation and encouragement succeed dissension and repression the progressive element will be heard from in many quarters.

THE Bureau of Yards and Docks has sent advertisements this week to the San Francisco papers inviting proposals for furnishing 49,000 cubic feet of dressed or dimension granite for the large dry dock at the Mare Island Yard. This dock, when completed, will be one of the largest and best arranged in the world. It was commenced in 1872 and since then has cost, including the $191,000 appropriated for its completion this year, nearly $2,800,000. The pumping plant, which was contracted for by a Philadelphia firm and finished last spring, is the most complete ever built in any country. The caisson with its fixtures and appliances is also most admirably arranged. The new pumps were tried some time ago and far exceeded the expectations of the officials in charge, seven millions of gallons being emptied in fifty-five minutes. The dock will be finished during the current fiscal year.

THE Naval War College has opened its second term under somewhat discouraging auspices; inasmuch as there is no appropriation to meet its expenses for the current year. It is fortunate, however, that the resources of the Department are such that the failure of the appropriation does not necessitate the closing of the institution. On the contrary, we believe that it is stronger than ever, and that it will continue to grow in favor in the Service in such a way as to demand attention from Congress. In another column we give an account of the opening exercises of the present term and a resumé of the address made on the occasion by Rear-Admiral LUCE, the first President and the real founder of the institution. It is greatly to be hoped that the full text of this address, which, we are informed, was a most able presentation of the purpose and aims of the college, may be given to the Service at large.

THE non-commissioned officers who have successfully passed the departmental boards and the Fort Monroe board for appointment to second lieutenants are: Sergeant-Major Harry Fletcher, 8th Cavalry; Sergeant Carl Koops, Troop C, 2d Cavalry; Sergeant-Major Odin Gurovitz, 6th Infantry; Sergeant George E. French, Co. A, 1st Infantry; Corporal George W. Martin, Co. H, 1st Infantry; Corporal Frank Gray, Co. I, 2d Infantry; Corporal Walter McMillan, Co. G, 4th Infantry; Corporal Frank Owen, Co. C, 9th Infantry, and Corporal Stephen H. Hackney, Co. G, 16th Infantry. As previously stated, these young men will not receive their commissions until Secretary Endicott has returned to Washington. There are now more than sufficient vacancies for them, but the Acting Secretary prefers not to interfere with the subject of appointments. There is no doubt, however, but that they will all receive their commissions in due season, including Sergeant Gray, of the 2d Infantry, in whose case there was some doubt.

REAR ADMIRAL LUCE had assembled the North Atlantic Squadron under his command at Newport, where it seemed probable there might be an opportunity for some exercises by the fleet, that would prove of service to those officers who are pursuing the Naval College course. It is obvious that more could be learned by close observation of a series of evolutions by a spectator with no responsibility, than by those directly engaged in controlling the work of a part of the fleet; hence the importance to all those officers of witnessing from the outside these exercises. But there seems to have been some mysterious current of cross purposes pervading the administration of affairs in the Department, for the squadron has been broken up by the ordering of the *Swatara*, *Galena*, and *Yantic* to the Portsmouth Navy-yard for repairs. It is, perhaps, *only* a coincidence, that this Yard is situated in Maine and that an election is soon to take place in that commonwealth. We must confess to a feeling that the movement is open to a very strong suspicion that the old order of things is not entirely done away with. It hardly seems possible that the *Yantic*, for instance, can stand in need of great repairs, considering the length of time she spent at the Norfolk Yard last winter and that she was supposed to have been put in a condition fit for at least a two years' cruise. The other vessels do, probably, need more or less done to them, but are they so far gone that the "exigencies of the Service" require their being sent to a Navy-yard—and especially to the one in Maine—just at this particular juncture?

THE advertisements for the new vessels of war did not appear on Saturday last, as was expected, and there is really no certainty now as to when they will be ordered. The delay is due to some important changes which the Secretary has authorized in the plans of the 840-ton gunboat. This vessel, as originally designed, was to be constructed on the composite system, the frames to be of steel and the outer planking and decks of wood. The Secretary has suddenly discovered that the law authorizing the contruction of these vessels require them all to be built of steel. Although he believes the gunboat, as originally designed, would make the most efficient vessel, he proposes to comply with the law. He has accordingly directed the Bureau of Construction and Repair to prepare practically a new set of drawings and specifications for this gunboat. Naval Constructor WILSON has been called to Washington from his vacation, and is now busily engaged with a corps of draftsmen in altering the plans. The Secretary of the Navy is evidently not living in idleness at his country home in Lenox, for every day a telegram or two is received by the officials at the Navy Department suggesting some changes in the plans and advertisements for the vessels. Lieut. RODGERS, of the Bureau of Naval Intelligence, has been with him for some days, and it is presumed that they are together studying up and giving the final touches to the papers connected with the new vessels. It is also possible that the Secretary considers this a good time and Lenox a good place to commence the compilation of his annual report, and has called Lieutenant RODGERS there to assist in the collection of data.

PERSONAL ITEMS.

GENERAL W. B. HAZEN, Chief Signal Officer, U. S. A., is visiting the Pacific Slope.

CAPTAIN L. R. STILLE, 23d U. S. Infantry, of Fort Brady, Mich., is in Philadelphia.

MAJOR G. F. BARSTOW, U. S. A., rejoined at Fort McHenry, Md., this week, from a two months' leave.

CAPTAIN O. W. POLLOCK, 23d U. S. Infantry, left Fort Porter, N. Y., on Saturday last, on a week's leave.

MAJOR J. W. WHAM, Paymaster, U. S. A., has returned to duty in New York from his summer's leave.

COLONEL E. F. TOWNSEND, 11th U. S. Infantry, has completed an interesting inspection of Dakota militia.

LIEUTENANT L. H. WALKER, 4th U. S. Artillery, rejoined at Fort Monroe, Va., on Thursday, from a week's leave.

LIEUTENANT B. K. ROBERTS, 5th Artillery, rejoined at Fort Hamilton, N. Y. H., early in the week, from a short leave.

CAPTAIN THOMAS H. LOGAN, 5th U. S. Infantry, has left Fort Keogh, Montana, for the East on a month's leave.

LIEUTENANT J. C. SCANTLING, 2d U. S. Artillery, will spend the month of September with friends at Baltimore, Md.

LIEUTENANT C. H. HEYL, 23d U. S. Infantry, left Detroit, this week, on a short visit to friends at Fort Mackinac, Mich.

GENERAL STEWART VAN VLIET, U. S. A., is expected soon to visit Charleston, S. C., where he has property interests.

CHAPLAIN O. E. HERRICK, U. S. A., lately at Clifton Springs, N. Y., on leave, will return to Fort Monroe, Va., in October.

LIEUTENANT G. S. YOUNG, 7th Infantry, will leave Fort Laramie, Wyo., next week, to be absent until the middle of November.

ASSISTANT SURGEON C. F. MASON, U. S. A., lately on duty at Plattsburg Barracks, will leave the East in a few days for Arizona.

COLONEL C. L. BEST, 4th U. S. Artillery, completed this week, his inspection of Rhode Island militia in their camp at Oakland Beach.

LIEUTENANT LEA FEBIGER, 23d U. S. Infantry, was to leave Fort Brady, Mich., this week, on a fortnight's hunting expedition.

LIEUTENANT B. ALVORD, 20th U. S. Infantry, and Mrs. Alvord, have returned to Fort Leavenworth, from their wedding tour to the East.

CAPTAIN JOHN S. WHARTON, 19th U. S. Infantry, will spend the winter between New York City, and Montrose, Westchester county, N. Y.

THE only retirement for age in September is that of Capt. C. J. Von Hermann, 4th Infantry, on the 17th. Capt. Herman is residing at Spirit Lake, Iowa.

MAJOR GENERAL O. O. HOWARD, U. S. A., has an interesting article in the September number of the New Princeton Review, on "The Freedman during the War."

COLONEL S. E. BLUNT, U. S. A., of Lieut.-Gen. Sheridan's staff, was an interested spectator of the rifle competitions this week progressing at Fort Niagara, N. Y.

CAPTAIN GEORGE MITCHELL, 2d U. S. Artillery, came to Washington this week from the Mountain Top Hotel, near Afton, Va., and will rejoin at St. Augustine, Fla., in October.

GENERAL A. McD. McCOOK and Majors G. B. Sanford and H. S. Hawkins, U. S. A., have returned to Fort Leavenworth from Grand Island, Neb., where they attended the G. A. R. reunion.

GENERAL JOHN NEWTON, U. S. A., has got well into the harness of his new position in New York City and is busily engaged in the "weeding out" process, found to be necessary in many cases.

COLONEL R. N. BATCHELDER, U. S. A., arrived in Charleston, S. C., this week and rendered efficient aid in the distribution of Government relief to the homeless and suffering people of that stricken city.

COLONEL C. E. BLUNT, Corps of Engineers, U. S. Army, relinquishes duty at Portland, Me., on Friday of this week, and will spend the interval between his retirement, which will take place Feb. 1 next, on leave.

JUDGE ADVOCATE ASA BIRD GARDINER, U. S. A., whose health, as we stated last week, has been very poor for some time past, has received a six months' sick leave, so will not join at Fort Leavenworth until next spring.

LIEUTENANT D. W. FULTON, 24th U. S. Infantry, a recent graduate, has returned to his home at Gay's, Moultrie County, Ill., from a hunting expedition in Wisconsin, and will leave soon again to join his company at Fort Supply, I. T.

CAPTAIN G. A. GOODALE, 23d U. S. Infantry, and bride were in Brooklyn, N. Y., early in the week, and later returned to Wakefield, Mass., to spend a few weeks. In October they will go to Fort Mackinac, Mich., to spend the winter.

LIEUTENANT H. C. KEENE, JR., 24th U. S. Infantry, son of Lieut. H. C. Keene, U. S. Navy, retired, a graduate of 1886, was married at Chelsea, Mass., Aug. 26, to Miss Mary F. Lovett. The married couple will shortly start for Fort Reno, I. T., the groom's station.

LIEUTENANT-COLONEL R. F. O'BEIRNE, 15th Infantry, Major S. S. Sumner, 8th Cavalry, and Major W. L. Kellogg, 19th Infantry, are expected in New York in a few days to report to the superintendent of the recruiting service for assignment respectively to David's Island, Jefferson Barracks, and Columbus Barracks.

COLONEL R. H. HALL, U. S. A., Inspector General of the Platte, is East on a month's leave.

BRIGADIER GENERAL J. A. POTTER, U. S. A., has rejoined at Fort Leavenworth from a short absence.

LIEUTENANT C. REICHMANN, 24th U. S. Infantry, lately at Fort Leavenworth, has joined at Fort Sill, I. T.

MAJOR J. F. RANDLETT, 9th Cavalry, under his recent promotion will take station at Fort Robinson, Nebraska,

LIEUTENANT C. H. WATTS, 5th Cavalry, and Mrs. Watts, lately visiting at Fort Leavenworth, have joined at Fort Supply.

GENERAL GEORGE CROOK, U. S. A., and Lieut. Kennon, A. D. C., have returned to Omaha from a visit to Fort Du Chesne.

CAPTAIN J. M. KELLEY, 10th Cavalry, has returned to Jefferson Barracks, Mo., from a trip to Washington Territory with recruits.

CAPTAIN G. W. H. STOUCH, 3d Infantry, who is East on leave, came on to Washington this week from his home at York, Pa.

LIEUTENANT A. CRONKHITE, 4th U. S. Artillery, is due at Fort Monroe, Va., about Sept. 10, from a few weeks' sojourn at Afton, Va.

LIEUTENANT J. Y. F. BLAKE, 6th Cavalry, and Mrs. Blake, joined at Fort Leavenworth a few days ago from Grand Rapids, Mich.

LIEUTENANT J. E. SAWYER, 5th U. S. Artillery, and family, of Governor's Island, are spending a few weeks at Richfield Springs.

COLONEL J. D. WILKINS, U. S. A., lately retired, and family, are in Washington which is henceforth to be their permanent residence.

MAJOR GENERAL A. H. TERRY, U. S. A., expects to attend the Division of the Missouri rifle contests at Fort Leavenworth to present the prizes.

GENERAL COUNT SAIGO and the other distinguished Japanese visitors to the United States sailed for England on Saturday last on the *Aurania*.

CAPTAIN J. L. CLEM, Assistant Quartermaster, U. S. A., who recently left Fort McHenry, Md., has got settled down to business at Ogden, Utah.

CAPTAIN J. F. MOUNT, 3d U. S. Artillery, and family, now at Rockville, Md., enjoying a vacation, will rejoin at Washington Barracks early in October.

COLONEL R. S. LA MOTTE, 12th U. S. Infantry, has rejoined at Plattsburg Barracks, N. Y., from his trip to the Pacific Coast and resumed command of the post.

CAPTAIN C. T. WITHERELL, 19th Infantry, of Fort Clark, Tex., after completing his rifle competitions at Fort Leavenworth will come East on a month's leave.

COLONEL G. L. ANDREWS, 25th U. S. Infantry, whose recruiting tour in New York will expire in a few days, is preparing to turn over the superintendency to Col. A. L. Hough.

MAJOR GENERAL J. M. SCHOFIELD, U. S. A., and staff, left Governor's Island this week for Fort Niagara, to be present at the wind-up of the Division Atlantic rifle competitions.

LIEUTENANT R. T. YEATMAN, 14th Infantry, lately appointed regimental quartermaster, has an excellent record dating from June 14, 1872, the date of his graduation from West Point.

ASSISTANT SURGEON L. W. CRAMPTON, U. S. A., of Fort Bridger, Wyo., having completed rifle competitions at Bellevue, Neb., will spend a few weeks in the East before returning to his post.

COLONEL A. A. WOODHULL, surgeon, U. S. A., has received many congratulations on his success in obtaining the gold medal of the Military Service Institution of the United States for the prize essay of 1885.

CARDINAL TASCHEREAU visited the Admiral aboard the French flagship *La Minerve* at Quebec, Sept. 3, and received a salute of 15 guns. The United States Consul also went aboard and received a salute of seven guns.

LIEUTENANT C. E. GILLETTE, Corps of Engineers, U. S. A., is to be congratulated as the winner of the Department of the East gold medal, having made the highest aggregate score in the three days' preliminary practice at Fort Niagara.

LIEUTENANT C. C. CUSICK, 22d Infantry, who was honored with a cloudless ballot for admission into the "Order of Elks," in Kansas City, Mo., last November, was duly installed, and had the entire degrees of the Order conferred upon him Sept. 4.

MRS. AND MISS O'CONNELL, wife and daughter of Lieut. O'Connell, 1st U. S. Infantry, are making the tour of Canada, accompanied by Mr. and Mrs. Le Boutillier, of East Walnut Hills, Cincinnati. Lieut. O'Connell has left California for a two years' recruiting tour of duty in the East.

COLONEL G. V. HENRY, U. S. A., Rifle Inspector, Department Platte, has sent $10 to Lieut. Reade, 3d Infantry, as prize money for the division competition. Col. Henry's generous action is recommended to the Inspectors of Rifle Practice of other Departments of the Division.—*Kansas City Times.*

COLONEL AND MRS. J. P. MARTIN have returned to Fort Leavenworth from an extended trip to the Pacific Coast. On the return voyage they stopped over at Fort Lewis, Col., as the guests of Capt. Geo. S. Anderson, 6th Cavalry. Both are delighted with their trip and express satisfaction for having been in a cooler clime during the hot weather here.—*Kansas City Times.*

ONE of the brightest and most polite little fellows in Cottage City, Mass., says the local *Chronicle*, is Fritz Overton, son of Capt. Overton, 6th U. S. Cav., from the far away plains of Arizona, and a guest at Mrs. Robinson's cottage, Sea View ave. Among recent guests at Mattakeset Lodge, Katama (Martha's Vineyard), Mass., are Col. J. B. Parke, U. S. A., and Mrs. Parke, and Capt. G. E. Overton and Mrs. Overton.

ASSISTANT SURGEON R. W. JOHNSON, U. S. A., left Fort Adams, R. I., on Tuesday, on a short leave.

MAJOR G. M. BRAYTON, 15th U. S. Infantry, on leave from Fort Pembina, was in St. Paul a few days ago.

COLONEL C. W. FOSTER, Depot Quartermaster, St. Louis, was in Omaha with his family last week, on his way East.

LIEUTENANT F. WOODBRIDGE, 7th Infantry, lately visiting at New Brunswick, N. J., was in Washington this week.

LIEUTENANT C. H. MUIR, 17th Infantry, has rejoined at Fort D. A. Russell, Wyo., from the Bellevue Rifle Range.

LIEUTENANT A. B. JOHNSON, A. D. C. to General Terry, has returned to Chicago from a visit to his parents at St. Paul.

MAJOR GENERAL J. M. SCHOFIELD, U. S. A., and a large party of friends attended the yacht race in New York Bay on Tuesday.

LIEUTENANT C. A. BOOTH, 7th Infantry, returned to Rock Springs this week from a trip East to visit his family, now in Vermont.

COLONEL H. L. CHIPMAN is still at Fort Steele with a detachment, packing and shipping the property preparatory to leaving the post.

LIEUTENANT SEDGWICK RICE, U. S. A., was in Wichita, Kas., this week, a witness before the U. S. Court in the Oklahoma boomer cases.

LIEUTENANT D. E. HOLLEY, 1st Infantry, lately visiting at 108 E. 86th street, New York City, has received an extension of leave until Sept. 30.

BRIGADIER GENERAL JOHN GIBBON, U. S. A., was re-elected president of the Iron Brigade, at the 11th annual reunion held last week at Oshkosh, Wis.

LIEUTENANT FRANK TAYLOR, 14th U. S. Infantry, and Assistant Surgeon P. G. Wales, U. S. A., are recent guests at the Occidental Hotel, San Francisco.

MAJOR A. S. KIMBALL, U. S. A., General Miles's Chief Quartermaster, now that things are settling down in Arizona, will avail himself of a two months' leave.

GENERAL T. M. VINCENT, U. S. A., has taken charge of the Judge Advocate's office, Department of Dakota, until a successor is appointed to Colonel T. F. Barr.

VALENTINE BAKER PASHA, says London *Truth*, "returned last week to Egypt, and I am glad to learn that his health has been much benefited by his visit to England."

LIEUTENANTS J. T. KNIGHT and Geo. W. Read, U. S. A., married Sept. 2 at Fort Hancock, Texas, to the Misses Edith and Burton Young, are travelling Eastward on their bridal tour.

GENERAL and Mrs. Crook left Omaha September 5 for the East, expecting to spend a month at Mrs. Crook's home after attending a reunion of the General's old regiment in Ohio.

MAJOR WM. MCE. DYE, late Chief of Police District of Columbia, has been appointed Chief of the old War and Navy Division of the Pension Office, vice Mr. Webster, resigned.

LIEUTENANT FRED. S. STRONG, 4th U. S. Artillery, Professor of Military Science and Tactics at the Michigan Military Academy, and Mrs. Strong, are spending the summer vacation in England and France.

LIEUTENANT O. B. MITCHAM, Ordnance Department, left Cheyenne September 5 with his family for the East. He has been ordered to West Point, but before reporting there for duty will leave his family at the seashore.

THE magnificent collection of Indian trophies and Aztec curiosities gathered by the late Capt. Emmet Crawford, 3d Cavalry, during his long frontier service, is being exhibited at the Omaha Exposition this week by his brother, Mr. L. T. Crawford, of Kearney, Nebraska.

LIEUTENANTS JOSEPH GARRARD, 9th Cavalry, and Jackson, 7th Infantry, says the Cheyenne *Leader*, did some good shooting at Bellevue. Lieut. Garrard is a cousin of Dr. Garrard, the courtly and popular receiver of our land office. Both Lieutenants are Kentuckians, and as the young officers passed through Cheyenne on their way to Omaha the doctor told them that if they did not keep up the reputation of the "dark and bloody ground" for sharpshooting, he would cut their acquaintance.

THE death of Col. Hunt, of the 14th Infantry, occasions the following promotions: Lieut. Col. Thos. M. Anderson, from the 9th to colonel of the 14th; Maj. Geo. M. Brayton, from the 15th to lieutenant colonel of the 9th; Capt. Hugh A. Theaker, from the 16th to major of the 15th; 1st Lieut. Theophilus W. Morrison to captain 16th, and 2d Lieut. Warren H. Cowles to be 1st lieutenant of the 16th. The 16th Infantry thus gets its first promotion below the grade of captain since June 28, 1885, when Capt. Richards was advanced a grade.

THE Omaha *Excelsior*, of Sept. 4, says:

In relieving Col. Burnham as Judge-Advocate, General Crook expresses his appreciation of Col. Burnham's conscientious fidelity to his duties during his long tour of service in this Department.... Lieut. J. K. Waring, 2d Inf., was at Fort Omaha for a few hours Sept. 1 shaking hands with his brother officers. His jolly round face was a welcome sight to his many friends at regimental headquarters.... A contingent of troops from Fort Omaha have been at Grand Island during the week assisting at the G. A. R. celebration. Major Butler was in command, and the officers with the companies were Capts. Daggett, Catley, and Haines, and Lieuts. Ames, Abercrombie, and Van Liew, the latter acting as battalion adjutant. Gen. Wheaton also went down Aug. 31 to remain a few days.... Lieut. Benham, 2d Inf., leaves tomorrow to enter upon duties as instructor of military tactics at the Schenectady Military Academy.... Lieut. H. B. Sarson, 2d Inf., has had his leave extended until about the middle of November, but writes that he will probably return to Fort Omaha by Oct. 1.... Gen. and Mrs. Crook and her sister, Mrs. Reed, go East for a month's stay at their mountain home in Virginia. Gen. Crook is also going to attend a military reunion in Ohio.... Miss Lizzie Waring, of Fort Niobrara, was a guest last week in New York at a "yachting clam bake" party given by Capt. Stafford 15th Infantry.

SIR CHARLES DILKE is variously reported in Canada, the United States, and Boulogne.

GENERAL S. K. DAWSON, U. S. A., registered at the Murray Hill Hotel, New York, on Thursday.

CAPTAIN HENRY ROMEYN, 5th U. S. Infantry, is preparing a work on "Riot Tactics" for the Army.

GENERAL J. S. BRISBIN, U. S. A., will rejoin at Fort Niobrara, Neb., this week, from a fortnight's leave.

INSPECTOR GENERAL ABSALOM BAIRD, U. S. A., was at Fort Leavenworth this week, the guest of Gen. McCook.

ADJUTANT G. K. MCGUNNEGLE, 15th U. S. Infantry, has taken charge of recruiting matters at Fort Buford, D. T.

GENERAL W. T. SHERMAN, U. S. A., arrived in New York this week from Montreal, looking hale and hearty as ever.

LIEUTENANT J. K. THOMPSON, 23d Infantry, will leave Fort Porter, N. Y., in a few days to spend the winter abroad.

ASSISTANT SURGEON F. V. WALKER, U. S. A., was in New York early in the week, and afterwards left for Fort Adams, R. I.

LIEUTENANT W. GEARY, 19th Infantry, of Fort Clark, Tex., has been summoned North by the serious illness of his father.

CAPTAIN S. M. MILLS, 5th U. S. Artillery, has rejoined at Fort Monroe, Va., from a few weeks visit to the mountains with his family.

LIEUTENANT GREENE, 7th Infantry, is one of the many applicants for the post tradership at the next cantonment in Utah, Fort Du Chesne.

LIEUTENANTS W. A. NICHOLS, D. C. McCarthy and W. H. Johnson, U. S. A., of Fort Leavenworth, arrived in Jacksonville, Ill., September 6, to act as judges at a competitive drill, and were received with many honors.

GENERAL H. L. ABBOT and Col. O. M. Poe, of the Engineer Corps; Maj. Thomas Ward, A. A. G., and Capt. J. M. Marshall, A. Q. M., were at Sault Ste. Marie, Mich., this week to select the grounds for the new post of Fort Brady.

UNDER the will of his late brother, Colonel Lorenzo Sitgreaves, U. S. Army, retired, receives $8.000 of Easton (Pa.) National Bank stock, a quantity of silverware and pictures and a certain division of property after all bequests have been paid.

COLONEL C. L. BEST, 4th U. S. Artillery, was at Oakland Beach, R. I., inspecting State troops. He was the guest of Governor Wetmore. Major J. W. Roder, 4th U. S. Artillery, was also at Oakland Beach with his battery from Fort Adams.

GENERAL LEWIS MERRILL, U. S. A., attended the third annual reunion of the Michigan Battalion, known as the "Merrill Horse," at Battle Creek last week, and was accorded a magnificent reception at the banquet. Gen. Merrill being called out, feelingly responded to the many compliments and tokens of affection shown him.

THE following Army officers registered at the office of the Adjutant-General during the week: 1st Lieut. Edward Burr, Engrs.; 1st Lieut. Geo. K. Hunter, 3d Cav.; Capt. Edward Field, 4th Art.; Capt. Harry G. Cavenaugh. 13th Inf.; Col. John D. Wilkins, retired; 1st Lieut. Walter S. Scott, 25th Inf., and Capt. J. Gales Ramsay, 2d Art.

WE are pleased to record the improved condition of Mrs. H. S. Kilbourne, wife of Surgeon H. S. Kilbourne, recently assigned to duty at Vancouver Barracks. She has been lying seriously ill for some weeks past, and a part of the time in a critical state, but it is believed that she will be very soon restored to her family and friends.

THE legal controversy between Gen. W. S. Harney, U. S. A., and his wife on one side and his children by a former wife on the other over the Harney estate was compromised Sept. 7. The General surrenders his life estate to his children, and they are to pay him $500 a month during life and assume a debt of nearly $100,000 to the Connecticut Mutual Life Insurance Company. The wife gets the General's personal property and part of the real estate in accordance with the marriage contract.

COLONEL THOS. F. BARR, Judge Advocate, U. S. A., has arrived in Chicago, and assumed his new duties at the Headquarters, Division of the Missouri. The *Pioneer-Press* says: "Col. Barr has seen many years' service in the Department of Dakota, and has become thoroughly identified with the people and interests of St. Paul. He now goes to Chicago for duty at Gen. Terry's headquarters. In leaving he carries with him the regrets of a large circle of friends, and their sincere wishes for his future welfare."

THE Vancouver *Independent* of Sept. 2 says:

Lieut. J. V. White, 1st Art., is at Port Townsend, on Court-martial duty.....Col. Rodney Smith, with his family, have arrived in San Francisco.....The wife of Lieut. Frank Greene, Signal Service, and children, left for Washington from Dayton, W. T., this week. . . .Captain A. H. Russell Ord. Dept., has returned after a month's cruise with Capt. Uriel Sebree on the *Manzanita* in Alaskan Waters.....Maj. A. B. Carey, Paymaster, returning from Alaska on leave from San Francisco, will call here on his way home and report to Gen. Gibbon.

THE engagement of Ensign Edward E. Capehart, U. S. N., to Miss Sadie F. Wadley, of Portsmouth, N. H., is announced.

MEDICAL DIRECTOR P. J. HORWITZ, U. S. N., now in Europe with his daughter, is expected in Philadelphia early in October.

REAR ADMIRAL J. J. ALMY, U. S. N., has returned from Bar Harbor, Me., to his residence at 1019 Vermont avenue, Washington, D. C.

H. D. TODD, Jr., son of Prof. H. D. Todd, of the Naval Academy, has passed the examinations at the West Point Military Academy.

COMDRS. B. J. CROMWELL and H. C. Taylor, Medical Insp. A. C. Rhoades and Ensign G. W. Street were registered at the Navy Department this week.

PAY DIRECTOR G. E. THORNTON, U. S. N., was at the Grand Hotel, New York, on Tuesday.

COMMODORE G. E. BELKNAP, of Mare Island, Cal., has placed his two sons at Trinity School, San Francisco.

COMMANDER F. W. DICKINS, U. S. N., will take a prominent part in the celebration at Hartford, Conn., Sept. 17.

LIEUTENANT A. MARIX, U. S. N., will spend the balance of his leave of absence in England, his P. O. address being care of B. F. Stevens, 4 Trafalgar square, London.

COMMANDER HORACE ELMER left Annapolis, Sept. 3, for Detroit, Mich., to assume the duties of Inspector of the 11th Light-house District. His family accompanied him.

LIEUT. W. SWIFT, U. S. N., sends from Yokohama to the New York *Herald* a list of the crew of the *Alert* who have contributed the sum of $83 towards the relief of distress in Ireland.

ADMIRAL D. D. PORTER, U. S. N., is paying a short visit to New York. The Admiral preserves his vigor and health most remarkably, for he is well past three score and ten of man's allotted span.

COMMANDER W. T. SAMPSON, U. S. N., assumed, this week, the superintendency of the Naval Academy. He has been succeeded at the Torpedo School at Newport by Commander C. F. Goodrich.

THE Naval Veteran Association, of Connecticut, will hold its third annual reunion in Hartford, on Sept. 17, the day selected for the dedication of the Soldiers and Sailors' Memorial Arch; and will join in the parade and dedicatory exercises of the day.

ACTING REAR ADMIRAL D. L. BRAINE, U. S. N., and his staff officers, Flag Lieut. H. H. Barroll, U. S. Navy, and Secretary Lieut. A. B. Wyckoff, U. S. N., sailed for the South Atlantic Station in the mail steamer *Finance*, from Newport News, Va., Sept. 11.

CHIEF ENGINEER H. L. SNYDER, U. S. N., Superintendent of the State, War and Navy Departments, has returned from a visit to the country much refreshed but not satisfied. Mr. Snyder returned to Washington just in time to enjoy the recent cool wave.

MR. W. G. SHOCK, finance clerk of the Bureau of Steam Engineering, and son of Engineer-in-Chief Wm. H. Shock, U. S. N., retired, and wife, have returned to Washington from a ten days' trip by water to Boston, much improved in health and with a strong desire to repeat the voyage at an early date.

THE boys of the training squadron were reviewed on Coaster's Harbor Island, Sept. 6, by Commodore P. C. Johnson, of the Portsmouth Navy-yard; Admiral Luce and officers of the *Tennessee* and the officers of the War College were present. Commodore Johnson was received with a salute of 11 guns.

THE Vallejo *Chronicle*, referring to the appreciation of the simultaneous dropping of the time ball at Mare Island Navy-yard and at San Francisco, compliments highly Lieut. U. R. Harris, U. S. N., who is in charge of the work at the Mare Island Observatory, and his assistant, Lieut. C. F. Pond, U. S. N.

ENSIGN CHAS. P. PLUNKETT, U. S. N., and Miss Ruth Tuck, daughter of Mr. W. C. Tuck, of Washington, were quietly married at St. Anne's Church, Annapolis, Md., Sept. 6. Ensign Plunkett's marriage was hastened in consequence of orders received, by which he is to report at once for duty in Alaska. After the ceremony the bridal party went to New York.

DR. TIFFT J. BECKWITH, of Elizabeth, N. J., and Miss Mai E. McCawley, a niece of Colonel C. G. McCawley, U. S. Marine Corps, were married at Washington, D. C., Sept. 2. Many prominent people were present. The ushers were P. Bradford, F. Whiting, W. M. McCawley and H. H. Smith. After the ceremony a short reception was held at the bride's home, after which Mr. and Mrs. Beckwith left for the Catskills

PASSED ASSISTANT ENGINEER JAMES ENTWISTLE, U. S. N., is looking forward at no distant day to a promotion, and will probably not go to sea again until after the receipt of his commission as Chief Engineer. The date of his present commission is Oct. 11, 1866, so that it cannot be said that promotions in the Corps of Naval Engineers occur with undue frequency. Mr. Entwistle returned from his last cruise in September, 1884.

ENSIGN W. J. SEARS, U. S. N., was at the St. James Hotel, Baltimore, this week, awaiting the sailing of Mr. Garrett's steam yacht *Albermarle*, on which he had been invited to make a yachting trip of two weeks to Fortress Monroe, Bar Harbor and Newport. The party, composed of Mr. Garrett and wife and several other ladies and gentlemen of Baltimore, were delayed by the illness of Mr. Garrett's daughter. As soon as she is better the yacht will sail.

CAPTAIN F. M. RAMSAY, recently relieved from duty as Superintendent of the Naval Academy, will, it is believed, be ordered to command the *Boston*, notwithstanding the rumor that he is to be placed in charge of the ordnance work at the Washington Navy-yard after the 1st proximo. He has recently rented the "Dodge House" in Georgetown, D. C., a fine residence on Washington street, near West. This fact would seem to indicate that he does not expect duty at the Yard, as otherwise he would undoubtedly occupy one of the pretty homes there.

A BELFAST Captain named Veazie was once happily surprised in a foreign country. His ship had struck a sunken ledge off the coast of China, and was rapidly filling. The crew were anxiously thinking of pirates, when their worst fears seemed realized by the appearance of a Chinese man-of-war, from which an officer dressed as a high mandarin took a boat for their vessel. His first salutation, however, was to the captain's wife, whom he addressed as "aunt." The mandarin proved to be a nephew of Mrs. Veazie, named Reuben McCaslin, from Penobscot, Me., who had sailed away from his home at the age of 16 years, and was at this time a commodore in the Chinese Navy.—*Bucksport (Me.) Clipper.*

CAPTAIN HENRY WILSON, U. S. N., has returned to Norfolk, Va., from a month's leave.

THE marriage of Lieut. Carroll Mercer, U. S. Marine Corps, to Miss Harper Paschal is fixed for October 19.

PAY INSPECTOR J. H. STEVENSON, U. S. N., was in New York this week, with quarters at the Gilsey House.

CHAPLAIN E. K. RAWSON, U. S. N., lately residing at Albany, N. Y., will join at the Naval Academy next Wednesday for duty.

COMMODORE HARMONY is now filling nearly as many important positions as Poobah in the play of the Mikado. By reason of the absence of Secretary Whitney from Washington, he is Acting Secretary of the Navy; during the absence of Commodore Walker he becomes the official adminstrator of the Bureau of Navigation; and, lastly, he is Chief of Bureau of Yards and Docks.

WE learn with regret of the continued illness of Rear Admiral C. H. Baldwin, U. S. N. His health is regarded as most unsatisfactory, and he has decided to sell his cottage at Newport where so many, civilians and Navy people, have enjoyed the polished hospitality of the Admiral. It is said that Mr. F. D. Carley, of Louisville, Ky., is the purchaser of the villa "Snug Harbor," for which a round sum was paid.

PASSED ASSISTANT ENGINEER B. C. GOWING, U. S. N., recently concluded a successful examination for promotion to the grade of Chief Engineer. There is no vacancy existing for him at present, but he will be nominated to fill the first one occurring after this date. Mr. Gowing graduated from the Rensselaer Polytechnic Institute in 1861, and in September of the same year he entered the Navy as 3d Assistant Engineer. He served under Farragut at the capture of New Orleans and on the Mississippi River until some of the heaviest fighting was done, and afterwards was on blockade duty off Mobile. From January, 1866, to December, 1867, was on duty at the Naval Academy. His last cruise was on board the U. S. flagship *Brooklyn* on the South Atlantic Station.

RECENT DEATHS.

INTELLIGENCE has been received at the War Department of the death of Colonel Lewis C. Hunt, 14th Infantry, Brevet Brigadier-General, U. S. A., which occurred at Fort Union, New Mexico, Sept. 6. No particulars concerning the cause of death were given, though it is known that he has been in failing health for some time. No officer in the Service was more thoroughly identified with it by ties of friendship and kinship. He was a son of Thos. F. Hunt, who died as Colonel and A. Q. M. General in 1856, and who received the brevet of Colonel May 30, 1848; the brother of General H. J. Hunt; the son-in-law of the late General Silas Casey; the brother-in-law of his sons, Thomas L. and Edward, of the Army, and Silas, of the Navy, and also of Colonel Robert N. Scott, 3d Art., and the uncle of Thomas L. Casey, Jr., of the Army, and the late Henry J. Hunt, Jr., of the Navy. No man in the Service was more highly respected for his personal qualities. His service extended over a period of more than forty years from his entrance to the Military Academy as a cadet July 1, 1843. He graduated No. 33 in a class of 35, which included among its members John Hamilton, Julian McAllister, O. B. Willcox, John S. Mason, James B. Fry, Horatio G. Gibson, Ambrose E. Burnside, John Gibbon, Clement L. Best, Romeyn B. Ayres, Charles Griffin, Henry M. Black, Henry B. Hendershott, Tredwell Moore, Thomas H. Neill, W. W. Burns, Egbert L. Viele, August H. Seward and Peter W. L. Plympton. His earlier service was on the frontier, and in 1855 he had attained the rank of Captain in the 4th U. S. Infantry. During the war he served with great credit. On the 21st of May, 1862, he was appointed Colonel of the 92d New York Volunteers, received the brevet of Major May 31, 1862, for his gallantry at Fair Oaks, and on the 29th of November, 1862, was appointed Brigadier-General of Volunteers. He was promoted Major of the 14th U. S. Infantry June 8, 1863. For his gallantry at Kinston, N. C., he received the brevet of Lieutenant-Colonel, and for his distinguished services throughout the war he received the brevets of Colonel and Brigadier-General U. S. Army March 13, 1865. He was promoted Lieutenant-Colonel March 29, 1868, and Colonel of the 14th U. S. Infantry May 19, 1881. His record of over forty years service is an unblemished one, and his death will be sincerely lamented by the many old comrades who survive him.

POST CHAPLAIN EBENEZER W. BRADY, U. S. A., died at Fort D. A. Russell, Wyo., September 9. He served during the war as Chaplain of the 110th Ohio Infantry, and was appointed Post Chaplain February 19, 1884.

GENERAL LLOYD ASPINWALL, a prominent resident of New York City, died suddenly of apoplexy at Bristol, R. I., Sept. 4. Gen. Aspinwall was born in New York in 1835. His first connection with the State troops was in 1853, when he enlisted as private in the 4th Regiment of Artillery. In 1854 he was advanced to the staff. At the beginning of the war he was active in organizing the 22d Regiment, and elected lieutenant colonel, had command during its entire term of enlistment, and was promoted to colonel. He was charged with the purchase and equipment of the vessels which composed the expe-

dition to Newbern, and was president of a board of officers to revise the regulations. At the battle of Fredericksburg he acted as a volunteer aid to Gen. Burnside, who was despatched to make the first verbal report of that great engagement to President Lincoln. Afterwards he was elected brigadier general of the 4th Brigade, National Guard, and for a time as senior officer had command of the 1st Division. During the same period he was president of the State Military Association. He was for some time president of the Army and Navy Club, of which he was one of the founders. The funeral took place on Wednesday from St. Mark's Church, New York, and was largely attended by delegations from the Loyal Legion, Grand Army of the Republic, etc.

JOSEPH SAMPÉ, whose name, with that of De la Tour d'Auvergne, the "first Grenadier of France," is one of the cherished traditions of the French Army, died recently at the Invalides, having passed a century of life. He was a *decoré* of the First Consul and a pet and pensionnirre of the late Emperor. During the Italian campaign Sampé, so youthful as to be termed *l'enfant de troupe*, was a trumpeter of the 63d Regiment of the Line. In a severe engagement his colonel was shot and fell from his horse. Driven back by superior numbers, his soldiers would have left him, presumed to be dead, on the field, when suddenly the little trumpeter cried out, "we cannot leave the body of our brave colonel behind us," and with two others rushed back to recover his commander. Sampé alone reached the spot, his comrades being killed. Napoleon, hearing of his bravery, sent for him, and in the presence of the regiment gave him the ribbon of the Legion. Fortunately, too, for the colonel, he was not dead, but recovered from his wounds.

GENERAL BENJAMIN F. CHEATHAM, a name familiar during the war, died at Nashville, Tenn., Sept. 4. He had but recently been appointed postmaster of that city. Gen. Cheatham served with distinction early in the Mexican War as a captain of the 1st Tennessee Volunteers, commanded by Col. W. B. Campbell, and subsequently was appointed colonel of the 3d Tennessee Volunteers. In 1861 he joined the Confederate service, rose to major general, and took a prominent part in several battles.

MR. BENJAMIN THAXTER, the oldest merchant of Boston, died Sept. 6, in his 98th year. When Mr. Thaxter came to Boston he first found employment as supercargo of a vessel bound to Mediterranean ports. On the return voyage the vessel stopped at Chesapeake Bay, where it was captured by an English man-of-war. Mr. Thaxter was held at that port as a prisoner, and was confined at the time the news of Commo. Perry's great victory was received there.

COLONEL FRANCIS L. LEE, who served with distinction during the war as colonel of the 44th Massachusetts Infantry, died at Westport, N. Y., Sept. 2. His widow is the youngest daughter of Gen. James Wilson, of New Hampshire, a famous figure forty years ago in the politics of the State. Mrs. John Sherwood, of New York, is a member of the same family. He leaves five children, two sons and three daughters.

MR. EDWIN M. LAWTON, disbursing clerk of the War Department, who was stricken with paralysis last month, died Sept. 5, in his 53d year. The funeral took place Sept. 7, and was attended by many of the Army officers, clerks, etc., on duty in Washington. Mr. Lawton was born in England, entered the Government service in 1863, and was appointed disbursing clerk April 1, 1875.

THE death is announced from Paris of Donna Dolore de Frias at an advanced age. Her first husband was General Narcisso Lopez, who figures in history as the principal leader of the Cuban revolution of 1851 and who was executed for his connection therewith. The lady afterward married Antonio Saco, a distinguished Cuban publicist.

MRS. LYDIA STILLWELL, who died in New York Sept. 6, in her 94th year, was the daughter of Jared Stillwell, one of the heroes of the Revolutionary War. In the winter of 1780-81 Jared Stillwell was captured by the British and lodged in the old jail which was situated on the site now occupied by the Hall of Records. He died in 1847.

MRS. REBECCA CARY, who recently celebrated her 95th birthday at her home near Pleasant Run, Butler Co., Ohio, was the daughter of a soldier of the Revolutionary War. She was married to William Cary in 1809, and had three sons, two of whom—Gen. Samuel F. Cary and Freeman G. Cary—are still living.

ORDNANCE SERGEANT ANTHONY MAGUIRE, U. S. A., a veteran and faithful soldier, died Aug. 29, 1886, at Plattsburg Barracks, N. Y., which had been his post of duty since March 31, 1862. He was appointed ordnance sergeant March 24, 1862, from 1st sergeant. Co. E, 2d U. S. Infantry.

REBECCA M. COOPER, daughter of the late Captain Benjamin Cooper, U. S. Navy, died at Brooklyn, September 4, and was buried September 6 from the residence of Mr. C. E. Bill, No. 147 Columbia Heights. Her father, Captain Cooper, died at Brooklyn in 1850.

MRS. ARTHUR, widow of Capt. Benjamin H. Arthur, 1st U. S. Inf., died at Cincinnati, Aug. 29. Captain Arthur died in 1856.

RIFLE COMPETITIONS, 1886.

All the Department rifle competitions have now been brought to a close, and the Division competitions, followed by the Army competitions are now in order. The teams of the Departments of Columbia, Missouri, Texas, Arizona and Platte have already been given in the JOURNAL, leaving California and Dakota which are given below.

Division of the Atlantic.—The competitions closed Sept. 10, amid great enthusiasm, Maj. Gen. Schofield being present to award the medals in person. The range was crowded, and the first year's experience has amply demonstrated the wisdom of selecting Fort Niagara as the site of the Division of the Atlantic rifle range. The three days preliminary competitions, which closed Sept. 4, showed the victor to be Lieut. C. E. Gillette, Corps of Engineers, U. S. A. He accordingly receives the Department gold medal. His score was:

First day, known distance firing	163
Second day, skirmish firing	76
Third day, known distance firing	172
Aggregate	411

The second day of the Division competition closed on Wednesday with the first run as skirmishers. For the first day's firing (known distance) Lieut. C. G. Treat, 5th Artillery, led with a score of 176, closely followed by Sergeant Huddleson, 4th Artillery, and Lieut. F. A. Smith, 12th Infantry, with 174 each. The 14th man was crowded out by a score of 168. For the skirmish firing, Wednesday, Sergeant Doyle, Battalion of Engineers, led with a score of 83. Lts. Smith and Treat both dropped off the team with low skirmish records. The aggregate for two days is as given on enclosed slip. Lieut. Gillette is the winner of the Department gold medal, to be awarded for the best aggregate score in the three days' preliminary practice, Sept. 2, 3 and 4. Score: 163 1st day. 172 2d day. 76 Skirmish. Total..... 411

In a pool skirmish match, Lieut. Gillette won the 1st cash prize with a score of 101, the first score of over 90. Sergeant Doyle, Co. A, Battalion of Engineers, followed with 99. The Division competition closed Thursday, the 9th, with the second skirmish run. The selection of the best skirmisher from each regiment was then made, preparatory to the match of Friday and Saturday for the Department skirmish medal. The scores of the first two days were as follows:

	1st Day. Known. Distances.				2d Day. Skirmish.	Total.
	200	300	500	600		
1. Sergt. Huddleson, K, 4th Art...	41	44	42	47	80	254
2. C. E. Gillette, C. E.....	38	41	49	36	81	245
3. 1st Sergt. Beck, E, 12th.....	41	37	44	39	81	242
4. Sergt. Barrett, B, of Engrs.....	42	39	38	41	76	236
5. Pvt. Corrie, Band 5th.....	44	45	45	39	62	235
6. Sergt. Doyle, A, of Engrs.....	43	39	32	37	83	232
7. Pvt. Bickers, A, 12th.....	40	41	39	43	68	231
8. Sergt. Driscoll, F, 23d.....	45	40	42	44	55	226
9. Collins, L, 4th.....	43	41	44	36	61	225
10. Brill, G, 12th.....	41	41	39	42	61	224
11. 1st Lieut. W. O. Clark, 12th	41	45	37	45	55	223
12. Corpl. Scott, G, 4th.....	41	41	45	40	51	218
13. 1st Sergt. Helfer, A, 5th.....	39	42	43	35	58	217
14. 1st Lieut. E. T. Brown, 5th.....	42	40	45	42	48	217

Division of the Missouri.—Fort Leavenworth is full of riflemen and the post presents a busy aspect. Everybody is in good shape for the contests which commence Sept. 13. Gens. Terry, Potter, Cols. S. E. Blunt, Guy V. Henry and other distinguished officers will be present. Lieut. Philip Reade, 3d Inf., the Division Rifle Inspector, will conduct the contest. The aggregate score by which the gold medal was won this year in each Department is as follows:
